Program Description

Program

Special Imaging technologists work in a highly specialized field operating sophisticated imaging equipment. They provide detailed cross-sectional images of the human body, assisting physicians with quality patient diagnosis and treatment.

Students have the option to take both CT and MRI together as a single 12-month (four quarters) program, or CT or MRI alone as an individual 6-month (two quarters) program. Any option results in the student receiving a University certificate in the modality of choice.

- Any option is a full-time, 40 hour-per-week program, which includes didactic and clinical experience.

- Clinical involves four (4), eight (8) hour days per week.

- Classes are scheduled for one day per week and may require the student to be on campus. There are no arrangements for part-time or evening status.

- Students will experience hands on training in their chosen modality.

Program Length

4 quarter (12 months)

Possible Careers

Computed Tomography and/or Magnetic Resonance Imaging

Notes

- Amounts are what a student can apply to borrow for the number of months shown in each academic year based on living off campus with a roommate and not with a relative.
- International students need to calculate 12 months of living expenses based on the numbers listed here.
- In general, to qualify for financial aid a student must be enrolled at least half time taking degree requirements. Half time is 6 units in a quarter for undergraduate programs and 4 units in a quarter for graduate programs.
