Legal Notice
This CATALOG is the definitive statement of Loma Linda University on the requirements for admission, enrollment, curriculum, and graduation. The University reserves the right to change the requirements and policies set forth in this CATALOG at any time upon reasonable notice. In the event of conflict between the statements of this CATALOG and any other statements by faculty or administration, the provisions of this CATALOG shall control, unless express notice is given that the CATALOG is being modified.

The information in this CATALOG is made as accurate as is possible at the time of publication. Students are responsible for informing themselves of and satisfactorily meeting all requirements pertinent to their relationship with the University. The University reserves the right to make such changes as circumstances demand with reference to admission, registration, tuition and fees, attendance, curriculum requirements, conduct, academic standing, candidacy, and graduation.

This CATALOG contains the operating policy statements for Loma Linda University's educational programs. Any deviation from these policies must be approved by University administration.

INTRODUCTION

Loma Linda University (LLU) (http://www.llu.edu) is a Seventh-day Adventist educational health sciences institution located in Southern California. With more than 4,400 students, its eight schools comprise the University organization. More than 105 academic degree programs are offered by the Schools of Allied Health Professions (http://www.llu.edu/allied-health), Behavioral Health, (http://www.llu.edu/behavioral-health) Dentistry (http://www.llu.edu/dentistry), Medicine (http://www.llu.edu/medicine), Nursing (http://www.llu.edu/nursing), Pharmacy (http://www.llu.edu/pharmacy), Public Health (http://www.llu.edu/public-health), and Religion (http://www.llu.edu/religion). Curricula offered range from certificates of completion and Associate in Science degrees to Doctor of Philosophy and professional doctoral degrees. Students from more than 80 countries around the world and virtually every state in the nation are represented in Loma Linda University’s student body. The University also offers distance education. For a list of programs, see <https://home.llu.edu/education/office-of-provost/educational-effectiveness/online-programs>.
President’s Welcome

It is a privilege to welcome you to Loma Linda University. This is a unique place—one that balances on the twin foundations of faith and science. Being a student here will expose you to a group of faculty and staff members who have chosen to be part of this experience we call Loma Linda. They have chosen to work here because they share in the belief that this is a special place.

We emphasize what we call mission-focused learning. This means that what we offer centers on more than producing knowledgeable professionals because we believe that who you are is even more important than what you know. To assist in this lifelong process, we are encouraging the enculturation of our seven core values, known by the acronym JCHIEFS. These values are Justice, Compassion, Humility, Integrity, Excellence, Freedom, and Self-Control/Purity. I encourage each of you to search your own heart and find ways to strengthen these virtues in everything you do.

You also will find an incredible mixture of cultural diversity on our campus. Revel in our similarities and differences, and use each interaction to help you understand the issues that separate us. With understanding comes acceptance. And with acceptance come peace and fellowship. Use your time at Loma Linda to seek out those from other countries and cultures from whom you can learn and gain greater understanding. We will all be better as we tear down those barriers that often separate us.

All this uniqueness is centered on the profound belief that God is here, active in the lives and experiences of each of us. Through our weekly University at Worship, the prayers of faculty members in class, and the daily interchanges across campus, I invite you to join me in getting to know Him better. Place your future in His hands. Have confidence in His leading. Seek out opportunities to fellowship and grow in His love.

Thank you for joining our campus family. I hope it will become as special to you as it has for so many of our 46,000 alumni.

Cordially yours,

Richard H. Hart, M.D., Dr.P.H.
President
Loma Linda University
Programs, Degrees, and Certificates

The degree and certificate curricula at Loma Linda University are under continuous review and are, therefore, subject to change and improvement without prior notice, as the need occurs. The University also offers nondegree and short courses throughout the United States and globally to meet the continuing education and extension program needs of alumni, health professionals, and lay persons in the church and in the community. Most degree courses are approved for continuing education credit.

School-specific certificates are awarded upon completion of organized programs of study at the postsecondary level. Students register for courses through the Office of University Records; but certificates are issued by the school, which maintains records of the certificates and their awarding. Financial aid is not available to students registered in school-specific programs. See school programs in each school for a listing of school-specific certificates available.

The Faculty of Graduate Studies oversees Ph.D. and research master’s degrees, as well as combined degrees programs.

Accreditation Overview

The University is accredited as a degree-granting institution by the Western Association of Schools and Colleges (WSCUC) Senior College and University Commission (WSCUC). Schools' programs are accredited by appropriate accrediting agencies, and graduates are eligible to take qualifying examinations of the respective state and national licensing or registration bodies and to join professional organizations. Details of accreditations are given in the individual programs and in Section VI of this CATALOG.

Founded as College of Evangelists in 1905-06, the University was chartered as College of Medical Evangelists by the state of California on December 13, 1909; and was accredited by Northwest Association of Secondary and Higher Schools on April 7, 1937. Accredited by WASC (prior to January 1962, Western College Association) on February 24, 1960, it became Loma Linda University on July 1, 1961.

Accrediting agencies

Loma Linda University is fully accredited by WSCUC, which may be contacted at:

WSCUC Senior College and University Commission (WSCUC)
985 Atlantic Avenue, Suite 100
Alameda, CA 94501
Phone: 510/748-9001
FAX: 510/748-9797
website: <https://www.wascsenior.org>
e-mail: <wascsr@wascsenior.org>

WSCUC is an institutional accrediting agency recognized by the U.S. Secretary of Education and the Commission on Recognition of Postsecondary Accreditation.

Loma Linda University is also accredited by the Adventist Accrediting Association (AAA) of the Seventh-day Adventist Church Department of Education.

In addition to WSCUC and AAA, the following organizations accredit specific University schools or programs:

Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics
Accreditation Council for Occupational Therapy Education (ACOTE)
Accreditation Council for Pharmacy Education (ACPE)
Accreditation Review Commission on Education for the Physician Assistant, Inc. (ARC-PA)
American Registry of Radiologic Technology (ARRT)
Commission on Accreditation for Health Informatics and Information Management Education (CAHIM)
Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE) of the American Association for Marriage and Family Therapy (AAMFT)
Commission on Accreditation for Respiratory Care (CoARC)
Commission on Accreditation of Allied Health Education Programs (CAAAHEP)
Commission on Accreditation in Physical Therapy Education (CAPTE)
Commission on Accreditation (CoA) of the American Psychological Association (APA)
Commission on Accreditation (COA) of the Council on Social Work Education (CSWE)
Commission on Collegiate Nursing Education (CCNE) of the American Association of Colleges of Nursing (AACN)
Commission on Dental Accreditation (CODA) of the American Dental Association (ADA)

The following organizations also approve specific University schools or programs:

Approval Committee for Certificate Programs (ACCP), a joint committee established by the Association for Healthcare Documentation Integrity (AHDI) and the American Health Information Management Association (AHIMA)
California Department of Public Health (CDPH) Laboratory Field Services (LFS)
California Department of Public Health (CDPH) Radiologic Health Branch (RHB)
California Board of Registered Nursing (BRN)
Commission on Teacher Credentialing (CTC)

For a current list of accrediting agencies, please contact the Office of the Provost.

Affirmative Action

The University routinely monitors its educational and employment practices regarding women, minorities, and the disabled to ensure compliance with the law and University policy. The University's affirmative action policy is to provide equal access to admissions, educational programs and activities, financial aid, student services, and employment.

In compliance with Title IX of the Educational Amendments of 1972 and Section 504 of the Rehabilitation Act of 1973, a grievance procedure has been established to process student complaints alleging violation of these regulations or of the University's policy of nondiscrimination based on gender or disability. Inquiries concerning Title IX may be directed to the Title IX coordinator. Employment-related discrimination complaints, including those filed by student employees, are processed in conformity with the provisions outlined in existing staff personnel policies. Complaints related to discrimination in academic areas are
reviewed in conformity with the procedures established by the academic administration.

Accommodation for Disability

Loma Linda University is in compliance with the Americans with Disabilities Act, Sec. 504 of the Rehabilitation Act; as well as with local and state requirements. The University is committed to providing education—including support services and reasonable accommodations for disabilities—to qualified applicants for whom such accommodation does not fundamentally alter the chosen program or create an undue burden.

For information regarding accommodation for disability, the student should consult the office of the dean of the school to which application for admission is being made.

Following acceptance, the student may be asked if he or she has a disability requiring accommodation. A student who desires accommodation for a disability (e.g., physical, learning, or psychological) identified after acceptance should consult the office of the dean regarding a request for accommodation. The accommodation request must be submitted in writing on the designated form. The completed form and the required supporting documentation will be evaluated by appropriate University entities to determine whether or not the applicant can be expected to perform the essential functions of the program. All discussions will remain confidential.

Nondiscrimination Policy

Loma Linda University was established by the Seventh-day Adventist church as an integral part of its teaching ministry. The University affirms that Christian principles are incompatible with various forms of discrimination that have divided societies; and that all persons are of equal worth in the sight of God and should be so regarded by all His people. Therefore, the University is committed to equal education and employment opportunities for men and women of all races; and does not unlawfully discriminate on the basis of veteran status, handicap, gender identity, sexual orientation, race, color, or national origin in its educational or admissions policies, financial affairs, employment programs, student life and services, or any University-administered program.

To this end, the University is in compliance with Titles VI and VII of the Civil Rights Act of 1964 as amended; and is in substantial compliance with Title IX of the Education Amendments of 1972 (34 CFR 106 et seq.), Sections 503 and 504 of the Rehabilitation Discrimination in Employment Act of 1967, and Section 402 of the Vietnam Era Veterans Adjustment Act of 1974; and does not discriminate against any employees or applicants for employment on the basis of age because they are disabled veterans or veterans of the Vietnam era. In addition, the University administers student programs without discrimination on the basis of age—except in those programs where age is a bona fide academic qualification for admission—in accordance with the provisions of the Age Discrimination Act of 1975.

The University reserves constitutional and statutory rights as a religious institution and employer to give preference to Seventh-day Adventists in admissions and employment, including but not limited to 42 U.S.C. Secs. 2000e-1, 2000e-2; Sec. 6-15 of Federal Executive Orders 11246 and 13279; 41 CFR Sec. 60-1.5(5); 20 U.S.C. Sec. 1681 (a)(3); 34 CFR Secs. 106.12(a)(b), 106.21, 106.31, 106.39, 106.40, 106.51, and 106.57; California Government Code Sec. 12926(d)(1); Title II, Division 4, Chapter 2, Sec. 7286.5 of the California Code of Regulations; the First Amendment to the United States Constitution; and Article 1, Sec. 4, of the California Constitution. The University believes that Title IX regulations are subject to constitutional guarantees against unreasonable entanglement with or infringements on the religious teachings and practices of the Seventh-day Adventist Church.
The Academic Calendar

Academic dates for Faculty of Graduate Studies (FGS) and the Schools of:

AH Allied Health Professions
BH Behavioral Health
SD Dentistry
SM Medicine
SN Nursing
SP Pharmacy
PH Public Health
SR Religion

For the most current event information, visit the University's Event Calendar (https://home.llu.edu/events).

2019

January

1 – 4 SR Offices closed for Christmas/New Year holidays
2 SD Winter Quarter begins (all programs)
3 SP Winter Quarter begins
7 U Winter Quarter Begins (standard term programs)
7 SP Spring block begins
9 U Wil Alexander Wholeness: Exploring America’s Wilderness (5:00-5:50 p.m. Damazo Amphitheater)
14 U Last day to register with a late fee (Winter Quarter standard term)
14 – 18 U Week of Renewal
21 U Martin Luther King, Jr. holiday
22 U Last day to drop without a “W” (standard term courses)
23 U Wil Alexander Wholeness: Food for Thought (5:00-5:50 p.m., Damazo Amphitheater)

February

2 SN Dedication Service
15 SM First-year family day and dedication
18 U President’s Day holiday
25 – March 1 SP Exam week
27 U Wil Alexander Wholeness: Student Film Festival (5:00-5:50 p.m., Damazo Amphitheater)
28 – March 4 U University-wide homecoming convention

March

1 – 5 U One LLU Homecoming
4 U Last day to drop with a "W" (standard term courses)
6 U Wil Alexander Wholeness: Unhurried Living (5:00-5:50 p.m., Damazo Amphitheater)
11 U Spring registration begins (standard term programs)
11 – 14 SD Winter Quarter final examinations

April

1 U Spring Quarter begins (standard term programs)
8 U Last day to register with a late fee (Spring Quarter standard term programs)
8 – 12 U Week of Renewal
15 U Last day to drop without a "W" (standard term courses)
29 – May 3 U Spring block final examination week

May

3 SP PY1-PY3 academic year ends
9 U School Awards chapel
15 SM Second-year academic year ends
15 SD DDS graduation banquet
15 SN Graduation kick-off
20 SP APPE begins
23 SD IDP graduation banquet
23 SP Senior banquet
24 SM Consecration and hooding ceremony
24 SP Hooding Ceremony
25 SD/SM/SP Baccalaureate services
26 SD/SM/SP Commencement services
27 U Memorial Day holiday
28 U Last day to drop with a "W" (standard term courses)

June

3 U Summer registration opens (standard term programs)
3 – 6 SD Spring Quarter final examinations
6 SD Spring Quarter ends (DDS, IDP, DH)
7 SD Faculty advance seminar
9 SR Graduate banquet
14 AH/BH/PH/SN/SR Focus on Graduates vespers service

ABOUT THE UNIVERSITY

University foundation

History

Loma Linda University is part of the Seventh-day Adventist system of higher education. In 1905, the University (formerly College of Medical Evangelists) was founded—through a series of divine providences—at Loma Linda, California, by the Seventh-day Adventist Church. The School of Nursing began in 1905. In 1909, the College of Medical Evangelists received its charter as a medical school with the express purpose of preparing physicians who could meet the needs of the whole person. Both schools emphasized the need for healthful living as a part of medical care—a revolutionary concept in 1905.

The University was designated by the Seventh-day Adventist Church as a center for educating health professionals. The original schools—Nursing and Medicine—have been joined by Allied Health Professions, Behavioral Health, Dentistry, Pharmacy, Public Health, and Religion; and the Faculty of Graduate Studies. University curricula are approved by their respective professional organizations. From its small beginnings, the University has achieved widespread recognition, having sent more of its graduates into international service than has any other university. It remains committed to the vision of its founders and is sustained by its close association with the church.

From 1913 to 1962, the University operated within health facilities in two cities: Loma Linda and Los Angeles. In September 1962, all health professional education was consolidated at Loma Linda. In 1967, Loma Linda University Medical Center opened in its new three-tower facility—a landmark cloverleaf structure. The medical center continues on the cutting edge of health care, providing excellent service for patients and expanding educational opportunities for students.

In 1990, the Board of Trustees designated Loma Linda University a health sciences university—part of a complex that includes Loma Linda University Medical Center, faculty practice plans, and affiliated institutions. The University is a leader in the field of health sciences education, research, and service.

The most current campus census figures (Summer 2017) indicate that the core of the combined faculties consists of 1,877 full-time teachers. Part-time and voluntary teachers (1,403—largely clinicians in the professional curricula) bring the total to 3,280. As of Autumn Quarter 2017, 630 students from 82 countries outside the United States are represented in the enrollment of 4,451.

A century of service

Today, the original 1905 property is part of an expanding health sciences campus that includes:

• six medical facilities, licensed for approximately 1,076 beds—
  • Loma Linda University Medical Center (LLUMC), 1966;
  • Loma Linda University Children's Hospital (LLUCH), 1993;
  • Loma Linda University Medical Center East Campus Hospital (LLUECH), 2003; licensed under LLUMC as Loma Linda University Community Medical Center (LLUCMC), 1993—formerly known as Loma Linda Community Hospital;
  • Loma Linda University Heart and Surgical Hospital (LLUHSH), 2009;
  • Loma Linda University Behavioral Medicine Center (LLUBMC)—an acute psychiatric care facility—1991;
  • Loma Linda University Medical Center-Murrieta, 2011.
• twelve Loma Linda University Health (LLUH) institutes, two LLUH-related research centers, and various school-related research centers (see Learning Environment (p. 21)).
• Loma Linda University (on campus, distance education, and online degree programs through the Schools of Allied Health Professions, Behavioral Health, Dentistry, Medicine, Nursing, Pharmacy, Public Health, and Religion; and the Faculty of Graduate Studies.
  • San Bernardino Campus - San Manuel Gateway College.

1905 School of Nursing
1909 The institution was named College of Medical Evangelists (CME)
1922 Department of Dietetics*
1937 School of Medical Technology*
1941 School of Physical Therapy*
1945 Radiologic Technology Program*
1948 School of Tropical and Preventive Medicine (reorganized as School of Public Health, 1964)

1958 Dental Hygiene Program
1959 Occupational Therapy Program*
1963 Medical Records Administration Program*
1966 Schools/Programs (see * above) consolidated as the School of Allied Health Professions
1967 Loma Linda University campus merges with La Sierra College
1968 Loma Linda University Medical Center dedicated
1990 Loma Linda and La Sierra campuses become two separate universities
1991 Loma Linda University designated a health sciences university
1997 Loma Linda University and Medical Center (corporately linked together through Loma Linda University Adventist Health Sciences Center—LLUAHSC)
2002 School of Pharmacy
2003 School of Science and Technology
2007 School of Religion
2012 School of Science and Technology closed
2012 School of Behavioral Health
2015 Corporation name changed from Loma Linda University Adventist Health Sciences Center (LLUAHSC) to Loma Linda University Health (LLUH)

Vision and Mission

Vision

Transforming lives through education, health care, and research
Mission

Loma Linda University—a Seventh-day Adventist Christian, health sciences institution—seeks to further the teaching and healing ministry of Jesus Christ "to make man whole" by:

Educating ethical and proficient Christian health professionals and scholars through instruction, example, and the pursuit of truth.

Expanding knowledge through research in the biological, behavioral, physical, and environmental sciences; and applying this knowledge to health and disease.

Providing comprehensive, competent, and compassionate health care for the whole person through faculty members, students, and alumni.

In harmony with our heritage and global mission:

- We encourage personal and professional growth through integrated development of the intellectual, physical, social, and spiritual dimensions of each member of the University community and those we serve.
- We promote an environment that reflects and builds respect for the diversity of humanity as ordained by God.
- We seek to serve a worldwide community by promoting healthful living, caring for the sick, and sharing the good news of a loving God.

To achieve our mission, we are committed to:

Our students

Our primary responsibility is the education of students who come from diverse ethnic and cultural backgrounds—enabling them to acquire the foundation of knowledge, skills, values, attitudes, and behaviors appropriate for their chosen academic or health-care ministry. We nurture their intellectual curiosity. We facilitate their development into active, independent learners. We provide continuing educational opportunities for our alumni and professional peers. We encourage a personal Christian faith that permeates the lives of those we educate.

Our faculty, staff, and administration

We respect our faculty, staff, and administration—who through education, research, and service create a stimulating learning environment for our students. They contribute to the development of new understandings in their chosen fields. They demonstrate both Christian values and competence in their scholarship and professions.

Our patients and others we serve

We provide humanitarian service through people, programs, and facilities. We promote healthful living and respond to the therapeutic and rehabilitative needs of people. We seek to enhance the quality of life for individuals in local, regional, national, and world communities.

Our God and our Church

We believe all persons are called to friendship with a loving God both now and throughout eternity. We support the global mission of the Seventh-day Adventist Church by responding to the need for skilled Christian health professionals and scholars. We seek to honor God and to uphold the values of the Seventh-day Adventist Church and its commitment to awakening inquiry. We are drawn by love to share the good news of God expressed through the life and gospel of Jesus Christ and to hasten His return.

A Seventh-day Adventist health sciences institution

University Philosophy

As implied by its motto, "To make man whole," the University affirms these tenets as central to its view of education:

God is the Creator and Sustainer of the universe.

Mankind’s fullest development entails a growing understanding of the individual in relation to both God and society.

The quest for truth and professional expertise in an environment permeated by religious values benefits the individual and society and advances the ministry of the Seventh-day Adventist Church.

"Wholeness means the lifelong, harmonious development of the physical, intellectual, emotional, relational, cultural, and spiritual dimensions of a person’s life, unified through a loving relationship with God and expressed in generous service to others."

Quoted in "The Grace of Wholeness" by Gerald R. Winslow, Ph.D., SCOPE, Spring 1999. Also quoted as the adopted definition of wholeness in the Loma Linda University Wholeness Inventory.

Core Values of Loma Linda University

The University affirms these values as central to its view of education:

COMPASSION—The sympathetic willingness to be engaged with the needs and sufferings of others. Among the most memorable depictions of compassion in Scripture is the story of the Good Samaritan, which Loma Linda University has taken as a central symbol of its work.

INTEGRITY—The quality of living a unified life in which one’s convictions are well-considered and match one’s actions. Integrity encompasses honesty, authenticity, and trustworthiness.

EXCELLENCE—The commitment to exceed minimum standards and expectations.

FREEDOM—The competency and privilege to make informed and accountable choices and to respect the freedom of others. God has called us not to slavery but to freedom.

JUSTICE—The commitment to equality and to treat others fairly, renouncing all forms of unfair discrimination. The God of the Bible is One who calls people continually to justice. According to the prophets, religious faith could be genuine only when it led the believers to "seek justice, rescue the oppressed, defend the orphans, [and] plead for the widow."

PURITY/SELF-CONTROL—The commitment to be morally upright and moderate in all things, with complete control over one’s emotions, desires, and actions.

HUMILITY—The willingness to serve others in a sacrificial manner, and the self-respect that renounces haughtiness or arrogance.

Institutional Learning Outcomes

Loma Linda University’s institutional learning outcomes (ILOs) for students are assessed throughout the degree programs within the University appropriate for the discipline and degree. The Office of Educational Effectiveness works with these programs to guide their
assessment. For more in-depth information about LLU’s ILO assessment, please see <http://www.llu.edu/central/assessment>.

- **Critical thinking**: Students demonstrate critical thinking through examination of ideas and evidence before formulating an opinion or conclusion.

- **Information literacy**: Students demonstrate the ability to identify, locate, evaluate, utilize, and share information.

- **Oral communication**: Students demonstrate effective oral communication skills in English.

- **Quantitative reasoning**: Students demonstrate the ability to reason and develop evidence-based decisions using numerical information.

- **Written communication**: Students demonstrate effective written communication skills in English.

**Mission-focused learning outcomes**

Loma Linda University’s three mission-focused learning outcomes (MFOs) are firmly rooted in its mission, vision, and values (p. 19). Because mission-focused learning is LLU’s culture, the University is developing specialized assessment processes to ensure integration of these outcomes over time.

- **Wholeness**: Students integrate wholeness in their personal and professional lives: Loved by God, growing in health, living with purpose in community.

- **Values**: Students integrate LLU’s Christ-centered values in their personal and professional lives.

**University Mace, Coat of Arms, and Seal**

Traditionally, the ceremonial mace represents the authority vested in the highest officer of a governing body. In an educational institution, the authority symbolized by the mace derives from respect for the authority of knowledge and for the rights and value of the individual. Thus the leader of an academic community assumes the obligation and challenge to ensure for its members a climate conducive to growth in knowledge and grace.

The construction of the ceremonial mace of Loma Linda University evokes further ideas. Its two metals, bronze and aluminum, suggest the value of lessons both ancient and contemporary. Rather than lying prone, an instrument to be wielded, this mace stands upright in celebration of the human spirit. Its open construction implies free exposure to questions, ideas, and conflict. The eight vertical supporting elements (at three points bound together as for strength and stability in unity) uphold a graceful oval that points outward to the universe, the province of inquiry.

Within the oval, the University seal appears to float unfettered. The basic design of the coat of arms and the seal of Loma Linda University—established in 1905 as the College of Medical Evangelists—is a contemporary modification of the shield, a heraldic device.

Within the seal, the Christian cross—a universal symbol—acknowledges the role of Jesus Christ as Savior and Redeemer.

The lighted torch—part of our logo since 1959—suggests the illuminating power of knowledge and the central role of the Holy Spirit in teaching and healing. It also references the institution’s call to serve as a light to the world.
the use of tobacco, alcohol, and other “recreational” drugs while enrolled at the University.

Spiritual Life

Worship experiences represent a critical dimension of the educational experience at Loma Linda University and are available to the student many times throughout the week. In addition to regular Friday evening and Saturday services, many class, school, club, and University activities include a component of worship and praise to God.

University at Worship services

In keeping with the commitment of our mission, Loma Linda University students have special requirements, such as University at Worship attendance each Wednesday morning in the University Church. These programs provide a variety of opportunities to integrate faith and learning. Undergraduates who live in the residence halls are also expected to attend worships in the residence halls each week.

Religion classes

Classes in religion are part of the core curriculum in each of the University’s schools and programs. These classes deal with the study of the Bible, ethics, clinical ministry (which concentrates on ways to understand and meet the spiritual needs of patients in a manner that is noninvasive and individually appropriate), and a variety of other issues related to the student’s field of study and personal spiritual journey.

All students who choose Loma Linda as their university make a commitment to conduct their lives in a manner that reflects their sense of responsibility for the honor and integrity of the University and of themselves as members of its community.

Learning Environment

Loma Linda University is dedicated to creating a learning environment that promotes the lifelong pursuit of knowledge, wisdom, and skills used for selfless service to humankind. Through intentional educational strategies, Loma Linda University interweaves its vision, mission, and core values with its student learning outcomes. The University’s mission of wholeness gives focus to the learning environment that balances mind, body, and spirit (psycho-social-physical-spiritual) and gives meaning to the motto of mission-focused learning. In this health-care institution, critical and analytical thinking skills in the health, behavioral, and natural sciences are blended with a commitment to spiritual and moral development.

Loma Linda University pledges to students, staff, faculty, alumni, and the local and global communities its commitment to upholding integrity, valuing diversity, engaging with the community in service learning scholarship, and honoring the process of ongoing self-assessment for the purpose of continuous quality improvement. The University and each of its schools, programs, and classes provide clearly defined student learning outcomes and measurable performance indicators to create a learning atmosphere that is clear and focused.

The University is engaged in systematic academic program review. Curricular maps are maintained for each program to assure alignment between student learning outcomes and planned academic activities. Program review follows carefully developed schedules as outlined in school-specific assessment matrices.

Loma Linda University is committed to using assessment data to guide academic and fiscal master planning for the University.

The total resources of the University offer a wealth of opportunity to the student with initiative and willingness to develop individual capacity to the fullest extent. The academic resources, affiliated clinical facilities, and community agencies constitute a rich educational environment both in classroom instruction and in guided experience. Major facilities utilized for clinical affiliations and internships include the University Medical Center; the Jerry L. Pettis Memorial Veterans Medical Center; and numerous other hospitals and agencies located in the Redlands, San Bernardino, Riverside, and Los Angeles areas; as well as throughout the United States and abroad. In addition, students find varied opportunities for service and learning in the immediate University community, in clinical and research electives, and in diverse volunteer programs.

University student mission-focused learning opportunities

SAC Health System (SACHS)

Social Action Community Health System (SACHS) is a federally qualified health center affiliated with Loma Linda University Health. It provides low-cost health services at several sites in the Inland Empire, including the new San Bernardino campus and the established SAC Norton campus. These clinical facilities provide educational opportunities for students and residents from Loma Linda, enabling them to become involved with patient care and community initiatives. This clinic network provides a wide spectrum of primary and specialty medical, dental care, and mental health services, and is an ideal site to work cross-culturally to develop an understanding of diverse populations. The San Manuel Gateway College is an integral part of the San Bernardino campus and provides certificate-level programs to high school graduates entering the health-care workforce. Loma Linda University students interact with and assist in these training programs.

Community-Academic Partners in Service (CAPS)

Community-Academic Partners in Service (CAPS) is a Loma Linda University program directed by the Institute for Community Partnerships. The program serves as the on-campus hub for connecting students and staff with volunteer opportunities in the San Bernardino area that are mutually beneficial and sustainable, that meet needs expressed by the local community, and that develop in students a lifelong passion for service. The numerous short-term and long-term community-engagement opportunities range from mentoring high school students, after-school tutoring, health education, college preparation, adult job skills, children’s ministry, and a family soccer league. In addition to directly coordinating several programs, CAPS also works closely with local organizations to provide volunteer support for programs and events, and also facilitates students’ service learning and community service placement needs.

To serve, students create a volunteer interest profile and list interests and availability on the CAPS online volunteer system. They can sign up for upcoming service opportunities, or they will be notified when opportunities in line with their interests are available. More information on volunteer opportunities can be found by visiting the CAPS website: <caps.llu.edu>; by calling (909) 651-5011; or by visiting the CAPS office in the Councilors Student Pavilion, Room 1402.
Del E. Webb Memorial Library

The main library supporting LLUH is the Del E. Webb Memorial Library. The library began in 1907 as a small collection in a room of the old Loma Linda Sanitarium. The growing collection moved to its own building in 1953. In 1981, funded by a Del E. Webb Foundation grant, construction increased the floor space of the library to 87,670 square feet. As of the fall of 2018, the recorded statistics for the health sciences segment of the library collection included 284,024 physical volumes, 150,458 monograph titles, 9,753 serial titles, and 112 databases.

For more detailed statistical information, consult the library's website at <https://library.llu.edu/about/statistics>.

Library mission

The mission of the Del E. Webb Memorial Library is to stimulate and support the information needs of the University's instructional, research, and service programs. To this end, the library provides a full range of information support services and resources including, but not limited to, collaborative and flexible information literacy instruction, information technology training, reference, specialized research support, document delivery, traditional print and digital book and journal collections, computer laboratory, and welcoming physical spaces for group and individual study.

Access to resources

The Del E. Webb Memorial Library catalog (http://catalog.llu.edu) provides access to all of the library's resources. In addition to the collections of the Del E. Webb Memorial Library, other collections include the Ethics Library, Religion Library, and those belonging to the Geoscience Research Center.

The library participates in national and regional networks such as the National Network of the Libraries of Medicine (NNLM), founded by the National Library of Medicine. The national network is divided into eight regions, one of which is the Pacific Southwest Region. The library is the designated Resource Library for the NNLM in this area of the Pacific Southwest Region. As a resource library for the NNLM, the library maintains deep information resources in the health sciences and further expands its offerings through multiple cooperative agreements with varied local and national groups such as Southern California Electronic Library Consortium (SCELC) and Link+. Link+ (http://linkencore.iii.com) is a book-request service and union catalog of over 60 libraries throughout California and Nevada.

Department of Archives and Special Collections

The Department of Archives and Special Collections is the central repository for information on the history of Loma Linda University. Adventist health work around the globe, the history of the health sciences, and the history and development of the Seventh-day Adventist church. Included in the department's collections are the congressional papers of Jerry L. Pettis and Shirley N. Pettis. Jerry Pettis was the first Seventh-day Adventist congressional representative and former College of Medical Evangelists employee. Shirley N. Pettis assumed her husband's congressional seat after his tragic death in 1975. Through departmental purchases and donations large and small, the department now houses one of the significant research collections of Adventist source materials worldwide. Recent collecting efforts made possible by the generous James F. Barnard Endowment have focused on building an already substantial collection related to biblical prophecy. The collections house materials in all formats: print, microform, sound recordings, photographic, manuscript, and digital.

The department houses significant collections of materials in all areas of the health sciences, in multiple languages, including a significant collection in the history of nursing that came as a donation from the New York Academy of Medicine. Recent years have focused on the areas where Loma Linda University, the history of the health sciences, and the Seventh-day Adventist church intersect—nineteenth century health reform, diet, vegetarianism, the development of Adventist sanitariums, hydrotherapy, and other relevant topics.

University Archives

The purpose of the original Historical Records Office was to preserve those archival records deemed important to the founding and history of the College of Medical Evangelists. This work is being continued by the official University Archives, which is also under the direction of and housed within the Department of Archives and Special Collections. Loma Linda University Archives houses official documents and files for all Loma Linda University schools, departments, administrative offices, and other entities. This includes board minutes, president's papers, provost/chancellor files, University committees, departmental files, photographs of University events, people, buildings, and more. The archives collect and preserve copies of all University publications, such as bulletins, course catalogs, journals, periodicals, departmental newsletters, flyers, posters, and more. Additionally, the archives maintain the copy of record of all theses and dissertations produced by Loma Linda University students. The archives actively seeks the papers of current and former faculty, staff, and students that add to the story of Loma Linda University Health.

Ellen G. White Estate Branch Office

The Ellen G. White Estate Branch Office, while a separate organizational entity, is physically located within the University Libraries, Del E. Webb Memorial Library, and, with the Department of Archives and Special Collections and University Archives, forms part of the Heritage Research Center. The mission of the branch office is to preserve, promote, guide, and facilitate an understanding of Ellen G. White's life, writings, and role within the history of the Seventh-day Adventist church and Loma Linda University. Ellen G. White was one of the founders of the College of Medical Evangelists and was firmly committed to seeing the Adventist medical institution grow, thrive, and fulfill our mission of continuing the teaching and healing ministry of Jesus Christ. Thus, her legacy is an important part of the University's history and future developments. The branch office houses and makes accessible Ellen White's letters, manuscripts, articles, and published works.

Learning resources

On the campus, many learning resources for the student offer various opportunities for academic study and research. Each school center is listed with its most closely affiliated school.

Admission Policies and Information

Personal qualities
Loma Linda University was established to provide professional health education in a distinctively Christian environment that prepares well-qualified, dedicated health science professionals who are committed to fulfilling the mission of this University to serve humanity. Students at Loma Linda University are expected to uphold the Christian ethical and moral standards of this Seventh-day Adventist Church-related institution while on and off campus.

The University's emphasis on health and the health professions, as well as the practices of the supporting church, preclude admission of applicants who use tobacco, alcoholic beverages, or narcotics. The rights of the individual are recognized and respected; however, any conduct that is contrary to the principles governing a healthful and moral lifestyle is not acceptable for a Loma Linda University student. The prospective student has the freedom to accept or reject these principles and practices prior to applying. Once application is made to this University, the applicant has chosen to abide by these principles and practices.

In selecting students for entrance to programs in the schools, admissions committees look for evidence of personal integrity, academic achievement, healthful lifestyle, self-discipline, self-direction, and service to others. An applicant accepted to a school must possess capabilities to complete the full curriculum in the allotted time at the levels of competence required.

While preference is given to Seventh-day Adventist Church members, anyone interested in studying at Loma Linda University and willing to live by the institution's standards is encouraged to apply.

Many programs require faculty interviews. Acceptance of an applicant into any curriculum is contingent on the recommendation of the department conducting the program.

Applications and admissions
Where to apply
It is important to know the specifics of the application process and to begin this process well in advance of the date of anticipated or desired entrance. Application procedures and application materials can be found online at <www.llu.edu/apply>.

Application review process
All completed applications are reviewed by the appropriate admissions committee, which recommends the final decision regarding acceptance.

Applicant's records
The application and all supporting records and documents become the property of the University.

Application deferral
Applicants are accepted for a specified entering term. If the applicant does not enter the program at the time stated for admission, the application will become inactive unless the school receives a written request to defer the application. Not all programs permit an applicant to defer an application; however, for those programs for which this is permitted, an application may not be deferred for more than one year. After one year, a new application must be submitted. Accepted applicants who wish to reactivate their acceptances at a later date must apply to the school for reactivation. Previous acceptance does not guarantee acceptance at a later time. Individuals must meet admission and graduation requirements that are in effect for the school year during which they first register.

Re-entrance
See Continuous enrollment policy (p. 39).

Combined degrees programs
Information regarding combined degrees programs, their curricula, pre-entry requirements, distribution of instruction, graduation requirements, finances, and additional information, may be obtained from the school and program directors responsible for the programs. See Section III of this CATALOG for combined degrees program options.

Admissions classifications
Applicants are admitted under one of three classifications and must be approved for acceptance by the department(s) in which they propose to do their major concentration. Acceptance into a specific program is required before any credit earned can be applied to a degree or certificate.

Regular
Regular status is given to a student who has met all entrance requirements and is registered for a standard course of study leading toward a degree or certificate in one of the schools of the University.

Provisional
Provisional status may be given to a student who has been accepted for admission but has not yet received regular status, either because of qualitative or quantitative deficiencies in the academic record.

Nondegree
Nondegree status may be granted to a student who has not been admitted to a degree or certificate program but who is registered for selected courses in one of the schools of the University. Nondegree students are limited to a total of 12 units cumulative of courses that are applicable to a degree program at this University.

Admission requirements
The following components of the application process are university admission requirements. Additional school and program specific admission requirements may be found in the program-specific pages of this CATALOG.

Online application
The LLU application is only available online and can be found at <llu.edu/apply>.

Letters of recommendation
Three letters of recommendation are required. Some programs specify individuals from whom these recommendations should come. For programs requiring specific recommenders, information can be found on the respective program pages of this CATALOG.

Official transcripts
The University accepts only official transcripts sent directly to Loma Linda University from the college, university, or high school issuing it. Transcripts submitted by the student are not considered official.
Applicants not applying through a central application service (such as AAMCAS and AADSAS) must provide official transcripts of all postsecondary education prior to offers of admission. International applicants (non-U.S. citizens and non-permanent residents) must meet all admission requirements for the chosen program before an offer of acceptance can be issued, whether or not the program uses a central application service. Official final transcripts documenting completion of all coursework must be submitted to the University immediately upon completion.

Applicants to undergraduate programs of the University are required to furnish evidence (transcripts, GED, CHSPE, or equivalent) of completion of high school in order to be granted admission. The final transcript must include the date of graduation or completion. Applicants who hold an associate’s degree from a regionally accredited college/university upon admission do not need to furnish a high school transcript, unless required to validate specific course work. Applicants expecting an associate’s degree to be awarded before matriculation at Loma Linda University must provide documentation (e.g., letter mailed from registrar to the University) showing expected degree completion. Otherwise, evidence of completion of high school will be required for acceptance.

Final transcripts showing the awarding of a bachelor’s degree are required for applicants to programs that require a bachelor’s degree. If the degree is not yet posted on the transcript the applicant must submit documentation (e.g., letter mailed from registrar to the University) verifying completion of bachelor’s degree prior to matriculation. Continuing enrollment is contingent upon the receipt of all official final transcripts.

Degrees earned from a recognized degree-granting college or university accredited by a U.S. regional association, including those institutions which have been awarded “candidacy” status by a U.S. regional accrediting body during the period the institution held this status, and degrees earned at an international institution recognized as a degree-granting institution by its government.

Applicants who have attended international schools are required to submit official transcripts (mark sheets) in the original language, which convey the grades and credits earned in each subject, and an English translation of their transcripts, if not already in English.

Official education transcripts (or mark sheets), degrees earned from international institutions, or professional credentials must be sent to an evaluation center approved by Loma Linda University. The specified center reports the evaluation results directly to the Office of University Admissions.

Transcripts and evaluation results received by the University become the property of the University and will not be released to the student or forwarded to any other institution.

English proficiency
Regardless of nationality or citizenship, an applicant whose native language is not English or whose secondary education has been obtained outside the U.S. is required to pass an approved test of English proficiency. Additionally, any applicant whose English competency is uncertain in regards to his/her professional success at Loma Linda University may be required to pass a test of English proficiency. The minimum required score for International English Language Testing System (IELTS) is 6.5. The minimum required score on Michigan English Language Assessment Battery (MELAB) is 77. A minimum Test of English as a Foreign Language (TOEFL) score of 80 (internet-based) or 550 (paper-based) is required. The TOEFL score is valid for two years from the test date. If it has been more than two years since the examinee last took TOEFL, the test must be taken again to have the scores reported. Visit the TOEFL Web site at <http://www.ets.org/toefl> for the most up-to-date information and examination registration.

Pre-entrance requirements
Some programs require official pre-entrance examination results. Specific instructions are available online.

Health care
Operating under Loma Linda University Health, the Center for Health Promotion’s Student Health Service is committed to providing quality health care to the students within our University community. Our physicians and staff are dedicated to promoting a lifestyle that encourages a balance of physical, spiritual, emotional, and social well-being.

For needs that arise while a student is enrolled at Loma Linda University, Student Health Service is the primary source of care. Potential students should complete any routine medical and dental care and/or elective surgery needs prior to arriving on campus.

Pre-entrance health requirements
Prior to enrolling in classes, newly admitted students must fulfill specific health requirements, as outlined on the New Student Health Requirements page. Unmet requirements are listed in the New Student Portal. Loma Linda University is committed to protecting the health of our students, the University community, and our patient population. These health requirements not only promote health, but also accustom new students to the responsibilities of a health-care professional. A completed pre-entrance health requirements form (available on the web at <http://home.llu.edu/new-student-health>), with all necessary documentation, should be submitted at least three weeks prior to the beginning of registration in order to register or attend classes.

- MMR (measles, mumps, rubella): Documentation of two MMR vaccinations given after age 1, or submit positive blood titer reports for each disease (must be quantitative IgG antibody titers).
- Tuberculosis Screening:
  1. All students will complete the check boxes on the “TB screening form” within the pre-entrance health requirements form.
  2. All students must provide TB skin test results. The date of testing must be no more than six months prior to the start of the program.
     - For negative results, submit current documentation.
     - For positive results, submit PPD documentation and a copy of a chest-x-ray report taken within the last year.
- Tdap (tetanus, diphtheria, pertussis): A Tdap dose within the past ten years OR a Tdap dose within the past ten years and 1 dose of Tdap after age 18 years.
- Varicella (chickenpox): Documentation of two Varicella vaccinations given after age 1, or submit a positive blood titer report (must be quantitative IgG antibody titer).
- Hepatitis B: Documentation of a complete series (three immunizations required), or submit positive blood titer report (must be quantitative hepatitis B surface antibody).

Pre-entrance health requirements:
- Tdap (tetanus, diphtheria, pertussis): A Tdap dose within the past ten years OR a Tdap dose within the past ten years and 1 dose of Tdap after age 18 years.
- Varicella (chickenpox): Documentation of two Varicella vaccinations given after age 1, or submit a positive blood titer report (must be quantitative IgG antibody titer).
- Hepatitis B: Documentation of a complete series (three immunizations required), or submit positive blood titer report (must be quantitative hepatitis B surface antibody).

For needs that arise while a student is enrolled at Loma Linda University, Student Health Service is the primary source of care. Potential students should complete any routine medical and dental care and/or elective surgery needs prior to arriving on campus.

- Hepatitis B: Documentation of a complete series (three immunizations required), or submit positive blood titer report (must be quantitative hepatitis B surface antibody).
• Please note: Some schools will require titers in addition to immunizations.

For further information, visit the Student Health Service website at <http://home.llu.edu/student-health> or contact Student Health Service at 909/558-8770. For additional information on the communicable diseases policy, consult the Student Handbook at <llu.edu/student-handbook>, University Policies: Communicable disease transmission-prevention policy.

**Background check**

After students are accepted and confirmed, they will receive a link on their New Student Portal that will allow them to get a required University-specific background check. Other background checks will not be accepted.

**Advisement**

Upon admission into a degree program, each student is assigned an academic advisor who serves as the student’s first line of communication in addressing professional and personal successes and potential challenges.

Academic advisors are prepared to discuss career opportunities, academic policies, academic problems, curricula, and personal circumstances. It is the student’s responsibility to consult with his/her advisor in planning the program of study. Thereafter, advisees should schedule counseling sessions with their advisors to monitor progress and assure completion of degree requirements. When questions arise relating to curriculum or policy requirements, students should always refer first to the CATALOG and their own program curriculum outlines. Next, they may seek counsel from their academic advisor. Questions arising after discussion with the advisor should be referred to the department chair or the academic dean.

Orientation and advisement sessions are scheduled for all new students. These sessions provide general guidance regarding student services, health care, library resources, safety and security, registration procedures, and academic policies.

**International students**

International applicants (non-U.S. citizens and non-U.S. permanent residents) must meet all admissions requirements for the chosen program before an offer of acceptance can be issued. This includes all official postsecondary transcripts (or mark sheets) and degree certificates, official evaluations of non-U.S. course work, English proficiency, and admission examination requirements, as detailed below.

After acceptance into the chosen program, the Office of International Student and Scholar Services will contact international applicants and guide them through the appropriate procedures for obtaining student visas, which include providing evidence of their financial ability to meet estimated living expenses and all financial obligations to the University that will occur during their programs. For questions, please contact International Student and Scholar Services at 909/558-4955.

**Pre-entrance examination results**

All official pre-entrance test scores (e.g., TOEFL, GRE) as required by each program must be sent directly to the Office of University Admissions by the testing organization.

**International evaluations**

All international (non-U.S.) transcripts, including high school, must be submitted to one of the LLU-approved evaluation services. See <llu.edu/central/apply/intltrans.page> for a list of approved companies.

**Finances and employment**

United States immigration regulations and Loma Linda University require that international students must be prepared to provide an advance deposit and must provide documentation that additional funds will be forthcoming to meet school expenses. The deposit will be held by the University during the program of study and will be applied to the last quarter’s tuition charge. Alternatively, the deposit may be refunded, less any outstanding balance on the account, if the student is denied a visa or terminates his/her program.

Scholarships and assistantships for international students are scarce. The student should contact the Loma Linda University Financial Aid office and speak with a financial aid advisor regarding availability and application information.

F- and J-visa international students must obtain written authorization from International Student and Scholar Services before accepting any on-campus employment. Off-campus employment requires prior issue of a work permit by the U.S. Citizenship and Immigration Services. F- and J-visa students must limit their employment to 20 or fewer hours per week while registered for courses and while classes are in session. Regulations allow full-time work (40 hours or fewer per week) during school breaks and summer vacations (if a student’s program allows summer quarters off). For questions, please call International Student and Scholar Services at 909/558-4955.

**Visas**

**F-1 student visas**

Loma Linda University is authorized by the United States Department of Homeland Security to issue F-visa applications (i.e., I-20 forms). The F-1 student visa is the visa of choice for most international students coming to Loma Linda University. This visa allows some non-degree study (certificates and internships). Degree-earning students are subject to study load requirements and are allowed limited on-campus employment.

The I-20 is issued after a student:

• has been accepted into a program and all official transcripts (mark sheets) have been appropriately evaluated and received by the University,
• has paid the advance deposit, as required by his/her program, and
• has documented his/her financial plan for the chosen program.

International Student and Scholar Services can be contacted at 909/558-4955 for further information regarding the F-1 student visa and the regulations governing this visa.

**J-visa exchange program**

Loma Linda University has an approved exchange visitor program under the U.S. Department of State. This J-visa exchange program is authorized to sponsor/host degree-earning students, non-degree (continuing education) students, student interns, short-term scholars, visiting professors, and research scholars. A J-visa application form (DS-2019) is issued after an exchange visitor has been accepted into a program, scholar position, or professor position; and has documented his/her financial plan (including health insurance for the J-1 and all J-2 dependents).
Loma Linda University also hosts exchange visitors who are sponsored by other organizations (e.g., Fulbright scholars). As a hosting institution, Loma Linda University has limited authority over these exchange visitors since the authority resides with the sponsoring organization.

Under current exchange visitor regulations, J-2 dependents are allowed to enroll part or full time at Loma Linda University. Also, their credits earned can either be degree or non-degree applicable.

J-1 exchange visitors are allowed to work; but employment guidelines differ, depending on the exchange category. Contact International Student and Scholar Services at 909/558-4955 for further information and regulations governing the exchange visitor program.

Other visas
International students may enter the U.S. on a wide variety of visas. However, a visa may have to be changed before a student can commence academic studies at this University. For further information regarding regulations and study options for specific visa types, contact International Student and Scholar Services at 909/558-4955.

Transfer students
International students currently attending other schools in the United States who have either an I-20 or a DS-2019 and who wish to attend Loma Linda University must do a school-to-school transfer. The timing of a transfer is critical in order to maintain visa status; therefore, it is important to consult with an international advisor at each school as soon as the acceptance letter is received.

Study load
Both the F- and J-student-visa regulations require the successful completion of a full study load during each quarter of every academic year (as defined by each program). A minimum of 12 units per quarter is usually considered full time for an undergraduate program; eight units per quarter is considered full time for a graduate program. In any quarter in which there will be a reduced study load, prior approval is needed from an international student advisor in International Student and Scholar Services.

Division of General Studies

General education requirements
The Division of General Studies offers general education courses that contribute to the fulfillment of requirements that apply to the Bachelor of Science degree programs in the Schools of Allied Health Professions, Dentistry, and Nursing. In addition, these schools offer a variety of general education courses that are open to students across all schools. The Division of General Studies also provides oversight for courses that may be selected to enrich a student's academic experience but that do not fulfill Loma Linda University general education requirements.

Loma Linda University philosophy of general education
As a Seventh-day Adventist health sciences institution, Loma Linda University seeks to exemplify a life of service and sensitivity beyond the requirements of academic excellence within a professional discipline. With its rich spiritual heritage, the University places special emphasis on educating its students for a life of service in a global community.

General education at Loma Linda University consists of courses, lectures, programs, and activities coordinated with the intent to integrate faith and learning. In addition to the basics of cultural heritage and diversity, scientific inquiry and analysis, communication, and wellness, the curriculum emphasizes the University's spiritual heritage; as well as moral and ethical decision making that is grounded in Christian principles.

Thus, a general education is considered to be the cornerstone upon which students begin cultivating their abilities to:

1. Present the fundamental Christian principles and Adventist heritage that undergird Loma Linda University.
2. Make informed moral and ethical decisions.
3. Incorporate critical thinking skills into personal and professional experience.
4. Value individuals with diverse capabilities and ideological, ethnic, gender, and generational perspectives.
5. Communicate effectively.
6. Undertake scientific inquiry and analysis.
7. Appreciate the contributions of the arts and humanities to society.
8. Examine the historical basis of the health sciences professions.
9. Develop self-awareness through balance of mental, physical, social, and spiritual aspects of daily living.
10. Model servant leadership in health care as exemplified by Jesus of Nazareth.

The Loma Linda University philosophy of general education creates a unique learning environment committed to the concept of human wholeness. Faculty members are selected who embrace the spirit as well as the specifics of general education and who purpose to extend its goals into all aspects of University life—from the residence hall programs to the core of professional studies—thus adding an invisible curriculum to the required course offerings. It is this spirit, in tandem with the specifics of a liberal arts education, that inspires students to achieve academic excellence, value diversity, pursue lifelong learning, and live to bless others.

Loma Linda University criteria for general education courses

- The course assists the health sciences student in cultivating abilities in one or more of the preceding 10 aspects described in the Loma Linda University philosophy of general education for baccalaureate degrees.
- The primary focus of the course contributes to the relevant knowledge and understanding of a subject area within one of the following domains described in the Loma Linda University general education requirements for baccalaureate degrees.
- The course is based on appropriate prerequisites, particularly when offered at the upper division level.
- The course is open to all baccalaureate degree students of Loma Linda University for general education credit.
- Courses transferred to Loma Linda University for general education credit from another accredited institution must fall within one of the domains described in Loma Linda University’s general education requirements for the baccalaureate degree.
Course requirements

Loma Linda University general education requirements (68 quarter units)

In harmony with its commitment to wholeness, Loma Linda University requires all students graduating with a baccalaureate degree to complete a minimum of 68 quarter units of general education, which are integrated into the entire undergraduate program. Requirements are organized into five domains, as outlined in the following:

Domain 1: Religion and Humanities (28–32 quarter units)
The study of religion must include an average of four units of religion course work for every 48 quarter units earned while attending a Seventh-day Adventist college or university. For students who did not earn all their credit at a Seventh-day Adventist college or university, the required religion units will be prorated based on the number of credits earned at a Seventh-day Adventist college or university (i.e., one unit for every 12 units taken at a Seventh-day Adventist institution). All students earning a bachelor’s degree, including those who have met the preceding requirements, must take at least one course in religion from Loma Linda University (see following paragraph). All required credits in religion must be earned from a Seventh-day Adventist institution, but it is strongly recommended that students at other institutions include some religion as part of the overall requirement for Domain 1.

One religion course dealing with the spiritual heritage of the philosophy and mission of Loma Linda University is required of all graduates and must be taken from Loma Linda University. Courses that fulfill this requirement are: RELT 406 Adventist Beliefs and Life, RELT 423 Loma Linda Perspectives, RELT 436 Adventist Heritage and Health, and RELT 437 Current Issues in Adventism.

Students whose required units in religion from a Seventh-day Adventist institution have been prorated (reduced) are encouraged to make up the additional units in Domain 1 (28 quarter units) with further religion courses and/or additional units in humanities from Loma Linda University.

The study of humanities must include a minimum of 12 units. The credits in humanities must be selected from at least three of the following areas: civilization/history, fine arts, literature, modern language, performing/ visual arts (not to exceed four quarter units), philosophy, or general humanities elective.

Domain 2: Scientific Inquiry and Analysis (24–32 quarter units)
Scientific inquiry and analysis encompass both the natural and social sciences. The study of natural sciences must include a minimum of 12 units. The units in natural sciences must be selected from two of the following content areas: biology, chemistry, geology, mathematics, physics, and statistics. At least one natural science course must include a lab component.

The study of social sciences must include a minimum of 12 units. Units in social sciences must be selected from two of the following content areas: anthropology, economics, geography, political sciences, psychology, and sociology. One course (or components integrated into several courses) dealing specifically with issues of human diversity is required.

Domain 3: Communication (9–13 quarter units)
Course work in communication must include a complete sequence in English composition that meets the baccalaureate degree requirements of a four-year college or university. Other areas of study in communication may include courses in computer information systems, critical thinking, and public speaking.

Domain 4: Health and Wellness (2–6 quarter units)
To encourage the pursuit of lifelong leisure activities and wellness, the study of health and wellness must include at least two separate physical activity courses totaling a minimum of one quarter unit; and one course in personal health or nutrition. Additional units may include other areas of health, nutrition, and physical fitness.

Domain 5: Electives
Electives from the previous four domains may be selected to complete the general education minimum requirements of 68 quarter units.

LLU courses

General education courses offered by the schools are listed below in Domains 1–4.

Descriptions for general education courses are available in Section IV—The Courses—of this CATALOG.

**Domain 5: Electives**

Electives from Domains 1-4 may be selected to complete the general education minimum requirements of 68 quarter units.

---

**Loma Linda University general education courses—online**

A complete listing of courses offered each academic term at this University to meet general education domain requirements is included on the Loma Linda University Web site at <http://www.llu.edu/students/> under the course schedules.

**Student Life**

The most current Student Handbook more comprehensively addresses University and school expectations, regulations, and policies than does this section of the CATALOG. It is available to each registered student. Students need to familiarize themselves with the contents of the Student Handbook. Additional information regarding policies specific to a particular school or program within the University is available from the respective school.

**From University to student**

Loma Linda University was established to provide education in a distinctively Christian environment. Students are expected to respect the standards and ideals of the Seventh-day Adventist Church. Prospective students have the freedom to choose or reject University or school standards, but the decision must be made before enrollment. Application to and enrollment in Loma Linda University constitute the student’s commitment to honor and abide by the academic and social practices, and regulations stated in announcements, bulletins, handbooks, and other published materials. Matriculated students are expected to maintain a manner that is mature and compatible with the University’s function as a professional institution of higher learning.

It is inevitable that the student will come under question if academic performance is below standard, student duties are neglected, social conduct is unbecoming, or attitudes demonstrate deficiencies such as poor judgment, moral inadequacy, or other forms of immaturity.

Procedures for evaluation of academic and nonacademic performance—as well as for the student to exercise his/her right of appeal—are described in the current CATALOG and in each school’s section of the Student Handbook. Grievances regarding both academic and nonacademic matters must be processed according to these published grievance procedures. After a student files an appeal or grievance, the faculty assesses the student’s fitness for a career in the chosen profession and recommends to the dean appropriate action regarding the student’s continuance or discontinuance.

Prospective students who have questions concerning the University’s expectations should seek specific information prior to enrollment.

**Whole person health**

The University regards the student from a cosmopolitan and comprehensive point of view. It is cosmopolitan in that historically the University’s global mission has promoted bonds and opportunities in education and service without regard to gender or to national, racial, or geographical origin. It is comprehensive in that the University’s concern for the welfare of the student traditionally has been an integrated concern for assisting the student toward whole person health—balanced development of spiritual, social, physical, and mental health. Cultivating the health of any one part enhances the health of all parts. Neglecting or abusing the health of one harms the health of all. Before one can...
experience whole person health, there must be a practical appreciation of the interdependent interaction of each part of the whole.

Students from all schools of Loma Linda University may congregate and participate in the multifaceted programs offered that involve the holistic concept of social, intellectual, physical, emotional, and spiritual wellness. These programs support Loma Linda University’s motto, “To make man whole.”

**Spiritual health**

In addition to personal quiet times, opportunities for the student to further develop rich, personal spiritual resources are provided in scheduled religious exercises and activities, and in informal association with others who cherish spiritual values. Religion courses as well as weekly chapel services are part of the required curriculum.

**Social health**

Situated within easy access of the ocean, mountains, and desert, the University provides numerous opportunities for students to complement their formal learning through participation in a wide variety of recreational, cultural, and other activities. A variety of University-, school-, and group-sponsored events encourage students to relax and become better acquainted with one another. Through these activities and events, students can enrich their group interaction and leadership experiences, increase their enjoyment of and interest in fields outside their profession, develop their talents, enhance wholesome and memorable association with others, and cultivate supportive and lifelong social relationships.

**Mental health**

The University promotes mental health by encouraging students to study and practice principles of sound psychological health and to access state-of-the-art counseling and mental health services, as needed.

**Physical health**

The University promotes physical fitness by encouraging recreational interests and by providing courses in field exercises, body building, and health instruction. An effort is exerted to encourage each student to engage in some recreational and health-building activity that may be carried over to enhance future life.

**Immunizations**

As a member of a health science university, whether we are directly involved in patient care or not, we are responsible for the well-being of others. As a result, Loma Linda University requires that all students receive the flu vaccine annually.

**Recreation and Wellness: The Drayson Center**

The Drayson Center serves as the focal point for recreation and wellness at Loma Linda University. Encompassing 100,000 square feet, the facility offers a plethora of fitness options to promote physical, intellectual, social, emotional, and spiritual wholeness. The Drayson Center showcases a 21,000 square-foot multipurpose gymnasium that can accommodate three full-size basketball courts, five volleyball courts, or nine badminton courts. Circling the gymnasium’s interior is an elevated, three-lane running track. Five racquetball courts and six outdoor tennis courts are available for play. Aerobics studios and cardiovascular rooms can accommodate anything from Pilates, cycling, and Zumba classes, to strength training, sports conditioning, and bodybuilding—and everything in between.

An outdoor aquatics center includes a heated, ten-lane lap pool, a leisure pool, and a jacuzzi; along with a 22-foot high water slide and recreational pool. Saunas are installed in the fully-equipped men’s and women’s locker rooms. A 400,000 square-foot outdoor multipurpose recreational area hosts two softball fields, a half-mile track, a beach volleyball court, and numerous picnic and game areas.

The Drayson Center also offers personal training services, massage therapy, and a variety of leisure classes—such as cycling, ballet, and karate, to name a few. Conference rooms are available for hosting meetings, exhibitions, and banquets. This full-service facility serves to promote health and wellness to Loma Linda University students, staff, faculty, and the surrounding community.

**Student Health Service**

Operating under Loma Linda University Health, the Center for Health Promotion’s Student Health Service is committed to providing quality health care to the students within our University community. Our physicians and staff are dedicated to promoting a lifestyle that encourages a balance of physical, spiritual, emotional, and social well-being. The services provided include primary care, women’s health, immunizations, laboratory testing, health education, counseling, and referrals to specialty services. Enrollment in the Risk Management Student Health Plan is required to receive the comprehensive coverage of services. Provider visits are available free to all students after acceptance into Loma Linda University and during any lapses in Risk Management Health Plan enrollment.

Student Health Service is located in Evans Hall, Suite 111, at the corner of Anderson and Stewart streets. The hours of operation are Monday through Thursday 8 a.m. to 12 noon, and 1 to 5 p.m.; and Friday 8 a.m. to 1 p.m. To schedule an appointment or for more information, call 909/558-8770.

**Loma Linda University Student Health Plan**

The University-sponsored Student Health Plan is designed to provide comprehensive medical coverage for the student and his/her eligible dependent(s). It is not an insurance program. The plan includes coverage for hospital care, surgery, emergency care, prescription drugs, limited dental and more. Generally, to be eligible for reimbursement under the provisions of the plan, expenses must be incurred while coverage is in effect. Expenses incurred before plan coverage becomes effective or after plan coverage has terminated will not be covered. This plan will only provide medical coverage on an excess basis. This means that all medical expenses must first be submitted to any other available source of health-care coverage. There is no optical coverage available. Please see the Loma Linda University website for Student Health Services for a complete explanation of the Student Health Plan (<llu.edu/central/studenthealth>).

**Enrollment**

The process to enroll in the Student Health Plan is completed through the online registration process. Once registration is complete, information will be relayed to Risk Management. If a student is adding an eligible dependent to his/her Student Health Plan, the Student Health Plan
Enrollment form will need to be completed and submitted to Risk Management with the necessary payment.

**Preferred provider plan**

The health plan has been developed as a PPO (preferred provider) plan. Benefits for services utilized outside the preferred provider structure will be reduced.

**Plan year**

The plan benefit year is a fiscal year and runs from July 1 through June 30.

**Eligibility**

A student is eligible for benefits if s/he:

- Is attending Loma Linda University as a graduate or undergraduate student; and
- Is a degree-track student. A student who is accepted into a degree program and who is registered for more than 0 units will be eligible regardless of the number of units for which s/he is registered.
- Is a nondegree student registered for more than four units. A student who is not accepted into a degree program but who is registered as a nondegree student for more than four units will be eligible. However, a nondegree student registered for four units or fewer will not be eligible and will not be eligible to buy into the Student Health Plan.
- Chooses to buy in, was covered under the plan during the previous quarter, and on an approved leave of absence from his/her academic program.
- Is an IP-only student. A student who is working on an "In Progress" course and is not registered for any other units will be eligible.

**Additional information regarding eligibility**

- A student who drops all units before the deadline will not be covered by the plan. Any student who drops all units before the last day for a full refund will not be eligible for the University Student Health Plan for that quarter. Please refer to the Student Finance 100-percent refund policy.
- LLUH employees who are "full-time, benefit eligible" will not be eligible for the Student Health Plan.
- Students participating in an off-campus or online program will not be eligible for the Student Health Plan.
- An eligible student’s coverage will become effective on the first day of class or new student orientation, whichever occurs first.

**Buy-in provision**

Under the following provisions, a student may obtain coverage under this health plan or extend coverage to a spouse or dependent children each quarter. In order to receive any coverage under this plan, a student must apply for coverage during an open enrollment period—within 30 days of a status change (i.e., within 30 days of marriage or within 30 days of the birth of a newborn child) and pay the appropriate quarterly student contribution, as outlined below:

1. Spouse/Dependent children. If a student is covered under this plan, s/he may extend health plan coverage to his/her spouse or dependent child(ren).
2. Leave of absence (LOA). If a student has been covered under the plan up until leaving school on an approved leave of absence (LOA), s/he may extend coverage under the plan for the length of the approved LOA, up to a maximum extension of one year.
3. Continuation coverage. If a student has been covered under this plan but no longer meets the eligibility requirements, s/he and eligible dependents would be able to continue coverage for up to one quarter through the buy-in provision.

The open enrollment period for eligible students and dependents is the last two weeks of each calendar quarter. Buy-in coverage will be effective from January 1 to March 31, April 1 to June 30, July 1 to September 30, and October 1 to December 31. No invoices or reminders are sent to students who are buying into the plan. The Department of Risk Management cannot add Student Health Plan buy-in fees to the student's account. All payments must be made by check, money order, or credit card with the Visa or MasterCard logo by calling 909/651-4010. A newborn child must also be enrolled in the plan within thirty days of birth or adoption in order to receive any coverage under this plan. There is no automatic or temporary coverage provided for any dependents, including adopted or newborn children.

**Extension/Continuation coverage—Rates below effective 10-01-2016**

- Student—$525 per quarter for the student plus one of the amounts below for dependents is charged for extension/continuation coverage:
  - One dependent (spouse or child) of a covered student—$560 per quarter
  - Two or more dependents—$1,120 per quarter

**Prescription drug coverage**

Each enrolled student will be given a CVS/Caremark health-care identification card, which can be used at any participating pharmacy displaying the CVS/Caremark decal. The cost of the prescription will be billed directly to the plan after the student pays a co-payment.

Prescriptions filled through CVS/Caremark will be limited to a maximum of a 30-day supply. The co-payment amounts will be $15 for generic drugs and $30 for brand-name* drugs that are dispensed at the health plan’s preferred pharmacies: the LLUMC Pharmacy, the Faculty Professional Pharmacy (located in the Faculty Medical Offices), the LLU Meridian Pharmacy, the LLU Highland Springs Pharmacy, the LLUMC Murrieta Physicians Office Building Pharmacy, and the LLU Community Pharmacy.

If the prescription is filled at any other participating CVS/Caremark pharmacy, there will be a $25 copayment for generic products or a $40 copayment for brand-name* drugs. Prescriptions not filled by the CVS/Caremark system will not be covered under the plan.

*The co-payment is shouldered by the plan when a name brand is purchased because no generic substitute is available; however, if a student chooses a name brand over a generic drug, the student will be responsible for the generic co-payment plus any difference in cost between the two medications.

**Utilization review**

All services that require preadmission review or prior authorization must be processed through the Department of Risk Management. The types of services that require prior authorization include:

- All hospital admissions
- Scheduled admissions must be authorized prior to entrance to the hospital. In the case of emergency admissions, notification must be made within 48 hours or the next business day.
- All outpatient surgeries
Malpractice coverage

Students are covered by malpractice insurance while acting within the course and scope of any approved clinical assignment.

Disability insurance

All students in the School of Medicine and the School of Dentistry are automatically registered in a disability insurance program while enrolled at this University. This program provides limited disability insurance for students while in the program and also allows for conversion to an individual disability insurance policy at the time of graduation. Details of this program are available from the School of Medicine or the School of Dentistry.

Counseling services

Loma Linda University Student Counseling Program

The University Counseling Center offers a variety of private, confidential services to students and their families—including individual, premarital, marital, and family counseling, as well as medication treatment. Counselors use practical, problem-solving strategies to help students deal more effectively with stresses of school and personal life in a healthy and healing way.

The program is staffed by members of the Employee and Student Assistance Programs, which includes licensed clinical social workers and marriage and family therapists.

To schedule an appointment or for more information, call 909/558-9534 or campus extension 39534. Eligible students do not have a copay for these visits.

The University Student Counseling Center is located in the Hartford Building, 11360 Mountain View Avenue, Suite A, in Loma Linda.

Loma Linda Student Assistance Program

The Loma Linda Student Assistance Program (LLSAP) provides professional and caring assessment and treatment for a variety of personal, family, work, and school-related issues. The LLSAP clinicians will develop a treatment plan that may include free, short-term counseling. All LLSAP services are free of charge.

If more extensive treatment is appropriate, the client is referred to a community therapist who specializes in the student’s area of concern and who is covered by the student’s health plan. All information is confidential. Community therapists and LLSAP clinicians will not release information without the written consent of the student, with the exception of matters that fall under mandatory reporting laws.

The LLSAP, the only nationally accredited student assistance program in California, has provided state-of-the-art services to students since it was established in 1990.

Appointments may be scheduled Monday through Wednesday, 8 a.m. to 5 p.m., by calling on-campus extension 66050 or 909/558-6050; Thursday, 8 a.m. to 7 p.m.; Friday, 8 a.m. to 1 p.m. Additional appointment times may be available upon request.

The program is located in the Hartford Building, 11360 Mountain View Avenue, Suite A, in Loma Linda.

Governing practices

At Loma Linda University, nonacademic policies have been established that help foster a fulfilling University experience. Students are expected to uphold these policies, which govern nonacademic student life on and off campus. Information in this section of the CATALOG, as well as in the Student Handbook (<http://www.llu.edu/student-handbook>), pertains to requirements governing all students. The student is reminded of individual responsibility to be fully informed of the general and specific requirements of his/her school and program.

Identification number and card

All accepted students will be assigned a unique University identification number. This seven-digit number will be used on all correspondence and noted on all payments to the University. A University identification card using this identification number and a bar code will be issued to each student after s/he completes initial registration and financial clearance.

The identification card allows access to various student services, including the libraries, Student Health, recreation facilities (i.e., the Drayson Center), and parking. The bar code on the card allows currently enrolled and financially cleared students to charge against their accounts at the Campus Bookstore and campus cafeterias, and for ticket sales available through the Student Services office. In subsequent quarters, the card’s bar code is automatically reactivated at each registration upon financial clearance.

For further information regarding these identification cards, please contact Student Services.

Residence hall

The University is coeducational and accepts both single and married students. Any single student who prefers to live on campus may do so. Students are expected to live on campus unless they meet criteria as follow.

- married
- 21 years of age or older
- in a graduate program
- living with their parents

Students who wish to live off campus but who do not meet one of the foregoing requirements may petition the vice president for student services for a possible exception. This should be done well in advance of registration to allow the student adequate time to plan. Additional information about campus housing can be obtained from the housing website at <llu.edu/central/housing>.

The student must keep the University informed of his or her current address, telephone number, and other contact information.
Marriage
A student who marries or changes marital status during the academic year must provide the school with advance written notification of the change in status in order to keep school records correct and up to date. It is wise for students to make every effort to schedule their wedding ceremonies during academic recesses.

Name change
Currently enrolled students may change their names on University records when they provide evidence (e.g., certified copy of a marriage certificate) that the name change is official. In addition to filing with the Office of University Records on University Records forms a request for change of name, the student must present a current ID card or other form of picture ID with his or her name as it appears on University records, along with official documentation of the name change.

Name changes must be processed no later than six months prior to graduation if the new name is to appear on the diploma.

Professional apparel
Clinic and laboratory apparel are distinctive articles of dress specified by the department or school. They are to be worn only in the manner prescribed and under the conditions specified in the school or department dress code. Student uniforms are to be maintained in clean, presentable condition. Information on the required professional dress is provided in Section III of this CATALOG and in the University Student Handbook.

Personal appearance
Students in the classroom or clinical environment must exhibit personal grooming consistent with expectations of the health-care institution, the profession, the school, and the University. Specific guidelines regarding grooming and attire are provided in Section III of this CATALOG and in the University Student Handbook.

Personal property
The school assumes no responsibility for the loss of the student’s personal property, instruments, or other items by theft, fire, or unknown causes. The student is expected to assume responsibility for the safekeeping of personal belongings.

Cars and transportation
Because the student is responsible for transportation arrangements and costs for special projects and off-campus clinics, it is advantageous for the student to have access to a car.

The University enforces traffic rules and regulations as provided for by the State of California Vehicle Code. It is the sole responsibility of the driver of any vehicle on University property to become familiar with these regulations. Drivers are held responsible for any infraction of the regulations. Copies of the brochure entitled Loma Linda University Traffic and Parking Regulations are available at the Department of Security.

Vehicles used by students on campus must be registered with the Department of Parking. Returning students must renew the registration of their vehicles online with the Department of Parking annually in September.

Confidentiality
The Health Insurance Portability and Accountability Act (HIPAA) of 1996 requires that all health-care professionals maintain the highest level of confidentiality in matters pertaining to clients. Discussions or written assignments relating to client information, either health related or personal, may not include identifying data. Clients’ privacy and rights are to be protected.

Failure to maintain confidentiality could result in legal action. For additional information, see Introduction to HIPAA at <https://one.lluh.org/vip/Departments/LLUSS-Departments/HIPAA-Information/HIPAA-Help/Introduction-to-HIPAA>.

Substance abuse
As a practical application of its motto, “To make man whole,” Loma Linda University is committed to providing a learning environment conducive to the fullest possible human development. Because the University holds that a lifestyle free of alcohol, tobacco, and recreational/illegal drugs is essential for achieving this goal, it maintains policies that foster a campus environment free of these substances.

All students are expected to refrain from the use of tobacco, alcohol, or recreational or illegal mind-altering substances. Possession or use of these substances may be cause for dismissal.

For details regarding the University’s drug-free environment—as well as information regarding prevention, detection, assessment, treatment, relapse prevention, confidentiality, and discipline—see the Loma Linda University Student Handbook, Section V, University Policies: Alcohol, controlled substances, and tobacco policy.

Sexual harassment
Sexual harassment is reprehensible and will not be tolerated by the University. It subverts the mission of the University and threatens the well-being, educational experience, or careers of students, faculty members, employees, and patients.

Because of the sensitive nature of situations involving sexual harassment, and to assure speedy and confidential resolution of these issues, affected students should contact the office of the dean of the school in which they are enrolled.

A more comprehensive statement of the policy regarding sexual harassment and sexual standards can be found in the Loma Linda University Student Handbook, Section V, University Policies.

Employment
It is recommended that students limit work obligations (outside employment for income) that divert time, attention, and strength from the arduous tasks of class preparation, clinical practice, and/or training in their chosen career. A student wishing to work during the school year should consult the office of the dean of the school in which s/he is enrolled regarding employment restrictions or prohibitions.

Employment for international students
International students must obtain written authorization from International Student and Scholar Services before accepting any on-campus employment. Off-campus employment requires prior issue of a work permit by the U.S. Citizenship and Immigration Services. F- and J-visa students must limit their employment to 20 hours or fewer per week while registered for courses and while classes are in session. Regulations allow full-time work (40 or fewer per week) during school breaks and summer vacations (if students’ programs allow summer quarters off). For questions, please telephone International Student and Scholar Services at 909/558-4955.
Academic authority

The office of the dean of the school in which the student is enrolled is the final authority in all academic matters, with the exception of general education requirements, and is charged with the interpretation and enforcement of academic requirements. Any exceptions or changes in academic requirements, graduation requirements, or grades are not valid unless approved by the dean. Any actions taken by individual faculty members with regard to these matters are advisory only and are not binding on the school or the University unless approved by the dean.

Academic integrity

The academically dishonest act considers that academic dishonesty intentionally violates the community of trust upon which all learning is based, intentionally compromises the orderly transfer of knowledge from teacher to student, and is inconsistent with good professional and moral behavior. Accordingly, the penalty for academic dishonesty is severe.

Acts of dishonesty include but are not limited to the following.

- theft
- falsifying or changing grades or other academic records
- plagiarism or excessive paraphrasing of someone else's work
- knowingly giving, obtaining, or falsifying information during examinations or other academic or professional practice assignments
- using unauthorized aids during examinations
- loud and disruptive behavior during lectures, demonstrations, or examinations
- excessive unexcused absences from classes or from clinical assignments

"Examinations" are defined as regularly scheduled tests, quizzes (scheduled or unscheduled), final examinations, comprehensive assessments, take-home tests, open-book tests, and any other assignment given by an instructor or preceptor whether for a grade, points toward a grade, or for zero points (e.g., a learning exercise).

Instructors and students are responsible for reporting instances of academic dishonesty for investigation. An instructor may take immediate action during an examination or other point-generating activity in order to maintain the integrity of the academic process. Substantiated violations are to be brought before the designated disciplinary body for action. Disciplinary action may include receiving a failing grade on the examination or assignment, receiving a failing grade in the course, suspension, or permanent dismissal from the program.

Conduct

Students are expected to conduct themselves in a professional manner during didactic and clinical training. Professional conduct includes, but is not limited to, punctuality and respect for other people, their property, and their right to learn. It also includes an appropriate respect for those in authority. Students of Loma Linda University are expected to behave in a manner that will not bring criticism upon themselves, the program, the school, or the University.

Because students may be exposed to patients' relatives and friends in any public place, and because their conversations and their attitudes have an effect on those around them, students are asked to observe the following principles.

- Any information given to the student by a patient or contained in a medical record must be held in strict confidence. Therefore, the discussion of a patient's diagnosis and treatment or other clinically related topics should be extremely guarded. A patient's family and community people may be listening and may incorrectly interpret the things discussed. Careless talk may lead to malpractice litigation.
- A joking or casual attitude toward illness and medical treatment should not be displayed since it may seem uncaring and be disturbing to those who are ill and suffering, as well as to the family members.
- Student and staff behavior in professional situations may be the deciding influence for or against Christian beliefs, values, and a health-enhancing lifestyle.

An in-depth description of the professional conduct expected of students is contained in the Loma Linda University Student Handbook.

Grievance procedure

Grievances related to sexual harassment, racial harassment, or discrimination against the disabled shall be pursued in accordance with University policies specifically relating to these items. Grievances related to academic matters or other issues covered by specific policies shall be made pursuant to the policies of the school in which the student is enrolled. A student who questions whether the process provided by the school has followed the policy of the school in regard to his/her grievance may request that the Office of the Provost conduct a review of the process used by the school in responding to his/her academic grievance.

Students who believe that an error has been made or that they have been dealt with in an inappropriate manner by an office or nonacademic department of the University such as records, student finance, student affairs, health services, or Drayson Center, may seek correction by the following steps:

1. The student may put his/her complaint in writing and provide it to the head of the department or office involved. The student may request an appointment and discuss this matter with the department head. The department head will make a decision and provide a written answer to the student within 14 days of receiving the student's written complaint or meeting with the student, whichever is later. If the answer is not satisfactory to the student, s/he may—

2. Put the complaint in writing and send it to the dean of student affairs for review. The matter will be considered at the next meeting of the dean's council, and the student will be informed in writing of the council's response within seven days of the council's consideration of the complaint.

An individual may contact the Bureau for Private Postsecondary Education for review of a complaint. The bureau may be contacted at 2535 Capitol Oaks Drive, Suite 400, Sacramento, CA 95833; e-mail, http://www.bppe.ca.gov; telephone, 926/ 431-6924.

Copyright violations

The copyright law of the United States (Title 17, USC) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specific conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user requests or later uses a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.
This institution reserves the right to refuse to accept a copying order if, in its judgment, fulfillment of the order would involve violation of copyright law.

### Communication devices

All communication devices must be set to “off” or “vibrate” during class, laboratory, clinic, or chapel. No cell phones, PDAs, calculators, laptops, or other electronic or communication items may be used in the classroom, testing facility, or laboratory unless specifically a part of that activity and approved by the faculty member in charge.

### Academic Policies and Information

Students of the University are responsible for informing themselves of and satisfactorily meeting all regulations pertinent to registration, matriculation, and graduation. In this section (Section II) are the University regulations. See Section III for regulations that pertain to each school and program.

### Academic residence

A student must meet the residence requirements indicated for a particular degree or certificate.

### Academic standing

The following classifications are based on scholastic performance, regular standing or academic probation, as defined by each school within the University.

### Catalog in effect for degree requirements

Subject to department approval, students may complete degree requirements outlined in any CATALOG in effect during the time they are enrolled as accepted students in a school. However, students who have been on leave of absence for more than one year, or who failed to register without leave of absence (consult office of the dean of the school in which the student is enrolled regarding number of quarters), may be required to re-enter the program under the CATALOG in effect at the time of re-entry. Students who are on leave from a school to pursue a medical or dental degree at this University are an exception. Such students may complete their programs under their original CATALOG.

### Academic service learning

Academic service learning is an education practice that takes learning into the community. A reciprocal relationship develops as students work with the community to identify focus areas and implement projects. Connecting classroom curricula with community needs deepens students’ engagement in the community while enabling them to develop mental, physical, spiritual, and emotional capacities. Involvement engages students in critical thinking, community relationship building, practical action, leadership, and reflection useful in their professional lives.

All students in degree programs (associate through doctoral), under the 2018-2019 CATALOG and beyond, are required to complete an approved academic service-learning course prior to graduation. Courses currently approved to meet this requirement are as follows:

Course numbers

Courses are numbered as:

- 001-099 nondegree-applicable credit
- 101-299 lower division
- 301-499 upper division
- 501-599 graduate
- 601-699 graduate: seminar, research, thesis, or dissertation
- 701-899 professional or clinical
- 901-999 extension with credit; continuing education units, if preceded by letter prefix ending with "CE" (e.g., ASCE 916); without academic credit; or undergraduate certificate clinical affiliation/practicum courses

500-level course work may not apply toward a baccalaureate degree unless the instructor approves it and both deans (dean of the school offering the course and dean of the school in which the student is enrolled) give permission, and provided the credit does not apply toward both an undergraduate and a graduate degree. Approval is not needed if the course is part of a coordinated program.

No courses numbered in the 700s, 800s, or 900s may apply toward a baccalaureate degree.

Grade change

Faculty members are responsible for evaluating and assigning grades. A grade may not be changed except when an error has been made in arriving at or recording a grade. Such changes are permissible up to the end of the succeeding term.

The faculty member must obtain the dean’s signature on the change of grade form after the initial grade has been entered.

Privacy rights of students in academic records

Under the Family Education Rights and Privacy Act (FERPA), students have full rights of privacy with regard to their academic records, including their grade reports. Grades are available to students online at <llu.edu/central/ssweb>.

The campus is authorized under FERPA to release directory information concerning students. The University has classified the following as student directory information that may be released: name, address (permanent and local), picture, marital status, birth date, school, program, class, previous college, and telephone number—unless the student specifically requests in writing that the information not be released.

Directory information will be released only by the academic dean’s office of the school in which the student is enrolled. Requests for directory information received by other offices of the University will be transferred to the appropriate school office.

Repeating a course

Once grades have been posted for a course, a student wishing to improve his/her grade must repeat the course. When repeating a course, the student must attend class and laboratory sessions as ordinarily required and take all regularly scheduled examinations. The amount of tuition paid for repeated courses is determined by the school. Both the original and the repeat grades will appear on the student’s permanent record, but only the repeat grade is computed in the G.P.A. and included in the total units earned. A student may repeat a course only once, and no more than two courses may be repeated in a student’s degree program.

Transcripts

The University provides Loma Linda University transcripts to other institutions or to the student or graduate only upon written request of the student or graduate.

The University reserves the right to withhold all information concerning the record of any student who is in arrears in the payment of accounts or other charges, including student loans. No transcripts will be issued until all of the student’s financial obligations to the University as defined in this CATALOG have been met.

Scholastic standing

Grades and grade points

The following grades and grade points are used in this University. Each course taught in the schools has been approved for either a letter grade and/or an S/U grade.

- A 4.0 Outstanding performance.
- B+ 3.3 Good performance.
- B 3.0 Very good performance for undergraduate credit; satisfactory performance for graduate credit.
- B- 2.7 Satisfactory performance.
- C+ 2.3 Satisfactory performance for undergraduate credit. Minimum performance for which credit is granted toward a degree in the School of Nursing or the School of Allied Health Professions.
- C 2.0 Minimum performance for which credit is granted toward a degree in the School of Dentistry, the School of Pharmacy, or the School of Public Health.
- D+ 1.3 Minimum performance for which undergraduate credit is granted, except as indicated above.
- D 1.0 Minimum performance for which undergraduate credit is granted, except as indicated above.
- F 0.0 Failure—given when course work was attempted but when minimum performance was not met.
- FA/UA 0.0 Failure to attend (U/A for S/U graded courses)—given when a student discontinues attendance without withdrawing. Last date attended is to be noted on instructor grade report.
- S none Satisfactory performance—counted toward graduation. Equivalent to a C grade or better in undergraduate courses, or a B grade or better in graduate courses. An S grade is not computed in the grade point average. A student may request a grade of S in only a limited amount of course work, as determined by the school in which the student is enrolled. This is done by the student’s filing with the Office of University Records the appropriate form prior to fourteen calendar days before the final examination week. Once filed, the grade is not subject to change.
In Progress—indicates that the course has a duration that is not recorded if the student files with the Office of University Records the appropriate form prior to the cut-off date. Withdrawals outside this time frame, upon recommendation of the dean, may be removed at the discretion of the vice president for academic affairs. In the case of nontraditionally scheduled courses, a W notation will be given for withdrawal from a course prior to completion of 80 percent of the course, excluding the final examination period. Withdrawals during the first 20 percent of a course, excluding the final examination period, are not recorded if the student files with the Office of University Records the appropriate form prior to the date when 20 percent of the course is completed. A student may withdraw only once from a named cognate course that s/he is failing at the time of withdrawal.

Incomplete—given when the majority of the course work has been completed and circumstances beyond a student’s control result in the student being unable to complete the quarter. An I notation may be changed to a grade only by the instructor before the end of the following term (excluding summer sessions for those not in attendance during that term). Incomplete units are not calculated in the grade point average. By use of the petition form—available online at <http://www.llu.edu/central/ssweb/registration.page>—the student requests an I notation from the instructor, stating the reason for the request and obtaining the signatures of the instructor, the department chair, and the associate dean. The instructor reports the I notation on the grade report form, as well as the grade the student will receive if the deficiency is not removed within the time limit. The petition form is then filed with the Office of University Records along with the grade report form. The I notation is not granted as a remedy for overload, failure on final examination, absence from final examination for other than an emergency situation, or a low grade to be raised with extra work.

IP

In Progress—indicates that the course has a duration of more than a single term and will be completed by the student no later than the final term of the course, not to exceed five quarters for independent study and research courses (original quarter of registration plus four additional quarters). The student’s final grade will be reported on the instructor’s grade report at the end of the term in which the course is completed. If the course work is not completed within the five-quarter time limit, a grade of UW will be given.

AU

Audit—indicates registration for attendance only, with 80 percent class attendance considered a requirement. A request to change a credit course to audit or an audit course to credit may be made no later than the fourteenth calendar day after the beginning of a quarter, or the seventh calendar day after the beginning of the five-week summer session. (This does not apply to short summer courses lasting only a week or two.)

AUW

Audit Withdrawal—given for withdrawing from a course, or to indicate that the 80 percent class attendance requirement was not met.

Student level

Students enrolled in block programs are classified according to the level of the block in which they are enrolled (e.g., master’s 1st, 2nd, or 3rd year; or freshman, sophomore, junior, senior, as is appropriate for the degree program; or PY1 [professional year 1]).

Undergraduate students enrolled in non-block programs are classified based on the transfer credits accepted that fulfill LLU degree requirements at the time of matriculation. Subsequent updates to classifications will include units earned at LLU. Undergraduate classifications are as follow:

<table>
<thead>
<tr>
<th>Units</th>
<th>Classification</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 - 44.9</td>
<td>Freshman</td>
</tr>
<tr>
<td>45 - 89.9</td>
<td>Sophomore</td>
</tr>
<tr>
<td>90 - 134.9</td>
<td>Junior</td>
</tr>
<tr>
<td>135+</td>
<td>Senior</td>
</tr>
</tbody>
</table>
Academic credit

College Level Examination Program (CLEP)
The College Level Examination Program (CLEP), a national program of credit by examination, offers persons of all ages and backgrounds new opportunities to obtain recognition for college-level achievement, regardless of how acquired.

As of July 2001, general examinations are no longer offered; however, the original policy remains in effect for students who took general examinations prior to that date. No credit is granted for the CLEP general examinations in English composition, mathematics, or science courses requiring a laboratory.

As of July 1, 2004, in order to receive Loma Linda University credit, students must complete all examinations for CLEP credit within six months after having received their initial degree compliance reports. A student will be allowed to challenge a given course by examination only once. CLEP scores will be accepted at C or better until percentiles are available from CLEP. Credit is granted for scores at or above the 50th percentile for the subject examinations, and at the 65th percentile for general examinations in the humanities, natural sciences, and social sciences/history.

Course waiver
Certain course requirements in a program may be waived on the basis of previously completed course work, experience, or licensure. An examination for waiver credit, if required, may be taken only once and must be taken before the last quarter of the program of study. Waiver of a specific course requirement does not reduce the number of units required for a program or residency. A waiver examination does not carry academic credit and cannot be used to make up for a course in which an unsatisfactory grade was received. For examination fee, see Schedule of Charges in the Financial Information section.

Permission to waive a course requirement in the School of Pharmacy requires prior approval of the department chair and consent of the dean.

Credit by examination
For certain courses offered by the University, a student in an undergraduate degree program may earn credit by passing an equivalency examination administered by the appropriate school and department. Such an examination is at least equal in scope and difficulty to a final examination in the course and may include materials supplied by CLEP or other agencies.

A graduate program should be used to acquire new knowledge. Since the purpose of credit by examination is to validate prior knowledge, graduate credit may not be earned by examination. If a required course in the degree program is a repeat of prior learning, the student may request a waiver, thus making it possible to take elective courses that would increase knowledge.

A student currently enrolled in a degree program at this University who desires credit by equivalency examination petitions the dean of the school offering the course, and, upon approval, pays a testing fee. See Schedule of Charges in the Financial Information section for examination fee.

Equivalency examinations may not duplicate credit already earned through course work, including courses taken for audit.

A grade of CR (Credit) is given only after the student has completed one quarter, or the equivalent, at this University; and has earned 12 units of credit with a grade point average of at least 2.0 in undergraduate courses.

Units earned by equivalency may not be used as part of the enrolled load.

Equivalency examinations must be taken before the final quarter of residency.

The maximum amount of credit that may be earned by equivalency examination is determined by each school but may not exceed a maximum of 20 percent of the units required for the degree or certificate.

Extension study
To be acceptable for credit, an extension course must be evaluated for its equivalence to an accepted course. To assure that the course will transfer to Loma Linda University, the student should contact the Office of University Records prior to taking the course. Registration for extension study requires prior approval of the department chair and consent of the dean of the student’s school.

Independent study
Independent study may be undertaken subject to the consent of the department chair and/or the office of the dean of the student’s school. The student is responsible for completion of the Directed/Independent Study Title Request (https://myllu.llu.edu/apps/studproc/istr/Start.php) form in addition to the regular registration. University policy limits directed study to 12 quarter units of undergraduate credit and eight units of graduate credit in a degree program. Individual programs may further limit these units. The office of the dean of the student’s school should be consulted regarding limits on credit earned through independent study. Independent study is to be completed in adequate time before graduation to allow recording in the Office of University Records.

Transfer credit
Applicants must file with the Office of University Admissions complete records of all studies taken on the college/university level. Transfer credit is defined as credit completed at another college or university accredited by a U.S. regional association (including all regularly transferable credit earned from a degree-granting institution awarded "candidacy" status by its regional accrediting body during the period the institution held this status), credit earned at an institution accredited by the Seventh-day Adventist educational system, or credit earned at an international institution recognized by its government. The University reserves the right to require an applicant to satisfactorily complete written and/or practical examinations in any course for which transfer credit is requested. Remedial, high school-level courses, and courses identified by the transfer institution’s catalog as not applicable toward a baccalaureate degree are not accepted for transfer into an undergraduate program. Graduate transfer courses must be equivalent to courses appropriate to degree requirements.

Junior colleges
A maximum total of 70 semester units or 105 quarter units of credit will be accepted from regionally accredited junior colleges. Subject and unit requirements for admission to the respective programs are outlined in Section III.

International
Credits submitted from a college outside the United States are evaluated on an individual basis by an evaluation center approved by Loma Linda University, which reports the evaluation results directly to the Office of University Admissions. It is the applicant’s responsibility to contact
an approved evaluation service and supply the required documents for evaluation.

Professional schools
Credits earned in a professional school are accepted only from a school recognized by its regional or national accrediting association and only for a course that is essentially the equivalent of what is offered at this University or is substantially relevant to the curriculum.

Military schools
Credit for studies taken at a military service school is granted to veterans according to recommendations in the Guide of the American Council on Education.

Correspondence/distance course work
Course work taken at a regionally accredited school is ordinarily accepted. Griggs University (formerly Home Study International) is the officially affiliated correspondence school for Loma Linda University.

Unit of credit
Credit is recorded in quarter units. One unit represents a minimum of ten class hours in direct instruction (e.g., lecture) or thirty hours in laboratory practice.

Enrollment

Registration
Standard term registration dates are published on the Web at <http://www.llu.edu/students/university-records/registration-dates.php>. For programs that do not operate on standard term dates, the Registration Portal should be checked for specific registration dates and deadlines per student, since these dates can vary depending on where students are in their programs. Deadlines for courses taught in a condensed or extended format may differ from standard terms or program deadlines. Course-specific deadlines can be found in the course schedule at <http://www.llu.edu/students/university-records/course-schedule.php> by selecting a course and clicking on the course reference number (CRN) link. Posted deadlines for registration on the Web and in the Registration Portal are in effect and binding.

Students register online using their Registration Portal. Registration procedure includes clearing holds, entering courses, and clearing finance. Upon completion of his or her first registration, the student must obtain an ID card at the University Office of Student Affairs. All future interactions in the Student Services Center will require presentation of a valid student ID card.

A late registration period of five business days after the term begins is provided for standard term programs. If the course is offered as an intensive, it is possible that registration will be required before the end of the five days. A late registration fee of $200 will be charged during these five business days for standard term courses.

Students may not attend class without being registered. No credit is granted for academic work performed during any term without registration.

Change in registration
A change in registration requires reversal of financial clearance in the Registration Portal if financial clearance has been obtained and registration is still open for the student’s program. Students have until 11:59 p.m. PST (Pacific Standard Time) the following day or until the end of registration—whichever is earlier—to complete registration changes and to request financial clearance again. If financial clearance is not obtained by the end of the following day, any changes made in the Registration Portal will be reversed. Students are advised of this process via their LLU e-mail accounts.

A student may add courses that follow the standard-term University calendar during the first seven calendar days of the quarter. Courses that follow the standard-term University calendar may be dropped during the first 14 days of the quarter without academic penalty. Standard term course changes after the 14th day of the quarter affect the permanent grade record with a "W" grade indicating withdrawal. Students may withdraw from a standard-term course prior to 14 calendar days before the final examination week, after which withdrawals are no longer permitted.

Study load
Usually an academic study load is defined in terms of credit units. A full undergraduate load is considered to be 12 or more units per quarter; a full graduate load is considered to be eight units per quarter.

The normal course load, including all course work for which a student may be registered at this or another institution, is 16 quarter units for an undergraduate student and 12 quarter units for a graduate student. Full-time study loads are those specified by the departments for each program. Students of exceptional ability may register for additional course work upon recommendation of the department and consent of the dean.

A person who is not enrolled in regular courses but who is occupied in research, dissertation, or thesis, is classified as a student. By filing an academic load validation form every quarter at registration, the academic load may be validated for loan deferment and for living expenses for aid-eligible students or to maintain immigration status for international students.

The faculty mentor who is primarily responsible for the student's research is required to sign the load validation form (electronic workflow) verifying that the student will be working on his/her research, thesis, or dissertation for a minimum of 18 hours per week (half-time status) or a minimum of 36 hours per week (full-time status). This is a projection each quarter. The faculty mentor before signing the load validation form for the current quarter must determine that the student indeed qualified for load validation in the previous quarter.

Attendance
Regular attendance at all appointments (class, clinic, laboratory, University at Worship) is required beginning with the first day of each term. A pattern of absence, excused and/or unexcused, will be referred to the school’s designated academic authority for consideration and action.

Excused absences are defined as follow:

- Illness, verified by a physician’s statement or official statement from Student Health Service submitted to the school’s designated academic authority
- Participation in an institution-sponsored activity (verified by a written statement from a faculty sponsor)
- Recognizable emergency approved by the school’s designated academic authority

Tardiness is disruptive, distracting, and inconsistent with professional behavior. Students who arrive after the beginning of class may be counted absent.
Information regarding the school's designated academic authority can be obtained from the office of the dean.

Continuous enrollment
A student who has not enrolled for any courses, or paid the continuous registration fee for courses still in progress from a previous term, will be inactivated at the beginning of the second quarter of non-enrollment, unless s/he is on an approved leave of absence (maximum of four academic quarters, including Summer Quarter). (Example: A student who enrolled for Autumn Quarter but who does not enroll for Winter Quarter will be inactivated at the close of registration [two weeks into the quarter] for the subsequent Spring Quarter).

Inactivated or formally withdrawn students who wish to return to complete their degree programs are required to reapply with sufficient time for adequate review of any new transcript credits and advisement of any new program requirements.

The reapplication process also requires the submission of official transcripts from all colleges/universities attended since the student last attended this University. Official transcripts from colleges/universities the student attended while enrolled at this University must also be submitted if they were not submitted prior to inactivation.

Students who reapply to a program are subject to the program requirements published in the Catalog in effect at the time of reentry. All graduates are expected to have documented current knowledge in their fields of study as of the date of graduation (date on diploma).

Personal leave of absence
A leave of absence is defined as being away from school for the remainder of the quarter, to a maximum of one year, with the intent to return. The appropriate program withdrawal form (https://myllu.llu.edu/apps/studproc/pw/Start.php) is an online workflow. This form is to be approved by the dean or his/her designee prior to the student’s departure. Stipulations for re-entry are given to the student in writing. The student should consult the office of the dean of the his/her school regarding the possibility of maintaining health coverage.

Withdrawal
To withdraw from a course(s), the student must complete an Add/Drop Registration form (http://www.llu.edu/assets/central/ssweb/documents/regchange.pdf). If a student finds it necessary to withdraw from a degree or certificate program, the dean (or his/her designee) must be notified in writing. The student then arranges for formal withdrawal from the program by filing a Program Withdrawal form (https://myllu.llu.edu/apps/studproc/pw/Start.php) which is a workflow available on the University Web site. The Program Withdrawal form and/or the Add/Drop Registration form should be completed as soon as possible after the student determines that s/he cannot complete the quarter. These forms must be filed no later than 14 days prior to the end of the quarter.

Courses dropped during the first two weeks of the term are not included in the student’s permanent record.

If a student is discontinuing the entire program, the date the Program Withdrawal form is properly submitted to the Office of University Records will be the date of withdrawal used to calculate tuition refunds. Tuition is refunded according to the practice outlined in the Financial Information section of this Catalog. Failure to file the Program Withdrawal form may result in unavoidable charges to the student’s account. The tuition refund policy for off-campus students is listed under the applicable school in Section III of this CATALOG.

Administrative withdrawal
Students who fail to make arrangements for a leave of absence or continuing registration may be administratively withdrawn from school. After one quarter, if the student has not re-enrolled, his/her enrollment will be inactivated.

Satisfactory academic progress
For the purposes of financial aid eligibility, federal regulations governing Title IV HEA program funds require the University to establish a standard of satisfactory academic progress (SAP), and to monitor students’ progress toward completion of a degree or certificate. Information relevant to the University’s SAP standard is provided below.

Students’ academic progress is evaluated at least once annually. For students in programs that are less than one academic year in length, academic progress is evaluated at the end of each enrollment period. Failure to meet the University’s SAP standard requirements may result in financial aid suspension. Financial aid will be reinstated only after eligibility is re-established.

The satisfactory academic progress requirements below apply to all University students and are consistently applied, whether or not a student is receiving financial aid.

Evaluation measures
Satisfactory academic progress is evaluated based on three measures: qualitative, quantitative, and maximum time frame.

Qualitative. The qualitative measure specifies the grade point average (G.P.A.) that must be achieved at each evaluation. If the G.P.A. is not an appropriate qualitative measure, a comparable assessment measured against a norm will be used. Calculation of the G.P.A. does not include incompletes (I), withdrawals (W), or transfer courses; however, courses repeated for additional credit (such as seminars and research) will be included. Courses repeated for a better grade will include only the most recent grade in the G.P.A. calculation.

Quantitative. The quantitative measure specifies the pace at which a student should progress through his/her educational program in order to successfully complete a sufficient number of units at a rate that ensures program completion within the maximum time frame. The pace at which a student is progressing is calculated by dividing the cumulative number of units the student has successfully completed by the cumulative number of units the student has attempted. Units (credit hours) transferred from another institution that are accepted toward the student’s educational program will be counted as both attempted and completed units.

Maximum time frame. The maximum time frame for an undergraduate program measured in units cannot exceed a period longer than 150 percent of the published length of the program. The maximum time for completion of a master’s degree is five years; the maximum time for completion of a doctoral degree is seven years. Calculation of the time frame begins with the term in which the first LLU course applicable toward a degree or certificate is taken.

Program requirements
Undergraduate programs. Undergraduate students must maintain a cumulative G.P.A. of at least 2.0. They must also maintain a cumulative
completion rate equal to or exceeding two-thirds (67 percent) of the units attempted. Maximum time for completion of an undergraduate program is a period no longer than 150 percent of the published length of the academic program, as measured in credit hours or in clock hours required and expressed in calendar time.

Graduate programs. Graduate students must maintain a cumulative G.P.A. of at least 3.0. They must also maintain a cumulative completion rate equal to or greater than two-thirds (67 percent) of the units attempted. For programs with a limited or no research component, the number of units per term needed to complete the program on time will be determined by dividing the total number of units required for completion by the length of the program—expressed in academic quarters (e.g., five years for a master’s degree equals twenty academic quarters). Research-intensive programs will provide information regarding the number of units that must be completed by the midpoint and three-quarters point of the program. Maximum time for completion of a master’s degree is five years; maximum time for completion of a doctoral degree is seven years—except in the case of block programs.

Professional practice doctorates. All professional practice doctoral degrees (D.P.T., Pharm.D., D.D.S., M.D.) are block programs requiring students to enroll full time. See specific programs below for SAP policy information.

Doctor of Physical Therapy (entry-level D.P.T.). Students must maintain a cumulative G.P.A. of 3.0—with no grade less than C (2.0) in any required course—and must demonstrate satisfactory clinical performance. In addition, they must receive a grade of B or better in AHCJ 510 Human Gross Anatomy (taken during the first quarter of the program). Students must maintain a cumulative completion rate equal to or greater than two-thirds (67 percent) of the units attempted. Students are expected to complete the program in three years; however, if a leave of absence becomes necessary, the maximum allowable time to degree completion is seven years.

Doctor of Pharmacy (Pharm.D.). The G.P.A. required for graduation is 2.30. Students must maintain a cumulative completion rate equal to or exceeding two-thirds (67 percent) of the units attempted. In addition, students must hold a valid, nonprobationary intern pharmacist license. Six years is the maximum time allowed to degree completion, which is also the maximum time intern pharmacist licensure is granted by the California State Board of Pharmacy.

Doctor of Dental Surgery (D.D.S.). Students must maintain a cumulative G.P.A. of 2.0. They must also maintain a cumulative completion rate equal to or exceeding two-thirds (67 percent) of the units attempted. Students are expected to complete the program in four years; however, the maximum allowable time to degree completion is six years.

Doctor of Medicine (M.D.). In order to progress to the next academic year, students must not receive a U (Unsatisfactory) grade in any course. They must also maintain a cumulative completion rate equal to or exceeding two-thirds (67 percent) of the units attempted. Although students are expected to complete the program in four years, they are allowed to complete the first two years (basic sciences) within three years before progressing to the clinical years (third and fourth years of the program). The two clinical years must be completed within three years.

Loss of eligibility for financial aid

On the basis of the SAP evaluation, Title IV HEA program funds may be suspended for any of the following reasons:

- Student fails to achieve the required G.P.A.
- Student is not successfully completing his/her education program at the required pace.
- Student is unable to complete the program within the allotted time frame.

The student is suspended from federal financial aid eligibility only and may not receive additional financial aid funds. However, s/he may continue enrollment at this University either without any financial assistance or, if eligible, with the assistance of private loans. The Financial Aid Office can supply the student with additional information regarding these loans.

Suspension letter

A student who fails to meet the University’s satisfactory academic progress standard will be informed in writing by the Financial Aid Office that financial aid has been suspended until such time as the student is again in compliance with SAP guidelines. The letter will include instructions regarding the appeal process.

Appeal process

Students may appeal loss of eligibility for financial aid. Instructions for submitting a Satisfactory Academic Progress Appeal are available on the Web for students wishing to have their aid reinstated. The appeal must be filed by the deadline specified in the letter of suspension, even if the student believes an error has been made in his/her case. The completed appeal must be submitted to the director of financial aid, who will present it to the SAP Appeals Committee. The Financial Aid Office will notify the student in writing within five business days following the decision by the appeals committee.

The student is required to submit his/her appeal in writing. The appeal must include the following information:

- A full explanation of the circumstances that led to his/her inability to meet the minimum progress requirements.
- Supporting documentation verifying the circumstances.
- A personalized academic plan. With the assistance of his/her academic advisor, the student is expected to explore options available to eliminate deficiencies; as well as to develop a realistic term-by-term listing of specific courses to be taken toward graduation; and non-course requirements to be completed (e.g., advancement to candidacy, qualifying examinations, dissertation defense). This plan is designed to ensure that the student will be able to meet the satisfactory academic progress standard by a specified point in time. The academic plan is signed by the academic advisor, department chair, and school academic dean.

If the appeal is approved, the student will be expected to adhere to the units and courses specified in the academic plan portion of the appeal. The academic plan will be closely monitored by the Financial Aid Office. Failure to follow the courses and units outlined may constitute the basis for future denial of financial aid.

The progress of students on an academic plan will be reviewed at the end of one payment period, and then according to the academic plan; but not less frequently than the rest of the institution’s population.

Financial aid eligibility reinstatement

A student who has failed to make satisfactory progress but who has appealed financial aid suspension and has had eligibility for aid reinstated is placed on financial aid probation. Clear financial aid
eligibility will be regained when s/he is again in compliance with the satisfactory academic progress standard.

**Graduation**

The responsibility for meeting graduation requirements rests primarily upon the student. Therefore, students should read and understand the requirements as set forth in this CATALOG and consult carefully with their advisor to plan a sequence of courses each term that fulfills these requirements. A student’s program of study is governed by the requirements listed in the University CATALOG at the time of admission; however, when circumstances demand, the University reserves the right to make changes with reference to admission, registration, tuition and fees, attendance, curriculum requirements, conduct, academic standing, candidacy, and graduation.

The undergraduate who plans to graduate must submit an Undergraduate Intent to Graduate form two quarters prior to graduation. The form is available online at <llu.edu/ssweb/documents/intgrad.pdf>.

**Commencement exercises**

The candidate completing requirements in the Spring Quarter is expected to be present at commencement exercises and receive the diploma in person. Permission for the degree to be conferred in absentia is contingent upon the recommendation of the dean of the school in which the student is enrolled to the provost and can be granted only by the provost. If a candidate has not satisfactorily fulfilled all requirements, the University reserves the right to prohibit participation in commencement exercises.

**Diploma**

When the profession is named in the degree title, or when the degree is indicated by the school name, no other designation is included on the official diploma issued to the graduate. When the profession or major is not named in the degree title, the profession or specialization is also indicated on the official diploma.
Financial Policies and Information

Students are expected to arrange for financial resources to cover all expenses before the beginning of each school year. Accounts with other schools or with this University must be settled before enrollment. Registration is not complete until tuition and fees for each term are paid; therefore, students should be prepared to make these payments during scheduled registration periods for each academic year. Tuition and fees may vary from amounts shown. Please refer to the Student Account Disclosure statement for additional student account financial information (<llu.edu/assets/central/ssweb/studentfinance/documents/disclosure.pdf>).

Student fees

Enrollment fees

Students attending this University will be charged an enrollment fee, based on the criteria indicated below. Neither the fee in total nor any portion of the fee will be waived under any circumstance. Other school-specific charges—such as technology fees, and laboratory fees—may also appear on the student account. The following criteria govern the enrollment fee:

1. Students who are accepted into a degree program and are registered will be charged the enrollment fee, regardless of the number of units for which they are registered.
2. Students who are not accepted into a degree program but who are registered as non-degree students for more than four units (five units for School of Allied Health Professions) will be charged the enrollment fee.
3. Students who are working on "In Progress" courses and who are not registered for any other units will be charged the enrollment fee.
4. A student who is charged the enrollment fee but who drops all units before the deadline for a full refund (generally one week after the first day of classes) will receive a full refund of the enrollment fee and will have no access to any University benefits. Please refer to the refund policy.
5. LOMA LINDA UNIVERSITY HEALTH employees who are "full-time, benefit eligible" will not be charged the enrollment fee, whether they are using their education benefit or not. Spouses of employees who are using the employee benefit will be charged the enrollment fee.
6. Students participating in an off-campus or online program will not be charged the enrollment fee unless the program specifically requires this fee.
7. Other school-specific fees will be charged independent of the enrollment fee.
8. Fees are refunded only during the 100 percent refund period.

Other fees

<table>
<thead>
<tr>
<th>Fee</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Late payment fee (term)</td>
<td>$100</td>
</tr>
<tr>
<td>Late registration fee</td>
<td>$200</td>

Students who have not paid the balance due for registration, or who have not been awarded financial aid sufficient to cover the balance prior to registration, will be charged a late payment fee.

General practices

Tuition payments/refunds

Tuition and fees are due and payable in full to complete registration each term. If a student withdraws from a per-unit course or program, or from a block program up to 60 percent into a term, tuition will be refunded on a pro rata basis. Students who drop a course from a block program of courses will not receive a refund (please refer to the refund percentages and dates attached to individual courses). Fees are refunded only during the 100 percent refund period.

Monthly statement

The amount of the monthly statement is due and payable in full upon presentation or notification of statement availability. A student unable to meet this requirement must make proper arrangements with the director of student finance. An account that is more than thirty days past due is subject to a finance charge of .833 percent per month (10 percent per year). Failure to pay scheduled charges or to make proper arrangements will be reported to the respective school administrator and may cause the student to be considered absent, discontinued, or ineligible to take final examinations. Students may also request that monthly statements be sent to a parent or sponsor.

Financial clearance

The student is expected to keep a clear financial status at all times. Financial clearance must be obtained

- each term in order to complete registration
- before obtaining access to University services
- before marching for graduation
- before receiving a certificate or diploma
- before requesting a transcript, statement of completion, or other certification to be issued to any person, organization, or professional board

All University registration holds must be cleared before financial clearance can be granted.

To obtain financial clearance from the Student Loan Collections Office, students with campus-based student loans must be current on all scheduled loan account payments and must have fully completed a loan exit interview after ceasing to be enrolled for at least half time at this University. If the student’s loan accounts are not current, or an exit interview has not been fully completed, a hold will be placed by the Student Loan Collection Office on transcript, diploma, or degree verification; and P1E requests and other services may be denied. Please note that all student loans are reported to a credit bureau organization on a monthly basis. If a student fails to comply with the terms and conditions of the promissory note, the Student Loan Collection Office will accelerate the loan(s), place the student loan(s) in collection with an outside agency, and demand immediate payment of the entire unpaid balance—including principal, interest due, late fees, other fees, collection costs, attorney costs, and legal costs.

Account charges

Students who are currently enrolled on campus in a degree or certificate program are allowed to charge items and services to their accounts. Campus services that permit student account charges include the Campus Store, Student Affairs, the food service locations on campus, and other providers.
Payments
Bankcard, ACH, check, wire transfer, International to US funds conversion, and cash payments are accepted. Checks should be made payable to Loma Linda University and should indicate the student’s ID number to ensure that the correct account is credited. International students can also make payments in their local currency through the Flywire Service (https://www.flywire.com). In case a payment is returned, a $25 returned-item fee will be assessed. Payments are accepted in person at Student Finance, by mail, and online at <http://www.llu.edu/students/student-finance/>. Account refunds resulting from financial aid, tuition refunds, or other payments may be credited back to any bankcard used—to the extent of the card payment made—before a refund check or direct deposit will be issued.

Please note that student identification cards are required for enrolled students to obtain service at the Student Service Center. (LLU HEALTH employees may present their employee ID cards in lieu of student ID.)

Account withdrawals
Students who have credit balances on their accounts after all University charges are covered may request a withdrawal of these funds. Each account withdrawal must be requested by the student. Withdrawals will be processed as checks or direct deposits; no cash withdrawals or automatic account withdrawal services are available.

Student withdrawal requests made in person at the Student Finance cashier’s window, by fax during office hours, or online before midnight on Tuesday of each week will be processed on Thursday of that week. Students may also request rush withdrawal processing for next business day service. A $20 processing fee is charged.

Checks will be available for pickup after 11:00 a.m. at the Student Finance cashier’s window each business day, or they can be mailed.

Direct deposit authorization and online account withdrawals can be initiated by logging in on <http://ssweb.llu.edu/loginss> and going to the Student Finance menu. If direct deposit funds are returned to the University due to the entry of inaccurate bank account information, a fee will be charged. Direct deposits may take two days or more after processing to appear in bank accounts. It is the student’s responsibility to verify the receipt and availability of direct deposit funds before initiating any transactions.

Students are cautioned to budget the use of withdrawn funds carefully because additional funds may be needed to cover education and living expenses for current and/or future terms. The Financial Aid Office should be contacted with questions about student budgeting and the use of funds available for withdrawal.

Deposits
Acceptance deposit
Upon notification of acceptance, the student makes the required deposit (see school or program for specific deposit amount). This amount is deducted from the tuition and fees due at registration, or is forfeited if the student does not enroll.

Room and key deposit
Residence hall room and key deposits for Daniells Complex and for Lindsay Hall are forfeited after August 15 if occupancy does not follow for the Autumn Quarter. At the close of the term of residence, both the room deposit and the key deposit are refunded after the dean’s inspection and clearance and the student’s return of the key.

International student deposit
Loma Linda University requires that international students be prepared to provide an advance deposit and provide documentation that additional funds will be forthcoming to meet school expenses. The deposit will be held by the University during the program of study and will be applied to the final quarter’s tuition and fees. Alternatively, the deposit may be refunded, less any outstanding balance on the account, if the student is denied a visa or terminates his/her program.

Housing
If a student is interested in on-campus/residential housing, application may be made online at <llu.edu/central/housing>.

International students
International applicants (non-U.S. citizens and non-U.S. permanent residents) must meet all admissions requirements for the chosen program before an offer of acceptance can be issued. This includes providing evidence of their ability to meet estimated living expenses and all financial obligations to the University that will occur during their program.

After acceptance into the chosen program, the office of International Student and Scholar Services will contact international applicants and guide them through the appropriate procedures. For questions, please call International Student and Scholar Services at 909/558-4955.

Health service
A student enrolled in an on-campus certificate or degree program may be covered by the Student Health Plan provisions. Non-degree students taking more than four units (five units for School of Allied Health Professions) may also be covered by the plan. Please view student registration portal for notice of coverage. A non-degree student may request and pay for health plan coverage if s/he is a part-time student who has been accepted into a board-approved (degree or certificate) program and is currently registered for up to and including four units. For further information, see the Student Health Plan in the Student Life section of this CATALOG.

Student aid
The Office of Financial Aid strives to provide prospective and enrolled students with information and resources to financially support their educational goals. Through the administration of federal student aid programs, state grant programs, and University-based institutional loans and scholarships, the financial aid office assists students in removing financial barriers to obtaining a higher education. It is the responsibility of LLU to ensure that funds are administered according to federal and state law.

Applying for aid
To apply for financial aid, citizens and eligible noncitizens must complete a Free Application for Federal Student Aid (FAFSA), available online at <www.fafsa.ed.gov> (http://www.fafsa.ed.gov). The FAFSA was available October 1, 2018, for the 2019-2020 academic year. Application as soon as possible is urged. Results of the FAFSA, called the Student Aid Report (SAR), will be electronically sent to Loma Linda University if the student
listed the institution on the application. The school code for LLU is 001218. The FAFSA must be completed for each academic year.

International students are not eligible for U.S. government assistance. International students may receive private funding, such as private educational loans, from a lending institution or bank. Lenders may require international students to have a cosigner who is a U.S. citizen or permanent resident. Please contact the lending institution for more information on the application process and the terms and conditions of the applicable loans.

Students must be in an eligible degree or certificate program to receive financial aid. Additionally, most financial aid programs require a student to be attending at least half time in eligible units/hours.

Eligibility

Eligibility for need-based financial aid is determined by many factors, including the family’s income, assets, family size, and number in college. All information is used to calculate expected family contribution (EFC). The EFC formula is found in Part F of Title IV of the Higher Education Act (HEA) of 1965, as amended. Updates are published in the Federal Register. Eligibility for need-based funds is calculated by subtracting a student’s EFC from the estimated cost of attendance.

Non-need-based aid is financial aid that is not based on one’s EFC. If a student requires additional aid, s/he may apply for other non-need-based forms of aid to supplement the cost of attendance. Non-need-based aid may not exceed a student’s estimated cost of attendance minus any other assistance s/he has been awarded. Students must apply for need-based funding and complete a FAFSA to receive most forms of non-need-based assistance.

Merit-based aid is awards given without regard to financial need. Merit-based aid is typically awarded based on academic achievements, talents, demographic characteristics, and other criteria. Students seeking merit-based aid may apply to outside agencies or contact their programs to inquire about availability. The Office of Financial Aid does not select recipients for merit-based aid.

For more information on eligibility and general requirements students must meet, please visit <http://www.llu.edu/students/financial-aid/eligibility.php>.

Financial aid awards

If a student is eligible for financial aid, his/her need may be funded by various sources. Students who met the priority funding deadline (March 2, 2018, for the 2018-2019 academic year) were given greatest consideration during the awarding process. After priority funding deadline consideration, most funds are distributed on a first-come, first-served basis due to the limited availability of certain awards.

Types of aid

For detailed information on the types of aid available through the Office of Financial Aid, please visit <http://www.llu.edu/students/financial-aid/types-of-aid.php>.

Aid available to undergraduate students:

• Federal PELL Grant
• Federal Supplemental Educational Opportunity Grant (FSEOG)

Aid available to graduate students:

• Cal Grant (California residents only)
• Direct Subsidized Stafford Loan

Aid available to undergraduate and graduate students:

• Direct Unsubsidized Stafford Loan
• Federal PLUS Loan (parent and graduate)
• Federal Work Study (FWS)
• Institutional loans and scholarships
• Private educational loans from outside lenders

Reporting outside assistance

Students are required to report any outside financial aid assistance to the Office of Financial Aid. Outside assistance must be coordinated with any federal, state, or institutional funds to prevent an over-award. Failure to report outside assistance may result in owing back funds to either the institution or the U.S. Department of Education.

Veterans benefits

Loma Linda University is approved for the training of veterans and other eligible persons under Title 38 of the U.S. Code. Information regarding eligibility for these programs may be obtained by calling 888/GIBILL1 or 888/442-4551. Application for benefits must be made directly to the Veterans Administration (VA) and may be done via the Web at <www.gibill.va.gov> (http://www.gibill.va.gov).

The Office of University Records serves as the certifying office for Loma Linda University. Students should contact the certifying official prior to their first enrollment certification. A veteran cannot be certified until s/he registers. Payments are usually received 30 days after certification.

Students receiving veteran’s benefits who fail—for three consecutive quarters—to maintain the cumulative grade point average (G.P.A.) required for graduation will have their benefits interrupted, and the VA office will be notified.

School of Medicine students must maintain satisfactory grades for all required courses for the year in which they are currently enrolled. If a grade in a required course reflects unsatisfactory progress, the student will not be certified by the VA until s/he progresses to the next academic year.

For more information, open links to the Veterans Information site under the “Student Life” section online at <www.llu.edu/students>.

WICHE

The University participates in the student exchange program of the Western Interstate Commission for Higher Education (WICHE). Eligibility requirements vary among states. Interested students should apply to their state’s certifying officer for further information.

The name and address of the certifying officer can be obtained from the Western Interstate Commission for Higher Education, 3035 Center Green Drive, Suite 200, Boulder, CO 80301. Web page: <wiche.edu/psep (http://wiche.edu/psep)>.

Inquiry may also be made at the Office of Student Financial Aid. The application deadline is October 15 prior to the year aid is needed.
Welcome to the School of Allied Health Professions, where your future begins. If you are considering a new allied health career or returning to advance your current one, we are committed to providing you a quality professional education and fostering your personal and spiritual development while you are attending our school. We encourage all of our students to learn not only in the classroom but through mission and service both locally and globally. We are glad you are here, and we are ready to help you achieve your academic goals.

Craig R. Jackson, J.D., M.S.W.
Dean, School of Allied Health Professions

School foundations

The School of Allied Health Professions was established in 1966 (under the name School of Health Related Professions, 1966-1971) to consolidate the administration of individual curricula initiated earlier in the University: medical technology, 1937; physical therapy, 1941; radiography, 1941; occupational therapy, 1959; health information management (formerly medical record administration), 1963.

The following curricula were added since the school was established: nuclear medicine technology, 1970; radiation therapy technology, 1970; cardiopulmonary sciences (formerly respiratory therapy), 1971; nutrition and dietetics, 1972; medical sonography, 1976; special imaging technology, 1976; cytotechnology, 1982; coding specialist, 1987; physical therapist assistant, 1989; emergency medical care, 1993; physician assistant, 2000; rehabilitation sciences, 2001; polysomnography, 2002; radiologist assistant, 2003; medical dosimetry, 2003; orthotics and prosthetics, 2007; health-care administration, 2008; cardiac electrophysiology technology, 2009; health professions education, 2010. The curriculum in speech-language pathology and audiology, renamed communication sciences and disorders in 2009, was initiated in 1965 under the auspices of the College of Arts and Sciences of La Sierra University (formerly Loma Linda University, La Sierra campus). The program was transferred to the School of Allied Health Professions in 1987. Policies and procedures governing programs currently offered are detailed in this section of the CATALOG following information that pertains to all School of Allied Health students.

Mission and goals

Our mission

The School of Allied Health Professions is dedicated to fulfilling the mission of Loma Linda University through academic and clinical training of allied health professionals. The school prepares competent health professionals in a Christian environment that emphasizes the healing and teaching ministry of Jesus Christ, “to make man whole.”

To meet local, national, and international allied health-care needs, the school seeks to serve:

1. Students choosing to become health-care professionals.
2. Individuals in need of medical care or health promotion programs.
3. Faculty and staff members committed to working with students in a Christian educational setting.

Our goals

The goals of the School of Allied Health Professions are to:

1. Provide an environment in which the student may develop responsibility for integrity, ethical relationships, and empathetic attitudes that contribute to the welfare and well-being of patients.
2. Help the student accept responsibility for integrity, ethical relationships, and empathetic attitudes that can contribute to the welfare and well-being of patients.
3. Help the student develop a background of information and attitudes conducive to interprofessional understanding and cooperation.
4. Encourage the student to cultivate habits of self-education that will foster lifelong growth.
5. Engender and nurture in the student the desire to serve humankind—and, in particular, to serve as needed, in the medical centers sponsored by the Seventh-day Adventist Church, in this country and elsewhere.

The School of Allied Health Professions has adopted the University’s institutional learning outcomes (p. 19).

Evaluation of mission and institutional learning outcomes—Wholeness Portfolio

Wholeness Portfolio courses focus on the student’s development through assignments and experiences that are aligned with Loma Linda University’s Mission Focused Learning environment that fosters transformative learning through academic excellence, commitment to
wholeness through the integration of faith and reason, service to mankind and reflection/contemplation. Course learning outcomes reinforce wholeness, wellness, values and service.

- Apply the University’s philosophy of wholeness in one’s personal and professional life. (Wholeness)
- Being loved by God
- Growing in health
- Facilitate healthy lifestyles in self and others. (Wellness)
- Integrate LLU’s Christ-centered values in one’s personal and professional life.
- Embrace and serve a diverse world. (Service)

General regulations
University students are responsible for informing themselves of and satisfactorily meeting all regulations pertinent to registration, matriculation, and graduation. Section III gives the general setting for the programs of each school and the subject and unit requirements for admission to individual professional programs. It is important to review specific program requirements in the context of the general requirements applicable to all programs.

Admissions policies and information
Program admissions committees of the University intend that an applicant to any of the schools is qualified for the proposed curriculum and is capable of profiting from the educational experience offered by this University. School admissions committees accomplish this by examining evidence of scholastic competence, moral and ethical standards, and significant qualities of character and personality. Applicants are considered for admission only on the recommendation of the program in which study is desired.

In selecting students, the Admissions Committee of the School of Allied Health Professions looks for evidence of self-discipline, personal integrity, and intellectual vigor. The committee also looks for evidence that applicants possess the capabilities required to complete the full curriculum in the allotted time and to achieve the levels of competence required. Acceptance into any program is contingent on the recommendation of the department conducting the program.

Most programs require an interview with the faculty. Loma Linda University was established to provide education in a distinctively Christian environment, and its students are expected to adopt Christian ethical and moral standards as a basis for their conduct. It must be understood further that, in harmony with the University’s emphasis on health and the health professions and the practices of the supporting church, applicants who use tobacco, alcoholic beverages, or narcotics should not expect to be admitted.

Loma Linda University is committed to equal opportunity and does not discriminate against qualified persons on the basis of handicap, gender, race, color, or national or ethnic origin in its educational and admissions policies, financial affairs, employment programs, student life and services, or any University-administered program. It does, however, retain the right to give preference in student admissions to qualified Seventh-day Adventist applicants. While this right is retained, it should be emphasized that admission is not limited to Seventh-day Adventist applicants.

Application and acceptance
Where to write
Correspondence about admission to all programs and requests for application information should be addressed to the Office of Admissions and Records, School of Allied Health Professions, Loma Linda University, Loma Linda, CA 92350 or emailed to askalliedhealth@llu.edu.

Apply early
One class is admitted annually to most of the professional programs. Most programs begin with the Autumn Quarter. Exceptions are noted in the respective programs of this CATALOG.

Late applications are considered as long as space is available. Notifications are generally sent between January 1 and May 15, depending on varying application deadlines, the completeness of information provided, and the date of application. Applicants should inquire at the Office of Admissions and Records if notice of action is not received by a month prior to the start of the program.

Application review process
All completed applications are first reviewed by the department chair and faculty. A recommendation on each application is then submitted to the school’s Admissions Committee that makes the final decision regarding acceptance.

Procedure
The procedure for application and acceptance is given below. All correspondence is to be sent to the Office of Admissions and Records, School of Allied Health Professions, Loma Linda University, Loma Linda, CA 92350 or emailed to askalliedhealth@llu.edu. All official transcripts, international evaluations, and test scores are to be sent to Admissions Processing, Loma Linda University, 11139 Anderson Street, Loma Linda, CA 92350.

1. Apply online at <www.llu.edu/central/apply>. Be prepared to enter the names and e-mail addresses for your recommenders. Have dates of attendance for all colleges/universities attended ready for entry on the application.
2. Request that transcripts of all college course work be sent to Admissions Processing. High school transcripts are required of all applicants in order to verify graduation. High school transcripts are not required if you have completed either an associate or bachelor’s degree unless course work in high school is used to satisfy a requirement.
3. Upon receipt of the notice of acceptance, submit the required deposit to confirm acceptance.
4. Send health records or certificates to Student Health Services, 24785 Stewart Street, Evans Hall, Suite 111, Loma Linda, CA 92354.

Entrance requirements
Subject/Diploma requirements
High school and college subject requirements are outlined in the respective programs. Students are required to furnish official transcripts as evidence of completion of high school in order to be granted admission to undergraduate programs in any of the schools of the University. Applicants who have completed either an associate or bachelor’s degree are exempt from submitting a high school transcript unless course work in high school is used to satisfy a subject requirement. A high school diploma or its equivalent, the GED, is required.
Grade requirement
Eligibility for consideration by the Admissions Committee is based on a G.P.A. of at least 2.0 (on a 4.0 scale) for all course work (science and non-science subjects computed separately), presented in fulfillment of entrance requirements for all programs in the school. A G.P.A. considerably higher than the minimum is expected because of the nature of the studies in many professional programs and the competition for the limited number of openings. In general, G.P.A.s between 2.5 and 3.0 are considered minimal, depending on the program. A minimum grade of C (2.0) is required for all college transfer courses.

Student life
The information on student life contained in this CATALOG is brief. The most current Student Handbook more comprehensively addresses University and school expectations, regulations, and policies; and is available to each registered student. Students need to familiarize themselves with the contents of the Student Handbook. Additional information regarding policies specific to a particular school or program within the University is available from the respective school.

Professional standards
Good taste indicates that haircut, hair styling, and personal grooming be neat and conservative rather than ostentatious.

Grooming and style should also be practical so that the student can perform assigned duties without embarrassment or inconvenience. Specifically:

- Men's hair must be neatly trimmed and not fall below the collar. Ponytails, spikes, and dreadlocks are not acceptable.
- Mustaches and beards, if worn, must be neat and closely trimmed.
- Women's hair, if long, may be required to be tied back. Spikes and dreadlocks are not acceptable.
- The wearing of hats indoors is not acceptable.
- Words, pictures, and/or symbols displayed on clothing should be consistent with a Christian institution and sensitive to a diverse student population.
- Excessive makeup and fragrances are not appropriate.
- Rings, if worn, should be low profile and limited to one finger per hand. Male students are not allowed to wear ear ornaments. If worn by women, ear ornaments are limited to simple studs and should not drop below the bottom of the earlobes. Such ornaments are limited to one per ear. Rings or ornaments in other anatomical sites are not acceptable.
- Fingernails should be maintained in a professional manner, closely trimmed, and should not interfere with patient safety and comfort during treatments. Nail polish, if worn, should be of a subdued color.

Academic policies and information
Students are responsible for informing themselves of the policies and regulations pertinent to registration, matriculation, and graduation; and for satisfactorily meeting these requirements.

Academic probation
Students whose cumulative G.P.A. at the end of any quarter is less than the minimum required by the school or program will be placed on academic probation, and the number of units for subsequent registrations will be restricted to a maximum determined by the school or program. A student on academic probation jeopardizes his or her standing in a degree or certificate program.

Academic residence
In order to graduate from Loma Linda University with a bachelor’s degree, a student must complete at least 32 of the last 48 units, or a minimum of 45 total units of course work, at this University. A minimum grade of C (2.0) or better is required for all B.S. and post-baccalaureate degrees.

Graduation ceremonies
Graduation events include formal ceremonies identified as conferring of degrees, awarding of diplomas, and recognition of candidates for degrees. Other related graduation events include the baccalaureate and vespers services. The conferring of degrees ceremony(ies) occurs at the close of Spring Quarter and includes an academic procession, the formal conferring of degrees by the president, and the presentation of diplomas by the dean of the school. Candidates who complete the requirements for degrees and certificates are invited, with families and friends, to attend and participate in these important and colorful events.

To be eligible to participate in graduation events, candidates must have completed all requirements for the degree, including prerequisites and/or corequisites, as specified by the school. In certain degree programs, upon authorization of the dean, exceptions will be made for candidates who

- have only clinical experience requirements to complete and can project completion by the end of the calendar year
- can complete remaining degree requirements by the end of the Summer Quarter
- are in a block program

The still in-progress coursework may not exceed eight units for graduate students or 12 units for undergraduate students. A student who completes the requirements for a degree or certificate (other than clinical experience) at the end of the Summer, Autumn, or Winter Quarter is invited to participate in the subsequent June commencement events. The official date of graduation on the diploma is ordinarily the last day of the term in which requirements for a degree are completed.

Superior academic performance and achievement in scholarship and leadership are recognized in the printed graduation program for persons who complete their baccalaureate degree and who at the end of the quarter preceding their final term have acquired a cumulative grade point average for all college work (includes course work taken at other colleges/universities, except for remedial courses), as follow:

- 3.5 Graduation cum laude
- 3.8 Graduation magna cum laude
- 3.9 Graduation summa cum laude

Although the official commencement program indicates names of graduates who qualify for honors on the basis of their grade point averages as of the end of the quarter preceding their final term, the subsequently issued diploma and transcript may indicate graduation with honors if the student’s final quarter record has increased the grade point average sufficiently to qualify for honors at that time.

Scholastic standing
Repeating a course
A student who receives an unsatisfactory grade in a required course and is required by the faculty to do additional work may request permission of the faculty to pursue one of the following plans. In either plan, the student must register and pay the applicable tuition.

1. Review the course work under supervision and take a make-up examination (usually not given before a minimum of two weeks of
Promotion and probation
Each student’s record is reviewed quarterly by the faculty. Promotion is contingent on satisfactory academic and professional performance and on factors related to aptitude, proficiency, and responsiveness to the established aims of the school and of the profession. As an indication of satisfactory academic performance, the student is expected to maintain the following grade point average at a minimum:

<table>
<thead>
<tr>
<th>Grade Point Average</th>
<th>Program Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.0</td>
<td>Associate and baccalaureate degree programs</td>
</tr>
<tr>
<td>3.0</td>
<td>Master’s degree program</td>
</tr>
<tr>
<td>3.0</td>
<td>Doctoral degree program</td>
</tr>
</tbody>
</table>

A student whose grade point average in any term falls below the minimum required for the degree, who receives in any professional or required course a grade less than a C (2.0), or whose clinical performance is unsatisfactory is automatically placed on academic probation. Continued enrollment is subject to the recommendation of the department. If continued enrollment is not recommended, the case is referred to the school’s Administrative Council for final action.

If continued enrollment is recommended, the student will be required to institute a learning assistance plan within the first two weeks of the following quarter and to meet regularly scheduled appointments with the academic advisor. The learning assistance plan should: identify the problem, identify and list the goals, state the time frame, and include student and advisor signatures and date.

A student who is on academic probation and fails to make the minimum required grade point average the following quarter or fails to have an overall minimum grade point average after two quarters will have disqualified him-/herself from the program.

Standard of student progress (time framework)
After initial enrollment in a program, students must complete program requirements within the following time frames:

<table>
<thead>
<tr>
<th>Degree Type</th>
<th>Time Frame</th>
</tr>
</thead>
<tbody>
<tr>
<td>A.S. degree</td>
<td>3 years</td>
</tr>
<tr>
<td>B.S. degree</td>
<td>5 years</td>
</tr>
<tr>
<td>Master's degree</td>
<td>5 years</td>
</tr>
<tr>
<td>Doctoral degree</td>
<td>7 years</td>
</tr>
</tbody>
</table>

Additional requirements
For additional policies governing Loma Linda University students, see general policies of the University (p. 35), as well as the University Student Handbook. Students are responsible for informing themselves of and satisfactorily meeting all regulations pertinent to registration, matriculation, and graduation.

Financial policies and information
The Office of the Dean is the final authority on all financial matters and is charged with the interpretation of all financial policies. Any exceptions to published policy in regard to reduction or reimbursement of tuition must be approved by the dean. Any statement by individual faculty members, program directors, or department chairs in regard to these matters is not binding on the school or the University unless approved by the dean.

Registration is not complete until tuition and fees for the required installment are paid; therefore, the student should be prepared to make these payments during scheduled registration for each academic year. There may be adjustments in tuition and fees as economic conditions warrant.

General financial practices
The student is expected to arrange for financial resources to cover all expenses before the beginning of each school year. Previous accounts with other schools or this University must have been settled.

NOTE: Tuition excludes enrollment fee.

Supplies

Estimated annual expense of $600-$1,500 for supplies (textbooks, professional apparent, materials), depending on program and year of study.

Special tuition charges

$50 CMSD 589 Remediation/Advance Directed Teaching, CMSD 599 Remediation/Externship

Remediation clinic: Students who do not complete the required skill set within one quarter of assigned clinical experiences may need to register for additional clinical work. In this case, registration for remedial clinic is required for a minimum of one unit at the regular tuition rate.

$65 Examsoft Tech fee for Entry Level DPT, PP DPT and PhD PT

Special charges

$25 Application fee for Phlebotomy Program

$60 Application fee for all other SAHP programs. There is no school application fee for DPT, OT, and PA.

$30 Reapplicaiton

$500 Acceptance deposit, nonrefundable (applied on tuition)—M.P.A.

$350 Acceptance deposit, nonrefundable (applied on tuition)—entry-level D.P.T.

$200 Acceptance deposit, nonrefundable (applied on tuition)—CMSD M.S. and TM, PP D.P.T., entry-level OT, O.T.D.; and entry-level M.S.O.P.

$100 Acceptance deposit, nonrefundable (applied on tuition)—all other SAHP programs (excludes Phlebotomy, which is $50)

$200 Late registration charge (if student registers later than one full week before the first day of the term; see University calendar for specific dates).

$25 Returned check charge

On- and off-campus student housing

Students may go to <llu.edu/central/housing> for housing information and a housing application form.

Awards and scholarships

Awards for scholastic attainment and leadership ability have been made available to students whose performance and attitudes reflect well the ideals and purposes of the school.

School-wide scholarships

President’s Award

The President’s Award is given annually in recognition of superior scholastic attainment and active participation in the student community, within the framework of Christian commitment. A recipient is selected from each school of the University.

Dean’s Award

The Dean’s Award is given annually in recognition of academic excellence and commitment to the objectives of the school.
SAHP Endowment Scholarship
The SAHP Endowment Scholarship is given to students who require financial aid assistance in order to attend the school.

Robert and Ruth Hervig SAHP Scholarship Fund
The Robert and Ruth Hervig School of Allied Health SDA Scholarship is given to students enrolled in the school who are members of the Seventh-day Adventist Church and exhibit a Christian lifestyle.

Cardiopulmonary Sciences
Cardiopulmonary Sciences Scholarship Fund
The CPS scholarship fund is given to students enrolled in the department who require financial aid.

American Medical Response Southern California Scholarship Fund
The American Medical Response Scholarship is given to a student who demonstrates excellence in the clinical practice of emergency medical service and outstanding academic achievement in the Emergency Medical Care Program.

Faculty Award
The Faculty Award is presented to a student from the Emergency Medical Care B.S. degree and the Respiratory Care B.S. degree programs who has shown promise of outstanding professional achievement and whose performance is in harmony with the objectives and goals of the University.

Louisa & Peter Jezerinac Cardiopulmonary Scholarship
The Louisa Jezerinac Cardiopulmonary Scholarship is given to a student whose patient care exemplifies the qualities of compassion and dedication.

Robert L. Wilkins Memorial Scholarship
The Robert L. Wilkins Memorial Fund was established to honor the memory of alumnus and longtime faculty member Dr. Robert L. Wilkins. This scholarship is given to a student with financial need, who is in good standing with the department, and who has an interest in research and/or teaching.

Clinical Laboratory Science
Affiliate Recognition Award
The Affiliate Recognition Award is presented to a senior clinical laboratory science student for outstanding performance, cooperation, and motivation during the clinical practicum year. Selection is based on recommendation of the clinical faculty.

Chair’s Award
The Chair’s Award is given to a senior clinical laboratory science student or to a cytotechnology student in recognition of outstanding scholarship and leadership qualities that are in harmony with the objectives and goals of the University. Selection is based on the recommendation of the faculty.

Clinical Laboratory Science (CLS) Scholarship
The Clinical Laboratory Science (CLS) Endowment Scholarship is presented to CLS students on the basis of financial need.

Dr. James L. Welch Scholarship
The Dr. James L. Welch Scholarship is presented to CLS students interested in education, research or treatment related to Acquired Immune Deficiency Syndrome.

Faculty Award
The Faculty Award is presented to a senior clinical laboratory science student or to a cytotechnology student who have shown promise of outstanding professional achievement and who intend to pursue a career in the area of medical technology or cytotechnology. Selection is based on recommendation of the faculty.

Marlene Ota Endowment
The Marlene Ota Scholarship is awarded to a cytotechnology student who is a Junior or Senior, has a GPA of 3.0 or greater, upholds professional and ethical standards, demonstrates leadership potential and has financial need.

Moncrieff Scholarship
The Moncrieff Scholarship is presented annually to a clinical laboratory science student in the Medical Technology Program who has demonstrated superior scholarship; professional dedication; financial need; and such personal attributes as dependability, integrity, and initiative.

Walsch-Loock Scholarship
The Walsch-Loock Scholarship is presented annually to a clinical laboratory science student on the basis of need, leadership capabilities, academic achievement, and community service orientation.

Communication Sciences and Disorders (CSMD)
Evelyn Britt Promising Student Award
The Evelyn Britt Promising Student Award is presented to students preparing for graduate work in speech-language pathology and audiology. It recognizes students who show promise of scholastic and professional achievement.

Speech-Language Pathology and Audiology Scholarship Endowment
The Speech-Language Pathology and Audiology Scholarship Endowment is given to students in the CMSD program to provide financial aid assistance.

Health Informatics and Information Management
Elizabeth M. Guerra Scholarship
The Elizabeth M. Guerra Scholarship is given to a senior student in the bachelor’s degree program with a grade point average of at least 3.5. The student must demonstrate a dedication to the profession of health information management, good leadership skills, and good personal qualities, as determined by the faculty of the department.

Audrey Shaffer Endowment
In the interest of promoting student involvement in the international mission of Loma Linda University, the Audrey Shaffer Endowment provides travel expenses for student clinical and affiliation experiences in health-care facilities outside the United States.

Davidian Scholarship
The Davidian Scholarship Fund is for female students enrolled in the HIIM program that are 30 years of age or older.

Faculty Award
The Faculty Award is presented to students who have shown promise of leadership, scholarship, and potential contribution to their chosen profession. One award is given annually to students graduating from the programs in health information administration and health information systems.
The Rising Star Award
The Rising Star Award is presented to a senior student whose overall performance exemplifies significant potential for future professional contribution and contributions to the department and/or University.

Health Information Management Student Awards
The Health Information Management Student Awards are given by classmates to the graduating students who have shown promise of leadership, scholarship, and potential for contribution to their chosen profession.

Health Information Administration Scholarship
The Health Information Administration Scholarship is given to students enrolled in the department to provide financial aid assistance.

Margaret B. Jackson Scholarship
The Margaret B. Jackson Scholarship is presented by the department to a senior student on the basis of scholarship, promise of outstanding professional achievement, and financial need.

Smart Corporation Medical Records Endowed Scholarship
The Smart Corporation Scholarship Award is presented to a health information administration student on the basis of scholarship and financial need.

Nutrition and Dietetics
Kathleen Keen Zolber Scholarship
The Kathleen Keen Zolber Scholarship is given to students in need of financial aid and promise of outstanding professional achievement.

Jennie S. Hudson Scholarship
The Jennie S. Hudson Scholarship is given to students enrolled in the department to provide assistance based off of academic performance and promise of professional achievement.

Martha Miller Scholarship Award
The Martha Miller Scholarship Award is given at the beginning of the academic year to a student who demonstrates both financial need and academic and professional promise.

Nutrition and Dietetics Scholarship Endowment Fund
The Nutrition and Dietetics Scholarship Endowment Fund is for students enrolled in the department to provide assistance in order to attend the school.

Ruth Little Nelson Scholarship Award
The Ruth Little Nelson Scholarship Award is presented to students based on financial need.

Winifred Van Pelt Schmitt Scholarship Endowment
The Winifred Van Pelt Schmitt Scholarship Endowment provides scholarships to nutrition and dietetics students who have demonstrated financial need, satisfactory progress toward a degree, and professional promise.

Occupational Therapy
Faculty Award
This award is presented to a graduating student who has demonstrated the values and mission of the Department of Occupational Therapy and Loma Linda University, exemplified academic achievement, commitment to service, and positive contributions to the learning environment.

Alumni Award
This award is presented to a graduating student who has exemplified the vision of the Department of Occupational Therapy to transform lives through occupation-based practice, service, and advocacy, and demonstrated leadership in sharing our vision with others.

Edwinna Marshal Leadership Award
This award is presented to a graduating student in recognition of potential for leadership and education in the field of Occupational Therapy.

Lynn Arrateig Practice Award
This award is presented to a graduating student in recognition of commitment to the practice of pediatric and geriatric occupational therapy.

Community Outreach Award
This award is presented to a graduating student who has been a positive role model and change agent, actively engaged in community service to provide improved quality of life in the local and global community.

Hamid Javaherian Memorial Award
The Hamid Javaherian Award is given to a student enrolled in the Masters of Occupational Therapy program, or any student in the Post Professional Doctor of Occupation Therapy program. Student exemplifies compassion, leadership, program innovation, and dedication to the community in the spirit of occupational justice. Awards are to be given upon merit not financial need.

Occupational Therapy Alumni Association Award
The Occupational Therapy Alumni Association Award recognizes outstanding scholastic and professional achievement in occupational therapy.

Occupational Therapy Endowment Scholarship
The Occupational Therapy Endowment Scholarship is given annually to students based on scholarship, financial need, and promise of professional achievement.

Physician Assistant (PA)
PA Faculty Award
The PA Faculty Award is presented to a physician assistant student who has shown promise of outstanding professional achievement and whose performance is in harmony with the objectives and goals of the University.

Spirit of LLU Physician Assistant Award
The Spirit of LLU Physician Assistant Award recognizes students who have dedicated themselves to their professional goals, persevering with good humor in the face of adversity; have shown compassion for and sensitivity to others; have a positive attitude; and have served as positive ambassadors for this program throughout their PA program training.

The Chair’s Award
The Chair’s Award is presented to a senior PA student in recognition of outstanding performance and professional deportment in both the didactic and clinical phases of the program. The recipient is an individual who has consistently demonstrated qualities that are in harmony with the goals of the department and the University.

Physician Assistant Alumni Award
Recipients of the Physician Assistant Alumni Award demonstrate the following criteria: sound judgment in resolving student issues, willingness to lead activities or study groups, mature and responsible behavior,
good rapport with peers and faculty/staff, and recent involvement in community service.

**Association of Schools of Allied Health Professions Scholarship for Excellence Award**
The Association of Schools of Allied Health Professions Scholarship for Excellence Award is presented to the student who is recognized for outstanding performance in the allied health professions, who is achieving excellence in his/her academic program, and who has significant potential to assume future leadership roles in an allied health profession.

**The Rising Star Award**
The Rising Star Award is presented to the student whose overall performance exemplifies the following criteria: advancement of the physician assistant profession, entrepreneurship in invention or learning, noteworthy performance in research, outstanding community service, interest in mentoring patients, and contributions to the department and/or University.

**Neidigh Physician Assistant Scholarship**
The Neidigh Physician Assistant Scholarship is for students enrolled in the department program who are qualified in their first year and awarded in their second year, have a GPA of 3.0 or higher and demonstrate sound judgement, willingness to lead, mature and responsible behavior, rapport with colleagues and community service involvement.

**Physical Therapy**

**Physical Therapy Faculty Award**
In recognition for demonstrating outstanding potential and promise in the profession of physical therapy.

**Jeanne Middleton Scholarship**
The Jeanne Middleton Scholarship is to provide scholarship assistance to students in their first year enrolled in the MPT or DPT program and is based on the financial need and professional potential.

**Jonna Hughes Memorial Scholarship**
The Jonna Hughes Memorial Scholarship was established by Dr. Billy Hughes to continue his mother’s tradition of service. The scholarship benefits female physical therapy students who have risen above personal circumstances to fulfill a life in service to others.

**Fred B. Moor Scholarship**
The Fred B. Moor scholarship is presented to a student enrolled in the department with a GPA of 3.0 or greater and has financial need.

**Matthew Lynn Schrader Memorial Scholarship**
The Matthew Lynn Schrader Memorial Scholarship is for PTA students enrolled in the program who exhibit: a passion for helping people, connecting with their patients, and financial need.

**Physical Therapy Leadership Award**
In recognition of leadership in school and community activities.

**Scholarship Excellence Award**
In recognition for outstanding scholastic achievement.

**Physical Therapy Scholarship Endowment**
The Physical Therapy Scholarship Endowment is to provide financial aid assistance that are enrolled in the department program.

**Randall C. Isley Memorial Award**
The Randall C. Isley Memorial Award recognizes a graduating PTA student who demonstrates scholarship, outstanding compassion, and inspiration in his/her pursuit of PTA as a second career.

**Ron Hershey Student Endowment**
The Ron Hershey Student Endowment provides scholarship funds for students who demonstrate financial need.

**Thomas G. Burke Memorial Scholarship**
The Thomas G. Burke Memorial Scholarship is given to students enrolled in the Master’s Degree program of the department and have satisfactorily completed at least one quarter of the program and have financial need.

**Radiation Technology**

**Faculty Award**
The Faculty Award is given by the department in recognition of superior scholarship.

Department of Allied Health Studies

The Department of Allied Health Studies provides a variety of administrative and support services to the school's academic departments, including: development, marketing, admissions, computer support and training, portfolio, and financial services. In addition, the Department of Allied Health Studies supports programs offered at distance education sites online, and programs offered in conjunction with other schools of the University. It also houses academic programs which are not a natural subset of existing departments of the school.

Life Support Education (LSE)

Life Support Education (LSE) is a program in the School of Allied Health Professions, which offers a variety of American Heart Association (AHA) classes for health-care and non-health-care professionals. Courses are approved by the California Board of Nursing and the California Medical Board for continuing education (CEU or CME) units.

The LSE program is located in the University Arts building at 24887 Taylor Street, Suite 102, Loma Linda, CA 92354; telephone: 909/558-4977.

Courses offered

Basic Life Support (BLS)

This course is designed for persons who need information about basic airway management and first responder basic management of cardiac arrest in adults, children, and infants.

Prerequisite

Proof of a current AHA BLS card is required if the candidate is renewing certification. Participants must study the textbook and the CD prior to class attendance.

For more information, call LSE: telephone 909/558-4977; or visit <llu.edu/life-support-education>.

Advanced Cardiac Life Support (ACLS)

This course is designed to certify/re-certify medical professionals as ACLS providers and to increase their skills in advanced management of cardiac arrest, airway management, arrhythmia recognition, and team dynamics.

Prerequisite

Proof of a current AHA BLS card is required if candidate needs certification for the first time, or proof of current AHA BLS and ACLS card renewal of certificate. A candidate must be a health-care provider whose activities demand proficiency in ACLS skills. Required manual must be brought on the day of class. Self-assessment test (http://www.llu.edu/assets/lifesupport-education/documents/ACLS-Pre-Test.pdf) is highly recommended. Participants must study the textbook and the CD prior to class attendance.

For more information, call LSE: telephone 909/558-4977; or visit <llu.edu/life-support-education>.

Pediatric Advanced Life Support (PALS)

This course is designed to certify/re-certify medical professionals who need information about the recognition and advanced management of cardiac arrest, shock, and airway management in infants and children.

Prerequisite

Proof of a current AHA BLS card is required if the candidate needs to be certified for the first time, or proof of a current AHA BLS and PALS card if he/she is renewing certification. The candidate must be a health-care provider whose activities demand proficiency in PALS skills. The required manual must be brought on the day of class. Self-assessment test (http://www.llu.edu/assets/lifesupport-education/documents/ACLS-Pre-Test.pdf) is highly recommended. Participants must study the textbook and the CD prior to class attendance.

For more information, call LSE: telephone 909/558-4977; or visit <llu.edu/life-support-education>.

Neonatal Resuscitation Program (NRP)

This course is designed to certify/recertify medical professionals as NRP providers and to renew/update their skills in the management of neonatal resuscitation. The skills testing complies with the guidelines of the American Academy of Pediatrics and the American Heart Association.

Prerequisite

Proof of a current NRP card is required for renewing of certificate. The candidate must be a health-care provider whose activities demand proficiency in NRP skills. The required manual must be brought on the day of class. Self-assessment test (http://www.llu.edu/assets/lifesupport-education/documents/ACLS-Pre-Test.pdf) is highly recommended. Participants must study the textbook and the CD prior to class attendance.

For more information, call LSE: telephone 909/558-4977; or visit <llu.edu/life-support-education>.

Heartsaver First Aid and Heartsaver

This class is for non-health-care and health-care providers who need to renew/update their CPR and first aid management skills.

Prerequisite

This class is for health-care and non-health-care providers whose activities demand proficiency in CPR and first aid skills. The required manual must be brought on the first day of class. Participants must study the textbook and the CD prior to class attendance.

For more information, call LSE: telephone 909/558-4977; or visit <llu.edu/life-support-education>.

LSE terms and conditions

Registration

The student should register a month before the class date. Class starts promptly at scheduled time. Anyone who is more than 15 minutes late will be asked to reschedule. Registration closes when classes are full. If a student registered online, s/he must bring printed registration confirmation on the first day of class.

Certification

American Heart Association certificates are provided upon course completion for BLS, ACLS, Heartsaver CPR/AED, Heartsaver First Aid, PALS, and PEARS. The American Association of Pediatrics provides NRP certification.

Books
Students must bring required book(s) to class. Anyone without the required book(s) will not be granted admission and will be rescheduled. Rescheduling fees apply. Books can be purchased at the Life Support Education office or online.

Fees
A 72-hour notice is required for full refunds, cancellations, and rescheduling of classes. If less than a 72-hour notice is given, a $25 processing fee applies for ACLS, PALS, and NRP classes. A $10 processing fee will be charged for PEARS, ECG and pharmacology, BLS, Heartsaver CPR, and first aid. No refunds will be given for no-shows.

A $25 fee will be charged for retesting ACLS, PALS, and NRP; a $10 fee will be charged for PEARS and BLS retesting. Retesting is not allowed less than 48 hours after the class date.

CME/CEU/ICEMA
The California Medical Association, California Board of Nursing, and Inland Counties Emergency Medical Agency have approved ACLS, PALS, and NRP provider courses for 16 continuing education units; and renewal courses for eight continuing education units. PEARS has been approved for eight continuing education units. No continuing education units for BLS and first aid are applied.

Health-Care Administration — B.S. (Online)

Program director
Karla Lavin Williams

Health-care administration is a broad-based discipline that provides students with a unique opportunity to help improve the lives of individuals, communities, or entire populations.

The Health-Care Administration Program leading to the Bachelor of Science degree contains a distinctive curriculum designed to prepare individuals to serve in midlevel administration in a variety of health-care environments. Such environments include assisted living and skilled nursing facilities; rehabilitation centers; private, public, and proprietary clinics; and medical centers.

The mission of the Bachelor of Science in Health-Care Administration is to provide health-care professionals with strong foundational skills that are necessary for movement into advanced positions in leadership, management, administration, and education.

The program was created for adult learners seeking administrative advancement in the health-care industry. The online curriculum provides a flexible and dynamic environment for learners seeking to balance full-time employment, family life, and higher education. The program meets the needs of adult learners who have previously taken course work equal to at least 96 quarter units or have earned an associate's degree at another accredited college or university to complete a bachelor's degree. Applicants with health-care clinical backgrounds (e.g., nursing, radiography, respiratory therapy, occupational therapy, physical therapy, dental hygiene) may transfer vocational-specific didactic units earned at accredited academic institutions into the degree program. Some restrictions apply.

The program provides a framework for health-care professionals to become productive leaders in the field of health-care administration and/or other environments. Students are trained in health-care leadership, emotional intelligence, sustainability, information systems, financial management, assessment, strategic and marketing plan development, personnel management, law and policy, and operations management. These core skill sets give students a competitive edge in the health-care sector.

Program learning outcomes
Upon completion of this program, the graduate should be able to:
1. Apply health-care management concepts and theory to sustainable decision-making practices, operations management, and strategic health-care administration.

2. Apply advanced proficiency in communicating with the public, staff, and constituencies.

3. Apply health-care law to policy and procedure development.

4. Manage human resources and provide effective resolution strategies.

5. Apply financial management models to health-care organizations.

6. Develop innovative information systems skills applicable to the health-care environment.

7. Develop advanced emotional and social intelligence skills applicable to health-care management.

Admissions

In addition to Loma Linda University and School of Allied Health Professions admissions requirements, applicants must also demonstrate the following qualifications:

- Minimum of 96-quarter units academic credit (students transferring from a community college may transfer a maximum of 105 quarter units; all other credits must come from a senior college)
- Minimum 2.5 G.P.A. for all freshman and sophomore course work from accredited educational institutions
- High school diploma or its equivalent (e.g., the GED) is required
- Statement of purpose
- University general education requirements listed below

Required general education courses

**Domain 1: Religion and Humanities (28-32 quarter units)**

Religion: The study of religion must include an average of four (4) units of religion course work for every 48 quarter units earned while attending a Seventh-day Adventist college or university.

Humanities: Minimum of 12 units chosen from at least three of the following areas: civilization/history, fine arts, literature, modern language, performing/visual arts (not to exceed four [4] quarter units), or philosophy.

**Domain 2: Scientific Inquiry and Analysis (24-32 quarter units)**

**Natural sciences (12 units minimum)**

Anatomy and physiology (one quarter or semester)

Intermediate algebra. Two years of high school algebra course work with grades of C and above are acceptable.

Choose remaining units from: biology, chemistry, geology, mathematics, physics, and statistics.

**Social sciences (12 units minimum)**

Choose units from: anthropology, economics, geography, political science, psychology, and sociology.

The cultural diversity requirement is met by AHCJ 493 Senior Portfolio I and AHCJ 494 Senior Portfolio II, courses taken during the program.

**Domain 3: Communications (9-13 quarter units)**

English composition, complete sequence, must meet the baccalaureate degree requirements of a four-year college or university.

Oral communication (one course)

Computer course (high school or waiver examination is acceptable)

Communication electives may include courses in computer information systems, critical thinking, and public speaking.

**Domain 4: Health and Wellness (2-6 quarter units)**

Personal health or nutrition (one course)

Two separate physical activity courses

**Other**

Medical terminology

**Electives**

Electives from any of the four domains may be selected to complete the general education minimum requirement of 68 quarter units. In addition, some students may need to complete additional elective course work to bring their overall course unit total to a minimum of 192 quarter units while enrolled at Loma Linda University in order to meet graduation requirements.

Professional core

Health-care professional units may apply. Details will be discussed on a case-by-case basis with the program director.

Total Units  94

1 Available online courses if needed to bring the overall course unit total to a minimum of 192 quarter units to meet graduation requirements. Students who come to Loma Linda University with a minimum of 96-quarter units must select 35 units from the elective course list.

2 One RELT course required from the list below. Total units required are based on the percentage of course work from an SDA college/university. The maximum requirement is 16 units, including transfer units.

The program
The 27-unit health professions education certificate and the 48-unit Master of Science degree are designed for health professionals who want to enhance the effectiveness and efficiency of student learning in the classroom and clinic. Upon completion, graduates will be able to plan for effective learning experiences; improve assessment and evaluation of learning and instruction; and evaluate clinical performance with confidence, improve classroom performance, enhance academic administration skills, and develop expertise in health professions education. The certificate or master’s degree programs may be taken online or in a face-to-face classroom setting.

Courses to complete the Master of Science degree include the required 24 units and a minimum of six units in Domain I and six units in Domain II, for a total of 48 units.

Units to complete the postbaccalaureate certificate include the required 24 units and a minimum of nine units in Domains I and II selected in consultation with the program director.

Additional courses may be added to each domain in consultation with the program director.

Program learning outcomes
In addition to the stated institutional learning outcomes, the graduate of the Master of Science degree in health professional education should be able to:

1. Construct learning modules that incorporate teaching and learning theory.
2. Create learning activities that stimulate interaction and reflection.
3. Apply current educational research to teaching.
4. Formulate curricular objectives and outcomes.
5. Design educational experiences.
6. Develop a curriculum and course assessment plan.
7. Formulate a personal philosophy of leadership.
8. Apply leadership competency in managing change, developing policy, coaching, and mentoring.

Admissions
In addition to Loma Linda University (p. 24) and School of Allied Health Professions admissions requirements (p. 47), the applicant must also complete the following requirements:

- Minimum of a baccalaureate degree from an accredited U. S. institution of higher education or an equivalent degree from an international degree-granting institution that is recognized by the appropriate government agency.
- Licensed (current), or eligible for licensure if international student (where country does not require licensure), to practice in a recognized health-care profession. The program director will advise on a case-by-case basis if the above categories are not definitive.
- Interview
- Note: Applicants should check with their respective professional, state, governmental (international students), and licensing requirements to determine if this degree program meets their professional needs.

Program requirements

- HPED 561 Leadership in the Health Professions I (may be used to satisfy the requirement for the program)
  - Elective (additional courses may be chosen in consultation with the program director)

**Total Units** 48

**Normal time to complete the program**
Three (3) years, based on half-time enrollment.

Rehabilitation Science — Ph.D.

**Program director**
Grenith J. Zimmerman

The School of Allied Health Professions offers the Doctor of Philosophy degree in rehabilitation science. By design, the degree program is inclusive of the many rehabilitation professions and offers opportunities for qualified clinical professionals in allied health to prepare for careers in independent research, teaching, and administration. It is the goal of this program to prepare graduates who will:
• Provide vision and direction for the integration of the rehabilitation professions.
• Commit themselves to whole person care.
• Advance the theory and practice of rehabilitation science through research.
• Acquire and integrate knowledge related to the social and basic medical sciences.
• Assess, develop, and implement interdisciplinary community-based services.

Admissions
In addition to Loma Linda University (p. 24) and School of Allied Health Professions (p. 47) admissions requirements, applicants must meet the following minimum requirements:

• Master's degree in any allied health professions area or discipline related to rehabilitation science.
• Minimum G.P.A. of 3.0 in academic and professional course work.

Prospective students are required to submit the following:

1. A formal letter of support from a primary research faculty member at Loma Linda University whose research interests and availability most closely match those of the applicant. The program director will coordinate meetings between applicants and prospective research faculty members.
2. Curriculum vita, including work history, formal education, continuing education, licensure or certification, professional organizations, honors, awards, publications, presentations, and grants.
3. At least one example of written work (e.g., term paper, course assignment, publication, master's degree research project or thesis).
4. Proof of involvement in a complete research project (group or individual) that involved data collection and production of a research paper or research poster.

Program requirements
A minimum of 80 units beyond the master's degree is required for students holding a master's or doctoral degree in a professional area. The student's program course work for the degree must be approved by the Doctor of Philosophy in Rehabilitation Science Committee.

**Comprehensive examinations**

The written comprehensive examination is designed to establish that the student has a broad understanding of rehabilitation science. A student is eligible to take the written examination after completing coursework from the three domains and six units in research and statistics.

The oral examination is designed to establish that the student has adequate foundational information in appropriate content areas, as well as a plan to answer a research question appropriate for a doctoral dissertation. Following successful completion of the written comprehensive examination, the oral examination will be scheduled by the student's research mentor in consultation with the program director. The examination will cover the student's research proposal and content areas on which the proposal rests.

**Advancement to candidacy**

The student may apply for admission to doctoral candidacy after (a) passing the written and preliminary oral comprehensive examinations, and (b) securing the approval of his/her research advisory committee.

**Dissertation**

The candidate's capacity for independent investigation and scholarly achievement must be demonstrated by the presentation and oral defense of an acceptable dissertation, resulting in at least two publications in peer-reviewed journals. One paper must be accepted for publication in a peer-reviewed journal before the candidate's graduation.

**General requirements**

For information about requirements and practices to which all graduate students are subject, the student should consult the Policies and General Regulations sections of this catalog for the University (p. 35) and the School of Allied Health Professions (p. 47).

**Normal time to complete the program**

Four (4) to five (5) years based on three-quarter-time enrollment
Department of Cardiopulmonary Sciences

The Department of Cardiopulmonary Sciences offers a full range of clinical and professional programs related to cardiac, pulmonary, sleep, and critical and emergency care. The department’s goal is to offer excellent education through small class sizes, access to expert faculty members, and a faith-based educational environment. Our graduates become advocates and leaders while serving as patient-care providers, researchers, and administrators.

**Programs**

- Emergency Medical Care — B.S. (p. 64)
- Polysomnography — Certificate (p. 67)
- Respiratory Care — B.S. (Traditional) (p. 68), B.S. (Postprofessional) (p. 71), M.S.R.C. (p. 72)

**Mission statement**
The faculty of Loma Linda University’s Emergency Medical Care Program believes in the promotion and support of excellence for the profession through education, knowledge development, research, leadership, and public service. The mission of the program is to:

1. Support the mission and goals of Loma Linda University and the School of Allied Health Professions.
2. Facilitate student professional development, expansion of knowledge, and contribution to the field of emergency medical care through guidance, resources, leadership, and example.
3. Support the medical community’s needs for qualified advanced emergency medical care practitioners who will facilitate positive changes through patient advocacy, leadership, knowledge discovery, and implementation.
4. Encourage continuing professional and personal development within the community through volunteerism and community service geared toward disease prevention and intervention.

**Program learning outcomes**
In addition to the stated institutional learning outcomes (p. 19), by the end of this program, the graduate should be able to:

1. Exhibit advanced leadership skills.
2. Apply management concepts and theory to decision making, process management, and emergency medical care administration
3. Apply theories of knowledge acquisition and learning theory.
4. Make use of science and research in the practice of emergency medical care
5. Perform emergency medical care practice and delivery.
Technical requirements

Student must have consistent access to and knowledge of how to use the following:

1. Personal computer.
2. Microsoft Office programs (Word, PowerPoint, Excel)
3. Internet and e-mail.
4. Video conferencing programs (Skype, FaceTime, Zoom)

CPR certification

Students are required to have current health-care provider adult, child, and infant cardiopulmonary resuscitation (CPR) certification for all scheduled clinical experience. CPR certification must be completed at the American Heart Association health-care provider level. Certification may be completed prior to beginning the program of study or may be obtained at Loma Linda University. Classes are available on campus at Life Support Education, University Arts building, 24887 Taylor Street, Suite 102.

Admissions

In addition to Loma Linda University (p. 24) and School of Allied Health Professions (p. 47) admissions requirements, the applicant must also complete the following requirements:

To be eligible for the junior year of the Emergency Medical Care Program, the applicant must:

- Be an EMT or a paramedic, a registered nurse/MICN, or a respiratory therapist.
- Complete the subject requirements listed as prerequisites.
- Arrange for an interview at the University by appointment.

Prerequisite/Corequisite (general program)

Humanities. Choose a minimum of three areas from the following: *

Total Units: 87

1 May substitute for another REL_ 4__ religion course elective

**Noncourse requirements**

**Community Service Requirement**
Sharing knowledge and volunteering at the community level allows the EMC student to develop the skill of translating difficult concepts into useful information to the public. It also develops a greater appreciation for others that may offer different insights or experiences to learn from. In addition to community service that may be part of the Wholeness Portfolio (AHCJ 328) requirement, each student will be expected to complete six hours of a community project or community service per quarter for a total of 24 hours. The program director must approve all community service projects before commencement of the activity. Each activity should include a mechanism by which the EMC student is utilizing his or her professional skill/experience to educate or provide a service to their community of choice. Community service activity will be integrated into service-based learning modules during course work as well.

**Capstone Requirement**
A capstone project must be completed as a written document and presented orally at a seminar. Capstone courses may be completed prior to capstone project completion. Capstone projects must be completed to publishable standards before graduation.

**Normal time to complete the program**
Four (4) years — two (2) years (eight [8] academic quarters) at LLU, based on full-time enrollment, part time permitted

A total of 192 units are required to graduate with a Bachelor of Science in Emergency Medical Care. 127 units of electives, 33 of which can be chosen from the EMC program, are required.
The expansion of polysomnography (sleep studies) in the health-care industry has created a marked increase in demand for polysomnography technicians. Many polysomnography clinics are inundated with referrals that may be deferred for months at a time due to inadequate staffing, resulting in delay of sleep disorder diagnoses and appropriate treatments.

The certificate in polysomnography is designed for current clinical practitioners and students who are interested in specializing in sleep disorder studies. Both didactic theory and clinical application offered in the program will provide an avenue to gain knowledge, skills, and experience in the expanding discipline of polysomnography. Topics include sleep terminology, sleep structure and disorders, complete patient set-up and monitoring, data acquisition and scoring, and pharmacological and noninvasive interventions. The program is offered on campus and will include: laboratory/clinical rotations, online and classroom discussions, and a case study presentation. Graduates of this program are eligible to sit for the sleep disorder specialist (SDS) examination by the National Board of Respiratory Care (NBRC) and/or the RPSGT examination by the Board of Registered Polysomnography Technologists (BRPT) after completion of the required clinical hours and requirements for each board examination. *Please see professional examination section.*

**Program learning outcomes**

By the end of this program, the graduate should be able to:

1. Demonstrate basic knowledge and clinical skills in utilizing sleep technology equipment following evidence-based practices.
2. Demonstrate the ability to score sleep studies following evidence-based practices in sleep medicine.
3. Analyze and interpret sleep study results following evidence-based practices in sleep medicine.
4. Apply appropriate sleep treatment interventions using evidence-based practices in sleep medicine.
5. Demonstrate professional behavior and leadership skills.
6. Demonstrate effective and professional interaction and education skills with patients.

**Professional examination and certification eligibility**

Graduates of this program are eligible to take the SDS examination by the NBRC and/or the RPSGT examination by the BRPT after completion of the required clinical hours and meeting the requirements of each examination. This program is designated as a STAR-focused program under the BRPT. Graduates will be eligible for the RPSGT (Pathway 4) and CPSGT (Pathway 3) after meeting the requirements of each pathway. NBRC inquiries can be made to 10801 Mastin Street, Suite 300, Overland Park, KS 66210; telephone: 913/895-4900; fax: 913/712-9283; or website: <www.nbrc.org>. BRPT inquiries can be made to 8400 Westpark Drive, 2nd Floor, McLean, VA 22102; telephone: 703/610-9020; fax: 703/610-0229; website: <http://www.brpt.org/>.

**Accreditation**

Loma Linda University is regionally accredited by the WASC Senior College and University Commission (WSCUC), 985 Atlantic Avenue, Suite 100, Alameda, CA 94501; telephone: 510/748-9001; fax: 510/748-9797; website: <http://www.wascsenior.org/contact>.

**Admissions**

To be eligible for this program, in addition to the Loma Linda University (p. 24) and School of Allied Health Professions (p. 47) admission requirements, the following criteria must be met:

2. Minimum of 2.5 G.P.A. of college credit (minimum of 36 quarter units).
3. Interview with program faculty.
4. Three positive personal and/or professional references.
5. For current students in the Loma Linda University Cardiopulmonary Sciences program, an agreement and acceptance from both program directors is required to add the sleep track/unit to the current student plan.

**Prerequisite (All prerequisite coursework must be completed at a regionally accredited institution)**

- Human anatomy and physiology or general biology with laboratory, complete sequence
- Introductory chemistry with laboratory, or general chemistry with laboratory (minimum of one quarter or semester)
- High school-level physics or introductory physics, one quarter/semester in college; or general physics, one quarter/semester in college
- Two years of mathematics selected from: algebra I (elementary), algebra II (intermediate), or geometry-Course work may be taken in high school or college
- English composition complete sequence.

**Co-requisite**

- Medical terminology

**Recommended course work**

- Speech
- Sociology or anthropology
- Psychology
- Microbiology

**Basic Life Support**

Since this program will have clinical rotations and patient contact, students are required to have a cardiopulmonary resuscitation/basic life support (BLS) card certification. This certification has to be current and obtained from an authorized American Heart Association training center. The BLS course is offered at Life Support Education, University Arts building, 24887 Taylor Street, Suite 102.
Program requirements

**Autumn Quarter**
- RSPS 210  Foundation of Polysomnography and Sleep Medicine 2
- RSPS 216  3- and 12-Leads ECG Interpretation 2
- RSPS 227  Neuroanatomy and Physiology of Sleep 2
- RSPS 230  Polysomnography Science Methodology 2

**Winter Quarter**
- RSPS 234  Polysomnography Patient Education and Safety 1
- RSPS 256  Polysomnography Monitoring and Scoring 2
- RSPS 274  Polysomnography Diseases 3
- RSPS 295  Polysomnography Practicum I 4

**Spring Quarter**
- RELR 475  Whole Person Care 2
- RSPS 286  Polysomnography Case Study 2
- RSPS 296  Polysomnography Practicum II 4

**Total Units:** 27

Clinical Rotations
The polysomnography program offers clinical practicum course at affiliated clinical sites. Thus, students will commute to a 12 hours clinical rotation on every assigned clinical day; this might include day and night shifts. Therefore, students are responsible for their own transportation to each clinical site. The program will assign clinical instructors for each site to assess student learning and competency check-offs.

Normal time to complete the program
34 weeks (three [3] academic quarters) based on full-time enrollment

Respiratory Care – B.S., M.S.R.C.

Respiratory care is an allied health profession that promotes health and improvement in the cardiopulmonary function of people with heart and lung abnormalities and disease. Newborn, pediatric, adult, and elderly patients are treated for a wide range of problems—infant respiratory distress syndrome, trauma, cardiopulmonary arrest, conditions brought on by shock, and postoperative surgical complications; as well as respiratory diseases such as pneumonia, asthma, cystic fibrosis, chronic bronchitis, and emphysema.

The respiratory care practitioner is a member of the health-care team in medical centers, skilled nursing facilities, outpatient rehabilitation programs, physician offices, and in-home care. Many are involved in research and development of new and innovative care and equipment. They are effective communicators and compassionate caregivers, possessing an awareness of cultural sensitivity and diversity. They have leadership roles in patient education, wellness intervention, and development of respiratory care plans. Respiratory-care professionals apply critical thinking skills in cardiopulmonary diagnostics and patient assessment to optimize decision making and delivery of patient care. In a time of high technology, increasing growth of the elderly population, and increasing numbers of patients with asthma and chronic lung disease, there is a greater demand for educated and skilled respiratory care practitioners.

Loma Linda University offers two Bachelor of Science degree curricula in respiratory care. The first is for students who have had no previous education in respiratory care and who have completed the program prerequisites. The second is for students who have an Associate in Science degree in respiratory care from a CoARC-accredited respiratory care program and who wish to earn a Bachelor of Science degree in respiratory care.

Professional association
The American Association for Respiratory Care (AARC) encourages students and graduates to become members and participate in national meetings and local chapters. The AARC's aim is to foster professional growth, encourage research, and provide services and representation for its members. Further information may be obtained from the national office, 9425 North MacArthur Boulevard, Suite 100, Irving, TX 75063; telephone, 972/243-2272; or Web site, <http://www.aarc.org>.

The California Society for Respiratory Care (CSRC), an affiliate of the AARC, is a nonprofit professional organization whose mission is to represent and encourage excellence in the art and science of cardiopulmonary support.

The CSRC is committed to health, healing, and disease prevention in the California community. The society extends these concepts to its members, students, health-care professionals, and the public through education and clinical practice. Further information may be obtained from the CSRC at 1961 Main Street, Suite 246, Watsonville, CA 95076; telephone, 888/730-2772; fax, 831/763-2814; or website: <http://www.csrc.org>.

Programs
- • Respiratory Care – B.S. (Traditional) (p. 68), B.S. (Postprofessional) (p. 71), M.S.R.C. (p. 72)

Respiratory Care (Traditional) – B.S.

Program director
Richard D. Nelson

Director of clinical education
Abdullah K. Alismail

Medical director
N. Lennard Specht

Loma Linda University offers two Bachelor of Science degree curricula in respiratory care (respiratory care therapy). The traditional curriculum is for students who have had no previous education in respiratory care and who have completed the program prerequisites. The post-professional B.S. degree curriculum is for students who have an Associate in Science degree in respiratory care from a Commission on Accreditation for Respiratory Care (CoARC)-accredited respiratory care program and who wish to earn a Bachelor of Science degree in respiratory care.

The two-year, upper division curriculum leading to the bachelor of science degree is a sequence of professional course work intended to prepare competent respiratory therapists with advanced abilities in clinical care. Course work may be designed toward meeting entrance requirements for the Dentistry, Medicine, and Physician Assistant programs.

Those electing to study on a part-time basis must complete the junior and senior years within a four-year period.

Program goals
1. To prepare graduates with demonstrated competence in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning
domains of respiratory care practice as performed by registered respiratory therapists (RRTs).

2. To prepare leaders for the field of respiratory care through acquisition of skills in one or more of the following: management, education, research, and/or advanced clinical practice.

Program learning outcomes
In addition to the stated institutional learning outcomes, the respiratory care graduate should be able to:

1. Apply fundamental and progressive adult, pediatric, and neonatal respiratory care concepts and treatment plans in the areas of pathophysiology, diagnostics, gas exchange therapy, airway care, and application of invasive and non-invasive ventilator support.

2. Apply critical-thinking skills to respiratory care practice.

3. Apply problem-solving skills in the areas of pulmonary physiology, related diagnostics, and comprehensive pulmonary rehabilitation programs.

4. Perform fundamental and progressive patient assessment and diagnostic skills appropriately for various cardiopulmonary diseases and conditions.

5. Demonstrate essential knowledge, skills and abilities required to enter the practice of respiratory care to include passing the National Board for Respiratory Care (NBRC) Therapist Multiple-Choice Self-Assessment Examination (TMC-SAE).

6. Demonstrate clinical competency expected of the respiratory care practitioner to include passing the National Board for Respiratory Care (NBRC) Clinical Simulation Self-Assessment Examination (CSE-SAE).

Professional licensure and credentialing
Graduates of CoARC-accredited respiratory care programs must apply to the state of California Department of Consumer Affairs Respiratory Care Board (RCB) for licenses to practice in the state. The RCB requires that graduates of respiratory care programs complete general and respiratory care education courses with grades of C or above—resulting in a minimum of an Associate in Science degree in respiratory care. Graduates must successfully complete an examination for licensure, declare any felony convictions, and undergo fingerprinting. License denial may occur due to prior criminal conviction(s). Inquiries regarding the RCB may be directed to 3750 Rosin Court, Suite 100, Sacramento, CA 95834; telephone: 916/999-2190; fax: 916/263-7311; or website: <http://www.rcb.ca.gov>.

Admissions
Admission to the Bachelor of Science degree program in Respiratory Care is open for Fall Quarter each year. In addition to Loma Linda University (p. 24) and School of Allied Health Professions (p. 47) admissions requirements, the applicant must also complete the following requirements:

- A minimum of 78 degree transferable quarter units (52 semester units) per program director approval or hold an A.S. degree.
- Complete the subject requirements noted as prerequisites.
- Arrange for an interview at the University by appointment (an off-campus or telephone interview can be arranged for the distant applicant).
- Complete a minimum four hour observation/interaction with a respiratory therapist. This may be scheduled following the interview.

Prerequisites
A maximum of 105 quarter or 70 semester units (didactic only) from an accredited junior college will be accepted as transfer credit.

Domain 1: Religion and humanities (28–32 quarter units)
The study of religion must include an average of four units of religion course work for every 48 quarter units earned while attending a Seventh-day Adventist college or university.

Humanities: Choose three areas totaling a minimum of 12 quarter units (eight semester units) from: civilization/history, fine arts, literature, modern language (non-conversational), performing/visual arts (not to exceed four quarter units), or philosophy.

Domain 2: Scientific inquiry and analysis (24–32 quarter units)
Scientific inquiry and analysis encompass both the natural and social sciences. Choose a minimum of 12 units from:

- Human anatomy and physiology with laboratory, complete sequence or general biology with laboratory, complete sequence
- Microbiology with laboratory
- Introductory chemistry with laboratory, complete sequence; or general chemistry with laboratory, complete sequence
- High school-level physics or introductory physics, one quarter/semester in college; or general physics, one quarter/semester in college (High school courses do not count toward the 12 units required to fulfill GE requirements.)

Two years high school mathematics with grades of C or above, or intermediate algebra in college

The study of social sciences must include a minimum of 12 quarter/eight semester units.
• Introductory or general psychology course
• Cultural anthropology or an approved course dealing with cultural diversity
• Choose remaining social sciences from: economics, geography, political sciences, or sociology.

Domain 3: Communication (9–13 quarter units)
English composition, complete sequence
Choose additional units from:
• Speech or interpersonal communication
• High school-level computers or introductory computers course (Only college-level courses, transferable to a four-year college count toward total unit requirement.)
• Other areas of study in communication may include courses in computer information systems, critical thinking, and public speaking

Domain 4: Health and wellness (2–6 quarter units)
To encourage the pursuit of lifelong leisure activities and wellness, the study of health and wellness must include at least two physical activity courses totaling a minimum of one quarter unit; and one course in personal health or nutrition. Additional units may include other areas of health, nutrition, and physical fitness.

Domain 5: Electives:
Electives to meet the minimum total requirements of 192 quarter units
For total unit requirements for graduation, see LLU General Education Requirements (p. 28).

Fifth Year

Summer Quarter
Summer term for completion of non-block co-requisites requires program director approval.

Total Units: 114

A minimum of 192 quarter units is required for the Bachelor of Science degree in respiratory care.

1 May substitute with another course of the same prefix and level.
2 May substitute with any REL_ course of the same level
Normal time to complete the program
Four (4) years overall with two (2) years (seven [7] academic quarters) at LLU based on full-time enrollment.

Alternate summer term entry to include all co-requisite course requirements
For students who need to complete co-requisite courses that are not included in the seven academic quarter block course sequence, the program length is a maximum of two years plus an additional Summer Quarter (nine academic quarters). The alternate entry for these students is Summer Quarter of each year preceding the Fall Quarter block sequence. On acceptance, an academic plan specifying the program length (eight or nine academic quarters) and the courses selected during the alternate Summer Quarters is to be approved by the program director.

Respiratory Care (Postprofessional) — B.S.

Program director
Alan Alipoon

Loma Linda University offers two bachelor of science (B.S.) degree curricula in respiratory care. The post-professional curriculum is for students who have an associate in science, A.S., degree in respiratory care from a Commission on Accreditation for Respiratory Care-accredited (CoARC) respiratory care program and who wish to earn a B.S. degree in respiratory care.

The one-year, upper-division program leading to the B.S. degree is a sequence of professional coursework intended to graduate individuals who have acquired advanced knowledge in the respiratory care profession, including assessment, therapeutic interventions, and management of patients with cardiopulmonary-related disorders; and who uphold the mission and goals of the School of Allied Health Professions. The program is offered in two modalities: face-to-face and online. *See online distance education section.

Program goals
The goals of the curriculum are to:

1. Provide therapists to the respiratory care and medical communities who have advanced practice training in cardiopulmonary care and fundamental knowledge in the areas of leadership and education.
2. Provide an undergraduate program for two-year-level respiratory therapists that enhances and broadens their knowledge in cardiopulmonary health-care sciences and general studies, and allows progression into graduate programs.

Program learning outcomes
In addition to the stated institutional learning outcomes, the graduate should be able to:

1. Demonstrate advanced knowledge in respiratory care.
2. Apply fundamental and progressive adult, pediatric, and neonatal respiratory care concepts and treatment plans in the areas of pathophysiology, diagnostics, and gas exchange therapy, and airway care, ventilator support both invasive and non-invasive application.
3. Apply critical-thinking skills to respiratory care practice.
4. Apply problem-solving skills in the areas of pulmonary physiology, related diagnostics, and comprehensive pulmonary rehabilitation programs.
5. Perform fundamental and progressive patient assessment and diagnostic skills appropriately for various cardiopulmonary diseases.
6. Develop fundamental skills to conduct and interpret research in the health-care arena.
7. Develop fundamental skills in leadership
8. Develop fundamental skills in topic presentation to the health-care profession and patient-care community—using appropriate lecture and demonstration techniques

Admissions
In addition to Loma Linda University (p. 24) and School of Allied Health Professions (p. 47) admissions requirements, the applicant must also complete the following requirements:

- Be a graduate of a Commission on Accreditation for Respiratory Care-approved (CoARC) or provisionally approved, or CoARC-approved advanced practitioner associate degree (or the equivalent) program in respiratory care
- Complete the subject requirements noted as prerequisites. Students who have not completed these requirements may be accepted on a provisional basis.
- Arrange an interview at the University by appointment. An off-campus interview can usually be arranged for the distant applicant.

For applicants from outside the state of California, please check the list of states (http://home.llu.edu/distance-education) that have authorized Loma Linda University online students to ensure that students from your state are eligible before proceeding with the application.

Prerequisite
Humanities —20 units minimum (choose minimum of three areas: history, literature, philosophy, foreign language, art/music appreciation, or art/music history)

Included in this minimum, four units of religion per year of attendance at a Seventh-day Adventist college or university

Natural sciences—Human anatomy and physiology with laboratory, complete sequence; or general biology with laboratory, complete sequence; or general zoology with laboratory, complete sequence

Microbiology with laboratory

Introductory chemistry with laboratory or general chemistry with laboratory

High school-level physics; or introductory physics, one quarter/semester in college; or general physics, one quarter/semester in college

Two years of high school mathematics with grades of C or above or intermediate algebra in college

Social Science—General psychology or sociology

Cultural anthropology or an approved course dealing with cultural diversity

Select four more quarter units from sociology, psychology, economics, geography, political science
Communication—English composition, complete sequence
Speech
Health and Wellness—Personal health or nutrition
Two physical activity courses

**Program requirements**

**Program Unit Requirements:**
To meet the Bachelor of Science degree requirement of 180 quarter units, students are required to complete 60 core units in the program. Students may transfer a maximum of 105 units from an associate's degree at a community college (105+60=165 quarter units). The remaining 15 units may be taken as electives (see options below).

For total unit requirements for graduation, LLU General Education Requirements (p. 28).

Total Units: 60

1. The senior project is a culminating body of work, developed by the student in consultation with the program director and presented to the department faculty. Work may be a research paper, clinical presentation, management project, or other project approved by the program director.

**Electives:**
Students can take electives from the following options

**Domain I: Polysomnography Certificate (Sleep Studies)**
Students can take courses from the polysomnography certificate program to be counted as electives and earn a university certificate in polysomnography along the way. Total units offered/available by the polysomnography program are 27 units. Students can either choose selected courses or take the whole certificate as a subspecialty. To earn the certificate, the student must apply to the polysomnography program and obtain approval from both program directors.

**Domain II: Clinical Affiliation**
Students can take additional clinical affiliation courses (RSTH 452 Respiratory Care Affiliation II, RSTH 453 Respiratory Care Affiliation III, RSTH 454 Respiratory Care Affiliation IV) as electives towards their degree.

**Other option:**
Students may transfer electives from another four-year accredited university to count toward their electives with program director approval. Check with the program director regarding the availability of other cardiopulmonary courses within the department.

**Normal time to complete the program**
Four (4) years - one (1) year (four [4] academic quarters) at LLU; based on full-time enrollment

--

**Respiratory Care — M.S.R.C.**

**Program director**
Abdullah Alismail

**Program description**
The faculty of the Loma Linda University Master of Science in Respiratory Care Program believes in the promotion of and support for excellence in the profession of respiratory care and cardiopulmonary sciences through education, knowledge development, research, leadership, and public service. The mission of the program is to:

1. Support the mission and goals of Loma Linda University and the School of Allied Health Professions.
2. Facilitate student professional development, expansion of knowledge, and contribution to the field of respiratory care and cardiopulmonary sciences through guidance, resources, and leadership.
3. Support the medical community’s needs for qualified advanced respiratory care practitioners and cardiopulmonary researchers that will facilitate positive changes through patient advocacy, leadership, and knowledge discovery and implementation.
4. Encourage continuing professional and personal development within the community through volunteerism and community service geared toward disease prevention and intervention.

The four-quarter program is designed to allow customizable options for interactions with the program faculty both face-to-face and online offered through two tracks. Students receive and develop didactic and
clinical knowledge to advance their expertise in areas of education, research, leadership, clinical performance, industry, and management in the cardiopulmonary sciences from an evidence-based perspective. Courses combine discussion, projects, case studies, and web-enhanced learning. Students in the online program will be required to schedule an online orientation one week prior to the beginning of their courses.

**Program learning outcomes**

In addition to the stated institutional learning outcomes (p. 19), by the end of this program, the graduate should be able to:

1. Apply evidence-based and advanced adult, pediatric, and neonatal respiratory care concepts and treatment plans in the areas of pathophysiology, diagnostics, advanced interventions, gas exchange therapy, medical gas therapy, airway care, and ventilatory support systems.
2. Perform evidence-based, advanced patient assessment; as well as diagnostic skills for the cardiopulmonary patient.
3. Develop fundamental skills in leadership.
4. Engage in activities that advance the respiratory care profession.
5. Develop fundamental skills in topic presentation to health-care professionals and the patient-care community.
6. Continue the development of skills to conduct and interpret research in the health-care arena.
7. Apply research skills to clinical and theoretical situations.
8. Apply advanced clinical skills to the cardiopulmonary patient.
9. Apply problem-solving skills in the areas of advanced pulmonary and cardiology physiology and related diagnostics to cardiopulmonary patients

**Admissions**

In addition to Loma Linda University (p. 24) and School of Allied Health Professions (p. 47) admissions requirements, the applicant must also complete the following requirements:

- A minimum of a baccalaureate degree from an institution of higher education that has either U.S. regional accreditation or an international institution that has the appropriate government recognition as a degree-granting institution.
- Required to have earned the Registered Respiratory Therapist credential from the National Board for Respiratory Care, and licensed in their state of residence or eligible to practice by the government or equivalent.
- Interview.

55

**Normal time to complete the program**

One (1) year (four [4] academic quarters) — full-time enrollment required

**Capstone requirement**

The capstone project must be completed as a written document and presented orally as a seminar. It must be of publishable quality and prepared for publication. Note that capstone courses may be completed prior to the capstone project as they are set in place to generate the foundation for the project. However, capstone projects must be completed at the level of publishable standards to meet graduation requirements.
Department of Clinical Laboratory Science

The Clinical Laboratory Science Department is home to the programs associated with laboratory medicine: clinical laboratory science (medical technology or medical laboratory science), cytotechnology (cytology), and phlebotomy (venipuncture). Whether testing blood or body fluids, analyzing cells and cell patterns, or collecting patient samples, the laboratory professional is integral to the health-care team and patient care.

The goals of the Clinical Laboratory Science Department are as follow:

1. To provide opportunities, instruction, and guided experiences enabling the student to acquire the basic knowledge and attain technical ability essential to the practice of his/her chosen profession.
2. To help the student accept responsibility for integrity, ethical relationships, and empathetic attitudes that contribute to the welfare and well-being of patients.
3. To help the student develop a background of information and attitudes conducive to interprofessional understanding and cooperation.
4. To encourage the student to cultivate habits of self-education that will foster lifelong professional growth.
5. To engender and nurture in the student the desire to serve mankind and, in particular, to serve as needed, in the medical centers sponsored by the Seventh-day Adventist Church—both in the United States and abroad.

Clinical coordinator
Alicia M. Triplett

Medical director
Paul C. Herrmann

A student who is interested in science, has an investigative mind that enjoys the challenge of solving problems quickly and accurately, and has a desire to help others should consider a career as a clinical laboratory scientist.

Clinical laboratory scientists examine and analyze body fluids, tissues, and cells. They look for bacteria, parasites, or other microorganisms; analyze the chemical content of fluids; match blood for transfusions; and test for drug levels in the blood to show how a patient is responding to treatment.

Clinical laboratory scientists perform complex chemical, biological, hematological, immunologic, microscopic, and bacteriologic tests. They use, maintain, and troubleshoot sophisticated laboratory equipment that is used to perform diagnostic tests. The clinical laboratory scientist possesses the scientific and diagnostic skills required for DNA and biomolecular technology and genetic engineering applications; and, analyzes and discusses test results with the medical staff.

Opportunities
Overall employment of medical laboratory professionals is projected to grow 13 percent through 2026, faster than the average for all occupations, particularly as the volume of laboratory tests increases with population growth and with the development of new technology.
Employment opportunities are excellent, with average vacancy rates of seven percent. The twenty-first century is offering clinical laboratory scientists new avenues for test development, experimental design, administration, and education. Clinical laboratory scientists work in hospitals or similar medical facilities, clinical and reference laboratories, home health diagnostics, transfusion services, physicians' offices, and private medical clinics. Employment is also available in pharmaceutical and biotechnology companies, health information systems, DNA technology and genetic engineering corporations, research laboratories, federal government agencies, forensics and crime investigation, veterinary hospitals, U.S. Public Health Service facilities, areas of medical product development, and customer and patient education.

The program

The two-year Clinical Laboratory Science Program includes clinical training and culminates in a Bachelor of Science degree. Prerequisite courses may be taken at any regionally accredited college or university and are completed during the freshman and sophomore years. Accepted students transfer into the program at the junior year level, which begins in August. After satisfactory completion of the program, the student is awarded a Bachelor of Science degree and is eligible to take the national board examination and become a licensed clinical laboratory scientist in California.

The ten-month junior year includes lecture and laboratory. Emphasis is on the basic clinical science courses, including theory and correlations.

The ten-month senior year is comprised of clinical practicum and seminar courses. These provide professional clinical experience in the hospital laboratory environment with emphasis on technical proficiency, application of theory to patient care, laboratory organization, and managerial skills.

Senior students’ clinical experience is balanced between Loma Linda University Medical Center’s clinical laboratory and supplemental affiliate training laboratories in the community.

Program objectives

The Clinical Laboratory Science Program provides a complete educational experience that culminates in the bachelor of science degree and eligibility for licensure. California state licensure is obtained through the medical laboratory scientist examination offered by the ASCP Board of Certification and other entities approved by the state of California. The bachelor’s degree in clinical laboratory science is granted independently of any external certification or licensing examinations. The graduate will demonstrate professional entry-level competencies in chemistry, hematology, immunohematology, immunology, and microbiology; as well as their respective subsections.

Program learning outcomes

By the end of the program, the graduate should be able to:

1. Demonstrate basic knowledge essential to the practice of clinical laboratory science.
2. Demonstrate technical ability essential to the practice of clinical laboratory science.
3. Practice professionalism through ethical behavior and attitudes.
4. Demonstrate leadership and administrative skills in laboratory practice and the community consistent with the mission of the School of Allied Health Professions.

5. Adhere to rules and regulations promoting workplace and patient safety and continuous quality improvement.

6. Exhibit analytical skills necessary to succeed in laboratory medicine.

Clinical affiliations

Multiple clinical affiliations enrich the student’s clinical training by providing exposure to procedures in different types of medical facilities. During the 40-week clinical practicum, supplemental training may be scheduled at any of the following clinical sites:

Primary affiliation
Loma Linda University Medical Center
Loma Linda, California

Loma Linda University Medical Center
Murrieta, California

Supplemental affiliations
LifeStream
San Bernardino, California

Community Hospital of San Bernardino
San Bernardino, California

Jerry L. Pettis Memorial Veterans Medical Center
Loma Linda, California

Kaiser Permanente Medical Center
Fontana, California

Transportation to scheduled assignments

Transportation to training laboratories is the responsibility of the student. Depending on the clinical assignment, commuting times may be up to two hours one way. Senior students must coordinate their time with the operational schedules of the Loma Linda University Medical Center clinical laboratory and affiliate laboratories in the community. The senior schedule is a full-time week (40 hours) arranged on a Monday-through-Friday schedule. A special calendar schedule different from the University academic calendar is followed.

Professional certification and licensure

Completion of the required sequence of academic course work and directed professional experience prepares the graduate to take the certifying examination of the ASCP Board of Certification and obtain licensure by the state of California. Information regarding the examination can be obtained from the website: <http://ascp.org/boc>.

Academic progression

A minimum grade of C (2.0) is required for all courses in the program. C- grades are not acceptable. A student who receives a grade of less than C in any academic course or who receives an Unsatisfactory (U) in any segment of a clinical practicum is automatically placed on probation. Continued enrollment for the next quarter, term, or rotation segment of a student on probation or clinical probation is subject to the recommendation of the department.

If continued enrollment is not recommended, the department will notify the student in writing. Also, if continued enrollment is recommended, the student will be required to institute a learning assistance program contract and meet regularly scheduled appointments with the academic advisor. A student on probation is automatically dismissed from the
program if the terms of the learning assistance program contract are not met.

**CPR certification**

Students are required to have current health-care provider adult, child, and infant cardiopulmonary resuscitation (CPR) certification for all scheduled clinical experiences. This certification must be completed at the American Heart Association health-care provider level. Certification may be completed prior to beginning the program of study or may be obtained at Loma Linda University. Classes are available on campus at Life Support Education, University Arts Building, 24887 Taylor Street, Suite 102.

**Accreditation**

The program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS), 5600 North River Road, Suite 720, Rosemont, IL 60018; telephone: 773/714-8800; fax: 773/714-8886; e-mail: <info@naacls.org>; website: <http://www.naacls.org>.

It meets the requirements in medical laboratory science of the American Society for Clinical Pathology, Board of Certification for Medical Laboratory Science, 33 West Monroe Street, Suite 1600, Chicago, IL 60603; telephone: 312/541/4998; fax: 312/541/4998. The program is approved by the California Department of Public Health (CDPH), Laboratory Field Services (LFS), 850 Marina Bay Parkway, Richmond, CA 94804-6403; telephone: 510/873-6327; website: <https://www.cdph.ca.gov/Programs/OSPHLD/LFS/Pages/TrainingPrograms.aspx>.

**Admissions**

In addition to Loma Linda University (p. 24) and School of Allied Health Professions admissions requirements (p. 47), the applicant must complete the following requirements:

- A minimum G.P.A. of 2.75 for science courses.
- A minimum of 96 quarter units or 64 semester units at an accredited college or university. Note: A minimum grade of C (2.0) is required for all transfer courses; C- grades are not acceptable for transfer. Prerequisites and transfer patterns may be viewed at <llu.edu/allied-health/sahp/transfer>.
- Projected course work that will be completed before beginning the program will be considered in the application process.

**Application deadlines**

Applications to the Clinical Laboratory Science Program are accepted beginning January 1. Early submission of application is recommended.

**Prerequisites**

Humanities and religion, 20 quarter or 14 semester units total, selected from at least three of the humanities and religion areas:

- Art/Music (performing arts not to exceed four quarter units)
- Civilization/History, foreign language, literature, philosophy, religion:
  - a maximum of eight quarter units of religion may be applied to the above 20 quarter/14 semester units; for students who attended or are enrolled in an Adventist college, four quarter units of religion are required per year attended

College mathematics (algebra or higher level)

General chemistry with laboratory, complete sequence

Organic chemistry with laboratory, complete sequence

* Introductory or general physics with laboratory (must include principles of light and electricity)

* General biology with laboratory, one course

Cultural diversity or cultural anthropology (one course); (select remainder of social sciences units to total 10 quarter units from these areas: anthropology, economics, geography, political science, psychology, sociology)

English composition, complete sequence; select remainder of communication units to total 9 quarter units from these courses: computers, public speaking, critical thinking

Personal health or nutrition (one course)

Two physical education (activity) courses

Electives, as necessary, to meet the minimum total requirement of 96 quarter units. Recommended courses are anatomy and physiology, biochemistry, cellular or molecular biology, genetics, speech, computer applications, and critical thinking

For total unit requirements for graduation, see LLU General Education Requirements (p. 28).

*Students planning to apply to advanced degree programs should verify current admission requirements.

Total Units: 126

Normal time to complete the program
Four (4) years — Two (2) years (20 months) at LLU — full-time enrollment required

Cytotechnology — B.S.

Program director
Matt Riding

Medical director
Pamela J. Wat

Cytotechnology is a specialty within the broad field of clinical laboratory sciences. The cytotechnologist, working under the direction of a pathologist, detects cell changes caused by different disease processes and is able to differentiate between normal, atypical, and malignant cell changes. In recognizing microscopic abnormalities of cells and cellular patterns from various body sites, the cytotechnologist assists the pathologist in detecting cancer at its earliest and potentially most curable stage. As a result, physicians are able to diagnose and treat cancer by alternate methods long before discovering its existence.

Opportunities

Cytotechnologists work in hospitals, clinics, and independent pathology laboratories. The employment outlook for cytotechnologists is favorable, with the demand for trained technologists exceeding the supply. Cytotechnologists can advance to supervisory positions, participate in research activities, or become teachers in the field. Advancement is based on experience, skill, and advanced education.

The program

The two-year Cytotechnology Program leads to a Bachelor of Science degree. The Bachelor of Science degree program requires completion of two years of prerequisites at an accredited college or university. Accepted students transfer to the program at the junior year level. The program of study begins in the Fall Quarter. Upon satisfactory completion of the program, the student is awarded a Bachelor of Science degree and is eligible to take the national board of certification examination to become a registered cytotechnologist.

The junior year includes lecture and laboratory, with an emphasis on basic cytology courses. The senior year includes an 11-week clinical practicum and advanced courses in histology, pathology, and laboratory management.

Program learning outcomes

By the end of this program, the graduate should be able to:
1. Accurately evaluate cellular abnormalities by applying differential diagnoses in the framework of patient outcome management.
2. Fulfill the ethical role and responsibilities of the cytotechnologist.
3. Assess the results of quality assurance measures and institute proper procedures to maintain test accuracy.
4. Comprehend and apply sound principles of scientific research.
5. Advocate rules and regulations with emphasis on patient and workplace safety.

Clinical affiliations

Multiple clinical affiliations enrich the student’s clinical training by providing exposure to different specimen types in the clinical environments. During the 11-week clinical practicum, supplemental training may be scheduled at any of the following clinical sites:

Primary affiliation
Loma Linda University Medical Center
Loma Linda, California

Supplementary affiliations
Loma Linda Pathology Group
Faculty Medical Offices
Loma Linda, California

Jerry L. Pettis Memorial Veterans Medical Center
Loma Linda, California

Quest Diagnostics
West Hills, California

Transportation to scheduled assignments

Transportation to scheduled clinical rotations is the responsibility of the student. Depending upon assignment, commute times may be up to two hours one way. During the clinical practicum, the senior-year schedule is a full-time week (40 hours/week, eight hours/day).

Professional registration

Upon completion of the baccalaureate degree, the student is eligible to take the certifying examination given by the Board of Certification of the American Society for Clinical Pathology (ASCP), 33 West Monroe, Suite 1600, Chicago, IL 60603; telephone: 312/541-4999; fax: 312/541-4998. Information about qualifying examinations can be obtained from the program director.

Academic progression

A minimum grade of C (2.0) is required for all courses in the program. C-grades are not acceptable. A student who receives a grade less than C in any academic course or receives an unsatisfactory rating in clinical
performance will be disqualified from the program for the remaining academic year. Readmission to the program will require reapplication.

**Accreditation**

The program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP)—25400 U.S. Highway 19 North, Suite 158, Clearwater, FL 33763; telephone: 727/210-2350; fax: 727/210-2354—in collaboration with the Cytotechnology Programs Review Committee, which is sponsored by the American Society of Cytopathology (ASC); the American Society for Clinical Pathology (ASCP); the American Society for Cytotechnology (ASCT), and the College of American Pathologists (CAP). Information regarding cytotechnology accreditation status can be obtained from the CPRC at the American Society for Cytopathology, 100 West 10th Street, Suite 605, Wilmington, DE 19801; telephone: 302/543-6583, fax: 302/543-6597; e-mail: <dmacintyre@cytopathology.org>.

**Admissions**

In addition to Loma Linda University (p. 24) and School of Allied Health Professions (p. 47) admissions requirements, the applicant must also complete the following requirements:

- prerequisite course work at any accredited college before being admitted to the School of Allied Health Professions; projected course work that will be completed before beginning the program will be considered in the application process. Please note: Grades of C- are not transferable for credit.

**Application deadlines**

Applications to the Cytotechnology Program are accepted beginning January 1. Early submission of application is recommended. Applications continue to be reviewed and accepted until July 1 or until program is filled. Preference will be given to applicants whose completed applications and transcripts are received by March 1. Complete an online application at <llu.edu/apply>. The B.S. degree program begins in September with the start of fall quarter.

Applicants must complete prerequisite course work at any accredited college or university prior to being admitted to the School of Allied Health Professions; projected course work that will be completed before beginning the program will be considered in the application process.

Prerequisite for Cytotechnology, B.S.

**Humanities**—20 units minimum chosen from at least three of the following areas: civilization/history, fine arts. literature, modern language, performing/visual arts (not to exceed four quarter units), philosophy, or general humanities elective.

- Included in the 20-unit minimum, four units of religion per year of attendance at a Seventh-day Adventist college or university

**General biology with laboratory, complete sequence**

**Human anatomy and physiology with laboratory, complete sequence**

**Microbiology with laboratory**

**General chemistry with laboratory, complete sequence**

**Organic chemistry with laboratory, complete sequence**

**College mathematics (algebra or higher level)**

**Cultural anthropology or cultural diversity (one course)**

**Select eight units from a minimum of two areas:**

- Sociology, economics, geography, political science, psychology, anthropology

**English composition, complete sequence (minimum of nine quarter units)**

**Personal health or nutrition**

**Two physical activity courses**

**Electives to meet the minimum total requirement of 98 quarter units**

For total unit requirements for graduation, see LLU General Education Requirements (p. 28).

**Program requirements**

### Junior Year

**Autumn Quarter**

- AHCJ 328 Wholeness Portfolio I 1
- CLSM 331 Biochemistry 5
- CLSC 341 Gynecologic Cytology 11
- RELT 423 Loma Linda Perspectives 2

**Winter Quarter**

- AHCJ 402 Pathology I 4
- CLSC 351 Respiratory Cytology 8
- CLSC 353 Urinary Tract and Prostate Cytology 3
- RELE 457 Christian Ethics and Health Care 2

**Spring Quarter**

- AHCJ 403 Pathology II 3
- CLSC 357 Gastrointestinal Tract Cytology 2
- CLSC 364 Body Fluid Cytology 5
- CLSC 381 Fine Needle Aspiration Cytology I 4

**Senior Year**

**Summer Quarter 1**

- CLSC 371 Cytopreparation Techniques 3
- CLSC 373 Histotechnology Techniques 1
- CLSC 382 Fine Needle Aspiration Cytology II 6
- CLSM 435 Immunoassay and Molecular Diagnostic Techniques 3
- CLSC 481 Supervised Cytology Research Project I 2

**Autumn Quarter**

- AHCJ 498 Wholeness Portfolio II 1
- CLSC 301 Introduction to Radiographic Procedures I 2
- CLSC 411 Histopathology I 4
- CLSC 482 Supervised Cytology Research Project II 2
- CLSM 451 Clinical Laboratory Management I 2
- RELT 415 Christian Theology and Popular Culture 2

**Winter Quarter**

- CLSC 302 Introduction to Radiographic Procedures II 2
- CLSC 412 Histopathology II 4
- CLSC 432 Current Research Techniques 3
- CLSC 471 Advanced Cytology Practices I 2
- CLSM 452 Clinical Laboratory Management II 2
- RELT 416 God and Human Suffering 2
Microscope rental fees and usage-and-replacement fees are required throughout the program.

**Normal time to complete the program**

Four (4) years (two [2] years prior to LLU plus two [2] years [22 months] at LLU) — full-time only

**Phlebotomy — Certificate**

**Program director**
Teri H. Ross

**Medical director**
Paul C. Herrmann

Procedures in phlebotomy education are designed to prepare individuals to collect blood for laboratory analysis, which is necessary for the diagnosis and care of the patient. Ideal for health professionals seeking to expand their current skills, or for those interested in a profession in laboratory medicine, this training program is approved by the California Department of Public Health, Laboratory Field Services.

**The program**

The program prepares the modern phlebotomist to perform venipuncture and capillary punctures. Topics include medical terminology, laboratory safety, basic anatomy and physiology, infectious diseases, and medico-legal issues of phlebotomy. A minimum of 40 hours of supervised clinical experience is provided at Loma Linda University Medical Center and other medical affiliates—allowing participants to achieve proficiency in the health-care setting.

**School certificate**

Students registering in this certificate program register through the Office of University Records for the courses; but the certificate is issued by the Department of Clinical Laboratory Science in the School of Allied Health Professions. The University Records Office maintains a record of registration but not the certificate; record of the certificate and its awarding are maintained by the Department of Clinical Laboratory Science in the School of Allied Health Professions.

Financial aid is NOT available to students registered in school certificate programs. These programs do not meet necessary requirements established by the U.S. Department of Education for aid eligibility.

**Professional registration**

Upon successful completion of the certificate program, participants receive a certificate of completion in phlebotomy and are eligible to take examinations such as the national certifying examination offered by the Board of Certification, American Society of Clinical Pathologists (ASCP), 33 West Monroe, Suite 1600, Chicago, IL 60603; telephone, 800/267-2727; website: <http://www.ascp.org> or others recognized by the state of California.
Department of Communication Sciences and Disorders

The Communication Sciences and Disorders Program prepares students for careers in the profession of speech-language pathology or audiology. Speech-language pathologists (SLPs) evaluate and treat children and adults who have communication, swallowing, and/or cognitive communication disorders. Difficulties in the areas of speech, language, fluency, swallowing, and voice are associated with a variety of disorders, including developmental delay, hearing impairment, cleft palate, cerebral palsy, stroke, and head injury. Audiologists are involved in prevention, identification, assessment, and rehabilitation of hearing disorders. Students who choose these professions should be interested in working with people.

Opportunities

The entry level for speech-language pathology is the master’s degree. The entry level for audiology is the doctoral degree. Employment opportunities for speech-language pathologists and audiologists are found in speech and hearing clinics, public schools, hospitals, universities, health departments, skilled nursing facilities, home health agencies, rehabilitation centers, industry, research institutes, and private practice. These environments allow for considerable flexibility. There is ample opportunity for employment as a speech-language pathologist.

Employment opportunities for speech-language pathology assistants (SLPAs) include working under the supervision of a speech-language pathologist. Although SLPAs work primarily in schools, there are also employment opportunities in hospitals and private clinics. Students pursuing the Bachelor of Science degree may work toward meeting eligibility requirements for registration in the state of California as speech-language pathology assistants.

Student professional association

Students are eligible for membership in the National Student Speech-Language-Hearing Association (NSSLHA) and are also encouraged to become members, read the journals, and participate in the many activities sponsored by the local chapter. Information about NSSLHA can be found at <http://www.nsslha.org>. Further, students are encouraged to become members of the California Speech-Language-Hearing Association (CSHA). Information about membership and participation in CSHA events can be found at <http://www.csha.org>.

Programs

• Communication Sciences and Disorders — B.S. (p. 80), M.S. (traditional and transitional) (p. 82), Comparison (p. 86)
• Speech-Language Pathology — S.L.P.D. (p. 87)

Communication Sciences and Disorders — B.S.

Program director
Terry Douglas

The curriculum leading to the Bachelor of Science degree in communication sciences and disorders begins Autumn Quarter of the junior year. The freshman and sophomore years, which are taken at an accredited college or university prior to coming to Loma Linda University, provide the fundamentals of a liberal arts education. The emphasis in the junior and senior years is on pre-professional courses and may include practical experience.

Full-time enrollment in the undergraduate program is required; therefore, one of the considerations for acceptance into the bachelor’s degree program is the student’s ability to manage a full load of course work. There is no option to enter the program on a part-time basis; neither will a student be allowed to change from full-time to part-time status at any time during program progression. Courses are completed sequentially—with prerequisite courses offered in a given quarter, followed by more advanced courses in a later quarter.

Upon completion of the Bachelor of Science degree, students are prepared to seek admission to a graduate program in speech-language pathology or related disciplines. Students are encouraged to take CMSD 267 Speech-Language Pathology Assistant Fieldwork during their senior year in order to qualify for the speech-language pathology assistant license, issued by the California Speech-Language Pathology and Audiology Board.

Program learning outcomes

Students who graduate with a Bachelor of Science degree in communication sciences and disorders will meet the University outcomes (p. 19).

By the end of the program, graduates should be able to:

1. Apply knowledge of basic human communication processes.
2. Describe linguistic differences and disorders and cultural differences in children and adults.
3. Critically compare and contrast the nature of major classifications of human communication and swallowing disorders.
4. Apply basic intervention procedures for the major types of human communication and swallowing disorders.
5. Demonstrate a commitment to ethical and compassionate service.
6. Implement basic processes used in discipline-related research.

**Minimum grade required for graduation**
A minimum grade of C (2.0) is required for a course to qualify for graduation.

**Clinical experience**
A supervised clinical practicum is recommended but not required in the curriculum leading to the Bachelor of Science degree. Completion of specific courses precedes placement for practicum. Clinical practicum is available for students who have G.P.A.s of 3.0 or above in the major courses.

**Wholeness portfolio**
Undergraduate students in the School of Allied Health Professions develop portfolios during the junior and senior years. Students register for AHCJ 328 Wholeness Portfolio I during the junior year and AHCJ 498 Wholeness Portfolio II during the senior year. The purpose of the portfolio is to allow students to demonstrate achievement of the outcomes set by the University. These outcomes were developed to aid students in achieving personal and professional balance in the spiritual, intellectual, social/emotional, and physical domains.

**CLEP**
CLEP tests must be taken within one quarter of receiving the degree compliance report, otherwise, the course must be repeated.

**Student progress review**
Students must maintain a G.P.A. of 3.0 to ensure regular standing in the program. If the student’s G.P.A. drops below 3.0 by the end of an academic quarter, s/he will be placed on academic probation for the following quarter. If the student’s G.P.A. does not improve to at least 3.0 by the end of that quarter, s/he will be dismissed from the program. Each student’s progress in the bachelor’s degree curriculum is reviewed quarterly. Students are provided written feedback with recommendations for remediation if there are concerns about their academic or clinical performance.

**Speech-language pathology assistant**
Students pursuing the Bachelor of Science in speech-language pathology assistant degree may work toward meeting eligibility requirements for registration in the state of California as a speech-language pathology assistant.

**Admissions**
In addition to Loma Linda University (p. 24) and School of Allied Health Professions (p. 47) admissions requirements, the applicant must also complete the following requirements:

**Application deadline**
Applications for the Bachelor of Science degree close June 1.

**Prerequisites**
- **Domain I: Humanities and religion (28-32 quarter units)**
  A minimum of 12 quarter units if the student is required to take 16 units of religion from a Seventh-day Adventist university before graduation

A minimum of 20 quarter units if the student is required to take eight units of religion from Loma Linda University before graduation

**Humanities**—selected from at least three of the following content areas: civilization/history, fine arts, literature, modern language, performing/visual arts (not to exceed four quarter credits), or philosophy

* Specific religion courses offered at Loma Linda University are required for graduation. The student’s academic advisor will assist him/her in determining how many religion courses will be needed, which religion courses should be taken, and which academic quarters it would be advisable to take these courses.

**Domain II: Scientific inquiry and analysis (24-32 quarter units)**
**Natural Sciences (minimum of 12 quarter units):**
Required courses are as follow:

Mathematics requirement: Four semesters of high school advanced mathematics or intermediate algebra taken in college will meet the University’s mathematics requirement; however, the student will not receive academic credit for the course work. College algebra will meet the University’s mathematics requirement. In addition, the student will receive academic credit for the course.

Statistics: One course in introductory or basic statistics is required

One physical science required (physics or chemistry recommended)

One biological science required (human anatomy and/or physiology, general biology, microbiology, and life science are examples of biological sciences)

**Social Sciences (minimum of 12 quarter units)**
Choose from anthropology, economics, geography, political science, psychology, or sociology

General psychology required

Human growth and development, developmental psychology, or child development required

Elective units to complete 12 quarter units minimum: Choose from anthropology, economics, geography, political science, psychology, and sociology

**Domain III: Communication (9-13 quarter units)**
English: Course work must include a complete sequence in English composition that meets the baccalaureate degree requirements of a four-year college or university (e.g., English 101 and 102)

Speech: One speech or interpersonal communication course required

Computer courses: Not required, but course work taken in this category would be counted in this domain

**Domain IV: Health and wellness (2-6 quarter units)**
Personal health or nutrition: One course required

Physical activity: Must include at least two separate physical activity courses totaling a minimum of one quarter unit

**Electives**
The student begins the bachelor’s degree curriculum in communication sciences and disorders with 96 quarter units (64 semester units) taken at a college or university other than Loma Linda University. Students who transfer from a community college may transfer a maximum of 105
quarter units (70 semester units). All other credits must come from a
senior college. Acceptance into the degree program does not guarantee
that students possess all the academic credits needed to graduate. Some
students may need to complete additional academic course work in
general education to bring their overall course unit total to a minimum
of 96 quarter units while enrolled at this University in order to meet
graduation requirements.

For total unit requirements for graduation, see LLU General Education
Requirements (p. 28).

Program requirements

Although SLPAs typically receive an associate degree with a specialty in
speech-language pathology, students who have completed a bachelor’s
degree in speech-language pathology or communication sciences and
disorders may qualify for the California state-issued SLPA registration
after achieving a grade of "P" (Pass) in CMSD 267 Speech-Language
Pathology Assistant Fieldwork (two units), offered at Loma Linda
University.

Students generally make arrangements to register for CMSD 267
Speech-Language Pathology Assistant Fieldwork in their last
year of undergraduate study (senior year). Further information
about SLPA registration can be obtained on the web at <http://
www.speechandhearing.ca.gov>. Select “Applicants,” then "SLP
Assistants."

Program director

Karen Mainess

The Master of Science degree in communication sciences and disorders
offers preparation for careers in the professional practice of speech-
language pathology. It provides a basis for graduate study and research
at a more advanced level and encourages growth towards independence.
The clinical services of the department, Loma Linda University Medical
Center, and affiliated practicum sites provide opportunity for supervised
clinical experiences that represent the breadth and depth of the
profession in a variety of settings.

Upon completion of the Master of Science degree, graduates are eligible to:

- receive the preliminary speech-language pathology services
  credential (California Commission on Teacher Credentialing);
- receive the temporary license in speech-language pathology
  (California Department of Consumer Affairs); and
- seek employment as clinical fellows, working towards the certificate
  of clinical competence (through the Council for Clinical Certification
  of the American Speech-Language-Hearing Association).

Two tracks lead to the Master of Science degree:
• Individuals who have completed a bachelor’s degree in speech-language pathology or in communication disorders may apply for admission to the two-year master’s degree program. Postbaccalaureate foundational course work completed at an institution other than Loma Linda University by applicants who have a bachelor’s degree in a field other than speech-language pathology or communication disorders is considered on an individual basis.

In general, foundational course work completed at California state schools where undergraduate courses in communication sciences and disorders are required is acknowledged. Prior to admission or within the first quarter of study (see Program of Study below), California Basic Education Skills Test (CBEST) scores are required.

• Individuals who have a bachelor’s degree from an accredited college or university, with a major in a field other than speech-language pathology or communication disorders and who meet minimum requirements may apply for admission to the transitional three-year Master of Science degree curriculum.

The program
The curriculum consists of completing required graduate-level courses, supervised clinical practice, capstone research, and clinical presentations. The traditional Master of Science degree curriculum is two years in length. Full-time students will complete the curriculum in seven quarters, including the summer between the first and the second years. Students begin the curriculum in the Autumn Quarter and go through the program as a cohort. Classes are scheduled in the late afternoon or early evening, and on one Friday per month. During the Winter Quarter and Spring Quarter of the second year, students take the full-time public school and medical field work. *Note: Students may be required to go out of state for their full-time fieldwork and, therefore, should be prepared financially.

Students enrolled in the three-year transitional master’s degree curriculum will begin their program in the Autumn Quarter and go through as a cohort. During the first year, students complete course work that provides the necessary foundation for the second- and third-year disorders courses and clinical practice. In the summer following the first year, all students may be required to take the clinical practicum. Beginning with the second year, the transitional master’s degree students join the cohort of new students in the two-year master’s degree program. The two groups complete the remaining two years simultaneously.

University student learning outcomes
Students who graduate with a Master of Science degree in communication sciences and disorders will meet the University outcomes (p. 19).

Program learning outcomes
By the end of their program, students should be able to:

1. Define the major types of human communication and swallowing disorders.
2. Assess human communication and swallowing disorders.
3. Develop interventions for communication and swallowing disorders.
4. Perform the role of the school-based speech-language pathologist.
5. Define basic processes used in discipline-related research
6. Explain counseling principles and practices applied to the practice of speech-language pathology with diverse populations and across the lifespan.

California Basic Educational Skills Test (CBEST)
The California Commission on Teacher Credentialing requires that all students pursing a credential pass the CBEST. The CBEST must be passed before beginning the graduate curriculum, or within the first quarter. It is a measure of reading, writing, and mathematics proficiency, and is required by law for anyone applying for a credential in the public schools of California and Oregon. This test is given by National Evaluation Systems, Inc., Box 340880, Sacramento, CA 95834-0880, 916/928-4001. Additional information may be found at <http://www.cbest.nesinc.com/>.

Praxis examination
The Praxis (administered by a national testing service) is a multiple choice examination designed to evaluate students’ broad-based knowledge across the disorders and is required for ASHA certification, for the California license, and for the California school credential. It is a nationally standardized and publicly administered test. A passing score of 162 must be achieved, and the test may be taken multiple times. Information about the Praxis may be obtained by going to <http://www.ets.org/praxis>. Students in the Master of Science degree curriculum in communication sciences and disorders are not required to take the Praxis while in the graduate program. However, taking the Praxis before graduation is a good idea.

Remediation
Alumni and graduate students who do not achieve a passing score on the Praxis may take any course and/or seminar offered by the department free of charge in order to refresh knowledge or remediate areas of concern.

Graduate students who demonstrate unsatisfactory performance in the clinical courses CMSD 567 Clinical Practice in Speech-Language Pathology and Audiology, Advanced, CMSD 586 Educational Fieldwork I, CMSD 588 Educational Fieldwork II, CMSD 596 Medical Fieldwork I, or CMSD 597 Medical Fieldwork II will be required to repeat the clinical experience and to register for CMSD 589 Remediation/Advanced Directed Teaching and/or CMSD 599 Remediation/Externship, respectively.

Student progress review
Each student’s progress in the Master of Science degree curriculum in communication sciences and disorders is reviewed quarterly. Written feedback is provided, along with recommendations for remediation, if needed. In addition, each cohort meets with the graduate advisor: as a group, twice yearly, and on an as-needed basis.

Accreditation
The Master of Science degree education program in speech-language pathology at Loma Linda University is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association, 220 Research Boulevard, #310, Rockville, MD 20850, 800/498-2071 or 301/296-5700; website: <http://www.asha.org>.
The curriculum is also accredited by the California Commission on Teacher Credentialing (CTC) and is approved by the California Department of Consumer Affairs’ Speech-Language Pathology and Audiology and Hearing Aid Dispenser’s Board (SLPAHADB).

Admissions

In addition to Loma Linda University (p. 24) and School of Allied Health Professions (p. 47) admissions requirements, the applicant must also complete the following requirements:

Acceptable undergraduate preparation includes a bachelor’s degree in speech-language pathology or in communicative disorders. Post-baccalaureate foundational course work completed at an institution other than Loma Linda University by applicants who have a bachelor’s degree in a field other than speech-language pathology or communication disorders is considered on an individual basis. In general, foundational course work completed at California state schools where undergraduate courses in communication sciences and disorders are required is acknowledged. Prior to admission or within the first quarter of study (see Program of Study below), CBEST scores are required.

The admissions committee considers the following qualifications in making admission decisions: personal statement, overall G.P.A., G.P.A. for last 96 quarter units, professional potential, personal interview, on-site writing sample, and letters of recommendation.

Regular admission may be granted to applicants who (1) submit a literate personal statement that addresses professional motivation and reasons for selecting Loma Linda University; (2) complete a writing sample that demonstrates appropriate grammar, style, and critical thinking; (3) submit three letters of recommendation (preferably academic); (4) demonstrate professional potential and present well during the interview; (5) have no undergraduate deficiencies; and (6) meet the scholarship requirements for admission—minimum cumulative G.P.A. of 3.0 with a minimum G.P.A. of 3.3 for the last 96 quarter units or 64 semester units (last two undergraduate years). *Note: The required minimum G.P.A. for consideration is not a guarantee of admission.

Alternate status may be granted to qualified applicants who are not accepted in the first round of selection.

Denial of admission indicates that the applicant did not meet one or more of the admission requirements, that the application was incomplete, or that the application deadline was not met.

Application deadlines

Online applications open October 1. Applications close January 1 for the two-year master’s and on March 1 for the three-year transitional master’s.

Applications and all supporting information (transcripts, letters of recommendation) must be submitted by January 1 to be included in the first round of selection for the two-year master’s program and March 1 for the three-year transitional master’s program.

Programs

- Communication Sciences - M.S. (p. 84), M.S. (Transitional) (p. 88), Comparison (p. 86)

---

Communication Sciences — M.S.

Students who have been accepted into the Master of Science degree program in communication sciences and disorders are already recognized as academic achievers.

Expectations for these students are high. Candidates for the master’s degree are expected to:

1. Meet academic and professional standards of excellence.
2. Exhibit the highest quality of work in the classroom, clinic, and as a graduate assistant.
3. Demonstrate excellence by following through on all activities, completing all assignments and commitments in the agreed-upon time frame.
4. Show initiative and support for volunteer and extracurricular professional/student organizations.
5. Exhibit interaction and personal qualities consistent with professionalism.

In addition to courses, degree requirements include:

1. Minimum of one quarter in residence as a graduate student.
2. Minimum G.P.A. of B (3.0), with no course grade below C (2.0).
3. Religion (three units minimum).
4. Completion of the California Basic Education Skills Test (CBEST).

Communication Sciences — M.S. (Transitional)

Students who have been accepted into the transitional Master of Science degree curriculum are already recognized as academic achievers. Expectations for these students are high. Candidates for the master's degree are expected to:

1. Meet academic and professional standards of excellence.
2. Exhibit the highest quality of work in the classroom and the clinic and as a graduate assistant.
3. Demonstrate excellence in follow through, completing all assignments and commitments in the agreed-upon time frame.
4. Show initiative and support for volunteer and extracurricular professional/student organizations.
5. Exhibit interaction and personal qualities consistent with professionalism.

In addition to courses, degree requirements include:

1. Minimum of one quarter in residence as a graduate student.
2. Minimum G.P.A. of 3.3 for foundational course work during the first year.
3. Minimum G.P.A. of B (3.0), with no course grade below C (2.0), for years two (2) and three (3) of the master's degree program; a minimum of 45 quarter units of foundational courses, including the following completed during the first year.
4. Religion (three units minimum).
5. Completion of the California Basic Education Skills Test (CBEST).

Speech-Language Pathology — S.L.P.D.

Program Director
Keith Wolgemuth

The Doctor of Speech-Language Pathology is a post-entry level professional degree for individuals who want to increase depth of knowledge in the field of speech-language pathology while also acquiring clinical research experience. Graduates of the program will be trained to take positions as master clinicians, clinical researchers, and university clinical faculty.

The post-entry level professional program at Loma Linda University is one of a handful of such programs in the country and is currently the only program in California. Current practitioners will gain advanced knowledge in the field of speech-language pathology, with specialized training in evidence-based practice, critical thinking, legal and ethical issues, problem solving and clinical research. Doctoral students will become adept at analyzing and synthesizing the existing research literature as they design and conduct their own clinical study in their area of interest. Doctoral students will be required to complete an applied dissertation, research capstone project designed by the student and his or her faculty mentor. This project will be a clinical research study that will be in the form of a written manuscript for potential publication.

Student learning outcomes

In addition to the institutional learning outcomes (p. 19), by the end of the program, the graduate should be able to:

1. Independently conduct clinically based research.
2. Disseminate information from their novel research findings.
3. Demonstrate specialized knowledge in speech-language pathology.
4. Demonstrate knowledge in disciplines outside the field of speech-language pathology.

Admissions

Note: If you live in a state that has regulatory requirements for online education, please check if Loma Linda University is able to accept residents of your state for online education. Contact the Admissions office for School of Allied Health Professions, 909-558-4599.

In addition to Loma Linda University (p. 24) and School of Allied Health Professions admissions requirements (p. 47), the applicant must also complete the following requirements:

- Be speech-language pathologists with a Master’s degree (M.A./M.S.) in speech-language pathology or equivalent and six months of professional practice
- Have a current Certificate of Clinical Competence (CCC), and current licensure in one of the 50 United States.
- Document a minimum graduate GPA of 3.3
- Provide three letters of reference
- Submit a two- to three-page written statement describing research interests (and experience, if any), professional experience/accomplishments, reason for pursuing a Doctorate in Speech-Language Pathology, and reason for attending Loma Linda University. If the applicant has a particular faculty mentor in mind, it should be mentioned here.

In the admissions screening process, the applicant’s recommendations, interview, personal statement, and work experience are all considered. The most qualified applicants will be selected to be interviewed. The strength of the interview will be evaluated along with the applicant’s stated research goals/plans. Admission will be decided based on the perceived potential of the applicant to succeed in this clinical research program as well as availability of a faculty mentor suited to the applicant’s research area.

Program requirements

Courses in the program fall into two broad domains: research and theory. Students will be required to take all courses in each domain

Department of Health Informatics and Information Management

Health informatics and information management (HIIM) professionals provide leadership necessary to provide real-time quality information that supports clinical and nonclinical decision making in the health-care industry. Transforming data into health intelligence while governing and respecting the privacy rights of patients and providers is a challenge all health-care delivery systems face. The profession aims to improve patients’ experiences with respect to quality and satisfaction, to improve the health of populations, and to improve the per capita costs of health care. Professionals trained in HIIM possess the necessary leadership—as well as the technological, administrative, legislative, analytical, and decision-making skill sets—to ensure a competent workforce in the health-care industry.

Medical coding professionals
Health-care facilities need coders who accurately select ICD-10-CM/PCS codes, CPT codes, and HCPCS codes; and identify appropriate DRG or APC assignments for diagnostic and surgical information filed in health records. In most instances, financial reimbursement is directly tied to these codes. The statistical information generated from these codes is used in research, quality improvement in patient care, education, and administrative decision making.

Opportunities
Coding specialists are in demand in acute care and ambulatory care facilities, physicians’ office practices, and long-term care facilities. A variety of government agencies require coding expertise as well. The need for accurate, skilled coders is acute in California and throughout the nation. Available information about job opportunities is provided to alumni.

The program
The Coding Specialist Program is seven quarters in length. Prior to beginning coding courses, the student is introduced to health-care records, confidentiality, ethics, and pharmacology. Classes meet one night a week until the final two quarters. The last two quarters of the program, practical experience courses are integrated into the course schedule. During these quarters, students will spend one night a week in class and one night a week in practicum.

Program learning outcomes
Upon completion of the program, the graduate should be able to:
1. Adhere to the format, organization, and mechanical conventions of the ICD-10-CM/PCS, CPT, E & M, and HCPCS coding systems.
2. Determine the appropriate medical codes for health-care encounters with accuracy and consistency.
3. Analyze health record documentation to verify that it is accurate, timely, and complete; and that it supports the diagnosis and other clinical findings.

4. Supervise health data collection and processing through coding, indexing, and maintaining disease and operation statistics.

5. Develop policies and procedures for coding, including a plan for coding quality.

6. Comply with federal, state, and professional association guidelines for coding in the healthcare environment.

7. Interpret the revenue management cycle in relation to the prospective payment system.

9. Develop appropriate physician queries to resolve discrepancies in clinical documentation and coding.

**Professional certification**

Upon successful completion of the program, the student is eligible to take the national entry-level certification examinations of the American Health Information Management Association.

**Special course work/credit**

Credit for life experience may be offered through waiver or equivalency examination as allowed by University policy.

**Approval**

The Loma Linda University Coding Specialist Certificate Program is approved by AHIMA's Professional Certificate Approval Program (PCAP). This designation acknowledges the coding program as having been evaluated through a peer-review process and against a national minimum set of standards for entry-level coding professionals. This process allows academic institutions, health-care organizations, and private companies to be acknowledged as offering an approved coding certificate program.

**Admissions**

In addition to Loma Linda University (p. 24) and School of Allied Health Professions admissions requirements (p. 47), the applicant must also complete the following requirement:

- High School Diploma or GED

**Program requirements**

**Corequisite**

The following corequisites/courses must be completed at a regionally accredited college or university:

- Human anatomy and physiology (must be completed before Summer Quarter of first year)
- Medical terminology
- Introduction to computer applications (must be completed before HLCS 961 Coding Practicum I)
- Essentials of human diseases/pathophysiology (must be completed before Fall Quarter of second year)

**Program Overview**

The dynamics within the health-care industry are creating an information-intensive environment that professionals must navigate as they deliver health care to patients. Clinical and nonclinical professions in this industry will be required to be knowledgeable and proficient in the development and use of information technology. The future success or failure of health-care organizations will be predicated on their abilities to effectively and efficiently manage the valuable asset of information. This curriculum blends the topics of leadership, system theory and management, technology, data analytics, project management, process improvement, data management, and regulatory constraints in order to prepare graduates for critical leadership roles in health-care...
Opportunities

As the health-care industry develops under vastly expanding regulatory mandates, there is a need for information systems that will meet the needs of all stakeholders. The demand for informatics professionals is steadily increasing as health-care organizations look for greater numbers of skilled workers. There is a projected need for more than 50,000 new information technology workers in the coming years. Health informatics professionals are employed in a wide variety of health settings, including acute care, outpatient care, long-term care, research facilities, software development companies, government agencies, rehabilitation facilities, consulting firms, and others.

Program learning outcomes

Upon completion of this program, the graduate should be able to:

1. Conduct information system analysis, design, implementation and management.
2. Evaluate data structure, function and transfer of information, socio-technical aspects of health computing, and human-computer interaction.
3. Recommend information technology, including but not limited to, computer networks, databases and system administration, security and programming.
4. Develop effective verbal and written communications.
5. Ensure successful project management.
6. Assess quality and performance issues in health care using data analytics and performance improvement tools

Non-course requirements

An LLU G.P.A. of 3.0 must be maintained throughout the program.

A minimum grade of C (2.0) is required for each course in the program.

Normal time to complete the program

Two (2) years (seven [7] academic quarters) based on three-quarter-time enrollment

Health Information Administration — B.S., Certificate

Program director
Pauline Calla

Clinical coordinator
Ryan Stephan

Recruitment coordinator
Pauline Calla

Advisory committee
Felicia Chao, Chair
Kristen Borth
Deborah Critchfield
Cynthia Doyon
Craig Jackson, ex officio
Raymound Mikaelian
Jennifer Miller
The Health Information Administration Program, leading to the Bachelor of Science degree, begins with the Autumn Quarter. Freshman and sophomore years, which are taken at an accredited college or university, afford the fundamentals of a liberal arts education and provide background in science, humanities, social studies, and business. Concentration on health information administration subject matter begins at Loma Linda University in the junior year and continues through the senior year.

Students are advised to complete the curriculum in two years as scheduled. Those electing to study on a part-time basis must complete all course work within a period specified by University policy.

Opportunities
Health information administration provides job flexibility for the person seeking work in a variety of settings. Many are employed by hospitals and medical centers. However, the job market is rapidly expanding beyond hospitals. New openings are available in home-health agencies, long-term care facilities, outpatient care, mental health facilities, private medical practices and clinics, insurance companies, health management organizations, commercial and industrial firms, government agencies, legal offices, software vendors, and education.

Job positions include, but are not limited to: director of HIM, privacy officer, security officer, chief compliance officer, EHR implementation specialist, data application or system analyst, data integrity analyst, consultant, cancer registrar, medical office administrator, HIM revenue cycle auditor, revenue cycle manager, REC/HIE exchange director, meaningful use specialist, data quality manager, documentation and coding specialist, and coding manager.

Program overview
The Health Information Administrator (HIA) manages health information systems that serve the needs of patients, the health-care team, and the administrative staff. It is an excellent career choice for the person who desires a profession in health care that combines interests in data analytics, computer science, business, management, informatics, law, and medicine. This unique mixture provides the HIA with great opportunities in a variety of different settings and job titles, along with substantial income.

HIAs have opportunities to assist in the development and implementation of health information systems for quality patient care, financial reimbursement, medical research, health-care planning, and health-care quality evaluation. Other responsibilities include privacy, security, and data governance.

One of the many career options chosen by HIAs is the management of a health information department. In this position, managers evaluate and motivate employees, provide leadership in department planning and organizing, determine department policies, and budget department resources. Managers are also involved in decision making and health-care committees.

The HIA designs, develops, and maintains systems for storage, retrieval, and dissemination of information in accordance with federal, state, and local statutes and regulations. This person works with the medical staff and other health professionals in research, administrative studies, functions relative to health information, and patient-care evaluation. The HIA in a health-care facility provides management and leadership in planning and organizing the department, motivating and evaluating employees, and providing in-service programs for departmental employees or other personnel. In addition, strategic planning involvement for health information systems is an important function.

The Health Information Administration curriculum is offered in two pathways as follow:

1. Bachelor’s degree completion program.
2. Postbaccalaureate degree certificate program for applicants with a bachelor’s degree.

The Health Information Administration Program, leading to the Bachelor of Science degree, begins with the Autumn Quarter. Freshman and sophomore years, which are taken at an accredited college or university, afford the fundamentals of a liberal arts education and provide background in science, humanities, social studies, and business. Concentration on health information administration subject matter begins at Loma Linda University in the junior year and continues through the senior year.

Program learning outcomes
By the end of the program, the graduate should be able to:

1. Conduct assessment and management of data and information needs for a variety of health-care settings.
3. Recommend technology, database models, and data analytic tools to support decision making and strategic planning.
4. Discuss and apprise revenue cycle management principles, strategies and processes.
5. Monitor and analyze compliance with standards, regulations, and laws documentation related to healthcare.
6. Formulate management and leadership plans and strategies in legal and ethical manners to utilization resources effectively and efficiently.
7. Integrate pathophysiology, pharmacology, anatomy and physiology, medical terminology, computer concepts and application, and math statistics into the practice of health information administration.

Professional practice experience
Two complimentary types of clinical experience are offered. The first is a variety of assignments and simulated exercises that will acquaint the student with managing information in all aspects of the healthcare environment. The second is a 120-hour affiliation during Spring Quarter of the senior year. Arrangements for internships and affiliation sites are made through the program director and the clinical coordinator. Students are responsible for their own transportation, food, and lodging during this affiliation.

Professional registration
Upon completion of either the B.S. degree or the certificate, and upon recommendation of the faculty, graduates are eligible to take the qualifying examination of the American Health Information Management Association, 233 North Michigan Avenue, 21st Floor, Chicago, IL 60611-5519, for the designation of Registered Health Information Administrator.
Professional association

Students and graduates are eligible for becoming members of the American Health Information Management Association and their respective Component State Associations. The purpose of these associations is to promote the art and science of health information management. They grant student memberships at a nominal cost to undergraduates in approved schools. Students are expected to become members of these associations, pay the nominal dues, read the journals, and become familiar with the professional activities.

Credit by examination or evaluation

Applicants who have comparable education or experience may be able to gain credit per University policy.

Accreditation

The Health Information Administration Program is accredited by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM), 233 North Michigan Avenue, Suite 2150, Chicago, IL 60601-5519; telephone: 312/233-1100; website: <www.cahiim.org (http://www.cahiim.org)>.

Admission

In addition to Loma Linda University (p. 24) and School of Allied Health Professions admissions requirements (p. 47), the applicant must also complete the following requirements:

Health Information Administration—B.S.

To be eligible for admission to the B.S. degree curriculum in health information administration, the applicant must have completed a minimum of 96 quarter units at an accredited college or university.

Domain 1: Religion and humanities (20 quarter units)

Humanities—Choose a minimum of three areas from: history, literature, modern language, philosophy, and art/music appreciation

Included in this minimum are four units of religion per year of attendance at a Seventh-day Adventist college or university

Domain 2: Scientific inquiry and analysis (24-32 quarter units)

Natural sciences (12 units minimum)

Human anatomy and physiology with laboratory, complete sequence

Choose remaining units from: chemistry, geology, mathematics, astronomy, physics, statistics

Social sciences (12 units minimum)

Cultural anthropology or an approved course dealing with cultural diversity

Psychology (one course minimum)

Intermediate algebra (or two years of high school equivalent)

Choose one additional course from: sociology, economics, geography, political science

Domain 3: Communication (9-13 quarter units)

English composition, complete sequence

Business communications or Interpersonal communication

Domain 4: Health and wellness (2-6 quarter units)

Personal health or nutrition

Two physical activity courses

Other

Medical terminology

Electives to meet the minimum total requirement of 96 quarter units

For total unit requirements for graduation, see LLU General Education Requirements (p. 28).

Health Information Administration—Certificate

To be eligible for admission, the applicant must have a bachelor’s degree from an accredited college or university.

Prerequisites

Human anatomy and physiology with laboratory, complete sequence—concurrent with first quarter

Medical terminology

Intermediate algebra or two years of high school math

Psychology course

Business communications or Interpersonal communication

Department of Nutrition and Dietetics

The Department of Nutrition and Dietetics offers degree programs that lead to professional careers. Graduates are prepared to be registration eligible; and upon passing the boards, be employed as clinical dietitians in hospitals and as directors of health-care and school food service facilities. Some own private practices, offering consulting services to long-term care facilities, sports teams, and other venues. The classroom-based B.S and M.S. coordinated programs that lead to RD/RDN (registered dietitian/registered dietitian nutritionist) eligibility are accredited by the Academy of Nutrition and Dietetics’ Accreditation Council for Education in Nutrition and Dietetics. As a coordinated program, both didactic course work and 1200 hours of supervised practice are included in the curriculum. In addition to the ACEND-accredited coordinated programs, two master’s-level degrees (online and classroom-based) are offered for dietitians with bachelor’s degrees who want to further their educations.

Programs

• Nutrition and Dietetics — M.S. (Prior RD) (p. 94)
• Nutrition and Dietetics (Coordinated Programs) — B.S. (p. 98), B.S. and M.S (p. 99)., M.S. (Prior B.S.) (p. 97), M.S. (DPD) (p. 96), Comparison (p. 101)

Nutrition and Dietetics (Prior RD) — MS

This is a one-year (four [4] quarters) program and begins every Summer Quarter. A research project requirement is included in the curriculum.

Opportunities for a registered dietitian who has completed a master’s degree are enhanced by the additional education at the graduate level. By 2024, a master’s degree will be required for entry-level employment.

The curriculum is identical to that of the third year of the Nutrition and Dietetics—B.S. and M.S. Coordinated Program in dietetics.

Program learning outcomes

At the end of this program, the graduate should be able to:

1. Plan, process and perform nutrition-related research while protecting the public.
2. Demonstrate ability to translate evidence-based literature into formats lay public can understand, including use of videos, writing articles, and counseling.
3. Evaluate emerging trends in nutrition and give competent, evidence-based answers to the public.
4. Use metabolic pathways to determine patient and client nutritional needs.

Admissions

Admission is based on a selective process. In addition to Loma Linda University (p. 24) and School of Allied Health Professions admissions requirements (p. 47), the applicant must also complete the following requirements:

• Be a registered dietitian
• Have a 3.0 or above G.P.A.
• Complete an interview (by phone or in person)

Program requirements

Graduate Year | Units
--- | ---
AHCJ 548 Human Resource Management in the Health-Care Environment | 3
AHRM 604 Research-Proposal Writing | 3
DTC5 526 Pharmacology in Medical Nutrition Therapy | 2
DTC5 584 Contemporary Issues in the Dietetic Profession | 4
DTC5 589 Capstone Course in Nutrition and Dietetics | 3
DTC5 694 Research | 4
Each of these degrees culminates in eligibility to take the registration examination for dietitians. The student obtains the credential in dietetics upon successful completion of the registration examination offered by the Commission on Dietetic Registration of the Academy of Nutrition and Dietetics. The coordinated program in dietetics combines didactic and supervised professional practice experiences to develop professional competencies concurrently with cognitive and technical skills that enable the graduate to establish eligibility to become a registered dietitian.

The M.S. degree prepares entry-level dietitians to join the profession in areas of advanced practice and in specialty areas that will allow them to contribute to the wholeness of humankind. The graduate is awarded an M.S. degree in nutrition and dietetics. The curriculum comprises didactic and supervised professional practice experiences in a health-sciences, liberal arts environment to prepare an educated graduate.

This curriculum includes theory, laboratory, research, and clinical experiences. Twelve hundred hours of supervised professional practice experiences are scheduled in medical nutrition therapy, community, and administrative nutrition. Students participate as active members of the nutrition-care team in clinical settings.

Four choices are available to earn a Master of Science degree in nutrition and dietetics at Loma Linda University.

**Opportunities**

Members of the dietetics profession practice in a variety of environments—including hospitals and other health-care facilities, schools and universities, government and community agencies, business, and industry. A growing number of dietitians are employed in physicians’ offices, clinics, home health-care agencies, mass communications, and many other entrepreneurial roles.

By successfully passing the registration examination for dietitians, practice opportunities as a specialist in medical nutrition therapy, administrative dietetics, nutrition education, community nutrition, or research are available. There is increased recognition of the importance of nutrition in the fields of medicine, dentistry, and health promotion—with emphasis on fitness and optimal well-being. This indicates that the dietitian’s scope of practice is steadily broadening.

The registered dietitian in medical nutrition therapy applies the science of nutrition to the care of people through health promotion and disease prevention, and uses medical nutrition therapy in the treatment of disease. As a member of the patient-care team, the registered dietitian (RD) is responsible for assessing, implementing, and monitoring the nutritional care of patients. In addition, the RD may serve professionally as a nutrition practitioner in health care; a teacher in an educational institution; a research dietitian; or a nutrition consultant-educator in municipal, state, or federal departments of health.

The dietitian in administration is accountable for the food service system. In a health-care institution, s/he is responsible for the effective functioning of food service from the standpoint of patients, administration, medical staff, and personnel. The administrative RD may also teach; manage food systems in educational, public, or commercial facilities; serve as a consultant to health-care or educational institutions; or enter the field of research.

Community registered dietitians practice in diverse settings, translating nutrition science into improved health status. Opportunities may include forming partnerships with various organizations, mastering technology,
enacting regulations and policies that protect and improve the public’s health, and creatively managing scarce resources. Dietitians working in the community exhibit high-quality leadership and planning skills.

**Professional registration**

Upon satisfactory completion of the program and upon recommendation of the faculty, the graduate will receive a verification statement and be eligible to take the registration examination for dietitians in order to become a registered dietitian.

**Professional association**

Students and graduates are eligible for membership in the Academy of Nutrition and Dietetics. The association grants student membership at a nominal rate to students in accredited programs.

The national office of the Academy of Nutrition and Dietetics is at 120 South Riverside Plaza, Suite 2000, Chicago, IL 60606-6995. Along with membership in the Academy of Nutrition and Dietetics, students become members of the California Dietetic Association. Students are encouraged to join the California Dietetic Association-Inland District and, where possible, the Seventh-day Adventist Dietetic Association.

**Goals of the coordinated program**

**SAHP Program Goal 1**

The program will prepare students to be competent graduates who are eligible to write the registration examination for dietitians to become entry-level practitioners.

**SAHP Program Objectives for Goal 1**

1. Eighty percent (80%) of graduates who write the registration examination for dietitians will pass within the first year.
2. Eighty percent (80%) of students who enter the B.S., M.P.H., or M.S. degree program will complete program/degree requirements within 150% of the program length.

**SAHP Program Goal 2**

Provide professionally trained registered dietitians with either an emphasis in medical nutrition therapy or public health nutrition who may be employed by or contribute to the health-care and educational systems of the Seventh-day Adventist church; or local, national, or international entities.

**SAHP Program Objectives for Goal 2**

1. Seventy percent (70%) or more of coordinated program graduates who seek employment in dietetics will be employed within twelve months of program completion.*
2. Sixty percent (60%) of coordinated program graduates will contribute to the community and/or provide professional leadership in the field of dietetics within five years of graduation.

Students admitted into the B.S. + M.S. degree in nutrition and dietetics program satisfy CP requirements when the B.S. degree is completed. They continue their graduate education and do not typically seek employment until conclusion of the M.S. degree.

**Accreditation**

The coordinated program in dietetics is currently granted continuing accreditation by the Accreditation Council for Education in Nutrition and Dietetics of the Academy of Nutrition and Dietetics, 120 South Riverside Plaza, Suite 2000, Chicago, IL 60606-6995; telephone, 312/899-5400; fax: 312/899-4817; website: <http://www.eatright.org/cade>.

**Programs**

- Nutrition and Dietetics — B.S. (p. 98), B.S. and M.S. (p. 99), M.S. (Prior B.S.) (p. 97), M.S. (D.P.D.) (p. 96), Comparison (p. 101)

**Nutrition and Dietetics (DPD) — M.S.**

The M.S. degree for graduates of didactic programs in dietetics (DPD) is specifically designed for those who choose not to pursue a standard dietetic internship but who wish to complete a coordinated master’s degree and supervised practice experience in order to establish eligibility for writing the registration examination for dietitians. This curriculum builds upon didactic course work in nutrition and dietetics and culminates with an M.S. degree and a verification statement covering both didactic and supervised practice requirements.

**Program learning outcomes**

By the end of this program, the graduate should have been able to:

1. Integrate scientific information and translation of research into practice.
2. Demonstrate beliefs, values, attitudes and behaviors consistent with the professional dietitian nutritionist level of practice.
3. Develop and deliver information, products and services to individuals, groups and populations.
4. Apply of principles of strategic management and systems in the provision of services to individuals and organizations.
5. Plan, process and perform nutrition-related research while protecting the public.
6. Demonstrate ability to translate evidence-based literature into formats lay public can understand, including use of videos, writing articles, and counseling.
7. Evaluate emerging trends in nutrition and give competent, evidence-based answers to the public.
8. Use metabolic pathways to determine patient and client nutritional needs.

**Admissions**

Admission is based on a selective process. In addition to Loma Linda University (p. 24) and School of Allied Health Professions admissions requirements (p. 47), the applicant must also complete the following requirements:

- have a 3.0 G.P.A. or above (science and nonscience)
- complete an interview (by telephone or in person)
- complete program prerequisites
- provide a DPD verification statement (or equivalent if international)

**Prerequisites**

- College algebra or higher
- Anatomy and physiology with laboratory, complete sequence (two terms)
- General chemistry with laboratory, two semester/three quarters
- Microbiology with laboratory

**Comprehensive Examination**

Comprehensive Examination is designed to establish that the student has a broad understanding of Nutrition and Dietetics, research statistics, and basic research methodology. The written comprehensive examination will be administered after students have successfully completed the majority of required courses. The comprehensive examination will typically occur during the spring quarter of the student’s second year in the MS program.

**Normal time to complete the program**

Two (2) years (eight [8] academic quarters) at LLU — based on full-time enrollment; part time permitted

---

**Nutrition and Dietetics (Prior B.S.) — M.S.**

Students desiring an M.S. degree in nutrition and dietetics who have a bachelor’s degree in a field other than nutrition take one year of basic undergraduate foundation courses in nutrition. The second and third years consist of nutrition and dietetics courses offered at the master’s degree level, including both the didactic course work and the supervised professional practice. Program completion establishes eligibility for writing the registration examination for dietitians and becoming a registered dietitian. Listed below are the required admission and prerequisite requirements to obtain a master’s degree from Loma Linda University.

**Program learning outcomes**

At the end of this program, the graduate should be able to:

1. Integrate scientific information and translation of research into practice.
2. Demonstrate beliefs, values, attitudes and behaviors consistent with the professional dietitian nutritionist level of practice.
3. Develop and deliver information, products and services to individuals, groups, and populations.
4. Apply of principles of strategic management and systems in the provision of services to individuals and organizations.
5. Plan, process, and perform nutrition-related research while protecting the public.
6. Demonstrate ability to translate evidence-based literature into formats lay public can understand, including use of videos, writing articles, and counseling.
7. Evaluate emerging trends in nutrition and give competent, evidence-based answers to the public.
8. Use metabolic pathways to determine patient and client nutritional needs.

**Admissions**

Admission is based on a selective process. In addition to Loma Linda University (p. 24) and School of Allied Health Professions admissions requirements (p. 47), the applicant must also complete the following requirements:

- have a 3.0 G.P.A. or above (science and non-science)
- complete an interview (by telephone or in person)
- complete program prerequisites

Nutrition and Dietetics — B.S.

The B.S. degree prepares entry-level dietitians to join the profession and contribute to the wholeness of humankind. The graduate is awarded the Bachelor of Science degree and is eligible to write the registration examination of the Commission on Dietetic Registration of the Academy of Nutrition and Dietetics. The B.S. degree curriculum includes didactic and supervised professional practice experiences in a health-science and liberal-arts environment to prepare an educated graduate. Admission at this University begins with the junior year of college. The applicant will present records of at least two years of education from an accredited college or university to meet specific subject requirements.

The seven-quarter professional curriculum includes theory, laboratory, and clinical experiences. Ten weeks of clinical experiences are scheduled at the end of the junior year and again during the senior year. Students participate as active members of the nutrition-care team in clinical and community settings. Administrative affiliation experiences involve decision-making assignments in volume feeding operations in school food service or health care.

Program learning outcomes

At the end of this program, the graduate should be able to:

1. Integrate scientific information and translation of research into practice.
2. Demonstrate beliefs, values, attitudes and behaviors consistent with the professional dietitian nutritionist level of practice.
3. Develop and deliver information, products and services to individuals, groups and populations.
4. Apply principles of strategic management and systems in the provision of services to individuals and organizations.

Admissions

Admission is based on a selective process. In addition to Loma Linda University (p. 24) and School of Allied Health Professions (p. 47) admissions requirements, the applicant must also complete the following requirements:

- have a G.P.A. of 3.0 or above (science and nonscience)
- complete an interview (by phone or in person)
- complete program prerequisites

Listed below are the required admission and prerequisite requirements to obtain a bachelor's degree from Loma Linda University.

Prerequisites

**Humanities**

<table>
<thead>
<tr>
<th>Humanities</th>
<th>20 quarter credits or 14 semester units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select a minimum of three areas from the following: history, literature, philosophy, foreign language, art/music appreciation, or art/music history</td>
<td></td>
</tr>
</tbody>
</table>

**Natural sciences**

<table>
<thead>
<tr>
<th>Natural sciences</th>
<th>12 quarter units minimum</th>
</tr>
</thead>
<tbody>
<tr>
<td>College algebra or higher</td>
<td></td>
</tr>
</tbody>
</table>

Affiliation and practicum units are required in addition to the didactic units listed above.

Affiliation and practicum

<table>
<thead>
<tr>
<th>Affiliation and Practicum</th>
<th>Total Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>DTCS 778 Clinical Nutrition Affiliation (6, 12)</td>
<td>12</td>
</tr>
<tr>
<td>DTCS 795 Nutrition and Dietetics Graduate Practicum</td>
<td>12</td>
</tr>
</tbody>
</table>

Normal time to complete the program

One (1) year (three [3] academic quarters) of undergraduate preparatory work plus two (2) years (eight [8] academic quarters) of graduate course work at LLU — based on full-time enrollment. Part time permitted.
Anatomy and physiology with laboratory, complete sequence (two terms)
General chemistry with laboratory, 2 semesters/3 quarters required.
Microbiology with laboratory

Social sciences
12 quarter units minimum  12
Psychology elective (one course minimum)
Sociology elective (one course minimum)
Social Science elective: Anthropology, Economics, Geography, Political Science, Psychology or Sociology

Communication
9 quarter units minimum  9
English composition, complete sequence

Speech

Health and wellness
2 quarter units minimum  2
Two physical activity courses

Human nutrition

Total Units  55

Total minimum units required: 96 quarter units (64 semester units)
For total unit requirements for graduation, see LLU General Education Requirements (p. 28).

Total Units: 110

* Registered twice to fulfill unit requirement

Normal time to complete the program
Four (4) years total — two (2) years (seven [7] academic quarters) at LLU — based on full-time enrollment; part time permitted

Nutrition and Dietetics — B.S. and M.S.

Students desiring an M.S. degree in nutrition and dietetics who do not have a bachelor’s degree may take this three-year course of study at Loma Linda University. The first two years of the curriculum offer the opportunity to complete a bachelor’s degree and take the registration examination at the end of this time period in order to become an RD (registered dietitian). The student completes the master's degree during the third year—having enhanced his or her skills by completing additional graduate didactic courses.

Program learning outcomes

By the end of this program, the graduate should be able to:

1. Integrate scientific information and translation of research into practice.
2. Demonstrate beliefs, values, attitudes and behaviors consistent with the professional dietitian nutritionist level of practice.
3. Develop and deliver information, products and services to individuals, groups, and populations.
4. Apply of principles of strategic management and systems in the provision of services to individuals and organizations.
5. Plan, process and perform nutrition-related research while protecting the public.
6. Demonstrate ability to translate evidence-based literature into formats lay public can understand, including use of videos, writing articles, and counseling.
7. Evaluate emerging trends in nutrition and give competent, evidence-based answers to the public.
8. Use metabolic pathways to determine patient and client nutritional needs.

Admissions

Admission is based on a selective process. In addition to Loma Linda University (p. 24) and School of Allied Health Professions (p. 47) admissions requirements, the applicant must also complete the following requirements:

• have a 3.0 G.P.A. or above (science and non-science)
• complete an interview (by telephone or in person)
• complete program prerequisites

See course listing for B.S. degree prerequisites (p. 98). Total minimum units required upon entrance: 96 quarter units (64 semester units).
## Program requirements

For total unit requirements for graduation for the B.S. degree, see Division of General Studies, LLU General Education Requirements (p. 28) (Section II).

1 Registered twice to fulfill unit requirement

2 Affiliation and practicum units do not count toward minimum didactic units required for the degree.
Department of Occupational Therapy

Transforming lives through occupation, service, and advocacy.

Through the therapeutic use of everyday activities or occupations, occupational therapists help people across the lifespan—from infancy through older adults—to participate in the things they want and need to do. Common occupational therapy interventions include helping children with disabilities to participate fully in school and social situations, helping people recovering from injury to regain skills, and providing support for older adults experiencing physical and cognitive changes. Practice settings are diverse—hospitals, schools, behavioral health clinics, outpatient clinics, and community sites with at-risk youth and survivors of domestic violence.

Occupational therapy services may include comprehensive evaluations of the client’s home and other environments (e.g., workplace, school), recommendations for adaptive equipment and training in its use, and guidance and education for family members and caregivers. Occupational therapy practitioners have a wholistic perspective focusing on adapting the environment to fit the person, considering the person as an integral part of the therapy team.

Following the mission of this University, students immerse themselves in the community, exploring emerging areas of practice including: aging, at-risk youth, domestic violence settings, lifestyle medicine, obesity, and trauma-exposed children.

Opportunities

Occupational therapy is an exciting field with its broad population areas and diverse settings. The American Occupational Therapy Association has identified eight areas of focus: children and youth, evidence-based practice, health and wellness, mental health, productive aging, rehabilitation, disability, and participation; work and industry.

Occupational therapy fosters entrepreneurship that promotes health and wellness and meaningful occupational participation. Occupational therapists are moving into areas such as health promotion, obesity, telehealth, and domestic violence.

Professional associations

Students are eligible for membership in the American Occupational Therapy Association and Occupational Therapy Association of California—two organizations that foster development and improvement of service and education. Students are encouraged to become members, read the journal, and attend local professional meetings. The national association address is: American Occupational Therapy Association, 4720 Montgomery Lane, Bethesda, MD 20814-3449. Website: <http://www.aota.org>; telephone: 800/729-2682. The state association address is: Occupational Therapy Association of California, P.O. Box 276567, Sacramento, CA 95827-6567. Website: <http://www.otaonline.org>; telephone: 888/686-3225.

Occupational Therapy (entry level) — M.O.T.

Program director
Heather A. Javaherian-Dysinger

Academic fieldwork coordinator
Aaron Moesser
Transforming lives through occupation, advocacy, and service. Loma Linda University’s Department of Occupational Therapy’s mission aims to graduate compassionate, service-oriented leaders who demonstrate excellence and integrity to advance practice and facilitate occupational engagement among individuals, communities, and societies. Graduates will demonstrate critical thinking, leadership, and service to wholistically promote health and occupational justice. The engaged educational process will transform students into compassionate practitioners, advocates, and visionaries who utilize research and evidence-based practice to meet the needs of our changing society.

Curricular threads: transformative nature of occupation; evidence-based practice and research; health, lifestyle, and wellness; and service-learning; advocacy, justice, and civic responsibility.

Clinical experience
Aligning with the unique mission of Loma Linda University, our students have the opportunity to experience fieldwork in community practices and emerging areas, as well as traditional sites. Students will participate in two Level I fieldwork experiences, exposing them to different areas of practice to observe and begin building an understanding of occupational therapy practice. Students participate in service-learning projects using their skills to create and implement programs for community partners. Each student then completes two Level II fieldwork experiences. The fieldwork coordinator works with the student to arrange the fieldwork sites. Students are responsible for their own transportation and must complete the fieldwork within twenty-four months of the didactic course work. Students must also complete a background check and any specific facility requirements prior to beginning fieldwork.

CPR certification
Students are required to have current adult and child cardiopulmonary resuscitation (CPR) certification for all scheduled clinical experience. All CPR certifications must be completed at a health-care provider level and accredited through the American Heart Association. Classes are available on campus at Life Support Education, University Arts building, 24887 Taylor Street, Suite 102.

Immunizations
For all scheduled fieldwork experience, students are required to have immunizations for MMR, TDAP, hepatitis B series, varicella; and a yearly tuberculosis test.

Program goals
1. Graduate experts in the therapeutic use of occupation and theory to envision possibilities and transform lives and communities through service and advocacy. Measured through program learning outcomes 1, 2, 3, 4.
2. Describe the importance of balancing areas of occupation with the achievement of health and wellness for the clients in a holistic perspective.
3. Design occupation-based intervention plans and strategies (including goals and methods to achieve them) on the basis of the stated needs of the client, and data gathered during the evaluation process in collaboration with the client and other health professionals.
4. Use scholarly literature to make evidence-based decisions.

Professional registration and certification
Upon satisfactory completion of the occupational therapy entry-level M.O.T. degree, including completion of Level II fieldwork within 24 months of completion of academic preparation, and upon recommendation of the faculty, the graduate is eligible to take the national certification examination administered by the National Board for Certification in Occupational Therapy (NBCOT). The board offers computerized examinations on demand throughout the year. After successful completion of this examination, the individual will be a registered occupational therapist (OTR).

Many states require licensure in order to practice. The student should consult the Occupational Therapy Board for the state in which s/he plans to practice. The American Occupational Therapy Association provides recognition essential to the practice of occupational therapy in the United States and most foreign countries.

When the graduate applies to write the certification examination with NBCOT, s/he will be asked to answer questions related to the topic of felonies. Felony convictions may affect a candidate’s ability to sit for the national certification examination or obtain state licensure. For further information on these limitations, contact NBCOT at 12 South Summit Avenue, Suite 100, Gaithersburg, MD 20877-4150; telephone: 301/990-7979; website: <nbcot.org (http://www.nbcot.org)>.

Graduates practicing in the state of California must acquire licensure from the California Board of Occupational Therapy. For further information, contact CBOT at 916/263-2294; e-mail: <cbot@dca.ca.gov>. The office address is 2005 Evergreen Street, Suite 2050, Sacramento, CA 95815-3831.

Accreditation
The Master of Occupational Therapy Program was re-accredited in May 2013 with a full 10-year accreditation status through May 2023. The program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE), c/o Accreditation Department, American Occupational Therapy Association (AOTA), 4720 Montgomery Lane, Bethesda, MD 20814-3449; telephone: 301/652-2682; website: <www.acoteonline.org (http://www.acoteonline.org)>.

Admissions
Admission is based on a selective process. In addition to Loma Linda University (p. 24) and School of Allied Health Professions admissions requirements (p. 47), the applicant must also complete the following requirements:

- Earned a prior bachelor’s degree in any major from an accredited college or university.
- Complete program prerequisites no later than December of the year prior to submission of an application.
• Complete observation experience—a minimum of 40 hours of documented observation in occupational therapy settings is required before application will be considered for admission.

**Prerequisites**
The applicant must complete the following subject requirements at an accredited college or university:

- Human anatomy*
- Human physiology*
- Human lifespan development
- Statistics*
- Medical terminology

* These courses must have been taken within 5 years prior to application to our program.

**Normal time to complete the program**

Three (3) years (11 academic quarters) — full-time enrollment required

**Occupational Therapy — O.T.D.**

**Program director**

Julie D. Kugel

The Doctor of Occupational Therapy degree curriculum provides occupational therapists an opportunity to further their education through its flexible online format. The online community fosters learning and professional growth through creative learning experiences, critical reflections, and discussions.

Course work includes emphasis on spirituality, diversity, critical reasoning, advocacy, participation, education, and research. The capstone project is individually designed by the student, allowing him/her to creatively explore new areas of practice and to engage in innovative research and programming.

The intensive track is designed for students who want to complete the post-professional program as full-time students rather than as a part-time sequence, completing the program in six as opposed to nine quarters.

**Program learning outcomes**

By the end of this program, the graduate should be able to:

1. Interact with and serve the community by promoting health and the integration of mind, body, and spirit.
2. Contribute to the profession’s body of knowledge through written dissemination of research and oral presentations.
3. Advocate for the profession, client, and those in need through participation in community and professional organizations.
4. Commit to lifelong learning through disciplined advancement of knowledge and participation in professional activities.

Admissions

If you live in a state that has regulatory requirements for online education, please check if Loma Linda University is able to accept residents of your state for online education. You may check online at http://www.llu.edu/central/assessment/distance-education.page? or contact the Admissions office for School of Allied Health Professions, 800/422-4558.

Admission is based on a selective process. In addition to Loma Linda University (p. 24) and School of Allied Health Professions (p. 47) admissions requirements, the applicant must also complete the following requirements:

• Must have earned a master in occupational therapy degree or another related field. Applicants may have a bachelor’s degree in occupational therapy and a master’s degree in occupational therapy or another related field, or they may have a bachelor’s degree in a related field and a master’s degree in occupational therapy.
• Minimum graduate G.P.A. of 3.0.
• Six months of professional practice.
• Applicants from the United States must be certified by the National Board of Certification in Occupational Therapy (NBCOT).
• Applicants from other countries must submit verification of licensure and certification in occupational therapy.

The applicant’s recommendations, interview, personal statement, and work experience are also considered in the admissions screening process.

Normal time to complete the program

2.67 years (nine [9] academic quarters) — based on less than full-time enrollment
Department of Orthotics and Prosthetics

Chair
Johannes Schaeppe

Primary faculty
Heather Appling
Michael Davidson
Ralph Ibarra
Aileen Kingsley
Michael Moor
Johannes Schaeppe

Program
• Orthotics and Prosthetics — M.S.O.P. (Entry Level) (p. 107)

Orthotics and Prosthetics — M.S.O.P. 
(Entry Level)

Program director
Heather Appling

The entry-level Master of Science in Orthotics and Prosthetics (M.S.O.P.) degree is for individuals who wish to enter the profession of orthotics and prosthetics at the 2012 NCOPE-mandated level. The professional course work at this University is 10 quarters, which includes a quarter of 500 hours of clinical affiliation supervised by the professional development committee.

The curriculum for the entry-level Master of Science in Orthotics and Prosthetics degree is designed to provide the student with the knowledge, behaviors, and skills required for entry into the clinical practice of orthotics and prosthetics residency according to NCOPE’s published 2010 standards of the profession.

Students who enter with a previous bachelor’s degree will be granted the Master of Science Orthotics and Prosthetics degree upon completion of the curriculum. Students who enter the program without a previous bachelor’s degree will be granted a Bachelor of Science degree in health sciences and a Master of Science in Orthotics and Prosthetics degree upon completion of the curriculum.

Professional association

Students and graduates are eligible for membership in the American Academy of Orthotics and Prosthetics (AAOP). The objective of the association is to foster development and improvement of service and education. This organization grants student membership at a nominal cost to students of approved schools. The student is required to become a member of this association while in the program, and is encouraged to read the Journal of Orthotics and Prosthetics and attend AAOP-sponsored or AAOP-approved local or national meetings.

Professional practice requirements

Satisfactory completion of entry-level M.S.O.P. degree curriculum requirements qualifies the student to enter an NCOPE-accredited residency site of his/her choice. After completing a 12-month prosthetic and a 12-month orthotic residency, or an 18-month combined ortho-prosthetic residency, the resident then is eligible to sit for the certification examination offered by the American Board of Certification in Orthotics and Prosthetics (ABC). Passing the ABC examination will earn certification in orthotics, certification in prosthetics, or dual certification as a prosthetist-orthotist. In addition to the certification, and depending on the state where the certified practitioner intends to practice, it may be necessary for the student to pass a state licensure examination in order to practice his or her profession.

Clinical experience

Supervised clinical experience is obtained in a variety of settings during the program through clinical rotations and weekly grand rounds. These ongoing, weekly clinical rotations are an essential part of a student’s academic and professional requirements and prepare the student for the 10th quarter clinical affiliations required for the completion of the entry-level M.S.O.P. degree curriculum.

All clinical assignments will be made by the academic coordinator for clinical education. Because of the limited number of local facilities available, assignments cannot be made on the basis of the student’s family/marital status or personal preferences. Although the department makes an effort to accommodate the student’s preference, the student agrees to accept the clinical assignments made by the department at any of the affiliated facilities.

Program learning outcomes

By the end of this program, the graduate should be able to:

1. Exercise keen insight, progressive care, and critical judgment through careful evaluation in clinical care, skills application, and thinking throughout the profession.
2. Adhere to guiding principles and recognized ethics of the profession.
3. Value and apply new technology, investigations, and knowledge to patient care and the profession through a commitment to discovery and education.
4. Examine the importance of embracing and serving the unmet and ever-changing needs of a diverse world.
5. Participate in teamwork within and across disciplines in all aspects of the profession.

Accreditation

Accreditation for the entry-level Master of Science in Orthotics and Prosthetics degree was granted on September 23, 2013, by the National Commission on Orthotic and Prosthetic Education (NCOPE), 330 John Carlyle Street, Suite 200, Alexandria, VA 22314; telephone: 703/836-7114; website: <http://www.ncope.org/> in collaboration with the Commission on Accreditation of Allied Health Education Programs (CAAHEP), 25400 U.S. Highway 19 North, Suite 158, Clearwater, FL 33763; telephone: 727/210-2350, website: <https://www.caahep.org/>.

Admissions

Admission is based on a selective process. In addition to Loma Linda University (p. 24) and School of Allied Health Professions admissions requirements (p. 47), the applicant must also complete the following requirements:

• must have completed a minimum of 64 semester or 96 quarter credit units at a regionally accredited college or university
• a minimum G.P.A. of 3.0 in both science and non-science courses.
• It is also advisable for the student to complete 80 hours of volunteer field experience at an orthotics and prosthetics facility of his or her choice, and to obtain a letter of attestation from the facility owner or clinical supervisor.

The following prerequisites and general education courses will provide the knowledge, behavior, and skills required of students in a professional curriculum in the orthotics and prosthetics program. Individuals who already have an earned bachelor’s degree in any field from a regionally accredited institution need to complete only the prerequisites denoted with an asterisk (*).

The minimum subject admission requirements are listed below.

Note: Grades of C- and below are not transferable for credit.

**Domain 1: Religion and Humanities (20 quarter/14 semester units, minimum)**

*Humanities (14 quarter/10 semester units minimum)*

Humanities to include one course in each of the following areas: history, philosophy, and a third area selected from the following.

- Fine arts
- Literature
- Modern language
- Performing/visual arts (not to exceed four quarter units)

**Religion**

Religion is required only if a student attended a Seventh-day Adventist college or university for a portion of his/her prerequisites—four quarter units of religion per year. A maximum of eight quarter units may apply toward Domain I.

**Domain 2: Scientific Inquiry and Analysis**

Encompasses both the natural and social sciences.

**Natural Sciences—All courses are required, credits may vary**

*Human anatomy with laboratory

*Physiology

*Chemistry with laboratory

*Physics with laboratory

*Statistics

**Social Sciences—Required (12 quarter/8 semester units, minimum)**

General psychology

*Growth and developmental or abnormal psychology

**Domain 3: Communication (9 quarter/6 semester units, minimum)**

**English**

Complete sequence in English composition that meets the baccalaureate degree requirements

One course in basic communication skills (speech)

**Domain 4: Health and Wellness (3 quarter/2 semester units, minimum)**

Two activity courses in physical education

**Domain 5: Electives**

Courses in Domain 5: Electives can be used to meet the minimum number of units (96 quarter/64 semester units) required for admission.

* Individuals who have received a bachelor’s degree from a regionally accredited college or university need to complete only the prerequisites denoted with an asterisk (*).

For total unit requirements for graduation, see LLU General Education Requirements (p. 28).

Lisa Ewan
Frank Holder
Carrie Kresser
Adam Smith
Steven Snitzer

The physical therapist assistant (PTA) is a skilled paraprofessional health-care provider who implements the plan of care for patients under the direction and supervision of a licensed physical therapist. Following established procedures, the PTA may train patients in exercises and activities of normal daily living; perform treatment interventions; utilize special equipment; assist in performing tests, data collection, and complex treatment procedures; and observe and document the patient’s responses.

Physical therapists and PTAs may serve as part of a rehabilitation team—including occupational therapists, nurses, speech and hearing therapists, respiratory therapists, recreational therapists, physicians, social workers, chaplains, vocational counselors, dietitians, and psychologists. This team has as its objective the optimum functional restoration and rehabilitation of patients disabled by illness or injury.

Opportunities

Physical therapy offers a career for men and women who are interested in medical science and who enjoy working with people. Graduates have a wide range of opportunities in hospitals, rehabilitation centers, outpatient clinics, national and state agencies, and school systems. For those who
desire to further their educations, the Doctor of Physical Therapy and the Doctor of Physical Therapy Science degrees are available.

The program
The Physical Therapist Assistant Program, which begins with the sophomore year and lasts for 15 months, leads to the Associate in Science degree and professional licensure. Instruction begins in June of the current year and students participate in graduation ceremonies the following June. Program completion occurs when clinical performance requirements are met—typically by the end of September.

Clinical learning experiences
The program includes supervised, one-on-one clinical instruction across the human lifespan in a variety of settings, including acute and sub-acute inpatient facilities and outpatient clinics. Students complete three, six-week, full-time clinical experiences. All clinical experiences are coordinated and monitored by the director of clinical education or the program director. Although the program makes an effort to accommodate each student’s preference, the student agrees to accept the clinical assignment made by the program at any of the affiliated facilities, whether local or out of state. Because of the limited number of local facilities available, assignments cannot be made on the basis of the student’s family/marital status or personal preference.

Transportation
Students are required to have their own transportation to and from clinical sites.

CPR certification
Students are required to hold current certification in adult, child, and infant cardiopulmonary resuscitation (CPR) during all scheduled clinical experiences. Basic life-support CPR certification for health-care providers must be completed via the American Heart Association. Certification may be completed prior to beginning the program of study or may be obtained at Loma Linda University. Classes are available on campus at Life Support Education, University Arts building, 24887 Taylor Street, Suite 102, Loma Linda, California.

Professional licensing
Satisfactory completion of the clinical affiliations and degree requirements will qualify the student for the National Physical Therapy Examination (NPTE) for physical therapist assistants. State licensure or certification is required to practice as a PTA in all 50 states and in the District of Columbia. Information about licensing or certification in the state in which one wishes to practice can be found online at <http://www.apta.org/licensure>.

Professional association
Students and graduates are eligible for membership in the American Physical Therapy Association. The objectives of the association are to foster the development and improvement of service and education. This organization grants student membership at a nominal cost to undergraduates of approved schools. The student is required to become a member of this association while in the program. The national office of the American Physical Therapy Association is at 1111 North Fairfax Street, Alexandria, VA 22314.

Program philosophy statement
In accordance with the motto of Loma Linda University—“To make man whole”—and the mission of the School of Allied Health Professions—“To continue the teaching and healing ministry of Jesus Christ,” the program is committed to the highest development of the physical, emotional, mental, and spiritual capacities of its faculty and students. Promoting wholeness constitutes a caring commitment to the well-being of others, to students, and to program personnel; to active engagement in the advancement of the profession; and to a living consecration to God. Students in this program will have opportunities to develop a commitment to excellence in service for others and their profession and to develop a biblically-informed faith and a commitment to lifelong spiritual growth.

Program mission
The Physical Therapist Assistant Program affirms the mission and values of Loma Linda University and the School of Allied Health Professions by providing an educational program that prepares physical therapist assistants with balanced intellectual development, social skills, competent practice, and spiritual connection.

Program goals
In order to achieve the mission of the Physical Therapist Assistant Program, the program aims to:

1. Provide technical-level physical therapy education for the PTA that culminates in an Associate in Science degree.
2. Prepare graduates ready to provide physical therapy interventions and services under the direction and supervision of licensed physical therapists in a variety of settings.
3. Prepare graduates for service who demonstrate ethical behavior consistent with legal and professional standards.
4. Provide opportunities for students to gain compassionate insight into practices and behaviors found in a variety of ethnic and cultural backgrounds within an atmosphere of respect for differences.
5. Provide opportunities for graduates to consider the concept of wholeness when addressing the needs of the patient/client in terms of physical, mental, and spiritual concerns.
6. Prepare graduates to communicate effectively with patients/clients and families, when appropriate; with colleagues; and with other members of the health-care delivery team.
7. Maintain compliance with the Standards and Required Elements for accreditation of PTA educational programs published by the Commission on Accreditation in Physical Therapy Education.

Program learning outcomes
Upon completion of the program, the graduate should be able to:

1. Demonstrate clinical competence: provision of physical therapy interventions and services under the direction and supervision of licensed physical therapists in a variety of settings.
2. Demonstrate effective written and oral communication skills.
3. Demonstrate critical-thinking and problem-solving skills.
4. Exhibit the values and attitudes of an entry-level physical therapist assistant: altruism, compassion, competence, duty, integrity, collaboration, and responsibility.
Accreditation
The Physical Therapist Assistant Program at Loma Linda University is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE), 1111 North Fairfax Street, Alexandria, VA 22314; 703/ 706-3245 or 703/ 706-3245; e-mail: accreditation@apta.org; website: http://www.capteonline.org.

Admissions
Admission is based on a selective process. In addition to Loma Linda University (p. 24) and School of Allied Health Professions admissions requirements (p. 47), the applicant must also complete the following requirements:

• a minimum G.P.A. of 2.50 in the three basic science prerequisite courses and a minimum G.P.A. of 2.50 in the remaining non-science prerequisite courses
• transfer of prerequisite courses from a regionally-accredited academic institution (college or university) Note: Grades below C are not transferable for credit.
• a personal interview
• a writing assessment done at the time of the interview
• documentation of work or observation experience; specifically, at least 20 hours of work or observation in an inpatient physical therapy setting and at least 20 hours in an outpatient physical therapy setting, plus additional work/observation hours in either an inpatient or an outpatient physical therapy setting for a minimum total of 80 hours.

Prerequisites
All prerequisite courses must be completed prior to entering the program.
An application for admission may be submitted while some coursework is in progress if the student expects to complete the required coursework before the program begins. Individuals who have earned a bachelor’s degree from a regionally-accredited college or university need to complete only the courses denoted with an asterisk (*):

Humanities: Four units from one of the topics listed; history, literature, philosophy, foreign language, art/music appreciation/ history

*Human anatomy and physiology, complete sequence with laboratory components (preferred); or general biology, complete sequence with laboratory components (accepted)
*Introductory physics with laboratory component, one quarter/semester
*Two years high school mathematics with grades C or above, or intermediate algebra in college or a college statistics course
*General psychology
*Human growth and development or developmental psychology or abnormal psychology
English composition, complete sequence
*Speech (preferred) or Interpersonal communication (accepted)
Personal health/nutrition, or two physical education/activity courses
*Medical terminology

If needed, elective courses may be taken to meet the minimum total requirements of 48 quarter units or 32 semester units

Total Units: 72

A minimum grade of C (2.0) is required for all courses in the program.

Normal time to complete the program
1.33 years (Five [5] academic quarters) at LLU. Full-time enrollment is typical; half-time enrollment (3.25 years) by permission only.

Physical Therapy — D.P.T. (Entry Level), D.P.T. (Postprofessional), D.Sc., Ph.D.

Physical therapists are highly educated, licensed health-care professionals who provide services to patients/clients who have impairments, disabilities, or changes in physical function and health status as a result of injury, disease, or other causes.

Physical therapists teach patients how to prevent injury or disability and manage their conditions so that they will achieve long-term health benefits. They examine each individual and develop a plan, using treatment techniques to promote the ability to move, reduce pain, restore...
function, and prevent disability. In addition, physical therapists work with individuals to prevent the loss of mobility before it occurs by developing fitness- and wellness-oriented programs for healthier and more active lifestyles.

Physical therapists provide care for people in a variety of settings, including hospitals, private practices, outpatient clinics, home-health agencies, schools, sports and fitness facilities, work settings, and skilled nursing facilities. State licensure is required in each state in which a physical therapist practices.

In addition to the Associate in Science degree (PTA, found in the previous section of the CATALOG), the program options within the Department of Physical Therapy include:

- entry-level Doctor of Physical Therapy
- postprofessional Doctor of Physical Therapy
- Doctor of Science
- Doctor of Philosophy

Programs

- Physical Therapy — D.P.T. (Entry Level) (p. 113), D.P.T. (Postprofessional (p. 114)) (p. 112), D.Sc. (Postprofessional), Ph.D. (p. 117)

Physical Therapy — D.P.T. (Entry Level)

Program director
Lawrence E. Chinnock

Academic coordinator of clinical education
Theresa Joseph

The entry-level Doctor of Physical Therapy (D.P.T.) degree is for individuals who have no previous degree in physical therapy or who have an associate degree in the field of physical therapy. The D.P.T. degree curriculum lasts for three years. Individuals must have an earned bachelor degree in any field prior to entering the program.

Clinical experience

Supervised experience is obtained in a variety of settings and at different times during the course of study. First-year students complete a two-week clinical assignment during the Spring Quarter. Second-year students complete a four-week clinical assignment following the Spring Quarter. The major clinical assignments are required during the third year. The student will be assigned affiliation as follows: 10 weeks during the Summer Quarter, 11 weeks during the Winter Quarter, and 10 weeks during the Spring Quarter. The academic coordinator of clinical education or a designee plans and schedules all clinical assignments. Because of the limited number of local facilities available, assignments cannot be made on the basis of the student’s family/marital status or personal preference. Although the department makes an effort to accommodate the student’s preference, the student agrees to accept the clinical assignments made by the department at any of the affiliated facilities, whether local or out of state. Students should expect that at least one rotation will be beyond commuting distance from Loma Linda University. Many clinical sites will require the student to have a current flu vaccine if the rotation is during the flu season. Therefore, the University requires that all students receive the flu vaccine on a yearly basis.

Program learning outcomes

Upon completion of the degree, the graduate should be able to:

1. Conduct a safe and effective physical therapy practice.
2. Demonstrate, compassion and respect during interactions with individuals from different ethnic and cultural backgrounds.
3. Think critically and integrate evidence-based practice into their clinical decision-making skill set.
4. Apply ethical and legal parameters surrounding the profession of physical therapy.
5. Provide evidence-based clinical care utilizing collaborative relationships among the patient, physical therapist, and other health-care practitioners.
6. Make use of effective verbal and nonverbal communication with instructors, classmates, and clinical personnel as needed to work effectively as a member of a health-care team.

Professional association

Students and graduates are eligible for membership in the American Physical Therapy Association (APTA). The objective of the association is to foster development and improvement of service and education. This organization grants student membership at a nominal cost to students in member schools. The student is required to become a member of this association while in the program, and is encouraged to read the journal and attend the APTA-sponsored meetings.

Professional registration

Satisfactory completion of the entry-level D.P.T. degree requirements qualifies the student to sit for the National Physical Therapy Examination. Information about the state registries of physical therapists can be obtained at the office of the department chair. All states require that a physical therapist pass the national qualifying examination for license to practice. California application form and fee are submitted to the California application form and fee are submitted to the Physical Therapy Board of California, 2005 Evergreen Street, Suite 1350, Sacramento, CA 95815; website: <http://www.ptbc.ca.gov/>.

Accreditation

The entry-level Doctor of Physical Therapy Program at Loma Linda University is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE), 1111 North Fairfax Street, Alexandria, Virginia 22314; Telephone 703-706-3245; Email: accreditation@apta.org; website: <http://www.capteonline.org>.

Admissions

Admission is based on a selective process. Criteria used include: G.P.A., completion of subject requirements, interview, and recommendations. In addition to Loma Linda University (p. 24) and School of Allied Health Professions (p. 47) admissions requirements, the applicant must also complete the following requirements:

- an earned Bachelor degree in any field from a regionally accredited institution
- a minimum prerequisite G.P.A. of 3.4
- anatomy and physiology, complete sequence with laboratory
- general chemistry, complete sequence with laboratory
• general physics, complete sequence with laboratory
• two additional biological science courses (e.g. cell biology, microbiology, exercise physiology, upper division anatomy and/or physiology)
• statistics
• medical terminology
• general psychology
• human growth and development (developmental psychology, child psychology)
• one course in basic communication (speech)
• work/observation experience—A minimum of 80 hours of work / observation experience is required prior to beginning the degree. Of the 80 hours, a minimum of 20 hours must be in an inpatient physical therapy setting and a minimum of 20 hours must be in an outpatient physical therapy setting.

Technology requirement
Students are required to have an iPad that can be brought to class with them as the majority of quizzes and tests are completed on the device. A $65 technology fee is charged each year.

Normal time to complete the program
Three (3) years (12 academic quarters) — full-time enrollment required

Physical Therapy – D.P.T. (Postprofessional)

Program director
Everett B. Lohmann III

The postprofessional Doctor of Physical Therapy (PP-D.P.T.) degree is designed for the individual with a degree in physical therapy who wishes to pursue advanced studies in the profession. This program is also offered on the campus of Universidad Adventista de las Antillas located in Mayagüez, Puerto Rico.

Two tracks lead to the postprofessional Doctor of Physical Therapy degree:
The 66-unit track is designed for the individual with a bachelor’s degree in physical therapy from an accredited program or who has the equivalent of a U.S. bachelor’s degree in physical therapy.

The 45-unit track is designed for the individual with a bachelor’s degree in physical therapy from an accredited program or who has the equivalent of a U.S. bachelor’s degree in physical therapy and has earned a master’s degree.

### Technology requirement

Students are required to have an iPad for the courses in the orthopaedic and neurology tracks, as well as for testing activities in all courses. It is highly recommended that students have access to a personal computer (minimum: 800 MHz multimedia) with Internet access (minimum: 56 k.b.p.s. [connected at 44+ k.b.p.s.]). A $65 technology fee is charged in year one for the 45-unit track and years one and two for the 66-unit track.

### Program learning outcomes

In addition to the stated institutional learning outcomes (p. 19), by the end of this program, the graduate should be able to:

1. Demonstrate a commitment to discovery.
2. Apply basic sciences to physical therapy practice.
4. Select best practice and examination techniques based on scientific evidence.

### Admissions

Admission is based on a selective process. In addition to Loma Linda University (p. 24) and School of Allied Health Professions (p. 47) admissions requirements, the applicant must also complete the following requirements:

- must have earned a bachelor’s degree in physical therapy from an accredited program or have the equivalent of a four (4) year U.S. bachelor’s degree in physical therapy
- must have earned a master’s degree (45-unit track only).
- upon evaluation of transcripts, additional corequisites may be required, and sequencing of courses may be modified.

There is no GRE requirement for acceptance into this program.

Physical Therapy — D.Sc. (Postprofessional)

Program director
Everett B. Lohmann III

Closed to admissions.

The Doctor of Science Program is a research-oriented doctoral degree designed for the physical therapist who wishes to pursue advanced studies in the area of education, research, basic science, and advanced clinical practice. To be eligible for admission, the applicant must have a Bachelor of Science degree in physical therapy earned from an accredited program or the equivalent of a U.S. bachelor’s degree in physical therapy, and an earned master’s degree. Upon evaluation of transcripts, additional corequisites may be required; and sequencing of courses may be modified. There is no GRE requirement for acceptance; however, successful completion of a comprehensive written examination is required in order to advance to candidacy. A written dissertation and a defense of such are required. Upon completion of the curriculum, the diploma will be awarded by the School of Allied Health Professions in conjunction with the Faculty of Graduate Studies.

Research funding

Each student will be required to perform one or more research projects in partial fulfillment of the requirements for the Doctor of Science degree in physical therapy. The typical costs for student research projects range from $1,500 to $10,000. The physical therapy department will cover the first $1,500 of approved research expenses. The student and/or his/her sponsor will be required to cover any research-related expenses over this amount. When necessary, the program director and dissertation chair will assist the student in attempting to secure funding for unmet research expenses.

Program learning outcomes

In addition to the stated institutional learning outcomes (p. 19), by the end of this program, the graduate should be able to:

1. Demonstrate a commitment to discovery.
2. Apply the basic sciences to physical therapy practice.
3. Provide physical therapy care and education to the larger world population
4. Provide advanced patient-specific physical therapy care.
5. Serve as mentors and educators.

Admissions

Admission is based on a selective process. In addition to Loma Linda University (p. 24) and School of Allied Health Professions (p. 47) admissions requirements, the applicant must also complete the following requirements:

• a Bachelor of Science degree in physical therapy earned from an accredited program or the equivalent of a U.S. bachelor’s degree in physical therapy
• an earned master’s degree.
• upon evaluation of transcripts, additional corequisites may be required; and sequencing of courses may be modified.

There is no GRE requirement for acceptance

Electives
Choose 12 units from the following: 12

AHJC 528 Lifestyle Health and Wholeness 2
PTGR 500 Integrative Approach to Early Rehabilitation
PTGR 501 Advanced Orthopaedic Specialty Tracks 2
PTGR 503 Medical Documentation and Billing
PTGR 504 Science and Biomechanics of the Fascia and the Art of Myofascial Release 2
PTGR 507 Advanced Pediatric Clinical Practice
PTGR 515 Cardiopulmonary Approaches to Assessment, Wellness, and Disease 2
PTGR 518 Topics in Rehabilitation 2
PTGR 519 Home Health Physical Therapy for the Post-Acute Patient
PTGR 524 Women’s Health Issues 2
PTGR 529 Integumentary and Lymphatic Systems: Evaluation and Intervention

Total Units 66

1 In lieu of AHJC 519, students in Puerto Rico register for 3 units of AHRM 605 Critical Analysis of Scientific Literature instead of 2 units.
2 Available to both on-campus students and those attending the Puerto Rico site.

Normal time to complete the program
1.5 years (six 6 academic quarters) — based on full-time enrollment

Technology requirement

Students are required to have an iPad for the courses in the orthopaedic and neurology tracks, as well as for testing activities in all courses. It is highly recommended that students have access to a personal computer (minimum: 800 MHz multimedia) with Internet access (minimum: 56 k.b.p.s. [connected at 44+ k.b.p.s.]). A $65 technology fee is charged in years one and two.

Physical Therapy — D.Sc. (Postprofessional)
The Department of Physical Therapy offers the Doctor of Philosophy (Ph.D.) degree in physical therapy. This research-oriented program for physical therapists emphasizes pain and movement sciences and lifestyle health and wellness as it prepares graduates for research, teaching, and administration. Successful completion of a comprehensive written examination, written dissertation, and an oral defense of the dissertation are required. The diploma will be awarded upon completion of the curriculum and recommendation by the School of Allied Health Professions in conjunction with the Faculty of Graduate Studies.

Program Description

Designed for the working professional, the Ph.D. in physical therapy synergizes with the University’s Motto, “To Make Man Whole.” Physical therapists who are currently treating or teaching will benefit from a modern, evidence-based curriculum aimed at caring for the whole person. Face-to-face classes, two evenings a week, facilitate the balance of work and study. Aligned closely with our core values, this program provides physical therapy graduates with the skills and experience necessary to pursue careers as researchers and educators.

It is the goal of the program to prepare graduates with:

- Skills to design and conduct novel, original research; provide evidence of an understanding of research design and the ability to formulate and develop methodologies; collect and reduce data; interpret results; draw defensible conclusions; and effectively disseminate research findings;
- Qualities of lifelong learning and commitment to scholarship after graduation;
- Skills to add to the body of knowledge in physical therapy research literature through publications and presentations;
- Ability to demonstrate a commitment to conducting research in neurology, orthopaedics, pain science, movement science, or lifestyle health and wellness;
- Ability to demonstrate a commitment to providing whole person care;
- Skills to serve as an educator in entry-level, post-professional and graduate-level physical therapy programs;
- Ability to demonstrate personal and group leadership skills at institutional, professional, national, and global levels.

### Program learning outcomes

In addition to the stated institutional student learning outcomes (p. 19), by the end of this program, the graduate should be able to:

1. Demonstrate a commitment to discovery.
2. Demonstrate a commitment to the dissemination of knowledge through publications and presentations.
3. Develop treatment plans that follow current evidence-based and best practice guidelines.
4. Demonstrate a commitment to developing treatment plans that follow current evidence-based and best practice guidelines.

### Technology requirement

Students are required to have iPads for the courses in the orthopaedic and neurology tracks, as well as for testing activities in all courses. It is highly recommended that students have access to personal computers (minimum: 800 MHz multimedia) with Internet access (minimum: 56 k.b.p.s. [connected at 44+ k.b.p.s.]). A $65 technology fee is charged in years one and two.

### Research funding

Each student will be required to conduct one or more research projects in partial fulfillment of the requirements for the Doctor of Philosophy degree in physical therapy. Typical costs for student research projects range from $2,500 to $10,000. The physical therapy department will cover the first $2,500 of approved research expenses. The student and/or sponsor will be required to cover research-related expenses over this amount. When necessary, the program director and dissertation chair will assist the student in attempting to secure funding for unmet research expenses. Additional financial support may be awarded by application for seed grant funding through the SAHP Research Committee.

### General requirements

For more information about program requirements and practices for graduate students, the student should consult the Policies and General Regulations in Section II and the School of Allied Health Professions in Section III of this CATALOG. The student should also consult the Doctor of Philosophy’s 26 elements for program-specific requirements. These elements can be found at [http://alliedhealth.llu.edu/academics/physical-therapy/degree-options/physical-therapy-phd](http://alliedhealth.llu.edu/academics/physical-therapy/degree-options/physical-therapy-phd).
Admissions

In addition to Loma Linda University (p. 24) and School of Allied Health Professions (p. 47) admissions requirements, the applicant must also complete the following requirements:

- Bachelors of Science degree in Physical Therapy plus a master’s degree, a Masters of Physical Therapy degree, or a Doctor of Physical Therapy degree from an accredited program or equivalency.
- Minimum grade point average of 3.3 in academic and professional coursework.
- Completion of physical licensure or equivalency in the US or their country of training.

Must also submit:

- At least one example of written work (e.g., personal essay, term paper, publication, master’s thesis or project).
- Curriculum vitae, including work history, formal education, continuing education, licensure and certification, professional organizations, honors, awards, publications, presentations, and grants.
- A formal letter outlining research interests.
- A structured oral interview.

Program requirements

Required units:

- 96 – for students with a Bachelor of Science degree in physical therapy plus a Masters of Physical Therapy (MPT) degree or another appropriate master’s degree
- 75 – for students with a Doctor of Physical Therapy (DPT) degree

Domain 5: Religion
One course from each area (RELE, RELR, RELT) required.
Select one course from the following:

- **RELE 524** Bioethics and Society
- **RELE 525** Ethics for Scientists
- **RELE 564** Ethics and Health Disparities
- **RELE 567** World Religions and Bioethics
- **RELE 568** Bioethics and the Law
- **RELE 588** Explorers of the Moral Life
- **REL 540** Wholeness and Health

Select one course from the following:

- **RELT 540** World Religions and Human Health
- **RELT 557** Theology of Human Suffering
- **RELT 617** Seminar in Religion and the Sciences

Domain 6: Research and statistics (24-27 units)
Not required of all students. See footnotes for details.
Required:

- **AHRM 581** Research and Statistics I
- **AHRM 582** Research and Statistics II
- **AHRM 605** Critical Analysis of Scientific Literature
- **PTGR 693** Research and Statistics III: Development and Approval of Research Topic and Questions
- **PTGR 694** Proposal Development and Institutional Review Board Approval
- **PTGR 695** Research and Statistics V: Data Collection (3)
- **PTGR 696** Research and Statistics VI: Data Analysis
- **PTGR 699** Research and Statistics VII - Dissertation

Total Units: 75-96

1. All courses will be focused toward research topic.
2. Courses to be selected in consultation with program director and dissertation chair to enhance the student’s knowledge base in regards to their research topic.
3. PTGR 516 Movement Science of the Upper Quarter and PTGR 517 Movement Science: Lower Quarter Biomechanical Relationships (or equivalency) required for students who have not taken these courses in prior M.P.T. or D.P.T. program.
4. PTGR 518 Topics in Rehabilitation are courses related to special topics in rehabilitation (e.g., Sports Medicine, Manual Therapy, Neurological).
5. Required for M.S./M.P.T. Required for D.P.T. if course, or equivalent, not taken prior to entrance into the program.
6. Course to be taken twice – each registration (3 units) pertains to the data collection for one of the two required papers.

Comprehensive Examination
PTGR 599 Comprehensive Examination is designed to establish that the student has a broad understanding of physical therapy, research biostatistics and basic research methodology, education, bioethics, and professionalism. Since education is a component of the comprehensive exam, students are encouraged to select a minimum of 9 units of teaching/education-related courses from Domain 5. The written comprehensive examination will be administered after students have successfully completed the majority of required courses in Domains 1-6. The comprehensive examination will typically occur during the summer quarter of the student’s second year in the Ph.D. in Physical Therapy program.

Noncourse requirement

**Advancement to Candidacy**
The student may apply for advancement to candidacy after a) passing the comprehensive examination, b) securing support from their research guidance committee, and c) successfully defending their research topic and questions. The candidate’s capacity for original, independent investigation and scholarly achievements must be demonstrated by the presentation and oral defense of an acceptable dissertation in order to participate in the commencement ceremony. The candidate must submit a written dissertation to the Faculty of Graduate Studies. The candidate must also submit a minimum of two papers for publication. One paper must be accepted for publication to fulfill program completion requirements.

**Normal time to complete the program**
Four (4) years (16 academic quarters) — full-time enrollment required
Department of Physician Assistant Sciences

Physician assistants (PAs) are health professionals who are licensed to practice medicine under physician supervision. Physician assistants are qualified by graduation from an accredited physician assistant educational program and by certification by the National Commission on Certification of Physician Assistants. Within the physician/PA relationship, the PA exercises autonomy in medical decision making and provides a broad range of diagnostic and therapeutic services. The clinical role of a PA includes primary and specialty care in medical and surgical settings in rural and urban areas. The PA’s practice is centered on patient care and may also include educational, research, and administrative activities.

For more information, call 909/558-7295; e-mail: <pa@llu.edu>; or visit the department website at <llu.edu/allied-health/sahp/pa>.

Program
Physician Assistant — M.P.A. (p. 120)

Physician Assistant — M.P.A.

Loma Linda University offers a professional course of study leading to the Master of Physician Assistant (M.P.A.) degree. This degree prepares students for medical work as midlevel health-care professionals.

The program consists of didactic and clinical phases that run concurrently for eight quarters over a 24-month period. A new class is accepted annually. Students are selected from a variety of clinical backgrounds. Each applicant is evaluated based on the following: experience in patient care, duration of experience, level of patient contact, and degree of responsibility.

Mission statement

Loma Linda University Department of Physician Assistant (PA) Sciences educates primary care physician assistants who will provide health care in collaboration with physicians as active members of a professional health-care team. We are committed to excellence and compassion for the whole person and quality health care for under-served communities locally and globally, in accordance with the mission of Loma Linda University and the School of Allied Health Professions.

Vision

Graduates of the Loma Linda University Master of Physician Assistant Program will be recognized for professional excellence, integrity, empathy, teamwork, and advocating lifestyle changes to promote wholeness.

Program learning outcomes

In addition to the stated institutional learning outcomes (p. 19), at the end of this program, the graduate should be able to:

1. Apply the basic sciences to physician assistant sciences.

2. Demonstrate clinical skills in patient care settings

3. Demonstrate critical-thinking skills in physician assistant sciences and practice.

4. Exhibit professionalism appropriate for physician assistants.

5. Provide culturally proficient, whole person care to individuals and communities

6. Demonstrate a commitment to the promotion of the physician assistant profession

Housing

On-campus housing is available for men and women. For information on the men’s dormitory (Daniells’ Residence), call 909/558-4561. For information on the women’s dormitory (Lindsay Hall), call 909/558-4561.

Financial aid

Applications for financial aid should be submitted early, even before the student is admitted into the program. Processing of financial aid should be done by January 1. The Student Financial Aid Office will help applicants obtain the necessary applications and guide them in the process of applying for aid. Applicates for aid must contact the Office of Financial Aid, Loma Linda University, Loma Linda, CA 92350 at 909/558-4509.

Accreditation

The Accreditation Review Commission on Education for the Physician Assistant, Inc. (ARC-PA) has granted Accreditation-Continued status to the Loma Linda University Physician Assistant program sponsored by Loma Linda University. Accreditation-Continued is an accreditation status granted when a currently accredited program is in compliance with the ARC-PA Standards.

Accreditation remains in effect until the program closes or withdraws from the accreditation process or until accreditation is withdrawn for
failure to comply with the Standards. The approximate date for the next validation review of the program by the ARC-PA will be March 2027. The review date is contingent upon continued compliance with the Accreditation Standards and ARC-PA policy.

Admissions

Applications are accepted between May 1 and October 1, 11:59 pm EST. Applications must be made through the Central Application Service for Physician Assistants. This service is available at <caspaonline.org> (https://portal.caspaonline.org). In addition, completion of a secondary application from Loma Linda University is required. Completed applications and all supporting documents must be received by the Department of Physician Assistant Sciences no later than December 15, 11:59 pm PST. Required interviews are granted to qualified applicants upon invitation by the admissions committee. The applicant must also complete the following requirements:

- A baccalaureate degree from a regionally accredited institution, completed by December 31 of the year of application.
- An overall G.P.A. of at least 3.0 or higher and a science G.P.A. of 3.0 or higher on a 4.0 scale.
- Three letters of recommendation—one from a practicing M.D., D.O., or P.A. (not from shadowing, friend, or relative) with whom the applicant has worked in a paid patient care role.
- Documented paid patient-care experience of 2,000 hours minimum by matriculation—it is preferred that this requirement be completed by the time the application is submitted but must be completed by matriculation in the program. Student clinical hours, shadowing, and volunteer experience are not acceptable. An example or definition of preferred direct patient-care experience are those accredited, credentialed professions that provide: patient assessment, treatment, patient-care plans, and diagnostic testing. Preferred applicants will have direct patient-care experience working in clinical settings that involve a range of patient responsibility and involve a high level of critical thinking.
- Complete all prerequisite course work at a regionally accredited college before being admitted to a program in the School of Allied Health Professions. Note: Grades below C are not accepted as prerequisites.
- A minimum score of 550 (paper based), 213 (computer based), or 80 (Internet based) from the Test of English as a Foreign Language (TOEFL) must be submitted for any applicant whose native language is not English or whose secondary education has been given outside the United States. Any student with a score on the TOEFL writing test (TWE) of less than 4 will be required to do remedial work during the program and retake the TOEFL. TOEFL scores are valid for two years.
- Prerequisites:
  - Only two prerequisite courses can be outstanding at the time of submission of the Central Application Service for Physician Assistants application (one science, one non-science), even if the course will be completed prior to the applicant submitting his or her supplemental application.
  - Science prerequisites must include an on-campus laboratory component.
  - All prerequisite course work must be taken at a regionally accredited institution in the United States.

Recommended

Statistics
Medical terminology
Conversational Spanish

Preference given to

Seventh-day Adventists
Graduates of Loma Linda University
Applicants from underrepresented populations
Applicants with a history of meaningful, continuous involvement in community service consistent with the mission and values of Loma Linda University
Applicants with documented military service

Total Units: 128

Eight six-week clinical rotations, including: family medicine, internal medicine, pediatrics, obstetrics/gynecology, general surgery, emergency medicine, behavioral medicine, and one elective are required.

**Normal time to complete the program**

2.33 years (eight [8] academic quarters) — full-time enrollment required
Department of Radiation Technology

The Department of Radiation Technology is made up of diverse professions. Radiographers image body structures utilizing ionizing radiation. They can specialize in CT, MRI, imaging informatics, mammography, nuclear medicine, sonography, or radiation therapy. While CT and MRI both produce cross-sectional images of the body, MRI utilizes a magnetic field rather than ionizing radiation. Nuclear medicine employs the nuclear properties of radioactive and stable nuclides to make diagnostic evaluations of the anatomic or physiologic conditions of the body. Sonography uses sound waves to image the human body; and radiation therapy employs medical use of ionizing radiation to treat cancer and control malignant cell growth. Professionals in these areas are able to communicate effectively, think critically, demonstrate professionalism by treating all persons with respect, assume responsibility and accountability for their actions, and adhere to the rules of confidentiality.

Programs

- Cardiac and Vascular Imaging (CVI) — Certificate (p. 123)
- Cardiac Electrophysiology Technology — A.S. (p. 125)
- Diagnostic Medical Sonography — B.S. (p. 126), Certificate (p. 128)
- Medical Dosimetry — Certificate (B.S. in Physics Track) (p. 128), Certificate (Radiation Therapist Track) (p. 129), Comparison (p. 130)
- Medical Radiography — A.S. (p. 130)
- Nuclear Medicine Technology — B.S. (p. 132)
- Radiation Sciences — B.S. (p. 137), M.S.R.S. (p. 140)
- Radiation Therapy Technology — B (p. 141), S. (p. 141)
- Radiography Advanced Placement — School Certificate (p. 143)
- Radiologist Assistant — M.S.R.S. (p. 144)
- Special Imaging — CT, MRI, CT/MRI Certificate (p. 145) Comparison (p. 147)

Cardiac and Vascular Imaging (CVI) — Certificate

Program director
J. Robert Cruise

Cardiac interventional and vascular interventional technologists work in a highly specialized field operating sophisticated imaging equipment. This technology provides detailed fluoroscopic images of the human body, assisting physicians with quality patient diagnosis and treatment.

The Cardiac and Vascular Imaging Program is a full-time, 12-month certificate program that requires four quarters beginning in autumn. During the program, students take structured course work along with clinical instruction. There are no arrangements for part-time or evening status. Clinical sites are available in a variety of regions in Southern
California. The University cannot guarantee that the student will be assigned close to his/her residence.

The program’s load requires 40 hours per week, which includes didactic and clinical experience. Clinical experience involves up to four, eight-hour days per week. Courses require the student to be on campus.

Students will be required to submit current immunization records and undergo a background check during the registration process. Further details regarding these two requirements can be found in the Admission Policies and Information (p. 24) section of this CATALOG. Students will be responsible for paying fees associated with immunizations and background checks. Loma Linda University and the Department of Radiation Technology cannot guarantee employment.

Program learning outcomes
At the end of this program, the graduate should be able to:

1. Demonstrate clinical competency in cardiac interventional radiography and vascular interventional radiography.
2. Provide competent advanced clinical life support.
3. Effectively communicate in the health sciences.

The CVI student profile
1. Is enthusiastic and interested in maintaining high standards of academics, clinical performance, and patient care.
2. Possesses a broad knowledge of human anatomy and computer skills.
3. Demonstrates strong academic performance in science and related courses.
4. Is detail-oriented and able to work under pressure while demonstrating critical-thinking and problem-solving skills.

Admissions
In addition to Loma Linda University (p. 24) and School of Allied Health Professions admissions requirements (p. 47), the applicant must also complete the following requirements:

- Recommendations: meaningful recommendations must be from prior teachers, work supervisors, or health professionals who are knowledgeable about your qualifications
- Current ARRT registry in Radiography (R)
- Current California Certified Radiologic Technologist (CRT) license
- Current Basic Life Support (BLS) card with the American Heart Association
- A minimum G.P.A. of 2.5 maintained in all didactic and clinical course work
- Venipuncture is highly recommended
- One year of professional experience in imaging is highly recommended

An applicant who is completing a program in radiologic technology prior to the start of the program may apply as long as s/he has completed ARRT, CRT, and BLS requirements by the program start date.

Observation experience
A minimum of eight hours of career observation in cardiac and/or vascular imaging is required. The career observation form is available as a download from the forms page on the Web site.

Application procedure
1. Applications are accepted starting January of each year.
2. Deadline for applications is May 31st
3. Applicants should submit applications early as there are a limited number of slots available for interviews.

Interviews
Cardiovascular and Interventional (CVI) Program interviews are conducted in June or July. All applicants will be interviewed by the program director and representatives of the School of Allied Health Professions. Applicants residing in Southern California should plan for a personal interview on campus at Loma Linda. Applicants will be notified by phone and/or e-mail of their interview schedule. Applicants are rated in the following four areas:

- Work experience or training background
- Recommendations
- Academic record
- Communication skills, knowledge, and motivation.

Selection
After all applicants have been interviewed, the selection committee for the CVI Program meets to make the final selections. Selections are usually decided by mid-July, and confirmation of each decision is mailed to the respective applicant from the Office of Admissions for the School of Allied Health Professions.

Cardiac Electrophysiology Technology — A.S.

Program director
Timothy Seavey

Electrophysiology is a subspecialty of cardiology that focuses on treating heart rhythm abnormalities. The cardiac electrophysiology technologist assists the cardiologist during invasive procedures, including diagnostic electrophysiology studies, arrhythmia mapping, catheter ablation for supraventricular and ventricular tachycardias; and for pacemaker, implantable cardioverter defibrillator, and cardiac resynchronization therapy device implantations.

The Cardiac Electrophysiology Technology Program leads to an Associate in Science degree. The program is based on one year of prerequisites completed at any regionally accredited college or university. The four quarters of course work at Loma Linda University begin with the Autumn Quarter of the sophomore year. Course work includes clinical experience at affiliated cardiac electrophysiology departments. Subject to WSCUC approval, the program is changing to an online delivery of didactic courses and face-to-face delivery of clinical affiliation courses within the State of California and other approved states.

CPR certification
Students are required to have current health-care provider adult, child, and infant cardiopulmonary resuscitation (CPR) certification for all scheduled clinical experience. CPR certification must be completed at the American Heart Association health-care provider level. This may be completed prior to beginning the program of study or be obtained at Loma Linda University. Classes are available on campus at Life Support Education, University Arts building, 24887 Taylor Street, Suite 102.

Program learning outcomes
By the end of this program, the graduate should be able to:

1. Demonstrate clinical competence.
2. Communicate effectively.
3. Exhibit critical-thinking and problem-solving skills.
4. Demonstrate the values and attitudes of an entry-level cardiac electrophysiology technologist.

Certification
Upon completion of the program, students will be eligible for certification by the International Board of Heart Rhythm Examiners.

Accreditation
The Cardiac Electrophysiology Program is accredited by the the Commission on Accreditation of Allied Health Education Programs (CAAHEP) upon the recommendation of the Joint Review Committee on Education in Cardiovascular Technology (JRC-CVT), 25400 U.S. Highway 19 North, Suite 158, Clearwater, FL 33763; telephone: 727/210-2350; website: <www.caahep.org (http://www.caahep.org).

Admissions
In addition to Loma Linda University (p. 24) and School of Allied Health Professions admissions requirements (p. 47), the applicant must also complete the following requirements:

Minimum G.P.A. of 2.4 and prerequisites as follow:

Prerequisites
Religion: four units per year of attendance at a Seventh-day Adventist college or university
High school algebra or intermediate college algebra
Anatomy and physiology with lab
Introductory physics or high school physics, recommended
Medical terminology
Choose one from the following: general psychology, general sociology, cultural anthropology
College English composition, complete sequence
Electives to meet the minimum total requirement of 39 quarter units or 29 semester units for the A.S. degree

1 Students receive academic credit for this course in the third quarter of registration.

**Normal time to complete the program**
Two (2) years — One (1) year (four [4] academic quarters) at LLU, based on full-time enrollment.

**Medical Sonography — B.S., Certificate**

**Program director**
Marie T. DeLange

**Medical directors**
Ramesh C. Bansal
Glenn A. Rouse

**Clinical coordinator**
Erin Marshall
Emily Unterseher

The diagnostic ultrasound profession is a multispecialty field comprised of diagnostic medical sonographers (DMS) with subspecialties in abdomen, obstetrics/gynecology, breast, and pediatrics; vascular technologists (RVT); and diagnostic cardiac sonographers (DCS) with subspecialties in adult, pediatrics, and fetal echocardiography.

The diagnostic ultrasound professional performs patient assessments and acquires and analyzes data obtained using ultrasound diagnostic technologies. The sonographer provides a summary of findings to the physician to aid in patient diagnosis and management. He or she utilizes independent judgment and systematic problem-solving methods to produce quality diagnostic information. A sonographer must complete comprehensive clinical training and obtain a credential by successfully passing the American Registry of Diagnostic Medical Sonographers (ARDMS) national boards.

**Professional credentialing**

Upon completion of either the Bachelor of Science degree or certificate requirements, the student is eligible to sit for the national board examination of the ARDMS.

All students are required to take and pass the ARDMS Standard Physics and Instrumentation (SPI) Examination before completion of the program.

**CPR certification (American Heart Association only)**

Students are required to have current health-care provider cardiopulmonary resuscitation (CPR) certification (adult, child, and infant) for all scheduled clinical experiences. CPR certification must be completed at the American Heart Association health-care provider level, and must be completed prior to beginning the program. CPR classes are available on campus at Life Support Education, University Arts building, 24887 Taylor Street, Suite 102. It is suggested that CPR Certification completion should be done upon acceptance to the program.

**Accreditation**

The medical sonography curricula in both general sonography and echocardiography have been accredited since 1985 by the Commission on Accreditation of Allied Health Education Programs (CAAHEP); and reviewed annually by the Joint Review Committee on Education in Diagnostic Medical Sonography. Contact information for CAAHEP is: 254 U.S. Highway 19 North, Suite 158, Clearwater, FL 33763; 727/210-2350; e-mail: <caahep@caahep.org>.

**Program Requirements**

- Diagnostic Medical Sonography — B.S. (p. 126)
- Diagnostic Cardiac Sonography — Certificate (p. 128)

**Diagnostic Medical Sonography — B.S.**

The Bachelor of Science degree in diagnostic medical sonography is a 27-month curriculum (nine academic quarters) leading to eligibility to take the registered vascular technology (RVT) and registered diagnostic medical sonography (RDMS) national ARDMS board examinations. General sonographers perform examinations evaluating organs such as the liver, kidneys, spleen, gallbladder, and thyroid, as well as obstetrics/gynecology, pediatrics, and breast. The vascular sonographer performs a variety of noninvasive examinations to evaluate the arteries and veins, assess blood flow and valve competency, and to detect the presence of clots.

**Program learning outcomes**

By the end of this program, the graduate should be able to:

1. Utilize meaningful communication skills within the health-care context
2. Create meaningful interactions.
3. Reflect on leadership approaches to examine personal strengths and weakness.
4. Develop personal and social competence around the emotional competence framework.
5. Develop scanning techniques and skills in order to acquire complete sonographic images and initial findings based on patient history.

**Admissions**

In addition to Loma Linda University (p. 24) and School of Allied Health Professions admissions requirements (p. 47), the applicant must meet the following requirements:
• A minimum of 103 degree transferable units
• Minimum G.P.A. of 2.5 (3.0 preferred)
• Eight hours of observation in medical sonography (preferably at LLUMC) is required prior to the interview. Observations are scheduled after October and after application to program has been submitted.
• Interview

Prerequisites
All the following courses must be completed prior to the start of the program. All prerequisites, including general education courses, must be completed at an accredited college or university.

Domain 1: Religion and Humanities (20 quarter or 14 semester units)
Humanities (12-20 quarter or 8-14 semester units)
Selected from at least three of the following content areas: civilization/history, fine arts, performing/visual arts (not to exceed four quarter credits), literature, modern language, philosophy, general humanities elective.

Religion (0-8 quarter or 0-6 semester units)
An applicant who has attended a Seventh-day Adventist college or university is required to have taken four quarter units of religion from an Adventist institution for each full year equivalent (48 quarter units/32 semester units) of attendance at an Adventist college or university. If the applicant has not attended an Adventist institution, no religion units are required. In either case, however, the applicant must have completed 20 quarter or 14 semester units in Domain 1: Religion and Humanities.

Domain 2: Scientific inquiry and analysis (24-32 quarter or 16-22 semester units)
Natural Sciences (minimum of 12 quarter or 8 semester units)
Human anatomy and physiology with laboratory, complete sequence.*
College algebra or higher, one semester/quarter.*
Introduction to physics (general physics also accepted), one semester/quarter.*
* Must be completed within the past five years.

Social sciences (minimum of 12 quarter or 8 semester units)
Units must be selected from two of the following content areas: anthropology, economics, geography, political sciences, psychology, and sociology.

Domain 3: Communication (9-13 quarter or 6-9 semester units)
English composition (complete sequence).
Remaining courses may be selected from the following content areas: computer information systems, critical thinking, and public speaking.

Domain 4: Health and Wellness (2-6 quarter or 1.5-4 semester units)
Personal health or nutrition (one course).
Physical education (two separate physical activity courses).
Additional course requirement.
Medical terminology (must be completed within the past five years).

Domain 5: Electives
To meet the minimum requirement of 105 units quarter units required for matriculation, electives may be selected from the previous four domains.

For more information regarding GE requirements for graduation, see LLU general education requirements (p. 27).

Diagnostic Cardiac Sonography — Certificate

The cardiac RDCS certificate is a 12-month curriculum leading to proficiency in diagnostic imaging of cardiac function and disease processes. Graduates are eligible to take the adult Registered Diagnostic Cardiac Sonography (RDCS) board examination.

Admissions

Admission is based on a selective process. In addition to Loma Linda University (p. 24) and School of Allied Health Professions admissions requirements (p. 47), the applicant must also complete the following requirements:

Fulfill one of the following four requirements:

- Hold an ARRT-registered radiologic technologist certification.
- Have graduated from an accredited allied health program, including nursing (two years minimum training), licensed vocational nurse, or registered nurse.
- Hold an associate degree (science preferred not required).
- Hold a baccalaureate degree (science preferred not required).

and must have completed credits in the following:* 

- Human anatomy and physiology with laboratory, complete two-semester sequence
- College algebra
- Medical terminology
- Introduction to physics
- Patient-care methods (will be completed at LLU after being accepted into the program) OR complete a Certified Nursing Assistant course, approved by the Program Director

* Specific course requirements must be completed at an accredited college or university.

Normal time to complete the program

Four (4) years — (two [2] years prior to LLU plus two [2] years [27 months] at LLU) — full-time only

Medical Dosimetry — Certificate (B.S. in Physics Track, Radiation Therapist Track)

Program director
Carol A. Davis

The Medical Dosimetry Program is designed to educate personnel in the discipline of dosimetry within a radiation oncology environment, and to prepare them to take the Medical Dosimetry Certification Board (MDCB) examination.

Medical dosimetry is a dynamic, exciting field involving a combined knowledge of mathematics, physics, and the biological and medical sciences. Dosimetrists plan optimal isodose distributions and treatment dose calculations for a variety of external beam as well as brachytherapy treatments. Medical dosimetrists must possess excellent analytical skills, the ability to critically evaluate data, and an aptitude for physics and mathematics. They must also be able to work closely as part of a team with physicists, physicians, radiation therapists, and other personnel.

Due to a shortage of training programs in medical dosimetry throughout the United States, there is a great need for medical dosimetrists in many areas of the country. Thus, this program aims to provide a supply of well-trained dosimetrists who will be able to meet the needs of radiation oncology facilities in the local area and beyond.

Mission statement

The mission of the certificate program in medical dosimetry is to prepare professionals in the field through broad education and training in all aspects of the profession. This will include critical thinking, clinical competence, effective communication, and professionalism as they apply to the field of medical dosimetry. The program encourages intellectual, physical, social, and spiritual development by emphasizing these goals in its curriculum, which is reflected in the motto of Loma Linda University Health—“To Make Man Whole.”

Program learning outcomes (PLOs)

By the end of this program, graduates should be able to:

1. Perform calculations, utilizing software tools to optimize isodose distributions to achieve treatment goals through maximizing target coverage, minimizing hot/cold spots, and sparing critical structures as per prescription.
2. Create deliverable treatment plans with considerations of machine and patient constraints, calculating monitor units for clinical set-ups, and minimizing systematic and random errors by checking plan parameters.
3. Follow hospital policies and procedures while performing all dosimetry activities.
4. Communicate effectively, both verbally and in writing.
5. Treat everyone with respect and courtesy, abiding by all HIPPA rules.
6. Exhibit responsible attitudes and be accountable for their actions.
7. Pass the MDCB examination, have a job within six months after passing their MDCB examination, and maintain an attrition rate of no more than 25 percent.

**Program design**

- The program for both tracks is five quarters in length.
- Instruction includes a mixture of lecture, laboratory, and clinical work. Students will be exposed to a variety of methodologies within dosimetry, including work with proton therapy treatment planning.
- The majority of instruction will be conducted in the Radiation Medicine Department of Loma Linda University Medical Center. There are also short clinical rotations to Long Beach Memorial and City of Hope medical centers.
- The program faculty consists of physicists, dosimetrists, and radiation therapists who are extremely experienced in their field—many in both photon and proton therapy treatment planning.

**Accreditation**

The American Association of Medical Dosimetrists (AAMD) strongly supports the concept of formal dosimetry training, which leads to board eligibility for the certification in medical dosimetry. This qualification is considered the gold standard in dosimetry education.

The program is accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT).

**Admissions**

Admission is based on a selective process. In addition to Loma Linda University (p. 24) and School of Allied Health Professions admissions requirements (p. 47), the applicant must also complete the following requirements:

**Track 1 — radiation therapist track**

- ARRT registration in radiation therapy technology.
- Must hold bachelor's degree in any major in addition to radiation therapy certification
- College algebra
- Trigonometry

**Track 2 — B.S. physics track**

- A baccalaureate degree in physics, mathematics, or equivalent from an accredited university
- Anatomy and physiology (no laboratory required)
- Medical terminology
- Eight hours in a radiation oncology department observing the work of the medical dosimetrist.

**Program requirements**

- Certificate in Medical Dosimetry — Radiation Therapist Track (http://llucatalog.llu.edu/allied-health-professions/medical-dosimetry/certificate-as-radiation-therapy-track), B.S. in Physics/Mathematics Track (p. 129), Comparison (p. 130)

Medical Radiography — A.S.

Program director
William J. Edmunds

Medical advisor
Alvin L. Hensel

The medical radiographer, or radiologic technologist, is responsible for the accurate imaging of body structures on an image receptor. The technologist provides for patient protection and comfort, determines proper exposure factors, manipulates medical imaging equipment, evaluates the radiograph image for quality, and utilizes digital technologies to archive and transmit the patient’s examination images for physician evaluation.

The technologist may also assist the radiologist in specialized radiographic procedures. This may require the use of sterile procedures and universal precautions in the administration of radiographic contrast agents to the patient for the enhanced viewing of body systems and their functions.

The program

The Medical Radiography Program begins with the Autumn Quarter and is based on the completion of one year of prerequisite course work at any regionally accredited college or university. The first quarter at Loma Linda University primarily emphasizes the theoretical aspects of radiography, with two days per week at a clinical affiliation beginning the third week of the program. The remaining six quarters combine clinical training on a two-to-five-days-per-week basis, with more advanced classroom topics. The schedule may involve limited evening assignments. Clinical and classroom involvement in the program is full time (40 hours/week). Students are off on all national holidays and quarter breaks.

Program mission statement

The Medical Radiography Program at Loma Linda University provides a quality educational experience focused on the whole person. The program prepares students to be registry-eligible, entry-level radiographers—equipped with the knowledge, skills, values, attitudes, and behaviors appropriate for providing excellent patient care and safely managing radiation exposure.

Program goals

Upon completion of this program, the graduate should be qualified to:

1. Be clinically competent.
2. Provide excellent patient care for a variety of radiologic examinations with respect to the dignity and diversity of all people.
3. Follow radiation protection standards to minimize occupational and public dose.
4. Safely operate all varieties of diagnostic radiography equipment.
5. Become a board eligible entry-level professional in the field of radiography.
6. Defend the profession's code of ethics and work within the profession's scope of practice.

Program learning outcomes
By the end of this program, the graduate should be able to:

1. Utilize knowledge needed to complete radiographic examinations of diagnostic quality, while applying proper patient care and radiation protection standards.
2. Integrate effective communication skills into their health care practice with both patients and colleagues.
3. Employ critical-thinking and problem-solving skills to both prepare for and apply image critique in order to successfully complete radiography exams.
4. Demonstrate professional values, behaviors, and attitudes of an entry-level radiographer.

Affiliations
For the clinical portion of the program, students are assigned to an affiliated medical center: Loma Linda University Health in Loma Linda, East Campus, Faculty Medical Offices, Murrieta, and the Surgical Hospital; and Hemet Valley Medical Center, Eisenhower Medical Center, Desert Hospital, Redlands Community Hospital, Parkview Community Hospital, Pioneers Memorial Hospital, El Centro Regional Medical Center, St. Bernardine Medical Center, Community Hospital of San Bernardino, Riverside Community Hospital, Highland Springs, San Gorgonio, White Memorial Medical Center, and St. Mary Regional Medical Center.

CPR certification
Students are required to have current health-care provider adult, child, and infant cardiopulmonary resuscitation (CPR) certification for all scheduled clinical experiences. CPR certification must be completed at the American Heart Association health-care provider level. This may be completed prior to beginning the program of study or may be obtained at Loma Linda University. Classes are available on campus at Life Support Education, University Arts building, 24887 Taylor Street, Suite 102.

Professional registration and certification
Upon completion of the requirements for the Associate in Science degree, the graduate is eligible to write the qualifying examination of the American Registry of Radiologic Technologists (ARRT). Program graduates who pass the ARRT examination in radiography are eligible to pay for and receive the state license (CRT) in California without further testing within five years of passing the ARRT examination. Graduates are encouraged to become members of the California Society of Radiologic Technologists and the American Society of Radiologic Technologists for professional growth and continuing education in their professional discipline.

Quarterly fee
In addition to the cost of the ASMR program, additional fees include a quarterly University fee and a program fee of $40.00.

Accreditation
The program is accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT), 20 North Wacker Drive, Suite 2850, Chicago, IL 60606-3182; telephone: 312/704-5300. The program is also approved by the Radiologic Health Branch (RHB) of the state of California, Department of Public Health MS 7610, P.O. Box 997414, Sacramento, CA 95899-7414; telephone: 916/327-5106.

Admissions
Admission is based on a competitive, selective process. In addition to Loma Linda University (p. 24) and School of Allied Health Professions admissions requirements (p. 47), the applicant must also complete the following requirements:

- High school completion from an accredited institution, or passed the GED.
- A minimum of 42 quarter units (or 28 semester units) at an accredited college or university.
- Observation experience—A minimum of eight hours of career observation in a radiology department is required. Contact the department to obtain the appropriate form.
- Online application, three references, an essay, and transcripts from all schools attended including high school. The essay should include: why you are choosing LLU, your process for selecting this profession, what makes you a good candidate, and anything else that helps us get to know you. Contact the department for more information.
- A prerequisite GPA of 2.5 minimum; however, a competitive GPA of 3.0 or higher is preferred.

Prerequisites
- Human anatomy and physiology, complete sequence of two courses minimum, with a lab for each course
- Intermediate algebra or college algebra (college algebra preferred)
- Medical terminology
- Introductory or general chemistry, or introductory or general physics at the college level (one quarter/semester) (physics preferred)
- General psychology or general sociology
- English composition, complete sequence
- Interpersonal communication, oral communication, or public speaking
- Religion is a requirement only if a student attended a Seventh-day Adventist college or university (one unit of religion for every 12 units earned at an SDA college)
- Electives to meet the minimum total requirement of 42 units (such as: cultural anthropology, nutrition, health, life span development, Spanish, or computer science)

The Program

Nuclear medicine uses radioactivity to diagnose and treat disease. This medical specialty provides information about both the structure and the function of virtually every major organ system within the body. Nuclear medicine procedures are safe, involve little or no patient discomfort, and do not require the use of anesthesia.

The nuclear medicine technologist is responsible for preparing and administering radio-pharmaceuticals; performing patient-imaging procedures; accomplishing computer processing and image enhancement; analyzing biologic specimens; and providing images, data analysis, and patient information for diagnostic interpretation by the physician health-care team member.

The Bachelor of Science degree with a major in nuclear medicine is a face-to-face program and is completed in 24 to 27 months. In addition to radiation sciences core courses, this program will include CT didactic courses. With the addition of the B.S. degree core, there will now be 27 units taught online (less than 25 percent of the program). These courses are taught by faculty members experienced in online teaching. Students will interact with the faculty, their classmates, and the content material.

Content for nuclear medicine courses is guided by the Society of Nuclear Medicine and Molecular Imaging (SNMMI), the Nuclear Medicine Technology Certification Board (NMTCB), and the American Registry of Radiation Technologists (ARRT) content specifications. The content for the CT courses is guided by the American Society of Radiation Technologists (ASRT), as well as the American Registry of Radiation Technologists (ARRT) content specifications. Efforts are also made to assist students in experiencing the core values of Loma Linda University. The state of California requires approximately 1,000 clinical hours in nuclear medicine; and this program provides more than 1,550 clinical hours in nuclear medicine and more than 250 clinical hours in CT procedures and patient care.

Objectives

During the Bachelor of Science degree in the nuclear medicine technology program, students take formal course work along with instruction in the clinical aspects of nuclear medicine. This includes participation, under close supervision, in the actual procedures within the nuclear medicine department.

Students are required to follow the guidelines given by the NMTCB and the ARRT and to meet required competencies each quarter. Students should accomplish the required competencies in the following areas: skeletal, CNS, cardiovascular, endocrine/exocrine, gastrointestinal, genitourinary, respiratory, radiopharmacy, venipuncture, vital signs, and EKG placement and monitoring. Students will receive more than 1,550 hours of nuclear medicine and 250 hours of CT clinical experience.

Program learning outcomes

By the end of this program, the graduate should be able to:

1. Demonstrate the knowledge, skills, and responsibilities necessary for the practice of nuclear medicine.
2. Practice safe, compassionate patient care, including appreciation and respect for cultural diversity.
3. Demonstrate appropriate critical-thinking, problem-solving, and decision-making skills in nuclear medicine.
4. Maintain and apply competent skills and knowledge by interacting with fellow professionals, attending educational conferences, and staying current with changing technology.
5. Apply knowledge of departmental organization and function.
6. Apply quantitative reasoning to the practice of nuclear medicine.
7. Achieve required clinical competencies for nuclear medicine.

Professional registration and certification
Upon completion of the certificate requirements, the student is eligible to write the ARRT qualifying examination in nuclear medicine; and the NMTCB and California (CTNM) certifying examination.

Accreditation
The program is accredited by the Joint Review Committee on Nuclear Medicine Technology (JRCNMT), 2000 West Danforth Road, Suite 130 #203, Edmond, OK 73003; telephone: 405/285-0546; website: <www.jrcnmt.org>. The program is approved by the California Department of Public Health, Radiologic Health Branch, P.O. Box 942732, Sacramento, CA 94234-7320. Loma Linda University is also regionally accredited by the WASC Senior College and University Commission (WSCUC), 985 Atlantic Avenue, Suite 100, Alameda, CA 94501; telephone: 510/748-9001; fax: 510/748-9797; website: <http://www.wascsenior.org/contact>.

Admissions
To be eligible for admission to the BSNM program, the applicant must fulfill the following requirements: Complete the prerequisite requirements, or be a graduate of an accredited radiologic technology program who has completed the prerequisite requirements in conjunction with that program.

Admission is based on a selective process. In addition to Loma Linda University and School of Allied Health Professions admissions requirements (p. 47), the applicant must also complete the following requirements:

- Minimum of 96 quarter units that are applicable to the B.S. degree program.
- G.P.A. of 3.0 or better
- A minimum of eight hours of career observation (volunteer/employee) in a nuclear medicine department is required prior to the interview. The observation form is located online <www.llu.edu> under School of Allied Health Professions, under “forms.” Print it out and take it with you to the facility you will be observing.
- Interview

Certifications
Applicants must have all of the following certifications completed prior to the beginning of the school year.

- Current adult and child CPR card from the American Heart Association. Classes are available on campus at Life Support Education, University Arts building, 24887 Taylor Street, Suite 102. It is highly suggested that the student obtain the CPR certification prior to the start of the Nuclear Medicine Program.

Prerequisite courses
Applicants must complete the following subjects at an accredited college or university prior to entering the program. Please note: C- grades are not transferable for credit.

Humanities—20 quarter (14 semester) units minimum (choose minimum of three areas from: history, literature, philosophy, foreign language, art/music appreciation or art/music history

RTNM 354L Nuclear Medicine Procedures II Laboratory 1
RTNM 357 Instrumentation I 4

Included in this minimum, four units of religion per year of attendance at a Seventh-day Adventist college or university

Natural sciences—Introductory or general chemistry with laboratory
Introductory or general physics with laboratory
Human anatomy and physiology with laboratory, complete sequence, two courses
College algebra (statistics does not qualify)
Social Sciences—Minimum of 12 quarter units to include:
General psychology (four quarter/three semester units) required
Choose remaining units from the following areas: sociology, anthropology, economics, and geography.
Communication—12 units English composition, complete sequence (required)
Oral communication, speech preferred, interpersonal communication is accepted
Health and Wellness—Physical education (two activities) health or nutrition
Other—Medical terminology

Electives—Meet minimum total of 96 quarter units

The diversity requirement (anthropology) is fulfilled in the portfolio core courses: AHCJ 493 Senior Portfolio I and AHCJ 494 Senior Portfolio II (approved by the University GE Committee).

For total unit requirements for graduation, see LLU General Education Requirements (p. 28).

Total Units: 128

A minimum grade of C (2.0) is required for all courses in this program.

### Normal time to complete the program

Four (4) years — Based on full-time enrollment, a student who is a radiologic technologist (ARRT) completes the LLU portion of the program in eight (8) quarters (24 months). A student who is not a radiologic technologist (Non-ARRT) starts one quarter earlier and will complete in nine (9) quarters (27 months).

### Comparison

See the comparison (p. 136) of the ARRT certified students and Non-ARRT certified students tracks of this program.

* For the CT sequence, students must take one of the two sets of CT courses: RTSI 367 Cross-sectional Radiographic Anatomy, RTSI 369 CT Physics, and RTSI 364 CT Patient Care and Procedures or RTMR 305 Introduction to Computed Tomography I, RTMR 306 Introduction to Computed Tomography II and RTSI 307 Introduction to Computed Tomography Completion Course (LLU ASMR Students only).

Radiation Sciences — B.S.

Program director
Timothy Seavey

Assistant program director
Kathryn Cockrill

The program

The Bachelor of Science degree in radiation sciences provides imaging professionals with the foundational education necessary to advance into various career possibilities, including: advanced imaging modalities; graduate degrees; professional advancement into entry management, education in imaging, and imaging informatics positions.

The baccalaureate degree comprises a minimum of 192 quarter units in the following:

- Loma Linda University general education requirements
- Professional certification in an imaging modality (entry-level imaging degree)
- Radiation science core requirements*
- An area of emphasis: administration*, education*, advanced imaging modalities, science, or imaging informatics*
- E-portfolio that comprises academic and professional work, a signature project, and service learning

*online

Electives to meet the needs of individual students are selected from existing courses after consultation with the program director.

Students have the ability to customize their programs by choosing an area of emphasis for their studies. Emphases include: education, imaging informatics (PACS administration), science, advanced medical imaging, advanced imaging modalities (diagnostic sonography, cardiac sonography, computed tomography, magnetic resonance imaging, cardiac and/or vascular imaging, radiation therapy, nuclear medicine, or dosimetry), or administration. Loma Linda University and the Department of Radiation Technology cannot guarantee employment.

Program objectives

1. Graduate practitioners who are leaders in the profession and who are capable of serving the greater community in the public, private, and nonprofit sectors.
2. Graduate managers, administrators, and educators who contribute to the profession’s body of knowledge through leadership roles, publications, professional presentations, and advocacy.

Program learning outcomes
Upon completion of the curriculum, the graduate should be able to:

1. Develop meaningful interactions in health care
2. Demonstrate moral leadership
3. Discuss health-care advancement and sustainability
4. Apply emotional intelligence and leadership skills

CPR certification
Students taking a clinically-based emphasis are required to have current health-care provider adult, child, and infant cardiopulmonary resuscitation (CPR) certification for all scheduled clinical experience. CPR certification must be completed at the American Heart Association health-care provider level. This may be completed prior to beginning the program of study or be obtained at Loma Linda University. Classes are available on campus at Life Support Education, University Arts building, 24887 Taylor Street, Suite 102; telephone, 909/558-4977.

Accreditation
Loma Linda University is regionally accredited by the WASC Senior College and University Commission (WSCUC), 985 Atlantic Avenue, Suite 100, Alameda, CA 94501; telephone: 510/748-9001; fax: 510/748-9797; website: <http://www.wascsenior.org/contact>.

Admissions
Applicants may be accepted year-round and may enter the B.S. degree program at the start of any quarter. Contact the program director for advisement. Admission is based on a selective process. In addition to Loma Linda University (p. 24) and School of Allied Health Professions admissions requirements (p. 47), the applicant must meet the following requirements:

- an associate degree or a minimum of 72-96 degree transferable units per program director approval
- be a graduate of an approved program in radiologic technology, computed tomography, magnetic resonance imaging, radiation therapy, nuclear medicine, cardiac and/or vascular imaging, or sonography (ultrasound)
- certification from the American Registry of Radiologic Technologists (ARRT), American Registry for Diagnostic Medical Sonography (AB, BR, FE, OB/GYN, PS, AE, PT, and/or VT), or an equivalent specialty credential.

Applicants who are eligible to take the ARRT (R) or ARDMS specialty examination for certification/credential but who have not had opportunity to do so are given provisional status for one quarter. Eligibility to continue is subject to student’s obtaining certification. The University will not sign or validate registry documents of students who obtained their training in another program.

Prerequisites/corequisites
A maximum of 70 semester or 105 quarter didactic units from an accredited community college will be accepted as transfer credit. Students who have completed a non-regionally accredited program, but is accredited by the same national accrediting agency as LLU’s program, are allowed up to 46 community college-level quarter units of academic credit on the basis of their registry licenses. Students should be within 12 quarter units of completion of general education requirements in order to be considered for the Bachelor of Science core program OR have developed an academic plan with the program director. For a complete listing of general education requirements, see LLU General Education Requirements (p. 28). Following is a list of specific requirements and the general education domain to which they apply.

Domain 1: Religion and Humanities (20 quarter or 14 semester units)

Humanities (12-20 quarter or 8-14 semester units)
Selected from at least three of the following content areas: Civilization/history, fine arts, performing/visual arts (not to exceed four quarter credits), literature, modern language, philosophy, general humanities elective.

Religion (0-8 quarter or 0-6 semester units)
An applicant who has attended a Seventh-day Adventist college or university is required to have taken four quarter units of religion from an Adventist institution for each full year equivalent (48 quarter units/32 semester units) of attendance at an Adventist college or university. If the applicant has not attended an Adventist institution, no religion units are required. In either case, however, the applicant must have completed 20 quarter or 14 semester units in Domain 1: Religion and Humanities.

Domain 2: Scientific inquiry and analysis (24-32 quarter or 16-22 semester units)

Natural Sciences (minimum of 12 quarter or 8 semester units)
Intermediate algebra or high school algebra II (not counted toward domain total)

Must be selected from two content areas.

Human anatomy and physiology with laboratory, one semester/quarter minimum; or general biology with laboratory, one semester/quarter minimum.

Remaining units may be selected from the following content areas:
chemistry, geology, mathematics, physics, and statistics.

Social sciences (minimum of 12 quarter or 8 semester units)
Units must be selected from two content areas: anthropology, economics, geography, political sciences, psychology, and sociology.

Note: The B.S. degree program is approved to meet the cultural diversity requirement of the University in lieu of cultural anthropology.

Domain 3: Communication (9-13 quarter or 6-9 semester units)
English composition (complete sequence).

Remaining courses may be selected from the following content areas:
computer information systems, critical thinking, and public speaking.

Domain 4: Health and Wellness (2-6 quarter or 1.5-4 semester units)
Personal health or nutrition (one course).

Physical education (two separate physical activity courses).

Domain 5: Electives
To meet the minimum requirement of pf 72-96 quarter units required for matriculation, electives may be selected from the previous four domains. For more information regarding GE requirements for graduation, see LLU general education requirements (p. 27).

### Total Units: 12
Program learning outcomes
By the end of this program, the graduate should be able to:
1. Demonstrate leadership and reflective thinking in the areas of management, administration, and education.
2. Behave in a professional manner in all interactions, including use of written and oral communications with patients, colleagues, and others
3. Participate in educational research and professional activities, share knowledge with colleagues, and investigate new and innovative aspects of professional practice
4. Apply advanced practice in managerial, administrative, or educational realms.

Program design
The online M.S.R.S. program is a two-year, 45-unit, part-time program. This seven-quarter (79 academic weeks) program begins in Autumn Quarter and concludes at the end of the second Spring Quarter. Students are expected to complete six to seven units each quarter for seven quarters. An accelerated one-year option beginning in the Summer Quarter is available for qualified applicants. Students enroll in the same courses and there are no areas of emphasis. Students are expected to participate in the graduation ceremony on campus. The program faculty utilizes a learning management system to host courses, and email is the primary communication mechanism among faculty members and students.

Admissions
Admission is based on a selective process. In addition to Loma Linda University (p. 24) and School of Allied Health Professions admissions requirements (p. 47), the applicant must also complete the following requirements:

- Bachelor's degree from an accredited institution (international degrees must be evaluated for U.S. equivalency)
- minimum G.P.A. of 3.0.
- Certification by the American Registry of Radiologic Technologists (or equivalent) in a radiation sciences discipline.
- Two- to three-page essay describing personal and professional skills and accomplishments, interests, and how earning the M.S.R.S. degree will help achieve career goals. This essay is included in the online application process.
- Phone interview (to be scheduled after application has been submitted).
- Recommended courses: statistics and research methods.

Normal time to complete the program
Four (4) years - Two (2) years (6) academic quarters at LLU - based on full-time enrollment: part time permitted.

Area of emphasis: Science (15-20 units)
15-20 quarter units selected from the natural sciences in the areas of biology, microbiology, chemistry, math, or physics. Courses must be taken from two different content areas with the approval of the program director. Introductory sequences are not accepted. These courses are taken at your local college/university. A minimum grade of C+(2.3) is required for all courses.

Area of emphasis: Clinical Practice (12-31 units)
The didactic (not including clinical units) coursework from a clinically-based imaging specialty (from the list below) may be transferred into a clinical practice emphasis. Any clinical practice emphasis requires licensure from the ARRT, NMTCB, or ARDMS

- Diagnostic Sonography (ARDMS)
- Cardiac Sonography (ARDMS)
- Nuclear Medicine (NMTCB and / ARRT)
- Special Imaging (Computed Tomography and or Magnetic Resonance Imaging). Students with special imaging coursework totaling less than 12 units must take additional science or didactic emphasis courses to complete the emphasis. Courses must be approved by the program director. (ARRT)
- Radiation Therapy Technology (ARRT)
- Cardiac Interventional and/or Vascular Interventional (ARRT)

1. Graduate practitioners who are leaders in the profession and who are capable of serving the greater community in the public, private, and nonprofit sectors.

Mission statement
The mission of the M.S.R.S. degree program is to provide students with an enhanced understanding of leadership, management, administration, and education so that they can serve humanity as professionals and leaders in radiation technology environments.

Program goals
1. Graduate practitioners who are leaders in the profession and who are capable of serving the greater community in the public, private, and nonprofit sectors.

The faculty of the Master of Science in Radiation Sciences (M.S.R.S.) degree program is committed to educate and expand the knowledge and expertise of radiology health professionals by providing opportunities for students to advance their skills in leadership, management, administration, and education.

The mission of the M.S.R.S. degree program is to provide students with an enhanced understanding of leadership, management, administration, and education so that they can serve humanity as professionals and leaders in radiation technology environments.

Area of emphasis: Science (15-20 units)
15-20 quarter units selected from the natural sciences in the areas of biology, microbiology, chemistry, math, or physics. Courses must be taken from two different content areas with the approval of the program director. Introductory sequences are not accepted. These courses are taken at your local college/university. professional portfolio
Students will complete a professional portfolio while pursuing the degree. The portfolio will contain evidence of the growth and learning throughout the program.

Normal time to complete the program
Two (2) years (seven [7] academic quarters) based on three-quarter-time enrollment.

Radiation Therapy Technology — BS
Program director
Carol A. L. Davis

Clinical coordinator
Norice Kisinger

Radiation therapy, or radiation oncology, is the medical use of ionizing radiation to treat cancer and control malignant cell growth. Radiation therapy is commonly combined with other modes of treatment for cancer, such as surgery, chemotherapy, and hormone therapy. Radiation therapists should be able to think critically, work with computers, and be able to work with a treatment team. Patient care and empathy are also important assets. It is intended for radiographers or any other allied health, patient-centered professional who seeks additional specialization.

Mission
The mission of the Bachelor of Science degree in radiation therapy program is to prepare professionals in the field of radiation therapy who have received broad education and training in all aspects of the profession. This will include critical thinking, clinical competence, effective communication, and professionalism as they apply to the field of radiation therapy. The program encourages intellectual, physical, social, and spiritual development by emphasizing these goals in its curriculum, which is reflected in the motto of Loma Linda University Health—“To Make Man Whole.”

Program learning outcomes
By the end of this program, the graduate should be able to:

1. Monitor changes in patient condition.
2. Interpret isocenter shift from CT sim data to treatment-planning data.
3. Apply critical thinking skills to analyze complex issues.
4. Perform daily QA.
5. Check that dosimetry data are accurately transferred to the electronic chart.
6. Recognize treatment changes.
7. Demonstrate effective verbal communications skills.
8. Demonstrate effective written communication skills.
9. Treat all persons with respect.
10. Demonstrate knowledge of HIPPA.
11. Accept responsibility and accountability for actions.
12. Pass the ARRT examination.
13. Secure job placement within six months of graduation.

CPR certification
Students are required to have current health-care provider adult, child, and infant cardiopulmonary resuscitation (CPR) certification for all scheduled clinical experience. CPR certification must be completed at the American Heart Association health-care provider level and must be completed prior to beginning the program of study. Classes are available on campus at Life Support Education, University Arts building, 24887 Taylor Street, Suite 102.

Accreditation
The program is accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT), 20 North Wacker Drive, Suite 900, Chicago, IL 60606-2901; telephone: 312/704-5300; website: <www.jrcert.org (http://www.jrcert.org)>.

Admissions
Admission is based on a selective process. In addition to Loma Linda University (p. 24) and School of Allied Health Professions admissions requirements (p. 47), the applicant must also complete the following requirements:

- Prerequisite courses as listed below.
- Must be either an ARRT registered radiographer (two-year minimum degree), a graduate of an accredited Allied Health Program with patient care experience (two-year minimum degree), or an associate degree (science area preferred), or the equivalent, and complete the following subjects at an accredited college or university prior to entering the program.
- 24 hours of career observation in a radiation oncology department.
- GPA of 3.0 or better, higher is more competitive.
- Admissions essay.
- Interview.

Prerequisite courses
Applicants must complete the following subjects at an accredited college or university prior to entering the program. C- grades are not transferable for credit.

Humanities — 20 units minimum are needed prior to program entry. Choose a minimum of three areas from the following subjects: history, literature, philosophy, foreign language, art/music appreciation/history. Included in this minimum are four units of religion per year of attendance at a Seventh-day Adventist college or university. Eight units of religion are included in the B.S. degree core as a co-requisite. A total of 28 quarter units are required.
Natural Sciences – The study of natural sciences must include a minimum of 12 units.

- Human anatomy and physiology with laboratory, complete sequence (required).
- College algebra (within five years with a minimum grade of B) (required).
- Introduction to physics (required).
- Select from the following content areas: biology, chemistry, geology, mathematics, physics, and statistics.

Social Science – must have a total of 12 quarter units of social science.

- General psychology (required)
- Select additional units from: economics, geography, political science, psychology, sociology, or anthropology.

Communication – A minimum of nine units are needed to complete this area.

- English composition, complete sequence.

Health and Wellness – Personal health or nutrition and two physical activity courses are required to meet the minimum of three quarter units.

Other required courses:

- Medical terminology
- Radiation physics, radiation protection, principles of radiography, and patient care methods - available, as part of the program, for non-ARRT students the first Summer Quarter (ARRT students start Autumn Quarter).

Electives – may be needed to meet the minimum requirements of 192 quarter units. A minimum of 68 quarter units must be taken from general education areas listed above (i.e. humanities, natural sciences, social sciences, communication, and health and wellness). A maximum of 105 quarter units may be transferred from a community/junior college.

- ARRT-certified students will earn 90 units in the program.
  (prerequisite units required: 102 quarter/68 semester)
- non-ARRT-certified students will earn 102 units in the program.
  (prerequisite units required: 90 quarter/60 semester)

For total unit requirements for graduation, see LLU General Education Requirements (p. 28).

Program requirements

ARRT certified students

First Year

Autumn Quarter

AHJC 493 Senior Portfolio I 3
RTTH 344 Radiation Therapy Procedures 2
RTTH 355 Physical Principles of Radiation Therapy I 3
RTTH 364 Radiation Oncology I 2
RTTH 371 Radiation Therapy Affiliation I 2

Winter Quarter

RTCH 387 Writing for Health-Care Professionals 3
RTTH 342 Patient-Care Practices in Radiation Therapy 2
RTTH 356 Physical Principles of Radiation Therapy II 2
RTTH 365 Radiation Oncology II 2
RTTH 372 Radiation Therapy Affiliation II 3

Total Units: 103

1 May be substituted with another RELR course

A minimum grade of C (2.0) is required for all courses in this program.

**Radiography Advanced Placement – Certificate**

**Program director**

William J. Edmunds

The University may grant advanced placement to students who have previous education that exceeds the usual entry-level Medical Radiography Program requirements. Details regarding this option can be viewed online at <https://www.arrt.org/>.

**School certificate**

Students interested in enrolling in this certificate program register through the Office of University Records for courses. The certificate is issued by the School of Allied Health Professions, not Loma Linda University. The University Records Office maintains a record of registration but not the certificate. The sponsoring department in the School of Allied Health Professions maintains a record of the certificate and its awarding.

Financial aid is NOT available to students registered in school certificate programs. These programs do not meet requirements established by the U.S. Department of Education for aid eligibility.

**Program learning outcomes**

By the end of this program, the graduate should be able to:

1. Demonstrate clinical competence.
2. Demonstrate effective patient care.
3. Pass the registry examination.

**Admissions**

Admission is open to A.S. in medical radiography alumni that have not passed the registry exam based on ARRT standards. In addition to Loma Linda University (http://llucatalog.llu.edu/about-university/admission-policies-information/#admissionrequirementstext) and School of Allied Health Professions admissions requirements (http://llucatalog.llu.edu/allied-health-professions/#generalregulationstext), the applicant must also complete the following requirements:

- Must have successfully completed a radiography program (not limited permit).
- Must identify a local clinical site that will provide opportunity to complete mandatory and elective competencies outlined by the ARRT prior to starting the program.

See program policies for more information and latest admissions requirements.

**Program requirements**

The program includes six to seven academic and up to three clinical courses depending on the time needed in clinic to meet program competencies. Each candidate must meet the 31 mandatory and 15 of 35 elective clinical competencies required by the ARRT. If a student can complete the competencies in one quarter of clinical work, s/he does not need to take the second or third clinical course. See program website (http://alliedhealth.llu.edu/rtap) for more information on when courses are offered and contact the program director for questions about clinical requirements.

### Radiologist Assistant — M.S.R.S.

**Program director**
Brigit Mendoza

### The program

The student will receive didactic and clinical mentoring on neonatal, pediatric, adult, and geriatric populations. Courses will be a combination of discussion, projects, case studies, and web-based learning. Students are responsible for finding their own clinical site and radiologist mentor. This is an online program, however, students must be on campus during orientation, the first Autumn, Winter, and Spring Quarters, and during the final Spring Quarter.

### Mission

The mission of the Radiologist Assistant Program is to provide students with a sound clinical, didactic, and moral foundation so that they can impact patient care in a positive and meaningful manner.

### Vision

The Radiologist Assistant Program at Loma Linda University will be one of the premier radiologist assistant programs in the nation—home to a program that students will want to attend. Its diverse and safe learning environment will contribute to promoting Loma Linda University as one of the state's economic and cultural centers.

### Purpose

The purpose of the Radiologist Assistant Program is to educate students to competently function as radiologist assistants in a variety of imaging environments.

### Program learning outcomes

By the end of this program, the graduate should be able to:

1. Perform procedures and clinical activities of the profession.
2. Engage in activities that advance the profession.
3. Impact health-care delivery
4. Maintain recognized educational standards of the profession
5. Employ proper ethics within the profession

### Admissions

Admission is based on a selective process. In addition to Loma Linda University (p. 24) and School of Allied Health Professions admissions requirements (p. 47), the applicant must also complete the following requirements:

- Bachelor's degree from a regionally accredited institution. The degree can be in administration or science.
- Current certification in medical radiography from the American Registry of Radiologic Technologists.
- A minimum of two years of full-time, consecutive radiography work experience.
- Current CPR certification. Must complete ACLS certification prior to applying for boards.
- A course in statistics completed within the past five years. It does not have to be completed at the time of application, but must be completed prior to starting the program.
- A course in research methods completed within the past five years. It does not have to be completed at the time of application, but must be completed prior to starting the program.

### Program requirements

#### First Year

**Autumn Quarter**
- RELT 423 Loma Linda Perspectives 2
- RTA 521 Radiology Procedures and Image Evaluation I 3
- RTA 525 Fluoroscopy and Radiation Protection 1
- RTA 526 Radiology Reporting 1
- RTA 531 Pharmacology for RAs I 2
- RTA 543 Pathophysiology 2
- RTA 771 Clinical Internship I 2

**Winter Quarter**
- AHCJ 402 Pathology I 4
- RTA 510 Cross-Sectional Anatomy I 1
- RTA 522 Radiology Procedures and Image Evaluation II 3
- RTA 532 Pharmacology for RAs II 2
- RTA 541 Patient Assessment I 2
- RTA 772 Clinical Internship II 5

**Spring Quarter**
- AHCJ 403 Pathology II 3
- RTA 511 Cross-sectional Anatomy II 1
- RTA 523 Radiology Procedures and Image Evaluation III 3
- RTA 542 Patient Assessment II 2
- RTA 546 Topics for the Radiologist Assistant 2
- RTA 773 Clinical Internship III 6

#### Second Year

**Summer Quarter**
- RTA 524 Radiology Procedures and Image Evaluation IV 3
- RTA 543 Clinical Management and Education 2
- RTA 774 Clinical Internship IV 6

**Autumn Quarter**
- AHCJ 566 Theoretical Foundations of Leadership 3
- RTA 519 Medical-Legal Issues in Radiology 1
- RTA 775 Clinical Internship V 6
- REL_ 5__ Graduate-level Religion 3

**Winter Quarter**
- RTA 518 Radiobiology and Health Physics 2
- RTA 588 Comprehensive Review I 1
- RTA 776 Clinical Internship VI 6
Normal time to complete the program
Two (2) years (seven [7] academic quarters) — based on full-time enrollment

Special Imaging CT and MRI — Certificates

Program director
Kate Cockrill

Clinical coordinator
Joe Hewes

Overview of program
Computed tomography (CT) and magnetic resonance imaging (MRI) technologists work in a highly specialized field operating sophisticated computerized tomography equipment. This technology provides detailed cross-sectional images of the human body—assisting physicians with quality patient diagnosis and treatment. These full-time programs are scheduled as follow:

CT—six-month certificate program completed in two quarters—Autumn and Winter. An additional quarter of clinic may be available to students who have not met program requirements. Additional time will be at the discretion of the program director in collaboration with the student.

MRI—six-month certificate program that requires two quarters beginning Spring Quarter or Autumn Quarter. An additional quarter of clinic may be available to students who have not met program requirements. Additional time will be at the discretion of the program director in collaboration with the student. A nine-month, part-time option is available for qualified students. This three-quarter option begins in the Autumn Quarter.

CT/MRI—twelve-month certificate program completed in four academic quarters—Autumn through Summer. An additional quarter of clinic may be available to students who have not met program requirements. Additional time will be at the discretion of the program director in collaboration with the student.

During the program, students take formal course work along with clinical instruction. There are no arrangements for part-time or evening status. Clinical sites are available in a variety of regions in Southern California. However, the University cannot guarantee that the student will be placed close to his/her residence.

The program’s load requires 40 hours per week, which includes didactic education and clinical experience. Clinical experience includes four, eight-hour days per week. Classes are scheduled for one day per week and may require the student to be on campus.

Students will be required to submit current immunization records and undergo a background check during the registration process. For information regarding immunizations, contact student health services at <http://www.llu.edu/central/ssweb/index.page>. Students will be responsible for paying any fees associated with immumizations and background checks.

Loma Linda University and the Department of Radiation Technology cannot guarantee employment.

Program outcomes
Upon completion of the program, the graduate should able to:

- Model the role of a special imaging professional.
- Demonstrate leadership and critical thinking in all areas of CT and/or MRI scanning.
- Behave according to ethical standards as a professional CT and/or MRI technologist.
- Positively interact and communicate with patients, department personnel, and professional staff.
- Maintain skills and knowledge by interacting with fellow professionals, attending education conferences, and staying current with changing technology.

The CT/MRI student profile

- Enthusiastic and interested in maintaining high standards of academics, clinical performance, and patient care.
- Possesses a broad knowledge of human anatomy and computer skills.
- Demonstrates strong academic performance in science and related courses.
- Detail-oriented and able to work under pressure while demonstrating critical-thinking and problem-solving skills.

Admissions
Admission is based on a selective process. In addition to Loma Linda University (p. 24) and School of Allied Health Professions admissions requirements (p. 47), the applicant must also complete the following requirements:

- Current ARRT registry in Radiography (R)*
- Current California (CRT) license*
- Current CPR card with the American Heart Association
- A minimum G.P.A. of 2.5 maintained in all didactic and clinical course work
- Three recommendations from prior teachers, work supervisors, or health professionals who are knowledgeable about your qualifications
- Observation experience—A minimum of twelve hours of career observation in each modality (CT and MRI) is required. The career observation form is available as a download from the Web site.
- Venipuncture is highly recommended

* An applicant who is completing a program in radiologic technology prior to the start of the program may apply as long as s/he has completed ARRT, CRT, and CPR requirements by the program start date.

Applicants who are eligible to take the ARRT examination for certification but who have not had opportunity to do so are given provisional status for one quarter. Eligibility to continue is subject to student’s obtaining certification. It should be understood that the University will not sign or
validate registry documents of students who obtained their training in another program.

Students interested in using CT and MRI as part of their Bachelor of Science degree should review the Radiation Sciences, BS program.

Application dates
1. Applications are accepted starting January 1st of each year.
2. Deadlines for applications are
   a. May 1 for CT-only applicants, MRI-only fall-start applicants, and CT/MRI combined applicants
   b. December 1 for MRI-only spring-start applicants
3. Applicants should submit applications early since interview slots are limited.

Interviews
CT and MRI interviews are conducted in July for fall-start applicants and January for MRI-only spring-start applicants. Qualified applicants will be interviewed by the program director and representatives of the School of Allied Health Professions. Applicants residing in Southern California should plan for personal interviews on campus at Loma Linda. Applicants will be notified by telephone and/or e-mail of their interview schedules. Due to the limited number of interview dates/times, you will be assigned an interview slot, and you should plan around your interview as alternate dates/times are not available. Applicants are rated in the following four areas:

- Work experience or training background
- Recommendations
- Academic record
- Communication skills, knowledge, and motivation.

Selection
After applicants have been interviewed, the selection committee for the CT and MRI Special Imaging Program meets to make final selections. Selections are usually decided by the middle of July for fall-start applicants and early February for spring-start applicants, and confirmation of each decision is mailed to the respective applicant from the Office of Admissions for the School of Allied Health Professions.

¹ Students take one religion course selected from offerings by the School of Religion. The selection of course varies by quarter, including but not limited to the following courses: RELT 423 Loma Linda Perspectives, RELT 436 Adventist Heritage and Health, RELE 457 Christian Ethics and Health Care, RELT 415 Christian Theology and Popular Culture.

Comparison chart based on MRI spring start date. MRI may also begin in autumn.
We’re glad you have chosen to consider Loma Linda University’s School of Behavioral Health as you make plans to continue toward your educational goals. This CATALOG describes who we are and what we have to offer. It will familiarize you with the philosophy and structure of our programs, and will provide you with a listing of participating faculty members.

Loma Linda University is a religious, nonprofit institution that welcomes students and staff from a broad spectrum of religious persuasions while reserving the right to give preference to qualified members of its sponsoring denomination. As stated in its nondiscrimination policy, the institution "affirms that all persons are of equal worth in the sight of God and they should so be regarded by all people." Since several of the professions—for which programs within the School of Behavioral Health prepare students—have a tradition of advocacy for oppressed peoples, it is important that the institution, faculty, and staff demonstrate their acceptance of and willingness to assist those in our society who are less privileged. The University actively sponsors several programs that move the institutional health-care personnel resources and expertise into the local, national, and international communities to work with otherwise underserved populations. This component of service is an integral part of the statement of mission and a message intended to be captured in the Good Samaritan sculpture that occupies a central position on the campus.

The School of Behavioral Health, as part of the University, has expectations of students, faculty, and staff in the areas of conduct and behavior while they are on campus or involved in school or University activities. As such, the School of Behavioral Health adheres to the policies of the University and affirms that Christian principles are incompatible with the various forms of discrimination that have divided societies; and that all persons are of equal worth in the sight of God and should be so regarded by all His people. Therefore, the School of Behavioral Health is committed to equal education and employment opportunities for individuals of all races; and does not unlawfully discriminate on the basis of veteran status, handicap, gender identity, sexual orientation, race, color, or national origin in its educational or admissions policies, financial affairs, employment, student life and services, or in any of its programs. In support of this position, we expect our students, faculty, and staff to demonstrate unwavering respect for the diversity of others and to interact with integrity—never forgetting the ethics and standards that guide professional actions. Further, we expect our programs through their faculty to develop competent, compassionate, ethical professionals who possess the knowledge, skills, and values to equip graduates for a life dedicated of service to humanity.

You will find vigorous academic programs that will stretch your mind as you take time to make new discoveries, get to understand our world, and apply Christ-centered values to your life and profession.

Our administrators, faculty, and staff are here to work with you and help you prepare for your future as a caring, Christian professional in the world of service to mankind. If you would like to know more about us, you can call us toll free at 800/422-4LLU.

Beverly J. Buckles, D.S.W.
Dean, School of Behavioral Health
School foundations

The School of Behavioral Health includes the Departments of Counseling and Family Sciences, Psychology, and Social Work and Social Ecology, and the Division of Interdisciplinary Studies. The school offers master’s and doctoral degree programs, as well as post-baccalaureate and post-degree certificates. These programs equip graduates with leading-edge knowledge and practice experiences necessary for careers in behavioral health practice, research, and administration.

Philosophy

The School of Behavioral Health is grounded in a deep commitment to the University’s mission to further the teaching and healing ministries of Jesus Christ, which produces wholeness within transformed lives. Transformation is viewed as a lifelong journey of faith and learning underpinned by a bio-psycho-social-spiritual perspective, which assumes that wholeness is achieved when all subsystems affecting human needs are understood and in balance. This pursuit seeks to understand and promote healthy minds, communities, social systems, and human relationships that enable individuals to experience resiliency and live meaningful lives. Such wholeness manifests itself in a life of service to humanity and to God.

In the School of Behavioral Health, these purposes are achieved through academic programs—including research, clinical practice, and global learning experiences—that engage faculty and students in the highest levels of scholarship, professionalism, and the quest for wholeness. Because these pursuits are served by knowledge, graduate students are obliged to achieve both broad and detailed mastery of their fields of study and participate with the faculty in the process by which knowledge is created and applied. The end result is firm adherence to the global traditions of Loma Linda University through scholarly and practice pursuits that aim to strengthen the effectiveness of behavioral health practice and research to improve the quality of life for individuals and communities around the world.

Goals

The School of Behavioral Health attempts to create an environment favorable to the pursuit of knowledge and meaning by:

1. Making available to graduate students who wish to study in a Seventh-day Adventist Christian setting the education necessary for scholarly and professional careers in the behavioral health professions.
2. Encouraging development of independent judgment, mastery of research techniques, and contribution to scholarly communication.
3. Fostering the integration of science and practice in the service of humankind.

Learning outcomes and assessment

Supporting these goals, the School of Behavioral Health has adopted Loma Linda University’s institutional learning outcomes (p. 19) (ILOs).

The School of Behavioral Health supports the realization of the University’s learning outcomes through the curricula of its degree programs by providing students with content and active learning experiences that reflect the current practice and professional knowledge, skills, behaviors, and attitudes needed for competent practice in behavioral health, including, but not limited to:

- Professional and personal self care
- Ethical and professional standards of conduct and behavior
- Legal and statutory mandates affecting practice
- Clinical knowledge shared and specific to disciplines
- Therapeutic and reflective use of self
- Analytical methods supporting scholarship and the integration of science and practice in the development of new knowledge and improved services
- Professional communication and presentation skills
- Strengths perspectives supporting wellness, recovery, and anti-stigma
- Integration of spirituality and cultural competency
- Integration of behavioral health into primary health care
- Global context of behavioral health practice
- Collegial and collaborative team practice
- Commitment to continuous professional development, service, and lifelong learning

The assessment of the University’s student learning outcomes is integrated into the specific program and department criteria and methods used to address professional accreditation assessment requirements. Where possible, these data are used to support the development of school-wide metrics.

Mission

Operationalizing this philosophy, the mission of the School of Behavioral Health is to provide a spiritually supportive context for teaching, clinical practice, and research innovation that pursues integrative behavioral health aimed at reducing health disparities and promoting social justice in a global context locally and abroad.

General regulations

Application and acceptance

Application procedure

1. Application instructions, available on the Web at <llu.edu/central/apply>, allow students to apply online and begin an application. Applications and all supporting information, transcripts, test results, and references should be submitted by the deadline posted on the application, per degree.
2. Complete official transcripts of all academic records from all colleges, universities, and professional or technical schools must be provided for official acceptance into a program. It is the applicant’s responsibility to arrange to have the transcripts—including official English translations, if applicable—sent directly to Admissions Processing by the issuing institution. Transcripts that come via an intermediary are unacceptable.
3. A personal interview is often desirable and is required by some programs. The interview should be arranged with the coordinator of the program in which the student wishes to study.

Acceptance procedure

1. When the program that the student wishes to enter has evaluated the applications and made its recommendation, the dean of the School of Behavioral Health takes official action and notifies accepted applicants by email and through first class U.S. mail. Accepted applicants must respond affirmatively using the online admissions confirmation system before becoming eligible to register in the School of Behavioral Health. Applicants who have been denied acceptance are currently notified using first class U.S. mail only.
2. As part of registration, accepted students will be asked to file with Student Health Service a medical history with evidence of certain immunizations.

3. Transcripts of records and all other application documents are retained by the University and may not be withdrawn and used for any purpose. Records of students who do not enroll or who withdraw prior to completion are retained for two years from the date of original acceptance to a School of Behavioral Health program.

4. New students are required to pass a background check before they can register for courses.

Admission requirements
A four-year baccalaureate degree (or its equivalent) from an accredited college or university is a prerequisite for admission to School of Behavioral Health's graduate programs. Transcripts of the applicant's scholastic record need to demonstrate appropriate preparation, in grades and content, for the curriculum chosen. Since there is some variation in the pattern of undergraduate courses prescribed by different programs, the applicant should note the specific requirements of the chosen program. Deficiencies may be fulfilled while enrolled; prerequisites must be completed prior to matriculation.

Scholarship
Applicants are expected to present an undergraduate record with a grade point average of B (3.0) or better in the overall program and in the major field. Depending on program-specific criteria, admissions consideration may be given if grades from the junior and senior years of the undergraduate degree are superior or there is other evidence of capability.

Graduate Record Examination
Scores on the general test of the Graduate Record Examination (GRE) are required with application for admission to many degree programs. New test scores are needed if it has been more than five years since the last test was taken. Applicants are advised to request information specific to their proposed program of study.

For complete information about the GRE, please visit their Web site at <http://www.ets.org/gre/>; or write to Educational Testing Service, 1947 Center Street, Berkeley, CA 94701 (for the West); and P.O. Box 6000, Princeton, NJ 08541 (for the East). For GRE publications (including study materials), call 800/537-3160.

Programs that do not require the GRE must submit one additional measure of a candidate's preparation for graduate study. This may be either an evaluation of critical essay-writing skills, the Miller Analogies Test, the results of a structured interview, or other specified program criteria.

Re-entrance
Students who are currently enrolled in the School of Behavioral Health may request transfer to a different program or a more advanced degree level by contacting the School of Behavioral Health Admissions Office for information on an abbreviated application and instructions for submitting the appropriate supporting documents. Transcripts on file with the University are acceptable.

English-language competence
Regardless of nationality or citizenship, an applicant whose native language is not English or who's secondary education has been obtained outside the U.S. is required to pass an approved English proficiency test. Additionally, any applicant whose English competency is uncertain in regard to his/her professional success in course, clinical, or other program requirements will be required to pass an English proficiency test. University policy regarding minimum passing scores and timeline for acceptable test reports all apply.

Graduate degree requirements
Minimum required grade point average
Each student must maintain a cumulative grade point average of at least a B (3.0) and receive a grade of B or higher in each graduate-level course to continue in regular standing. In some cases, programs may recommend conditional consideration of course grades below a B (3.0) if clinical competency and consumer protection are not compromised. Academic variances that document the rationale for acceptance of grades below a B (3.0), must be submitted to the dean's office for approval.

All transfer courses must meet the B (3.0) minimum grade requirement and be equivalent to courses appropriate to degree requirements. Grades for transfer courses are not calculated as part of a student's matriculating G.P.A.

Service learning
All School of Behavioral Health students are required to complete an approved academic service-learning course prior to graduation. Courses currently approved to meet this requirement are specified in each program's curricula.

From Master's to Ph.D. degree
Bypassing master's degree
A graduate student at this University may proceed first to a master's degree. If, at the time of application, the student wishes to qualify for the Doctor of Philosophy degree, this intention should be declared even if the first objective is a master's degree.

If after admission to the master's degree program a student wishes to go on to the doctoral degree, an abbreviated application should be completed and submitted, along with appropriate supporting documents, to the School of Behavioral Health Admissions Office. If the award of the master's degree is sought, the student will be expected to complete that degree before embarking on doctoral activity for credit. A student who bypasses the master's degree may be permitted, on the recommendation of the guidance committee and with the consent of the dean, to transfer courses and research that have been completed in the appropriate field and are of equivalent quality and scope to his/her doctoral program.

Second master's degree
A student who wishes to qualify for an additional master's degree in a different discipline may apply. The dean of the School of Behavioral Health and the faculty of the program the student wishes to enter will consider such a request on its individual merits.

Concurrent admission
Students may not be admitted to a School of Behavioral Health program while admitted to another program at this University or elsewhere. The exceptions to this are combined degrees programs discussed in the next paragraph.

Combined degrees
Students may not be admitted to a School of Behavioral Health program while admitted to another program at this University or elsewhere. The exceptions to this are the combined degrees programs.
Certificate programs
The School of Behavioral Health offers post-baccalaureate and post-degree certificate programs. Students accepted into such programs are assigned an advisor who works with them as they fulfill the program requirements. Students are required to maintain a B (3.0) grade point average, with no course grade below B (3.0). All certificate students are required to take at least one, three-unit religion course (numbered between 500 and 600).

Master of Arts/Master of Science/Master of Social Work
Advisor and guidance committee
Each student accepted into a degree program is assigned an advisor who advises the student in meeting the program of study and University requirements. The advisor works with the director of the student’s program to support the student’s successful progress to graduation.

Subject prerequisites and deficiencies
Gaps in an applicant’s academic achievement will be identified by subject and classified either as prerequisites or as subject deficiencies. Applicants lacking certain subject or program prerequisites may not be admitted to the master’s degree program until the prerequisites are completed (at Loma Linda University or elsewhere) and acceptable grades are reported. However, subject deficiencies do not exclude an applicant from admission or enrollment; but deficiencies must be completed as specified and within the time-frame determined, usually during the first full quarter of study at this University.

Study plan
The student’s advisor should develop with the student a written outline of the complete graduate experience, with time and activity specified as fully as possible. This will serve as a guide to both the student and the advisor. Changes to the academic plan must be approved by the student’s advisor and the program director.

The student is ultimately responsible for ensuring both timely registration and completion of all required courses.

Time limit
The time allowed from admission to the School of Behavioral Health to conferring of the master’s degree may not exceed five years. Program extensions can be considered within the limits of University policy.

Course credit allowed toward the master’s degree is nullified five years from the date of course completion. Nullified courses may be revalidated, upon successful petition, through reading, conferences, written reports, or examination to assure currency in the content. Academic documentation of the justification of revalidated courses must be approved by the dean’s office.

Residence
Students must meet the residence requirements indicated for their particular program (never less than one academic quarter). The master’s degree candidate must complete one quarter of full-time study at the University or perform the thesis research at the University. Although the number of units students take varies by program, students are expected to work closely with their advisors to assure that their course loads are consistent with program requirements, as well as degree completion options and timelines.

Comprehensive and final examinations
The student must take written, oral, and final examinations prescribed by the program on or before the published dates. If a candidate fails to pass the oral or written examination for a graduate degree, the program director in association with the program’s academic standards committee determines the requirements needed to ameliorate the failed examination. In the case of a failed thesis defense, a written analysis of the candidate’s status and program’s recommendations are filed with the dean’s office. The student receives a copy of the committee’s recommendation.

Research competence
Student skills required in research, language, investigation, and computation are specified in each program description in this CATALOG.

Candidacy
Admission to the School of Behavioral Health or designation of regular graduate standing does not constitute admission of the student to candidacy for a graduate degree. After achieving regular status, admission to candidacy is initiated by a written petition (School of Behavioral Health Form A) from the student to the dean, on recommendation of the student’s advisor and the program coordinator or department chair.

Students petitioning the School of Behavioral Health for candidacy for the master’s degree must present a satisfactory grade record, include a statement of the proposed thesis or dissertation topic (where applicable) that has been approved by the student’s guidance committee, and note any other qualification prescribed by the program. Students are usually advanced to candidacy during the third quarter of study for full-time students.

Specific program requirements
In addition to the foregoing, the student is subject to the requirements stated in the section of the CATALOG governing the specific program chosen.

Religion requirement
All master’s degree students are required to take at least one, three-unit religion course (courses numbered between 500 and 600). Students should check with their programs for specific guidelines.

Combined degrees programs
A number of combined degrees programs are offered, each intended to provide more comprehensive preparation in clinical applications and the biomedical sciences. Concurrent admission to two programs in the School of Behavioral Health or to a program in the School of Behavioral Health and to a professional school in the University is required. These curricula are described in greater detail under the heading “Combined Degrees Programs” in this section of the CATALOG.

Thesis
Students writing a thesis must register for at least one unit of thesis credit. The research and thesis preparation are under the direction of a thesis chair and research committee. The timeline for determining a thesis topic and research design are program specific, but must be secured before petition is made for candidacy.

The student must register and pay tuition for thesis credit, whether the work is done in residence or in absentia. If the student has been advanced to candidacy, has completed all course requirements, and has registered for but not completed the research and thesis, continuous registration is to be maintained until the manuscript has been accepted. This involves a quarterly enrollment fee paid at the beginning of each quarter.
Format guide
Instructions for the preparation and format of the publishable paper, thesis, or dissertation are in the Thesis and Dissertation Format Guide, available through the Faculty of Graduate Studies dissertation editor. Consultation with the dissertation editor can help the student avoid formatting errors that would require him/her to retype large sections of manuscript. The last day for submitting copies to the school office in final approved form is published in the events calendar (available from the academic dean’s office).

Binding
The cost of binding two copies of the thesis, one copy to be deposited in the University Library or appropriate department or school collection and one for the student, will be paid for by the student’s department. The student will be responsible for paying the cost of binding additional personal copies.

Doctor of Philosophy
The Doctor of Philosophy degree is awarded for evidence of mature scholarship, productive promise; and active awareness of the history, resources, and demands of a specialized field.

Advisor and doctoral research committee
The School of Behavioral Health requires advisors for Doctor of Philosophy degree candidates to have demonstrated scholarship productivity in their chosen disciplines. Each student, upon acceptance into a doctoral degree program, is assigned an advisor to assist with academic planning and guidance through program requirements. Subsequently (no later than when applying for candidacy), the student is assigned a doctoral research committee. Each program maintains a list of qualified doctoral degree mentors. The doctoral research committee, usually chaired by the advisor, is responsible for screening dissertation topics, recommending candidacy, guiding research, administering written and oral examinations, evaluating the dissertation/project and other evidence of the candidate’s fitness to receive the degree, and recommending the student for graduation.

Subject prerequisites and deficiencies
Gaps in an applicant’s academic achievement will be identified by subjects and classified as either prerequisites or as subject deficiencies. Applicants lacking subject or program prerequisites may not be admitted to the Ph.D. degree program until prerequisites are completed (at Loma Linda University or elsewhere) with acceptable grades. However, subject deficiencies do not exclude an applicant from admission or enrollment; but deficiencies must be completed as specified and within the timeframe determined, usually during the first full quarter of study at this University.

Study plan
The student’s advisor should develop with the student a written outline of the complete graduate experience, with time and activity specified as fully as possible. This serves as a guide to both the student and the advisor, as well as to members of the guidance committee when it is selected. The study plan is changed only after careful consultation. The student is ultimately responsible for ensuring both timely registration and completion of required courses.

Time limit
Completion of the graduate experience signals currency and competence in the discipline. Seven years are allowed for completion after admission to the Ph.D. degree program. Program extensions can be considered within the limits of University policy.

Course credit allowed toward the doctorate is nullified eight years from the date of course completion. To assure currency in the content, nullified courses may be revalidated—upon successful petition—through reading, conference, written reports, or examination. Academic documentation of the justification of revalidated courses must be approved by the dean’s office with recommendations regarding the student’s future relation to the school.

Residence
The School of Behavioral Health requires two years of residency for the doctoral degrees—D.M.F.T, Psy.D., Ph.D.—spent on the campus of the University after enrollment in a doctoral degree program. During residence, students devote full time to graduate activity in courses, clinical practice, research, or a combination of these. A full load of courses is eight or more units each quarter; 36 or more clock hours per week is full time in research.

Students may be advised to pursue for limited periods at special facilities studies not available at Loma Linda University. Such time may be considered residence if the arrangement is approved in advance by the dean of the School of Behavioral Health.

The spirit and demands of doctoral degree study require full-time devotion to courses, research, reading, and reflection. But neither the passage of time nor preoccupation with study assures success. Evidence of high scholarship and original contribution to the field or professional competence form the basis for determining the awarding of the degree.

Scholarly competence
Doctoral degree students demonstrate competency in scholarship along with research, clinical competence, and professional development. Expectations and standards of achievement with the tools of investigation, natural and synthetic languages, and computers are specified in this section of the CATALOG for each program.

Comprehensive examinations
The doctoral degree candidate is required to take comprehensive written and oral examinations over the principal areas of study to ascertain capacity for independent, productive, scientific work; and to determine whether further courses are required before the final year of preparation for the doctorate is undertaken. The program coordinator is responsible for arranging preparation and administration of the examination, as well as its evaluation and subsequent reports of results. Success in the comprehensive examination is a prerequisite to candidacy.

Students cannot be admitted to the examination until they have completed the majority of units required beyond the master’s degree or its equivalent.

The final oral examination
After completion of the dissertation and not later than a month before the date of graduation, the doctoral degree candidate is required to appear before an examining committee for the final oral examination/dissertation defense.

If a candidate fails to pass this final examination/dissertation for a graduate degree, the program director in association with the program’s academic standards committee determines the requirements needed to ameliorate the failed examination. A written analysis of the candidate’s status and the program’s recommendations are filed with the dean’s office. The student receives a copy of the committee’s recommendation.
Project
All Doctor of Psychology and Doctor of Marital and Family Therapy degree students are required to complete a project and all professional doctoral degree students must register for and complete all research units as specified by the program requirements.

Each student, upon acceptance into a professional doctoral degree program, is assigned an advisor to assist with academic planning and guidance through program requirements. The School of Behavioral Health requires advisors for professional doctoral degree program to have demonstrated scholarship productivity in specific disciplines. Prior to advancing to candidacy each student is also assigned a doctoral research committee and have an approved topic for research project. Each program maintains a list of qualified doctoral degree mentors. The doctoral research committee, usually chaired by the advisor, is responsible for screening research topics, recommending candidacy, guiding research, administering written and oral examinations, evaluating the research project and other evidence of the candidate’s fitness to receive the degree, and recommending the student for graduation.

If the student has been advanced to candidacy, has completed all course requirements, and has registered for but not completed the research and project, continuous registration is maintained until the project manuscript is accepted and the final oral defense completed. This involves a quarterly fee to be paid during registration each quarter. A continuing registration fee is also assessed for each quarter the student fails to register for new units. As such, the student must have active registration during the quarter that the final oral defense is completed.

Dissertation
All Doctor of Philosophy students are required to complete a dissertation and must register for and complete all of the research units as specified by the program requirements.

Each student, upon acceptance into a Doctor of Philosophy program is assigned an advisor to assist with academic planning and guidance through program requirements. The School of Behavioral Health requires advisors for these doctoral degree program to have demonstrated scholarship productivity. Prior to advancing to candidacy each student is also assigned a doctoral research committee and have an approved topic for the dissertation. Each program maintains a list of qualified doctoral degree mentors. The doctoral research committee, usually chaired by the advisor, is responsible for screening dissertation topics, recommending candidacy, guiding research, administering written and oral examinations, evaluating the dissertation and other evidence of the candidate’s fitness to receive the degree, and recommending the student for graduation.

Doctor of Philosophy students are required to be knowledgeable of the dissertation requirements and policies set by the Faculty of Graduate Studies. Consultation with the Faculty of Graduate Studies dissertation editor can prevent the student from committing formatting errors that would require retyping large sections of the manuscript.

Students register and pay tuition for the dissertation, whether the work is done in residence or in absenta. If the student has been advanced to candidacy, has completed all course requirements, and has registered for but not completed the research and dissertation, continuous registration is maintained until the manuscript is accepted and the final oral defense completed. This involves a quarterly fee to be paid during registration each quarter. A continuing registration fee is also assessed for each quarter the student fails to register for new units. As such, the student must have active registration during the quarter that the final oral defense is completed.

Doctoral dissertations are reported to University Microfilms International and to the National Opinion Research Center. The Faculty of Graduate Studies provides appropriate information and forms.

Candidacy
Admission to the School of Behavioral Health does not constitute candidacy for a graduate degree. Admission to candidacy is initiated by a written petition (School of Behavioral Health Form A) from the student to the dean, with support from the student’s advisor and the program chair.

The student’s petition for candidacy for the Doctor of Philosophy degree will include confirmation that comprehensive written and oral examinations have been passed.

Students expecting the award of the doctorate at a June graduation should have achieved candidacy no later than the previous November 15. One full quarter must be allowed between the achievement of candidacy and the quarter of completion.

Specific program requirements
Doctoral programs differ. Each unique program's requirements appear in the programs section of this CATALOG (Section III) and in the program guides available from specific departments.

Religion requirement
All doctoral students should take at least three, three-unit religion courses (numbered between 500 and 600) for a total of nine units of religion courses. Students should check with their programs for specific guidelines.

Combined degrees programs
A number of combined degrees programs are offered, each intended to provide additional preparation in clinical, professional, or basic areas related to the student’s field of interest. All require concurrent admission to the School of Behavioral Health and a professional school in the University. The combined degrees programs provide opportunity for especially well-qualified and motivated students to pursue professional and graduate education; and to prepare for careers in clinical specialization, teaching, or investigation of problems of health and disease in humans.

For admission to a combined degrees program, the student must have a baccalaureate degree, qualify for admission to the School of Behavioral Health, and already be admitted to another program at the University. Application may be made at any point in the student’s progress in the professional school, though it is usually made during the second year. Students in this curriculum study toward the M.A., M.S., M.S.W., Psy.D., or Ph.D. degree.

Students may, as needed, be required to interrupt their professional study for two or more years for courses and research for the graduate degree sought. Elective time in the professional school may be spent in meeting School of Behavioral Health requirements.

The student’s concurrent status is regarded as continuous until the program is completed or until discontinuance is recommended by the School of Behavioral Health or the professional school. The usual degree requirements apply.

The following combined degrees programs are offered in conjunction with the School of Behavioral Health.
Social Welfare and Social Research with Biomedical and Clinical Ethics (Ph.D./M.A. (p. 417)) (closed to admission for the 2019-2020 academic year.)
Social Work with Criminal Justice (M.S.W./M.S. (p. 418))
Social Work with Gerontology (M.S.W./M.S. (p. 419))

Student life
The information on student life contained in this CATALOG is brief. The Student Handbook more comprehensively addresses University and school expectations, regulations, and policies; and is available to each registered student. Students need to familiarize themselves with the contents of the Student Handbook. Additional information regarding policies specific to a particular school or program within the University is available from the respective school.

The School of Behavioral Health provides a school-specific Policies and Procedures Manual to all School of Behavioral Health students. Regulations, policies, procedures, and other program requirements are contained in this manual.

Academic information
Conditions of registration, residence, attendance
Academic residence
A student must meet the residence requirements indicated for a particular degree, which is never less than one academic quarter. A year of residence is defined as three quarters of academic work. A student is in full-time residence if registered for at least eight units. A maximum of 12 units may be taken without special petition to the dean of the School of Behavioral Health, unless the student is enrolled in an approved block-registration program or the program requirements specify otherwise.

Transfer credits
Transfer credits will not be used to offset course work at this University that earns less than a B (3.0) average. This transfer is limited to credits that have not already been applied to a degree and for which a grade of B (3.0) or better has been recorded. A maximum of nine quarter units that have been previously applied to another degree may be accepted as transfer credits upon petition. A candidate who holds a master's degree or presents its equivalent by transcript may receive credit up to 20 percent of the total units for the degree, subject to the consent of the dean and the department chair involved. In such instances, the transfer student is not relieved of residence requirements at this University.

Students should also review the requirements of in their program of study as some professional degree programs require grades higher than a B (3.0) for transfer courses, and may restrict the courses and experiences that may be transferred from other academic institutions.

If permitted for transfer, credit for practicum experiences is allowed only where university credit has been received for equivalent experiences. Credit for life or work experiences cannot be used to meet the requirements in any degree or certificate program in the School of Behavioral Health.

Advanced standing
Advanced standing is a designation used in specific professional degree programs to address possible content redundancy between levels of degrees available within those professions. Evaluation of eligibility for advanced standing is program specific when specific conditions are met. Students should review the availability of advanced standing in their program. Academic variances are used to document the availability of advanced standing.

Academic and professional/clinical probation
Continued enrollment in a professional degree program or certificate is contingent upon a student's continued satisfactory academic and professional (clinical) performance. Any student whose performance in either of these areas falls below the requirements of their program, the school, or university will be placed on one or more of these types of probation.

Academic probation
Degree students whose overall grade point average falls below a 3.0 will be placed on academic probation. Students on academic probation who fail to earn a 3.0 for the next quarter or who fail to have an overall G.P.A. of 3.0 after two quarters may be dismissed from school. The academic requirements for post-baccalaureate and post-degree certificate programs is the same as the G.P.A. requirements for all other School of Behavioral Health programs.

Professional performance probation
All students enrolled in professional programs are required to adhere to the professional, clinical, and ethical standards set forth by their disciplines, the school, and university. Students obtain copies of the ethical and professional performance and clinical practice standards and requirements set forth by their disciplines through their academic programs. Professional performance requirements for the School of Behavioral Health are included in each program's student handbooks and in the school's student handbook. Program handbooks and the school's student handbook are provided to students as they begin their degree program. The University's conduct and behavior expectations are provided in the Loma Linda University Student Handbook. Any student whose performance is evaluated to fall below these requirements will be placed on professional performance, or clinical, probation at the recommendation of the department's academic standards committee and department chair to the dean of the school. Enrollment in course, clinical work, or other program requirements while on professional performance probation is at the recommendation of the department and approval of the dean, and also conditional based upon the severity of the situation and extent of amelioration. Any student whose professional performance falls below these minimum requirements for two consecutive or dispersed quarters will be evaluated for dismissal from the school.

In addition, a student who receives an Unsatisfactory (U) in any segment or quarter of a practicum or clinical requirement is automatically placed on professional performance, or clinical, probation by the dean's office. Continued enrollment for the next quarter, term, or rotation segment for a student on professional performance probation is subject to the recommendation of the department chair and its academic standards committee to the dean of the school. A student who receives a U grade for a second consecutive or dispersed segment or quarter of practicum will be evaluated for dismissal from the school. Program and professional specific requirements also apply in these situations and will affect the evaluation of the student's continuing status in the program of study, the school, and University.
Financial information
Schedule of charges (2018–2019)

Tuition
- $814 Per unit, graduate credit
- $407 Per unit, audit
- $4,500 Flat fee for the Play Therapy Certificate Program
- $35,637 Per year: Psychology Psy.D. and Ph.D.

Special charges
- $35 Application fee*
- $70 Application fee for combined degrees
- $823 Enrollment fee per quarter
- $200 Nonrefundable tuition deposit**
- $35 Application to add program or degree

Programs may have additional fees.***

* All students who submit their application by the VIP Priority deadline will have 100 percent of the application fee credited to their student account towards the first quarter of tuition (see dates below).
** The $200 nonrefundable deposit will be credited to the student's account towards the first quarter of tuition.
*** Clinical training fees apply and vary by program. Fees are at a reduced rate below the current per unit tuition rate. Additional fees for specialized professional and global practice experiences may also apply.

The Department of Counseling and Family Sciences supports the mission of Loma Linda University, sharing its commitment to bring wholeness to individuals and families in near and far-away places. It values global outreach and seeks to provide opportunities for students to integrate knowledge and skills with diverse peoples in various life contexts. The department is proud of its well-qualified faculty which values teaching, research, and service; and whose members seek to build up their respective professions in tangible ways. The various academic programs have program accreditations and approvals and have been recognized for their outstanding work, high standards, and superior student outcomes.

As one of the three academic departments housed in the School of Behavioral Health at Loma Linda University, the Department of Counseling and Family Sciences administers three master’s degree programs—child life specialist (M.S.), counseling (M.S.), and marital and family therapy (M.S.); and two doctoral programs—a Ph.D. degree in systems, families, and couples that offers a clinical specialty (MFT); and a nonclinical specialty in family studies, and a Doctor of Marital and Family Therapy (D.M.F.T.) degree.

Certificate programs are offered to augment academic and professional preparation for future careers. They include drug and alcohol counseling (p. 161) (online only) and the school counseling (p. 170) certificate which leads to the pupil personnel services credential.

Academic writing support
Students who need assistance can contact their program directors to arrange individual support through the CFS writing center.

Combined degrees
The department offers a dual-degree program in M.S. in counseling and M.S. in marital and family therapy with school counseling certificate (p. 409). The department also offers a combined M.S./M.A. (http://llucatalog.llu.edu/combined-degree-programs/clinical-min-mfam-ma-ma) degree program in marital and family therapy with clinical ministry.

A complete list of program instructors can be viewed online at <llu.edu/behavioral-health/cfs>.

Child Life Specialist — M.S.

Program director
Michelle Minyard-Widmann

Clinical coordinator
Alisha Saavedra

The Department of Counseling and Family Sciences offers high-quality academic education and clinical training leading to a Master’s degree in the child life specialist program. This degree prepares individuals to provide child life services in health-care settings. In addition, practice experiences within the United States and in other countries will provide students with child life practice in diverse environments.

The child life profession
Child life specialists are professionals in child development. They promote effective coping through play, preparation, education, and self-expression activities. Child life specialists provide emotional support for families and encourage optimum development of children facing a broad range of challenging experiences, particularly those related to health care and hospitalization. Understanding that a child’s well-being depends on the support of the family, child life specialists provide information, support, and guidance to parents, siblings, and other family members. They also play a vital role in educating caregivers, administrators, and the general public about the needs of children under stress (Association of Child Life Professionals <http://www.childlife.org>).

The program

Certification for the child life profession
Through the Association of Child Life Professionals, the certified child life specialist (CCLS) credential was developed to increase the proficiency of child life professionals by identifying a body of knowledge, uniform and improved standards of practice, and ethical conduct while enhancing the status and credibility of the profession. Requirements for certification are based on academic and internship experience, and successful completion of an examination process (Association of Child Life Professionals <http://www.childlife.org>).

Program learning outcomes
By the end of this program, the graduate should be able to:
1. Represent and communicate child life practice and psychosocial issues of infants, children, youth, and families.
2. Utilize theories of child development, stress and coping, and family systems in pediatric health environments.
3. Work collaboratively in diverse settings.
4. Identify as a professional child life specialist through membership and participation in professional organizations.
5. Apply the concepts of ethical and legal standards of the profession.
6. Describe the impact of health and health issues on the global setting.
7. Satisfactorily complete a supervised practicum and internship in child life.

Professional experience

Students will participate in supervised clinical training at Loma Linda University Children's Hospital and various hospitals located in the United States. A 100-hour practicum and 600-hour internship are required to complete the master’s degree. These experiences will provide an opportunity for students to build on course work and put theory into practice. Students will also have the opportunity to participate in various events such as grief camps, health fairs, global health trips, and other activities on campus designed to broaden their clinical experiences.

Financial assistance

Students accepted into the M.S. degree program may receive financial assistance through merit-based awards, such as teaching fellowships and a variety of research and student service assistantships; or through need-based financial aid, such as a loan or the University's work/study program. Students may apply for financial aid by writing to:

Student Financial Aid Office
Student Services
Loma Linda University
Loma Linda, CA 92350
909/558-4509

Accreditation

Loma Linda University is regionally accredited by the WASC Senior College and University Commission (WSCUC), 985 Atlantic Avenue, Suite 100, Alameda, CA 94501; telephone: 510/748-9001; fax: 510/748-9797; website: <http://www.wascsenior.org/contact>.

Admissions

Applicants must meet Loma Linda University (p. 24) and School of Behavioral Health (p. 149) admissions requirements; and give evidence of academic ability, professional comportment, and mature judgment. Those who meet these requirements, as well as the published deadlines and are accepted into the program, may enroll during Autumn quarter.

Additional admission requirements include:

- Bachelor’s degree in the social sciences or equivalent from a regionally accredited college or university.
- Minimum grade point average of 3.0 (on a 4.0 scale) in bachelor’s course work for at least the final 45 units prior to graduation.
- Written statement of purpose for applying to the program.
- Interview with department faculty, as scheduled (on-campus group interviews are scheduled for January through March; other on-campus and telephone interviews are scheduled individually).
- Volunteer experience under the direction of a Certified Child Life Specialist is highly recommended.

Pre-entrance requirements (p. 25):

- A background check
- Health clearance

Total Units: 14

1. Clinical training units (700-numbered courses) are in addition to the minimum didactic units required for the degree.
A minimum of 700 hours of clinical child life hours (CHLS 604, CHLS 605, and CHLS 608) completed within the degree program. Students must register for 14 clinical training units (CHLS 700, CHLS 701, and CHLS 702).

Other degree requirements

• Residence of at least two academic years.

• Students must meet the knowledge, skills, and professional performance competencies outlined by the program.

• Maintain a minimum grade point average of 3.0 (or a letter grade of B on a 4.0 scale) in order to progress successfully through the program and complete the degree. Any course with a grade below a B (3.0) must be repeated.

• Successful completion of a written comprehensive examination (taken before advancement to candidacy) and final oral and written examinations at the end of the program.

• Background check passed prior to matriculation.

Normal time to complete the program

Two (2) years (seven [7] academic quarters) — full-time enrollment required

Counseling — M.S.

Interim program director
Randall Walker

The M.S. degree program in counseling is housed in the Department of Counseling and Family Sciences within the School of Behavioral Health. Candidates have the option of preparing to become licensed professional clinical counselors (LPCC) and/or pupil personnel services (PPS) credentialed school counselors. Most students complete both specializations.

The curriculum is designed to give students a broad academic background in mental health counseling, advanced course work in one or more selected counseling specializations, and supervised field experience. Candidates must choose one or both of the following specializations: LPCC or PPS credential. Degree requirements include completion of 90 quarter units of academic course work and field experience, as stipulated in the curriculum for the chosen specialization(s). Clinical placements range from working as a trainee in University clinics, such as the Behavioral Health Institute and the Behavioral Medicine Center, to off-campus sites of various types. School placements range from elementary, middle, and high school levels. Graduates who complete Loma Linda University’s M.S. degree in counseling and LPCC specialization meet all educational requirements to treat individuals, couples, families, and groups. Graduates who complete the M.S. degree in counseling and PPS specialization meet all educational requirements for the school counseling credential.

Students may also complete the certificate in Drug and Alcohol Counseling (p. 161) by adding four units of practicum to their program of study.

Licensed professional clinical counselor (LPCC) specialization

Professional clinical counseling (LPCC) is a broad-based mental health profession throughout the United States that qualifies LPCCs for work in a variety of settings. Loma Linda University graduates of the M.S. degree in counseling program with the LPCC specialization are educationally qualified to treat individuals, couples, families, and groups of all ages. They are also prepared to address education and career counseling issues and to work with families of children with special needs. When licensed, they may choose to set up private practices or work in mental health clinics, substance abuse rehabilitation centers, in-patient and out-patient medical facilities, religious organizations, family court, employee assistance programs, retirement homes, higher education, and K-12 schools as mental health counselors.

The California Business and Professions Code Section 4999.20 defines professional clinical counseling as “the application of counseling interventions and psychotherapeutic techniques to identify and remediate cognitive, mental, and emotional issues—including personal growth, adjustment to disability, crisis intervention, and psychosocial and environmental problems. Professional clinical counseling includes conducting assessment for the purpose of establishing counseling goals and objectives to empower individuals to deal adequately with life situations, reduce stress, experience growth, change behavior, and make well-informed rational decisions.”

The California Board of Behavioral Sciences regulates all master’s-level licenses in mental health. State standards for LPCC are consistent with national standards, making it easier for graduates to be granted reciprocity throughout the country. Equivalent licensure in other states may be titled licensed professional counselor, licensed mental health counselor (LMHC), or similar titles. Complete information regarding scope of license for LPCC is located on the Board of Behavioral Sciences website <http://bbs.ca.gov/pdf/forms/lpc/lpc_scope_practice.pdf>.

Pupil personnel services credential (PPS): school counseling specialization

School counselors serve as leaders of counseling programs within the educational system. They address academic, career, and personal/social needs of students and serve as counselors and advocates for students, collaborators with parents and school personnel, and liaisons to the community. As articulated by the American School Counselor Association, school counseling programs are preventive in design, developmental in nature, and integral to the total educational program. Combining the school counselor certification with clinical counselor licensure is an excellent professional path that enhances counseling competence and professional opportunities. Additional information about the pupil personnel services credential in school counseling is found in the California Commission on Teacher Credentialing Internet address <http://www.ctc.ca.gov/>.

LPCC clinical training and PPS field experience

All LPCC and PPS school counseling candidates must complete field experiences as advised throughout their programs. LPCC completion requires 450 clock hours of clinical training, of which 300 must be face-to-face counseling with clients. PPS school counseling requires 600 clock hours of field experience, 400 of which must be completed in public
schools at two different grade levels. Additional details related to hours and supervision will be available upon admission.

Counseling and Family Sciences Clinic
Loma Linda University Counseling and Family Sciences (CFS) Clinic is operated by the Department of Counseling and Family Sciences. The clinic is located on the second floor of the Loma Linda University Behavioral Health Institute (BHI) as one of the participating academic clinics. The BHI is an innovative endeavor undertaken by Loma Linda University to offer community members easy access to all behavioral health disciplines in one location for an integrated, interdisciplinary clinic staffed by students and residents from child life, clinical counseling, marital and family therapy, psychiatry, psychology, and social work.

Additional certification options
In addition to the clinical and school counseling specializations embedded within the M.S. degree in counseling, candidates may choose to become certified in clinical mediation or drug and alcohol counseling.

Program learning outcomes
Students in the M.S. degree program in counseling will be able to:

1. Integrate counseling concepts and skills with a personal epistemology.
2. Demonstrate counseling interventions based upon a broad range of theoretical and legal/ethical frameworks through comprehensive written examination.
3. Identify as a professional counselor through membership and participation in professional organizations.
4. Satisfactorily complete a supervised practicum in counseling.
5. Meet all University qualifications for the licensed professional clinical counselor (LPCC) credential and/or the pupil personnel services (PPS) credential in school counseling, which is issued by the California Commission on Teacher Credentialing (CTC).

Financial assistance
For information regarding funding opportunities, see Student Aid (p. 43) in the financial policies section of this CATALOG.

Accreditation
The Counseling M.S. is accredited through the University by the Western Association of Schools and Colleges (WASC). The Licensed Professional Clinical Counseling (LPCC) program is approved by the California Board of Behavioral Sciences (BBS) which regulates and issues licenses. The Pupil Personnel Services Credential Program (PPS) in School Counseling is approved by the California Commission on Teacher Credentialing (CTC) which regulates and issues credentials.

Loma Linda University is regionally accredited by the WASC Senior College and University Commission (WSCUC), 985 Atlantic Avenue, Suite 100, Alameda, CA 94501; telephone: 510/748-9001; fax: 510/748-9797; website: <http://www.wascsenior.org/contact>.

Admissions
Applicants must meet Loma Linda University (p. 24) and School of Behavioral Health (p. 149) admissions requirements; and give evidence of academic ability, professional comportment, and mature judgment. Applicants, who meet these requirements, as well as the published deadlines for the following terms, may be admitted during Fall, Winter, Spring, or Summer Quarters. Additional admission requirements include:

- Bachelor's degree from a regionally accredited college or university.
- Minimum grade point average of 3.0 (on a 4.0 scale) in bachelor's course work for at least the final 45 units prior to graduation.
- Special consideration may be given to applicants with grade point averages as low as 2.75 if the last part of their college work shows significant improvement.
- Applicants whose cumulative grade point averages do not meet minimum requirements may receive further consideration for admission by demonstrating background experience(s) that provides evidence that the applicant has the potential to successfully complete the program. The applicant must verify work or volunteer experience that demonstrates commitment to working in a counseling specialization.

Written personal statement that addresses career objectives, personal interest in the counseling profession, rationale for choosing to attend Loma Linda University, how life experiences have influenced applicant's choice to enter the field, and additional thoughts the applicant deems important.

- Interview with department faculty, as scheduled on-campus; other interviews (by phone or online using Zoom) are scheduled individually for applicants who are unable to attend in-person interviews.

The applicant should view instruction for completing application for registration as a Licensed Professional Clinical Counselor (LPCC) intern and Pupil Personnel Service (PPS) Credentialed School Counselor to understand the California requirements for licensure and credentialing. One should not apply to the program if s/he has any convictions or disciplinary actions cited by the organizations regulating licenses and credentials.

Pre-entrance requirements (p. 25):
- A background check
- Health clearance

Program requirements
The curriculum for the M.S. degree in counseling offers the option of single or dual specialization in Licensed Professional Clinical Counseling (LPCC) and Pupil Personnel Services (PPS) Credential in School Counseling. Candidates must choose at least one specialization. The curriculum is divided into three domains: Core courses, specialization courses, and field experience courses related to selected specialization(s). Candidates choosing only one specialization may count courses from the other specialization as electives for their 90 academic credit requirement. Other electives must be advisor-approved.

Students must maintain a grade point average of 3.0 on a 4.0 scale (or a letter grade of B) in order to progress successfully though the program and complete the degree. In addition, students must meet the knowledge, skills, and professional performance competencies outlined by the program.

All course grades should meet the minimum B (3.0) standard, which by university policy indicates satisfactory performance. Courses in which a student earns a grade below a B (3.0) may need to be repeated (or may not apply to the degree) if competency in the subject area is related to practice performance with clients, and a grade less than a 3.0 represents marginal or unsatisfactory practice performance.

1. Advisor-approved electives may be chosen from relevant graduate courses in other programs, provided that the course is not restricted to students in that specific degree. A list of possible electives will be provided.

### Degree requirements

- A minimum of 90 quarter academic credits of graduate work, which includes credit received for core courses, elective courses, and a three-unit religion course.

### Non-course requirements

- Residence of at least two academic years.
- A minimum grade point average of 3.0 with no course grade lower than B.
- Certificate of Clearance (COC) prerequisites: documentation of registration for California Basic Educational Skills Test (CBEST), Live Scan, and current negative TB test results.
- A COC prior to school counseling field experience PPS
- Dual Specialization: Registrations in COUN 791, 792, 793 and COUN 781, 782 and COUN 681 x two quarters and COUN 682 x five quarters are required.
- LPCC Single Specialization: Registrations in COUN 791, 792, 793 and COUN 682 x five quarters are required.
- PPS School Counselor Single Specialization: Registrations in COUN 781, 782, 783 and COUN 681 x two quarters are required.
• Successful completion of a written comprehensive examination (taken before advancement to candidacy) and a final oral examination at the end of the program.
• If taken for elective credit, foreign language courses numbered 400 or higher.

Normal time to complete the program
Two [2] years (seven [7] academic quarters) based on full-time enrollment; part-time enrollments are permitted.

Drug and Alcohol Counseling — Certificate

Program director
Randall Walker

The Drug and Alcohol Counseling Program is offered online by the School of Behavioral Health through the Department of Counseling and Family Sciences. Students enrolled in the M.S. in marital and family therapy, M.S. in counseling, or the combination of these two programs within the Department of Counseling and Family Sciences are able to graduate with this certificate by adding four units of practicum to their program of study.

Program learning outcomes
By the end of this program, the graduate should be able to:

1. Effectively counsel substance-using and substance-addicted adults and their families.
2. Sit for national certification through selected professional organizations.
3. Integrate the experience of counseling substance-using and substance-addicted populations with primary professional identity.

Certificate examinations
Course work is developed to assist students in meeting the requirements for certifications offered through NAADAC: the Association for Addiction Professionals (formerly, the National Association of Alcoholism and Drug Abuse Counselors) and the American Academy of Health Care Providers in the Addictive Disorders (AAHCPAD), as well as others.

Field work
Students complete four quarters of field work at an approved site dealing with substance use, alcoholics/addicts, and their families. Successful completion of field work requires accruing 200 hours face-to-face supervised, clinical experience. Field work provides excellent opportunities for gaining experience in working with a substance-using population. Students will be evaluated quarterly by field placement supervisors and program faculty members. Students are eligible to complete field work in sites with which the Department of Counseling and Family Sciences has already established relationships; or, with program director approval, students may be able to work in other settings where services do not directly address substance users but where it is determined that addiction may be a significant focus of clinical attention.

Students participate in online practicum classes, which meet bi-weekly with program faculty. Practicum classes are synchronized and scheduled at a time convenient to most individuals within the United States.

Admissions
The certificate program is open to persons enrolled in a behavioral science master’s degree program or those who hold a master’s degree or higher in a behavioral science discipline. Qualified individuals who have interests in substance use treatment are encouraged to apply.

Applicants must meet Loma Linda University (p. 24) and the School of Behavioral Health (p. 149) admission requirements outlined in this CATALOG and give evidence of academic ability, professional comportment, and mature judgment. Applicants are screened for appropriateness to complete the certificate program and for their ability to work with substance using adults and families.

Additional admission requirements include:

• A University application/reapplication to this program (including students currently enrolled in another program at Loma Linda University) and meeting all requirements for application prior to admission into the certificate program.
• As part of the application essay, describe how the applicant will integrate the drug and alcohol counseling certificate into their work as a behavioral health professional, and the contributions the applicant anticipates making to the substance use treatment field and professional field as well as their profession.
• An interview, conducted either face-to-face or online via Zoom, with the program director.

Pre-entrance requirements (p. 25):
• A background check
• Health clearance

Total Units 13

1 Multiple registrations required to fulfill unit requirement.
2 Student may choose between RELR 535 or RELR 540. These online courses are typically offered during summer, fall and spring term.

Normal time to complete the program
Four (4) academic quarters based on part-time enrollment

Minimum required grade point average
Students must maintain a minimum grade point average of B (3.0) in all courses taken for the certificate.
Marital and Family Therapy — M.S.,
D.M.F.T.

The marriage and family therapy profession

Marriage and Family Therapy is a distinct international mental health profession based on the premise that relationships are fundamental to the health and well-being of individuals, families, and communities. Marriage and family therapists (MFTs) evaluate and treat mental and emotional disorders and other health and behavioral problems; and address a wide array of relationship issues within the context of families and larger systems. The federal government has designated marital and family therapy a core mental health profession—along with counseling, social work, psychiatry, psychiatric nursing, and psychology. All 50 states also support and regulate the profession by licensing or certifying marriage and family therapists.

Mission statement

The Doctor of Marital and Family Therapy (D.M.F.T.) degree curriculum is consistent with Loma Linda University's vision of transforming lives through whole person health care. The mission of this curriculum is to bring health, healing, wholeness, and hope to individuals, families, and communities through education, research, clinical training, and community service. The D.M.F.T. degree curriculum accomplishes this by focusing on developing, evaluating, and administering intervention programs that benefit individuals, couples, families, and communities.

Ongoing program review

The M.S. and D.M.F.T. degrees engage in ongoing review of student outcomes and use this information to improve program effectiveness. Data on student outcomes are collected through aggregate scores on the following: quarterly evaluations of clinical competency, results of qualifying examinations and clinical demonstrations, client session and outcome data, and exit surveys and interviews of students at graduation. Alumni surveys are also conducted every two years to track graduates’ attainment of marital and family therapy licensure, data on employment, and feedback regarding how well the program prepares graduates for their job responsibilities. The program faculty also maintains regular contact with community agencies and educational institutions in the region to obtain input into curriculum planning and improvements in clinical training.

Core ideas guiding the marriage and family therapy doctoral program

Relational systems: People are best understood within the cultural, spiritual, and relational systems in which they are embedded. Change, therefore, occurs in the context of family, community, and interpersonal relationships. This program focuses on both the structured relational patterns of communication and interaction and on the systems of meaning that define and shape these patterns.

Wholeness: The program encourages wholeness by attending to the physical, mental, social, and spiritual dimensions of human experience, which reciprocally interact at every level.

Social forces: The program is guided by a belief that social contexts and processes influence meanings, values, and people’s understandings of self, family, and others. Particular emphasis is placed on:

- research focusing on social forces relevant to the distinctive multicultural mix of families in the Southern California region
- the interrelationship between faith and family relationships throughout the world
- the effects of the changing health-care system and of medical technology
- collaboration among education, family, work, and legal systems

Healing power of relationships: As people become more connected to each other and their communities, the potential for growth and healing are enhanced, and the opportunity for making positive contributions is maximized. Students are encouraged to develop their therapeutic relationship and community involvement skills such that they can co-create an environment of safety, respect, compassion, openness, and community participation.

Diversity: Congruent with an appreciation of the importance of social forces is an interest in and respect for the diverse experiences and perceptions of human beings. Different social contexts—such as race, ethnicity, religion, gender, and socioeconomic status—result in a wide variety of meanings and behavior patterns in marriages, families, and intimate relationships. The program seeks to create a diverse mix of students and faculty, and to challenge all who are involved to learn from the richness of multiple perspectives.

Empirical process: The program encourages clinical work and theory development grounded in an empirical understanding of human experience. Students are offered the opportunity to develop their capacities to utilize inductive and deductive reasoning; as well as objectivity, subjectivity, and intersubjectivity in therapy, program development and evaluation, and research.

Education and prevention: Connections at family, school, and community levels are important components of resilience. The program emphasizes helping individuals and families access their relational competencies as an important part of prevention, as well as the resolution of their current difficulties.

Spirituality: This program sees spirituality as central to wholeness and healing. Students are encouraged to integrate their practices of faith with their professional work. The program places strong emphasis on active demonstration of moral and ethical principles as exemplified by, but not limited to, Judeo-Christian teachings.

Global focus: The mission of the program reaches beyond the local and national levels to the international community. This includes collaboration and experience with people from other nations and cultures to promote mutual understanding, resolve problems, and strengthen families.

Advanced standing policy

National accreditation and certification processes ensure that degrees are comparable across institutional boundaries. This advanced standing policy recognizes the value of these professional review processes on the part of the Department of Counseling and Family Sciences and facilitates cooperation in professional training within the marital and family therapy discipline. The policy assures that at least 60 percent of
doctoral academic credit will be earned at Loma Linda University, while enabling cooperative relationships with other accredited programs.

**Guidelines**

Advanced standing may be granted for previous course work equivalent in content and scope to required counseling and family sciences (CFS) courses. This reduces the number of units to be taken at Loma Linda University. Determination of advanced standing is based on the following guidelines:

1. Residency requirements
   a. Doctoral degree. Advanced standing may not reduce total units below 60 units for a Ph.D. degree in systems, families, and couples with marital and family therapy specialty; or below 40 units for a Doctor of Marital and Family Therapy (D.M.F.T.) degree.

2. Determination of equivalency
   a. Courses applied to advanced standing must be graduate-level courses earned at an accredited institution. No credit may be applied for grades lower than B-.
      i. Courses completed in programs accredited by the Commission on Accreditation for Marital and Family Therapy Education (COAMFTE) or certified family life education (CLFE) programs approved by the National Council on Family Relations (NCFR) will be reviewed as a whole in relation to CFS program requirements. It is anticipated that comparable course content from these schools may be divided into different course configurations than that of Loma Linda University. Students wishing advanced standing based on units earned at other institutions will be evaluated on a case-by-case basis in accordance with COAMFTE or NCFR standards.
   b. Advanced standing is not granted for religion courses.
   c. Doctoral courses taken more than five years previously may be considered for advanced standing only if the content has been used professionally on a regular basis and the student can demonstrate current knowledge in the field.
   d. Approved prior client contact hours may also be applied. See CFS doctoral handbook for approval process.

3. Approval process
   Students seeking advanced standing should meet with their program director prior to admission or within the first two quarters of study and supply copies of each syllabus of prior course work. Following course review, the program director will write a letter to the School of Behavioral Health that outlines which courses from previous institutions qualify for advanced standing and which equivalent CFS courses will be waived. The letter will specify how many units and client contact hours the student will need to complete the degree. Rather than completing separate academic variances for each course, the student will submit one academic variance accompanied by the program director’s letter outlining the advanced standing.

**Financial assistance**

Students who are accepted into the M.S., Ph.D., or D.M.F.T. degree curriculums may apply for work-study and department-funded research, teaching, and administrative assistantships awarded by the Department of Counseling and Family Sciences. Departmental awards are contingent on the availability of funds. Students may also apply for need-based financial aid, such as a loan or other work-study programs on campus. Students accepted into Ph.D. or D.M.F.T. degree curricula in marital and family therapy are eligible for and encouraged to apply for the AAMFT minority fellowships. See <http://www.aamft.org/> for information.

Students may apply for financial aid by writing to:

Student Financial Aid Office
Student Services
Loma Linda University
Loma Linda, CA 92350
909/558-4509

**Accreditation**

The Doctor of Marital and Family Therapy degree program is accredited by the Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE), 112 South Alfred Street, Alexandria, Virginia 22314; telephone: 703/838-9808; e-mail: <coa@aamft.org> (coa@aamft.org).

**Program Requirements**

- Marital and Family Therapy—M.S. (p. 163), D.M.F.T. (p. 167),

**Marital and Family Therapy — M.S**

Program director
Mary E. Moline

The Master of Science degree curriculum in marital and family therapy (MFT) is designed to give students an excellent COAMFTE clinical and academic background; as well as professional practice for working with individuals, couples, groups, and families in a variety of settings. The program emphasis is systemic and relational practice, and couples and family therapy. These include but are not limited to medical, legal, educational, mental health, managed care, public and private agencies, church settings, and private practice.

Students may also complete the certificate in Drug and Alcohol Counseling by adding four units of practicum to their program of study.

**Mission, vision, and values**

The program’s mission: Educating MFT students to provide effective and competent care to diverse families in local, national, and international communities.

The program’s vision: MFT students will learn how to “make diverse families whole.” The definition, configuration, and experience of family vary widely; and students are trained to regard, respect, and value human difference and family types so as to work successfully with all who seek the services of a marital and family therapist.

The program has adopted five Loma Linda University values as central to the values of this program:

- **Compassion**—The sympathetic willingness to be engaged with the needs and sufferings of others. Among the most memorable depictions of compassion in Scripture is the story of the Good Samaritan.
- **Integrity**—The quality of living a unified life in which one’s convictions are well-considered and match one’s actions. Integrity encompasses honesty, authenticity, and trustworthiness.
- **Excellence**—The commitment to exceed minimum standards and expectations.
**Freedom**—The competency and privilege to make informed and accountable choices and to respect the freedom of others. God has called us not to slavery but to freedom.

**Justice**—The commitment to equality and to treat others fairly, renouncing all forms of discrimination.

**Licensure and program accreditation**

Marriage and family therapy is established by law in California as a profession requiring state licensure. Persons who desire to enter the profession must have the academic and clinical preparation, and must pass required licensing examinations. Clinical license requirements vary by state and include additional hours of supervised clinical practice beyond those hours that are completed while studying for the graduate degree. The Board of Behavioral Sciences determined that Loma Linda University’s master’s degree in marital and family therapy meets the Senate Bill statutory requirements for marriage and family therapy under Business and Professions Code section 4980.36 and 4980.37 (<www.bbbs.ca.gov>).

The program offered by Loma Linda University is fully accredited by the Commission on Accreditation for Marriage and Family Therapy Education, the accrediting body for the American Association for Marriage and Family Therapy. The national commission ensures that academic and clinical training programs adhere to the highest standards of the profession.

**Conduct or disciplinary actions**

The applicant should view “instruction for completing application for registration as a marriage and family intern” at the Board of Behavioral Science Examiner’s website for possible issues that may prevent someone from obtaining a marital and family therapy license in the state of California or any state in which a license is sought. A person who completes a graduate degree in MFT may be denied licensure due to prior convictions. This should be clearly considered before pursuing studies or licensure.

**Clinical training**

In addition to successful completion of 90 quarter units of academic course work, students in the Marital and Family Therapy Program must complete field experience at clinical placement sites. Upon completion of 18 quarter units, the student will be evaluated by the teaching faculty to determine if s/he will continue the program and be permitted to enter the clinical phase of the program. Students have numerous choices of placement sites across Southern California in which to gain required clinical experience. These sites include community mental health centers, private and public agencies, school and hospital settings, and the department’s counseling and family sciences clinic. Some stipends are available for trainees. Clinical training includes a seven-quarter practicum sequence and supervision of trainees at a clinical site.

Students must take 18 units of practicum and complete a minimum of 500 clinical hours and 100 direct supervision hours. Of the direct client contact hours, at least 250 hours must be with couples and families. Of the direct supervision hours, at least 50 must be with raw data (video, audio, and live supervision). For every week in which clients are seen, the student must have at least one hour of individual supervision. The ratio of supervision hours to treatment hours must not be less than one hour of supervision to five hours of clinical contact. Students enrolled in the program should consult the clinical training manual regarding clinical training requirements.

**Degree completion**

The M.S. degree in marital and family therapy may be completed in either two years of full-time study or at least three years of part-time study. Students have up to five years to complete the degree. In order to maintain full-time status, students must take a minimum of eight units during Fall, Winter, Spring, and Summer Quarters. First-year students most often attend classes on Tuesday and Thursday; and second-year students attend classes on Monday and Wednesday. Full-time employment is discouraged when a student is enrolled for full-time study. Clinical training experiences are usually on days students are not in class. In order to participate in the June commencement exercises, students must complete all the required 500 clinical hours and the 90 units of required courses.

**Counseling and Family Sciences Clinic**

Loma Linda University Counseling and Family Sciences Clinic, formerly known as the Marriage and Family Therapy Clinic, is operated by the Department of Counseling and Family Sciences. Located on the second floor of the Loma Linda University Behavioral Health Institute (BHI), it is one of the participating academic clinics. The BHI is an innovative endeavor undertaken by Loma Linda University to offer community members easy access to all behavioral health disciplines in one location. It houses an integrated, interdisciplinary clinic staffed by students and residents from psychiatry, psychology, social work, child life, counseling, and marriage and family therapy.

**Financial assistance**

Students accepted into the Marital and Family Therapy Program may receive financial assistance through the MFT Stipends Award; merit-based awards, such as teaching fellowships and a variety of research and student service assistantships; or through need-based financial aid, such as a loan or the University’s work-study program. On a limited basis, students receive financial assistance during their clinical traineeships. Students must apply for financial aid by writing to:

- **Student Financial Aid Office**
  - **Student Services**
  - **Loma Linda University**
  - **Loma Linda, CA 92350**
  - **909/558-4509**

**Educational outcomes**

The program’s educational outcomes include program outcomes and student learning outcomes. These outcomes are congruent with the University’s and program’s missions and are appropriate to the profession of marriage and family therapy.

**Program goals**

Program goals integrate this University’s commitment to diversity and quality training of health-care professionals with the need for diverse master’s degree-level practitioners in the field of MFT. These outcomes are as follow:

1. Prepare students to engage in the MFT profession by being eligible for MFT licensure in California, with a 65-to-80 percent pass rate for students who sit for the examination; and by being eligible for membership in AAMFT.
2. Maintain a 75 percent or higher graduation rate.
3. Provide a learning environment and resources that allow students to collaborate with other health-care providers and multiple community services or contexts.
4. Graduate a diverse student population who are prepared to practice in the field of marriage and family therapy.

Program learning outcomes
The University emphasizes whole person care. Each of the six program learning outcomes for the M.S. degree in MFT supports this mission with a specific emphasis on advancing systems/relational theory and practice in diverse societal contexts. The student will learn to promote the emotional health and well-being of individuals, couples, families, organizations, and communities. By the end of this program, the graduate should be able to:

1. Identify as a systemic MFT therapist and apply systemic perspective in clinical practice.
2. Describe a variety of MFT therapies.
3. Demonstrate clinical language and practices that enable him/her to work with diverse populations within a multidisciplinary context.
4. Analyze and present a clinical case using one of the major MFT models.
5. Demonstrate awareness of contextual issues in therapy, such as gender, religion/spirituality, sexual orientation, age, and socioeconomic status.
6. Apply legal and ethical standards relevant to the field of marital and family therapy to his/her clinical practice.
7. Apply for internship status and subsequent licensure as an MFT professional aligned with practice standards.

The M.S. degree in marital and family therapy engages in ongoing review of program outcomes and uses this information to improve program effectiveness. Data on program outcomes are collected through aggregate scores on quarterly evaluations of clinical competency and results of final oral and comprehensive examinations; client session and outcome data; and exit surveys and interviews of students at graduation. Alumni surveys are also conducted every two years to track graduates’ outcome data; and exit surveys and interviews of students at graduation. The program’s faculty also maintains regular contact with community agencies and educational institutions in the region to obtain input into curriculum planning and improvements in clinical training.

Accreditation
The program is fully accredited by the Commission on Accreditation for Marriage and Family Therapy Education (COMAFTE), the accrediting body for the American Association for Marriage and Family Therapy (AAMFT). The national commission functions to ensure that academic and clinical training programs adhere to the highest standards of the profession. They may be contacted at 1133 15th Street NW, Suite 300, Washington, DC 20005-2710. 202/467-5111 or 452-0109. E-mail: <coamfte@aamft.org>

Admissions
In addition to Loma Linda University (p. 24) admissions requirements, admission to the MS in Marital and Family Therapy program is governed by the policies and procedures established by the School of Behavioral Health (p. 149).

Additional admission requirements include:

- A bachelor’s degree from an accredited university or college. The department assesses the liberal arts preparation of each of its applicants in the balance of course work, in three liberal arts (see Liberal Arts Preparation).
- At least three letters of recommendation; at least one from an academic source and one from a work supervisor.
- Meet the minimum academic and professional compatibility criteria established by the program.
- A cumulative grade point average of 3.0 or above (on a 4.0 scale) in bachelor’s coursework.
- Applicants with grade point averages as low as 2.75 may be considered if the last 45 quarter credits (30 semester units) of coursework are 3.0 or higher or if they have additional attributes that demonstrate preparedness and an appropriate fit for marital and family therapy education. They may submit verified work and volunteer experiences that provide evidence for the potential to successfully complete the program. Employer/supervisor verification statements must be submitted on official agency stationery.
- Further consideration will also be given to individuals who provide evidence of additional certifications and/or training that illustrate commitment to careers in marriage and family therapy.
- Those admitted to the M.S. in Marital and Family Therapy with a cumulative G.P.A. below 3.0 will be required to participate in an individualized academic assessment and a targeted learning assistance program.
- Interviews are scheduled with department faculty members; on-campus group interviews are scheduled during Winter and Spring Quarters; other on-campus and telephone interviews are scheduled individually.
- Show evidence of professional compatibility, personal qualifications, and motivation to complete a graduate program by obtaining a passing score on the admissions interview with the department’s admissions committee. Evaluation criteria for the interview include:
  - verbal communication skills
  - congruent with the values and mission of Loma Linda University
  - critical thinking ability
  - comfort/willingness to work with people from diverse backgrounds, language, culture and abilities
  - intuitive judgment & skill, talent, and self-awareness
  - understanding of the field
  - commitment to the field

No academic credit is given for life experiences or previous work experience for any part for the Marriage and Family Therapy degree program.

Pre-entry clearance (p. 25):

- A background check
- Health clearance

Program requirements
A grade of B or better indicates that a student has mastered the knowledge, skill, and professional practice performance competencies
outlined by the program. In order to progress successfully and complete the degree, students must meet both course and cumulative G.P.A. standards. The University allows students to repeat two courses per degree. Course repeat expectations set by the School of Behavioral Health may be found in the general regulations (p. 149) section of this CATALOG.

**Foundations of relational/systemic practice, theories & models**
- MFAM 551 Family Therapy: Foundational Theories and Practice (3 units)
- MFAM 553 Family Systems Theory (3 units)
- MFAM 564 Family Therapy: Advanced Foundational Theories and Practice (3 units)

**Clinical treatment with individuals, couples and families**
- MFAM 515 Crisis Intervention and Client Advocacy (3 units)
- MFAM 552 Couples Therapy: Theory and Practice (3 units)
- MFAM 638 Family Therapy and Chemical Abuse (3 units)
- MFAM 644 Child Abuse and Family Violence (3 units)
- MFAM 674 Human Sexual Behavior (3 units)

**Diverse multicultural and/or underserved communities**
- MFAM 528 Culture, Socioeconomic Status in Therapy (3 units)
- MFAM 567 Treating the Severely and Persistently Mentally Ill and the Recovery Process (3 units)
- MFAM 604 Social Context in Clinical Practice: Gender, Class, and Race (3 units)

**Research and evaluation**
- MFAM 501 Research Tools and Methodology: Quantitative (3 units)
- MFAM 502 Research Tools and Methodology: Qualitative (3 units)

**Professional identity, law, ethics & social responsibilities**
- MFAM 614 Law and Ethics (3 units)
- MFAM 635 Case Presentation and Legal Issues (3 units)

**Biopsychosocial health and development across the life span**
- MFAM 547 Social Ecology of Individual and Family Development (3 units)
- MFAM 584 Advanced Child and Adolescent Development (3 units)
- COUN 675 Dynamics of Aging (1 unit)

**Systemic/relation assessment and mental health diagnosis and treatment**
- MFAM 524 Psychopharmacology and Medical Issues (3 units)
- MFAM 556 Psychopathology and Diagnostic Procedures (3 units)
- MFAM 624 Individual and Systems Assessment (3 units)

**Contemporary issues**
- Select from the following:
  - COUN 574 Educational Psychology
  - COUN 575 Counseling Theory and Applications
  - COUN 576 Exceptional and Medically Challenged Children
  - COUN 577 Assessment in Counseling
  - COUN 678 Consultation and Program Evaluation
  - COUN 680 Field Experience in Counseling
  - MFAM 516 Play Therapy
  - MFAM 539 Solution-Focused Family Therapy
  - MFAM 549 Christian Counseling and Family Therapy
  - MFAM 555 Narrative Family Therapy
  - MFAM 559 Cognitive-Behavioral Couples Therapy

**Total Units** 90

1. 700-numbered courses do not count toward total didactic units required for the degree
2. May be substituted with another 3-unit RELR 500-numbered course.

**Degree requirements**
Requirements for the M.S. degree in marital and family therapy from Loma Linda University include the following:

- Residence of at least two academic years.
- A minimum of 90 quarter units of graduate work, which includes credit received for core courses, electives, and a three-unit religion course.
- Clinical training in marriage and family counseling. At a minimum, 500 clinical hours and 100 direct supervision hours are required. Of the direct client contact hours, at least 250 hours must be with couples and families. Of the direct supervision hours, at least 50 hours must be with raw data (video, audio, and live supervision). For every week in which clients are seen, the student must have at least one hour of individual supervision. The ratio of supervision hours to treatment hours must not be less than one hour of supervision to five hours of clinical contact. Students enrolled in the program should consult the clinical training manual regarding clinical training requirements.
- Successful completion of a written comprehensive examination (taken before advancement to candidacy) and an oral examination (taken at the end of the program).
- To be counted toward the graduate degree, foreign language courses must be numbered at 400 and above.

**Normal time to complete the program**
Two (2) years (seven [7] academic quarters) based on full-time enrollment

**Post-master's course**
- MFAM 744 Clinical Internship (1 unit)

**Total Units** 1
Marital and Family Therapy — D.M.F.T.

Program director
Nichola Seaton Ribadu

The Doctor of Marital and Family Therapy (D.M.F.T.) program is one of the few D.M.F.T. programs in the United States that is accredited by the American Association for Marriage and Family Therapy (AAMFT). The program is fully online (pending approval of the WASCUC and the COAMFTE accrediting body) for students coming in with a COAMFTE-accredited master's degree. For students who have not earned a master's degree in a related field (e.g., social work or clinical counseling), there are required corequisite courses that need to be taken in addition to the specific D.M.F.T. courses. Corequisite courses are currently only provided on campus. Online delivery will utilize synchronous and asynchronous formats.

The curriculum adopts the practitioner-administrator-evaluator approach and focuses on applied skill development for use in clinical practice and administrative positions. The goal of the curriculum is to prepare students to apply evidence-based standards to the systemic/relational principles of marriage and family therapy as they design, evaluate, and administer programs that impact a clinical population. Graduates of the D.M.F.T. program use a multicultural lens and are well-prepared to serve as ethically-competent leaders who advance the marital and family therapy profession. Alumni most often work as program directors, grant proposal writers, program evaluators, advanced clinicians, and clinical supervisors across the nation and outside of the United States. Some alumni also serve the University as faculty members and adjunct professors.

The 120-unit* D.M.F.T. degree curriculum requires a minimum of three years of full-time study for completion. This includes course work, 1000 hours of direct client contact, a doctoral project, and supervised professional development experience. The program is also designed to meet the requirements for California state licensure as a marital and family therapist.

*Students who have completed a master’s degree from a COAMFTE-accredited program receive advanced standing of 43 units, reducing the required time to complete the degree to a minimum of two years. Consideration for advanced standing will be given to students entering the D.M.F.T. degree program with an M.A. or an M.S. degree from a non-COAMFTE-accredited program on a course-by-course basis.

Knowledge and skills promoted

Theory and practice
Students study the work of the original thinkers in marital and family therapy, as well as the most recent developments in the field, such as social constructionism, evidence-based practice, and global perspectives. D.M.F.T. students will develop skills in applying marriage and family therapy principles and frameworks to public and private clinical practice settings. They will develop a critical understanding of the theoretical and philosophical foundations of marriage and family therapy, be conversant with the current issues in the field, and use this knowledge to develop programs and services.

Personal development
The program encourages students to develop a clear understanding of themselves and invites reflection and consideration of the impact of their personal values, social positions, and contexts on their clinical, administrative, and program development practices. Students are supported in the development of their strengths as they create an epistemological framework and ethical consciousness that guide their approach to professional practice in their lives, and are encouraged to engage beyond their local communities to include experiences in wider cultural and global contexts.

Practice and supervisory skills
Students will apply an in-depth understanding of theory as it relates to the practice of marital and family therapy interventions and program activities at family, community, and societal levels—drawing on the core marriage and family therapy frameworks. They will develop sophistication in clinical, administrative, and supervisory skills necessary for multisystemic engagement. As it is COAMFTE-accredited, the D.M.F.T. program offers students the opportunity to complete the requirements for becoming AAMFT-approved supervisors prior to graduation.

Evaluation skills
Students will develop skills and understanding of the process of evaluation research related to marital and family therapy programs and services. This includes the ability to apply research findings to clinical practice and to utilize research findings in creative ways for the benefit of the general population. D.M.F.T. students will focus on evaluation of program performance and outcomes in practice-based settings.

Program goal and outcomes

The goal of the D.M.F.T. program is to prepare doctoral-level marital and family therapists to serve as program developers, as well as evaluators/administrators, who will promote the health and well-being of individuals, families, and communities. This goal works in combination with the larger University mission of advancing health services that attend to the whole person by developing practiced-based knowledge in marriage and family therapy.

There are two overall program outcomes. These outcomes integrate our University’s commitment to diversity and quality training of health-care professionals with the need for diverse doctoral-level practitioners skilled in program development/evaluation and administration. The program outcomes are:

1. The program will graduate a diverse student body prepared to advance the field of marriage and family therapy through practice-based leadership, founded on the consumption of current and reliable research.
2. The program will prepare doctoral-level family therapy professionals to apply the systemic/relational principles of the field to develop, evaluate, and administer ethically competent programs that contribute to MFT practice.

Student learning outcomes

By the end of this program, the graduate should be able to:

1. develop a professional identity as doctoral-level marital and family therapists aligned with national practice standards.
2. become adept in systems/relational practice, demonstrating sophistication as therapists, program developers, evaluators, and administrators of marital and family therapy services.
3. use marital and family therapy, human development, and family science literatures to design and evaluate programs, clinical protocols, organizational structures, and service-delivery processes.
4. further benefit families and communities, students will demonstrate the ability to use research and evaluation methodologies to improve human service program performance and outcomes.
5. be responsive to the societal, cultural, and spiritual contexts in which health and well-being are embedded.
6. develop an ethical consciousness that guides their practice in all aspects of professional work.

**Advanced standing policy**

National accreditation and certification processes ensure that degrees are comparable across institutional boundaries. This advanced standing policy recognizes the value of these professional review processes on the part of the Department of Counseling and Family Sciences and facilitates cooperation in professional training within the marital and family therapy discipline. The policy assures that at least half of all interim master’s degree units and 60 percent of doctoral academic credit will be earned at Loma Linda University, while enabling cooperative relationships with other accredited programs.

**Guidelines**

Advanced standing may be granted for previous course work equivalent in content and scope to required counseling and family sciences (CFS) courses. This reduces the number of units to be taken at this University. Determination of advanced standing is based on the following guidelines:

1. **Residency requirements**
   a. Doctoral degree. Advanced standing may not reduce total units below 60 units for the Doctor of Marital and Family Therapy (D.M.F.T.) degree.

2. **Determination of equivalency**
   a. Credits applied to advanced standing must be graduate-level courses earned at an accredited institution. No credit may be applied for grades lower than B-.
   b. Courses completed in programs accredited by the Commission on Accreditation for Martial and Family Therapy Education (COAMFTE) will be reviewed as a whole in relation to CFS program requirements. It is anticipated that comparable course content from these schools may be divided into different course configurations than that of this University. Students seeking advanced standing based on units earned at other institutions will be evaluated on a case-by-case basis in accordance with COAMFTE standards.
   c. Advanced standing is not granted for religion courses.
   d. Doctoral courses taken more than five years previously may be considered for advanced standing only if the content has been used professionally on a regular basis and the student can demonstrate current knowledge in the field.
   e. Approved prior client contact hours may also be applied. See CFS doctoral handbook for approval process.

3. **Approval process**

   Students seeking advanced standing should meet with their program director prior to admission or within the first two quarters of study and supply copies of each syllabus of prior course work. Following the course review, the program director will write a letter to the School of Behavioral Health that outlines which courses from previous institutions qualify for advanced standing and which equivalent CFS courses will be waived. The letter will specify how many units and client contact hours the student will need to complete the degree. Rather than completing separate academic variances for each course, the student will submit one academic variance accompanied by the program director’s letter outlining the advanced standing.

**Financial assistance**

Students who are accepted into the D.M.F.T. degree curriculum in marital and family therapy may apply for work-study and department-funded research, teaching, and administrative assistantships awarded by the Department of Counseling and Family Sciences. Departmental awards are contingent on the availability of funds. Students may also apply for need-based financial aid, such as a loan or other work-study programs on campus. Students accepted into the D.M.F.T. degree curriculum in marital and family therapy are eligible for and encouraged to apply for the AAMFT minority fellowships. See <http://www.aamft.org> (http://www.aamft.org) for information.

Students may apply for financial aid by writing to:

Student Financial Aid Office
Student Services
Loma Linda University
Loma Linda, CA 92350
909/558-4509

**Accreditation**

The Doctor of Marital and Family Therapy degree program is accredited by the Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE), 112 South Alfred Street, Alexandria, Virginia 22314; telephone: 703/838-9808; e-mail: <coa@aamft.org> (coa@aamft.org).

**Admissions**

Applicants must meet Loma Linda University (p. 24) and School of Behavioral Health (p. 149) admissions requirements; and give evidence of academic ability, professional comportment, and mature judgment. The Doctor of Marital and Family Therapy degree curriculum represents advanced study over and above a standard master’s degree curriculum in the field. Admission is based on an integrated evaluation of the following criteria:

- M.S. degree in Marital and Family Therapy, or equivalent.
- Grade point average (3.3 minimum).
- Structured oral interview with department (one day).
- Three letters of reference (two academic and one professional).
- Curriculum vitae.

**Pre-entrance clearance (p. 25):**

- A background check
- Health clearance

In the department of Counseling and Family Sciences, we adhere to the policy (p. 12) of the university and additionally do not discriminate against anyone on the basis of socioeconomic or relationship status.
Program requirements

Corequisites

Students are expected to have basic academic preparation before entering the D.M.F.T. degree curriculum. If a student is deficient in courses, such as those listed below, a plan of study incorporating these courses will be developed to give the student a solid grounding in the foundations of the field. Transcripts will be evaluated to determine readiness or deficiency in previous course work. These courses will be regarded as corequisites in that the student will be able to incorporate them into his/her curriculum.

- Theoretical knowledge in family systems/relational therapy 13
- Clinical knowledge in marital and family therapy or a related field 13
- Research 8

Licensure-specific knowledge/corequisites (available only on campus)

(required of students who have not completed a CMAFTE accredited master’s degree)

- COUN 675 Dynamics of Aging 1
- MFAM 515 Crisis Intervention and Client Advocacy 3
- MFAM 524 Psychopharmacology and Medical Issues 3
- MFAM 536 Case Presentation and Documentation 3
- MFAM 537 Case Presentation 3
- MFAM 547 Social Ecology of Individual and Family Development 3
- MFAM 556 Psychopathology and Diagnostic Procedures 3
- MFAM 567 Treating the Severely and Persistently Mentally Ill and the Recovery Process 3
- MFAM 604 Social Context in Clinical Practice: Gender, Class, and Race 3
- MFAM 614 Law and Ethics 3
- MFAM 624 Individual and Systems Assessment 3
- MFAM 635 Case Presentation and Legal Issues 3
- MFAM 638 Family Therapy and Chemical Abuse 3
- MFAM 644 Child Abuse and Family Violence 3
- MFAM 674 Human Sexual Behavior 3

Total Units 43

D.M.F.T. specific curriculum (online)

Theory and practice

- MFTH 504 Advanced Theory in Marital and Family Therapy 4
- MFTH 506 Foundations of Systems Thinking: Theory and Neuroscience 3
- MFTH 546 Advances in Family Sciences 3
- MFTH 634 Practicum in Marital and Family Therapy 1

Supervision

- MFTH 501 Fundamentals of Supervision in Marital and Family Therapy 3
- MFTH 502 Advanced Supervision in Marital and Family Therapy 1

Program development and administration

- MFTH 524 Marital and Family Therapy Administration: Organizational Structure, Process and Behavior 3
- MFTH 525 Advanced Marital and Family Therapy Assessment and Testing 3
- MFTH 555 Organizational Development and Change 3
- MFTH 624 Program Development for Families and Communities 3
- MFTH 625 Grant Writing 3
- MFTH 626 Program Evaluation and Monitoring 3

Spirituality

- RELE 5 Graduate-level ethical studies elective 3
- RELR 5 Graduate-level relational studies elective 3
- RELT 5 Graduate-level theological studies elective 3

Research

- MFTH 545 Research and Practice with Couples and Families 3
- MFTH 601 Statistics I 4
- MFTH 604 Advanced Qualitative Methods 4
- MFTH 605 Advanced Quantitative Methods 4

Doctoral project

- MFTH 695 Project Research 12

Total Units 77

Professional development and practice

- MFTH 785A Begin Clinical Training in Couple, Marital, and Family Therapy 0
- MFTH 785B Clinical Training in Couple, Marital, and Family Therapy 1, 2, 3 4
- MFTH 786 Professional Development Proposal 0
- MFTH 786A and 786B total combined units 4 36
- MFTH 786A Professional Development in Marital and Family Therapy
- MFTH 786B Professional Internship in Marital and Family Therapy—Clinical

Total Units 40

Noncourse requirements

Doctoral degrees in Marital and Family Therapy will be awarded when students have completed all required course work and the following non-course requirements:

- 1000 approved client contact hours
- 200 approved hours of clinical supervision
- A written qualifying examination
- An oral defense of the doctoral project
Normal time to complete the program
With a COAMFTE-accredited master’s degree: Two (2) years (seven [7] academic quarters) based on full-time enrollment

With a non-COAMFTE-accredited master’s degree: Three (3) years (11 academic quarters) based on full-time enrollment

School Counseling — Certificate

Program director
Randall Walker

Admissions limited to students enrolled in a degree program in the Department of Counseling and Family Sciences for the 2019-2020 academic year.

The School Counseling Program certificate is one of two options in the Department of Counseling and Family Sciences that qualify a graduate for the California pupil personnel services (PPS) credential in school counseling. Students pursuing the M.S. degree curriculum in the Counseling Program may choose school counseling as a single specialization embedded in the degree program, or combine it with the licensed professional clinical counselor (LPCC) specialization. Students in the Marital and Family Therapy Program may add the School Counseling Program certificate to their M.S. degree curriculum. Successful completion of the certificate, including passing scores on all sections of the California Basic Educational Skills Test (CBEST), will qualify graduates for the California PPS credential in school counseling. As with all department programs, the School Counseling Program certificate is designed in accordance with the department’s vision of transforming relationships. Faculty members are committed to the mission of facilitating wholeness by promoting health, healing, and hope to individuals, families, and communities through education, research, professional training, community service, and global outreach.

The call to service
In the heart of the campus, the University’s commitment to service is memorialized in the Good Samaritan sculpture that contrasts human indifference and ethnic pride with empathy and service. As counseling needs are more openly recognized and accepted across cultures, students and faculty members are called to serve together in local and global communities. Loma Linda University’s relationships around the world continue to create unique opportunities for students to join in global partnership through field experience.

Professional school counseling
Professional school counselors are leaders of counseling programs within the educational system. As articulated by the American School Counselor Association (ASCA), school counseling programs are preventive in design, developmental in nature, and integral to the total educational program. Counselors address academic, career, and personal/social needs through their work as advocates for K-12 students, collaborators with parents and school personnel, and liaisons to the community. Employment as a school counselor in public schools requires the pupil personnel services credential in school counseling. Combining the school counselor certification with licensure in clinical mental health is an excellent professional path that enhances competence and professional opportunities. Additional information is located on the California Commission on Teacher Credentialing website at <http://www.ctc.ca.gov>.

Degree and certificate requirements
The School Counseling Program certificate is paired with the M.S. degree at Loma Linda University. An approved master’s degree is required for state credentialing. Therefore, it is not possible to complete the certificate and receive a University recommendation for the school counseling credential until all degree and certificate requirements are completed. This applies to students pursuing the M.S. degree in counseling (credential option) and the M.S. degree in marital and family therapy (school counseling certificate option). Required courses for the certificate/credential program are listed at the end of this narrative.

Certificate of clearance prior to field placement
School Counseling Program students must obtain a certificate of clearance (COC) from the state of California before they are allowed to begin field experience. The COC requires verification of a current TB test and a LiveScan, in accordance with state guidelines. The process can take six to eight weeks.

Practicum and field experience
Field experience requirements for the certificate program include 100 hours of prefield practicum followed by 600 hours of field experience. For students in a clinical master’s degree program, prefield hours are met earlier through clinical placements. In addition, 200 of the required 600 hours of school counseling field experience can be elective hours from clinical training. The remaining 400 hours must be completed as a school counselor trainee in public schools, evenly divided between two different grade blocks (e.g., elementary school, middle school, or high school).

California Test of Basic Skills (CBEST)
Candidates for the school counseling certificate must take the California Basic Educational Skills Test (CBEST) within the first two quarters following admission to the program and must pass all sections of the CBEST before the University can recommend them for the school counseling credential.

Financial assistance
This program is not independently eligible for federal financial aid. However, a student can complete the requirements for this certificate while concurrently enrolled in a School of Behavioral Health graduate degree program as noted above (see degree and certificate requirements).

Program learning outcomes
By the end of this program, the graduate should be able to:

1. Integrate counseling concepts and skills with a personal epistemology.
2. Demonstrate counseling interventions based upon a broad range of theoretical and legal/ethical frameworks through comprehensive written examination.
3. Develop identity as a professional school counselor through membership and participation in professional organizations.
4. Satisfactorily complete 600 clock hours of supervised practicum in counseling, 200 of which may be supervised clinical hours.
5. Meet all University qualifications for the California pupil personnel services credential in school counseling issued by the California Commission on Teacher Credentialing (CTC).

**Accreditation**

Loma Linda University is regionally accredited by the WASC Senior College and University Commission (WSCUC), 985 Atlantic Avenue, Suite 100, Alameda, CA 94501; telephone: 510/748-9001; fax: 510/748-9797; website: <http://www.wascsenior.org/contact>. The pupil personnel services (PPS) credential curriculum in school counseling is accredited by the Committee on Accreditation, on behalf of the California Commission on Teacher Credentialing (CTC). Additional PPS information can be obtained by going to the CTC website at <http://www.ctc.ca.gov/>.

**Admissions**

Students pursuing the M.S. degree in Counseling do not need to apply to the certificate program to qualify for the PPS credential because the curriculum is a specialization option within their degree program. Students pursuing the M.S. degree in Marital and Family Therapy must complete the standard online application to enroll in the School Counseling certificate program and are advised to consult with the program director prior to initiating application submission. As with all programs in the School of Behavioral Health, applicants must meet Loma Linda University (p. 24) and School of Behavioral Health (p. 149) admissions requirements; and give evidence of academic ability, professional comportment, and mature judgment. Applicants, who meet these requirements as well as the published deadlines for the following terms, may be admitted during Summer, Autumn, Winter, or Spring quarters. Additional admission requirements include:

- Candidate or graduate with qualifying M.S. degree as specified above.
- Minimum grade point average of 3.0 (on a 4.0 scale) in bachelor’s course work for at least the final 45 units prior to graduation, or minimum of 3.0 grade point average in master’s degree program.
- Three letters of recommendation, as specified (two letters for students already admitted to department master’s degree program).
- Written personal statement that addresses career objectives, personal interest in the school counseling profession, rationale for choosing to attend Loma Linda University, how life experiences have influenced applicant’s choice to enter professional school counseling, and additional thoughts the applicant deems appropriate. (Will be uploaded as part of the online application process.)
- Interview with program director and department faculty as scheduled. On-campus group interviews are scheduled for early March and late April; other on-campus or telephone interviews are scheduled for individuals as indicated.

Pre-entrance clearance (p. 25):

- A background check
- Health clearance

**Program requirements**

The curriculum for the School Counseling Program combines specialization courses for the California Pupil Personnel Services (PPS) credential in school counseling with the requirements for the M.S. degree in marital and family therapy outlined below. The PPS credential program in school counseling is also offered in the M.S. in Counseling degree as a specialization option. Enrollment in the PPS program is restricted to candidates in one of these two master’s degree programs at Loma Linda University.

Students must maintain a minimum grade point average of B (3.0) in all courses taken for the certificate.

1 Course to be taken a minimum of two times
2 When combining the PPS school counseling certificate/credential program with a clinical master’s, only COUN 781 and COUN 782 are required. 700-numbered courses do not count toward minimum didactic units required for the certificate.

**Normal time to complete the program**

1 year (four [4] academic quarters) — based on full-time enrollment; part time permitted
Systems, Families, and Couples—Ph.D.

Program director
Zephon Lister

The Ph.D. degree in systems, families, and couples follows the scientist-practitioner model in which students are expected to develop expertise in both research and state-of-the-art practice. The 103-unit curriculum requires a minimum of four years of full-time study for completion—including two-to-three years of course work, clinical practice leading to licensure or certification, a dissertation, and supervised professional development experiences. The purpose of the curriculum is to develop family life scholars and practitioners who will advance theory, research, practice, and teaching in the field of family social science. Students will be prepared for academic and clinical training positions in universities and postgraduate institutes. Ph.D. degree students develop expertise in conducting original research using quantitative, qualitative, and mixed method approaches.

Ph.D. degree program specialty
Students in the Ph.D. degree program in systems, families, and couples will choose one of two specialties: family studies or couples and family therapy. These specialties include required courses totaling 22 units of course work that undergird the program of study.

The family studies specialty focuses on skills development in the delivery of family services, especially within a teaching format. An example is developing curricula for parenting courses. The family studies specialty meets the course requirements of the National Council on Family Relations for Certified Family Life Educator. More information on becoming certified by the National Council on Family Relations can be found in the organization’s official website at [http://www.ncfr.org](http://www.ncfr.org).

The couples and family therapy specialty focuses on researching and honing clinical skill for work with family systems. This specialty is fully accredited by the Commission on Accreditation for Marriage and Family Therapy Education, the accrediting body for the American Association for Marriage and Family Therapy. The national commission functions to ensure that academic and clinical training programs adhere to the highest standards of the profession. For more information on the field of marital and family therapy, core ideas guiding this doctoral program, and the marital and family therapy specialty’s advanced standing policy, see the overview section (http://llucatalog.llu.edu/behavioral-health/marital-family-therapy) for the Ph.D. degree program.

Knowledge and skills promoted

Theory and practice
Students study the work of original thinkers in systems, families, and couples, as well as the most recent developments in the field—such as social constructionism, evidence-based practice, and global perspective. Students will develop a critical understanding of the theoretical and philosophical foundations of the field; critically examine the interrelationships between socio-historical factors, transnational family structures and relationships, and clinical approaches; be conversant in the current issues in the field; and contribute to the discourse regarding them. They will use this knowledge to advance the field of family therapy.

Research skills
Students will develop skills and a critical understanding of the process of research and evaluation related to families and intervention work. This includes the ability to apply research findings to clinical practice and to utilize research findings in creative ways for the benefit of the general population. Ph.D. degree students will develop expertise in quantitative, qualitative, and mixed methods research approaches, leading to publication in scholarly journals and presentations at professional conferences.

Teaching skills
The program provides experiential and didactic training for teaching in higher education as well as community settings. Through didactic training, students will be exposed to various teaching and learning paradigms and will ultimately select their own epistemology. They will test and grow this epistemology through experiential training as they lead a course (e.g., develop syllabi, tests, and assignments) under the supervision of a faculty member. Advanced students will also be given opportunities to facilitate or co-facilitate courses on their own.

Practice and supervisory skills
Students will apply a critical understanding of theory to work with couples and families, community, and societal levels drawing on the core modalities of the field. They will develop sophistication in their personal and professional skills, supervisory skills, and skills for active multisystemic involvement.

Personal development
The program encourages students to develop a clear understanding of themselves, and it invites reflection and consideration of the impact of their personal values, social positions, and contexts on their clinical and scholarly practices. Students are supported in the development of their strengths as they create epistemological frameworks and ethical consciousness to guide their research and practice. They are encouraged to engage beyond their local communities to include experiences in wider cultural and global contexts.

Program learning outcomes
By the end of this program, the graduate should be able to:

Family studies
1. Develop professional identity as doctoral-level family scientists.
2. Discuss theoretical and philosophical foundations of the field of family science and be conversant with the ongoing development of family theories.
3. Critique and evaluate the current and ongoing issues in the field of human development and family studies.
4. Be conversant with legal and ethical issues as a family scientist in the areas of teaching, research, and service.
5. Become adept in family service practice skills.
6. Contribute to the body of knowledge in family social science.

Couples and family therapy
1. Develop a professional identity as doctoral scholars and practitioners aligned with national practice standards.
2. Become adept in systems/relational practice, demonstrating sophistication as a scientist-practitioner.
3. Assess, synthesize, and critique theory, research, and family science literature to advance and integrate research, theory, and practice in the field.
4. Demonstrate knowledge and skills as researchers in the field of family social science.
5. Respond appropriately to the societal, cultural, and spiritual contexts in which health and well-being are embedded.
6. Develop an ethical consciousness that guides their practice in aspects of professional work.

Financial assistance

Students who are accepted into the Ph.D. degree curriculum in Systems, Families and Couples may apply for work-study and department-funded research, teaching, and administrative assistantships awarded by the Department of Counseling and Family Sciences. Departmental awards are contingent on the availability of funds. Students may also apply for need-based financial aid, such as a loan or other work-study programs on campus.

Students may apply for financial aid by writing to:

Student Financial Aid Office
Student Services
Loma Linda University
Loma Linda, CA 92350
909/558-4509

Admissions

Applicants must meet Loma Linda University (p. 24) and School of Behavioral Health (p. 149) admissions requirements; and give evidence of academic ability, professional comportment, and mature judgment. The Ph.D. degree curriculum represents advanced study over and above a standard master’s degree curriculum in the field. Admission is based on an integrated evaluation of the following criteria:

- Five-page personal essay (guidelines included in the online application)
- M.S. degree in marital and family therapy, family studies or related field
- Grade point average (3.3 minimum)
- Structured oral interview with department (one day)
- Three letters of reference (two academic and one professional)
- Curriculum vitae (preferred but not required)
- GRE scores (taken within the past five years)

The admissions committee uses the above criteria to evaluate applicants on each of the following equally weighted criteria:

1. Academic preparedness
2. Professional preparedness for doctoral study
3. Research potential
4. Ability to work with diversity
5. Clinical and/or Family Life Education skills

Pre-entrance clearance (p. 25):

- A background check
- Health clearance

Program requirements

Corequisites

Student transcripts will be evaluated on a course-by-course basis for the following areas of corequisite study. A plan of study incorporating these standard master’s degree-level courses is available for students who have not completed these corequisites. See required master level courses.

| Theoretical knowledge in family systems/relational therapy or family science | 8 |
| Clinical knowledge in marital and family therapy or family life education | 16 |
| Individual development and family relations | 8 |
| Additional study in the three areas above | 4 |
| Professional issues and ethics in marital and family therapy or family studies | 4 |
| Research | 4 |
| Additional related study | 4 |
| **Total Units** | **48** |

A grade of B or better indicates that a student has mastered the knowledge, skill, and professional practice performance competencies outlined by the program. In order to progress successfully and complete the degree, students must meet both course and cumulative G.P.A. standards. The University allows students to repeat two courses per degree. Course repeat expectations set by the School of Behavioral Health may be found in the general regulations section of this CATALOG.

1. Course repeated to fulfill total unit requirement
2. 700-numbered courses do not count in total didactic units required for the degree

**Non-course requirements**

Doctoral degrees in systems, families and couples will be awarded when students have completed all the required course work and the following non-course requirements:

- 1000 approved client contact hours (applies only to Couples and Family Therapy specialty).
- 200 approved hours of clinical supervision (applies only to Couple and Family Therapy specialty).
- A professional developmental portfolio or written qualifying examination.
- An oral defense of the doctoral dissertation.

**Normal time to complete the program**

Three (3) to four (4) years (13 academic quarters) based on full-time enrollment

**Additional required courses for MFT licensure in California**

Students entering the PhD program without a COAMFTE accredited master’s degree, who wish to obtain licensure in California, will be required to meet the course requirements of the M.S. in Marital & Family Therapy (p. ) program. A course—by-course evaluation will be done to determine which courses in the student’s previous master's degree program fulfill specific course requirements for California licensure.
Department of Psychology

The Department of Psychology offers a combination of innovative training opportunities in clinical psychology. Both the Doctor of Psychology (Psy.D.) and the Doctor of Philosophy (Ph.D.) degrees in clinical psychology are APA-accredited.

Mission statement

The mission and motto of Loma Linda University and Loma Linda University Medical Center are "to continue the teaching and healing ministry of Jesus Christ to make man whole." This mission and motto, combined with the University's values of compassion, integrity, excellence, freedom, justice, purity, and humility are central to the Department of Psychology and its programs. The Department of Psychology seeks to advance the institutional mission, both nationally and internationally, through academic, research, and practice activities related to behavioral health.

Loma Linda University Health is part of a worldwide network of healthcare systems and is uniquely connected and poised to participate globally through its numerous clinics, hospitals, healthcare facilities, and educational institutions throughout the world. This globalized healthcare orientation provides expanded training opportunities for students who have a passion for a broader life experience in assisting with the healthcare needs of diverse peoples both nationally and internationally.

Academic writing support

Students who need assistance can contact their program director to arrange for individual support.

Psychology M.A. degree eligibility

As part of the overall doctoral program, a master’s degree in psychology — based on the successful completion of course work for the degree — is available to students enrolled in the Ph.D. or Psy.D. degree program. Eligibility for the M.A. degree requires the student to complete 51 units of course work and to formally apply, by submitting a petition to graduate, for the degree. The Department of Psychology does not admit students to an M.A.-only degree program; and the M.A. degree is not formally awarded at commencement. Students do not participate in the graduation exercise.

A complete list of part-time and voluntary faculty can be viewed on the department website: <http://www.llu.edu/behavioral-health/psychology/>.

Programs

• Psychology — Psy.D. (p. 177), Ph.D. (p. 175), Comparison (p. 179)

Psychology — Ph.D.

Director of clinical training
Holly Morrell

The APA-accredited Ph.D. degree program in clinical psychology has been informed by the traditional scientist-practitioner model, which emphasizes training in research and clinical practice. The Ph.D. degree program is designed to be completed in six years (approximately 24 quarters of full-time enrollment).

Program learning outcomes:

By the end of the program, the graduate should be able to:

1. Show an advanced understanding of the science of psychology.
2. Demonstrate skills to conduct independent and original research.
3. Function as a highly competent clinician for whom research and practice constantly inform each other.
4. Integrate whole-person care into clinical work.
5. Consistently engage in activities that promote lifelong learning.

Curriculum

The Ph.D. clinical degree program requires completion of course work in the following areas: psychological science foundations, quantitative/research foundations, wholeness, general and elective courses, psychological assessment and treatment, clinical practice, and research. The specific course requirements are predicated on the training model (i.e., scientist-practitioner). The specific curriculum requirements associated with the Ph.D. degree program are indicated below.
All students are required to complete a specified number of elective units for the completion of their degree. The department offers elective course work in specialty areas such as clinical health psychology, neuroscience and neuropsychology, clinical child psychology, and social/cultural health psychology, among other areas.

Students have the option (but are not required) to utilize 12 units of their total elective unit requirement to fulfill a professional concentration. In order to complete a professional concentration, students must submit a formal proposal to the Department of Psychology Academic Affairs Committee indicating the 12 elective units they propose to use toward the completion of their professional concentration, as well as the proposed title of the professional concentration. The Department of Psychology Academic Affairs Committee will consider each proposal individually in making a recommendation to support/not support the proposed concentration.

Under certain circumstances and upon recommendation of the Department of Psychology Academic Affairs Committee, a student may adjust courses or number of units taken during the current and subsequent academic year(s) to best fit their program requirements. Also, upon such recommendation, the student will be permitted to move forward as a member of the cohort with which he or she enrolled.

**Accreditation**

The Doctor of Philosophy degree in clinical psychology is accredited by the Commission on Accreditation of the American Psychological Association. Questions related to the program’s accreditation status should be directed to the Commission on Accreditation:

Office of Program Consultation and Accreditation
American Psychological Association
750 1st Street, NE, Washington, DC 20002
telephone: 202/336-5979; e-mail: <apaaccred@apa.org>

**Admissions**

In addition to Loma Linda University (p. 24) and School of Behavioral Health (p. 149) and the Faculty of Graduate Studies admissions requirements, the following minimum criteria are preferable to be considered for a pre-admission interview:

- A bachelor’s degree in psychology or a related discipline.
- An undergraduate G.P.A. of 3.0 or higher on a 4.0 scale or a master’s degree G.P.A. of 3.3 or higher from a regionally accredited graduate program.
- Verbal and quantitative scores, Graduate Record Examination (GRE) general test: The sum of the GRE verbal and quantitative percentile rankings must equal or exceed 100, and neither percentile ranks can be below the 35th percentile. Only the most current GRE scores are admissible (exam must have been taken within the last five years and the most recent dated exam will be considered). The GRE psychology subject examination is not required.
- Writing assessment, GRE general test: The GRE analytical writing section score must equal 4.0 or higher.
- Structured pre-admission interview by invitation: The psychology department requires a structured pre-admissions interview.
- Recommendation letters: Three letters of recommendation from professionals unrelated to the applicant and qualified to assess the applicant’s potential for graduate education. A minimum of two letters are preferred from current or previous professors.

Any exceptions to the established G.P.A. and GRE minimum criteria, or any other admissions criteria, are made at faculty discretion and grounded on faculty’s overall assessment of the applicant and his/her credentials (e.g., demonstrated record of scholarship and/or specialized research training, strength of the applicant’s prior academic training / institution, strength of applicant’s letters of recommendation, and previous clinical experience).

Internship (any combination of PSYC 799A and PSYC 799B is acceptable)  40
   PSYC 799A  Internship (5)
   PSYC 799B  Internship (10)

Total Units 83

1  RELE 600 level courses will also be accepted
2  Students may meet their elective-unit requirement through any of the following: 1) any elective course chosen from this list, 2) any other elective course offered by the Department of Psychology that is not being used to meet another requirement, 3) any graduate-level course offered in any other department in the School of Behavioral Health, or 4) any graduate-level course offered in any other school other than the School of Behavioral Health with department approval.
3  California licensure courses
4  700-numbered courses are in addition to didactic units required for the degree

Minimum required grade point average
Students must maintain a minimum grade point average of B (3.0) in all courses taken for the degree. Furthermore, three failed grades (B- or below, or U) is grounds for dismissal from the program.

Comprehensive examination
Students in the Ph.D. program must successfully pass the comprehensive examination. The comprehensive examination is taken after completing the core curriculum. Though the specific format of the comprehensive examination is subject to change, the department currently utilizes the Examination for Professional Practice in Psychology as the comprehensive examination. This examination covers the following domains:

- biological bases of behavior
- cognitive—affective bases of behavior
- social and multicultural bases of behavior
- growth and lifespan development
- assessment and diagnosis
- treatment/intervention
- research methods
- ethical/legal/professional issues

Doctoral research
Students in the Clinical Ph.D. program are expected to meet specified research requirements, among which is the doctoral dissertation. The requirements for the dissertation are delineated by the Department in accordance with standards established by the School of Behavioral Health and the Faculty of Graduate Studies. For the doctoral dissertation, a formal proposal must be submitted to and approved by a faculty supervisory committee. Furthermore, upon completion of the doctoral dissertation, a public defense before the supervisory committee is required.

Advancement to candidacy
Students may apply for doctoral candidacy upon successful completion of:

- the core curriculum
- required practicum experiences
- the comprehensive examination
- the doctoral dissertation proposal

Normal time to complete the program
Six (6) years — full-time enrollment required

Psychology — Psy.D.

Director of clinical training
Kendal C. Boyd

The APA-accredited Psy.D. degree program, influenced by the practitioner-scholar model, emphasizes training in clinical practice based on the understanding and application of scientific psychological principles and research. The Psy.D. degree program is designed to be completed in five years or approximately 20 quarters of full-time enrollment.

Program learning outcomes
1. Show an advanced understanding of the science of psychology.
2. Function as highly competent clinician for whom research and practice constantly inform each other.
3. Demonstrate skills to conduct understand research.
4. Integrate whole-person care into clinical work.
5. Consistently engage in activities that promote lifelong learning

The Psy.D. degree program makes a systematic attempt to promote an understanding of human behavior in relation to psychological, physical, spiritual, and social/cultural dimensions. For this purpose, the program provides a positive environment for the study of psychological, biological,
cultural, social, and spiritual issues relevant to psychological research and practice.

Curriculum

The Psy.D. clinical degree program requires completion of course work in the following areas: psychological science foundations, quantitative/research foundations, wholeness, general and elective courses, psychological assessment and treatment, clinical practice, and research. Specific course requirements are predicated on the training, practitioner-scholar, model. Curriculum requirements associated with the Psy.D. degree program are indicated below.

All students are required to complete elective units for degree completion. The department offers elective course work in specialty areas such as clinical health psychology, neuroscience and neuropsychology, clinical child psychology, and social/cultural health psychology, among other areas.

Students have the option to utilize 12 units of their total elective unit requirement to fulfill a professional concentration. In order to complete a professional concentration, students must submit a formal proposal to the Department Academic Affairs Committee indicating the 12 elective units they propose to use, as well as the proposed title of the professional concentration. The Department Academic Affairs Committee will consider each proposal individually in making a recommendation to support or not support the proposed concentration.

Under certain circumstances, and upon recommendation of the Department of Psychology Academic Affairs Committee, students may adjust courses or number of units taken during the current and subsequent academic year(s) to best fit their program requirements. Upon such recommendation, students will be permitted to move forward as members of the cohort in which they enrolled.

Accreditation

The Doctor of Psychology degree in clinical psychology is accredited by the Commission on Accreditation of the American Psychological Association. Questions related to the program’s accreditation status should be directed to the Commission on Accreditation:

Office of Program Consultation and Accreditation
American Psychological Association
750 1st Street, NE, Washington, DC 20002
telephone: 202/336-5979; e-mail: apaaccred@apa.org; website: <http://www.apa.org/ed/accreditation>. (http://www.apa.org/ed/accreditation)

Admissions

In addition to Loma Linda University (p. 24) and School of Behavioral Health (p. 149) and the Faculty of Graduate Studies admissions requirements, the following minimum criteria are preferable to be considered for a pre-admission interview:

- A bachelor’s degree in psychology or a related discipline.
- An undergraduate G.P.A. of 3.0 or higher on a 4.0 scale or a master’s degree G.P.A. of 3.3 or higher from a regionally accredited graduate program
- Verbal and quantitative scores, Graduate Record Examination (GRE) general test: The sum of the GRE verbal and quantitative percentile rankings must equal or exceed 100, and neither percentile can be below the 35th percentile. Only the most current GRE scores are admissible (exam must have been taken within the last five years and the most recent dated exam will be considered). The GRE psychology subject examination is not required.
- Writing assessment, GRE general test: The GRE analytical writing section score must equal 4.0 or higher.
- Structured pre-admission interview by invitation: The psychology department requires a structured pre-admissions interview.
- Recommendation letters: Three letters of recommendation from professionals unrelated to the applicant and qualified to assess the applicant’s potential for graduate education. A minimum of two letters are preferred from current or previous professors.

Any exceptions to the established G.P.A. and GRE minimum criteria, or any other admissions criteria, are made at faculty discretion and grounded on the faculty’s overall assessment of the applicant and his/her credentials. Credentials include a demonstrated record of scholarship and/or specialized research training, strength of the applicant’s prior academic training/institution, strength of applicant’s letters of recommendation, and previous clinical experience.

1 RELE 500- or 600-level courses will also be accepted.
2 RELT 500- or 600-level courses will also be accepted.
3 Students may meet their elective-unit requirement through any of the following: 1) any elective course chosen from this list, 2) any other elective course offered by the Department of Psychology that is not being used to meet another requirement, 3) any graduate-level course offered in any other department in the School of Behavioral Health, or 4) any graduate-level course offered in any school other than the School of Behavioral Health, with department approval.
4 700-numbered courses are in addition to the didactic units required for the degree.
Department of Social Work and Social Ecology

The Department of Social Work and Social Ecology is an interdisciplinary academic unit that supports the institution's commitment to human wholeness and its belief that one's fullest development is achieved when all subsystems affecting the individual are understood and balanced. Both conceptually and pragmatically, the programs in the Department of Social Work and Social Ecology are guided by an overarching ecological (bio-psycho-social-spiritual) perspective and methodological framework that supports the use of scientific methods of problem analysis and program design.

A key component in this framework is the importance of interdisciplinary scholarship when studying the interrelated aspects of behavioral, sociopolitical, economic, and environmental problems. The result is an interdisciplinary teaching, learning, and practice environment brought together for the purpose of creating sustainable interventions directed toward improving the functioning of individuals, families, groups, organizations, institutions, and communities. As such, priority has been given to creating an academic milieu favorable to educating competent, ethical, and compassionate professionals and scholars for advanced practice roles—capable of respecting and addressing the needs of diverse populations.

Criminal Justice — M.S.

Program director
Kimberly Freeman

Loma Linda University's motto, "To make man whole," provides a powerful and much-needed context in which criminal justice can be addressed on the basis of healing and restoration within a behavioral health framework.

An interdisciplinary approach to this course of study considers the biological, psychological, social, and spiritual well-being of victims, offenders, and communities. The curriculum provides a deeper understanding of crime and social justice through the lens of a forensic behavioral health specialization.

Mission

The mission of the Criminal Justice Program is to prepare students to think critically and analytically about the problems of crime and social control in contemporary American society and to work with the legal system as it relates to a forensic behavioral health framework.

Program learning outcomes

By the end of this program, the graduate should be able to:

1. Integrate and utilize knowledge of social science and theories of criminology as applied to criminal justice issues within behavioral health settings.
2. Describe the dimensions and causes of crime and delinquency.
3. Describe the structure of the American criminal and juvenile justice systems.
4. Use research in evaluating the effectiveness of practice and programs within criminal and juvenile justice settings.
5. Practice ethical principles that guide the concepts of justice, fairness, and treatment within criminal and juvenile justice systems.
6. Use mental illness and treatment interventions within a forensic behavioral health framework
7. Identify differences between retributive and restorative justice approaches in addressing the effects of crime.

General overview

The 48-quarter unit program begins with 20 units of foundation course work that is divided into three professional areas of study: criminal justice, human wholeness, and social research methods. During the final year of study, students complete a forensic behavioral health specialization along with specialized selectives. Forensic behavioral health is a specialized branch of professional practice in which the behavioral health and criminal-justice worlds overlap. Students will focus on the needs of individuals in the criminal and/or juvenile justice systems who experience severe mental illness and may also present co-occurring substance use. Students will gain knowledge and skills in treatment programming. In addition, students will be prepared to assess and provide expert testimony regarding continued institutionalization versus readiness for community treatment.

Students have two options to complete the program:

1. Nonthesis: Professional practica (540 hours of integrated practicum and seminar) and eight units of didactic selectives.
2. Thesis: Six units of academic thesis and two units of didactic selectives.

Admissions

In addition to Loma Linda University (p. 24) admission requirements, this program follows the admission requirements of the School of Behavioral Health (p. 149), as follow:

1. Applicants must meet the minimum academic and professional compatibility criteria established by the program. These criteria include:
   - A cumulative undergraduate grade point average of 3.0 or above (on a 4.0 scale). Applicants with lower grade point averages will be considered if the last 45-quarter credits (30 semester units) of non-field practica coursework shows significant improvement or if they have additional attributes that demonstrate preparedness and an appropriate fit for graduate education in the area of Criminal Justice. Work and volunteer experiences must be verified by employer/supervisor statements on official agency stationery. Further consideration will also be given to individuals who provide evidence of additional graduate coursework, certifications, and/or training that illustrate preliminary preparation for a career in Criminal Justice. Students who are admitted to the Criminal Justice Program with a cumulative G.P.A. below 3.0 may be required to participate in individualized academic assessment and a targeted learning assistance program.
   - Demonstration, through the application and interview processes, of compatibility with professional standards set by the program including the ability to develop and nurture interpersonal relationships, communication skills, self-awareness, professional comportment, critical thinking skills, fit with the mission and values of Loma Linda University and the Department of Social Work and Social Ecology, and the capacity to successfully complete the Master of Science in Criminal Justice curriculum.
2. Submission of three letters of recommendation; including one from an academic source and one from a work supervisor, preferred.

Program requirements

The 48-unit curriculum for the M.S. degree in criminal justice provides the mix of academic, experiential, and research activities essential for M.S. degree students.

A grade of B or better indicates a student has mastered knowledge, skills, and professional practice performance competencies outlined by the program. In order to progress successfully though the program and complete the degree, students must meet the G.P.A. and course repeat expectations set by the School of Behavioral Health in the general regulations (p. 148) section of this CATALOG.

Gerontology — M.S.

Program director
Kimberly Freeman

Gerontology is the multidisciplinary-multidimensional study of aging and aging processes. Emphasis is placed on the knowledge and skills required for competent practice, with considerable attention given to understanding the social, cultural, and economic factors that affect services for this population.

Mission
The mission of the Gerontology Program is to provide graduate-level education for current and future professionals who are dedicated to enhancing the lives of older adults through evidenced-based interventions.

Program learning outcomes
By the end of this program, the graduate should be able to:

1. Integrate human behavior and developmental theories of aging, incorporating a bio-psycho-social-spiritual strength-based orientation to geriatric practice.
2. Use research in evaluating the effectiveness of practice and programs in achieving intended outcomes for older adults.
3. Integrate into practice intersectionality and the unique needs of older adults belonging to specific racial, ethnic, socioeconomic groups; of men and women; and of those with different sexual orientations.
4. Demonstrate professional ethics in proving assistance to older adults.
5. Effectively implement evidenced-based interventions that enhance the lives of older adults.
6. Follow policies that shape and regulate the continuum of care and services available to older adults.

General overview
The 48-unit program provides students with a balance of academic, experiential, and research activities essential for work with older adults. The curriculum begins with 22 units of foundational coursework that is divided into three professional areas of study including: gerontology, religion and wholeness, and social research methods. During the final year of study, students complete geriatric practice courses along with specialized selectives. The curriculum allows students to develop their knowledge and skills in locating and providing resources, services, and opportunities for older adults and their families; as well as a problem-solving approach supporting the development of coping skills for older adults and their caregivers.

In addition to the above, students are given either a thesis or a non-thesis, professional practicum, option.

Normal time to complete the program
Two (2) years (seven [7] quarters) based on full-time enrollment; part time permitted

Admissions
In addition to Loma Linda University (p. 24) admission requirements, this program follows the admission requirements of the School of Behavioral Health (p. 149), as follow:

1. Applicants must meet the minimum academic and professional compatibility criteria established by the program. These criteria include:
   • A cumulative undergraduate grade point average of 3.0 or above (on a 4.0 scale). Applicants with lower grade point averages will be considered if the last 45-quarter credits (30 semester units) of non-field practica coursework shows significant improvement or if they have additional attributes that demonstrate preparedness and an appropriate fit for graduate education in Gerontology and geriatric practice. Work and volunteer experiences must be verified by employer/ supervisor statements on official agency stationery. Further consideration will also be given to individuals who provide evidence of additional graduate coursework, certifications, and/or training that illustrate preliminary preparation for a career in gerontology. Students who are admitted to the Gerontology Program with a cumulative G.P.A. below 3.0 may be required to participate in individualized academic assessment and a targeted learning assistance program.
   • Demonstration, through the application and interview processes, of compatibility with professional standards set by the Program including the ability to develop and nurture interpersonal relationships, communication skills, self-awareness, professional comportment, critical thinking skills, fit with the mission and values of Loma Linda University and the Department of Social Work and Social Ecology, and the capacity to successfully complete the Master of Science in Gerontology curriculum.
2. Submission of three letters of recommendation; one from an academic source and one from a work supervisor, preferred.

Program requirements
The 48-unit curriculum for the Master of Science degree in Gerontology provides the mix of academic, experiential, and research activities essential for M.S. degree students.

A grade of B or better indicates a student has mastered knowledge, skills, and professional practice performance competencies outlined by the program. In order to progress successfully through the program and complete the degree, students must meet the G.P.A. and course repeat expectations set by the School of Behavioral Health in the general regulations (p. 148) section of this CATALOG.

Normal time to complete the program
Two (2) years (seven [7] academic quarters) based on full-time enrollment; part time permitted.

Play Therapy – Certificate

Program director
Kimberly Freeman

Play therapy is a recognized, theory-based approach for working with children and adolescents presenting with behavioral health issues. This approach utilizes toys and other expressive activities as forms of communication and as intervention methods for problem solving and promoting well-being.

The fully online Play Therapy Program certificate is designed to meet the educational requirements of the Association of Play Therapy to become a registered play therapist (RPT) and is designed for behavioral health professionals with or in the process of obtaining a licensable graduate degree from an accredited college.

Program learning outcomes
By the end of this program, the graduate should be able to:

- Relate the history of play therapy to applications in the assessment and treatment of children and youth.
- Describe theories that inform play therapy with children and adolescents, including those guiding assessment, diagnosis, and specialized interventions.
- Use play therapy methods and techniques with children and adolescents, including those applicable in specialized interventions.

The Play Therapy Program certificate is housed under the Division of Interdisciplinary Studies in the School of Behavioral Health. Programs under the Division of Interdisciplinary Studies are considered areas of study that are applicable to all of the behavioral health professions. As such, these programs bring together the collective academic and clinical expertise of all of the departments in the School of Behavioral Health.

Admissions
Applicants must meet the admission requirements as follow:

1. A fully completed LLU application form.
2. A graduate with a licensable mental health degree from an accredited university. Official transcripts are evidence of degrees and courses completed. Individuals already licensed as mental health professionals must be in good standing with the relevant licensing board.
3. Consideration for admission will be given to individuals in the process of completing licensable mental health graduate degrees from accredited universities. Applicants must be in good academic standing and have permission from their current programs to enroll.
4. Submit two letters of recommendation from an academic source, professional peer, or a work supervisor.

Program requirements
A grade of B or better indicates a student has mastered knowledge, skills, and professional practice performance competencies outlined by the program. In order to progress successfully through the program and complete the degree, students must meet the G.P.A. and course repeat expectations set by the School of Behavioral Health in the general regulations (p. 148) section of this CATALOG.

Required foundation courses
PLTH 513 Introduction to Play Therapy 3
PLTH 516 Child-Centered Play Therapy 3
PLTH 546 Child-Parent Relationship Therapy CPRT (Filial Therapy) 3
PLTH 550 Trauma Focused Play Therapy 3
REL 5 1

Total Units 13

1 Students select the religion course to be taken in consultation with their advisor.

Normal time to complete the program
Four (4) academic quarters based on less than half-time enrollment.
Social Welfare and Social Research — Ph.D.

Program director
Larry Ortiz

The mission of the Social Welfare and Research Program is to extend the distinctive principles of whole-person care beyond the individual to include interventions with communities and social institutions. The program’s emphasis on an integrative approach to an advanced curriculum in social science, social welfare, Christian ethics, and social research provides students with the theoretical and methodological knowledge and professional skills needed to conduct innovative and interdisciplinary research. Graduates of the program are prepared for advanced administrative and research roles in national and international health and human services, policy development and analysis, and as university faculty members.

Program learning outcomes
In addition to institutional learning outcomes (p. 19) (ILOs), graduates of the program should be able to:

1. Integrate advanced concepts from social science theories, social ethics, and social justice values in oral and written scholarship. (ILO: 1, 2, 5)
2. Utilize critical thinking to distinguish among the moral, ethical, and political differences that affect research, policies, programs, interventions and their consequences. (ILO 5)
3. Meet conceptual and analytical requirements of research questions through the integration of behavioral, political, economic, and social and human diversity. (ILO 4, 5)
4. Independently define research problems and formulate appropriate questions and hypotheses. (ILO 3, 4)
5. Explain the rationale for particular qualitative and quantitative research methods. (ILO 3)
6. Select appropriate strategies for independent research and/or evaluation. (ILO 3)
7. Demonstrate competence in utilizing different methods of collecting, recording, analyzing, and interpreting data. (ILO 1,2,3)
8. Formulate research questions reflecting the global perspective of Loma Linda University that link the local with global. (ILO 4,5)
9. Demonstrate the role of social justice in transdisciplinary research and practice for transprofessional interventions addressing significant social problems. (ILO 5)
10. Prepare to join a faculty as a researcher, teacher and mentor (ILO 1,2)

Social welfare and research specialization
Students admitted to the program should have demonstrated evidence of interest in social values aligned with a commitment to social justice, and research interests compatible with the areas of expertise supported by the program’s faculty. Information regarding faculty areas of expertise is available by contacting the program director. Years one and two are largely composed of course work and shaping of one’s dissertation question.

While completing all required course work, each student will choose a dissertation committee chair and committee with whom he or she will work closely to develop and defend a dissertation proposal following University guidelines. Upon successful defense of the proposal students are admitted to candidacy and actively engage in dissertation research, culminating in the successful defense of their dissertations. Consistent with Faculty of Graduate Study policy, the department requires a two-publication dissertation. More information is available from the program director.

Combined degrees
Students interested in completing a combined degrees curriculum with social welfare and social research and bioethics should refer to the Combined Degrees Programs section of the CATALOG or contact the Department of Social Work and Social Ecology directly.

Admissions
In addition Loma Linda University (p. 24) admission requirements, admission to the program is governed by the policies and procedures established by the School of Behavioral Health (p. 149). Admission requirements include:

1. Master’s degree from an accredited institution of higher education. Examples would include disciplines such as social work (M.S.W.), nursing (M.S.), business (M.B.A.), public health (M.P.H.), education (M.Ed.), and theology (M.Div.).
2. Evidence of adequate academic preparation in graduate education. This includes a minimum cumulative G.P.A. of 3.5 (on a 4.0 scale) for graduate/postgraduate work.
3. Strong intellectual abilities, including background in social sciences and statistics.
4. Evidence of research and social welfare interests reflecting the values of social justice. Professional experience and achievement that demonstrate the competence, motivation, organization, and leadership to complete doctoral education in a timely manner. It is preferred that applicants have at least two years post-masters degree experience in their professional area.
5. Personal interview.
6. Sample of writing in the form of a published article, academic or professional paper prepared for a research purpose, or an essay prepared for admission to the program.
7. Satisfactory performance on the Graduate Record Examination.
8. Curriculum vitae or other description of education and employment history.
9. Three letters of recommendation including one from an academic source and one from a work supervisor.

The application process for the Ph.D. degree in social welfare and social research utilizes a pooled application process by which the top candidates meeting the admissions criteria are selected. The number of new candidates admitted each year ranges from three to four students, depending on the total number of students previously completing the program and the program’s ability to support potential candidates in their areas of interest.

Program requirements
All course grades should meet the minimum B (3.0) standard, which by university policy indicates satisfactory performance. In some cases, conditional consideration of course grades below a B (3.0) may be given if the requirements for independent research and competency in consumer protection are not compromised. Academic variances that document the rationale for acceptance of grades below a B (3.0), must be submitted to the dean’s office for approval.

## Winter Quarter
- SPOL 604: Integrative Seminar: Academic Practice 1
- SPOL 697: Research 4
## Spring Quarter

### Noncourse requirements
#### Concept Paper
Prior to the beginning of SPOL 681, Dissertation Proposal I, students submit to the doctoral faculty a short concept paper, three to five pages, briefly describing their plan for dissertation research.

#### Candidacy
Students must successfully complete:
1. required course work
2. the applied research requirements
3. the defense of the dissertation proposal before advancing to candidacy

#### End of year two deliverables
- Publishable paper (from SPOL 665 Statistical Practicum Seminar)
- Draft proposal (from SPOL 667 Research Methods Practicum Seminar)

#### End of year three deliverable
- Defend dissertation proposal

#### Normal time to complete the program
Four (4) years based on full-time enrollment; part time permitted

### Social Work — M.S.W.

#### Program director
Kimberly Freeman

The social work profession centers on improvement of the quality of life for people and the enhancement of human potential for full, productive participation in society. With this philosophy at its core, the master’s degree offered by the Social Work Program (M.S.W.) in the School of Behavioral Health emphasizes an ecological perspective that focuses on the interaction of a person or system with his/her environment. Reflecting this stance is Loma Linda University’s motto, “To make man whole” and its heritage as an international leader in the delivery of health-care services and related facilities. It is the combination of these influences that has guided the development of the generalist curriculum, clinical practice specialization, and selection of practicum sites for the Social Work program.

#### Mission
The mission of the Master of Social Work Program at Loma Linda University is to prepare competent, ethical, and compassionate advanced social work practitioners who possess the knowledge, values, attitudes, and skills necessary for lives dedicated to whole person care in advanced practice and leadership roles within behavioral health institutions and agencies.
Goals
The goals of the M.S.W. degree in social work are to:

- Instill in graduates the knowledge, ethics, values, and skills expected of professional social workers.
- Prepare students for advanced practice with diverse populations and the advancement of social and economic justice in local, national, and international communities.
- Equip students to integrate research and practice for advancing the profession of social work.
- Prepare advanced social work practitioners for work in behavioral health institutions and agencies.
- Transition students into professional roles with a commitment to lifelong learning.

Program outcomes
Reflected in the above goals are the following nine social work competencies that describe the knowledge, values, skills, and the cognitive and affective processes that define and inform generalist and clinical practice. By the end of the program, the graduate should be able to:

1. Demonstrate ethical and professional behavior.
2. Engage in diversity and difference in practice.
3. Advance human rights and social, economic, and environmental justice.
4. Engage in practice-informed research and research-informed practice.
5. Engage in policy practice.
6. Engage with individuals, families, groups, organizations, and communities.
7. Assess individuals, families, groups, organizations, and communities.
8. Intervene with individuals, families, groups, organizations, and communities.
9. Evaluate practice with individuals, families, groups, organizations, and communities.

Liberal arts preparation
The M.S.W. degree curriculum is built on a liberal arts perspective. Individual applicants whose undergraduate degree does not reflect this perspective may be asked to enroll in additional courses.

Prerequisite requirements must be completed before admission to the M.S.W. degree program.

General overview
The program begins with first-year, generalist content common to all graduate social work education. The generalist practice curriculum is grounded in the liberal arts and the person-in-the-environment framework. Students learn to promote social well-being, and build on the strength and resiliency of all human beings through a range of prevention and intervention practice methods when working with diverse individuals, families, groups, organizations, and communities. Integrated within the curriculum, students learn to apply ethical principles, critical thinking and research-informed practice at the micro, mezzo, and macro levels while maintaining an emphasis on diversity, advocacy for human rights, and social and economic justice.

The clinical practice specialization builds on the strengths-based and ecological practice perspective of the generalist curriculum by extending, expanding, and enhancing students’ abilities to effectively engage in advanced clinical practice. This requires the integration of generalist and clinical practice theories and intervention methods as applied to individuals, families, groups, organizations, and communities. Theoretical perspectives include empowerment, strengths approach, attachment, child development, risk and resiliency, trauma, cognitive neuroscience, family systems, cognitive behavior, and psychodynamics; all of which are enhanced by the person-in-the-environment perspective. These theoretical underpinnings support student skill acquisition and development through clinical specialization courses with a firm grounding in engagement, diagnostic assessment, problem solving, social policy, and evidence-informed treatment approaches. Students’ clinical practice experiences also address the needs and rights of all persons to promote social and economic justice. Clinical students learn to be alert to and understand the importance of continuous self-reflection and practice evaluation.

Program options
On-Campus M.S.W. Program
Program options have been designed to address the varying needs of students. As such, the program offers two-, three-, and four-year options. Students completing the two-year option cannot be engaged in regular full-time employment. An advanced standing option is also available to qualified B.S.W. degree graduates (see below).

Hybrid M.S.W. Program
An online hybrid (online and onsite) M.S.W. degree program is offered to meet the varying needs of students who are not able to attend a traditional program due to full-time employment or with geographic hardship within Southern California. Degree requirements for the M.S.W. hybrid cohort are the same as those required for the on-campus cohorts for the three-year, part-time option. A separate application portal has been created for the hybrid M.S.W. program option. Courses for the onsite portion of this hybrid program are taught on the main campus on Wednesday evenings.

Inquiries about this program should be directed to the Dr. Kimberly Freeman, M.S.W. degree program director.

Advanced standing for B.S.W. degree graduates
Students who have earned a B.S.W. degree from a Council on Social Work Education (CSWE)-accredited program within the past five years have the opportunity to remove areas of redundancy in their educations through consideration for advanced standing. In their personal statements, which are part of the application for admission to the M.S.W. degree program, B.S.W. degree graduates can request consideration for advanced standing status and thus have the opportunity to complete the M.S.W. degree in 12 months. Students completing the advanced standing track must begin the M.S.W. degree program during the Summer Quarter, which requires individuals to submit all components of their application packet by January 15 of the enrollment year. Exceptions to this date will be reviewed on a case-by-case basis. Advanced standing students enrolling as part of the summer cohort are eligible to receive a scholarship covering up to 14 units, not including living expenses and fees. Information on scholarships is updated annually. See the M.S.W. Handbook on the department website for more specific information:
Transfer students

Transfer students who have taken courses in an M.S.W. degree program accredited by the Council on Social Work Education may transfer up to 20 percent of the 78 units required for the M.S.W. degree at Loma Linda University, unless otherwise approved. Evaluation of all courses is conducted on a case-by-case basis using course outlines, transcripts, and course catalog entries to review and assure adequate equivalency. The Academic Standards Committee evaluates these equivalencies. The 20 percent transfer of units is limited to credits that have not already been applied to a degree and for which a B (G.P.A. of 3.0) grade or better has been recorded. Transferred course grades are not calculated into a student’s G.P.A. earned while matriculating through the program at Loma Linda University.

A maximum of nine quarter units that have been previously applied to another master’s degree may be accepted as transfer credits in the areas of research methods and statistics. Individuals wishing to transfer research methods and/or statistics courses must first pass the program’s competency examination/s in these areas. Consideration is given to other course transfers on a case-by-case basis.

Professional, field practica grades/credits are not typically transferable—review is made on a case-by-case basis. Consideration may be given if there is clear evidence that the student has met the practice competencies of the M.S.W. degree program.

No academic credit is given for life experience and/or previous work experience for any part for the M.S.W. degree program (i.e., generalist and clinical practica, courses in the generalist or clinical specialization curricula).

Central academic requirements and processes

M.S.W. advancement G.P.A.

The M.S.W. degree advancement G.P.A. provides an initial predictor of success. The first 12 units completed toward the M.S.W. degree, including units acquired during non-matriculation, must be completed with a G.P.A. of 3.0. Students who fail to achieve this level may be dismissed from school. Students receive orientation to the process and requirements of the M.S.W. degree advancement G.P.A. during the new student orientation.

Qualifying review

When all generalist course work is completed, students are required to pass the program’s qualifying review (see the M.S.W. Handbook). The intent of this process is to: assist faculty members and students in the assessment of strengths and areas for improvement, provide feedback, foster an environment of self-evaluation, and encourage heightened participation in individualized academic development.

Generalist and clinical practica

Field practica are regarded as an integral part of the Social Work Program as these offer students opportunities to integrate and apply theoretical and research knowledge with social work practice and intervention skills in institutional or agency settings. Practica are designed and selected to provide maximum learning opportunities under the supervision of a qualified field instructor. As such, experiences are patterned to build upon one another, presenting the increasing challenges present in the continuum of generalist to clinical practice. Students complete 1,080 hours of field work in a qualified setting and 120 hours of concurrent integrated seminar for a total of 1,200 hours.

The emphasis of SOWK 757A Generalist Practicum and Seminar, SOWK 757B Generalist Practicum and Seminar, and SOWK 757C Generalist Practicum and Seminar (480 hours of practicum and 60 hours of seminar or nine generalist practica units) is on achieving generalist social work knowledge, values, and skills; including developing rapport with agency personnel and clients, acquiring interviewing skills, and obtaining beginning-level psychosocial assessment and intervention capabilities. The content of the concurrent seminar further supports this perspective as it provides students with opportunities to integrate their practicum experiences with their developing professional identity.

The emphasis of SOWK 787A Advance Clinical Case Consultation, SOWK 787B Advanced Clinical Case Consultation, and SOWK 787C Advanced Clinical Case Consultation (600 hours of practicum and 60 hours of seminar or 12 clinical practica units) reflects the clinical practice specialization and provides the depth and breadth of learning opportunities that underpin the acquisition of advanced practice capabilities. Specifically, clinical practica experiences are expected to promote increased insight and understanding of agency and/or client systems as these build on the generalist skills achieved during the first year of study.

Research

The program includes completion of course work in applied research. An individually-authored thesis option is available for students meeting program criteria. These study options aim to develop knowledge for the advancement of social work practice and provide guided experiences in the conduct of research applicable to a variety of professional and academic settings. Guidelines for these options are provided by the program.

Wholeness portfolio

Each student completes a wholeness portfolio during the generalist and clinical practica, and seminar experiences. This review of the student’s individualized objectives and professional development begins during the first year of study and culminates during the second year of study as the student completes the final quarter of the clinical practicum. This experience emphasizes the student’s plans for employment, lifelong learning, and integration of the core values of Loma Linda University. It is seen as a capstone academic experience that facilitates closure, and the final stage of reflection and review in the development of transitioning professional.

Combined degrees

Students interested in completing a combined degrees curriculum with Social Work and Gerontology, Social Work and Criminal Justice programs, or the Social Work and Social Policy and Social Research programs should contact the Social Work Department directly.

Accreditation

The Master of Social Work Program is accredited to provide master’s degree-level education by the Council on Social Work Education. The next reaffirmation will be completed in 2025. CSWE may be contacted at: 1600 Duke Street, Suite 500, Alexandria, VA 22314-3457. 703/683-8080. <info@cswe.org>
Admissions

In addition to Loma Linda University (p. 24) admission requirements, admission to the Social Work Program is governed by the policies and procedures established by the School of Behavioral Health (p. 149).

Preference for the hybrid M.S.W. degree program is given to individuals who are working full-time or have a geographic distance of approximately 25 miles from the campus.

Admission requirements for both the main campus and hybrid M.S.W. Program include the following:

1. A four-year baccalaureate degree (or its equivalent) from an accredited college or university.
2. The MSW curriculum is built on a liberal arts perspective. Individual applicants whose undergraduate degree does not reflect this perspective may be asked to enroll in additional courses.
3. Applicants must submit a completed application, including a personal statement; application fee; all college and/or university transcripts; and at least three letters of recommendation—preferably one of which is from an academic source and one from a work supervisor. All students who are working full time must also submit a letter from their agency director acknowledging support in completing the practicum and educational requirements of the M.S.W. program.
4. Applicants must meet the minimum academic and professional compatibility criteria established by the program. These criteria include:
   - A cumulative undergraduate grade point average of 3.0 or above (on a 4.0 scale). Applicants with lower grade point averages will be considered if the last 45 quarter credits (30 semester units) of non-field practica course work shows significant improvement or if they have additional attributes that demonstrate preparedness and an appropriate fit for graduate social work education.
   - Work and volunteer experiences must be verified by employer/supervisor statements on official agency stationery. Further consideration will also be given to individuals who provide evidence of additional graduate coursework, certifications, and/or training that illustrate preliminary preparation for a career in social work. Students who are admitted to the Social Work Program with a cumulative G.P.A. below 3.0 may be required to participate in individualized academic assessment and a targeted learning assistance program.
   - Demonstration, through the application and interview processes, of compatibility with the profession of social work, ability to develop and nurture interpersonal relationships, communication skills, self-awareness, professional comportment, critical thinking skills, fit with the mission and values of Loma Linda University and the Department of Social Work and Social Ecology, and the capacity to successfully complete the Master of Social Work curriculum.

Program requirements

The M.S.W. degree consists of 78 units of didactic course work and 21 units of professional practica experience. Students must maintain a program grade point average of B (or 3.0 on a 4.0 scale) and meet the knowledge, skills, and professional performance competencies outlined by the program.

A grade of B or better indicates a student has mastered knowledge, skills, and professional practice performance competencies outlined by the program. In order to progress successfully through the program and complete the degree, students must meet the G.P.A. and course repeat expectations set by the School of Behavioral Health in the general regulations (p. 148) section of this CATALOG.

1. Not eligible for waiver.
2. Hours: 160 + 20; Not eligible for waiver.
3. Thesis option is available for students meeting program criteria. Once approved students will take SOWK 697 (4 units) and SOWK 698 (2 units) in place of SOWK 695ABC (6 units).
5. 700-numbered courses are not calculated into the total didactic units required for the degree.
6. Students wishing to take courses that are not included in this list of approved selectives must obtain an academic variance through the department’s Academic Standards Committee prior to enrolling in the course.
7. SOWK 695ABC is equivalent to SOWK 695.

**Normal time to complete the program**

Two (2) years (six [6] academic quarters) based on full-time enrollment; part time permitted.
If your eyes are the windows to your soul, it has been said that the mouth is a window to your health. As such, dentistry plays a strategic part in providing integrated patient care. Loma Linda University School of Dentistry is a vibrant center of education where you will acquire knowledge, technical skills, and management expertise to thrive in the new healthcare model that is evolving. Our expectation is that our graduates will provide care that exceeds patients’ expectations.

Our faculty is committed to providing an evidence-based education that incorporates the most advanced electronic education resources available. In our new Innovation Center, students now have the opportunity to gain experience with the most contemporary equipment and techniques that enhance the practice of dentistry and the care we provide our patients. Students also receive abundant experience in patient care, both in the School of Dentistry and at extramural clinics, that help meet the dental health needs of individuals with limited or no access to dental care.

We are proud of our history and contributions to research. Our ongoing commitment to clinical and foundational research provides students with rich opportunities to work with outstanding faculty members in a wide variety of investigative activities.

During your time at Loma Linda University School of Dentistry, you will receive an excellent contemporary education filled with rich clinical experiences. However, it is the people who have been drawn to this unique environment of Christian education and mission who make Loma Linda University a special place. I invite you to learn more about our clinical services, programs, and exceptional dental school family of students, faculty, and staff.

Robert A. Handysides, D.D.S.
Dean, School of Dentistry
School foundations

History

A small but determined group of dentists met during the summer of 1943 in Grand Ledge, Michigan. Their purpose was to establish an organization that would serve as a catalyst, urging the Seventh-day Adventist Church to sponsor a dental school where young adults could learn the dental profession in an environment consistent with their religious beliefs. These men were the founders of the National Association of Seventh-day Adventist Dentists (NASDAD).

Under the leadership of Dr. J. Russell Mitchell, the organization’s first president, the goal of a Christian dental school began taking conceptual form. NASDAD expanded in membership and objectives through men such as Dr. C. C. Ray, who toured the country on his own time in search of fellow Seventh-day Adventist dentists who were willing to pursue NASDAD’s goals.

Dr. M. Webster Prince served as president of NASDAD in 1948 and 1949. At a meeting in San Francisco in 1949, NASDAD members voted unanimously to support the dental school project. Later that year at a NASDAD session in Hinsdale, Illinois, the members pledged a strong financial base in support of their goals.

The momentum of the effort became evident in the early 1950s. The General Conference of Seventh-day Adventists, under the guidance of President W. H. Branson, asked Dr. Prince to conduct a feasibility study. Subsequently, official action was taken in 1951 to authorize establishment of the School of Dentistry as a unit of Loma Linda University’s School of Medicine. Dr. Prince was selected as the first dean of the School of Dentistry. His leadership in organizing and eventually administering the new School of Dentistry was facilitated by his prior experience as president of the Michigan Dental Association and as chair of the American Dental Association Council on Dental Education. Forty-two students comprised the inaugural class in the late fall of 1953.

A dental hygiene curriculum leading to a Bachelor of Science degree was developed in 1959 under the direction of Dr. Gerald A. Mitchell, chair of the Department of Periodontics. Violet Bates became chair of the new department, and the first class of ten dental hygienists graduated in 1961.

In 1960, Dr. Charles T. Smith became dean. During this period, the school experienced positive growth in many areas. A dental assisting curriculum was developed in 1968 under the leadership of Betty Zendner. The first class graduated in 1969, receiving the Associate in Science degree.

A dental auxiliary utilization (DAU) program was initiated to provide enhanced learning for dental students. The Monument Valley Dental Clinic for Navajo Indians was started in 1966, and Dean Smith succeeded in finding from public sources fiscal support for the clinic building and for faculty housing. New advanced education (postdoctoral) programs were initiated in five clinical disciplines: orthodontics, oral surgery, periodontics, endodontics, and oral pathology.

During the 1970s, the School of Dentistry continued its evolution into one of the premier clinical programs in the United States. Dr. Judson Klooster became dean in 1971. One of his major contributions was the expansion of Prince Hall, which was completed in May 1976. The new building more than doubled the number of clinical units; provided facilities for specialized areas of clinical instruction; and included eight new research laboratories, new classrooms, seminar rooms, amphitheaters, urgently needed teacher office space, and a commensurate expansion of support facilities and services. The Oral and Maxillofacial Surgery Clinic was remodeled, and an outpatient surgicenter was developed to meet the needs of patients requiring general anesthesia for dental treatment.

The School of Dentistry became an important regional resource for providing dental care for developmentally disabled children and adults, many of whom require such a treatment setting. The Biomaterials Research Laboratory was constructed; and new advanced education programs were initiated in pediatric dentistry, implant dentistry, dental anesthesiology, and prosthodontics. A new program was established in 1985 to provide a U.S. dental education for internationally trained dentists. An increasing number of dental professionals from other countries were seeking an American education and the opportunity to practice dentistry in the United States or to gain advanced knowledge to share in their own countries. The International Dentist Program continues to offer an intensive, twenty-four-month course of study leading to a D.D.S. degree. The program has added a six-month certificate program limited to dental missionaries from other countries who sense the need for updated continuing education.

Beginning with the nineteen-year deanship of Dr. Charles Goodacre in 1994, the School of Dentistry focused particularly on research, service learning, and technology that included the development of electronic learning materials and the acquisition and utilization of 3D computed tomography (3DCT) and computer-aided manufacture (CAD/CAM) technology.

In 2000, the first major expansion of the School of Dentistry in more than twenty years added 15,000 square feet to Prince Hall on the east side and provided two new patient entrances. The expanded Special Care Dentistry Clinic and the enlarged Pediatric Dentistry Clinic were relocated to the ground floor. An additional student laboratory was also included on that level. On the second floor, the new space allowed for expansion of the predoctoral clinic, with thirty-six additional operators.

A preclinical laboratory was remodeled into a simulation laboratory in 2008. The laboratory included flat-panel monitors with access to faculty presentations and the clinical management system.

In the autumn of 2010, the LLU Center for Dentistry and Orthodontics was opened in San Bernardino, three miles from the school. The three-story treatment, research, and teaching facility brought together the University’s Advanced Education Program in orthodontics and dentofacial orthopedics and the School of Dentistry’s faculty practices—creating the most comprehensive oral health care center in the Inland Empire.

A year later (August 2012), another opening featured the school’s groundbreaking for the Hugh Love Center for Research and Education in Technology. Comprising six operatories and a three-chair open clinic, the 3,000-square-foot center enables qualified students, under faculty supervision, the opportunity to treat patients using the very latest in dental technology.

Dr. Ronald J. Dailey was named School of Dentistry dean in July of 2013. Having led the school through all of its academic challenges as an associate dean since 1993, Dr. Dailey was well prepared to pilot the school’s programs through revisions that accommodate new accreditation standards; as well as the Joint Commission on National Dental Board Examination’s integration of basic, clinical, and behavioral sciences into a single national board examination.

The School of Dentistry continues to regularly expand the opportunities for enhanced student learning by improving physical facilities; making
regular curricular modifications; and reinforcing the excellence of its clinical practices in light of its motto, “Service Is Our Calling.”

Our mission
Loma Linda University School of Dentistry seeks to further the teaching and healing ministry of Jesus Christ as:

- Students learn to provide high-quality oral health care based on sound biologic principles.
- Patients receive competent care that is preventive in purpose, comprehensive in scope, and provided with compassion and respect.
- Faculty, students, and staff value patient relationships; respect diversity; and share responsibility by working together toward academic, professional, spiritual, and personal growth.
- Scholarly activity and research provide a foundation for evidence-based learning and enhance whole person care.
- The workplace environment attracts and retains a superior and diverse faculty and staff who motivate, educate, and serve.
- Our communities (local, global, and professional) benefit from our service, stewardship, and commitment to lifelong learning.

Vision
Loma Linda University School of Dentistry is a preeminent health-care organization seeking to represent God in all we do. We are enthusiastically committed to excellent, innovative, comprehensive education of our students; and to whole person care of our patients.

Our students, staff, and faculty are empowered through an enabling environment that honors the dignity, diversity, and worth of everyone.

Our graduates are exemplary professionals and progressive clinicians of integrity.

Our Lord’s example inspires us to enrich our local and global communities through service. This is our calling.

Core values
- Belief in God
- Respect for the individual
- Principled spirituality
- Focus on students
- Empathic care
- Commitment to service
- Pursuit of truth
- Progressive excellence
- Analytical thinking
- Effective communication

General information
University students are responsible for informing themselves of and satisfactorily meeting all regulations pertinent to registration, matriculation, and graduation. This section of the CATALOG provides the general setting for the programs of the School of Dentistry and outlines the subject and unit requirements for admission to individual professional programs. It is important to review specific program requirements in the context of the general requirements applicable to all programs.

Specific program requirements
Information on the preceding pages pertains to general requirements governing all students. The student is reminded of individual responsibility to be fully informed not only of these general requirements but also of the specific requirements in the following pages, which govern the curriculum of the chosen program.

Programs and degrees
The School of Dentistry offers a comprehensive range of programs. Each of the school’s six programs draws on the curricula of the various departments.

1. The undergraduate curriculum, the DENTAL HYGIENE program, leads to the Bachelor of Science degree and prepares the dental hygienist to enter a variety of careers. Dental hygiene is a four-year college curriculum; the junior and senior years are taken in the Loma Linda University School of Dentistry.

2. The four-year professional curriculum, the GENERAL DENTISTRY program, leads to the Doctor of Dental Surgery degree and equips the general dentist to meet the needs of a diverse patient population.

3. The INTERNATIONAL DENTIST program, a two-academic-year curriculum, leads to a Doctor of Dental Surgery degree from Loma Linda University. The program is designed for the dentist who has previously earned a dental degree outside the United States.

4. The POSTBACCALAUREATE BIOMEDICAL SCIENCE DENTAL TRACK program is designed for students who were unsuccessful in their application to the Doctor of Dental Surgery program at Loma Linda University. Students in this program participate in selected first-year dental courses. Successful completion of this program leads to a postbaccalaureate certificate in biomedical science. Currently not accepting students into this program.

5. ADVANCED DENTAL EDUCATION programs lead to postdoctoral certificates in eight specialty and non-specialty areas of dentistry and, at the student’s option, additionally to a Master of Science or a Master of Science in Dentistry degree.

6. The COMBINED DEGREES programs lead to the Doctor of Dental Surgery degree (through the School of Dentistry) earned concurrently with a Master of Science degree or Doctor of Philosophy degree—D.D.S./M.S. or D.D.S./Ph.D.; or to the Doctor of Dental Surgery degree (through the School of Dentistry) earned concurrently with a Master of Arts degree in Bioethics (through the School of Religion)—D.D.S./M.A.

Combined degrees programs
D.D.S. / M.S. / M.A.
A combined degrees program leading to the Doctor of Dental Surgery and the Master of Science degree is open to qualified students of dentistry. The student who is interested in establishing a broader professional base in science or who is looking toward a career in teaching or research may take an interim leave from the School of Dentistry after the second or third professional year and fulfill professional degree requirements subsequent to or concurrent with completing course work and research for the Master of Science degree.

The combined degrees program leading to the Doctor of Dental Surgery and the Master of Arts in bioethics is designed to fit the schedule of Doctor of Dental Surgery degree students. Ethics in dentistry is an emerging academic interest, and this program aims to evolve the dental school into one of a very select few in the nation known for their expertise in ethical issues. This program requires 48 units of credit. This degree
is offered cooperatively by the School of Religion and the School of Dentistry.

**D.D.S. / Ph.D.**

The biomedical sciences program provides opportunity for well-qualified and motivated students to pursue both a professional and a graduate education, and to prepare for careers in clinical specialization, teaching, or investigation in health and human disease. The student who has a baccalaureate degree and the approval of the School of Dentistry Office of Academic Affairs may enter the combined degrees program and work concurrently toward Doctor of Dental Surgery and Doctor of Philosophy degrees. A minimum of six years is required to complete a combined degrees program, offered cooperatively by the School of Dentistry and the School of Medicine.

**Awards**

All School of Dentistry students are eligible to receive awards of various kinds for demonstrated excellence, scholastic attainment, leadership ability, technical ability, professional proficiency, initiative, and other accomplishments or achievements, according to the bases established by the donors. Awards are given through various organizations, associations, and school and university departments. The names of all award recipients are printed in the University commencement program.

**Student life**

**School of Dentistry inherent requirements**

In harmony with its own didactic, clinical, research, and service objectives, and using the American Dental Education Association suggested guidelines, Loma Linda University School of Dentistry has identified the following inherent requirements for entry into all its programs.

**Cognition**

Students must have the cognitive abilities that allow the accurate and effective ability to measure, verify, calculate, reason, analyze, synthesize, and critically problem solve. Effective dental education requires the capacity to gather, organize, and assess relevant information in order to arrive at integrated solutions. Students must be able to comprehend three-dimensional relationships and understand the spatial relationships of structures in order to fully solve clinical problems.

**Sensation and perception**

For learning to occur, students must be able to visualize and comprehend physical demonstrations in the classroom, laboratory, and clinic. Such observation requires the functional use of vision, touch, hearing, smell, and somatic sensation.

Specifically, students must be able to acquire information from written documents and to visualize information presented in images from papers, videos, and digital media—including interpretation of radiographic and other graphic images, with or without the use of assistive devices. Sufficient visual acuity is required to read charts, records, small print, and handwritten notations.

Adequate visual and tactile skills are also necessary to perform dental examinations and provide treatment. Visual acuity, accommodation, and color vision are necessary to discern variations in color, shape, and general appearance between normal and abnormal hard and soft tissues.

Students must be able to observe and describe changes in mood, activity, and posture in their patients, possessing skills in effective perception and understanding of nonverbal communications. Accurately noting verbal and nonverbal communication is essential when performing dental operations or administering medications.

**Communication skills**

Students must be fluent in the use of standard written and spoken English. They must be able to communicate effectively and sensitively with patients, the faculty and staff, and other students. Specifically, students must be able to observe, hear, and speak to patients in order to elicit and provide information. In addition, they must have the ability to read and understand written communications and generate effective oral and written communications with all members of the health-care team. This includes the ability to discern when a matter is of a confidential nature in order to maintain confidentiality. Students may be required to remediate written and/or verbal language skills before admission or during their program. This remediation may include accent modification.

**Fine and gross motor skills**

Students need sufficient motor and sensory capability in both hands to provide general dental care; to perform palpation, percussion, auscultation and other diagnostic maneuvers; basic laboratory tests; and diagnostic procedures. These actions require fine and gross muscular movements, coordination, and equilibrium. Individuals must be able to operate foot controls utilizing fine movements, operating high- or low-speed dental instruments to achieve accurate movements of less than one-half millimeter.

Students must be able to perform basic life support (e.g., CPR), transfer and position disabled patients, assist patients who lack motor control, and position themselves around the patient and dental chair.

**Behavioral and psychosocial attributes**

Students must possess the emotional stability and demonstrate the resilience required by a challenging educational program. Success requires use of good judgment, insight, self-motivation, self-assessment and self-control, high achievement striving, and the development of a mature, sensitive, and effective personal relationship style.

It is imperative that students be able to tolerate physically taxing workloads and to function effectively under stress. Students must be able to adapt to changing environments, demonstrate flexibility, and learn to function in the face of uncertainties inherent in the clinical issues of many patients. Compassion, integrity, honesty, concern for others, and cultural sensitivity are required personal qualities.

**Disabled applicants and students**

The LLU School of Dentistry provides reasonable and appropriate accommodations in accordance with the Americans with Disabilities Act for individuals with documented disabilities who demonstrate a need for accommodation.

The Americans with Disabilities Act defines a person with a disability as an individual with a physical or mental impairment that substantially limits one or more major life activities. Problems such as English as a second language, test anxiety, or slow reading without an identified underlying physical or mental deficit, or failure to achieve a desired outcome are generally not covered by the Americans with Disabilities Act.

To be considered for an accommodation based on a learning disability, a student must experience marked difficulty when compared with the average person in the general population, not just other dental school students, in one or more basic academic areas as a result of a significant information processing or attentional disorder.
Students requesting accommodations must provide supporting documentation for the disability requiring accommodation, including:

- A report from a licensed professional approved by Loma Linda University School of Dentistry identifying the diagnosed disability and the recommended accommodations.
- Record of any previous accommodations provided by educational institutions or other testing agencies.
- If no prior accommodations were provided, the licensed professional should include a detailed explanation as to why no accommodations were given in the past and why they are needed now.

Documentation needs to be reviewed by the assistant dean for admissions and student affairs, before accommodation is formally implemented. While awaiting assessment and documentation, temporary accommodation may be granted. The temporary accommodation will not exceed 90 days.

Students requesting accommodation are responsible for:

- Reporting their request for accommodation to the Office of Admissions and Student Affairs
- Providing the supporting documentation

Policies for this school

The information on student life contained in this CATALOG is brief. The Student Handbook more comprehensively addresses University and school expectations, regulations, and policies; and is available to each registered student. Students need to familiarize themselves with the contents of the Student Handbook at <http://www.llu.edu/assets/central/handbook/documents/Student-Handbook.pdf>.

Professional ethics

Successful students should demonstrate behaviors and attributes in harmony with School of Dentistry’s core values. The school seeks students who openly and enthusiastically align themselves with the following core values:

- Belief in God
- Spiritual maturity
- Demonstrated compassion
- Service to others
- Commitment to excellence
- Critical thinking
- Respect for self and others
- Ethical integrity
- Principled care
- Pursuit of knowledge
- Conscientiousness and industry
- Effective communication

The school code of ethics expands and elaborates Loma Linda University’s standards of ethical conduct.

Organized dentistry is proud of its reputation for honesty and integrity. These virtues are essential if dentistry is to continue to maintain its position of trust in society. The establishment of peer review committees, ethics committees, codes of ethics, and other regulatory and/or advisory processes and standards within the profession indicate a vital and continuing concern for maintaining high standards of integrity.

The School of Dentistry is a partner in this process where future professionals are selected and trained in the development of professional and ethical attitudes consistent with the highest goals of the profession.

The school seeks to broaden students’ ethical perceptions by including a religious perspective not always found in ethical codes. By adding a spiritual foundation to the professions’ ethical frameworks, it is anticipated that the dental professionals’ ethic will be more completely informed and not only will reflect concern for his or her fellows, but also will reflect an intimate relationship with the Creator God.

The code contains specific admonitions that are limited in number but comprehensive in nature. It is anticipated that the values of honesty, integrity, and altruism will be enhanced during professional training so that, following graduation, these virtues will be second nature in the service provided to patients. Thus, the relationship of trust between dental professional and patient can develop to benefit both the profession and the public. This is a goal the school feels it must meet as it seeks to train dental professionals to become competent in all aspects of patient care.

The School of Dentistry code of ethics applies to all students (associate and baccalaureate dental hygiene; predoctoral, including international dentist students; graduate, certificate, residents, fellows, preceptors, research scholars; and exchange students).

The School of Dentistry code of professional ethics with its specific guidelines is available for review in Section VII of the LLU Student Handbook.

Student leadership

Student Government

Loma Linda University American Student Dental Association (LLU ASDA) is composed of peer voted student officials who are charged by administration to carry out the actions necessary for a successful student government, as well as serving as a representation for he ASDA chapter at regional and national meetings and events. LLU ASDA’s central body if the Executive Council (EC) compromised of the First Delegate/President, Second Delegate/President-elect, two class representatives, secretary, and treasurer.

The EC has the authority to appoint members to other designated offices to fulfill the work of the local chapter as needed and delegate duties to subcommittees as needed in governing the student body, including representation for other state and national professional organizations (CDA, ADEA, AGD) and class leadership. The EC oversees the utilization of all funds paid by student dues and obtained through fundraising.

Elections for all positions of LLU ASDA occur in the Spring Quarter.

Class leadership

Class leaders are elected annually during the Autumn term for the first year and Spring term thereafter. Leaders are elected by confidential peer vote to work as a team to coordinate class events—including academic, spiritual, and social experiences. Class leadership consists of:

DDS - President and four vice presidents serving in various capacities.
IDP - Two class representatives
DH BS - President and three vice presidents.
DH AS - President and one vice president.

Committee representation

Students are invited to serve on school standing committees. The Office of Admissions and Student Affairs consults with LLU ASDA and class
leadership to select students to serve on committees, including the Admissions Committees, Academic Review Committees, Curriculum Committee, and Professional Standards Committee.

To maintain a leadership position, a minimum 2.7 GPA must be maintained by the president, vice presidents and professional organization representatives.

Special opportunities
Alumni-Student Convention
The annual Alumni-Student Convention, now part of the One Loma Linda Homecoming, sponsored since 1960 by the Alumni Association, gives opportunity for students to meet alumni and listen to presentations by prominent guest lecturer in the dental profession.

Research presentation
Students have the opportunity to give research presentations in the form of table clinics. The winners are invited to present their table clinics at state and national conventions.

Dedication service
A dedication service is held during the Alumni-Student Convention, giving students an opportunity to dedicate their professional lives to Christ. Incoming students are presented with personalized Bibles and graduating students are given personalized white coats embroidered with the School logo.

Academic information
General policies
Registration
The student must register on or before the dates designated by the Office of University Records. Early registration is encouraged. Registration is completed online at the myLLU registration portal <https://ssweb.llu.edu/login >. Once at the portal, a student must clear registration holds — student health, transcript, housing and finance. At the beginning of the first year of attendance, a student is required to have a picture taken for the student identification badge. International students must also register with the International Student Affairs office as required by law.

Late registration is permissible only in case of a compelling reason. A charge is applied if registration is not completed by the designated dates. The student may not attend class without being registered. A change in registration after the second week affects the grade record. A student may not concurrently register for courses in another school of the University without permission from the assistant dean for academic affairs.

Attendance
Regular attendance at lectures, clinics, and other assemblies is required of all students. All lectures and laboratories provide information essential for successful completion of the program. Each student is responsible for all material covered and assignments made. Absences in excess of 15 percent may be sufficient cause for a failing or unsatisfactory grade to be recorded. Clinics and individual courses/instructors may have more stringent requirements.

Length of academic residence
To fulfill the requirement pertaining to length of academic residence, the student must be registered for a full course load at the University for the entire junior year for the Associate in Science degree; and the entire senior year for the Bachelor of Science degree; and the entire third (D3) and fourth (D4) years for the Doctor of Dental Surgery degree.

Dean's list
Outstanding academic performance will be rewarded by publication of the Dean's List each review period. The eligibility requirements are:

- Complete at least 12 units of graded course work during the term.
- Achieve a term grade point average of at least 3.5 with no grade lower than a B-.
- Receive no incomplete (I) grades on the grade report.

Course waiver
A course requirement may be waived if the applicant has previously taken the course and earned a grade of B or above, but no credit results. Evaluation for waiver of courses will be completed only after an applicant has been accepted to the program, and must be approved by the course director at this University and the school's assistant dean for academic affairs. Tuition is not reduced if courses are waived or if a student takes less than a full load.

Examinations
It is the policy of the school that all students are expected to take examinations at the scheduled time. The only acceptable excuse for not taking an examination on time is major illness (documented by the Student Health Service and conveyed to the course director). The consequences of missing an examination under the circumstances of documented illness are determined by the course director. If a student appears late for an examination, s/he may be denied admission to the examination site. If a student arrives late for an examination and is allowed to take it, s/he will be required to finish the examination at the same time as students who arrive on time.

Repeating/remediating a course (predoctoral, IDP, and dental hygiene programs)
If a student receives an unsatisfactory or failing grade in a required course, it will be necessary for him/her to do additional work. Based on the original grade earned by the student, and upon the recommendation of the Academic Review Committee, one of the following plans will be pursued:

1. For courses with unsatisfactory performance (D+/D/U grades), the student must reregister for the course, review the course work independently, repeat required assignments or quizzes, and take any or all course examinations as required by the course director. The highest grade allowed for a remediating course is C. At the discretion of the Academic Review Committee and course director, the student may be required to repeat the course at the next course offering.

2. For courses with failing performance (F grades), the student must reregister for the course, attend the class and/or laboratory, and take all course examinations at the next regular course offering.

3. Both the original and repeat grades are entered into the student's permanent academic record, but only the repeat grade units are computed in the grade point average.

4. Under certain circumstances and upon recommendation of the Academic Review Committee, a student may remediate/repeat a maximum of 12 units during the current and subsequent academic year. Upon such recommendation, the student will be permitted to move forward as a member of the cohort with which he or she enrolled.
Academic criteria for promotion (predoctoral, IDP, and dental hygiene programs)

Academic criteria for academic advancement and program completion

Predoctoral
Level D1 to Level D2
- Cumulative didactic and preclinical laboratory G.P.A. at or above 2.0.
- Successful completion of all courses in the D1 curriculum.

Level D2 to Level D3
- Cumulative didactic and preclinical laboratory G.P.A. at or above 2.0.
- Successful completion of National Board Examination, Part I.
- Successful completion of all courses in the D2 curriculum.

Level D3 to Level D4
- Cumulative didactic and preclinical laboratory G.P.A. at or above 2.0.
- Successful completion of all courses in the D3 curriculum.

IDP
Level IDP3 to Level IDP4
- Cumulative didactic and clinical course G.P.A. at or above 2.0.
- Successful completion of all courses in the IDP3 curriculum.

Dental hygiene (B.S. degree)
Junior to senior
- Cumulative didactic and preclinical laboratory G.P.A. at or above 2.0.
- Successful completion of junior clinical promotion OSCE.
- Successful completion of all courses in the junior curriculum.

Graduate students/residents
- Cumulative didactic and laboratory G.P.A. at or above 3.0 (B).
- Successful completion of all evaluations.
- Successful completion of annual student evaluation (includes a review of entire academic record).
- Selection for advancement to Master of Science degree candidacy (for those on M.S. degree track only).

School of Dentistry academic requirements for graduation

Dentistry
A candidate for the Doctor of Dental Surgery degree must be at least twenty-one years of age and must have:

1. Satisfactorily completed all the requirements of the curriculum—including specified attendance, level of scholarship, length of academic residence, number of credit units, and service-learning requirements.
2. Completed special examinations, as required by the faculty.
3. Successfully completed Parts I and II of the National Board Examination.
4. Demonstrated evidence of satisfactory moral and professional conduct, of due regard for Christian citizenship, and of consistent responsiveness to the established aims of the University.
5. Discharged financial obligations to the University.
6. Been certified by the faculty as approved for graduation.

Dental hygiene (B.S. degree)
In order to be eligible for graduation, the student must have:

1. Completed the Undergraduate Intent to Graduate form.
2. Completed all the requirements for admission to the chosen curriculum.
3. Satisfactorily completed all chosen requirements of the curriculum—including specified attendance, level of scholarship, length of academic residence, and number of credit units.
4. Attended a regionally accredited college for the first two years, and Loma Linda University School of Dentistry for the junior and senior years.
5. Achieved no lower than a C- grade in all core courses and a minimum grade point average of 2.0.
6. Completed special examinations as required by faculty.
7. Passed the Dental Hygiene National Board Examination.
8. Demonstrated evidence of satisfactory moral and professional conduct, of due regard for Christian citizenship, and of consistent responsiveness to the established aims of the University.
9. Discharged financial obligations to the University.
10. Been certified by the faculty as approved for graduation.
11. Completed dental hygiene training with an Associate in Science degree or certificate from an accredited college.

National Dental Board Examinations
Successful completion of the Integrated National Board Dental Examination (INBDE) is a requirement for graduation. The INBDE are designed to assess cognitive knowledge of the basic, behavioral, and clinical sciences. Eligibility to sit for the INBDE is determined by successful completion of the curriculum leading up to the examination. In addition, students are required to pass a comprehensive examination that assesses mastery of the test specifications prior to the INBDE. The eligibility requirements and timetable for passing the INBDE is as follows:

INBDE examination is scheduled in the fourth year. If the examination is not successfully completed, the student will be given an opportunity to retake the examination per the National Board Dental Examination policies. A candidate for the Doctor of Dental Surgery degree must have successfully completed the INBDE before being awarded the D.D.S. degree.

Procedures for academic review (predoctoral, IDP, and dental hygiene programs)
There are six academic review committees: D1, D2, D3, D4, IDP, and Dental Hygiene. Membership of each committee consists of the assistant dean, academic affairs; the assistant dean, admissions and student affairs; and the department representative/course directors of all courses required of the respective class in the academic year. The associate dean, clinic administration, the clinic director, and primary attending faculty are members of the D3/D4 academic review committees. In addition, each committee has two student members appointed by the dean in consultation with the assistant dean, admissions and student affairs and DSA officers. Student committee members will be in the class one year ahead of the class being reviewed.

The academic review committees meet a minimum of two times annually to evaluate student academic and clinical performance and progress records. Students whose performance does not meet the stated academic standards and students who are being considered for academic sanctions may be scheduled for a hearing with the committee.

The committee also recommends to the dean all appropriate candidates for promotion, academic probation, repeat, or other appropriate actions;
as well as students who should receive special recognition for academic excellence.

The process for evaluation of academic performance is as follow:

1. The academic review committee—by reviewing grades, reports, and other pertinent information—identifies students whose academic and/or clinical performance is below acceptable levels.

2. The assistant dean for admissions and student affairs notifies a student facing possible academic sanctions regarding the time and place for a hearing called for the purpose of allowing the student to appear before the committee to present reasons why action should not be taken. The academic review committee considers the student’s presentation and all available information before making a recommendation.

3. The dean may enforce one or more of four academic sanction options:
   • Academic probation
   • Remedial action
   • Academic leave of absence
   • Academic discontinuation

   Please refer to the academic disciplinary policy for more specific descriptions regarding each academic sanction.

4. A student may appeal the recommendation of the academic review committee to the dean. Such appeals are not expected to be routine and should be considered only in circumstances where new and relevant information exists that was not available for consideration by the academic review committee. The dean will decide if the appealing student will be permitted to continue participating in classes and/or clinical assignments during the appeal proceedings.

   The dean will review the matter and either render a decision or appoint a three-member ad hoc committee. Members of this committee will not have been involved in the academic review committee decision process. The ad hoc committee will determine whether the process was appropriately followed, review new information, and judge whether the record supports the recommendation. They will report their findings and recommendation to the dean, who will decide if the appeal is warranted or not.

**Academic disciplinary policy (predoctoral, IDP, and dental hygiene programs)**

**Academic probation**

Academic probation is a specified period of time during which the student is given an opportunity to comply with specific academic standards. Such action must be confirmed by letter to the student.

**Criteria for placement on academic probation**

A student will be placed on academic probation if s/he meets one or more of the following conditions:

1. Term or cumulative grade point average (G.P.A.) below 2.0.
2. Failing or unsatisfactory (U/F/D+/D) grades in any course required for the degree.
3. Social/behavioral/ethical problems that significantly impact academic and/or clinical performance.

**Level of academic probation**

The level of academic probation indicates the seriousness of the cumulative academic deficiency. However, depending on the seriousness or nature of the academic deficiency, a student may be considered for academic leave of absence or discontinuation at any level of probation.

<table>
<thead>
<tr>
<th>Level</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Level I</td>
<td>First term on academic probation</td>
</tr>
<tr>
<td>Level II</td>
<td>Second term on academic probation, consecutive or nonconsecutive. EXCEPT: Continued academic probation due to failing grade in a course that cannot be repeated until a later term or failure to reregister in the succeeding year.</td>
</tr>
<tr>
<td>Level III</td>
<td>Third term on academic probation, consecutive or nonconsecutive. EXCEPT: Continued academic probation due to failing grade in a course that cannot be repeated until a later term or failure to reregister in the succeeding year.</td>
</tr>
<tr>
<td>Level IV</td>
<td>If a student meets the criteria for academic probation for a fourth term, consecutive or nonconsecutive, s/he will be considered for academic discontinuation.</td>
</tr>
</tbody>
</table>

**Restrictions for a student on academic probation**

A student on academic probation:

1. May not serve as an officer for any class, school, or extracurricular organization.
2. May not take any elective courses.
3. May not participate in any elective off-campus, service-learning, or mission activities.
4. Remains on academic probation until all the terms of the probation sanctions have been fulfilled, unless the student is discontinued.

**Remedial action or remediation**

As a condition for continued enrollment, remedial action for the student may consist of:

1. Counseling, tutoring, and/or repeating assignments or course work; or completing additional assignments or course work, possibly including repeating an academic year or portion thereof.
2. Other specified requirements.

**Academic leave of absence**

Academic leave of absence is a specified period of time during which the student is withdrawn from the academic program. Upon request to and approval by the academic review committee, the student may return to the program at a year/term level specified by the committee. The student may be requested to fulfill specific requirements prior to re-entering the academic program.

The following guidelines pertain to when an academic leave of absence may be considered for a student who is in one or more of the following situations:

- Student has a serious academic deficit that cannot be removed while continuing with current course work.
- At the end of the academic year, student does not meet the criteria for promotion to the next academic year.
- Student has three consecutive reviews or terms on academic probation.
- Student has not passed the National Board Dental Examination on schedule after two attempts and needs full study time to prepare for the National Board Dental Examination.
• Student fulfills criteria for academic discontinuation, yet shows promise for future success despite current deficiencies.

Return from an academic leave of absence requires that the student reapply for admission by written request to the assistant dean for admissions and student affairs. The student must meet the requirements for readmission specified by the academic review committee at the time the leave of absence was granted. The requirements for readmission may also be reviewed by the academic review committee.

**Academic discontinuation**

Guidelines for academic discontinuation are indicated below for predoctoral, IDP, and dental hygiene students:

**D1 Year**
- Any term with one or more failing grades, regardless of term or cumulative G.P.A.
- Three or more unsatisfactory or failing grades within the academic year, regardless of term or cumulative G.P.A.
- Failure to fulfill terms of academic probation.
- Failure to meet criteria for promotion to D2 by the end of the D1 year.

**D2 Year**
- Any term with one or more failing grades, regardless of term or cumulative G.P.A.
- Four or more unsatisfactory or failing grades since enrollment in the program, regardless of term or cumulative G.P.A.
- Failure to fulfill terms of academic probation within the specified time period.
- Level IV academic probation.
- Failure to meet criteria for promotion to D3 by the end of the D2 year.

**D3 Year**
- Any term with one or more failing grades, regardless of term or cumulative G.P.A.
- Five or more unsatisfactory or failing grades since enrollment in the program, regardless of term or cumulative G.P.A.
- Failure to fulfill terms of academic probation within the specified time period.
- Level IV academic probation.
- Failure to meet criteria for promotion to D4 by the end of the D3 year.

**D4 Year**
- Failure to pass either section of the National Board Dental Examination within three attempts.
- Failure to achieve eligibility for graduation within five full academic years of enrollment in the dental program. **Exception: Students who are required to repeat an academic year or who are on a revised program. These students must achieve eligibility for graduation within one year of the new graduation date assigned at the time of change to an alternate program.**

**Dental hygiene B.S. degree juniors**
- Any term with one or more failing grades, regardless of term or cumulative G.P.A.
- Three or more unsatisfactory or failing grades within the academic year, regardless of term or cumulative G.P.A.
- Failure to fulfill terms of academic probation within the specified time period.
- Failure to meet criteria for promotion to dental hygiene B.S. senior year by the end of the dental hygiene B.S. junior year.

**Dental hygiene B.S. degree seniors**
- Any term with one or more failing grades, regardless of term or cumulative G.P.A.
- Three or more unsatisfactory or failing grades within the academic year, regardless of term or cumulative G.P.A.
- Failure to fulfill terms of academic probation within the specified time period.
- Failure to pass the National Board Dental Hygiene Examination within three attempts.
- Failure to achieve eligibility for graduation within three full academic years of enrollment in the dental hygiene program.

In some situations, the academic review committee may recommend that a student repeat an academic year (or portion thereof) as an alternative to discontinuation.

**Scholastic standing**

Grades and grade points for the predoctoral, IDP, and dental hygiene programs may be found in Section II of this catalog, with the following exceptions:
- Satisfactory (S)—grade if the student exceeded the minimum requirements for overall performance.
- Marginal Satisfactory (MS)—grade if the student met but did not exceed the minimum requirements for overall performance.
- Unsatisfactory (U)—grade if the student did not meet the minimum requirements for overall performance.

**Student-initiated academic grievance procedure**

If a student wishes to contest a grade, s/he should discuss the grade first with the instructor, where appropriate; then with the course director, if applicable; and finally with the department chair. If the student is not satisfied, s/he may then appeal to the assistant dean for academic affairs (for further discussion of the academic grievance process, see Loma Linda University Student Handbook, Section V—University Policies).

**Service-learning**

Service-learning at Loma Linda University School of Dentistry continues the original purpose of the school—to train dental health professionals to provide service to underserved populations, both locally and abroad.

Field experience for students of dentistry and dental hygiene includes extramural opportunities within the U.S. and in foreign countries. In addition to providing clinical treatment, service-learning experiences include local health fairs and elementary school dental health presentations. Service experiences may last from one day to several weeks.

All students are required to complete assigned service-learning rotations and minimum clock hours, as described in each program. Predoctoral dental students are required to complete a minimum of 120 service-learning hours. Forty hours must be completed doing local community service dentistry. Up to 30 of the remaining 80 hours may be completed doing non-dental service. Dental hygiene students must complete 75 service-learning hours. Thirty-five hours of local service are required, and
up to 15 non-dental service hours may be credited. International Dentist Program students must complete 60 hours of service. Of the 60 hours, 40 will be assigned by the program. Up to 10 hours of non-dental service may be completed as part of the 60 hours total requirement. In addition, a didactic component is included within the service-learning program. Lectures are embedded within existing courses and occur throughout the curricula.

Students are required to be in good and regular standing to be eligible to participate in elective international service-learning experiences.

Learning environment
Because the study of dental sciences and arts is based on a foundation in essentially the same science subjects as are studied in medicine and allied health curricula, the School of Dentistry shares with the School of Medicine the facilities for teaching basic sciences.

Classrooms, laboratories, student lounges, teachers’ offices, and clinical facilities related solely to dentistry occupy the School of Dentistry building, named in honor of M. Webster Prince, the first dean. Prince Hall is on the University mall facing the University Church and adjacent to the Medical Center. The facilities effectively accommodate collaboration with the Medical Center in ongoing research and service programs.

The total resources of the University constitute a wealth of opportunity for the student with initiative and willingness to develop individual capacity to the fullest extent. Students find varied opportunities for serving and learning in the immediate University community, in school-sponsored service-learning clinics, clinical and research electives, and diverse volunteer programs.

Basic sciences
The Loma Linda University departments of basic sciences include anatomy, biochemistry, microbiology, and physiology and pharmacology. The basic sciences serve as the foundation for the dental sciences by leading toward an understanding of normal structure and function, as well as introducing the basis for pathology in the practice of dentistry.

Subjects are taught in the first year of the dental hygiene and the first two years of the general dentistry curricula as part of three conceptually integrated sequences of courses—sequences in physiology, in anatomy, and in applied science. Throughout the basic sciences, an appreciation of God’s creation and His wisdom is reinforced through the study of human biology. Students are encouraged to extend their knowledge and apply it for their own well-being and for the well-being of their patients.

The purpose of the basic science curriculum is to provide a foundation of knowledge that is essential for the practice of dentistry and dental hygiene. The faculty is dedicated to providing students with tools that expand their thinking and challenge them to ask probing questions and to earnestly search for answers. Its aim is to prepare students to excel scientifically. The higher aim is, through the Christian atmosphere of this University, to prepare students to become truly compassionate dentists.

Financial information
Financial policies
The Office of the Dean is the final authority in all financial matters and is charged with the interpretation of all financial policies. Any exceptions to published policy in regard to reduction or reimbursement of tuition must be approved by the dean. Any statement by individual faculty members, program directors, or department chairs in regard to these matters is not binding on the school or the University unless approved by the dean.

Registration is not complete until tuition and fees on the required installment are paid; therefore, the student should be prepared to make these payments during scheduled registration for each academic year. There may be adjustments in tuition and fees as economic conditions warrant.

General financial practices
The student is expected to arrange for financial resources to cover all expenses before the beginning of each school year. Previous accounts with other schools or this University must be settled.

Satisfactory academic progress policy (all programs)
To be eligible for federal, state, and University financial aid, students are required by the U.S. Department of Education and the state of California to maintain satisfactory progress toward their degree objectives. In compliance with prescribed regulations, the University and School of Dentistry have established guidelines that are designed to ensure that students successfully complete courses to promote timely advancement toward a specific degree objective.

Definition of satisfactory academic progress
The School of Dentistry defines satisfactory academic progress by the following three criteria:

1. Meeting a minimum grade point average requirement
2. Making yearly progress by completing the academic requirements defined for a program
3. Completing the degree objective within the maximum time allowed

Grade point average requirement
To maintain satisfactory academic progress, students in the predoctoral, IDP, and dental hygiene programs must maintain a minimum cumulative grade point average of 2.0. In addition, dental hygiene students must achieve no grade lower than a C- in all core courses.

Yearly progress requirement
Each student’s academic progress is evaluated by the Academic Review Committee throughout each academic term, and a cumulative review is conducted to determine eligibility for promotion at the end of each academic year. The Office of Academic Affairs monitors the minimum grade point average requirement. The Office of Financial Aid, along with the School of Dentistry Office of Academic Affairs, monitors yearly progress and the maximum time allowance.

Students whose academic standing or degree progress falls below the standard receive a financial aid warning during the next term of registration. If their academic standing or degree progress is not raised to the standard by the end of the term in which the financial aid warning was issued, their financial aid will be terminated until the requirements have been met.

Reasonable degree progress
It is expected that students will complete the requirements for a degree within the scheduled curriculum time. The Doctor of Dental Surgery degree is scheduled to be completed in four years for the traditional program and two years for the international program and may not exceed six for the traditional program and three for the international program. The Bachelor of Science degree in dental hygiene is scheduled to be completed in two years and may not exceed three years.
Certification of status
The Office of Academic Affairs will certify the official status of each enrolled student at the end of each academic year to the Office of University Records and to the Office of Financial Aid.

Student financial aid
Federal loans are available only to United States citizens, green card holders, or those with permanent resident status. With good credit or a creditworthy cosigner, federal loans may be used to cover the entire academic budget. For more information, contact the Office of Financial Aid <finaid@llu.edu> or 909/558-4509.

Schedule of charges (2019-2020)

Dentistry
All tuition, enrollment fees and technology fees are set for one academic year.

- Prosthodontics — post-D.D.S. Certificate, M.S.D., M.S. (p. 239)

### Undergraduate

Established in 1959, the Department of Dental Hygiene, the Bachelor of Science degree undergraduate curriculum of the School of Dentistry, is largely focused on preventive oral health services and continuing care. Dental science courses, preclinical lectures and seminars, laboratory exercises, and clinical assignments have been developed to provide training in the variety of procedures delegated to the dental hygienist within the dental practice setting. These experiences are sequenced in an organized manner that provides for continual growth, and competency in performance of all traditional and expanded function procedures.

The purpose of the program is to develop professionals prepared for the current practice of dental hygiene, as well as graduates who are additionally prepared to deal with future changes in dentistry. Courses that encourage critical thinking and problem-solving techniques and that enhance the ability to evaluate the latest in research are important adjuncts to clinical training. Upon completion of this curriculum, graduates will be prepared to enter a variety of career options available to dental hygienists.

Dental Hygiene Program curricula are approved by the Western Association of Schools and Colleges (WSCUC) Senior College and University Commission (WSCUC). The program is also approved by the Commission on Dental Accreditation of the American Dental Association.

### Philosophy

A profession in the health arts and sciences calls increasingly for persons of intelligence, integrity, responsibility, and depth of human understanding. Therefore, the program of instruction is planned on a strong liberal arts foundation. The student is encouraged to take electives that contribute to breadth of knowledge and quality of values. The choice of electives in early college work is important for many reasons.

The School of Dentistry is interested in applicants with the potential to become hygienists who are well-read and caring persons prepared to communicate effectively in professional and community relationships. They should be able to draw on knowledge of the structure and function of the human body in health and disease, applying resources based on Christian ideals and values to aid in the solution of personal problems. They should also be able to develop attitudes and skills that will most effectively serve society.
Goal
The goal of the Dental Hygiene Program is to educate competent, concerned, and active members of the dental hygiene profession who possess the ability to effectively perform the expanding scope of practice of the dental hygienist.

Loma Linda University emphasizes Christian values and beliefs and the concept of whole person care. Opportunities for spiritual growth and fellowship among faculty and students are interwoven into daily academic pursuits, clinical practice, and social interactions.

The advancement of dental hygiene depends on an ever-growing body of knowledge. Therefore, this program also places great importance on providing an atmosphere in which students can develop skills necessary to objectively assess new theories and trends in dentistry in light of scientific knowledge and principles. By combining Christian values with an appreciation for research and the scientific method, graduates will continually apply evidence-based principles to patient care and exhibit God’s love in the quality of service they render.

Application procedures
The Dental Hygiene Program is an undergraduate program in the School of Dentistry. A student must have a high school diploma or its equivalent and must meet college entrance requirements. Admission to the Dental Hygiene Program is in the junior year after successful completion of the required prerequisite courses in a regionally accredited college or university.

The application is available at <http://www.adea.org/>. An LLU supplemental application is also required. The application deadline for the Bachelors program is April 1 and June 1 for the Dental Hygiene to DDS Bridge program.

Application procedure
1. **DHCAS application.** The DHCAS application is completed online by the applicant at adea.org (between November 1 and April 1. The DHCAS application takes approximately four to six weeks to be processed and sent to the school where the applicant has applied.

2. **Supplemental application.** As soon as the DHCAS application is verified by DHCAS and received by LLU the applicant is sent an email invitation from LLU to complete an electronic supplemental application.

3. **Supplemental application deadline.** The applicant must return the completed supplemental application and materials within 30 days. This includes essays specific to Loma Linda University, a photograph, and the nonrefundable application fee of $100.

4. **Transcripts.** Official college transcripts must be sent to DHCAS and high school transcripts sent directly to LLU. When an applicant becomes an accepted student, official college/university transcripts are required to be sent to LLU in order for the student to be registered for the first quarter of classes. International students must submit official transcripts at time of supplemental application.

5. **References.** The applicant is asked to send DHCAS three personal references. These must include an academic reference from a science instructor; a reference from an employer or professional; a character or religious reference; such as, from a minister. Members of the applicant’s family are excluded from writing the required letters of reference.

6. **Interview.** The applicant’s records will be screened when the supplemental application, recommendation, and transcripts are on file. The applicant may then be invited to the school for a personal interview. An interview is required for admission. The interview provides an opportunity for evaluation of noncognitive factors, including communication skills, personal values, motivation, and commitment to goals of the profession; as well as genuine concern for others in the service of dental hygiene. At the time of the interview, a tour of the school will be given by a current student.

7. **Observation.** It is important that students seek experience observing and assisting in a dental office in order to become familiar with the work of a dental hygienist. Prior to interviewing, applicants are expected to complete a minimum of 20 hours of observation/work experience in a dental facility.

8. **Acceptance.** Accepted students receive a phone call, an email, and an acceptance letter signed by the Dean. Upon payment of the deposit, accepted students receive an email that serves as a receipt, as well as information about how to access registration information.

Pre-entrance requirements:

1. **Pre-entrance health requirements/immunizations.** It is expected that necessary routine dental and medical care will have been attended to before the student registers. New students are required to have certain immunizations and tests before registration. Forms to document the required immunizations are provided for the physician in the registration information made available electronically to the student by LLU. In order to avoid having a hold placed on registration, the student is encouraged to return the documentation forms to Student Health Service no later than six weeks prior to the beginning of classes.

For a complete list of required immunizations and tests, see Section II of this CATALOG under the heading "Health Care." Documentation verifying compliance with this requirement must be provided before registration can be completed.

For further information, consult the **Student Handbook**, Section V—University Policies—Communicable disease transmission prevention policy; or contact the Student Health Service office at 909/558-8770.
If a returning student is assigned to a clinical facility that requires a tuberculosis skin test, the student is required to have the test within the six months before the assignment begins.

2. **Deposits.** The student accepted into the dental hygiene program must submit a nonrefundable deposit of $100. All deposits become part of the first quarter’s tuition. Failure to submit this deposit will result in loss of the applicant’s position in the class. The remaining balance of the first quarter’s tuition and fees are due no later than the day of matriculation in late September. If the applicant has submitted a completed application for financial aid by March 2, and if the Stafford application has been submitted by June 15, the final installment can be paid utilizing University-assisted sources.

3. **Financial requirement.** Non-U.S. citizens and non-permanent residents are required by U.S. Immigration regulation to pay for their first year of tuition and fees before they can register for Autumn term. In addition, they must provide documentary evidence of sufficient funds for their second year. International students will receive the necessary visa applications and registration information after they have submitted their deposit and payment plan.

4. **Financial aid.** A financial aid advisor and financial aid programs are available. Please contact the Office of Financial Aid by email at finaid@llu.edu; or by telephone, 909/558-4509. Web site information is located at <llu.edu/central/ssweb/finaid>.

## General regulations

The student is also subject to School of Dentistry academic information (p. 197), technical standards (p. 195), financial policy (p. 201), and University academic policies (p. 35) outlined in this CATALOG.

### Employment

Dental hygiene students are discouraged from working, however, may accept part-time employment during the school year after receiving approval from the department chair and the associate dean for academic affairs. Permission to work is granted on the basis of grades, class load, and health. Work hours may not interfere with course, laboratory, or clinic assignments.

### Supplies

Dental hygiene students must obtain required textbooks, computers, supplies, instruments, and uniforms. The official instruments issued must be purchased from the School of Dentistry during registration. Unauthorized or incomplete equipment is not acceptable. Advance consent must be obtained for any exception. The student must purchase the professional apparel (uniforms, protective eyewear, and shoes) specified by the School of Dentistry.

### License

To practice, the dental hygienist must pass clinical licensing examinations given by state and/or regional dental examining boards. Examinations are given several times each year. Credentials from the National Board of Dental Examiners are accepted in lieu of the written portion of a state examination in some states. Some states have additional computer-based written examinations. Further information can be obtained from each state licensing board or regional clinical examination Web site.

### Program

**Dental Hygiene — B.S.** (p. 205)

Dental hygiene—a profession dating back to 1913—is largely concerned with preventive health services. The hygienist works in cooperation with the dentist in private practice offices, industrial organizations, schools, hospitals, state or federal public health services, and the armed forces.

The B.S. degree is organized as a four-year college curriculum. The freshman and sophomore years of largely prescribed, preprofessional study may be taken at any regionally accredited college. The professional curriculum begins with the junior year in the School of Dentistry. The curriculum is approved by the Commission on Dental Accreditation of the American Dental Association. The first class at this University graduated in 1961.

### Institutional learning outcomes

Students who graduate with the Bachelor of Science degree in dental hygiene will meet the University outcomes (p. 19).

### Dental hygiene’s ten core competencies

The curriculum is designed to ensure that by graduation, all students will have been equipped with the knowledge, skills, and attitudes to successfully enter the practice of dental hygiene. By the end of the program, graduates should be able to:

1. Apply a professional code of ethics in all patient and professional interactions.
2. Adhere to the federal/state legal and regulatory framework in the provision of oral health care.
3. Apply critical-thinking and problem-solving skills in the provision of oral health care to promote whole patient health and wellness.
4. Use evidence-based rationales and emerging treatment modalities to evaluate and incorporate accepted standards of care.
5. Incorporate self-assessment and professional growth through lifelong learning.
6. Advance oral health services through affiliations with professional organizations, service activities, and research.
7. Apply quality-assurance process to ensure a continued commitment to accepted standards of care.
8. Apply quality-assurance process to ensure a continued commitment to accepted standards of care.
9. Provide accurate, consistent, and complete assessment, planning, implementation, evaluation, and documentation for the provision of all phases of the dental hygiene process of care.
10. Provide collaborative, individualized patient care that is comprehensive and compassionate.

### Admissions

The entry-level dental hygiene applicant must meet the following minimum requirements:

- 96 quarter or 64 semester units of accredited college course work.
- A grade point average of 2.7 or higher in science and nonscience course work, averaged separately; a minimum grade of C for all pre-
entrance course work to be transferred to the University. The entering grade point average is typically 3.2 or higher.

- A personal interview with a representative designated by the School of Dentistry. This interview will assess personal qualities such as, values, spiritual heritage, communication skills, service orientation, and volunteer experience. The interview is by invitation only.

- Three personal letters of reference.

- A minimum of 20 hours observation with a dental hygienist. Completion of observation hours prior to an interview is recommended. Dental assisting experience is also highly recommended.

- Dental hygiene applicants are expected to complete all general education requirements before matriculating in the School of Dentistry. A student may be accepted with a deficiency in one or more of the areas but is expected to eliminate deficits before registering for the Dental Hygiene Program.

- Required science courses must be completed within five years prior to the desired date of matriculation.

For further details, please see the application procedures tab in the School of Dentistry undergraduate section (p. 203) of this catalog.

**Dental hygiene general education requirements**

**Domain I: 28-32 units**

*Religion and Humanities*

Four quarter or three semester units of religion for each full year of attendance at a Seventh-day Adventist college, based on the total units graded; humanities courses (20-24 quarter units or 14 semester units) selected from a minimum of three content areas—history and/or civilization, fine arts theory, literature, philosophy/ethics, foreign language, performing arts/visual arts (not to exceed four quarter units).

**Domain II: 24-32 units**

*Scientific Inquiry and Analysis and Social Sciences*

One full year of chemistry covering inorganic, organic, and biochemistry—each with laboratory; human anatomy and human physiology with laboratory (may be two separate courses or sequential courses); microbiology with laboratory. Required science course work must be completed within five years prior to matriculation. Nonremedial college mathematics or statistics. Introductory sociology, general psychology, and cultural anthropology/diversity courses are required.

**Domain III: 9-13 units**

*Communication*

English composition and literature, a complete sequence (two semesters or two to three quarters); and a speech/interpersonal communication/persuasion course are required. Introductory courses in computers are highly recommended.

**Domain IV: 2-6 units**

*Health and Wellness*

A personal health or nutrition course and two physical education activity courses with letter grades (C or better) are required.

For total unit requirements for graduation, see LLU General Education Requirements (p. 28).

**Accreditation**

The entry-level B.S. degree curricula is accredited by the Commission on Dental Accreditation of the American Dental Association. Loma Linda University is regionally accredited by the WASC Senior College and University Commission (WSCUC), 985 Atlantic Avenue, Suite 100, Alameda, CA 94501; telephone: 510/748-9001; fax: 510/748-9797; website: <http://www.wascсеnilог.org> or <http://www.wascсеnilог.org/contact>.

- International Dentist Program (IDP) — D.D.S. (p. 220)

Dentistry — D.D.S.

Dean
Robert A. Handysides

The goal of the General Dentistry Program is to train practitioners in the delivery of high-quality dental care that is preventive in purpose and comprehensive in scope, and that is based on sound biological principles.

Curriculum

Dentistry, like all health professions, exists to benefit society; and, therefore, continually assesses its professional services to ascertain what measures, attitudes, and skills most effectively serve society.

The School of Dentistry is committed to:

- Beginning the curriculum with a strong foundation in the sciences that are basic to knowledge of the structure and function of the human being in health and in sickness.
- Providing an educational environment that progressively leads a student to mastery and correlation of clinical sciences and skills.
- Developing a frame of reference from which to mobilize the resources of dentists and associated professional personnel in both delivery of health care and contribution to community well-being by education for the prevention of illness.

These concepts include responsibility for contributing to the body of scientific knowledge by questioning, investigating, and teaching; for remaining sensitive and adaptive to the needs of humanity in ever-changing conditions; and for maintaining consciousness of the individual obligation to live, practice, and strive for the good of humanity.

The curriculum in dentistry, organized to be completed in four academic years, fulfills the requirements for the Doctor of Dental Surgery degree.

Objective

The primary objective of the dentistry curriculum is to graduate men and women who attest to the purpose of the University and the goals of the School of Dentistry—which include advancing knowledge and understanding of health, disease, and ways to improve health and the dental health-care delivery system through basic and applied research.

Program learning outcomes

By the end of the program, the graduate should be able to:

1. Perform clinical decision making that is supported by foundational knowledge and evidence-based rationales.
2. Promote, improve, and maintain oral health in patient-centered and community settings.
3. Function as a leader in a multicultural work environment and manage a diverse patient population.
4. Maintain physical, emotional, financial, and spiritual health in one’s personal life.
5. Apply ethical principles to professional practice.

Regulations

The student is also subject to the conditions of registration, attendance, financial policy, governing practices, and graduation requirements outlined in Section II and in the School of Dentistry general information in Section III of this CATALOG.

Instruments, textbooks, additional materials

Instruments, textbooks, and materials required for the study and practice of dentistry are prescribed by the School of Dentistry. The school issues dental instruments each quarter as needed in the program.

Unauthorized or incomplete equipment is not acceptable. Advance administrative approval must be obtained for any exception.

Employment

Because the dental program is very rigorous, first-year students in dentistry may not accept part-time employment during the first term. Thereafter, such employment may be accepted by the student only upon receiving written permission from the associate dean for academic affairs.

Licensing

Eligibility to take examinations given by the state and regional boards of dental examiners is based on essentially the same requirements as are stipulated by the School of Dentistry for the Doctor of Dental Surgery degree. Information about the examinations of the respective states is available at the office of the associate dean for academic affairs. Credentials from the National Board of Dental Examiners are accepted in lieu of the written portion of a state examination in most states. Many states require the National Board Dental Examination and provide no alternative. The national board does not include a clinical examination.

D.D.S. competencies

The curriculum is designed to ensure that upon graduation all students will have the foundational knowledge (basic sciences), clinical sciences (clinical skills), and human and applied sciences (professional behaviors) necessary for the successful practice of general dentistry. LLUSD students must be competent in the following areas:

Domain I: Practice and Profession

1. Critical Thinking: Perform clinical decision making that is supported by foundational knowledge and evidence-based rationales.
   Examples for a new dentist to demonstrate competence in this area may include, but are not limited to, the following:
   a. Foundational Knowledge
      - Understand the fundamental principles governing the structure and functioning of the human organism.
      - Read and evaluate scientific literature and other appropriate sources of information in making oral health-management decisions.
   b. Clinical Sciences
      - Apply critical-thinking and problem-solving skills in the comprehensive care of patients.
      - Integrate information from biomedical, clinical, and behavioral sciences in addressing clinical problems.
   c. Human and Applied Sciences
2. Community Involvement: Promote, improve, and maintain the oral health of patients in various types of community settings. Examples for a new dentist to demonstrate competence in this area may include, but are not limited to, the following:
   a. Foundational Knowledge
      • Explain the principles of leadership and motivation.
      • Explain the role of professional dental organizations in promoting the health of the public.
      • Explain the concept of a worldwide community as described in the world mission of the Seventh-day Adventist Church.
      • Explain the role of the dental professional in a community setting.
   b. Clinical Sciences
      • Participate in local, national, or global community-based oral health-care programs.
      • Recognize the effectiveness of community-based programs.
   c. Human and Applied Sciences
      • Demonstrate the skills to function successfully as a leader on an oral health-care team.
      • Communicate effectively with patients, peers, other professionals, and staff.
      • Demonstrate the ability to serve patients and interact with colleagues and allied dental personnel in a multicultural work environment without discrimination.
      • Demonstrate honesty and confidentiality in relationships with staff.

3. Professional Practice: Understand the basic principles important in developing, managing, and evaluating a general dental practice. Examples for a new dentist to demonstrate competence in this area may include, but are not limited to, the following:
   a. Foundational Knowledge
      • Evaluate the advantages and disadvantages of different models of oral health-care management and delivery.
      • Explain legal, ethical, and risk-management principles relating to the conduct of dental practice.
      • Explain the basic principles of personnel management, office systems, and business decisions.
   b. Clinical Sciences
      • Demonstrate the ideal of service through the provision of compassionate, personalized health care.
      • Understand the importance of maintaining a balance between personal and professional needs for successful life management.
      • Apply knowledge of informational technology resources in contemporary dental practice.
      • Recognize and manage significant cultural, psychological, physical, emotional, and behavioral factors affecting treatment and the dentist-patient relationship.
   c. Human and Applied Sciences
      • Understand the role of lifelong learning and self-assessment in maintaining competence and attaining proficiency and expertise.
      • Apply financial management skills to debt and business management.
      • Understand the importance of spiritual principles as a basis for developing a philosophy of health care.
      • Establish rapport and maintain productive and confidential relationships with patients using effective interpersonal skills.

4. Patient Management: Apply behavioral and communication skills in the provision of patient care. Examples for a new dentist to demonstrate competence in this area may include, but are not limited to, the following:
   a. Foundational Knowledge
      • Understand the fundamental principles governing the structure and functioning of the human organism.
      • Read and evaluate scientific literature and other appropriate sources of information in making oral health-management decisions.
   b. Clinical Sciences
      • Apply critical-thinking and problem-solving skills in the comprehensive care of patients.
      • Integrate information from biomedical, clinical, and behavioral sciences in addressing clinical problems.
   c. Human and Applied Sciences
      • Understand the role of lifelong learning and self-assessment in maintaining competence and attaining proficiency and expertise.
      • Recognize and manage significant cultural, psychological, physical, emotional, and behavioral factors affecting treatment and the dentist-patient relationship.
      • Establish rapport and maintain productive and confidential relationships with patients, using effective interpersonal skills.
      • Recognize common behavioral disorders and understand their management.
      • Use appropriate and effective techniques to manage anxiety, distress, discomfort, and pain.
      • Manage dental fear, pain, and anxiety with appropriate behavioral and pharmacologic techniques.

Domain II: Assessment of the Patient and the Oral Environment

5. Examination of Patients: Conduct an appropriately comprehensive examination to evaluate the general and oral health of a diverse patient population at all stages of life within the scope of general dentistry. Examples for a new dentist to demonstrate competence in this area may include, but are not limited to, the following:
   a. Foundational Knowledge/Basic Sciences
      • Apply knowledge of molecular, biochemical, cellular and systems-level development, structure, and function to the prevention, diagnosis, and management of disease.
      • Apply knowledge of the principles of genetic and congenital and developmental diseases and conditions and their clinical features to understand patient risk in the prevention, diagnosis, and management of disease.
• Apply knowledge of the cellular and molecular basis of immune and nonimmune host defense mechanisms in the prevention, diagnosis, and management of disease.
• Apply knowledge of the biology of microorganisms in physiology and pathology in the prevention, diagnosis, and management of disease.
• Apply knowledge of pharmacology in the prevention, diagnosis, and management of diseases and the promotion and maintenance of oral health.

b. Clinical Sciences
• Identify the chief complaint and take a history of the present illness.
• Conduct thorough medical, social, and dental histories.
• Perform an appropriate clinical and radiographic examination using diagnostic aids and tests, as needed.
• Establish and maintain accurate patient records.

c. Human and Applied Sciences
• Apply knowledge of sociology, psychology, ethics, and other human and applied sciences in the prevention, diagnosis, and management of diseases and the promotion and maintenance of oral health.
• Identify patient behaviors that may contribute to problems related to maintaining oral health.
• Identify barriers that prevent patients from seeking oral health care.

6. Diagnosis: Determine a diagnosis by interpreting and correlating findings from the examination.
Examples for a new dentist to demonstrate competence in this area may include, but are not limited to, the following:

a. Foundational Knowledge/Basic Sciences
• Apply knowledge of molecular, biochemical, cellular and systems-level development, structure, and function to the prevention, diagnosis, and management of disease.
• Apply knowledge of the principles of genetic and congenital and developmental diseases and conditions and their clinical features to understand patient risk in the prevention, diagnosis, and management of diseases.
• Apply knowledge of the cellular and molecular basis of immune and nonimmune host defense mechanisms in the prevention, diagnosis, and management of diseases.
• Apply knowledge of the biology of microorganisms in physiology and pathology in the prevention, diagnosis, and management of diseases.
• Apply knowledge of pharmacology in the prevention, diagnosis, and management of diseases and the promotion and maintenance of oral health.

b. Clinical Sciences
• Identify each problem that may require treatment.
• Recognize clinical and radiographic changes that may indicate disease.
• Establish a clinical or definitive diagnosis for each disorder identified.
• Recognize conditions that may require consultation with or referral to another health-care provider and generate the appropriate request.

c. Human and Applied Sciences
• Apply knowledge of sociology, psychology, ethics, and other human and applied sciences in the prevention, diagnosis, and management of diseases and the promotion and maintenance of oral health.
• Identify patient behaviors that may contribute to problems related to maintaining oral health.

7. Treatment Planning: Develop a comprehensive treatment plan and treatment alternatives.
Examples for a new dentist to demonstrate competence in this area may include, but are not limited to, the following:

a. Foundational Knowledge/Basic Sciences
• Apply knowledge of molecular, biochemical, cellular and systems-level development, structure, and function to the prevention, diagnosis, and management of disease.
• Apply knowledge of the principles of genetic and congenital and developmental diseases and conditions and their clinical features to understand patient risk in the prevention, diagnosis, and management of diseases.
• Apply knowledge of the cellular and molecular basis of immune and nonimmune host defense mechanisms in the prevention, diagnosis, and management of diseases.
• Apply knowledge of the biology of microorganisms in physiology and pathology in the prevention, diagnosis, and management of diseases.
• Apply knowledge of pharmacology in the prevention, diagnosis, and management of diseases and the promotion and maintenance of oral health.

b. Clinical Sciences
• Identify treatment options for each condition diagnosed.
• Identify systemic diseases or conditions that may affect oral health or require treatment modifications.
• Develop an appropriately-sequenced integrated treatment plan.
• Modify the treatment plan when indicated due to unexpected circumstances, noncompliant individuals, or for patients with special needs (such as frail or elderly, or medically, mentally, or functionally compromised individuals).
• Present the final treatment plan to the patient, including time requirements, sequence of treatment, estimated fees, payment options, and other patient responsibilities in achieving treatment outcomes.
• Identify patient expectations and goals for treatment.
• Explain and discuss the diagnosis, treatment options, and probable outcomes for each option with the patient or guardian.
• Secure a signed consent to treat.

c. Human and Applied Sciences
• Apply knowledge of sociology, psychology, ethics, and other human and applied sciences in the prevention, diagnosis, and management of diseases and the promotion and maintenance of oral health.
• Identify patient behaviors that may contribute to problems related to maintaining oral health.
8. Management of Emergencies, Pain, and Anxiety. Manage dental and medical emergencies that may be encountered in dental practice, as well as pain and anxiety with pharmacologic and nonpharmacologic methods.

Examples for a new dentist to demonstrate competence in this area may include, but are not limited to, the following:

a. Foundational Knowledge/Basic Sciences
   - Apply knowledge of molecular, biochemical, cellular and systems-level development, structure, and function to the prevention, diagnosis, and management of disease.
   - Apply knowledge of the principles of genetic and congenital and developmental diseases and conditions and their clinical features to understand patient risk in the prevention, diagnosis, and management of diseases.
   - Apply knowledge of the cellular and molecular basis of immune and nonimmune host defense mechanisms in the prevention, diagnosis, and management of diseases.
   - Apply knowledge of the biology of microorganisms in physiology and pathology in the prevention, diagnosis, and management of diseases.
   - Apply knowledge of pharmacology in the prevention, diagnosis, and management of diseases and the promotion and maintenance of oral health.
   - Recognize common behavioral disorders and understand their management.

b. Clinical Sciences
   - Use accepted prevention strategies, such as oral hygiene instruction, microbiologic evaluation, nutritional education, and pharmacologic intervention to help patients maintain and improve their oral and systemic health.
   - Properly isolate the tooth/teeth from salivary moisture and bacterial contamination.
   - Differentiate between sound enamel, hypomineralized enamel, remineralized enamel, and carious enamel.
   - Develop and implement an appropriate treatment plan for enamel surfaces that can be managed by remineralization therapies.
   - Develop and implement an appropriate treatment plan for tooth surfaces with caries involving the enamel and/or dentin.
   - Remove or treat carious tooth structure and restore with appropriate materials.
   - Determine when a tooth has such severe carious involvement as to require extraction.

c. Human and Applied Sciences
   - Apply knowledge of the principles of genetic and congenital and developmental diseases and conditions and their clinical features to understand patient risk in the prevention, diagnosis, and management of diseases.
   - Identify patient behaviors that may contribute to problems related to maintaining oral health.
   - Identify barriers that prevent patients from seeking oral health care.
   - Use appropriate and effective techniques to manage anxiety, distress, discomfort, and pain.
   - Manage dental fear, pain, and anxiety with appropriate behavioral and pharmacologic techniques.

9. Health Promotion and Maintenance: Provide appropriate preventive and/or treatment regimens for patients with various dental carious states, using appropriate medical and surgical treatments.

Examples for a new dentist to demonstrate competence in this area may include, but are not limited to, the following:

Domain III: Oral Health Management

10. Management of Preventive Care: Evaluate and manage the implementation of preventative treatment modalities.

Examples for a new dentist to demonstrate competence in this area may include, but are not limited to, the following:

a. Foundational Knowledge/Basic Sciences
   - Apply knowledge of molecular, biochemical, cellular and systems-level development, structure, and function to the prevention, diagnosis, and management of disease.
   - Apply knowledge of the principles of genetic and congenital and developmental diseases and conditions and their clinical features to understand patient risk in the prevention, diagnosis, and management of diseases.

b. Clinical Sciences
   - Apply knowledge of the principles of genetic and congenital and developmental diseases and conditions and their clinical features to understand patient risk in the prevention, diagnosis, and management of diseases.
and their clinical features to understand patient risk in the prevention, diagnosis, and management of disease.

- Apply knowledge of the cellular and molecular basis of immune and nonimmune host defense mechanisms in the prevention, diagnosis, and management of disease.
- Apply knowledge of the biology of microorganisms in physiology and pathology in the prevention, diagnosis, and management of disease.
- Apply knowledge of pharmacology in the prevention, diagnosis, and management of disease and the promotion and maintenance of oral health.

b. Clinical Sciences
- Provide patient education to maximize oral health.
- Manage preventive oral health procedures.
- Perform therapies to eliminate local etiological factors to control caries, periodontal disease, and other oral diseases.

b. Clinical Sciences
- Apply knowledge of sociology, psychology, ethics, and other human and applied sciences in the prevention, diagnosis, and management of diseases and the promotion and maintenance of oral health.
- Identify patient behaviors that may contribute to problems related to maintaining oral health.
- Identify barriers that prevent patients from seeking oral health care.

Examples for a new dentist to demonstrate competence in this area may include, but are not limited to, the following:

a. Foundational Knowledge/Basic Sciences
- Apply knowledge of molecular, biochemical, cellular and systems-level development, structure, and function to the prevention, diagnosis, and management of periodontal disease.
- Apply knowledge of the principles of genetic and congenital and developmental diseases and conditions and their clinical features to understand patient risk in the prevention, diagnosis, and management of periodontal diseases.
- Apply knowledge of the cellular and molecular basis of immune and nonimmune host defense mechanisms in the prevention, diagnosis, and management of periodontal diseases.
- Apply knowledge of the biology of microorganisms in physiology and pathology in the prevention, diagnosis, and management of periodontal diseases.
- Apply knowledge of pharmacology in the prevention, diagnosis, and management of periodontal diseases and the promotion and maintenance of the periodontium.

b. Clinical Sciences
- Develop an appropriate oral hygiene instruction plan.
- Treat and manage patients with periodontal diseases with up to localized moderate chronic periodontitis (including patient education, management of interrelated systemic health, and effective subgingival scaling and root planing).
- Demonstrate knowledge of therapeutic and referral options for treatment of patients with generalized moderate-to-severe chronic periodontitis.
- Evaluate the outcomes of periodontal therapies provided to their patients either within their office or services provided by a periodontal specialist to whom the patient may have been referred for treatment.
- Provide and assess success of periodontal maintenance for patients with up to localized moderate chronic periodontitis.
- Manage care of patients who are candidates for referral (those with moderate to severe chronic periodontitis, aggressive forms of periodontitis, mucogingival conditions, periodontal disease associated with systemic disease, or periodontitis that is refractory to treatment) by effective communication and coordination of therapy with a periodontal specialist when appropriate.
- Manage patients requiring modification of oral tissues to optimize restoration of form, function, and esthetics.
- Manage a comprehensive maintenance plan following the active phase of periodontal treatment.
- Manage patients with gingival esthetic needs.

b. Clinical Sciences
- Apply knowledge of pharmacology in the prevention, diagnosis, and management of disease.
- Identify patient behaviors that may contribute to periodontal problems (examples: poor oral hygiene and poor compliance with periodontal maintenance).
- Identify barriers that prevent patients from seeking periodontal care.

Examples for a new dentist to demonstrate competence in this area may include, but are not limited to, the following:

a. Foundational Knowledge/Basic Sciences
- Apply knowledge of molecular, biochemical, cellular and systems-level development, structure, and function to the prevention, diagnosis, and management of disease.
- Apply knowledge of the principles of genetic and congenital and developmental diseases and conditions and their clinical features to understand patient risk in the prevention, diagnosis, and management of disease.
- Apply knowledge of the cellular and molecular basis of immune and nonimmune host defense mechanisms in the prevention, diagnosis, and management of disease.
- Apply knowledge of the biology of microorganisms in physiology and pathology in the prevention, diagnosis, and management of disease.
- Apply knowledge of pharmacology in the prevention, diagnosis, and management of disease.
- Apply knowledge of the biology of microorganisms in physiology and pathology in the prevention, diagnosis, and management of disease.
- Apply knowledge of pharmacology in the prevention, diagnosis, and management of disease.
- Prevent and manage pulpal disorders through the use of indirect and direct pulp capping and pulpotomy procedures.
• Assess case complexity of each endodontic patient.
• Manage endodontic emergencies.
• Manage nonsurgical endodontic therapy on permanent teeth.
• Recognize and manage endodontic procedural accidents.
• Manage pulpal and periapical disorders of traumatic origin.
• Manage endodontic surgical treatment.
• Manage bleaching of endodontically treated teeth.
• Evaluate outcome of endodontic treatment.

c. Human and Applied Sciences
• Apply knowledge of sociology, psychology, ethics, and other human and applied sciences to the prevention, diagnosis, and management of pulpal diseases and the promotion and maintenance of oral health.
• Identify patient behaviors that may contribute to problems related to maintaining oral health.
• Identify barriers that prevent patients from seeking oral health care.

13. Basic Surgical Care: Provide basic surgical care to manage disease and improve oral health conditions.
Examples for a new dentist to demonstrate competence in this area may include, but are not limited to, the following:

a. Foundational Knowledge/Basic Sciences
• Apply knowledge of molecular, biochemical, cellular and systems-level development, structure, and function to the prevention, diagnosis, and management of disease.
• Apply knowledge of the principles of genetic and congenital and developmental diseases and conditions and their clinical features to understand patient risk in the prevention, diagnosis, and management of diseases.
• Apply knowledge of the cellular and molecular basis of immune and nonimmune host defense mechanisms in the prevention, diagnosis, and management of diseases.
• Apply knowledge of the biology of microorganisms in physiology and pathology in the prevention, diagnosis, and management of diseases.
• Apply knowledge of pharmacology in the prevention, diagnosis, and management of diseases and the promotion and maintenance of oral health.

b. Clinical Sciences
• Perform uncomplicated extractions of teeth.
• Manage surgical extraction, common intraoperative and postoperative surgical complications.
• Manage pathological conditions, e.g., lesions requiring biopsy, localized odontogenic infections, impacted third molars, and other referrals.
• Manage patients with dentofacial deformities or patients who can benefit from preprosthetic surgery.
• Manage oral and maxillofacial pathologic conditions using pharmacologic and nonpharmacologic methods.

14. Assessment and Management of Maxillary and Mandibular Skeletodental Discrepancies: Assess and manage maxillary and mandibular skeletal discrepancies, including space maintenance, as represented in the early, mixed, and permanent dentitions.
Examples for a new dentist to demonstrate competence in this area may include, but are not limited to, the following:

a. Foundational Knowledge/Basic Sciences
• Apply knowledge of molecular, biochemical, cellular and systems-level development, structure, and function to the prevention, diagnosis, and management of disease.
• Apply knowledge of the principles of genetic and congenital and developmental diseases and conditions and their clinical features to understand patient risk in the prevention, diagnosis, and management of diseases.
• Apply knowledge of the cellular and molecular basis of immune and nonimmune host defense mechanisms in the prevention, diagnosis, and management of diseases.
• Apply knowledge of the biology of microorganisms in physiology and pathology in the prevention, diagnosis, and management of diseases.
• Apply knowledge of pharmacology in the prevention, diagnosis, and management of diseases and the promotion and maintenance of oral health.

b. Clinical Sciences
• Perform mixed dentition analyses utilizing the Moyers and Nance methods.
• Perform a Steiner cephalometric analysis to evaluate for individual sagittal and coronal plane skeletodental discrepancies compared to normative data.
• Evaluate the noncephalometric, skeletodental facial esthetics of the child, adolescent, or adult patient.
• Manage multidisciplinary treatment cases involving orthodontics.
• Recognize the effects of abnormal swallowing patterns, mouth breathing, bruxism, and other parafunctional habits on the skeletodental structures; and manage treatment of these conditions.

15. Restoration and Replacement of Teeth: Manage the restoration of individual teeth and replacement of missing teeth for proper form, function, and esthetics.
Examples for a new dentist to demonstrate competence in this area may include, but are not limited to, the following:
a. Foundational Knowledge/Basic Sciences
• Apply knowledge of molecular, biochemical, cellular and systems-level development, structure, and function to the prevention, diagnosis, and management of disease.
• Apply knowledge of the principles of genetic and congenital and developmental diseases and conditions and their clinical features to understand patient risk in the prevention, diagnosis, and management of diseases.
• Apply knowledge of the cellular and molecular basis of immune and nonimmune host defense mechanisms in the prevention, diagnosis, and management of diseases.
• Apply knowledge of the biology of microorganisms in physiology and pathology in the prevention, diagnosis, and management of diseases.
• Apply knowledge of pharmacology in the prevention, diagnosis, and management of diseases and the promotion and maintenance of oral health.
b. Clinical Sciences
• Assess teeth for restorability.
• Assess esthetic and functional considerations.
• Manage preservation of space following loss of teeth or tooth structure.
• Select appropriate methods and restorative materials.
• Design fixed and removable prostheses.
• Implement appropriate treatment sequencing.
• Perform biomechanically sound preparations.
• Fabricate and place biomechanically sound provisional restorations.
• Make impressions for diagnostic and treatment casts.
• Obtain anatomic and occlusal relation records for articulation of casts.
• Prepare casts and dies for the construction of restorations and prostheses.
• Manage the laboratory fabrication of restorations and prostheses.
• Evaluate and place restorations that are clinically acceptable.
• Instruct patients in follow-up care of restorations and prostheses.
• Determine causes of postoperative problems after restoration and resolve such problems.
• Recognize and manage occlusal discrepancies
c. Human and Applied Sciences
• Apply knowledge of sociology, psychology, ethics, and other human and applied sciences to the prevention, diagnosis, and management of diseases and the promotion and maintenance of oral health.
• Identify patient behaviors that may contribute to problems related to maintaining oral health.
• Identify barriers that prevent patients from seeking oral health care.

Admissions
The Admissions Committee looks for evidence of scholastic competence, high moral and ethical standards, and significant qualities of character and personality. In broad terms, the following are standards required for admission:
• Intellectual capacity to complete the curriculum
• Emotional adaptability and stability
• Social and perceptual skills
• Physical ability to carry out observation and communication activities, and the possession of sufficient motor and sensory abilities to practice general dentistry
• Commitment to a dynamic spiritual journey and service to mankind

Official transcripts and documents are to be sent to:
Loma Linda University
Admissions Processing
11139 Anderson Street
Loma Linda, CA 92350

Admission requirements
Although the predental curriculum can be completed in three years, a baccalaureate degree or equivalent is strongly recommended. The following college courses are required for entrance into the D.D.S. degree programs and must be taken in an accredited college in the U.S. or Canada:

Humanities
A complete sequence of English composition (two semesters or three quarters) to include composition and literature is required. Students with a Baccalaureate degree are considered to have met this requirement.

Natural Sciences
A complete course sequence, two semesters or three quarters, is required in each science listed unless otherwise noted.

General biology with laboratory
General chemistry with laboratory
General physics with laboratory
Organic chemistry with laboratory
Biochemistry (4 semester units or 6 quarter units)

Electives (strongly recommended in order of priority)
Histology
Human gross anatomy
Systems physiology
Microbiology
Cell and molecular biology
Immunology
Neuroscience
Genetics
Ceramics
Management
Developmental psychology

Accounting
Nutrition

Students preparing for the predoctoral program are required to complete a minimum of three academic years with no fewer than 96 semester or 144 quarter units in a college or university accredited by a regional accrediting association. Preference is given to applicants who have completed or will complete the requirements for a baccalaureate degree prior to admission. A maximum of 64 semester or 96 quarter units of credit may be accepted from an accredited junior or community college.

A complete academic year of class work (8 semester or 12 quarter units) in each subject: general biology, general chemistry, organic chemistry, and general physics are required. Also required is a complete sequence of English Composition (two semesters or three quarters). The biochemistry requirement is one semester or a minimum of (four semester units or 6 quarter units). All science prerequisites must be completed within five years prior to matriculation, with a grade of C or above in each course. A minimum grade point average of 2.7 in science subjects and in nonscience subjects, averaged separately, is required. The average grade point average for accepted students is substantially higher.

Students who are enrolled in another program in Loma Linda University are not considered for admission until they have completed or have been released from the program.

Prior to consideration for admission, the applicant must meet specific criteria related to past academic performance (G.P.A.), performance on the Dental Admission Test (DAT), and a personal interview. Applicants are expected to have taken the DAT within the previous two years, preferably not later than October of the year preceding expected matriculation.

In order to be better prepared with specific vocabulary and understanding, the applicant should include science courses with content similar to courses offered during the first year of the professional curriculum. The applicant’s purpose should be the pursuit of diverse knowledge, the cultivation of an inquiring mind, the practice of efficient methods of study, and the habit of thinking and reasoning independently.

An applicant from a college or university outside the U.S. or Canada or from a nonaccredited college or university in the U.S. must complete a minimum of one full academic year (24 semester or 36 quarter credits) in an accredited college or university in the U.S. or Canada. This includes the required specific core sciences in the areas of biology, general chemistry, organic chemistry, biochemistry, and physics (all sciences except Biochemistry must include laboratories). A grade of C or above in each course completed is required. (A grade of C- will not be accepted.)

Credit for studies taken at a military service school is granted to veterans according to recommendations in the Guide of the American Council on Education and/or the California Committee for the Study of Education. The University reserves the right to require satisfactory completion of written or practical examinations in any course for which transfer credit is requested.

Application procedure
The school participates in the American Association of Dental Schools Application Service (AADSAS). Applications are available online at <http://www.aadea.org/>. Due to the high volume of applicants LLUSD recommends that AADSAS applications be submitted before August. The following is a step-by-step process for completing an application to Loma Linda University (LLU).

1. AADSAS application. Is submitted to the American Association of Dental Schools Application Service between June 1 and November 1 at www.aadea.org where it is processed in approximately four to six weeks prior to being sent to the LLUSD Office of Admissions.
2. Supplemental application. After AADSAS completes coursework verification. The applicant then receives an email invitation from LLU to complete an electronic supplemental application.
3. The applicant must return the completed supplemental application and materials within thirty (30) days. This includes an essay specific to Loma Linda University, a photograph, and the application fee of $150.
4. Transcripts. Official transcripts must be sent to AADSAS at the time application is submitted. When an applicant becomes an accepted student, official transcripts—mailed directly from all colleges/universities to LLU—are required and must be submitted by August 1 in order for the student to be registered for the first academic year of classes.
5. International students must submit official transcripts to LLU at time of supplemental application.
6. References. The applicant is asked to supply a minimum of three personal references. A reference from a pre-professional committee or science professor; a reference from an employer or professional and a reference from a spiritual leader. Applicants who have attended a college or university that has a preprofessional committee that prepares preprofessional evaluations, are encouraged to submit a preprofessional evaluation to LLUSD. Members of the applicant's family are excluded from writing the required letters of reference, although letters will be accepted for the file in addition to those required. All recommendation letters sent to AADSAS will be sent to Loma Linda University School of Dentistry along with the application.
7. Dental Admission Test. The applicant is required to complete and meet specific criteria related to performance on the Dental Admission Test (DAT). Preference is given to applicants who have taken the test by October of the academic year preceding that for which admission is desired. Entering D1 students are expected to have taken the test within the past two years. If the test has been taken more than one time, the most recent scores are used for admission criteria. The committee reviews all scores on the test. The DAT scores must be on file at Loma Linda University before an applicant is invited to interview.
8. Interview. The applicant's records will be screened when the supplemental application, recommendations, transcripts, and DAT scores are on file. The applicant may then be invited to the school for a personal interview. An interview is required for admission as it provides an opportunity for evaluation of noncognitive factors, including communication skills, core values, motivation, and passion for the profession; as well as genuine concern for others in the service of dentistry. At the time of the interview, a tour of the school will be given.
9. Observation. It is important that students seek experience observing and assisting in a dental office in order to become familiar with the work of a dentist. Prior to interviewing, applicants are expected
to complete a minimum of fifty (50) hours of observation/work experience in a dental facility, twenty (20) of which must be done with a general dentist.

10. **Acceptance.** The student receives notification of an acceptance via a phone call, email and letter signed by the Dean. Upon payment of the deposit, accepted students receive an email that serves as a receipt, as well as information about how to access registration information.

11. **Pre-entrance health requirements/immunizations.** It is expected that necessary routine dental and medical care will have been attended to before the student registers. New students are required to have certain immunizations and tests before registration. Forms to document the required immunizations are provided for the physician in the registration information made available electronically to the student by LLU. In order to avoid having a hold placed on registration, the student is encouraged to return the documentation forms to Student Health Service no later than six weeks prior to the beginning of classes.

For a complete list of required immunizations and tests, see Section II of this CATALOG under the heading “Health Care.” Documentation verifying compliance with this requirement must be provided before registration can be completed.

For further information, consult the Student Handbook, Section V—University Policies—Communicable disease transmission prevention policy; or contact the Student Health Service office at 909/558-8770.

If a returning student is assigned to a clinical facility that requires a tuberculosis skin test, the student is required to have the test within the six months before the assignment begins.

12. **Deposits.** The student accepted into dentistry must submit a nonrefundable deposit of $1,000 to the Office of Admissions. All deposits become part of the first term’s tuition. Failure to submit this deposit will result in loss of the applicant’s position in the class. A second nonrefundable deposit of $1,000 is due on May 1 in order to secure a place in the class. The remaining balance of the first term’s tuition and fees are due no later than the day of matriculation in August.

13. **Financial requirement.** All first-year students are required to pay their first year’s tuition, enrollment fee, and program fees before they can register for classes. In addition, international students (all non-U.S. Citizens and non-Permanent Residents) must provide documentary evidence of sufficient funds for their second year. International students will receive the necessary visa application and instructions after they have paid their first year’s tuition and enrollment fee and submitted their second-year payment plan. In order to complete registration, the remaining program fees must be paid.

14. **Financial aid.** A financial aid advisor and financial aid programs are available. Please contact the Office of Financial Aid by email, <finaid@llu.edu>, or by telephone, 909/558-4509. Web site information is located at <http://www.llu.edu/students/financial-aid/ >.

### Transfer

Transfer from another school of dentistry in the United States is considered only in unusual circumstances. A transfer applicant should expect to begin at the first-year level and will be considered only if there is space available. An application for transfer will be considered when the following information is received in the school’s Office of Admissions:

- Letter from applicant, stating reason for requesting transfer;
- Letter of recommendation from the dean of the dental school where the applicant is enrolled;
- Official transcripts sent directly to the LLUSD Office of Admissions for both predental and dental school courses completed;
- Dental Admission Test results.

Normal time to complete the program
4 years (15 academic quarters) — full-time enrollment required

Dental Anesthesiology
The Department of Dental Anesthesiology is staffed by dentists with advanced training in anesthesiaology. The faculty provides didactic and clinical instruction in all areas of pain and anxiety control in dentistry. Didactic and clinical instruction in clinical pharmacology, medical emergency management, and the use of local anesthetics is provided to predoctoral dental and undergraduate dental hygiene students. Postdoctoral students receive instruction in physical diagnosis, clinical medicine, hospital protocol, medical emergency management, and local anesthesia; as well as all forms of sedation and general anesthesia. Anesthesia management of the medically and physically compromised dental patient is emphasized.

Primary faculty
John W. Leyman
Larry Trapp

Wu Zhang
Emeritus faculty
James M. Crawford
James Kettering
George M. Lessard

Division of General Dentistry
The Division of General Dentistry encompasses the disciplines of oral diagnosis, operative dentistry, fixed prosthodontics, and removable prosthodontics. It is the aim of the division to provide each student with a thorough understanding of both technical and clinical skills which enable comprehensive patient care. The primary objectives of the Division of General Dentistry can be described on two levels: preclinical didactic courses and clinical education. The division also aims at instilling in each student an interest in exploring new frontiers in dentistry and in recognizing the need for a continued quest for knowledge.

The division houses the International Dentistry Program which is responsible for the management of preclinical and clinical education for students.

Endodontics

Endodontics is the discipline of dentistry concerned with the morphology, physiology, and pathology of human dental pulp and apical tissues. Its study and practice encompass the basic clinical science, including biology of the normal pulp, the etiology, diagnosis, prevention, and treatment of diseases and injuries of the pulp; and associated apical conditions. Department faculty members have developed preclinical lectures, laboratory exercises, and clinical training that cover the scope of endodontics. These experiences are coordinated and incorporated in a manner that provide patients with optimum oral health care in a setting that promotes the mission of the School of Dentistry.

Chair

Robert A. Handysides
Steven G. Morrow
John Munce

Emeritus faculty
Leif K. Bakland
Donald L. Peters

Radiologic and Imaging Services

The Department of Radiology and Imaging Sciences provides support in the form of didactic, preclinical, and clinical instruction to students within the School of Dentistry. Courses offered cover principles of acquisition of images, radiographic recognition and interpretation of normal and disease conditions of the oral cavity and hard tissues, patient assessment, and incorporation of findings into treatment planning. The department aims to enable students to excel in compassionate and knowledgeable service to patients that is based on a comprehensive gathering and interpretation of pertinent radiographic data.

Primary faculty
Kenneth Abramovitch
Edwin Christiansen

Oral and Maxillofacial Surgery

The Department of Oral and Maxillofacial Surgery offers courses that include didactic and clinical instruction to prepare the student for the practice of dentistry. These courses cover aspects of general, systemic, and oral pathology; patient evaluation, including differential diagnoses; treatment planning; and the identification and management of complications throughout all phases of treatment. Clinical instruction focuses on proper surgical technique for extraction of teeth, alveoplasty, and biopsies. Additionally, proper prescription writing and suturing techniques are evaluated.

Frederick Mathews
Susan D. Richards
Orthodontics

Pre-doctoral courses in the Department of Orthodontics, as outlined by the American Dental Association, apply knowledge derived from the basic sciences, research, and clinical treatment to the science of orthodontics so that the dental graduate will have the background necessary to recognize those conditions s/he is capable of managing. Clinical experience ranges from minor tooth movement and early treatment cases to more difficult, advanced cases—according to the student’s demonstrated ability, perseverance, judgment, and interest in orthodontics.

Emeritus faculty
John E. Peterson, Jr.

Periodontics

The Department of Periodontics provides education and training for predoctoral, dental hygiene, and advanced education students in the art and science of periodontics. Periodontics encompasses the study of the supporting structures of the teeth. It also deals with etiology, pathogenesis, diagnosis, and treatment of diseases that affect the supporting structures of the teeth. The study of periodontics helps to form basic concepts of health and disease. These concepts are applied to the treatment of periodontal diseases and in the maintenance of dental health over a patient’s lifetime, providing comprehensive dental therapy for the individual patient. In this way, the Department of Periodontics contributes directly to the School of Dentistry’s academic and service mission—“to make man whole.”

Chair

Professor Emeritus
R. Leslie Arnett, Jr.

Pediatric Dentistry

The Department of Pediatric Dentistry is committed to teaching clinical techniques in dentistry for children, while providing an emotionally healthy environment for the child patient. The faculty has developed didactic, laboratory, and clinical learning environments in pediatric dentistry—a broad experience designed to prepare the student for general pediatric dentistry practice.

International Dentist Program — D.D.S.

The International Dentist Program, founded by Dr. Lloyd Baum in 1985, is designed to allow qualified dentists educated in countries outside the United States to earn the Doctor of Dental Surgery (D.D.S.) degree in the United States. More than 500 students from 81 countries have graduated from the program.

The D.D.S. degree from a U.S. dental college is an educational requirement for eligibility to take the dental licensure examination in many states. The program has a minimum length of two academic years.
(24 calendar months); but it may be extended, when necessary, to meet the particular needs of students.

**Program learning outcomes**

By the end of the program, the graduate should be able to:

1. Perform clinical decision making that is supported by foundational knowledge and evidence-based rationales.
2. Promote, improve, and maintain oral health in patient-centered and community settings.
3. Function as a leader in a multicultural work environment and manage a diverse patient population.
4. Maintain physical, emotional, financial, and spiritual health in one’s personal life.
5. Apply ethical principles to professional practice.

**Regulations**

The student is subject to the conditions of registration, attendance, financial policy, governing practices, and graduation requirements outlined in Section II (p. 35) and in the School of Dentistry (p. 197) general information in Section III of this CATALOG.

**Program director**

Michael J. Fitzpatrick

**Faculty**

H. Brooks Burnsed
Paula M. Izvernari
Balsam F. Jekki
Rami R. Jekki
Ronald L. Sorrels
Klaus D. Wolfram

**Admissions**

Applications are available online at <http://www.adea.org/>. Requests for information are accepted by e-mail or telephone.

**Admission requirements**

- Dental degree from a recognized international dental school.
- Successful completion of the National Dental Board Examination, Part I and Part II.
- TOEFL examination, with a minimum score of 20 in each area of the Internet-based examination. To be competitive, a score of 100 or higher is recommended.
- Dental school transcript (evaluated by an LLU-approved organization).

Other documentation is required, as outlined in the application. All application material sent to the Office of Admissions becomes the property of the school.

Students currently enrolled in a similar program at another university are not eligible to apply and will not be accepted for admission.

**Application procedure**

1. CAAPID application. The Centralized Application for Advanced Placement for International Dentists (CAAPID) application is completed online by the applicant at <http://www.adea.org/>. It takes approximately four weeks for CAAPID applications to be processed and sent to the dental school where the applicant has applied.
2. Supplemental application. The applicant then receives an email invitation from LLU to complete an electronic supplemental application.
3. Supplemental application deadline. The applicant must return the completed supplemental application and materials within 30 days. This includes an essay specific to Loma Linda University, a photograph, and the application fee of $150.
4. Transcripts. Official transcripts and diploma or certificate with English translations and documentation of all postsecondary education must be mailed directly to LLU from all colleges/universities attended by the student. If the dental education was received in India, transcripts must be sent directly from the University and not the dental school college. Applicants submitting a WES evaluation are exempt from submitting official transcripts to LLU.
5. Official Foreign educational credential evaluation report (course by course evaluation) mailed directly from WES, ECE, or AACRAO; links available at www.llu.edu/apply/intltrans.html
6. Non-English Language Documents. Must be submitted in their original language along with an English translation.
7. Language. All classes are conducted in English, and patients treated in the clinic communicate in English. Applicants must demonstrate competence in both written and spoken English.
8. References. Two letters of recommendation, preferably from former teachers or mentors who can attest to applicant’s character, conduct, and professional ability. Members of the applicant’s family are excluded from writing the required letters of reference, although letters will be accepted for the file in addition to those required. Letters should be sent directly to CAAPID.
9. Photograph. A recent passport size photograph uploaded through your supplemental application.
10. Deadline. To be considered, the CAAPID and LLU applications and all required documents must arrive at the School of Dentistry Office of Admissions by June 1. All documents sent to Loma Linda become property of LLU.

**Selection process**

- Screening: Completed applications submitted before the application deadline will be given priority consideration by the Office of Admissions.
- Admissions testing: Is by invitation only and is conducted one or more Sundays in the fall.
- Interview: Based on Admissions testing, applicants may be invited to interview.
- Final selection: The applicant’s admissions testing results, interview and application file, are presented to the School of Dentistry Admissions Committee for final selection. Thirty-two applicants are accepted each year for enrollment in the International Dentist Program which begins in the Summer term.

12. Deposits. A student accepted into the International Dentist Program must submit a deposit of $4,000 USD to Loma Linda University within
30 days of acceptance. Deposits become part of the first term’s tuition. Failure to submit this deposit will result in the loss of the applicant’s position in the class.

13. Financial requirement. Students applying for or holding F-1 U.S. student visas are required by U.S. immigration regulation to pay for the first year’s tuition and fees and provide documented evidence of sufficient funds for their second year prior to enrolling. For students eligible for government-sponsored financial aid programs, only the first term tuition is required at the initial registration.

14. Financial aid. A financial aid advisor and financial aid programs are available. Applicants should contact the Office of Financial Aid at email <finaid@llu.edu (id@llu.edu)>; or by telephone, 909/558-4509. Web site information can be obtained at <llu.edu/central/ssweb/finaid>.

15. Pre-entrance health requirements/immunizations. It is expected that necessary routine dental and medical care will have been attended to before the student registers. New students are required to have certain immunizations and tests before registration. Forms to document the required immunizations are provided for the physician in the registration information made available electronically to the student by LLU. In order to avoid having a hold placed on registration, the student is encouraged to return the documentation forms to Student Health Service no later than six weeks prior to the beginning of classes.

For a complete list of required immunizations and tests, see Section II of this CATALOG under the heading "Health Care." Documentation verifying compliance with this requirement must be provided before registration can be completed.

For further information, consult the Student Handbook, Section V—University Policies—Communicable disease transmission prevention policy; or contact the Student Health Service office at 909/558-8770.

If a returning student is assigned to a clinical facility that requires a tuberculosis skin test, the student is required to have the test within the six months before the assignment begins.

Students in the International Dentist Program have the same benefits, including health-care coverage, as are described elsewhere in this CATALOG.

Program requirements
Curriculum for cohort starting Summer 2019.

1 This course may be taken in the third or fourth year.

**Normal time to complete the program**

Two (2) years (27 months) at LLU—full-time enrollment required
Advanced Dental Education

Ass ociate dean for advanced dental education
Steven G. Morrow

The School of Dentistry offers advanced dental education programs in specialty and nonspecialty disciplines of dentistry. Postdoctoral certificates, Master of Science (M.S.), and Master of Science in Dentistry (M.S.D.) degrees are available. The purpose of these programs is to offer candidates an opportunity to integrate advanced clinical training with meaningful exposure to applied basic science and research. For additional information and to submit an online application, interested applicants should visit the School of Dentistry web site (Graduate Programs).

Advanced dental education programs leading to a professional certificate with an option to also pursue the Master of Science (M.S.) degree or the Master of Science in Dentistry (M.S.D.) degree are:

- Endodontics
- Implant Dentistry
- Orthodontics and Dentofacial Orthopedics (M.S. degree only)
- Pediatric Dentistry
- Periodontics
- Prosthodontics

These programs are organized to comply with the standards of the Council on Dental Education of the American Dental Association, and the objectives and content meet the requirements of the respective specialty boards. In addition, the programs in endodontics, oral and maxillofacial surgery, orthodontics and dentofacial orthopedics, pediatric dentistry, periodontics, and prosthodontics are accredited by the Commission on Dental Accreditation, a specialized accrediting body recognized by the Council on Postsecondary Accreditation and the United States Department of Education. For additional information, the student may contact:

The Office of Advanced Education
Loma Linda University
School of Dentistry
Loma Linda, CA 92350
<llu.edu/dentistry/gradprograms>

Program learning outcomes

Graduate students and residents in advanced dental education programs are expected to:

1. Describe the didactic foundation of their discipline and master the clinical skills required to utilize that foundation.
2. Integrate advanced clinical training with meaningful exposure to the applied basic sciences.
3. Engage in a project involving advanced clinical training with meaningful exposure to research.
4. Integrate interdisciplinary treatment planning into their didactic and clinical activity.
5. Apply for and pursue board certification in their discipline through the appropriate sponsoring organization.
6. State the importance of developing a commitment to the University-wide student learning outcomes.

Residence

The required time in residence varies with each program. For the length of a program, refer to the information under each program description.

Stipends

Stipends are provided in the Oral and Maxillofacial Surgery and Pediatric Dentistry programs. For details, contact the program coordinator personally.

Tuition

Tuition and fees quoted in the school financial information section of this CATALOG are for the academic year 2019-2020.

Thesis

The student must complete a research project presented in thesis format and orally defend it according to the standards set by the Faculty of Graduate Studies. A written thesis, approved by the student’s research committee, must be submitted to the Faculty of Graduate Studies in order to receive a satisfactory grade for the course.

Publishable paper

Students on the Master of Science in Dentistry degree track must submit a publishable paper no later than one year from the date they complete their certificate program. Candidates are admitted to only one master’s degree track of their choice.

General requirements

For information about requirements and practices to which all graduate students are subject, the student should consult Section II of this CATALOG.

Admissions

Admission requirements for advanced dental education programs/postdoctoral programs

An appropriate degree from an accredited college or university is required for admission into the advanced dental education programs and postgraduate programs. A doctoral degree in dentistry (Doctor of Dental Surgery or Doctor of Dental Medicine) or the equivalent is required for admission to all programs. The applicant should have achieved a general grade point average of not less than 3.0 on a 4.0 scale, with no grade below 2.0. In addition to acceptable scholastic performance, the applicant must give evidence of personal and professional fitness for growth in the science and art of the intended dental discipline. For application deadlines, see the section on each individual program or refer to the chart on the following page.

After applicants are accepted into the advanced dental education programs in dental anesthesiology, endodontics, oral and maxillofacial surgery, pediatric dentistry, periodontics, prosthodontics, or the postdoctoral program in implant dentistry, they may apply for admission to the Faculty of Graduate Studies for the purpose of earning an M.S. degree; or to the Office of Advanced Education to earn an M.S.D. degree (in addition to the advanced program certificate). Applicants for the Master of Science (M.S.) degree who meet or exceed the minimum entrance requirements may be accepted to the Faculty of Graduate Studies (FGS) by the School of Dentistry’s assistant dean for advanced dental education. The master’s degree thesis must be completed, defended, and accepted in final form by both the graduate program.
and the Faculty of Graduate Studies. Students have up to five years from the date of acceptance of the certificate program to complete the requirements for the M.S. degree. All the M.S.D. requirements may be completed during the program but no later than one year from the candidate’s anticipated program completion date.

1 Transcripts. Transcripts from all postsecondary schools from which credit was received, whether or not the work pertains to your LLU degree, are required to complete your application.

2 Grade Point Average (G.P.A.). A cumulative G.P.A. of 3.0 (on a 4.0 scale) is required for admission.

3 National Boards, Part I. Refers to Part I of the two-part U.S. National Board Examinations. Part II must also be submitted when available. All must be passing grades.

4 English Language Skills. Non-U.S. applicants for whom English is not their primary language and whose secondary education has been given outside the U.S. are required to take the TOEFL examination. They must demonstrate satisfactory verbal and written English language skills. A minimum TOEFL score of 550 (paper based) and 80 (internet based) is required. TOEFL scores are valid for two years from the test date.
Dental License. All applicants for the Advanced Education Program in Oral & Maxillofacial Surgery program must have a Californian Dental License.

International Dentist Program. All graduates from non-ADA-accredited dental schools who apply to the Advanced Specialty Education Program in Orthodontics and Dentofacial Orthopedics must complete an accredited International Dentist Program.

Orthodontics and Dentofacial Orthopedics. This program requires applicants to meet the requirements for the certificate program and the Master of Science (M.S.) degree track. To be considered, applicants must take the GRE.

Periodontics. This program has a rolling admission process between January 1 and September 1, which means it reserves the right to fill some but not all of its entering class prior to the September 1 deadline.

Orthodontics and Dentofacial Orthopedics. The program reserves the right to admit selected students to the certificate program, which would require submission of a certificate application due by the regular application deadline.

Endodontics and Pediatric Dentistry. All applicants for the Endodontic and Pediatric Dentistry Program who have received their dental school training outside the U.S. or Canada must have a current dental license from their country and submit a notarized copy with their application.

National Board Medical Examination (NBME) Comprehensive Basic Science Examination. Applicants for the Oral and Maxillofacial Surgery Program who take the National Board Dental Examination (NBDE) Part I after January 1, 2012—and, therefore, do not have a numerical score—must take the National Board Medical Examination (NBME) Comprehensive Basic Science Examination and have their official test results reported to Loma Linda University by the application deadline.

TOEFL Scores for Pediatric Dentistry. The Pediatric Dentistry Program requires a minimum paper-based TOEFL score of 590 or an internet-based score of 90. TOEFL scores are valid for two years from the test date.

Master of Science in Dentistry (M.S.D.) Degree, Advanced

Graduate students and residents enrolled in certain advanced education programs are eligible to apply for and be awarded a Master of Science in Dentistry (M.S.D.) degree, if they fulfill the following requirements.

Admission process

1. The following minimum requirements have been established for admission to the M.S.D. degree program:
   Admissions requirements
   • Cumulative grade point average (G.P.A.) of 3.0
   • Approval by the program director
   • Academic record of scholastic competence
   • Demonstrated professionalism and integrity
2. A candidate for the M.S.D. degree must complete a Loma Linda University online Application for Admission and a Part I (Application for Admission for the Master of Science in Dentistry [M.S.D.] degree) form. The Part I form can be found in the advanced education section of Canvas. It must be accompanied by a research protocol approved by the candidate’s research guidance committee (RGC) and reviewed by the School of Dentistry Research Committee.
3. The Part I form must be signed by the applicant’s program director and the research guidance committee (RGC) members.
4. The completed Loma Linda University application, Part I form, and approved protocol are then reviewed for approval by the associate dean for advanced education to ensure all admissions requirements have been met.
5. Accepted applicants will receive a letter of admission from the associate dean for advanced education. They must acknowledge acceptance of their admission electronically to the Office of Advanced Dental Education.

Academic policies

Grading system for advanced education programs

The following information outlines the grading systems for all postdoctoral students/residents enrolled in advanced education programs in the School of Dentistry. Each course taught in the school has been approved for either a letter grade or an S/U grade, and deviations from this are not allowed other than MS (marginally satisfactory) grades as specified below.
Grades and grade points for postdoctoral students/residents

<table>
<thead>

</tr>
</tbody>
</table>

Postdoctoral students/residents who receive one or more of the following grades in any quarter will be placed on academic probation and must retake the course(s) for which these grades were received.

7. The postdoctoral student/resident may exercise the option to retake the course which may result in a grade change for the course.

Process to repeat a course:
1. The postdoctoral student/resident will be placed on academic probation.
2. The postdoctoral student/resident must register for the course to be repeated at the earliest opportunity.
3. The postdoctoral student/resident must receive a minimum grade of B- to continue in the advanced dental education program.

Academic disciplinary policy for advanced education programs:

Academic probation
Academic probation for postdoctoral students/residents will be for a minimum of one academic quarter following the quarter in which the unsatisfactory performance was noted. Probationary status will be reviewed on a quarterly basis until successful remediation has been recorded. Such action must be confirmed by memorandum to the student.

Under the following conditions, a postdoctoral student/resident will be sent an advisory letter from the Office of Advanced Dental Education regarding the potential for placement on academic probation.
1. Term G.P.A. below 3.0 (B)
2. One or more courses with a grade of C+ or lower
3. More than one course with a grade of MS.

A postdoctoral student/resident will be placed on academic probation if he/she meets one or more of the following conditions:
2. One or more courses with a grade of C, or lower.
3. Failing or unsatisfactory grades in any course(s) required for the specialty certificate, Master of Science (M.S.) degree, or Master of Science in Dentistry (M.S.D.) degree programs.
4. Total of three or more MS grades.

Level of Academic Probation:
The level of academic probation indicates the seriousness of the cumulative academic deficiency. However, depending on the seriousness or nature of the academic deficiency, a postdoctoral student/resident may be considered for academic leave of absence or discontinuation at any level of probation.

Level I
First term on academic probation.

Level II
Second term on academic probation, consecutive or nonconsecutive.

EXCEPTION: Continued academic probation due to failing grade in a course that cannot be repeated until a later term.
Level III
Third term on academic probation, consecutive or nonconsecutive. If a student/resident is unable to remove academic probationary status within the following term, s/he will be considered for academic discontinuation.

EXCEPTION: Continued academic probation due to failing grade in a course that cannot be repeated until a later term.

Level IV
If a student/resident meets criteria for academic probation for a fourth term, consecutive or nonconsecutive, s/he will be considered for academic discontinuation.

Restrictions for a postdoctoral student/resident on academic probation:
A student/resident on academic probation:

1. May not serve as an officer for any class, school, or extracurricular organization.
2. May not take elective courses.
3. May not participate in elective off-campus, service learning, or mission activities.
4. Remains on academic probation until all terms of the probation sanctions have been fulfilled, unless the postdoctoral student/resident is discontinued.

Remedial action (remediation):
A postdoctoral student/resident who is not performing up to expectations (academic and professional) may receive the following:

1. Restriction of clinical privileges by the program director.
2. Academic probation (Level I to III) – upon recommendation of the Program Director by the Assistant Dean for Advanced Dental Education.
4. Clinical probation (Level I to III) – upon recommendation of the Program Director by the Assistant Dean for Advanced Dental Education.
5. Discontinuation – upon recommendation of the Program Director to the Assistant Dean for Advanced Dental Education. Discontinuation must be approved by the Dean.

Probation:
All recommendations to the Assistant Dean for Advanced Dental Education for probation must be supported by well-documented evidence of repeated counseling and other internal measures designed to point out deficiencies and take corrective action through a detailed remediation program. A remediation program must be specific in design, implemented, and monitored for any postdoctoral student/resident who is not performing up to a program’s stated standards. It is important to have documentary evidence on record by multiple faculty members with detailed accounts of dates, times, explanations or counseling, discussions, and corrective measures. Written statements from support staff should also be included if they have direct contact or knowledge of a matter involving a postdoctoral student/resident.

Postdoctoral students/residents may be placed on academic probation, professional standards (behavioral) probation, and/or clinical probation. Probation begins at Level I and may progress to Level III. Postdoctoral students/residents should be placed on probation for the academic quarter immediately following the quarter in which the unsatisfactory performance was documented. Probationary status will be reviewed on a quarterly basis until successful remediation has been documented. This information will be conveyed to the postdoctoral student/resident verbally and in writing.

Continuation:
Postdoctoral students/residents who are not progressing as expected may be continued in their year group for as long as necessary before being promoted to the next year or discontinued. To exercise this option, the Assistant Dean for Advanced Dental Education will inform University Records of the decision to continue a postdoctoral student/resident and state the anticipated length of this continuation. Program directors make the determination as to when to recommend continuing or discontinuing a postdoctoral student/resident and when the postdoctoral student/resident has completed his/her program. Recommendation for continuation will be submitted to the Assistant Dean for Advanced Dental Education for review and approval.

Discontinuation:
Postdoctoral students/residents who do not achieve required measurable improvement by the end of the prescribed remediation and counseling periods may be recommended for discontinuation by their Program Director to the Assistant Dean for Advanced Dental Education for review. Recommendation to discontinue a postdoctoral student/resident will be submitted by the Assistant Dean for Advanced Dental Education, in writing, to the Dean for review and action.

Programs
• Endodontics — post-D.D.S. Certificate, M.S.D., M.S. (p. 230)
• Implant Dentistry — post-D.D.S. Certificate, M.S.D., M.S. (p. 233)
• Oral and Maxillofacial Surgery — post-D.D.S. Certificate (p. 234)
• Orthodontics and Dentofacial Orthopedics — post-D.D.S. Certificate, M.S. (p. 235)
• Pediatric Dentistry — post-D.D.S. Certificate, M.S.D., M.S. (p. 237)
• Periodontics — post-D.D.S. Certificate, M.S.D., M.S. (p. 238)
• Prosthodontics — post-D.D.S. Certificate, M.S.D., M.S. (p. 239)

General degree requirements
Master of Science in Dentistry (M.S.D.) Degree, Advanced
Graduate students and residents enrolled in certain advanced education certificate programs are eligible to apply for and be awarded a Master of Science in Dentistry (M.S.D.) degree, if they fulfill the following requirements.

Degree requirements
1. Students must perform scholarly activities as defined by the program director. Programs may differ in how this requirement is met in order to afford directors the opportunity to align such activity with the experience, background, and interest of each student and of the program faculty. Goals must be worthy and achievable. The nature of the scholarly activity will be defined in Part II (Statement of Completion for the Master of Science in Dentistry [M.S.D.] degree) of the degree application form as submission of a formatted, publishable manuscript.
2. Students must successfully complete all the course requirements of the certificate curriculum, with additional units in research for the
master’s degree curriculum (see individual program descriptions at <llu.edu/dentistry/gradprograms>). Candidates complete sections I and II of Part II form to indicate their anticipated degree completion dates.

3. A publishable paper and public presentation of the research are required. The manuscript must be in a format approved by the respective program director.

4. Students who do not complete the publishable paper while completing the curriculum will have one year from their anticipated program end date to fulfill this requirement.

5. After conducting an internal degree audit, the program director completes and signs the Part III form (Statement of Completion) to verify that all requirements for the M.S.D. degree have been met.

6. The associate dean for advanced education performs a final degree audit before signing the Part III form, signifying approval to award the Master of Science in Dentistry (M.S.D.) degree.

The M.S.D. degree is not offered by the advanced education program in orthodontics and dentofacial orthopedics.

**Master of Science (M.S.) Degree, Advanced**

Graduate students and residents enrolled in certain advanced education programs are eligible to apply for and be awarded a Master of Science (M.S.) degree, if they fulfill all of the requirements stated below.

**Degree requirements**

1. Applicants must undertake scholarly activities/research as defined by each program director. Programs may differ on how this requirement is met in order to afford directors the opportunity to align such activity with the experience, background, and interest of each student. Goals must be worthy and achievable.

2. Students must successfully complete all course requirements of the certificate curriculum, with additional units in research for the master’s degree (see individual program descriptions online). Also, students must submit a completed Form C, Petition for Graduation, to indicate their anticipated degree completion dates.

3. A thesis and a public thesis defense are required. The thesis must be in a format approved by the thesis editor in the Faculty of Graduate Studies (FGS).

4. Students who do not complete the thesis during their program will have five years from the beginning of the certificate program to fulfill this requirement for the master’s degree.

5. After conducting a degree audit, the program director completes and signs Form D, Statement of Completion of Requirements for Degree, verifying that all requirements for the M.S.D. degree have been met.

6. After a final degree audit, the associate dean for advanced education signs Form D, indicating approval of the award of the Master of Science (M.S.) degree. Form D is then submitted to the Faculty of Graduate Studies (FGS) for final approval and degree issuance.

**Dual majors**

The dual majors are no longer an option at this time.

Applicants to the programs in implant dentistry, periodontics, and prosthodontics have the option to select an extended program (approximately four-and-a-half years in length) to pursue dual majors in two of these areas of study.

Students must complete all the requirements of each ADA-recognized specialty program—periodontics (p. 239) and implant dentistry (p. 233), comparison (p. 243); or prosthodontics (p. 240) and implant dentistry (p. 233), comparison (p. 244)—to be eligible for board certification. Dual credit—up to 100 units—may be awarded for courses required by the two programs.

Individuals who wish to pursue the dual major option must indicate such interest by completing separate applications to both programs. Applicants in one of the optional dual major programs must not only meet the admissions requirements of each program, but must also be admitted to the advanced education programs they designate.

**Length of program**

- Periodontics and Implant Dentistry (approximately 4 1/2 years in length)
- Prosthodontics and Implant Dentistry (approximately 4 1/2 years in length)

**Endodontics — Certificate (post-D.D.S.), M.S.D., M.S.**

The mission of the 27-month Endodontics-Advanced Specialty Program is to prepare endodontists who are proficient in the art of treating teeth that require root canal therapy, who possess an in-depth biological knowledge related to the science of endodontics, and who have participated in endodontic research and teaching. The mission of the 36-month Endodontics-Advanced Program is to provide additional care for patients who have failed root canal treatment and require a single tooth implant. The 36-month program consists of the entire 27-month curriculum; as well as additional courses in periodontics, radiology, and implant dentistry (36-month track is currently closed for admission).

**Program learning outcomes**

By the end of this program, the graduate should be able to:

1. Diagnose and plan treatment for various pulpal and periapical conditions, alone or in concert with other dental and medical practitioners.

2. Demonstrate an advanced level of knowledge of the biomedical sciences related to endodontics and whole patient care.

3. Participate in endodontic research and teaching.

4. Identify and discuss the principles of good practice management.

5. Diagnose and treat patients with failed root canals who would benefit from surgical placement and restoration of a single tooth implant, when such care is needed.*

* Only applies to the 36-month program.

The programs begin in July and require 27 or 36 months in residence, depending on the specialty training pursued.

Following enrollment into the program, students may apply for acceptance to either the Master of Science (M.S.) or the Master of Science in Dentistry (M.S.D.) degree track, in addition to the specialty certificate. The application should be submitted at the beginning of the second year and must be supported by the program director. Admission into the M.S. or the M.S.D. degree track may extend the length of study; and the additional time must be in residence.

Graduates in both the certificate and graduate degree curricula are qualified for certification by the American Board of Endodontics.

Admissions

Application process
The Endodontics, Advanced Program participates in the Postdoctoral Application Support Service (PASS) of the American Dental Education Association, which allows applicants to apply to multiple participating institutions.

PASS applicants for the advanced education program in endodontics must also complete and submit a separate online application (<llu.edu/central/apply>) directly to Loma Linda University.

This program also will accept direct applications for individuals who are not applying to other institutions through PASS.

Application deadline
Application for admission should be submitted by August 1 of the year prior to the summer of intended enrollment.

Tuition
Tuition and fees for the 2019-20 academic year (effective July 1, 2019) is approximately $18,000.00 per quarter and is subject to change. Tuition is adjusted annually every July 1st. These fees do not include instruments and textbooks that may be required. A separate fee of $1,000 is charged for GRDN 632 Basic Microsurgery Techniques, taken by students during the first quarter.

1 Units for clinic practice courses do not count toward minimum number of graduate units required for the degree.

**Implant Dentistry — Certificate (post-D.D.S.), M.S.D., M.S.**

The Implant Dentistry-Advanced Speciality Program leads to a certificate. Postdoctoral students may also obtain a Master of Science (M.S.) or a Master of Science in Dentistry (M.S.D.) degree. The program is designed to prepare the student for the practice of implant dentistry and to provide the foundation for the continued acquisition of knowledge and clinical skills in this demanding area.

Implant dentistry interfaces with the dental specialties of oral and maxillofacial surgery, prosthodontics, and periodontics. The student will be expected to achieve advanced knowledge and skills in certain aspects of all these dental specialties and to be proficient in implant prosthodontics and implant surgery. Program content is designed to prepare the student for certification by the American Board of Oral Implantology/Implant Dentistry; and, upon application, s/he may be qualified as an associate fellow of the American Academy of Implant Dentistry.

The program starts July 1. Required residence for the certificate is 36months.

Following enrollment, students may apply for acceptance to either the M.S. or the M.S.D. degree track, in addition to the specialty certificate. The application should be submitted before the end of the first year and must be supported by the program director. Admission into the M.S. or the M.S.D. degree track may extend the length of study to complete a research project and a thesis or a publishable paper. The additional time must be in residence.

**Program learning outcomes**

By the end of this program, the graduate should be able to:

1. Deliver implant dentistry treatments.
2. Provide in-depth didactic and clinical instruction in problem based patient situations that require surgical and prosthetic dental implant solutions.
3. Identify and discuss concepts and guidelines in the implementation of clinical practice
4. Achieve highest levels of patient treatment satisfaction.
5. Perform research and practice teaching.

</table>
The Oral and Maxillofacial Surgery-Advanced Specialty Program is designed to prepare the resident for practice of the specialty and to provide the foundation for the continued acquisition of knowledge and skills. Clinical surgical health-care delivery is emphasized. The resident is introduced to research methodology and teaching to develop an increased awareness of its importance in assessing clinical procedures and patient management. The content of the program conforms to the Standards of the Commission on Dental Accreditation (CODA) and is designed to prepare the surgeon for certification by the American Board of Oral and Maxillofacial Surgery.

Four-year and six-year residency programs are available. Residents in the six-year program will also complete medical school and a transitional year, including general surgery rotations. Residency begins July 1.

**Program learning outcomes**

By the end of this program, the graduate should be able to:

1. Competently deliver health care.
2. Continually acquire skills and knowledge to improve health care.
4. Demonstrate a level of academic achievement sufficient to enter into a teaching career, if desired.
5. Use the basic sciences in the practice of oral and maxillofacial surgery in a competent and skillful manner.
6. Integrate oral and maxillofacial surgical care with other medical and dental specialties in the health-care delivery system.
7. Conduct clinical investigation and/or research studies.
8. Practice the specialty based upon the highest moral and ethical standards.
9. Achieve a high degree of clinical proficiency in his/her specialty.
10. Document a broad and extensive level of surgical experience.
11. Administer inpatient and outpatient general anesthesia, local anesthesia, and sedation techniques.
12. Manage the administration of his/her practice.
13. Communicate effectively in public speaking, lecturing, and writing.
14. Demonstrate critical thinking—providing a foundation to become an effective student and mentor.
15. Assess and treat problems of the maxillofacial region. This includes dentoalveolar surgery, maxillofacial trauma, reconstructive surgery, pathology, and orthognathic/craniofacial surgery.

**Program director**

Jayini S. Thakker
Admissions
Application process
The Oral and Maxillofacial Surgery, Advanced Program participates in the Postdoctoral Application Support Service (PASS) of the American Dental Education Association (ADEA), which allows applicants to apply to multiple participating institutions.

PASS applicants for the advanced education program in oral and maxillofacial surgery must also complete and submit an online application (<llu.edu/central/apply>) directly to Loma Linda University.

The advanced education program also participates in the Postdoctoral Dental Matching Program (Match). This program identifies and “matches” the preferences of applicants and the advanced education program, using a rank order list submitted by the applicant and the program. A Match application (<https://portal.passweb.org/>) is also required.

Application deadline
Application for admission should be submitted by September 15 of the year prior to the summer of intended enrollment. Applicants to the six-year program must also apply to the School of Medicine.

Applicants are required to have their California dental licenses at the time of matriculation into the program.

Tuition
Fees will be charged but tuition will be waived for 2019-2020 academic year. Residents are paid a stipend during training.

Total Units: 82

1 Units for clinic practice courses do not count toward minimum number of didactic units required for the degree.

Normal time to complete the program
Certificate—four (4) years (48 months) — full-time enrollment required
Certificate/M.D.—six (6) years — full-time enrollment required

Orthodontics and Dentofacial Orthopedics — Certificate (post-D.D.S.), M.S.

Orthodontics and dentofacial orthopedics program goals
1. Students will have course work in biomedical sciences that is intended to provide the knowledge required to practice orthodontics and dentofacial orthopedics, as defined by the program’s proficiency standards.
2. Students will have a clinical experience that is varied and demanding; and that will prepare them for the clinical practice of orthodontics and dentofacial orthopedics, with emphasis on bioprogressive principles.
3. Students will perform research that provides them with experience involving problem solving, critical thinking, research methodology, and scientific writing.
4. Students will be exposed to and participate in a teaching experience.
5. Students will be exposed to professional venues that encourage continued professional growth.

All of the above goals are designed to prepare the student for a specialty practice in orthodontics or for pursuing a teaching career. The content of the program conforms to the standards developed by the specialty
Program learning outcomes
By the end of the program, the graduate should be able to:

1. Develop technical competence in orthodontics.
2. Correlate basic natural sciences with the practice of orthodontics.
3. Demonstrate analytical thinking.
4. Perform clinical research.
5. Demonstrate responsibility toward the patient and the community.
6. Contribute to the growth and stature of the profession.
7. Collaborate with individuals in other allied professional disciplines.

The master’s degree curriculum requires a minimum of 27 months in residence, beginning in late June. Additional time may be required, depending on the research selected.

Admission
Candidates apply for admission to the Master of Science (M.S.) degree program and also have the option of applying later for a certificate.

All applicants must meet the admission requirements (p. 24) of Loma Linda University.

This program does not participate in the Postdoctoral Application Support Service (PASS) of the American Dental Education Association (ADEA), which allows applicants to apply to multiple participating institutions or the MATCH program.

Application deadline
All applications for admission should be submitted to the school by August 1 of the year prior to the summer of intended enrollment.

Tuition
Tuition and fees for the 2019-20 academic year (effective July 1, 2019) is approximately $18,000.00 per quarter and is subject to change. Tuition is adjusted annually every July 1 st. These fees do not include instruments and textbooks that may be required

Normal time to complete the program
2.25 years (27 months) — full-time enrollment required

Total Units 56

1 Units for clinic practice courses are in addition to the minimum didactic units required for the degree.
Pediatric Dentistry – Certificate (post-D.D.S.), M.S.D., M.S.

The Pediatric Dentistry-Advanced Specialty Program is designed to prepare the resident as a specialist in this area of dentistry. The curriculum leads to a certificate in pediatric dentistry. Clinical pediatric dentistry is emphasized; however, this clinical experience is balanced with a didactic curriculum of multidisciplinary courses and seminars. There is also a research component designed to expose the resident to problem solving using the scientific method. The program requires a minimum of 24 months in residence beginning July 1, and fulfills the requirements for initiating the process of certification by the American Board of Pediatric Dentistry.

Following enrollment into the program, residents may additionally apply for acceptance into either the Master of Science (M.S.) or the Master of Science in Dentistry (M.S.D.) degree program. The application should be submitted before the end of the first year and must be endorsed by the program director. Admission into the M.S. or the M.S.D. degree track may extend the length of study. The additional time must be in residence.

Program learning outcomes
By the end of this program, the graduate should be able to:

1. Proficiently provide comprehensive, preventive, and therapeutic oral health care for infants and children through adolescence, including those with special health-care needs.
2. Meet the standards set forth by the Commission on Dental Accreditation.
3. Practice pediatric dentistry.
4. Participate in pediatric dental research.
5. Participate in teaching pediatric dentistry.
6. Be prepared for certification by the American Board of Pediatric Dentistry.

Admissions
Application process
The Pediatric Dentistry Advanced Program participates in the Postdoctoral Application Support Service (PASS) of the American Dental Education Association (ADEA), which allows applicants to apply to multiple participating institutions. A PASS application (<https://portal.passweb.org>) is required.

PASS applicants for the advanced education program in pediatric dentistry must also complete and submit an online application (<llu.edu/central/apply>) directly to Loma Linda University.

The Pediatric Dentistry Advanced Program also participates in the Postdoctoral Dental Matching Program (MATCH). This program identifies and "matches" the preferences of applicants and advanced education programs, using a rank order list submitted by the applicant and the program. A Match application (<https://portal.passweb.org>) is also required.

For admission requirements, please refer to the Program's website: <http://www.llu.edu/dentistry/pediatrics/graduateprogram.page>.

Application deadline
Application for admission should be submitted by October 1 of the year prior to the summer of intended enrollment.

Tuition
Tuition and fees for the 2019-20 academic year (effective July 1, 2019) is approximately $18,000.00 per quarter and is subject to change. Tuition is adjusted annually every July 1st. These fees do not include instruments and textbooks that may be required.

**Program learning outcomes**

By the end of this program, the graduate should have been able to:

1. Use the science of periodontics, the literature, periodontal pathology, and the history and current rationale for performing clinical procedures in periodontics.
2. Perform at the level of proficiency the full range of clinical procedures that are considered essential to establish a specialty practice in the field of periodontics.
3. Design, conduct, and report a periodontal research project.
4. Become a diplomate of the American Board of Periodontology.
5. Teach in didactic and clinical areas of predoctoral periodontics at the level of a junior faculty member, with the intent of enhancing their ability to communicate with peers.
6. Successfully complete the American Board of Periodontology Certification Examination.
7. Achieve successful careers in clinical practice, research, and/or dental education.

**Admissions**

**Application process**

The Periodontics, Advanced Program participates in the Postdoctoral Application Support Service (PASS) of the American Dental Education Association (ADEA), which allows applicants to apply to multiple participating institutions.

All applicants to the advanced education in periodontics program must complete and submit an online application (<llu.edu/central/apply>) directly to Loma Linda University. A PASS application is available (<https://portal.passweb.org/>), but not required.

The program has a rolling admissions policy. Candidates will be selected for admission during the application period until the class is filled. Once the class has been filled, an announcement will be posted on the program’s description on the Loma Linda University School of Dentistry Web site, and the admissions process will be closed for the year.

**Application deadline**

Application for admission should be submitted to the program by September 1 of the year prior to the summer of intended enrollment.
Tuition

Tuition and fees for the 2019-20 academic year (effective July 1, 2019) is approximately $18,000.00 per quarter and is subject to change. Tuition is adjusted annually every July 1st. These fees do not include instruments and textbooks that may be required. A separate fee of $1,000 is charged for GRDN 632 Basic Microsurgery Techniques, taken by students during the first quarter.

Normal time to complete the program

Three (3) years — full-time enrollment required (this includes the time needed to complete the certificate program).

Prosthodontics — Certificate (post-D.D.S.), M.S.D., M.S.

The School of Dentistry’s Prosthodontics, Advanced Specialty Program is designed to increase the knowledge base and clinical and laboratory skills of the student in all areas of prosthodontics. In addition to conventional fixed and removable prosthodontics, this program offers considerable experience in implant prosthodontics esthetic dentistry. It also provides an introduction to maxillofacial prosthetics, and the diagnosis and treatment of patients with temporomandibular dysfunction. Comprehensive interdisciplinary treatment-planning seminars with students and faculty members of other advanced dental education programs are designed to prepare the student to interact with and coordinate the treatment of patients requiring advanced prosthodontic care.

The program begins in July 1 and requires 36 months in residence to complete the certificate requirements.

Following enrollment into the program, students may additionally apply for acceptance to either the Master of Science (M.S.) or the Master of Science in Dentistry (M.S.D.) degree. The application must be supported by the program director. Admission into the M.S. or the M.S.D. degree track may extend the length of study; the additional time must also be in residence.

Program learning outcomes

By the end of this program, the graduate should be able to:

1. Proficiently deliver prosthodontic care.
2. Perform at the level of proficiency for the full range of clinical procedures that are considered an integral part of prosthodontics.
3. Utilize experienced, highly competent faculty who are recognized by the specialty.
4. Manage patients’ prosthetic needs successfully so that the patients are satisfied, comfortable, and acceptably treated in a timely, efficient manner.
5. Perform research and practice teaching.
6. Participate in prosthodontics dental teaching.
7. Participate in continued professional growth.
8. Act as an emissary for the School of Dentistry, the dental profession, and the specialty of prosthodontics

**Normal time to complete the program**

Four and one-half (4.5 years), full-time enrollment required
At Loma Linda University School of Medicine, we believe skilled and compassionate physicians heal more than a patient’s disease. They mend the mind, body and spirit of a patient in need. This tenet has been at the core of our mission for more than 100 years, and we strive to educate physicians, researchers, and medical professionals who are committed to whole person care.

In addition to our medical school program, we offer a broad spectrum of graduate education opportunities, including combined degree programs, postgraduate residencies and fellowships, and continuing medical education for physicians beyond their formal academic years.

Our faculty members have pioneered transplantation, epigenetics, and translational research—among other fields—by bringing together clinicians, researchers and bright young students. Their promise to develop lifelong learners has led our graduates to advance medical care around the world.

In the School of Medicine, you will be immersed in the ever-changing field of medicine and will be entrusted with the gift of improving the lives of others. We welcome your curiosity.

Tamara Thomas, M.D.
Dean, School of Medicine
Doctor of Medicine degree/Oral and Maxillofacial Surgery Program requirements

The Doctor of Medicine degree/Oral and Maxillofacial Surgery Program (M.D./OMS) is designed to provide an opportunity for qualified dentists to obtain the Doctor of Medicine degree in a customized, three-year period. Clinical surgical health-care delivery is emphasized. The program content conforms to the standards of the Commission on Accreditation and is designed to prepare the oral surgeon for certification by the American Board of Oral and Maxillofacial Surgery. Oral and maxillofacial surgery residents begin their residency program on the OMS service. They subsequently enter the second year at Loma Linda University School of Medicine with advanced standing. Residents then complete the second, third, and fourth years of medical school. The third year of the M.D./OMS curriculum consists of required clerkships in acute care, emergency medicine, a subinternship in ENT, and whole person care. An additional 30 units of electives, which include anesthesia and oral and maxillofacial surgery, complete the third year of the medical program. The graduate then enters a one-year general surgery internship, followed by two years of oral and maxillofacial surgery residency.

Graduate combined degrees programs

Loma Linda University is committed to fostering the investigative skills of its medical students. Students interested in pursuing careers in academic medicine and medical research may wish to enroll in one of the combined degrees programs.

Combined degrees (M.D./M.S. or M.D./Ph.D.)—SM/GS

The M.D./Ph.D. combined degrees program is available through the School of Medicine. It includes many of the features of the Medical Scientist Program. Students in the combined degree program complete the first two years of the standard medical curriculum. This is followed by three or more years of graduate course work and research to qualify for a Ph.D. degree, or at least one year for an M.S. degree, before commencing the last two years of the medical school curriculum—the clinical training—for the Doctor of Medicine degree. Majors are offered in anatomy, biochemistry, microbiology and molecular genetics, physiology, and pharmacology.

For the M.D./M.S. and M.D./Ph.D. combined degrees programs, the prerequisites and Graduate Record Examination requirements are similar to those described for the Medical Scientist Program, except that biochemistry is not required.

Medical Scientist Program (M.D./Ph.D.)

Loma Linda University is committed to fostering the investigative skills of its medical students. Students interested in pursuing careers in academic medicine and medical research may wish to enroll in the Medical Scientist Program.

Tuition assistance for the M.D. portion of the combined degrees program is not given to all students working toward both degrees. Assistance for the M.D. portion will be given only in cases where an applicant has received approval from the School of Medicine M.D./Ph.D. Admissions Committee prior to beginning the M.D. course work. Assistance will be in the form of an institutional loan that will cover M.D. tuition and fees but will not include living expenses. The School of Medicine makes provision for the loan to be forgiven when a recipient meets the terms described below and in the loan agreement.

Loans for the first two years of the M.D. curriculum may be canceled when a student completes an M.S. or Ph.D. degree within the time schedule described below and according to the terms of the loan agreement. Loans for the third and fourth years of the M.D. curriculum may be canceled when a student completes the Ph.D. degree within the time schedule described below and according to the terms described below and according to the terms of the loan agreement.

The Medical Scientist Program is designed to develop a student’s independence and competence as an investigative scientist and clinician. It provides students with a broad educational base for the practice of medicine and medically related research. The program is administered by the School of Medicine in cooperation with the Faculty of Graduate Studies. (See Medical Scientist Program in the Combined Degrees Programs after the general information for the School of Medicine.)

Residency programs

Loma Linda University is affiliated with a variety of accredited residency programs in two sponsoring institutions. The first is Loma Linda University Medical Center, and the second is Loma Linda-Inland Empire Consortium for Healthcare Education. All specialties and a variety of subspecialty programs are offered. Additional nonaccredited fellowships are available.

Graduate physicians wishing to apply for entrance into these programs should contact the director of the program. Graduate dentists who seek residencies in dental anesthesia, endodontics, oral implantology, orthodontics, pediatric dentistry, periodontics, and prosthodontics should apply directly to the School of Dentistry.

Research centers

Basic science investigation is advanced, and patient treatment is enhanced through the ground-breaking research conducted in several centers housed within the School of Medicine.

Center for Health Disparities and Molecular Medicine

The mission of the Center for Health Disparities and Molecular Medicine (CHDMM) is to eliminate health disparities through research, education, and community engagement. Faculty members at the CHDMM use modern molecular genetics and cell biology approaches; community based participatory research; and precision medicine to investigate the causes of health disparities, how they are developed, and promising strategies to address them. Current research efforts at the center examine the influence of the augmented state of cellular oxidative stress and inflammatory pathways on cell death and survival as it pertains to cancer, diabetes, and neurological health disparities. The goal is to define novel molecular determinants and biomarkers associated with these health disparities, leading to the development of innovative clinical and community interventions aimed at eliminating or reducing them. The educational mission of the center is to train a diverse group of graduate students, medical students, and postdoctoral scientists to develop an inclusive biomedical workforce. Further, through partnering with community-based organizations, the CHDMM aims to develop healthy and whole communities through the implementation of evidence based prevention initiatives and programs.

Center for Perinatal Biology

The primary research focus of the Center for Perinatal Biology is investigation of molecular and epigenetic mechanisms of fetal
The majority of the funding to support this research is derived from competitive grants awarded by the National Institutes of Health (NIH); additional funding is provided by the National Science Foundation and other agencies. The biomedical scientists in this internationally renowned research center also teach basic science courses in the School of Medicine and graduate courses in their disciplines. The graduate courses include physiology/pharmacology, gynecology/obstetrics, pathology/human anatomy, biochemistry/microbiology, and pediatrics.

The center is an ideal environment for graduate students, postdoctoral fellows, and beginning investigators who spend from two-to-four years in research and training in fields related to developmental biology and physiology. Visiting scholars from other universities also work in the center during sabbaticals or other interims.

Neuroscience Research Center

The major goal of the Center for Neuroscience Research is to conduct translational research. Its goals are met by the research and development of new biologically and technologically advanced diagnostic procedures, minimally invasive surgical techniques, and innovative hemostatic instrumentation. The center functions in collaboration with many well-known institutions, such as George Mason University, UCLA, and North Carolina State University.

The center has been the recipient of a five-year NIH competitive grant to determine the role of iron perturbations in metabolism in the pathogenesis of Alzheimer’s disease, as well as grants for proteomic study of schizophrenia. The center’s multidisciplinary work involves collaborations among faculty members within the biochemistry, radiology, cell and molecular biology, radiobiology, psychiatry, geriatric medicine, and biostatistics disciplines. The center is also interested in the development of new hemostatic agents that involve the control of hemorrhage. To this end, it has developed new procoagulants and surgical devices in collaboration with industry. The center works in close collaboration with industrial resources for both testing and development of new surgical instrumentation. The director of the center holds numerous international and United States patents on surgical instruments and other devices.

Awards

Bernard D. Briggs Award

The Bernard D. Briggs Award is presented to an outstanding medical student entering the field of anesthesiology who exhibits the dedication, enthusiasm, and commitment of the visionary physician and distinguished mentor for whom it is named.

General regulations

Students of the University are responsible for informing themselves of and satisfactorily meeting all regulations pertinent to registration, matriculation, and graduation. Section III gives the general setting for the programs of each school and outlines the subject and unit requirements for admission to individual professional programs. It is important to review specific program requirements in the context of the general requirements applicable to all programs.

Student life

The information on student life contained in this CATALOG is brief. The Loma Linda University Student Handbook more comprehensively addresses University and school expectations, regulations, and policies; and is available on the University Web site as <llu (http://www.llu.edu/assets/central/handbook/documents/Student-Handbook.pdf), edu/student-handbook> (http://www.llu.edu/assets/central/handbook/documents/Student-Handbook.pdf). All students are expected to familiarize themselves with the contents of the Student Handbook—including the section that pertains specifically to the School of Medicine—and to abide by its policies. Additional information regarding policies specific to the School of Medicine are provided by the school at the orientation to each academic year. Students who have questions about the Student Handbook should contact the associate dean for student affairs. Students in the School of Medicine’s Integrated Biomedical Graduate Studies Program are expected to familiarize themselves with the document Student Guidelines, Policies and Procedures, Integrated Biomedical Graduate Studies; and students in programs associated with the School of Medicine’s Earth and Biological Sciences are expected to familiarize themselves with the document Earth and Biological Sciences Graduate Student Handbook. These documents contain policies and procedures specific to the individual graduate programs and are given to students at orientation. These documents may also be requested from the Office of the Assistant Dean for Student Affairs in the Graduate Program and from the individual program directors. Students in the Pathologists’ Assistant Program are expected to familiarize themselves with the document Student Handbook Pathologists’ Assistant Program. These documents contain policies and procedures specific to the Pathologists’ Assistant program and are given to students at orientation. These documents may also be requested from the office of the Program Director of the Pathologists’ Assistant Program.
Robert F. Chinnock Award
The Robert F. Chinnock Award is presented annually to a student who has demonstrated outstanding performance in clinical and academic pediatrics.

Daniel D. Comstock Award
The Daniel D. Comstock Award is given annually to the senior student with the most distinguished performance in internal medicine. Selection is based on scholarship, interest in science, skill, devotion to patient care, and personal attributes of dependability and integrity— as demonstrated by the physician, Daniel D. Comstock, for whom the award is named.

The Departmental Advising Award
The Departmental Advising Award is given annually by the dean’s office to the clinical department that has provided outstanding career counseling and extra support to help students achieve their career aspirations.

Distinguished Student in Radiology Award
The Distinguished Student in Radiology Award is given to the student who is devoted to the field of radiology as evidenced by their distinguished service, exceptional performance, and commitment to pursuing radiology as a career.

Donald E. Griggs Award
The Donald E. Griggs Award is presented annually to a senior student selected for meritorious scholarship and service—the highest grade in the clinical rotations of medicine— reflecting those qualities demonstrated by the physician and teacher for whom the award is named.

David B. Hinshaw, Sr., Award
The David B. Hinshaw, Sr., Award is presented annually to a senior student who has demonstrated outstanding qualities of leadership and scholarship and who is entering a categorical surgery residency program with the intention of pursuing a career in general surgery.

Guy M. Hunt Award
The Guy M. Hunt Award is presented annually by the Department of Neurology to a senior student who combines outstanding academic achievement and the spirit of gentle caring that was exemplified by Dr. Hunt.

Harold J. Hoxie Award
The Harold J. Hoxie Award is presented by the Department of Medicine to a senior medical student whose meritorious scholarship, exceptional performance in medicine with emphasis in research, and service reflect those qualities demonstrated by the physician and teacher for whom the award is named.

Benjamin Kovitz Award
The Benjamin Kovitz Award is presented to a senior medical student who has demonstrated qualities of leadership and scholarship in the field of psychiatry.

Walter P. Ordelheide Award
The Walter P. Ordelheide Award is given annually by the Department of Family Medicine to a senior student who has demonstrated outstanding scholarship and leadership, and who has fostered the promotion and advancement of family medicine.

President’s Award
The President’s Award, established in 1960, is presented annually in recognition of superior scholastic attainment and active participation in the student community, within the framework of Christian commitment. One recipient is selected from each school.

Society for Academic Emergency Medicine Award
The Society for Academic Emergency Medicine Award is presented to the senior medical student who has demonstrated excellence in the specialty of emergency medicine.

Varner J. Johns, Jr., Award
The Varner J. Johns, Jr., Award is given to a graduating senior who is recognized as an outstanding student with the potential of becoming a future faculty member in the Department of Medicine.

Alumni Association—Herber Award
The School of Medicine Alumni Association Award is given annually to students who demonstrate outstanding leadership in furthering the mission of Loma Linda University School of Medicine.

Wil Alexander Whole Person Care Award
The Wil Alexander Whole Person Care Award recognizes a senior medical student who, during the clinical years, has demonstrated to his/her peers and colleagues a growing excellence in the physical, mental, emotional, spiritual, and relational care of his/her patients as part of the art of medical practice.

Alpha Omega Alpha Honor Society
Fourth-year students are recommended for membership in the national honor medical society, Alpha Omega Alpha. Membership is determined based on scholastic, professional, and personal performance. The School of Medicine was granted a charter for establishing the Epsilon Chapter on April 1, 1957.

Roger W. Barnes Award
The Roger W. Barnes Award is presented to a senior student who has demonstrated to an unusual degree the qualities of compassion, kindness, and humility— as exhibited by the physician and teacher for whom the award is named.

Harold F. Ziprick Award
The Harold F. Ziprick Award is presented annually by the Department of Gynecology and Obstetrics to a senior student in recognition of overall academic achievement and clinical performance in gynecology and obstetrics, as demonstrated by the physician and teacher for whom the award is named.

Distinguished Student in Emergency Medicine Award
The Distinguished Student in Emergency Medicine Award is given by the department to a senior student who is devoted to emergency medicine and committed to pursuing it as a career.

Distinguished Student in Preventive Medicine Award
The Distinguished Student in Preventive Medicine Award is given to a senior student who has demonstrated exceptional performance in preventive medicine and is committed to pursuing it as a career.

Philip H. Reiswig Award
The Philip H. Reiswig Award is presented to a senior student entering the field of orthopaedic surgery who exhibits the dedication, enthusiasm, and commitment of the physician- leader for whom it is named.

Financial information
The Office of the Dean is the final authority in all financial matters and is charged with the interpretation of all financial policies. Any exceptions to published policy regarding reduction or reimbursement of tuition must be approved by the dean. Any statement by individual faculty members, program directors, or department chairs regarding these matters is not binding on the school or the University unless approved by the dean.
Registration is not complete until tuition and fees on the required installment are paid; therefore, the student should be prepared to make these payments during scheduled registration for each academic year. There may be adjustments in tuition and fees as economic conditions warrant.

**General financial practices**

The student is expected to arrange for financial resources to cover all expenses before the beginning of each school year. Previous accounts with other schools or this University must have been settled.

**Veteran’s benefits**

A student eligible to receive veteran’s benefits under the current enactment should contact the Office of University Records within the first week following registration.

Under Title 38 of the U.S. Code, Loma Linda University is approved for the training of veterans and other eligible persons. Information regarding eligibility for any of these programs may be obtained by calling 1-888/GIBILL1.

Application for benefits must be made directly to the VA and may be done via the Web. The Office of University Records serves as the certifying official for Loma Linda University. Students should contact the certifying official prior to their first enrollment certification. For more information, open links to the VA Web site at <llu.edu/central/students/veterans.page>.

**Schedule of charges**

**Tuition**

$56,044  Full time

**Fees**

$3,568*  For years 1 and 2: student services, information services, Drayson Center, etc.

$3,908*  For years 3 and 4: student services, information services, Drayson Center, etc.

**Supplies and instruments (estimated)**

$3,200*  Per school calendar year

$1000*  First-year medical equipment

* Fees subject to change

**Living expenses (estimated)**

Students should contact the Office of Financial Aid for current living allowance information <finaid@llu.edu> or 909/558-4509.

**On- and off-campus student housing**

Students may go to <llu.edu/central/housing> for housing information and a housing application form.

**Special charges 2018-2019**

$75  Supplemental application (nonrefundable), in addition to AMCAS fee

$100  Acceptance deposit

$100  Late payment fee

cost  Health-care items not covered by health fee or insurance

cost  Library fine or loss, parking fine, property breakage or loss

cost  Health coverage for spouse and family

$200  Late registration (beginning first day after published term begin date)

$25  Returned check fee

**Programs**

- Anatomy—M.S., Ph.D (p. 281)
- Biology - M.S. (p. 265), Ph.D. (p. 265)
- Biomedical Sciences - M.M.S. (p. 285)
- Cancer, Developmental and Regenerative Biology — M.S., Ph.D. (p. 253)
- Earth Science - Ph.D. (p. 269)
- Environmental Sciences - B.S. (p. 271)
- Geology - B.S. (p. 274), M.S. (p. 277)
- Infection, Immunity, and Inflammation — M.S., Ph.D. (p. 256)
- Medical Scientist—M.D. and Ph.D. (p. 289)
- Medicine—M.D. (p. 290)
- Natural Sciences - M.S. (p. 279)
- Neuroscience, Systems Biology, and Bioengineering — M.S. Ph.D. (p. 259)
- Pathologists’ Assistant — M.H.S. (p. 284)
Graduate

Mission
It is the mission of the Loma Linda University basic sciences programs to further the teaching and healing ministry of Jesus Christ by fostering scholarly excellence leading to the discovery, integration, and dissemination of biomedical knowledge.

General information
The basic sciences of the School of Medicine offer graduate programs with emphases in anatomy, biochemistry, microbiology, pharmacology, and physiology. The Ph.D. degree curriculum is designed to prepare students for careers in independent research and teaching in academic or biotechnology settings. Students may enter any of these five Ph.D. degree curricula by applying to the Integrated Biomedical Graduate Studies Program. After completing a common first-year core curriculum, students will select a program and a mentor for the completion of their studies, during which advanced courses and laboratory work allow them to fully develop an area of research interest and expertise. Students usually rotate through up to three research laboratories before selecting a research advisor.

The M.S. degree course of study provides education appropriate for technicians involved in biomedical research and for medical technologists seeking career advancement. A pathway to combined M.D./Ph.D. degrees is also offered.

Combined degrees
Combined degrees (Ph.D./M.D. and M.S./M.D.) options are also available. The combination of an M.S. degree with a professional degree provides additional content and research experience as a background for postgraduate medical or dental education. The combination of a Ph.D. degree with a professional degree prepares the student for a future in academic medicine or dentistry—combining research, teaching, and clinical practice.

The combined degrees are described at the end of Section III in this CATALOG.
Department of Basic Sciences

The Department of Basic Sciences in the School of Medicine offers graduate programs leading to M.S. and Ph.D. degrees in three areas through the Integrated Biomedical Graduate Studies Program (IBGS). This program includes a common integrated first-year core curriculum that explores the biochemical, molecular, cellular, and physiological functions of living systems in a way that emphasizes analytical thinking and problem solving. During this first year, students also attend seminars and rotate through up to two research laboratories. After completing the first year of study, students select both a program and a laboratory from which they wish to obtain a degree. Advanced, discipline-specific courses are taken during the second year; and research leading to the publication of peer-reviewed articles and doctoral dissertation defense are carried out between the time a research laboratory is selected and the completion of the degree.

General regulations

First-year curriculum (Ph.D. degree)
The first-year curriculum includes a course sequence taught by interdisciplinary faculty that integrates all the disciplines of the biomedical basic science areas—moving from molecules through cellular mechanisms to integrated systems. In addition, a supplemental course covers research-related topics—such as scientific communication and integrity, information handling and statistics, as well as successful grant proposal writing. Students learn of new developments in the biomedical sciences through weekly seminars, and they gain presentation skills of their own in a weekly student presentation seminar series. During the subsequent years, formal courses continue to broaden and integrate into a meaningful whole an understanding of the clinical consequences of cellular events.

Religion requirement
Students in the Master of Science (M.S.) degree curricula are required to complete one, three-unit, graduate-level religion course (RELT 617 Seminar in Religion and the Sciences). Students in the Ph.D. degree curriculum are required to complete three graduate-level religion courses.
of three or more units each. These must include RELT 617 Seminar in Religion and the Sciences; as well as RELT 525 Ethics for Scientists and RELR 588 Personal and Family Wholeness. A course in biblical studies (RELT 559 New Testament Thought, RELT 560 Jesus the Revealer: The Message of the Gospel of John, RELT 564 Apostle of Hope: The Life, Letters, and Legacy of Paul, or RELT 565 Vision of Healing: The Message of the Book of Revelation) may be substituted for either the ethical or relational course.

Research units
A student will, at all times, have registration in research units. An IP will be assigned until the student registers for new units. The units should be spread out over the course of time it takes to complete thesis or dissertation research satisfactorily. An IP may not be carried for longer than five quarters.

Admissions
In addition to Loma Linda University (p. 24) application requirements, the applicant must also complete the following prerequisites:

- a bachelor’s degree from an accredited U.S. college or the equivalent from an international university.
- general test of the Graduate Record Examination (GRE): A total (verbal plus quantitative) score of no less than the sum of the scores corresponding to the 50th percentile of each, with neither score less than the 35th percentile; analytical writing 4.0. GRE scores older than five years from the date of matriculation are not considered.
- a full year of each of the following undergraduate courses:
  - general biology
  - general chemistry
  - organic chemistry
  - general physics
  - biochemistry (a minimum of one quarter/semester)

Strongly Recommended:

- upper division biology (such as cell and molecular biology)
- a full year of biochemistry with labs
- research experience
- calculus
- computer programming experience (neuroscience, systems biology and bioengineering program)

PLEASE NOTE: CLEP (College-Level Examination Program), pass/fail performances, and online classes are not acceptable for the science-required courses. Additionally, science credits earned in professional schools (e.g., allied health professions, business, dentistry, nursing or pharmacy) do not fulfill requirements for admissions to the graduate program.

The program reserves the right to decide on the equivalence of courses presented by the applicant.

Programs
- Cancer, Developmental and Regenerative Biology — M.S., Ph.D. (p. 253)
- Infection, Immunity, and Inflammation — M.S., Ph.D. (p. 256)
- Neuroscience, Systems Biology, and Bioengineering — M.S. Ph.D. (p. 259)

Cancer, Developmental and Regenerative Biology — M.S., Ph.D.

Co-program directors
Mary Kearns-Jonker
Julia Unternaehrer-Hamm

The School of Medicine offers basic sciences curricula leading to the Master of Science and Doctor of Philosophy degrees. The core curriculum provides a broad background in molecular biology, cell biology, and biochemistry. Advanced courses allow each student to fully develop an area of interest.

Research strengths of the program include: cancer biology (prostate, breast, thyroid, ovarian, cervical, pancreatic, leukemia), molecular mechanisms controlling normal development and regeneration, stem cell-based cardiovascular repair, oxidative stress in mechanism of anticancer agents, stem cell delivery of gene therapy for regenerative medicine, neuronal injury and axonal regeneration, transcriptional regulation, normal and malignant immune cell development and function, nanoparticles for therapeutic applications, cellular and molecular mechanisms of cardiovascular diseases and aging, plasticity and interconnection between normal and cancer stem cells, miRNA regulation in ovarian cancer and early development, epigenomic/ transcriptomic reprogramming and longevity, calcium signaling during lung development, developmental programming of health and disease, stem cell reprogramming, and genome editing.

The thesis or research Master of Science degree provides training for individuals who will become technicians involved in biomedical research in universities or in the biotechnology industry. The non-thesis Master of Science degree provides content appropriate for secondary teachers seeking advanced training in areas such as molecular biology, cancer biology, developmental biology, and regenerative medicine, and for students seeking admission to a professional school, such as medicine or dentistry.

The Doctor of Philosophy degree is designed to prepare students for careers in independent research and teaching in a university, clinical, or biotechnology environment. Doctoral degree students are expected to develop creativity and independence in addition to technical skills.

Program learning outcomes

By the end of this program, the graduate should be able to:

1. Demonstrate a broad knowledge of the biomedical sciences.
2. Demonstrate subject mastery in cancer, developmental, or regenerative biology.
3. Interpret the current literature in the field.
4. Design hypothesis-driven studies to address key questions in the field.
5. Make original contributions to the body of biomedical knowledge.
6. Demonstrate the principles of scientific and professional ethics.
7. Write effective scientific publications and grant proposals.*

* This outcome is not applicable to M.S. degree students.

M.S. requirements

A minimum of 45 units is required for the M.S. degree, as detailed in the table below. Two options, a research track and a course work track,
are available. Students must maintain a G.P.A. of at least 3.0. Students must adhere to all University and program policies as published in the Student Handbook, University CATALOG, or Student Guide. Policies and requirements are subject to change.

**Electives:**

- Choose from the following and other courses as approved by advisor:
  - BCHM 550  Clinical Exposure in Oncology
  - BCHM 530  Biochemical Basis of Human Disease SM
  - IBGS 525  Translational Research Training
  - IBGS 537A Special Topics in Biomedical Sciences

### Noncourse requirements

Course work track: a comprehensive written examination over the graduate course work in lieu of preparing a thesis.

Research track: pass an oral examination given by his/her graduate guidance committee after the thesis has been completed.

### Normal time to complete the program

Two (2) years — based on full-time enrollment; part time permitted

### Comparison

See the comparison (p. 255) of the M.S. and Ph.D. degree programs.

### Ph.D. requirements

For the Ph.D. degree, students must complete a minimum of 61 units— as detailed in the table below—and must maintain a G.P.A. of at least 3.0. Students must adhere to all University and program policies as published in the Student Handbook, University CATALOG, or Student Guide. Policies and requirements are subject to change.

2 May substitute with another graduate religion course with the same prefix and numbered 500 or above.

**Noncourse requirements**

- pass written and oral comprehensive examinations in order to advance to candidacy.
- successfully defend the dissertation before their guidance committee prior to being awarded the Ph.D. degree.

**Normal time to complete the program**

Four (4) years — full-time enrollment, part-time permitted

**Comparison**

See the comparison (p. 255) of the M.S. and Ph.D. degree programs.
**Infection, Immunity, and Inflammation — M.S., Ph.D.**

**Program director**
Kimberly Payne

**Associate program director**
Mark Johnson

The core curriculum provides a broad background in molecular biology, immunology, and medical microbiology and infectious diseases. Advanced courses allow each student to fully develop an area of interest. Research strengths of the program include: signal transduction in bacteria, molecular genetics of virulence in bacteria, mechanisms of oxidative stress resistance, mechanisms of cell death, cellular and tumor immunology, normal and malignant immune cell development, autoimmunity, chaperonins and protein folding, mechanisms of posttranslational modification, and DNA restriction modification.

The thesis or research Master of Science degree provides training for individuals who will become technicians involved in biomedical research in universities or in the biotechnology industry, and for medical technologists seeking specialized research training. The non-thesis Master of Science degree provides content appropriate for medical technologists preparing for the specialist in microbiology certification; for secondary teachers seeking advanced training in areas such as molecular biology, immunology, or microbiology; and for students seeking admission to professional schools, such as medicine or dentistry.

The Doctor of Philosophy degree is designed to prepare students for careers in independent research, and teaching in a university, clinical, or biotechnology environment. Doctoral degree students are expected to develop creativity and independence in addition to technical skills.

**Program learning outcomes**
By the end of the program, the graduate should be able to:

1. Demonstrate a broad knowledge of the biomedical sciences.
2. Demonstrate subject mastery in molecular, cellular, and integrative aspects of microbiology and immunity/inflammation.
3. Interpret the current literature in microbiology and immunity/inflammation.
4. Make original contributions to the body of biomedical knowledge.
5. Exhibit the principles of scientific and professional ethics.
6. Demonstrate the process of applying for external funding. *

*This learning outcome is not applicable to M.S. degree students.

**M.S. requirements**
A minimum of 45 units is required for the M.S. degree, as detailed in the table below. Two options, a research track and a course work track, are available. Students must maintain a G.P.A. of at least 3.0. Students must adhere to all University and program policies as published in the Student Handbook, University CATALOG, or "Student Guide." - IBGS 523 Cellular Mechanisms and Integrated Systems III Journal Club 2

IBGS 604 Introduction to Integrative Biology Presentation Seminar 1
IBGS 605 Integrative Biology Presentation Seminar 1 2
IBGS 607 Integrated Biomedical Graduate Studies Seminar 1 0

Religion
- RELE 525 Ethics for Scientists 3
- RELR 588 Personal and Family Wholeness 3
- RELT 617 Seminar in Religion and the Sciences 3

Program specific courses
Choose from the following: 12
- ANAT 548 Introductory Flow Cytometry 3
- MICR 515 Introduction to Bioinformatics and Genomics
- MICR 521 Medical Microbiology 2
- MICR 530 Immunology 3
- MICR 540 Physiology and Molecular Genetics of Microbes 2
- MICR 570 Mechanisms of Microbial Pathogenesis 2
- MICR 624 Special Problems in Microbiology
- MICR 625 Independent Study in Microbiology Literature (2-4)

Research
- IBGS 696 Research Rotations (1) 2
- IBGS 697 Research (1-7) 12
- IBGS 699 Dissertation (1-5) 2-5

Total Units 62

Available Electives
- ANAT 507 Stem Cell Biology and Medicine 4
- BCHM 515 Introduction to Bioinformatics 2
- BCHM 544 Advanced Topics in Biochemistry 2-4
- IBGS 525 Translational Research Training 2
- MICR 537 Selected Topics in Molecular Biology 2,3 1-3
- PHRM 584 Drug Metabolism and Biochemical Pharmacology 4

1 Registration and attendance required every quarter in residence, but units do not count toward total required for graduation.
2 Must take at least 3 units of course work with a clear microbiology focus.
3 Must take at least 3 units with a clear immunology focus.

Noncourse requirements
- pass both written and oral comprehensive examinations in order to advance to candidacy.
- successfully defend the dissertation before their guidance committee prior to being awarded the Ph.D. degree.

Normal time to complete the program
Five (5) years—based on full-time enrollment; part time permitted

Comparison
See the comparison (p. 258) of the M.S. and Ph.D. degree programs.

Neuroscience, Systems Biology and Bioengineering — M.S., Ph.D.

Program director
Michael Pecaut

Associate program director
Christopher Wilson

The core curriculum provides a broad background in molecular biology, immunology, and medical microbiology and infectious diseases. Advanced courses allow each student to fully develop an area of interest. Research strengths of the program include: cellular and systems neurosciences, bioinformatics, molecular biology, computational modeling, biostatistics and data analytics, radiation physics, functional/structural imaging, in vivo and in vitro physiology, as well as biomedical engineering.

The thesis or research option for the Master of Science degree provides training for individuals who will become technicians involved in biomedical research in universities or in the biotechnology industry, and for medical technologists seeking specialized research training. The nonthesis Master of Science degree option provides content appropriate for secondary school teachers seeking advanced training in areas such as neuroscience, systems biology, bioinformatics, medical imaging; and for students seeking admission to a professional school, such as medicine or dentistry.

The Doctor of Philosophy degree is designed to prepare students for a career in independent research and teaching in a university, clinical, or biotechnology environment. Doctoral degree students are expected to develop creativity and independence in addition to technical skills.

Program learning outcomes
By the end of this program, the graduate should be able to:

1. Articulate fundamental concepts in the biomedical sciences.
2. Integrate aspects of neuroscience, systems biology, or bioengineering.
3. Interpret the literature within neuroscience, systems biology, or bioengineering.
4. Demonstrate the principles of scientific and professional ethics
5. Make original contributions to the body of biomedical knowledge.
6. Explain the process of applying for external funding.

*This learning outcome does not apply to M.S. degree students.

M.S. requirements
A minimum of 45 units is required for the M.S. degree, as detailed in the table below. Two options, a research track and a course work track, are available. Students must maintain a G.P.A. of at least 3.0. Students must adhere to all University and program policies as published in the Student Handbook, University Catalog, or "Student Guide." Policies and requirements are subject to change.

**Bioengineering**

- Required core: (10 units)
  - NSBB 571 Engineering Analysis of Physiological Systems
  - NSBB 572 Cellular and Molecular Engineering
  - NSBB 575 Orthopaedic Regenerative Engineering and Mechanobiology
- Electives: (10-18 units)
  - NSBB 525 Bioengineering Journal Club
  - NSBB 579 Bioengineering Fabrication
  - NSBB 580 Medical Imaging Physics
  - NSBB 584 Medical Image Analysis
  - NSBB 585 Radiation Detectors for Medical Applications
  - NSBB 587 Radiation Therapy Physics

**Degree completion options**

- Coursework track: Electives (Choose 11 units from available electives listed in above areas of specialization)
- Research track: Elective (0-2 units)
  - NSBB 697 Research (8 units)
  - IBGS 698 Thesis (1-3 units)

**Total Units**: 45

**Noncourse requirements**

- Course work track: a comprehensive written examination over the graduate course work in lieu of preparing a thesis.
- Research track: pass an oral examination given by his/her graduate guidance committee after the thesis has been completed.

**Normal time to complete the program**

Two (2) years — based on full-time enrollment; part time permitted

**Comparison**

See the comparison (p. 262) of the M.S. and Ph.D. degree programs.

**Ph.D. requirements**

For the Ph.D. degree, students must complete a minimum of 70 units — as detailed in the table below — and must maintain a G.P.A. of at least 3.0.

Based on research dissertation focus, other courses may be required as recommended by the dissertation committee and approved by School of Medicine graduate academic affairs committee. Students must adhere to all University and program policies as published in the Student Handbook, University CATALOG, or "Student Guide." Policies and requirements are subject to change.

¹ Registration and attendance required every quarter in residence, but units do not count toward total required for graduation.

² At least 2 units must be in a techniques course and 2 units in a didactic literature-based course.
Department of Earth and Biological Sciences

Graduate degree programs

Master of Science and Doctor of Philosophy

The Department of Earth and Biological Sciences (EBS) within the School of Medicine at Loma Linda University offers Master of Science degrees in biology, geology, and natural sciences; Doctor of Philosophy degrees in biology and earth science; and Bachelor of Science degrees in geology and environmental sciences.

The goal of the department is to provide students with the best possible opportunities for graduate study in these areas; with strong preparation for careers in the application of research in, or teaching of biology, geology, paleontology, or earth systems science.

Student life

Information on student life contained in this CATALOG is brief. The Student Handbook more comprehensively addresses University and school expectations, regulations, and policies; and is available to each registered student. Students need to familiarize themselves with the contents of the Student Handbook and the School of Medicine’s “Orange Book” of Student Guidelines, Policies, and Procedures. Additional information regarding policies specific to a particular school or program within the University is available from the respective school.

Financial information

Schedule of charges (2018-2019)

EBS strives to make it possible for every qualified student to successfully complete his or her degree in a timely manner. For many students, financial arrangements may be key elements in providing opportunity for timely completion. The department therefore makes available to as many qualified students as possible various forms of financial aid within the limits of the departmental budget and circumstances. Such financial aid may take the form of research assistantships (RA) and tuition waivers, or other special awards. It is hoped that these incentives will not only help make a student’s graduate career possible, but will also strengthen and expand his or her opportunities for learning while enrolled in the University. Other financial aid, such as student loans or other scholarships, are available through the Student Financial Aid office in the Student Services building. However, every student is responsible for the enrollment fee each quarter. It is not covered by tuition waivers.

If a student is awarded an RA, he or she will be expected to document at least 30 hours per pay period (two [2] weeks) on departmental and research-related projects. Ph.D. degree students will be expected to document at least 40 hours per pay period on their project in order to continue receiving the RA. Please note that RAs are awarded for a set amount for the year (M.S. degree—$7,500; Ph.D. degree—$17,000). This amount is paid out monthly after the first full month of work.

Tuition

$580 Per unit, graduate credit
$290 Per unit, undergraduate credit; $3,480 per quarter
$350 Per unit, audit, graduate

Special charges*

$60 Application fee
$823 Enrollment fee per quarter

* Programs may have additional fees.

Admissions

In addition to Loma Linda University admission requirements (p. 24), the applicant must also complete the following requirements:

Application procedure

1. The application instructions, available on the Web at <llu.edu/central/apply>, allow students to apply online and begin an application, as indicated in the general University section.
2. A personal interview is often desirable and is recommended by the Department of Earth and Biological Sciences. The interview should be arranged with the coordinator of either the Geology Program or the Biology Program.

Acceptance procedure

1. When the program that the student wishes to enter has evaluated the applications and made its recommendation, the dean of the school in which the program is housed takes official action and notifies the applicant. The applicant must respond affirmatively before becoming
eligible to register for programs within the Department of Earth and Biological Sciences
2. As part of registration, accepted students will be asked to file with Student Health Service a medical history with evidence of certain immunizations.
3. New students are required to pass a background check before they register for courses.

From master's to Ph.D. degree
A graduate student at this University may proceed first to a master's degree. If at the time of application the student wishes to qualify for the Doctor of Philosophy degree, this intention should be declared—even if the first objective is a master's degree.

If after admission to the master's degree program a student wishes to go on to the doctoral degree, an abbreviated application should be completed and submitted—along with appropriate supporting documents—to the school in which the program is housed. If the master's degree is sought, the student will be expected to complete that degree before starting any doctoral activity for credit. A student who bypasses the master's degree may be permitted, on the recommendation of the guidance committee and with the consent of the dean, to transfer courses and research that have been completed in the appropriate field and are of equivalent quality and scope to his/her doctoral program.

Undergraduate programs
Admission requirements
High school and college subject requirements for each program are outlined in the respective programs. Students are required to provide evidence of completion (official transcript) of high school in order to be granted admission to undergraduate programs in any of the schools of the University. A high school diploma or its equivalent, the GED, is required.

To be eligible for admission, applicants must have completed a minimum of 96 quarter units or 64 semester units at an accredited college or university. A minimum grade of C (2.0) is required for all transfer courses unless otherwise specified in specific program requirements; C- grades are not acceptable for transfer. An overall college G.P.A. of at least 2.5 to 3.0 is expected, depending on the program to which the student applies.

Graduate degree requirements
Admission requirements
A four-year baccalaureate degree (or its equivalent) from an accredited college or university is a prerequisite for admission to graduate programs in the Department of Earth and Biological Sciences. Transcripts of the applicant's scholastic record should show appropriate preparation, in grades and content, for the curriculum chosen. Since there is some variation in the pattern of undergraduate courses prescribed by different programs, the applicant should note the specific requirements of the chosen program. Deficiencies may be fulfilled while enrolled; and prerequisites must be completed prior to matriculation.

Scholarship
Applicants are expected to present an undergraduate record with a grade point average of B (3.0) or better in the overall program and in the major field. Depending on program-specific criteria, some students with an overall grade point average between 2.5 and 3.0 may be admitted provisionally to graduate standing, provided the grades during the junior and senior years are superior or there is other evidence of capability for completing the program.

Graduate Record Examination
Scores on the general test of the Graduate Record Examination (GRE) are required for application for admission to many degree programs. New test scores are needed if it has been more than five years since the last test was taken. Applicants are advised to request information specific to their proposed program of study.

For complete information about the GRE, please visit their Web site at <http://www.ets.org/gre/>; or write to Educational Testing Service, 1947 Center Street, Berkeley, CA 94701 (for the West); and P.O. Box 6000, Princeton, NJ 08541 (for the East). For GRE publications (including study materials), call 800/537-3160.

Programs
- Biology — M.S. (p. 265), Ph.D. (p. 265)
- Earth Science — Ph.D. (p. 269)
- Environmental Sciences — B.S. (p. 271)
- Geology — B.S. (p. 274), M.S. (p. 277)
- Natural Sciences — M.S. (p. 279)

Biology — M.S., Ph.D.
The Biology Program leading to the Master of Science and Doctor of Philosophy degrees is offered by the Department of Earth and Biological Sciences. M.S. and Ph.D. curricula provide a broad and unified approach to the life sciences, as well as specialization—as evidenced by the conduct of significant, original research; and in the selection of courses related to the area of research interest. Study in various areas, from molecular biology to natural history, is available to the student seeking preparation for teaching or for research in modern biology. Some areas of specialization are animal behavior, animal physiology, molecular systematics, ecological physiology, behavioral ecology, conservation biology, marine biology, and paleontology.

Objectives
The Biology Program strives to:
- instill in students the values of honesty, scientific integrity, careful research, and critical independent thinking.
- provide the tools and intellectual environment that will facilitate the biologist's attainment of the highest potential in scholarship, research, teaching, and interdisciplinary service learning.
- challenge graduate students to consider the relationships among science, faith, and societal responsibility.

Rosario Beach summer courses
In cooperation with the Walla Walla University Marine Station at Anacortes, Washington, facilities are available for marine courses and research for students of this program, in consultation with their advisors.

Programs
- Biology — M.S. (p. 265), Ph.D. (p. 267)

Biology — M.S.
Program director
Stephen G. Dunbar
Program learning outcomes
By the end of the program, the graduate should be able to:

1. Demonstrate critical independent evaluation of published scientific literature.
2. Plan and carry out independent research.
3. Critically evaluate philosophies of science and their relation to issues of public interest.
4. Demonstrate proficient oral and written skills in communicating science topics.
5. Demonstrate professional aptitude and attitudes.

Student financial aid
Assistantships for research and/or teaching are available in the Department of Earth and Biological Sciences on a competitive basis. Further information can be obtained, including contact information, from the department web page at <http://www.llu.edu/medicine/ebs/index.page>. Qualified students are also encouraged to seek fellowships from federal and private agencies with the help of their advisors.

General requirements
For information about requirements and practices to which all graduate students are subject, the student should consult the relevant sections of this CATALOG and of the school in which this program is housed.

Seminar attendance requirements
All graduate students in residence must register for and attend seminars (BIOL 607) at this University each quarter.

Research proposal
Students are urged to select a research project early in their programs, in consultation with faculty members approved by the department. A written research proposal and oral defense of the student’s proposed research should be completed early in the third quarter of study. A comprehensive plan for completion of the degree will be approved at this time.

Registration and tuition after normative time
This program is designed for M.S. degree students to finish within the normative time of two years. In certain circumstances, students may require slightly more time for completion. Students who are past the normative time for completing their degrees must register for two units without a tuition waiver each quarter, until they complete their degrees. After their normative time, students may request a one-year grace period that must be approved by the department faculty.

Thesis
The written thesis must be a completed significant, original research; and must be written in the format of an appropriate scientific journal as the manuscript is likely to be submitted for publication.

Admissions
In addition to Loma Linda University (p. 24) admission requirements, the applicant must also complete the following requirements:

- Expected undergraduate preparation includes a bachelor’s degree with a biology major or equivalent from an accredited college or university, including the following corequisite courses:
  - Precalculus (required)
  - Calculus (recommended)
- Statistics (one course)
- General biology (one year)
- General chemistry (one year)
- Genetics (one course)
- Organic chemistry (one year)
- Biochemistry (recommended)
- General physics (one year)
- Some of these courses may be taken during residence at this University, with the approval of the EBS admissions committee.
- An undergraduate G.P.A. of at least 3.0 is expected.
- An acceptable score on the general Graduate Record Examination (GRE) (the subject GRE is not required).

It is also recommended that applicants contact the department at <ebs@llu.edu>.

Application time
Applications are accepted at any time, although students are usually admitted for Autumn Quarter. Review of applications begin in February for Autumn Quarter admission. Research assistantships are competitively awarded.

Program requirements
A total of 48 units of courses and research is required, including at least 36 at or above the 500 level. See below for a list of courses.

All values below are in quarter units

<table>

Electives
Additional courses required by the student's guidance committee to complete the total units required for the degree 8
ANAT 516 Neuroscience GS
ANAT 542 Cell Structure and Function GS
BCHM 515 Introduction to Bioinformatics

Research
Typically research units will be graded each quarter and can be repeated for additional credit
BIOL 698 Thesis Research (1-8) 15

Total Units 48

1 BIOL 559 Philosophy of Science and Origins required for students who have taken BIOL 475 Philosophy of Science and Origins or equivalent
2 Each quarter in residence; 0.5 unit per quarter (Total units required may very depending on the number of quarters a student is on campus.)
3 In addition to this list, courses may also be chosen from unused courses listed above for biological systems, ecology, and organismal biology. When choosing elective, keep in mind that a minimum of 44 units for the M.S. degree must be numbered 500 or above.

Noncourse requirements

Advancement to candidacy
Students may apply for advancement to candidacy by completing Form A, which requires:

• Completing all deficiencies and corequisites.
• Selecting a research committee.
• Completing an approved written research proposal.
• Passing the oral defense of the research proposal.
• Being recommended by the program faculty (should be completed by the end of the third quarter of study).

Defense of thesis
An oral presentation and defense of the thesis, including final oral examination on the student's field of study, are required.

Grade requirement for graduation
All courses applied toward a graduate degree must have a grade of B or higher.

Length of program
Two (2) years based on full-time enrollment; part time permitted

Biology — Ph.D.
Program director
Stephen G. Dunbar

Program learning outcomes
At the end of this program, the student should be able to:

• Demonstrate critical independent thinking.
• Plan and carry out independent research.
• Critically evaluate links between philosophies of science and societal responsibilities.
• Effectively communicate professional practice through oral and written skills.
• Demonstrate a professional aptitude and attitude.

General requirements

Seminar attendance requirements
All graduate students in residence must register for and attend Seminars (BIOL 607) each quarter at Loma Linda University.

Teaching experience
Teaching is recommended for at least one quarter. This experience may be obtained through laboratory teaching, or it may include presenting lectures for a course in consultation with the student’s major professor and the course instructor.

Research proposal
A written research proposal and oral defense of the student’s proposed research should be completed early in the Spring Quarter.

Comprehensive
A written and oral comprehensive is required after the first summer of research. The student is required to provide a written report in the form of a publishable manuscript and to orally defend previous research in front of his or her research committee by the end of the Winter Quarter following the first summer of research work.

Dissertation
The written dissertation must demonstrate completion of significant, original research; and, it must be written in publishable paper format. At least one manuscript from the dissertation must be submitted for publication before the Ph.D. degree is granted.

Professional development
Ph.D. degree students are expected to publish papers, present papers at scientific meetings, and submit research grant proposals.

Registration and tuition after normative time
The program designed for completion in the normative time of four years. In certain circumstances, students may need more time for completion. Students are required to be registered every quarter until the dissertation is completed and defended. For details, see the continuous enrollment and personal leave of absence policies listed in the Academic Policies and Information (p. 35) section of this CATALOG. Students who go beyond the normative time for completing their degree must register for two (2) units without a tuition waiver each quarter until they complete their degree. After their normative time, students may request a one-year grace period that must be approved by the department faculty.

Admissions
In addition to Loma Linda University (p. 24) admission requirements, the applicant must also complete the following:

• A bachelor’s degree with a biology major (M.S. degree recommended) from an accredited college or university.
• An acceptable score on the general GRE examination (the subject GRE is not required).
• Recommended G.P.A. of 3.5 or higher in a M.S. degree program.
• Complete the following corequisite courses:
  • Precalculus (required)
  • Calculus (recommended)
  • Statistics (one course)
  • General biology (one year)
  • Genetics (one course)
  • General chemistry (one year)
  • Organic chemistry (one year)
  • Biochemistry (recommended)
  • General physics (one year)
• Some of these courses may be taken during residence at this University, with the approval of the EBS admissions committee.

Application
Applications are accepted at any time. Review of applications begins in February for Autumn Quarter admission. Research assistantships are competitively awarded.

It is also recommended that applicants contact the department at <ebs@llu.edu>.

Program requirements
A minimum of 65 units of didactic and research course work is required; including at least 53 at or above the 500 level. See below for a list of courses. The student's advisory committee may require the student to take additional courses as electives

All values below are in quarter units.

Required
Additional courses beyond those listed below will be chosen in consultation with the student’s advisor

<table>

Noncourse requirements

Comprehensive examination
An oral comprehensive examination is given in connection with a written and oral presentation of an initial research project approved by the student’s guidance committee. Its purpose is to measure the student’s knowledge of his/her field of study; and his/her ability to find, understand, and synthesize the research literature on a topic, and to conduct original research. The oral examination covers the student’s field of study, as well as defending the research. The comprehensive exam will take place during the Autumn Quarter of the second year, after the first summer of research.
Advancement to candidacy
Students may apply for advancement to candidacy after:

- Completing all deficiencies and corequisites.
- Passing the comprehensive examinations.
- Selecting a research committee.
- Completing an approved written and oral research proposal and budget presentation for the research committee.
- Being recommended by the department faculty.

Defense of dissertation
An oral dissertation presentation and defense are required.

Grade requirement for graduation
All courses applied toward a graduate degree must have a grade of B or higher.

Normal time to complete the program
Four (4) years based on full-time enrollment; part time permitted.

Earth Science – Ph.D.

Program director
Kevin E. Nick

The Department of Earth and Biological Sciences offers a program leading to the Doctor of Philosophy degree in earth science. Emphasis is on research and course work in sedimentology, paleontology, and paleobiology that prepare the student to understand the history of the earth and life, its geological context, and the science involved in deciphering this history. Students are encouraged to think independently and to consider various approaches to understanding earth history. Areas of curricular strength and research emphases include sedimentology, limnogeology, paleontology, paleoenvironments, paleoecology, taphonomy, and microbial carbonates. Research in paleontology can also be pursued through the curricula for the Master of Science degree in paleobiology and the Doctor of Philosophy degree in biology.

The specific research and academic interests and strengths of the faculty are in:

- sedimentology, stratigraphy, paleoenvironments
- vertebrate paleontology, taphonomy
- philosophy of science
- limnogeology and microbialites
- biostratigraphy
- paleomagnetics
- geographic information systems
- igneous petrology and geophysics

Objectives
The Earth Science Program strives to:

1. instill in students the values of scientific integrity, careful research, and critical, independent thinking.
2. provide the tools and intellectual environment that will facilitate the earth scientist's attainment of the highest potential in scholarship, research, and teaching.
3. challenge graduate students to consider the relationship among science, faith, and societal responsibility.

Program learning outcomes
By the end of this program, the graduate should be able to:

1. Pass a standardized national exam in earth science practice.
2. Analyze and synthesize published data and interpretations
3. Plan and carry out independent research
4. Apply effective written and oral communication and technological tools to professional practice.
5. Demonstrate a professional aptitude and attitude.

Student financial aid
Assistantships for research and/or teaching are available at the Department of Earth and Biological Sciences on a competitive basis. Additional information can be obtained by contacting the department at <ebs@llu.edu>. Qualified students are also encouraged to seek fellowships from federal and private agencies with the help of their advisor.

General requirements
For information about requirements and practices to which all graduate students are subject, the student should consult relevant sections of this CATALOG, as well as general information pertinent to the school in which this program is housed.

Registration and tuition after normative time
The program design is for Ph.D. degree students with geology backgrounds to finish in four years. In certain circumstances, students may require more time for completion. Students who are past the normative time for completing their degree must register for two units each quarter without a tuition waiver until they complete their degree. After their normative time, students may request a one-year grace period that must be approved by the department faculty.

Seminar attendance requirements
All graduate students in residence must register for and attend GEOL 607 Seminar in Geology each quarter while at Loma Linda University.

Research proposal
Students are urged to select research projects early in their programs, in consultation with a faculty member approved by the department. A written research proposal and oral defense of the student's proposed research should be completed by the end of the third quarter of study. A comprehensive plan for completion of the degree must be approved at this time as required for advancement to candidacy.

Comprehensive examination
Students must complete a comprehensive examination project by the Autumn or Winter Quarter of their second year of residence. The student's research committee bases their recommendation for advancement to candidacy in part on: completion of a focused research project, a written report on the research in the style of a journal article, an oral presentation of the project, and an oral defense of the conclusions.

Dissertation
The written dissertation must demonstrate the completion of significant, original research and must be written in the style of an appropriate scientific journal where manuscripts are likely to be submitted for
publication. At least one manuscript from the dissertation must be submitted for publication before the Ph.D. degree will be granted.

Teaching experience
Teaching is recommended during at least one quarter. This experience may be obtained through laboratory teaching or it may include presenting several lectures for a course upon consultation with the student’s major professor and the course instructor.

Professional development
Ph.D. degree students are expected to publish papers, present at scientific meetings, and submit research grant proposals.

Rosario Beach summer courses
In cooperation with the Walla Walla University Marine Station at Anacortes, Washington, facilities are available for marine courses and research by students of this program.

Admissions

Academic preparation requirements
In addition to Loma Linda University (p. 24) admission requirements, the applicant must also complete the following requirements:

- hold an undergraduate or graduate degree from an accredited institution
- achieve an acceptable score on the general GRE examination (the subject GRE is not required).
- demonstrate the minimum required G.P.A. of at least 3.0 in the previous degree program.
- Expected undergraduate preparation include:
  - two quarters of college mathematics (including calculus)
  - general physics with laboratory (one year)
  - general chemistry with laboratory (one year)
  - statistics (one course)
  - undergraduate geology courses (see corequisites listed below)

Some of these courses may be taken during residence at Loma Linda University, with approval of the admissions committee.

Students may also contact the department at <ebs@llu.edu> for advice on admission requirements. Advanced standing toward Ph.D. course requirements may be granted based on coursework taken prior to admission and beyond undergraduate degree requirements.

Application time
Students should complete their applications by January 31 of the year being considered for admission, for priority consideration. Review of applications begins in February for Autumn Quarter admission. Research assistantships are competitively awarded.

Program requirements
A minimum of 72 quarter units of academic credit for courses, seminars, and research beyond the master’s degree is required (including at least 55 at or above the 500 level); that is, a minimum of 120 units beyond the baccalaureate degree, including the following required courses:

(Advanced standing may be granted toward these requirements)

Corequisites
May be taken during the program in addition to the units required for the degree (advanced standing may be granted for equivalent courses)

Five (5) years based on full-time enrollment; part time permitted.

Normal time to complete the program

Varied course offerings
In addition to the primary offerings of the department, the student, with committee approval, may take courses in other departments as part of the graduate work—according to special interests and needs.

Non-course requirements

Grade requirement for graduation
All courses applied toward the Ph.D. must receive a grade of at least a B.

Advancement to candidacy
Students may apply for advancement to candidacy by completing Form A, which requires:

1. Completing all deficiencies and corequisites.
2. Selecting a research committee with departmental approval.
3. Research committee approval of the completion of the comprehensive examination requirement as stated in the department student handbook.
4. Research committee approval of the written research proposal and budget.
5. Being recommended by the program faculty.

Research Presentation
Presentation of research findings at a scientific meeting is required.

Service Learning Course
During the program, each student will complete a course that includes a service learning component. This will reinforce the role of the scholar in the community.

Dissertation and defense
The additional courses required by the student’s guidance committee to complete total required units. All GEOL graduate level courses not counted towards core requirements may count towards elective credit.

Research
4 units minimum; will be graded each quarter and can be repeated for additional credit

GEOL 699 Dissertation Research (1-8) 4

Total Units 77

1 Registration is required for each quarter in residence, maximum units count toward the degree total is 5

Electives

Additional courses required by the student’s guidance committee to complete total required units. All GEOL graduate level courses not counted towards core requirements may count towards elective credit.

Environmental Sciences — B.S.

Interim program director
William K. Hayes

The Department of Earth and Biological Sciences offers a program leading to the Bachelor of Science degree in environmental sciences. This program builds upon a strong interdisciplinary breadth in natural, physical, and earth systems sciences to help understand the effect of human activities on environmental sustainability and management. In addition, since understanding the environment has become highly dependent on advanced technology, students will learn to use marketable geospatial applications, such as: geographic information systems (GIS), remote sensing, computer systems modeling, and global positioning systems. These tools will help students address environmental problems, such as: climate change, biodiversity decline, groundwater and soil contamination, use of natural resources, waste management, sustainable development, and air and noise pollution. Students have a choice of advanced expertise in conservation biology and biodiversity or environmental geology. Lastly, this program will encourage students to develop critical-thinking skills, healthy lifestyles, and service-oriented attitudes that are necessary to develop effective and ethical solutions to environmental problems on a local and global scale.

Program learning outcomes
By the end of this program, the student should be able to:

1. Integrate each of earth's dynamic and interdependent component systems.
2. Critically evaluate the relation of science and faith within an environmental context.
3. Demonstrate written, technical, oral, and problem-solving skills necessary to collect, analyze, and share environmental data with scientific and public communities.
4. Identify professional and academic opportunities in the environmental science field.
5. Discuss concurrent environmental science research.
7. Address environmental problems as an environmental scientist.

Employment opportunities
Career options in the field of environmental sciences are diverse and abundant. The Environmental Sciences Program prepares students for entry-level jobs in environmental sciences or GIS fields. Graduates may pursue jobs in the public sector through local, state, and federal agencies such as U.S. Fish and Wildlife Service, U.S. Geological Survey, and Department of Fish and Game. In the private sector, graduates may seek jobs in environmental consulting firms, foundations, and organizations. Some examples of career paths that environmental science graduates pursue include environmental engineering, science, and social policy; a wide variety of natural resources management fields, such as soil science, forestry, agriculture, watershed science, range management, wildlife conservation, recreation resources, land management, and ecology; landscape architecture, conservation science, GIS, climatology, diverse health sciences; as well as public policy, law, or planning careers.

Environmental scientists may also become involved through employment or volunteering with nonprofit organizations such as Adventist Development and Relief Agency International, and help world populations
learn how to use the earth’s resources to their advantage in a sustainable manner.

**Preparation for teaching**

In addition to the environmental sciences major, a student preparing to teach at the elementary or secondary level will need to complete the requirements for a teaching credential. The student should consult the undergraduate program director for further information. General elective units can be used for education courses.

**Preparation for advanced programs**

Because of the strong foundation in the natural and physical sciences acquired in the Environmental Sciences Program, students have the option of applying to a variety of graduate programs; as well as medical, dental, and engineering programs. In most cases, these programs require full-year courses in general biology, general chemistry, general physics, and organic chemistry. One or more courses in calculus may also be required. Students are strongly encouraged to contact the pre-health or graduate program of their choice early in their studies to ensure they meet specific course requirements.

**Environmental internship**

The Environmental Sciences Program offers students the opportunity to engage in “hands-on” application of fundamentals learned in course work by enrolling in ENVS 487 Internship in Environmental Sciences. With the supervision of a faculty advisor, students will develop an academic component of the internship and will be permitted to earn up to eight units of general elective credit toward the B.S. degree. All internship appointments are subject to Environmental Sciences Program director approval.

**Undergraduate research**

Following approval of an academic advisor and research professor, students interested in field research may gain training and experience in one of the three concentration areas offered by the program. Under the supervision of a research professor, students will develop projects within the context of environmental conservation, health, or sustainability in an effort to find new solutions to environmental problems.

**Honors program**

Students who earn a G.P.A. of 3.0 or above, a sponsoring faculty member, and an approved research proposal may apply to be accepted into the environmental sciences honors program. The honors student must register for at least two units of undergraduate research, conduct original research under a faculty member’s direction, submit a written undergraduate thesis, and give a public oral presentation of his/her research.

**Required units and residence requirement**

All unit requirements listed are quarter units. Minimum requirements include one year of full-time residence in Loma Linda University, completing 32 of the last 46 units; or a minimum of 45 total units of course work for the degree at Loma Linda University. If the student has attended an institution that does not grant bachelor’s degrees, a maximum of 105 quarter units of transfer credit from a two-year junior or community college are allowed.

Please note: Grades of C- and below are not accepted for credit.

**Financial aid**

The following tuition rate for Geology or Environmental Sciences programs apply—B.S.: $290/unit; 12-18 units—$3,480 per quarter.

**Scholarships and discounts**

Scholarships and discounts available to eligible undergraduate students in the Department of Earth and Biological Sciences include:

- Academic scholarships based on test results
  - a. American College Test (ACT) score of 30 or above: $1,600 (or 16 percent of tuition)—for a student who maintains a cumulative G.P.A. of at least 3.5, renewable for successive years.
  - b. Scholastic Aptitude Test (SAT): Student must maintain a 3.5 cumulative G.P.A., renewable for successive years. If a student qualifies for both an ACT and an SAT scholarship, the scholarship with the largest dollar value will apply.
    - • National Merit Finalist Scholarship covers 100 percent of tuition.
    - • National Merit Semifinalist Scholarship covers 34 percent of tuition.
    - • National Merit Commended Scholarship covers 20 percent of tuition.
  - Renewable G.P.A. scholarships (eligibility based on G.P.A. at the end of previous academic year). If a student is eligible for a National Merit Scholarship and/or an ACT scholarship, as well as a G.P.A. scholarship, the scholarship with the largest dollar value will apply—
    - • G.P.A. between 3.75 and 4.00, $1,480 per year (or 15 percent of tuition).
    - • G.P.A. between 3.50 and 3.74, $1,180 per year (or 12 percent of tuition).
    - • G.P.A. between 3.25 and 3.49, $900 per year (or nine percent of tuition).

**Guidelines**

- All scholarships or other financial awards must not exceed costs for tuition and fees.
- If a student qualifies for more than one scholarship or reduced tuition award, the award with the largest dollar value applies.
- Scholarship or tuition reduction will be applied as a credit to the student’s tuition account at the rate of one-third of the total per quarter, and is available to full-time students only.
- Loss of scholarship money may result when a student does not maintain the minimum cumulative G.P.A. required by the particular scholarship.
- The last day of final tests for the first quarter that a student is enrolled at LLU is the deadline for verifying with Student Financial Services that the student qualifies for a scholarship for the academic year.
- The scholarships and reduced tuition award listed here apply only to students enrolled in undergraduate programs in the Department of Earth and Biological Sciences.

Note: Determination of the amount of scholarships and awards at Loma Linda University is influenced by FAFSA data. State and federal grants, as well as other grants and subsidies, will be applied before Loma Linda University scholarships and discounts; therefore, some students may be eligible to receive only a portion of their scholarship award.
Admissions

The student in the B.S. degree in Environmental Sciences (ENVS) Program will generally take the first two years of required corequisite course work (96-105 units) at any accredited community college or university, and the last two years of the ENVS curriculum at Loma Linda University. Students may obtain early entrance with the approval of the Earth and Biological Sciences Department after completing at least 48 quarter units of corequisites at a college of their choice. Students accepted early will concurrently take course work at a nearby community college in order to complete their outstanding corequisite requirements.

In addition to Loma Linda University admissions requirements (p. 24), the applicant must also complete the following requirements:

- have a 2.5 G.P.A.
- three letters of recommendation from faculty members at the institutions previously attended.
- course corequisites listed below

Course corequisites

Domain 1: Religion and Humanities (20 quarter units minimum)

Humanities (12 quarter units minimum)

Choose courses from three of the following areas: civilization/history, fine arts (art history and music history), literature, philosophy, and performing/visual arts (not to exceed four quarter units).

Religion

An applicant who has attended an Adventist college or university is required to have taken four quarter units of religion from an Adventist institution for each year of attendance at an Adventist college or university. Up to eight quarter credits may apply towards the 20 units needed in Domain 1. If the applicant has not attended an Adventist institution, there are no religion units required. In either case, however, the applicant must have completed 20 quarter/14 semester units in Domain 1: Humanities and Religion.

Domain 2: Scientific Inquiry and Analysis (43 quarter units minimum)

Natural Sciences (31 units)

- College algebra (four units)
- Statistics (three units) offered at LLU
- Two of the following full-year sequences:
  - General biology with laboratory (12 units)
  - General chemistry with laboratory (12 units)
  - General physics with laboratory (12 units)

Social Sciences (12 units minimum)

- One course dealing with human diversity (e.g., cultural anthropology)
- Choose remaining units from the following areas: geography, economics, political science, psychology, sociology, etc.

Domain 3: Communication (9-13 quarter units)

- English composition (complete sequence)
- Elective areas may include courses in computer information systems, critical thinking, and public speaking

Domain 4: Health and Wellness (2-6 quarter units)

- Two activity courses in physical education
- Personal health or nutrition

Domain 5: Electives

Electives from the previous four domains may be selected to complete the general education minimum requirements of 68 quarter units.

For total unit requirements for graduation, see LLU General Education Requirements (p. 28).

Please note: Grades of C- and below are not accepted for credit.

General electives

Any undergraduate courses taught at Loma Linda University or other regionally accredited college to meet the 192-unit total requirement

1 All ENVS students are required to register and attend seminar every quarter while enrolled. Typically seminar units will add up to 3 units at the completion of the ENVS program.

2 Total units required will be prorated based on total program units completed at LLU and other SDA colleges/universities.

Concentrations

Conservation biology and biodiversity

One year each of general biology and general chemistry are required for this concentration.

This concentration is suitable for students wishing to empirically analyze the health of an ecosystem, including population and distribution of plants and animals and environmental degradation and its causes, with the goal of proposing methods of improving the health of the ecosystem. Graduates in this track normally work closely with government, conservation agencies, and industry to develop land and water management plans and educate the public about threats to the health of ecosystems. This concentration is also appropriate as background for graduate study in such disciplines as biology, ecology, forestry, and
environmental health. However, one year of organic chemistry and one year of physics is required of most graduate programs listed above.

Normal time to complete the program
Four (4) years — two (2) years (seven [7] academic quarters) at LLU based on full-time enrollment; part time permitted

Geology — B.S.

Program director
Kevin E. Nick

The Department of Earth and Biological Sciences offers a program leading to the Bachelor of Science degree in geology. This program provides the student with a field-oriented education, emphasizing the application of geological principles. Sedimentary geology, paleontology, and environmental geology are areas of emphasis. The curriculum is designed as a degree-completion program; two years of college-level course work should be completed before admission. The program aims to maintain affordability through tuition rates and scholarships. Please contact the department at <ebs@llu.edu> with any questions or comments.

Objectives
The integrated core course (major) sequence of the geology degree provides students with a general background in geology as preparation for careers or graduate studies in geology, paleontology, and environmental geology. An emphasis on fieldwork provides the link to basic geological data beyond the classroom and laboratory. Students apply the scientific method to resolve geologic problems throughout the geology curriculum. Students are encouraged to consider multiple working hypotheses during this process.

Program learning outcomes
By the end of the program, the graduate should be able to:
1. Pass a standardized national exam in earth science practice.
2. Collect and present field and laboratory data.
3. Apply effective written and oral communication and technological tools to professional practice.
4. Evaluate and synthesize data and conclusions of others.
5. Demonstrate a professional aptitude and attitude.
6. Demonstrate critical evaluation skills in relating faith, science, and public interest issues.
Curriculum

The Bachelor of Science degree in geology requires a total of 192 quarter units. The total units are divided according to general studies requirements, major requirements, and electives.

The following summarizes the general categories and numbers of credits required for the degree and will help in planning the course schedule. All units are quarter units.

Major requirements—41 units
Major electives—20 units
Minimum general studies in the natural sciences—44 units
Minimum other general studies requirements—38 units
Other electives (this number will decrease if units in above categories are greater)—49 units
Total—192 units

Residence requirements

Minimum requirements include one year of full-time residence at Loma Linda University, completing at least 32 of the last 48 units; or a minimum of 45 total units of course work for the degree at Loma Linda University. If the student has attended an institution that does not grant bachelor’s degrees, a maximum of 105 quarter units of credit can be transferred from a two-year junior or community college.

Undergraduate thesis

Students will prepare an undergraduate thesis based on a field or laboratory experience supervised by a faculty advisor. Students must register for at least two units of undergraduate research, conduct research under a faculty member's direction, submit a written undergraduate thesis, and deliver a public oral presentation.

Geology careers

A baccalaureate degree in geology prepares a student to enter graduate programs in geology or paleontology, for employment in environmental and energy-related industries, or (with the necessary education courses) for teaching in secondary schools. Most employment opportunities for those with graduate degrees may be found in industry, research, or college teaching.

In addition to the geology major, a student preparing to teach at the elementary or secondary level will need to complete the requirements for a teaching credential. The student should consult the Geology Program undergraduate director for further information. Education courses will count toward general studies requirements.

Scholarships and discounts for earth and biological sciences undergraduate students

Tuition rate for courses offered by the Geology Program (B.S.): $290/unit; 12-18 units—$3,480 per quarter

- Academic scholarships based on test results
  a. American College Test (ACT) score of 30 or above: $1,600 (or 16 percent of tuition). For a student who maintains a cumulative G.P.A. of at least 3.5, renewable for successive years.
  b. Scholastic Aptitude Test (SAT): Student must maintain a 3.5 cumulative G.P.A., renewable for successive years. If a student qualifies for both an ACT and an SAT scholarship, the scholarship with the largest dollar value will apply.
  - National Merit Finalist Scholarship covers 100 percent of tuition.
  - National Merit Semifinalist Scholarship covers 34 percent of tuition.
  - National Merit Commended Scholarship covers 20 percent of tuition.
  - Renewable G.P.A. scholarships (eligibility based on G.P.A. at the end of previous academic year): If a student is eligible for a National Merit Scholarship and/or an ACT scholarship, as well as a G.P.A. scholarship, the scholarship with the largest dollar value will apply.
    - G.P.A. between 3.75 and 4.00, $1,480 per year (or 15 percent of tuition).
    - G.P.A. between 3.50 and 3.74, $1,180 per year (or 12 percent of tuition).
    - G.P.A. between 3.25 and 3.49, $900 per year (or nine percent of tuition).

- National Merit Commended Scholarship covers 20 percent of tuition.
- National Merit Semifinalist Scholarship covers 34 percent of tuition.
- National Merit Finalist Scholarship covers 100 percent of tuition.
- Renewable G.P.A. scholarships (eligibility based on G.P.A. at the end of previous academic year): If a student is eligible for a National Merit Scholarship and/or an ACT scholarship, as well as a G.P.A. scholarship, the scholarship with the largest dollar value will apply.
  - G.P.A. between 3.75 and 4.00, $1,480 per year (or 15 percent of tuition).
  - G.P.A. between 3.50 and 3.74, $1,180 per year (or 12 percent of tuition).
  - G.P.A. between 3.25 and 3.49, $900 per year (or nine percent of tuition).

- Academic scholarships based on test results
  a. American College Test (ACT) score of 30 or above: $1,600 (or 16 percent of tuition). For a student who maintains a cumulative G.P.A. of at least 3.5, renewable for successive years.
  b. Scholastic Aptitude Test (SAT): Student must maintain a 3.5 cumulative G.P.A., renewable for successive years. If a student qualifies for both an ACT and an SAT scholarship, the scholarship with the largest dollar value will apply.
  - National Merit Finalist Scholarship covers 100 percent of tuition.
  - National Merit Semifinalist Scholarship covers 34 percent of tuition.
  - National Merit Commended Scholarship covers 20 percent of tuition.

- Renewable G.P.A. scholarships (eligibility based on G.P.A. at the end of previous academic year): If a student is eligible for a National Merit Scholarship and/or an ACT scholarship, as well as a G.P.A. scholarship, the scholarship with the largest dollar value will apply.
  - G.P.A. between 3.75 and 4.00, $1,480 per year (or 15 percent of tuition).
  - G.P.A. between 3.50 and 3.74, $1,180 per year (or 12 percent of tuition).
  - G.P.A. between 3.25 and 3.49, $900 per year (or nine percent of tuition).

Additional scholarship guidelines

- The sum of scholarships and other financial awards should not exceed cost for tuition and fees.
- If a student qualifies for more than one scholarship or reduced tuition award, the award with the largest dollar value applies.
- Scholarship or tuition reduction will be applied as a credit to the student's tuition account at the rate of one-third of the total per quarter and is available to full-time students only.
- Loss of scholarship money may result when a student does not maintain the minimum cumulative G.P.A. required by the particular scholarship.
- The last day of final tests for the first quarter that a student is enrolled at LLU is the deadline for verifying with Student Financial Services that the student qualifies for a scholarship for the academic year.
- The scholarships and reduced tuition award listed here apply only to students enrolled in undergraduate programs in the Department of Earth and Biological Sciences.

Note: Determination of the amount of scholarships and awards at Loma Linda University is influenced by FAFSA data. State and federal grants, as well as other grants and subsidies, will be applied before Loma Linda University scholarships and discounts; therefore, some students may be eligible to receive only a portion of their scholarship awards.

Admissions

Applications

Applications are accepted at any time. Review of applications begins in February for Autumn Quarter admission.

In addition to Loma Linda University (p. 24) admission requirements, the applicant must also complete the following requirements for admission to the Geology BS program:

- complete two years (minimum of 96 quarter units) of general education and science courses at any accredited institution. This should include the majority of the general studies requirements. Note that this would typically include a year of general chemistry and general physics with associated laboratory sections, and
mathematics. Please contact the program director if you have questions about this requirement.

- achieve a minimum of 2.5 G.P.A. during the first two years of course work.
- submit letters of recommendation from two faculty members at institutions previously attended.

**General studies requirements**

The information below provides a summary of the University's general education requirements for undergraduate students. For a complete description of Loma Linda University's general education requirements and criteria, the student should refer to the Division of General Studies (p. 28) section in this CATALOG.

**Domain 1: Religion and Humanities**

**Humanities (12 quarter units minimum)**

Choose courses from three of the following areas: civilization/history, fine arts (art history and music history), literature, philosophy, and performing/visual arts (not to exceed four quarter units).

**Religion**

An applicant who has attended an Adventist college or university is required to have taken four quarter units of religion from an Adventist institution for each year of attendance at an Adventist college or university. Up to eight quarter credits may apply toward the 20 units needed in Domain 1. If the applicant has not attended an Adventist institution, no religion units are required. In either case, however, the applicant must have completed 20 quarter/14 semester units in Domain 1: Humanities and Religion.

**Domain 2: Scientific Inquiry and Analysis**

**Natural Sciences (12 units minimum; additional units count toward Domain 5 and the total general studies requirement)**

- Mathematics, including calculus (eight-12 units)
- Statistics (four units)
- General chemistry with laboratory—one full year, complete sequence
- General physics with laboratory—one full year, complete sequence
- Courses in genetics and ecology, or general biology with laboratory (eight units)

**Social Sciences (12 units minimum)**

- One course dealing with human diversity (e.g., cultural anthropology)
- Choose remaining units from the following areas: geography, economics, political science, psychology, sociology, other social science

**Domain 3: Communication (9 units minimum)**

- English composition (complete sequence)
- Elective areas may include courses in computer information systems, critical thinking, and public speaking.

**Domain 4: Health and Wellness (2-6 units)**

- Two activity courses in physical education
- Personal health or nutrition

**Domain 5: Electives**

Electives from the previous four domains may be selected to complete the general education minimum requirements of 68 quarter units.

Specific general studies requirements are detailed in the Division of General Studies (p. 28) section in this CATALOG. It is recommended that applicants contact the department at <ebs@llu.edu> for a review of their academic plan as early as possible.

Please note: Grades of C- and below are not accepted for credit toward the degree.

By the end of this program, the graduate should be able to:

1. Pass a standardized national exam in earth science practice.
2. Analyze and synthesize published data and interpretations.
3. Plan and carry out independent research.
4. Apply effective written and oral communication and technological tools to professional practice.
5. Demonstrate professional aptitude and attitude.
6. Demonstrate critical evaluation skills in relation to faith, science, and public interest issues.

Program objectives

The Geology Program focuses on field-oriented geology. The integrated core course sequence provides students with the tools to conduct research in the subdisciplines of sedimentology, paleontology, igneous petrology, and geology in health and the environment. Research in paleontology may also be pursued through the M.S. and Ph.D. degree curricula in biology, and through the Ph.D. degree curriculum in earth science.

Seminar attendance requirements

All students must register for and attend GEOL 485 Seminar in Geology for each quarter of residence at this University.

Service Learning Course

During the program, each student will complete a course that includes a service learning component. This will reinforce the role of the scholar in the community.

Normal time to complete the program

Four (4) years — two (2) years (six [6] quarters) at LLU based on full-time enrollment; part-time permitted

Geology — M.S.

Program director

Kevin E. Nick

The Department of Earth and Biological Sciences offers the Master of Science in geology degree. Research and course work emphasize field and laboratory studies in sedimentology, paleontology, igneous petrology, and geology in health and the environment. Research in paleontology may also be pursued through the M.S. and Ph.D. degree curricula in biology, and through the Ph.D. degree curriculum in earth science.

Program learning outcomes

By the end of this program, the graduate should be able to:

1. Pass a standardized national exam in earth science practice.
2. Analyze and synthesize published data and interpretations.
3. Plan and carry out independent research.
4. Apply effective written and oral communication and technological tools to professional practice.
5. Demonstrate professional aptitude and attitude.
6. Demonstrate critical evaluation skills in relation to faith, science, and public interest issues.

Financial aid

Research and teaching assistantships are available at the Department of Earth and Biological Sciences on a competitive basis. Further information can be obtained by contacting the department at <ebs@llu.edu>. Qualified students are also encouraged to seek fellowships and grants from federal and private agencies with the help of their advisors.

Overview of program requirements

Two-year track—for students with an undergraduate degree in geology

A minimum of 56 quarter units, including 44 at or above the 500 level, constitutes the curriculum for the Master of Science degree in geology.

Three-year track—for students without an undergraduate degree in geology

Students with a variety of majors (including science and some nonscience majors) are encouraged to enter the M.S. degree in geology program. The three-year track courses are indicated in the table of program requirements and include: 22 units of undergraduate geology courses that are not part of the M.S. curriculum as well as M.S. degree curriculum courses in geology with a minimum of 56 quarter units, including 44 at or above the 500 level. Total for the three-year track is 78 quarter units. Advanced standing may be granted toward cognate requirements.

Seminar attendance requirements

All graduate students in residence must register for and attend seminars (GEOL 607 Seminar in Geology) each quarter studying at this University.

Registration and tuition after normative time

Students who are past the normative time for completing their degree must register for two units without a tuition waiver each quarter until they earn their degree. After the normative time, students may request a one-year grace period. An extension may be granted contingent upon approval of the department faculty.

Advancement to candidacy

Students are urged to select a research project early in their program, in consultation with a faculty member approved by the department. Students should apply for advancement to candidacy and develop an approved, comprehensive plan for completion of the degree by the end of the third quarter of study. Advancement to candidacy is petitioned by completing Form A, which requires:

1. Selecting a research committee.
2. Receiving approval of the written research proposal.
3. Passing the oral defense of the research proposal.
4. Being recommended by the program faculty.

Thesis

The written thesis must demonstrate the completion of significant, original research and must be written in the style of an appropriate scientific journal.

Rosario Beach Summer courses

In cooperation with the Walla Walla University Marine Station at Anacortes, Washington, facilities are available for marine courses and research by graduate students of this department.
Admissions

In addition to Loma Linda University (p. 24) admission requirements, the applicant must also complete the following requirements:

- an undergraduate or graduate degree from an accredited institution
- a G.P.A. of at least 3.0
- achieve an acceptable score on the general GRE examination
- completion of the following courses:
  - General chemistry—full year with laboratory (12 units)
  - Physics—full year with laboratory (12 units)
  - Mathematics, including calculus
  - Statistics
- Organismal or ecological biology courses such as zoology, botany, ecology or general biology are recommended, but are not required

Some of the above courses may be taken as corequisites during residence at Loma Linda University, with approval of admission committee.

Applicants should complete their applications by January 31 of the calendar year being considered for admission, for priority consideration. Review of applications begins in February for Autumn Quarter admission. Research assistantships are competitively awarded.

It is recommended that applicants contact the department early in the application process at <ebs@llu.edu>.

Program requirements

Three-year Track additional requirements

Corequisites
The following courses are required of all students who have not completed a bachelor's degree in geology. Courses do not apply toward graduate credit.

<table>
<thead>

Total Units 57

Varied course offerings
In addition to the primary offerings of the department, the student, with committee approval, may take courses in other departments as part of the graduate work—according to special interests and needs.

Noncourse requirements

Advancement to candidacy
Students may apply for advancement to candidacy by completing Form A, which requires:

1. Selecting a research committee.
2. Completing an approved written research proposal and budget.
3. Passing the oral defense of the research proposal.
4. Being recommended by the program faculty.

Research Presentation
Presentation of research findings at a scientific meeting is required.

Service Learning Course
During the program, each student will complete a course that includes a service learning component. This will reinforce the role of the scholar in the community.

Defense of thesis
An oral presentation and defense of the thesis to the research committee is required. This includes final oral examination on student's field of study.

Grade requirement for graduation
An overall G.P.A. of 3.0 is required for graduation.
Normal time to complete the program
27-month track — 2.33 years (seven [7] academic quarters) based on full-time enrollment; part time permitted
36-month track — three (3) years (nine [9] academic quarters) based on full-time enrollment; part time permitted

Natural Sciences — M.S.

Program director
Leonard R. Brand

The Natural Sciences Program leads to the Master of Science degree. Course work is selected from the allied fields of biology, paleontology, geology, earth systems science, and geographic information systems. Areas of curriculum strength include ecology, genetics, systematics, sedimentary geology, paleontology, environmental geology, environmental science, and GIS.

Program features
The Natural Sciences Program emphasizes ecology-oriented areas of biology and field-oriented geology—particularly sedimentology, stratigraphy, and paleontology. Fieldwork is emphasized because it provides a first-hand experience with biological and geological phenomena that cannot be satisfactorily grasped or understood solely from classroom or laboratory study. Throughout the natural sciences curriculum, students are encouraged to develop an open-minded and investigative approach in the application of the scientific method to the resolution of biological and geologic problems. Multiple working hypotheses are encouraged. The goal is to prepare students for effective careers in teaching or government.

Program learning outcomes
By the end of this program, the graduate should be able to:
1. Articulate the fundamental concepts of biology, geology, GIS, and environmental science
2. Seek endorsement for subject-teaching in secondary education and will be competent in either biological science or geoscience.
3. Apply effective written and oral communication to professional practice.
4. Apply the scientific method, hypothesis testing, and deductive reasoning.
5. Discuss key issues related to the integration of faith and science.
6. Seek employment in K-12 teaching or civil or public service.

Rosario Beach summer courses
In cooperation with the Walla Walla University Marine Station at Anacortes, Washington, facilities are available for marine courses and research by graduate students of the Department of Earth and Biological Sciences.

Admissions
In addition to Loma Linda University (p. 24) admission requirements, the applicant must also complete the following requirements:
• a bachelor’s degree in biology, geology, chemistry, physics, or other degree with typical biology and geology prerequisites.
• undergraduate G.P.A. of at least 3.0 is expected.
• achieve an acceptable score on the general Graduate Record Examination (GRE). The subject GRE is not required.
• completion of prerequisite courses:
  • college mathematics—two quarters (calculus recommended)
  • biology—one-year
  • general physics with laboratory—one year
  • general chemistry with laboratory—one year
  • general ecology—one course

Some prerequisite courses may be taken during residence at Loma Linda University, with approval of the admissions committee.

Application
Applications are accepted at any time. Review of applications begins in February for the Autumn Quarter admission. It is highly recommended that the applicant complete the application process by January 31 of the calendar year being considered for admissions, for priority consideration. Research assistantships are competitively awarded. Applicants may contact the department at <ebs@llu.edu>.

Program requirements
A minimum of 50 quarter units, including 34 at or above the 500 level, constitutes the curriculum for the Master of Science degree program in natural sciences. The following courses are required. Undergraduate courses must be at the 400 level.

| Core | \(\text{BIOL/GEOL 558} \) Philosophy of Science | 4 |
|      | \(\text{GEOL 518} \) Earth Structure, Process, and History | 4 |
|      | \(\text{BIOL 607} \) Seminar in Biology (0.5) \(^1\) | 3 |
|      | \(\text{or GEOL 607} \) Seminar in Geology | |
|      | \(\text{BIOL/GEOL 616} \) Research and Experimental Design | 2 |

Select one course of the following: \(3\)-4

|      | \(\text{BIOL 505} \) Marine Biology | |
|      | \(\text{BIOL 515} \) Biogeography | |
|      | \(\text{BIOL 517} \) Ecological Physiology | |
|      | \(\text{BIOL 539} \) Behavioral Ecology | |
|      | \(\text{BIOL 546} \) Techniques in Vertebrate Ecology | |
|      | \(\text{BIOL 549} \) Biodiversity and Conservation | |

Select one course of the following: \(4\)

|      | \(\text{GEOL 512} \) Invertebrate Paleontology | |
|      | \(\text{GEOL 513} \) Vertebrate Paleontology | |
|      | \(\text{GEOL 514} \) Paleobotany | |
|      | \(\text{GEOL 545} \) Taphonomy | |

Religion

\(\text{REL}_5_2\) Graduate-level Religion \(3\)

Electives

Selected in consultation with the student’s faculty advisor \(22\)-23

|      | \(\text{BIOL 415} \) Ecology | |
|      | \(\text{BIOL 437} \) Animal Behavior | |
|      | \(\text{BIOL 504} \) Biology of Marine Invertebrates | |
|      | \(\text{BIOL 505} \) Marine Biology (if not taken to meet a core requirement) | |
|      | \(\text{BIOL 507} \) Herpetology | |
|      | \(\text{BIOL 515} \) Biogeography (if not taken to meet a core requirement) | |

**Total Units** 50

1 Registration required for each quarter in residence; 0.5 unit per quarter. Maximum counted toward the degree total is 3 (6 quarters of seminar).

**Noncourse requirements**

**Seminar attendance requirements**
All graduate students in residence must register for and attend Seminars (BIOL 607 Seminar in Biology or GEOL 607 Seminar in Geology) each quarter at Loma Linda University.

**Advancement to candidacy**
Students may apply for advancement to candidacy by completing Form A, which requires: Completing all deficiencies and corequisites.

- Completing an approved written project proposal.
- Passing the written comprehensive examination.

**Final examinations**
Students are expected to pass a written comprehensive examination during their penultimate quarter in residence.

**Project**
As part of the core curriculum, the student will complete a project, in consultation with the advisor, involving four units of registration in research or special projects.

**Grade requirement for graduation**
A grade of B (3.0) or better is required in all courses that count toward the degree.

**Normal time to complete the program**
Two (2) years based on full-time enrollment; part time permitted.
Department of Pathology and Human Anatomy

The School of Medicine’s Division of Anatomy offers curricula leading to the Master of Science or the Doctor of Philosophy degree. The core curriculum offers a broad biomedical background. Course work provides opportunities for qualified students not only to study all aspects of human morphology from both didactic and investigative points of view, but also to develop a special area of research interest. Study and research on other species and in other biomedical disciplines may be included in the student’s curriculum. While working on a significant research problem, students are introduced to research methods through scientific literature and the laboratory. They acquire experience in scientific communication by participating in seminars, writing critical reviews, and reporting results of research experience either in thesis/dissertation form or as publishable/published papers.

The Doctor of Philosophy degree is designed to prepare the graduate for a career in independent research and teaching in university, clinical, biotechnological, or government environments. In addition to technical skills, doctoral degree students are expected to develop creativity and independence.

The Master of Science degree provides content appropriate for persons preparing to teach at the secondary level or in related professional school areas, or for persons intending to pursue careers as research technicians.

Program learning outcomes

By the end of the anatomy program, the graduate should be able to:

1. Apply the biomedical sciences to the study of human anatomy.
2. Demonstrate mastery of molecular, cellular, and integrative aspects of anatomy.
3. Interpret current literature in anatomy.
4. Make original contributions to biomedical science.
5. Demonstrate scientific and professional ethics.
6. Explain the process of applying for external funding.*

* This objective is not applicable to M.S. degree students.

First-year curriculum (Ph.D. degree)

The first-year curriculum includes a course sequence taught by an interdisciplinary faculty that integrates all the disciplines of the biomedical basic science areas—moving from molecules through cellular mechanisms to integrated systems. In addition, a supplemental course covers research-related topics such as scientific communication and integrity, information handling and statistics, and successful grant proposal writing. Students learn of new developments in the biomedical sciences through weekly seminars, and gain presentation skills in a weekly student presentation seminar series. During the subsequent years, formal courses continue to broaden and integrate into a meaningful whole an understanding of the clinical consequences of cellular events.

Religion requirement

Students in the Master of Science (M.S.) degree curriculum are required to complete one, three-unit graduate-level religion course (RELT 617 Seminar in Religion and the Sciences). Students in the Ph.D. degree curriculum are required to complete three graduate-level religion courses of three or more units each. These must include RELT 617 Seminar in Religion and the Sciences; as well as RELE 525 Ethics for Scientists and RELR 588 Personal and Family Wholeness. A course in biblical studies (RELT 559 New Testament Thought, RELT 560 Jesus the Revealer: The Message of the Gospel of John, RELT 564 Apostle of Hope: The Life, Letters, and Legacy of Paul, or RELT 565 Vision of Healing: The Message of the Book of Revelation) may be substituted for either the ethical or relational course.

Research units

A student will, at all times, enroll for research units. An IP will be assigned until the student registers for new units. The units should be spread over the time it takes to complete the thesis or dissertation research satisfactorily. An IP may not be carried longer than five quarters.

Admissions

In addition to Loma Linda University (p. 24) application requirements, the applicant must also complete the following requirements:

- a bachelor’s degree from an accredited U.S. college or the equivalent from an international university.
- general test of the Graduate Record Examination (GRE): A total (verbal plus quantitative) score of no less than the sum of the scores corresponding to the 50th percentile of each, with neither score less than the 35th percentile; analytical writing 4.0. GRE scores older than five years from the date of matriculation are not considered.
- a full year of each of the following undergraduate courses:
• general biology
• general chemistry
• organic chemistry
• general physics
• biochemistry (a minimum of one quarter/semester)
• Strongly recommended:
  • upper division biology (such as cell and molecular biology)
  • a full year of biochemistry with labs
  • research experience
  • calculus

PLEASE NOTE: CLEP (College-Level Examination Program), pass/fail performances, and online classes are not acceptable for the science required courses. Additionally, science credits earned in professional schools (e.g., allied health professions, business, dentistry, nursing or pharmacy) do not fulfill requirements for admissions to the graduate program.

The program reserves the right to decide on the equivalence of courses presented by the applicant.

Programs

Anatomy — M.S. (p. 282), Ph.D. (p. 282) Comparison (p. 283)

Pathologists’ Assistant — M.H.S. (p. 284)

Anatomy — M.S.

A minimum of 45 units is required for the M.S. degree, as detailed in the table below. Two options, a research track and a course work track, are available. Students must maintain a G.P.A. of at least 3.0. Students must adhere to all University and program policies as published in the Student Handbook, University CATALOG, or Student Guide. Policies and requirements are subject to change.

IBGS 605 Integrative Biology Presentation Seminar (1 unit)

Total Units 45

1 Registration and attendance required every quarter in residence, but units do not count toward total required for graduation.

Noncourse requirements

Course work option: a comprehensive written examination over the graduate course work in lieu of writing a thesis.

Research option: pass an oral examination given by student’s graduate guidance committee after the thesis has been completed.

Normal time to complete the program

Two (2) years, based on full-time enrollment; part time permitted

Anatomy — Ph.D.

For the Ph.D. degree, students must complete a minimum of 70 units, as detailed in the table below; and must maintain a G.P.A. of at least 3.0. In addition, doctoral students are required to pass both written and oral comprehensive examinations in order to advance to candidacy. They must successfully defend their dissertations before their guidance committee prior to being awarded the Ph.D. degree. Students must adhere to all University and program policies as published in the Student Handbook, University CATALOG, or Student Guide. Policies and requirements are subject to change.

¹ Integrated Biomedical Graduate Studies Seminar replaces Integrated Biomedical Graduate Studies Seminar as offered in the previous years.
Pathologists' Assistant — M.H.S.

Program director
Cheryl Germain

Clinical Coordinator
Michael Weitzeil

Medical director
Jeremy Deisch

Loma Linda University offers a professional course of study leading to the M.H.S. degree in pathologists' assistant. This degree prepares students for a career as mid-level health-care professionals in hospital pathology laboratories, private laboratories, universities, and industry.

Program learning outcomes
By the end of the program, the graduate should be able to:

1. Perform appropriate anatomic pathology techniques for the preparation, gross description and dissection of human surgical tissue specimens.
2. Perform appropriate autopsy pathology techniques for the recovery, preparation, gross description, and dissection of human organs and tissue specimens.
3. Communicate effectively verbally and in writing.
4. Administer a pathology laboratory/autopsy service successfully.
5. Train other clinical health professionals using appropriate pedagogy.

Accreditation
Loma Linda University is regionally accredited by the WASC Senior College and University Commission (WSCUC), 985 Atlantic Avenue, Suite 100, Alameda, CA 94501; telephone: 510/748-9001; fax: 510/748-9797; website: <http://www.wascsenior.org/contact>.

Pathologists' Assistant Program accreditation
In April, 2018, the Pathologists' Assistant Program was granted a five-year accreditation, with no citations or concerns, from the National Accrediting Agency for Clinical Laboratory Science (NAACLS). The next accreditation review is in 2023.

NAACLS is the premier accreditation for pathologists' assistant programs. Strict standards required for this accreditation ensure quality education and preparation for the certification examination and competence in the field as a pathologists' assistant. Loma Linda University School of Medicine's Pathologists' Assistant Program will adhere to required standards to produce high-quality and competent pathologists' assistants. For further information, contact the National Accrediting Agency for Clinical Laboratory Sciences, 5600 North River Road, Suite 720, Rosemont, IL 60018-5119; 847/939-3597 or 773/714-8880; website: <http://www.naacls.org>.

Admissions
The application period for the Class of 2021 (beginning in September, 2019) is November 1, 2018-March 31, 2019. Dates are strict for acceptance of application materials and only select applicants will be invited for an individual interview (no group interviews). This class will include 18 students. Accepted applicants will be notified by May 15 to begin the Autumn Quarter, 2019.

In addition to Loma Linda University (p. 24) requirements, the applicant must all fulfill the following requirements:

1. A baccalaureate degree from an accredited institution.
2. A preferred cumulative GPA of 3.0 or higher.
3. All prerequisite courses must be completed at an accredited college or university in the United States prior to admission. Transcripts from international institutions are not accepted.
   a. Biology with laboratory, 12 quarter units/ eight semester units
   b. General chemistry with laboratory (complete sequence), 12 quarter units/ eight semester units
   c. Organic chemistry (complete sequence), 12 quarter units/ eight semester units
   d. Microbiology with laboratory, four quarter units
   e. College algebra or higher, three quarter units
   f. English composition (complete sequence)
   g. Strongly recommended: medical terminology and conversational Spanish
4. Three letters of recommendation. Suggestions:
   a. A laboratory professional (clinical or research) with whom the applicant has worked (no relatives or friends)
   b. An undergraduate professor
   c. A work supervisor who can address the applicant's work ethic and dependability

Recommendations from family members or friends are NOT acceptable. DO NOT ask the pathologists' assistant (PA) with whom you've shadowed for a recommendation.

Recommendations:
- Speak with the persons you are asking for the recommendations and be sure they know you well, understand the program to which you're applying and why, make sure they can speak to your abilities, not just that you are a nice person.
- Be sure the persons supplying the recommendations understand that NO PAPER RECOMMENDATIONS ARE ACCEPTED! All recommendations must follow the electronic procedure. If the recommendation does not have an e-mail account, help them to create a free e-mail account on yahoo or google.

Proof of shadowing:
- During the interview the applicant will be asked to relate what a PA does during a normal working day. While there is no required number of hours to shadow, the applicant must be interactive, asking questions to learn the duties of a PA (ASCP). Contact information of the PA with whom you shadowed must be provided.
- The GRE or any other pre-graduate school standardized testing is not required.
- NOTE: There are no transfers of credit into the Pathologists' Assistant program. All courses in the curriculum must be completed at Loma Linda University.
The Pathologist’s Assistant program follows the LLU Nondiscrimination Policy (p. 13).

Total Units: 93

Multiple clinical rotations are assigned by the Program Director to ensure a varied and comprehensive clinical experience for each student. Rotations will include surgical pathology in academic and community settings, private laboratories, pediatric pathology, medical examiners offices and hospital autopsy services.

Non-Course Requirements

- Each student is required to complete 50 hours of community service by June of the second year of the program. The experience is documented using “Experience Transcripts” through the University Records office. The type of service is the decision of the student; multiple opportunities are available through the Pathologists’ Assistant program, the School of Medicine, and the University.
- Will Alexander Lecture Series: Attendance at the Will Alexander Wholeness Series is mandatory in PGY1. The series extends from Fall to Spring Quarters, once a month, Wednesday evenings for one hour. The lecture series includes topics on wholeness, personal/professional development, care of creation, diversity, and service.

Normal time to complete the program

Two (2) years (24 months) — full-time enrollment required

Biomedical Sciences — M.M.S.

Program Coordinator

Kenneth R. Wright

Students accepted into the Master of Medical Science (M.M.S.) degree program in biomedical sciences enroll in basic science courses with first-year medical students. Faculty members responsible for teaching students in the M.M.S. degree program teach these first-year basic sciences courses.

The program enables students to complete their studies in one academic year of full-time commitment. The program is intended to provide experience in the rapidly changing area of biomedical sciences; and it prepares students to apply to professional programs in medicine or to pursue other career options—such as high school teaching, patent law, or biotechnology management.

The curriculum includes four units of critical thinking, four units of medical practice management, three units of religion, and a capstone project of three units. The remaining units come from the first-year medical curriculum—which includes gross anatomy, embryology, physiology, cell structure and function, biochemistry, and genetics. Although courses share lecture/laboratory experiences and tests with the Doctor of Medicine (M.D.) degree program, such courses will not be transferred to the M.D. degree program. A student subsequently admitted to the M.D. degree program should expect to take, and pay for, the normal M.D. degree curriculum.

The program will culminate with a capstone project, which will give the student the opportunity to demonstrate proficiency/knowledge in the biomedical sciences and an understanding of current clinical literature.

Program learning outcomes

By the end of this program, the graduate should be able to:

1. Demonstrate proficiency in the biomedical sciences.
2. Discuss current biomedical literature related to the practice of medicine.
3. Successfully apply for acceptance into an academic program leading to a M.D. degree.

Admissions

Applicants to the Master of Medical Science must satisfy the same requirements (p. 291) as those applying to the Doctor of Medicine.
Program at Loma Linda University; that is, they will have completed a baccalaureate degree (or its equivalent) with a course of study that includes a year each of general biology, general chemistry, organic chemistry, and general physics and a course in biochemistry. Applicants are required to take the Medical College Admission Test (MCAT). Students are accepted into the program on recommendation of the School of Medicine admissions committee only.

**Normal time to complete the program**

One (1) year (3.5 academic quarters) — full-time enrollment required
Professional

Academic information

The information on student life contained in this CATALOG is brief. The Loma Linda University Student Handbook more comprehensively addresses University and school expectations, regulations, and policies; and is available on the University website as <llu (http://www.llu.edu/assets/central/handbook/documents/Student-Handbook.pdf).> All students are expected to familiarize themselves with the contents of the Student Handbook—including the section that pertains specifically to the School of Medicine—and to abide by its policies. Additional information regarding policies specific to the School of Medicine are provided by the school at the orientation to each academic year. Students who have questions about the Student Handbook should contact the senior associate dean for medical student education.

USMLE Steps I and II policy

The Student Handbook provides conditions and deadlines for taking and passing USMLE examinations.

Program requirements

We instituted a competency-based curriculum with full implementation in 2018.

Competencies for medical student education

**Patient Care** - Students must be able to provide patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health in the context of whole person care.

- **History Taking** - Obtain relevant and accurate information about the patient.
- **Physical Examination** - Perform appropriate, complete and accurate physical examination.
- **Oral Case Presentation** - Effectively communicate case orally with content appropriate for the clinical case, context, and audience.
- **Medical Documentation** - Document history and physical, differential diagnosis, problem list, and plan.
- **Procedures and Skills** - Perform skills and procedures required for patient care.
- **Patient Management** - Provide patient care that is compassionate, appropriate, and effective.
- **Psychosocial and Spiritual Care** - Integrate psychosocial and spiritual care with patient care.

**Medical Knowledge** - Students must demonstrate the ability to effectively source and validate medical information, possess an adequate foundation of basic science knowledge, and apply this knowledge and information to the care of patients using clinical reasoning and problem solving skills with a whole person care approach.

- **Fundamental Medical Knowledge** - Comprehend the established and evolving basic and clinical biomedical sciences, including epidemiological and social/behavioral sciences.
- **Health Promotion and Disease Prevention** - Promote health and prevent disease.
- **Ethics and Spirituality** - Employ ethical principles and knowledge of religious beliefs and spirituality of patients and their families to enhance patient care.
- **Sourcing and Evaluation of Medical Information** - Use information technology to optimize delivery of patient care.
- **Problem Solving and Clinical Reasoning Skills** - Demonstrate problem solving and clinical reasoning skills

**Professionalism** - Students must demonstrate professional behaviors, attitudes and beliefs that allow patients, colleagues, members of the healthcare team and society to approach each physician encounter with an expectation of trustworthiness.

- **Personal Attributes** - Show ownership for one's choices, attitudes, and behaviors.
- **Relationship Attributes** - Demonstrate compassion, integrity and respect for others, including sensitivity and responsiveness to a diverse patient population.
- **Societal Responsibilities** - Fulfill obligation to patients, colleagues, and society.

**Systems-Based Practice** - Students must demonstrate an awareness of and responsiveness to the larger context and system of health care, as well as the ability to call effectively on other resources in the system, including interprofessional teams, to provide optimal health care.

- **Health Care Delivery Systems** - Explain health care delivery systems and their potential effects on the health of patients and communities.
- **System Resources** - Apply system-level approaches to improve quality of healthcare.
- **Interprofessional Education** - Enable effective collaboration and improve health outcomes.

**Practice-Based Learning and Improvement** - Students must demonstrate the ability to investigate and evaluate their care of patients, appraise and assimilate scientific evidence, and continuously improve patient care based on constant self-evaluation and lifelong learning.

- **Evidence-Based Medicine** - Use principles of evidence-based medicine to optimize patient care.
- **Feedback, Self-assessment and Reflection** - Develop lifelong learning skills through seeking feedback, self-assessment, and reflection.
- **Practice-based Quality Improvement** - Engage in improvement of health care systems.

**Interpersonal and Communication Skills** - Students must be able to demonstrate culturally sensitive interpersonal and communication skills that result in effective information exchange and teaming with patients, their families, and professional associates.

- **Relationship-Building Skills** - Demonstrate relational versatility in relationships with colleagues, patients, and their families.
- **Effective Listening Skills** - Actively engage in the skill of listening.
- **Information Sharing Skills with Patients and their Families** - Communicate effectively within the context of the cultural beliefs, practices, and needs presented by patients and their communities.
- **Information Sharing with Professional Associates** - Present and document patient information to professional associates.
- **Communication with the Medical Team** - Work cooperatively with interprofessional health care teams.
Whole Person Care – Through the study and application of whole person care, student will develop a knowledge of wholeness that can be applied to their personal and professional lies and the care of patients.

- **Whole Person Care of Patients** - Apply whole person care model to the care of patients.
- **Personal Wholeness of Students** - Implement wholeness strategies for personal development.

### Doctor of Medicine degree requirements

The School of Medicine requires that a candidate for a degree or certificate from the school must have met the following requirements for the Doctor of Medicine degree:

- Completed all requirements for admission.
- Attended an accredited medical school for four academic years, the last two of which must have been spent at this school.
- Completed honorably all requirements of the curriculum, including specified attendance, level of scholarship, length of academic residence, and credit units.
- Completed additional special examinations covering any or all subjects of the medical curriculum, as may be required.
- Successfully completed USMLE examinations (Steps I and II), as specified—both clinical skills and knowledge components.
- Given evidence of moral character, of due regard for Christian citizenship, and of consistent responsiveness to the established aims of the University and of the school.
- Discharged financial obligations to the University.

The candidate is required to participate in graduation exercises upon completion of the academic program. If the candidate is out of sequence with his/her current class but would like to participate in the commencement exercises, s/he must have completed a minimum of three months of the required senior clerkships, i.e., medicine, pediatrics, family medicine or surgery sub-internship, preventive medicine and public health, intensive care and emergency medicine by April 1 of the year of graduation. Consent for the student to be absent, granted by the president of the University, is contingent on the recommendation of the dean to the president.

The families and friends of graduates are invited to be present at the official conferring of degrees service.

### Licensing examinations

**National**

The graduate who holds credentials from the USMLE may be granted a license by endorsement of the examining board of most states. Additional requirements made by some states are given in a pamphlet that may be obtained from the Federation of State Medical Boards, 400 Fuller Wiser Road, Suite 300, Euless, TX 76039-3855.

### Postgraduate training

**Graduate specialty medical education residencies**

Loma Linda University is affiliated with a variety of accredited residency programs in two sponsoring institutions. The first is Loma Linda University Health and the second Loma Linda-Inland Empire Consortium for Healthcare Education. Additional nonaccredited fellowships are available.

Graduate physicians wishing to apply for entrance into these programs should contact the director of the program.

These programs are sponsored by Loma Linda University Health and Loma Linda Inland Empire Consortium for Healthcare Education.

### Postgraduate training

In harmony with the needs of medicine today, the curriculum leading to the Doctor of Medicine degree is planned with the assumption that all students will take standard postgraduate training in one of the fields of medicine. This means serving as a resident for a minimum of three years in a hospital approved for this training by the Council of Medical Education and Hospitals of the American Medical Association.

The Office of the Senior Associate Dean for Medical Student Education supplies information and assistance for the arrangement of residencies. Since the school participates in the National Residency Matching Program, selection through this means constitutes approval by the School of Medicine.

### Continuing medical education

Recognizing the imperative of lifelong learning for professionals, the School of Medicine supports a program of continuing medical education for physicians beyond their formal postgraduate years. The Office of Continuing Medical Education is accredited by the Accreditation Council for Continuing Medical Education to provide **AMA PRA Category 1 Credit(s)**™ for physicians. Course offerings include weekly, bi-weekly, and monthly School of Medicine departmental grand rounds as well as a large number of one-day and multiday conferences and workshops that are presented locally and nationally for School of Medicine faculty, alumni, and practicing physicians within the geographic area in which the conferences are presented.

### Clinical facilities

Clinical instruction takes place primarily at Loma Linda University Health, which includes the Loma Linda University Children's Hospital, Loma Linda University East Campus Specialty Hospital, Loma Linda University Surgical Hospital, Faculty Medical Offices (FMO), Loma Linda University Behavioral Medicine Center, and Loma Linda University Medical Center—Murrieta. Additional clinical teaching sites include Kettering Medical Center in Dayton, Ohio, Jerry L. Pettis Memorial Veterans Medical Center, Riverside University Health System-Medical Center, and the White Memorial Medical Center. Also utilized are Arrowhead Regional Medical Center, Riverside Community Hospital, Glendale Adventist Medical Center, and Kaiser Permanente.
The instructional resources

Loma Linda University Medical Center (LLUMC)
Loma Linda University Medical Center is a major teaching center serving San Bernardino and Riverside counties. In addition to its large population of referred patients, the medical center is also a Level 1 trauma center for the region, comprehensive stroke center, STEMI receiving center, and a tertiary care center for high-risk obstetrics and neonatal intensive care. An extension houses the Loma Linda Cancer Center and the Proton Treatment Center for cancer therapy. Patients in the medical center are available for medical student, resident, and fellowship training.

Loma Linda University Children’s Hospital
Loma Linda University Children's Hospital provides a single, centralized location where newborns, infants, and children can receive comprehensive and emergent medical care. Being seen at a comprehensive center for children's health care assures parents and their children that all aspects of the child's health will be closely monitored and understood. Loma Linda University Children's Hospital staff—pediatric nurses, physicians, surgeons, anesthesiologists, radiologists, and other professionals—work together to assure that every patient receives the highest possible quality of medical attention.

The organization of a children's hospital also means that the hospital staff is chosen from among people who are specially trained and have a deep interest in children's health care. Every Loma Linda University Children's Hospital employee is highly skilled in dealing with children and has made the care of children a personal priority. The children's hospital is known as "the place for little faces."

Loma Linda University East Campus Specialty Hospital
East Campus Specialty Hospital (formerly Loma Linda Community Hospital) is a teaching resource for students in family medicine, physical medicine and rehabilitation, orthopaedics, and clinical neuroscience. In addition, it serves as the primary inpatient training site for house staff in family medicine.

Loma Linda University Surgical Hospital
Loma Linda University Surgical Hospital is a specialty hospital that serves as a teaching resource for various specialties.

Loma Linda University Behavioral Medicine Center
Loma Linda University Behavioral Medicine Center—a freestanding, full-service psychiatric hospital—opened in 1991. Loma Linda University Behavioral Medicine Center offers adult, child, adolescent, and chemical dependency services—including inpatient and partial hospitalization. Special emphasis is given to services that provide the integration of Christian faith with psychiatric care for patients desiring such.

Faculty Medical Offices
The Faculty Medical Offices (FMO) include facilities for multiple specialties and an outpatient surgery suite. The FMO is utilized for student outpatient experience.

Kettering Medical Center
Kettering Medical Center (KMC), part of the Seventh-day Adventist Health care system is a tertiary care, level 2 trauma center delivering whole person care. It is one of the two major teaching centers in the Dayton Metro area which serves a population of greater than 1.5 million. It features cutting edge technology, state of the art clinical services with a cardiovascular division providing high volume interventional cardiology services and all aspects of structural cardiac procedures including the greatest volume of transcatheter aortic valve replacements in the region, a cancer center, and state of the art neurologic services including acute interventions. KMC has a greater than 50-year tradition of medical education, including medical student from both Wright State University and Loma Linda, resident, and fellow education.

Jerry L. Pettis Memorial Veterans Medical Center
The Jerry L. Pettis Memorial Veterans Medical Center serves a wide geographic area and cares for a large population of veterans. Outpatient facilities, including a new state of the art ambulatory care center and inpatient wards are available for student and resident teaching. The residency programs are integrated with the Loma Linda University Medical Center and are under the supervision of the faculty of the School of Medicine.

Riverside University Health System—Medical Center
RUHS-MC, located 10 miles southeast of Loma Linda in the city of Moreno Valley, is a regional medical center providing care to all patients in need. Patients are available for student and resident training.

White Memorial Medical Center
White Memorial Medical Center is located approximately 60 miles west of Loma Linda in Los Angeles. The patient population reflects an inner-city profile with a large concentration of urgent medical and surgical, trauma, obstetrics, and pediatrics cases. Patients are available for student, resident, and fellowship training.

Medical Scientist — M.D./Ph.D.

Program director
Penelope J. Duerksen-Hughes

Objectives
Loma Linda University is committed to fostering the investigative skills of its medical students. Students interested in pursuing careers in academic medicine and medical research may wish to enroll in one of the combined degrees programs. The Medical Scientist Program is designed to develop a student’s independence and competence as an investigative scientist and clinician. It provides students with a broad educational base for the practice of medicine and related research. The program is administered by the School of Medicine in cooperation with the Faculty of Graduate Studies.

Program description
The Medical Scientist Program at Loma Linda University is designed to attract those students who are energized by doing biomedical research and wish to contribute substantially to this enterprise. The expectation is that graduates of this program will pursue careers in academic medicine and medical research. Areas of study for the Ph.D. degree include: anatomy; cancer; developmental, and regenerative biology; infection, immunity, and inflammation; and neuroscience, systems biology, and bioengineering. The program integrates graduate and medical education in a Christian environment and is designed to allow completion of both the PhD and MD degrees.

Students typically begin the combined degree program through completing two years of medical school, culminated by successful completion of Step 1 of the USMLE examination. Students will then transition to the PhD part of the curriculum, where they will take and pass required courses, successfully pass written and oral qualifying examinations, and complete and successfully defend doctoral dissertations. Students will then transition back to the MD program, where they will complete the last two years of training, completing all of
the standard clinical rotations, and take and pass Step 2 of the USMLE. A student must finish all requirements for the Ph.D. degree before being allowed to register for the last year of medical school. In most cases, the sequence should take approximately eight years to complete.

Combined degree students must complete the full curricula for both the MD and the PhD programs, with the exception that during the PhD years, two rather than three, three-unit religion courses are required, which must include RELT 617 Seminar in Religion and the Sciences and either RELR or RELR 500 level or above classes, and during the MD years, to complete 12 units of 700 level religion coursework rather than 14 units, with these 12 units to include RELR 775 Whole Person Care, REL 704 Medicine and Ethics, and REL 714 Advanced Medical Ethics. Students are encouraged to inquire about the possibility of waiving specific graduate level classes where equivalent mastery has been demonstrated in the MD curriculum.

Students interested in beginning the sequence with Ph.D. training, or who have other special requests, are encouraged to communicate with the program coordinator as some customization may be possible.

**Admissions**

Admission into the Medical Scientist Program is competitive and requires evidence that the student is likely to develop into a successful medical scientist. The student must submit separate applications to the School of Medicine for both the M.D. and the Ph.D. degree programs, and meet the stated admissions requirements for each program. The application package for the Ph.D. degree requires scores for the general test of the Graduate Record Examination. Both programs must accept the candidate in order for the candidate’s credentials to be evaluated by the MD/PhD committee for acceptance into the Medical Scientist Program (MD/PhD). Students entering the M.D./Ph.D. combined degrees program who determine that a research career is inappropriate may elect to complete the M.D. degree program independently. Students entering the Ph.D. degree program who desire a career in academic medicine may choose to apply for admission to the M.D./Ph.D. combined degrees program at a point after their entry into the Ph.D. degree program; however, the standard medical school application process will be required at that point.

**Financial assistance**

Financial assistance to students in the Medical Scientist Program may provide:

1. Cost-of-living stipends during those periods in which students are most directly involved in graduate education. The amount of the stipend is equivalent to that available to Ph.D. degree students in the basic science graduate programs.*
2. Tuition waivers for all graduate program course work.
3. Tuition deferment for the M.D. curriculum, upon completion of a Ph.D. degree.

Tuition assistance for the MD portion of the combined degree program is not given to all students who earn both degrees. Assistance for the MD portion will only be given in cases where an applicant has received approval from the School of Medicine MD/PhD Committee prior to beginning the MD coursework. Assistance that is received will be in the form of an institutional loan which will cover MD tuition and fees but will not include living expenses. The School of Medicine makes provision for the loan to be forgiven when a recipient meets the terms described below and in the loan agreement.

M.D./Ph.D. degree students are ordinarily expected to complete their Ph.D. degree before beginning the third year of medical school. Students who have not completed the Ph.D. degree may apply for a tuition deferment for their third year of the medical curriculum, and, in unusual cases, for the first term of their fourth year. Applications for tuition deferment beyond the first two years must be approved by the student’s dissertation committee and signed by the dissertation advisor, the associate dean for basic sciences, and the dean of the School of Medicine. Under no circumstances will a student be granted a tuition deferment until s/he has finished the requirements for the Ph.D. degree. If a student withdraws from the Ph.D. degree program his/her tuition deferments will be converted to a loan. Completion of the M.D. degree terminates the student’s participation in the Medical Scientist Program and ends the availability of tuition waiver. Any tuition deferments then in force will convert to loan obligations at that time.

If a student has received acceptances into both the MD and the PhD programs, but is not accepted into the MSP, he or she may elect to complete one or both degrees; however, tuition support for the medical program will not be available to these individuals.

* Stipends from the School of Medicine will be awarded for the first two years of the graduate program, provided that the student makes satisfactory academic process and remains in good and regular standing. Stipends covering study beyond the first two years should ordinarily be obtained from the individual laboratories or departments in which the student conducts research.

**Medicine — M.D. Curriculum**

The curriculum in medicine consists of four academic years. The first two are oriented to the sciences basic to the practice of medicine. Exposure to patient care is integrated within these two years. The remaining two academic years consist of clinically-oriented core instruction and 20 weeks of clinical electives.

THE FIRST YEAR of medical education establishes a foundation in the sciences basic to the practice of medicine—with emphasis on principles and mechanisms of normal development, structure, and function—including the normal changes of aging and the behavioral considerations that influence normal development. Course content is organized around individual organ systems whenever possible. The first year begins to develop the skills, values, attitudes, and professional behaviors that are integral to the safe, competent, compassionate, ethical, and Christian practice of medicine—both now and in the future. The educational program makes use of a wide variety of pedagogical methods—including but not limited to traditional lecture, small group, case-based learning, personalized computer-based instruction, quantitative laboratory experiences, and patient-care experiences.

THE SECOND YEAR of medical education continues to establish a foundation in the sciences basic to the practice of medicine—with emphasis on principles and mechanisms of abnormal structure and function, principles of therapy, and behavioral considerations that affect disease treatment and prevention. Course content is organized according to individual organ systems whenever possible. The second year continues to develop skills, values, attitudes, and behaviors that are integral to the safe, competent, compassionate, ethical, and Christian practice of medicine—both now and in the future. The educational program will make use of a wide variety of pedagogical methods—including but not limited to traditional lecture, small group,
problem-based, and case-based learning, personalized computer-based instruction, quantitative laboratory experiences, and longitudinal patient-care experiences.

THE THIRD YEAR of medical education establishes a body of knowledge, skills, values, attitudes, and behaviors in seven core clinical science disciplines to build a foundation for patient care in ambulatory and hospital-based settings. Students obtain this foundation through a process of self-directed learning, independent study, and guided supervision and teaching by house staff and faculty members. Students have ample opportunity to learn the value of honor, shared responsibility, and accountability by directly participating in patient-care activities as junior colleagues on the health-care team.

The didactic program will emphasize: a) understanding the pathophysiology of disease, b) establishing diagnoses through interpretation of physical examination and diagnostic data, and c) applying management principles to patients with acute and chronic conditions. Recurring experiences in whole person care, medical ethics, laboratory medicine, radiology, health maintenance, and disease prevention are integrated into the seven core disciplines. Students have the opportunity to explore an area of interest during an elective experience to begin the process of choosing a career in medicine.

THE FOURTH YEAR of medical education requires students to integrate the entirety of their medical knowledge, skills, values, and attitudes gained during the first three years and apply it more autonomously to patient care. Students participate in supervised patient-care experiences in emergency medicine, intensive care medicine, and preventive medicine and public health; and a sub-intern-level experience in medicine, surgery, family medicine, or pediatrics. Although repetitive clinical duties during the fourth year are a necessary part of preparing students for the rigors of postgraduate training, students still have ample opportunity to pursue individual interests during a minimum 20 weeks of elective rotations. To reestablish the importance of science in medical practice, up to a one-month elective must be in the basic science discipline of the student’s choosing. Students have adequate vacation time to study for Step II (clinical knowledge and clinical skills) of the USMLE and successfully participate in the residency selection process.

Admissions

Applicants are selected based on a holistic review of the collegiate academic record, MCAT scores, medical and service experiences, mission fit, recommendations, and personal characteristics which include personal integrity, and personal interviews. The Admissions Committee seeks individuals who have demonstrated a serious personal commitment to the practice of medicine and have altruistic goals and ideals.

The School of Medicine is owned and operated by the Seventh-day Adventist Church; therefore, preference for admission is given to members of the Church. However, it is a firm policy of the Admissions Committee to admit applicants from other faiths who have demonstrated a commitment to Christian principles and are best suited to meet the educational goals of the School. No candidate is accepted on the basis of religious affiliation alone.

The study of medicine

To prepare for a career in medicine, applicants should quest for a broad understanding in the major areas of knowledge—the natural sciences, the behavioral sciences, and the humanities—which will assist them in learning throughout their lives.

The School of Medicine Admissions Committee selects applicants who are best suited to fulfill the mission of the school and to successfully practice medicine. The committee selects applicants who demonstrate the ability to learn independently, to think critically, and to articulate clearly—both orally and in written form—their ideas and opinions. It is important that applicants to the School of Medicine demonstrate excellent interpersonal skills and show evidence of sensitivity to the needs of humanity.

The Admissions Committee puts forth considerable effort to ensure that an applicant is qualified for medical school. The applicant’s academic record and MCAT scores are reviewed to assess the applicant’s ability to handle the academic rigors of the medical curriculum. The committee also looks for prerequisite qualities of character and personality, potential
for self-direction, good judgment, and dedication to the ideal of service to humanity.

**General entrance information**

On rare occasions, academically exceptional applicants may be considered for admission who have completed 90 semester/135 quarter hours at an accredited institution of higher education in the United States or Canada. Preference is given to college/university graduates.

Credit for the following courses is required of all applicants:

- General biology (excludes microbiology, anatomy and physiology), one year sequence with lab
- General or inorganic chemistry, one year sequence with lab
- Organic chemistry, one year sequence with lab
- General physics, one year sequence with lab
- Biochemistry, one year sequence with lab

CLEP pass/fail performances, and online courses are not acceptable for the science required courses. Additionally, science credits earned in professional schools (e.g., allied health professions, business, dentistry, nursing, or pharmacy) do not fulfill requirements for admission to medicine. Advanced Placement (AP) credits for the required science courses generally are not accepted.

Science credits earned in professional schools (e.g., allied health professions, business, dentistry, nursing, or pharmacy) do not fulfill requirements for admission to medicine. CLEP and pass/fail, and online performances are not acceptable for required courses.

**Required**

**Medical College Admission Test (MCAT)**

All applicants must complete the MCAT prior to consideration by the Admissions Committee. The MCAT is based on the knowledge gained from required science courses. The exam must be taken no later than September of the year prior to application. MCAT scores older than three years from the date of matriculation are not considered.

**Health Care Experience**

Applicants are required to obtain physician shadowing experience and direct patient care exposure to better inform their decision for a career in medicine.

**Technical Standards**

All applicants must meet the Admission and Graduation Standards with or without reasonable accommodations. Please take a moment to view our technical standards:

Loma Linda University School of Medicine candidates for the M.D. degree must have abilities and skills of five varieties, including: observation; communication; motor function; intellectual-conceptual, integrative, and quantitative abilities; and behavioral and social attributes. Technological compensation can be made for some handicaps in certain areas, but a candidate should be able to perform in a reasonably independent manner without the use of a surrogate.

**OBSERVATION:** The student must be able to observe demonstrations and experiments in the basic sciences, including but not limited to physiologic and pharmacologic demonstrations in animals, microbiologic cultures, and microscopic studies of microorganisms and tissues in normal and pathologic states. A student must be able to observe a patient accurately at a distance and close at hand. Observation necessitates the functional use of the senses of vision, touch, hearing, and somatic sensation. It is enhanced by the functional use of the sense of smell.

**COMMUNICATION:** A student must be able to speak, to hear, and to observe patients in order to elicit information; describe changes in mood, activity, and posture; and perceive nonverbal communications. A student must be able to communicate effectively and sensitively with patients, colleagues, and other personnel. Communication includes not only speech but also reading and writing. The student must be able to communicate effectively and efficiently in oral and written form with all members of the health-care team.

**MOTOR FUNCTION:** Students should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers. A candidate should be able to do basic laboratory tests (urinalysis, CBC); carry out diagnostic procedures (proctoscopy, paracentesis); and read EKGs and X-rays. A candidate should be able to execute motor movements reasonably required to provide general care and emergency treatment of patients. Examples of emergency treatment reasonably required of physicians are cardiopulmonary resuscitation, the administration of intravenous medication, the application of pressure to stop bleeding, the opening of obstructed airways, the suturing of simple wounds, and the performance of simple obstetrical maneuvers. Such actions require coordination of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision.

**INTELLECTUAL-CONCEPTUAL INTEGRATIVE AND QUANTITATIVE ABILITIES:** These abilities include measurement, calculation, reasoning, analysis, and synthesis. Problem solving, the critical skill demanded of physicians, requires all of these intellectual abilities. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

**BEHAVIORAL AND SOCIAL ATTRIBUTES:** Medical students must possess the emotional health required for appropriate utilization of their intellectual abilities, the exercise of good judgment, and the timely completion of all responsibilities attendant to their academic work, team work, and patient care. They must demonstrate the ability to develop mature, sensitive and effective professional relationships with peers, faculty, staff, members of the healthcare team, and patients. Medical students must demonstrate empathy, and concern for others while respecting appropriate personal and professional boundaries. Medical students must demonstrate integrity as manifested by truthfulness, acceptance of responsibility for one’s actions, accountability for mistakes, and the ability to place the well-being of the patient above their own when necessary. They must be able to tolerate demanding workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility and to learn to function in the face of uncertainties inherent in medical education and clinical practice settings.

**Recommended**

Introductory courses in basic statistics, psychology, and sociology

**Application**

Application to Loma Linda University School of Medicine must be submitted through the American Medical College Application Service (AMCAS). Application for the next year’s entering class opens
approximately May 1. For more information or to fill out an application, visit https://students-residents.aamc.org/. The deadline to submit an AMCAS application is November 1. The AMCAS application, transcripts, and fee must be submitted to AMCAS by the deadline.

Secondary application
Invitations to submit the secondary application are sent to all our applicants. Upon receipt of an AMCAS application (allowing up to six weeks after submission of the application to AMCAS), an email is sent inviting the applicant to complete the secondary application. The deadline for submission of the secondary application is November 15. There is a non-refundable fee for the secondary application. Secondary application fee waivers are granted to those who have received a fee waiver from AMCAS.

Letters of recommendation
The pre-health professions committee letter or packet is required; no other recommendations are required.

For schools which do not provide a pre-health professions committee letter or packet, a minimum of three and maximum of six letters of recommendation are required. These letters are an appraisal of the applicant’s character, ability, and suitability for a medical career by persons knowledgeable about the applicant’s past performance. Letters are to be from a science professor who has taught the applicant, a physician whom the applicant has shadowed, an employer, a pastor or other clergy, or a leader in applicant volunteering experiences.

All letters of recommendation must be submitted to AMCAS.

Procedure
The application procedure is as follows:

1. Applicants submit an application through AMCAS. AMCAS verifies the data and forwards the information to the School of Medicine.
2. After receipt of verified applications from AMCAS, the School of Medicine invites applicants to complete the secondary application.
3. After receipt of secondary application and letters of recommendation have been submitted and reviewed, applicants may be invited to interview.
4. AMCAS applications, secondary applications, letters of recommendation, and interview reports are evaluated. The Admissions Committee evaluates AMCAS applications, secondary applications, letters of recommendation, and the interview reports. The Admissions Committee determines whether an applicant is accepted or rejected. All applicants are notified of the Admissions Committee decision regarding their applications. Admissions Committee decisions are final. Acceptance notices are sent to regular applicants beginning December of the year preceding admission to the School of Medicine, continuing until the class is filled.
5. Accepted applicants respond online by accepting the offer of admission and the technical standards.

Early decision program
Qualified applicants who wish to secure a seat in the next year’s entering class may apply through the Early Decision Program (EDP). Applicants considered for acceptance through EDP have demonstrated exceptional performance in academics, non-academics, and mission fit. Applicants select EDP on the AMCAS application and agree to comply with the program restrictions. Application submission is between June 1 and August 1. The secondary application and other documents must be received by August 15. Applicants are notified of Admissions Committee decisions no later than October 1. EDP applicants may not apply to other medical schools during this time period. If the applicant is accepted at Loma Linda University School of Medicine, the applicant is committed to that decision. If the applicant is not accepted by October 1, the applicant may then apply to other medical schools. Applicants not accepted by October 1 will be considered in the regular applicant pool.

Pre-entrance health requirement and health coverage
Medical students are exposed to patients beginning in the first year of medical education. Because of this, it is necessary for students to have immunizations against certain infectious diseases. In order to complete registration for the first academic quarter, students must give evidence in the form of physician records or college health service records that they have met immunization requirements. Students without proper verification will be required to receive immunizations, and the charges will be billed to the students’ account. Pre-entrance requirements may be found at https://home.llu.edu/campus-and-spiritual-life/student-health-service/new-students-health-requirements. Students are also required to have certain injections and immunizations repeated at various intervals during their enrollment, including an annual skin test for tuberculosis.

Medical students are required to have an influenza vaccination on an annual basis in order to meet the requirements of clinical sites where students will be working. These vaccinations will be administered by the Student Health Service at the beginning of each flu season.

Incoming students are expected to have routine dental and medical care as well as elective surgery attended to before registering for medical school.

All School of Medicine students are provided with health coverage through the University’s Department of Risk Management. The Student Health Plan remains in effect for students who are regularly enrolled, provided they register and pay tuition and fees on time each quarter. For Student Health Plan benefit information, visit https://home.llu.edu/campus-and-spiritual-life/student-health-service. The plan does not cover optical care and provides only limited dental care. For these reasons it may be to the student’s advantage to maintain a current personal policy. A student who does not have health insurance coverage for their spouse/children may purchase coverage through the University’s Department of Risk Management at the time of registration or during specified enrollment periods. Government regulations prohibit the use of student loan funds to provide medical insurance or services for a student’s spouse or children.

Students who wish to review a copy of the current student health plan or have further questions about the plan should contact Risk Management at (909) 651-4010. Annual tuition also covers the cost of disability insurance. Details will be presented during orientation or upon request.

Transfer
Loma Linda University School of Medicine accepts transfer applications if transfer positions are available. Opportunities for transfer are rare. Transfer applications are not accepted if there are no transfer positions available.

If a transfer position should be available, applications are accepted only from students in good standing at LCME-accredited allopathic medical schools in the United States. Acceptance is limited to students who have successfully completed the second year and not yet started the third year, without any breaks. Students must have completed all preclinical coursework and passed USMLE Step 1.
Contact the Office of Admissions at 909-558-4467 between April 15 and May 1 of the year of desired transfer to determine whether transfer positions are available or for further information.

Total Units: 244.5

1. Upon permission, students may complete this course as the first elective in the fourth year

**Normal time to complete the program**

Four (4) years — full-time enrollment required
Anesthesiology

The goals of the Department of Anesthesiology are to:

1. Provide necessary anesthesia, analgesia, pain control, and intensive care of the highest caliber with Christian empathy to patients of Loma Linda University Medical Center and its affiliated facilities.
2. Educate medical students, dentists, nurse anesthetists, and anesthesiology residents in the fields of anesthesia, critical care, perioperative medicine, and pain control.
3. Provide increased knowledge on the use of anesthetic and analgesic agents.

The objectives of the Department of Basic Sciences are to:

1. Offer relevant course work for the various professional curricula that will provide essential foundational content, an understanding of the current state of the field, and the skills required to maintain currency.
2. Offer graduate curricula leading to M.S. and Ph.D. degrees that are designed to provide graduate students with the information and tools needed to succeed as independent educators and investigators.
3. Conduct and publish peer-reviewed research that contributes to knowledge in the biomedical sciences.
4. Support Loma Linda University colleagues through collaborations and consultations that will assist in research and instruction.

The Department of Cardiothoracic Surgery is dedicated to providing comprehensive, quality surgical care to patients with heart, vascular, and thoracic disease. The department’s clinical services include adult cardiac surgery, congenital cardiac surgery, adult and pediatric heart transplantation, general thoracic surgery, vascular surgery, and trauma.

Other equally important goals of the department are to:

1. Educate medical students through lectures, clinical rotations, research projects, and faculty role modeling.
2. Train the next generation of competent surgeons in the specialty. The department provides opportunities for an ACGME-approved residency in cardiothoracic surgery (three-year program).
3. Partner with the Global Health Institute of Loma Linda University by providing expert surgical help to other countries in need.
4. Provide support for innovation and promotion of clinical research.
5. Promote collaboration with adult cardiology to offer advanced therapies to select patients with complex cardiovascular disease, e.g., transcatheter aortic valve replacement (TAVR), percutaneous mitral valve repair (MitraClip), mechanical circulatory support (LVADs).
6. Provide clinical support and professional resources to the community-based cardiac surgery program at LLUMC-Murrieta.
1. Provide and coordinate cost-effective, empathetic, compassionate and excellent pre-hospital, emergency, and trauma services.
2. Support and contribute to the achievement of medical education competency for all categories of emergency-care professionals.
3. Develop initiatives that promote increased understanding of and improved techniques and skills in emergency-care practice, heighten positive perception of this specialty, and contribute to quality research in this area.
4. Promote teamwork skills among the various services and professionals comprising the emergency medical system.

The objectives of the Department of Family Medicine are to:

1. Provide medical students and residents with education and training that exemplifies excellence, compassion, and wholeness in the family medicine specialty.
2. Educate students and residents to provide evidence-based, best-practice, chronic-disease care that spans the arc of care—from prevention to management of palliative care.
3. Teach students to evaluate and manage common problems at the primary-care level, providing continuing and comprehensive health care for individuals of both genders and all ages.
4. Teach students and residents skills necessary for taking a spiritual history and for incorporating spiritual and psychosocial dimensions into the biomedical aspects of clinical care.
5. Introduce students and residents to the use of a systems approach and quality-improvement techniques to improve patient safety, and assure the delivery of best-practice, evidence-based care to a population of patients.
6. Introduce students to family physician role models so that students will be able to make informed choices regarding family medicine as a career option.
Gynecology and Obstetrics

The purpose of the Department of Gynecology and Obstetrics is to provide an academic environment that encourages learning, teaching, and research.

The objectives of the department are to:

1. Provide medical students with a broad base of knowledge in obstetrics and gynecology for entrance into a primary care specialty.
2. Instill a standard of medical excellence that will lead to a continuing program of medical education reaching through and beyond the residency years.
3. Provide faculty members who function as role models for the students and residents.

Medical Education

The goal of the Department of Medicine is to innovate and provide leadership in:

• Healing
• Education
• Discovery
• Integrated health-care delivery
• Shaping institutional and public policy

The Department of Medicine supports the mission of Loma Linda University and of Loma Linda University Health.

Vision
• The Department of Medicine becomes a greater regional clinical resource.
• The Department of Medicine fosters a spirit of inquiry expressed in research and teaching. Its faculty advances clinical practice and understanding.

Themes
• Renewal
• Growth
• Teamwork

The goal of the Department of Neurology is to deliver the highest quality neurological care to patients by integrating academic medicine with whole-person care, research, and education. With the rapid development of technology, it is essential that medical students learn to recognize and treat a variety of neurological disorders. The objective of the department’s four-week rotation is to further God’s work of restoring wholeness to people by teaching the essentials of clinical neurology through compassionate patient care, bedside teaching, and a focused didactic curriculum.

Ophthalmology

The Department of Ophthalmology is committed to:

1. Provide an academic environment that will foster an in-depth understanding of the specialty of ophthalmology.
2. Provide education for students, residents, and fellows that prepares them for an academic, community, or mission practice.
3. Encourage and support clinical research.
4. Inspire students and residents to promote preventive ophthalmology.

Orthopedic Surgery

The Department of Orthopedic Surgery provides a lecture series to junior medical students. Series objectives are to:

1. Introduce the specialty of orthopedic surgery.
2. Teach physical diagnosis of the musculoskeletal system.
3. Review care of common orthopedic conditions.
4. Survey orthopedic subspecialties and orthopedic surgery.
5. Stimulate students to consider careers in orthopedic surgery.
6. Stimulate interactive discussion of various orthopedic conditions.
7. Communicate high-yield orthopedic board topics for future self-study.

Pathology and Human Anatomy

The primary goal of the Department of Pathology and Human Anatomy is to educate capable, compassionate, scientifically-minded physicians dedicated to the mission and objectives of Loma Linda University School of Medicine. Courses offered by the department provide a bridge to the clinical sciences, spanning the two years of the preclinical curriculum—from foundational principles of gross, microscopic, and developmental anatomy to modern pathophysiologic concepts. Progressive emphasis is placed on cultivating the student’s ability to integrate basic knowledge of structure, function, and dysfunction of the human body with analytical skills in solving clinical problems.

The department is strongly committed to facilitating the development of both teaching and investigative skills on the part of faculty members, graduate students, medical students, and residents.

The Department of Physical Medicine and Rehabilitation was established to develop clinical services in rehabilitation medicine and to offer resources for teaching and research in the field of rehabilitation. These clinical and academic activities cover a wide spectrum of clinical medicine. They have as a central basis the notion that rehabilitation is a complex process involving not only multiple disciplines but also consideration of the patient in the broader context of the family and community. Psycho-social-spiritual aspects of rehabilitation complete the whole-person focus, thus providing an opportunity for faculty members and students to observe and experience patient care while meeting the goals and objectives of the School of Medicine.

**Preventive Medicine**

The Department of Preventive Medicine is involved in preventive medicine clinical care, education, and research for the School of Medicine. The department provides a comprehensive, four-year preventive medicine curriculum to all medical students. Graduate medical education training is available in a general preventive medicine residency, an occupational medicine residency, an addiction medicine fellowship, and a combined family and preventive medicine residency.

The department works with and supports the School of Public Health, as well as other Loma Linda programs in health promotion and epidemiology research projects—the most prominent of which is the Adventist Health Study. Preventive medicine faculty members direct clinical services at the Center for Health Promotion, the Occupational Medicine Center, the Social Action Community (SAC) Health System clinics, and five separate Inland Empire university health services. A diverse faculty focuses primary activities through the School of Medicine, the School of Public Health, the Jerry L. Pettis Memorial Veterans Medical Center, the San Bernardino
County and Riverside County health departments, and other regional and community entities.

**Psychiatry**

The Department of Psychiatry provides educational programs that include clinical training and research for medical students, psychiatry residents, and psychiatry fellows.

During the first and second years, the Department of Psychiatry directs the teaching of the behavioral sciences courses. In these interdisciplinary courses, lectures and demonstrations cover a broad range of human behavioral determinants—including the biology, psychology, sociology, and psychopathology of behavior. It also deals with a holistic concept of behavior and its spiritual components.

The third-year, six-week psychiatry clerkship includes: five weeks divided between two psychiatry treatment sites, and one week at an addiction treatment site. These clerkship experiences offer broad and varied training in the treatment of psychiatric problems of adults and children. Students also participate in an interactive, case-based seminar series.

Fourth-year medical students have the opportunity to take electives with psychiatry faculty members in child and adult settings, as well as an intensive reading/discussion course in religion and psychiatry.

Radiation Medicine

The fundamental goal of the Department of Radiation Medicine is to provide optimal care to patients by means of ionizing radiation, much of it using proton therapy—the hospital-based application of which was pioneered by the department. This care rests on the foundation of basic, translational, and clinical research—which, combined with patient education, is always pursued to ensure that patients and their families receive state-of-the-art treatment planning and delivery, follow-up and posttreatment care, and support.

Radiology

The purpose of the Department of Radiology is to provide:

1. Excellent patient services through imaging studies, special diagnostic procedures, and interventional procedures.
2. Educational programs that include research and clinical training for technologists, physicists, medical students, postdoctoral fellows, radiology residents and fellows.
3. Research support through laboratory and clinical facilities.
4. Support for the local, national, and international interests and programs of Loma Linda University.

The following goals of the Department of Surgery are in harmony with the stated purposes and philosophy of Loma Linda University School of Medicine:

1. Provide the highest standard of surgical patient care.
2. Maintain educational programs in the surgical disciplines for medical students, residents, and fellows.
3. Provide facilities for laboratory and clinical research in the areas of surgical interest.

Welcome to the School of Nursing, where you will receive an education that will prepare you for a life of Christian service in the nursing profession. This Student Handbook will introduce you to the programs of the school and give you information on progression and services available to help you reach your goal.

For more than 114 years, the school has educated nurses to serve the needs of humanity. We look forward to working with you on your academic journey here at the school.

Our purpose is to provide an environment where you can gain the knowledge and skills to become a caring, competent, professional nurse. The faculty, staff, and administration are committed to ensuring that those who study here will develop to the fullest potential and become nurses capable of fulfilling the University’s mission, with God’s help, “To make man whole.”

Elizabeth Bossert, Ph.D., RN
Dean, School of Nursing
School foundations

History

The School of Nursing, established in 1905, was the first in a group of schools that became Loma Linda University in 1961. In 1907, the first class to graduate included seven students—five women and two men. As the school developed and became a college-based program rather than a hospital diploma program, the baccalaureate degree commenced in 1949. The Master of Science degree was granted in 1957. The Doctor of Philosophy degree was added to the existing programs of the school, with the first class starting in 2002. The Doctor of Nursing Practice degree began in 2010.

Accreditation

The School of Nursing received accreditation by the National League for Nursing (NLN) (61 Broadway, New York, NY 10006) in 1951. In 2000, initial accreditation from the Commission on Collegiate Nursing Education (CCNE) was received. The Bachelor of Science (B.S.) in nursing, Masters of Science (M.S.) in nursing, and Doctor of Nursing Practice (D.N.P.) at Loma Linda University School of Nursing are accredited by the CCNE (655 K Street, NW, Suite 750, Washington DC 20001, 202/887-6791). The B.S., M.S. and D.N.P. degree curricula are accredited by the CCNE through 2027. The nurse anesthesia area received initial accreditation from the Council on Accreditation of Nurse Anesthesia Education Programs (COA) in 2014 (222 South Prospect Avenue, Park Ridge, IL 60068-4001) and is currently accredited through 2027. The California Board of Registered Nursing (BRN) (P. O. Box 944210, Sacramento, CA 94244-2100) granted continuing approval in 2014. Consumers are encouraged to contact CCNE, COA, or BRN with comments about the program.

Agency membership

The School of Nursing holds agency membership and actively participates in the following major professional organizations: American Association of Colleges of Nursing, NLN, COA, and Western Institute of Nursing.

SN vision:

Transforming lives through nursing education, professional practice, and research.

SN mission

The education of nurses dedicated to professional excellence and compassion in clinical practice, education, and research. Loma Linda University-educated nurses will further the healing and teaching ministry of Jesus Christ through commitment to whole person care and Christian values.

Programs of study

The School of Nursing prepares professional nurses to practice with a Christian perspective through the following programs:

1. The baccalaureate degree curriculum—designed to prepare competent, beginning-level professional nurses who are committed to excellence in practice.
2. The master’s degree in nursing program—designed to prepare nurses for leadership as nurse educators or nurse administrators.
3. The Doctor of Nursing Practice degree—designed to prepare nurses for leadership as advanced practice registered nurses, clinical nurse specialists and nurse practitioners, nurse anesthetists, and other advanced nursing roles in the clinical setting.
4. The Doctor of Philosophy degree program—designed to prepare nurse scholars for leadership in education, administration, and research.

Philosophy

In harmony with Loma Linda University and the Seventh-day Adventist Church, the School of Nursing believes that the aim of education and health care is the development of wholeness in those served. Individuals—created to reflect the wholeness of God’s character—have been impaired by the entrance of sin, disease, and death. God’s purpose is the restoration of each person to his/her original state at Creation. God works through human agencies to facilitate individual wholeness.

Nursing functions to assist individual families and societal groups to attain their highest potential of wholeness. Through a variety of roles, nurses put into practice the knowledge, skills, and attitudes necessary to care for those affected by health problems. The School of Nursing provides an environment in which students and faculty members can grow in professional competence and Christian grace.

In support of the philosophy, mission, and values of Loma Linda University and the philosophy, mission, and values of the School of Nursing, the faculty affirms the following beliefs:

- Learning is an interactive process that involves all of the learner’s faculties.
- A learning environment nurtures the development of potential, promotes maturation of values, cultivates the ability to think critically and independently, and encourages a spirit of inquiry.
- Clinical experiences are essential to the development of professional and technical nursing competence.
- Students—influenced by the effect of physiological, psychological, sociocultural, developmental, and spiritual variables on their lives—learn in different ways and bring different meanings to the learning experience.
- Students participate in the development of the science and practice of nursing.

General regulations

Students of the University are responsible for informing themselves of and satisfactorily meeting all regulations pertinent to registration, matriculation, and graduation. This section gives the general setting for each school’s programs and outlines subject and unit requirements for admission to individual professional options. It is important to review the requirements of specific options within the context of general requirements applicable to all programs.

Student policies

School of Nursing students are expected to adhere to the policies of the University and School of Nursing as presented in the Loma Linda University Student Handbook.

Application and admissions

The purpose of the University’s programs admissions committees is to ensure that applicants are qualified for the proposed curricula and are capable of profiting from the educational experience offered by this University. School admissions committees accomplish this by examining evidence of scholastic competence, moral and ethical standards, and significant qualities of character and personality. Applicants are considered for admission only on the recommendation of the program in which study is desired.
Application

Applications are invited from those interested in attending a Christian school of nursing and whose beliefs are consistent with the mission of Loma Linda University and the School of Nursing. Priority may be given to those coming from within the Seventh-day Adventist Church and educational system.

Admission application information is located at <nursing.llu.edu>.

Admission requirements

Students entering the School of Nursing must complete Loma Linda University background check requirements, as well as health requirements—including immunizations and annual TB clearance. In addition, all School of Nursing students are required to have valid cardiopulmonary resuscitation (CPR) certificates approved by the American Heart Association in order to take clinical nursing courses. Students are responsible for the annual renewal of their immunizations, TB clearances, and CPR certifications. New undergraduate students are required to show evidence of completion of a first aid course.

Essential skills

The practice of professional nursing has specific entry qualifications. Registered nurses are expected to have certain physical abilities, basic computer and technological skills, as well as competencies in reasoning and thinking. These skills are considered essential to the practice of nursing and are therefore skills required of all applicants to the School of Nursing. These include the abilities indicated in the following four areas:

Psychomotor (physical) skills
- Stand, walk, carry, sit, lift up to fifty pounds, push, pull, climb, balance, stoop, crouch, kneel, turn, twist, crawl, and reach—within a clinical setting.
- Assess and intervene in the care of patients, using the physical senses—sight, including ability to distinguish colors, touch, taste, smell, and hearing.
- Utilize patient care equipment and perform technical patient care activities.

Cognitive (thinking) skills
- Work with intangible data, such as numbers, symbols, ideas, and concepts.
- Perform mental cognition tasks, including problem solving, prioritizing, and accurate measuring; follow instructions; and use cognitive skills to synthesize, coordinate, analyze, compile, compute, copy, and compare.
- Communicate with others, using verbal and nonverbal skills. Recall written and verbal instructions, read and comprehend, and write clearly. Negotiate, instruct, explain, persuade, and supervise.

Affective (human relations) skills
- Interact positively with individuals and groups of people directly and indirectly.
- Control emotions appropriately and cope with stressful situations.
- Respond appropriately to criticism and take responsibility for personal actions, behaviors, and learning.
- Evaluate issues and make decisions without immediate supervision.

Task (work function) skills
- Function independently on work tasks.
- Demonstrate safety awareness.
- Recognize potential hazards.
- Respond appropriately to changes in work conditions.
- Maintain attention and concentration for necessary periods.
- Perform tasks that require set limits.
- Ask questions and request assistance appropriately.
- Perform within a schedule requiring attendance.
- Carry a normal work load.

Accommodations for disability

School of Nursing students requesting accommodations for a disability (p. 13), should consult the Office of the Associate Dean who administers the undergraduate, graduate, or doctoral programs.

Student life

Students should refer to the Student Handbook for a more comprehensive discussion of University and school expectations, regulations, and policies. Students need to familiarize themselves with the contents of the online Student Handbook.

Student involvement

Students are encouraged to become actively involved in the Associated Students of Nursing. Student representatives are invited to attend the Undergraduate Faculty Council, Master's Faculty Council, Doctor of Nursing Practice Faculty Council, Doctor of Philosophy Faculty Council, Spiritual Life and Wholeness Committee, and Diversity Committee, where they may contribute to the decision-making process.

Student organizations

The following student organizations enable students to participate in cultural, social, professional, and citizenship aspects of University life.

Associated Students of Nursing (ASN)

The ASN is a School of Nursing student organization. This association includes all students of nursing and is administered by elected students, two faculty sponsors, and one sponsor from Student and Alumni Relations (STAR). The objectives of this organization are to serve as a channel for communication between students and the faculty, and to facilitate personal and professional growth by meaningful participation in all aspects of student life.

Loma Linda University Student Association (LLUSA)

The LLUSA has three purposes: to promote communication among students, to present students’ views to the administration, and to assist in the programming of social and religious activities. The LLUSA provides opportunities to develop and refine a wide range of professional leadership and fellowship skills.

Class organizations

The members of the junior and senior classes elect officers and promote such projects and activities as constitute their major interests and concerns.

Honor society: Sigma Theta Tau International

In 1975, the LLUSN became an official chapter Gamma Alpha, of Sigma Theta Tau International, the honor society for nursing. Students who meet the established criteria may be invited to become members.

Financial information

School of Nursing Finances

The Office of the Dean is the final authority in all financial matters and is charged with the interpretation of all financial policies. Any exceptions to
published policy in regard to reduction or reimbursement of tuition must be approved by the dean. Any statement by individual faculty members, program directors, or department chairs in regard to these matters is not binding on the school or the University unless approved by the dean.

Registration is not complete until tuition and fees for the required installment are paid; therefore, the student should be prepared to make these payments during scheduled registration for each academic term. There may be adjustments in tuition and fees as economic conditions warrant.

General financial practices
Before the beginning of each school year, the student is expected to arrange for financial resources to cover all expenses. Previous accounts with other schools or with the University must have been settled.

| $2,500 | Deposit to hold place in class (CRNA)                                  |

Credit by Examination (one half cost of tuition by unit)

| $330   | Undergraduate per unit credit (challenge, equivalency)                |
| $420   | Graduate per unit credit (challenge, equivalency)                     |
| $50    | Early examination                                                     |
| $50    | Application to change concentration or degree program                  |

Licensing examinations
Registration and certification examinations and license fees are set by the state.

Other charges
$200    Laboratorymake-up fee

On- and off-campus student housing
Students may go to <llu.edu/central/housing> for housing information and a housing application form.

Nursing and government loans
Loans are available both to undergraduate and graduate nursing students who are eligible to participate in government loan programs such as Stafford and Nursing Student Loan Program. Contact Financial Aid for details at 909/558-4509. (See Academic Progression Section.)

Nurse Faculty Loan Program
The Nurse Faculty Loan Program (NFLP) offers registered nurses substantial assistance (up to 85 percent) to repay educational loans. Information for this program and for the list of eligible health-care facilities, check <http://www.hrsa.gov/loanscholarships/repayment/nursing/>.

Awards honoring excellence
Awards for excellence in nursing, scholastic attainment, and leadership ability are made available to students whose performance and attitudes reflect well the ideals and purposes of the school. Selection of students is based on the recommendation of the faculty to the dean. Selected awards are presented below. Other clinical awards may be given based on qualifications and funding.

President's Award
The President's Award is presented annually in recognition of superior scholastic attainment and active participation in the student community, within the framework of Christian commitment. One recipient is selected from each school.

Dean's Award
The Dean's Award is presented to an outstanding student in each program on the basis of the student's demonstrated commitment to academic excellence and to the objectives of the school.

Helen Emori King Professional Leadership Award
The Helen Emori King Professional Leadership Award is presented to a graduate student who demonstrates outstanding leadership ability in nursing.

Scholarships
The School of Nursing has a variety of scholarships that have been endowed by alumni and friends. Most of the scholarships are awarded on the basis of academic/clinical performance, financial need, and citizenship. The Office of the Dean can provide students with more information, as well as with application forms.
Undergraduate Curricula overview

The following sections describe the undergraduate curricula offered by the School of Nursing and list the courses each student must complete. Students are expected to follow the general policies of the University, the school, and specific policies of their degree curriculum. The school reserves the right to update and modify curricula content to keep current with trends in health care.

Bachelor of Science (B.S.) degree

The purpose of the School of Nursing’s baccalaureate degree is to prepare competent clinicians who are committed to excellence in practice and to Christian principles. The faculty believes that baccalaureate education in nursing is the basis for professional practice. The curriculum leading to the Bachelor of Science (B.S.) degree is consistent with the faculty’s belief that students should be broadly educated. The focus is on the synthesis of nursing knowledge and skills with those from the humanities and sciences. Preparation for practice includes experiences in primary and acute care—with clients from various ages, cultural groups, and socioeconomic strata.

Undergraduate curriculum sequence

The undergraduate curriculum begins with four quarters of pre-clinical work—which forms the general education and science base for nursing. These quarters may be completed at any regionally accredited college or university. After completion of an additional eight quarters at Loma Linda University, the student is eligible to receive the B.S. degree and is prepared for professional nursing practice at the baccalaureate level.

Clinical experience develops the student’s technical and theoretical capabilities in a progressive manner and within the context of the nursing process. Most baccalaureate nursing major courses are in the upper division, where clinical experience is gained in a broad variety of settings. Integral components of upper division courses are leadership concepts and skills, research, public health, and activities that foster collaboration in planning health care with the family and all members of the health-care team.

Learning outcomes for baccalaureate nursing

Learning outcomes of the baccalaureate nursing program are designed to prepare competent nursing professionals. By the end of the program, graduates should be able to:

1. Evaluate nursing care and education provided to patients, families, groups, populations, and communities across the lifespan from diverse backgrounds in a variety of settings to ensure that it is holistic, compassionate, age and culturally appropriate; and based on a patient’s background, preferences, values, and needs.
2. Collaborate with members of the interprofessional health-care team to manage and coordinate the provision of safe, quality care for patients, families, and groups.
3. Integrate scientific information and best current evidence with clinical expertise and patient preferences when making clinical judgments in the management of patient-centered care.
4. Use quality improvement measures to evaluate the effect of change on the delivery of patient-centered care and patient outcomes.
5. Evaluate effectiveness of strategies used to reduce the risk of harm to patients, self, and others in health-care, home, and community settings.
6. Use empirical and evidence-based information and patient care technology to communicate relevant patient information, manage care, and mitigate error in the provision of safe, quality, patient-centered care.
7. Model integrity and accountability in practices that uphold established regulatory, legal, and ethical principles while providing standard-based nursing care.
8. Integrate leadership and management theories and principles into practice when managing a caseload of patients and making clinical judgments about their care.
9. Use verbal, nonverbal, and written communication strategies that promote an effective exchange of information; development of therapeutic relationships; and shared decision making with patients, families, groups, populations, and communities from diverse backgrounds.

Professional registration

Satisfactory completion of the California Board of Registered Nursing-required content prepares the student to sit for the NCLEX-RN examination. All states require that a nurse pass the NCLEX-RN examination for licensure to practice. California application forms and fees are submitted to the California Board of Registered Nursing, P.O. Box 944210, Sacramento, CA 94244-2100; website: <http://www.rn.ca.gov/>.

Four Bachelor of Science (B.S.) degree options

For all B.S. degree options, students must complete all prerequisite courses prior to starting the nursing program. Occasional exceptions for certain prerequisites can be made. For more specifics, consult with the admissions department staff.

1. Standard (generic) B.S. degree curriculum
2. B.S. degree curriculum for the licensed vocational nurse
3. B.S. degree curriculum for student with bachelor’s degree in another area
   Applicants for this track must fulfill the same admission requirements (p. 328) and degree requirements as the standard B.S. degree.
   Students entering with a non-nursing baccalaureate degree may write the NCLEX-RN after completing nursing courses required for licensure. This allows students to write the NCLEX-RN after six quarters and prior to completing the B.S. degree. Students who choose this option may be eligible to enroll in online courses in the RN to B.S. academic track subject to space availability.
4. RN to B.S. curriculum
   An RN with an associate’s degree in nursing may complete a baccalaureate degree in four quarters of full-time course work. Part-time study is an option. Courses are designed in the online format. Online activities will include weekly discussions and assignments designed to focus on the working environment of the RN. The returning RN must have completed all prerequisite courses prior to acceptance into the program, must be currently working as an RN, and must meet the following non-course requirements:
   • Current RN license
   • A.S. degree or diploma in nursing

Nondegree option

The 45-quarter unit RN licensure option

Licensed LVNs who have been admitted and are currently in our nursing program have the option of requesting the 45-quarter unit
option for LVNs. Since the LVN choosing this option does not meet the requirements for a degree as outlined by the school, neither a degree nor a certificate will be issued; nor will a graduation exercise be included. In addition, the student will not be eligible to wear the school pin, cap, or other insignia. An RN license obtained through this option is valid in California and may not be transferable to other states.

**Prerequisite per BRN**

High school diploma

Current LVN license in California (skills will need to be validated)

Completion of physiology and microbiology with a grade of C or higher G.P.A. of at least 2.0

**Academic policies and practices**

**Academic residence**

To qualify for an undergraduate degree from Loma Linda University, the student must take a minimum of 45 units at Loma Linda University; 32 of the units must be upper division courses. At least three clinical nursing courses are required as part of these units.

**Nursing courses**

**Nursing course grades**

Most nursing courses in the undergraduate curriculum are divided into approximately equal components of theory and clinical laboratory practice. Grades for nursing courses represent a combination of theory and clinical laboratory grades. In order to pass a nursing course, a student must receive a grade equivalent to a C or above in the theory and must receive either a C or a satisfactory in the clinical laboratory sections of the course. To receive a passing grade in theory, the student must obtain a cumulative score of at least 76 percent on examinations. A grade of C- or below places the student on provisional status and requires that the student repeat the course. Enrollment in the School of Nursing will be terminated if a student receives two grades of C- or below in nursing or required cognates.

**Percentage breakdown for grading**

The undergraduate division of the School of Nursing uses the following percentages for computing grades:

<table>
<thead>
<tr>
<th>Percentage breakdown</th>
<th>Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>95-100%</td>
<td>A</td>
</tr>
<tr>
<td>92-94%</td>
<td>A-</td>
</tr>
<tr>
<td>88-91%</td>
<td>B+</td>
</tr>
<tr>
<td>85-87%</td>
<td>B</td>
</tr>
<tr>
<td>82-84%</td>
<td>B-</td>
</tr>
<tr>
<td>79-81%</td>
<td>C+</td>
</tr>
<tr>
<td>76-78%</td>
<td>C</td>
</tr>
<tr>
<td>71-75%</td>
<td>C-</td>
</tr>
<tr>
<td>68-70%</td>
<td>D+</td>
</tr>
<tr>
<td>63-67%</td>
<td>D</td>
</tr>
<tr>
<td>Below 62%</td>
<td>F</td>
</tr>
</tbody>
</table>

**Clinical experiences**

Clinical experiences are under the direction of the course coordinator. The student has supervised experience under a clinical instructor in the care of patients. Unexcused tardiness or absences from class or clinical laboratory is cause for failure. Three times of being tardy to class or laboratory is equal to one absence. Absences in excess of 20 percent of course appointments (class, seminar, or clinical) may be cause for failure. Students must make up for absences from clinical experiences due to extenuating circumstances (e.g., personal illness or death in the family). A fee of $200 will be charged for make-up of clinical laboratory during non-clinical time.

Students are required to practice in client care settings under the supervision of a registered nurse during assigned clinical laboratory time. Each student will be expected to apply basic theoretical concepts to clinical practice by assessing, planning, and implementing nursing procedures; and evaluating the care of individuals, families, and communities. Students will function within the policies of the clinical agency and demonstrate the professional behavior outlined in the University CATALOG and the University Student Handbook while performing routine nursing care.

Students are expected to be knowledgeable about clients and their problems and about the plans for care prior to actually giving care. They must come prepared for the clinical experience and must adequately assess a client. Students are expected to perform skills safely. Students whose performance is deemed unsafe may fail the course or be dropped from the program.

Students are responsible for their individual transportation to off-campus clinical sites. Individual transportation does not mean arrangements to car-pool with someone. Off-campus clinical assignments cannot be promised on the basis of the student’s transportation convenience. Students may be required to complete a clinical experience on a Sunday or a holiday.

**Licensure**

To be eligible to write the NCLEX-RN examination, the student must have completed all required nursing courses required for licensure. Furthermore, the student needs to be aware that, under the laws of California, a candidate for the examination is required to report all misdemeanors, driving citations, and felony convictions. If a candidate has a criminal history, the California Board of Registered Nursing will determine the eligibility of that individual to write the licensing examination.
Credit by examination

Challenge/equivalency examination
An undergraduate student may meet academic requirements by passing an examination at least equal in scope and difficulty to examinations in the course. Undergraduate students with prior education in nursing or in another health-care profession are eligible to challenge nursing courses required for California state licensure. The applicant’s background in health-care theory and clinical experience must be commensurate with the theory and skills required for the course.

Challenge examinations in nursing courses include both a written examination covering theory and an examination of clinical competence. A fee is charged for a challenge examination. See the "Schedule of Charges" in this section for fees.

Progression to the next level in the program is permissible only after successful completion of the challenge examination at 76%. A grade of S is recorded for challenge credit earned by examination only after the student has successfully completed a minimum of 12 units of credit at this University with a G.P.A. of 2.0 or above.

Advanced placement program
Credit toward graduation may be accepted by the school for an entering student who has passed one or more Advanced Placement examinations with a score of 3, 4, or 5. Records for AP courses must be sent directly from the College Board to University Records.

For specific policy and time limits regarding CLEP examinations, see "Academic Policies" in the Section II of the CATALOG.

Military Option for Advanced Placement
Individuals who have held military health care occupations in the areas including, but not limited to Basic Medical Technician Corpsmen, Army Health Care Specialist, or Air Force Independent Duty Medical Technician may be eligible to apply for advanced placement in the nursing program at Loma Linda University School of Nursing if they are able to provide verifiable education and experience. Interested candidates are advised to meet with the Associate Dean for Undergraduate Program at least four weeks prior to application to review eligibility requirements.

Academic support
In order to promote academic success in the nursing program, if a student earns a grade of "C" or "C+" in NRSG 224 Nursing Pathophysiology and/or NRSG 231 Foundations of Nursing and/or NRSG 232 Fundamentals of Nursing and/or NRSG 233 Health Assessment and/or NRSG 305 Nursing Pharmacology the student will be required to:

- Register for NRSG 244 Strategies for Academic Success (1 unit) during the subsequent quarter and each quarter through completion of NRSG 301 Adult Health Nursing I.
- Follow an individualized plan for continued involvement with the Academic Center for Excellence (ACE) in subsequent quarters. The individualized plan will be developed based on individual needs as determined by the ACE faculty mentor, course instructor(s), advisor, and student.

Repeating a course
A grade of C (2.0) is the minimum passing grade for nursing and required religion courses. Any nursing or named cognate course taken while a student at Loma Linda University School of Nursing in which the earned grade is C- or lower must be repeated. A nursing or religion course may be repeated only once. When a student repeats a course, both the original and repeat grades are entered into the student’s permanent record; but only the repeat grade and credit are computed in the grade point average and included in the total units earned.

Probation status
Students whose cumulative G.P.A.s at the end of any quarter is less than 2.0, or who have received a C- or below in a nursing course or named cognate, or who have withdrawn (W) due to failing are placed on academic probation. Students on probation status will be required to take NRSG 244 Strategies for Academic Success and to communicate regularly with their academic advisor. Students on probation may take only one clinical nursing course at a time and no more than 12 units. Any exceptions must be pre-approved. When the course work has been repeated successfully, the student is returned to regular status.

Enrollment in the School of Nursing will be terminated if a student receives two grades of C- or below in nursing or required cognates. See Student Handbook for grievance procedure.

Graduation requirements
A candidate must complete the undergraduate Intent to Graduate form two quarters prior to completion of degree.

A degree will be granted when the student has met the following requirements:

1. Completed all requirements for admission to the respective curriculum.
2. Completed all requirements of the curriculum, including specified attendance, level of scholarship, and length of academic residence.
3. Completed a minimum of 185 quarter units for the baccalaureate degree, with a minimum overall G.P.A. of 2.0.
4. Given evidence of moral character, of due regard for Christian citizenship, and of consistent responsiveness to the established aims of the University and of the respective discipline.
5. Discharged financial obligations to the University.

It is the responsibility of the student to see that all requirements have been met.

A student who completes the requirements for a degree at the end of the Spring or Summer Quarter is expected to be present at the University’s ceremony for conferring of degrees and presentation of diplomas. Permission for the conferral of a degree in absentia is granted by the University upon recommendation of the dean of the school.

A student who completes the requirements for a degree at the end of Autumn or Winter quarter is invited, but not required, to participate in the subsequent conferring of degrees. Degrees are conferred at graduations only.

The University reserves the right to prohibit participation in commencement exercises by a candidate who has not satisfactorily complied with all requirements.

Additional requirements/policies
For additional policies governing Loma Linda University students, see Section II of this CATALOG, as well as the University Student Handbook. Students are responsible for informing themselves of and satisfactorily meeting all regulations pertinent to registration, matriculation, and graduation.
Nursing — BS (generic)

Admissions

The Admissions Committee is looking for individuals who reflect a high degree of personal integrity, dependability, self-discipline, intellectual vigor, and a caring and thoughtful manner.

Application deadlines

Applicants seeking undergraduate admission must have the application process completed by the dates as follow:

- Autumn Quarter—March 15
- Winter Quarter—August 1
- Spring Quarter—November 1

In addition to Loma Linda University (p. 24) admission requirements, the applicant must:

1. Have completed a high school diploma or its equivalent.
2. Have a current first aid certificate.
3. Have a current basic life support certificate approved by the American Heart Association.
4. Have earned a cumulative G.P.A. of 3.0 on all college course work. Grades below a "C" are nontransferable.
5. For students considering transfer of nursing course work, provide course descriptions or outlines for clinical nursing courses in order for the school to determine the amount of transfer credit to be granted.
6. Complete entrance tests required of all incoming students who are not registered nurses.
7. Complete an interview arranged by the director of admissions.
8. Complete prerequisite courses listed below:

Domain 1: Religion and humanities (28 quarter units)

Religion: 1

Prorated, based on units taken at a Seventh-day Adventist college/university. (See University Division of General Studies for religion and humanities specifics.) Total units required are based on the percentage of course work from an SDA college or university. Students are required to take at least one course from the content areas of RELE, RELR, and one of the following required RELT courses: Humanities (12 units minimum):

Must be chosen from three of the following areas: civilization/history, fine arts, literature, modern language, philosophy, or performing/visual arts (not to exceed 4 quarter units)

Domain 2: Scientific inquiry and analysis (29 quarter units)

Natural Sciences (21 units minimum):

Intermediate algebra (or high school algebra II—not counted toward domain total)  
Human anatomy and physiology with laboratory, complete sequence  
Introduction to organic chemistry and biochemistry, with laboratory  
Basic medical microbiology with laboratory  
Social Sciences (12 units minimum):

Sociology or Anthropology  
General psychology  
Developmental psychology (life span development)  
Domain 3: Communication (12 quarter units)

English composition, complete sequence  
Speech  
Domain 4: Health and wellness (2-4 quarter units)

Physical education (two separate physical activity courses)  
Nutrition  
Domain 5: Electives

To meet total GE requirements and total degree requirements of 185 quarter units.

Pre-entrance requirements (p. 25)

1. A completed background check
2. Health clearance, including immunizations as outlined in the "Admissions Policies and Information"

Program requirements

REL_ 4__ Upper-division religion 2

Select one course from the following:

REL 406 Adventist Beliefs and Life
REL 423 Loma Linda Perspectives
REL 436 Adventist Heritage and Health
NRSG 424 Professional RN Capstone is for students who have taken
the NCLEX early and are working as an RN.

Students are required to take at least one course from the content
areas of RELE, RELR, and one of the required RELT courses listed
above. Total units required are based on the percentage of course
work from an SDA college/university. The maximum requirement is
16 units including transfer credit.

Total unit requirement for graduation is 185 quarter units (transfer units
plus above-listed courses).

Normal time to complete the program
Four (4) years — 2.66 years (eight [8] academic quarters) at LLU) — based
on full-time enrollment; part time permitted

Nursing — RN to B.S.

Admissions

The Admissions Committee is looking for individuals who reflect a high
degree of personal integrity, dependability, self-discipline, intellectual
vigor, and a caring and thoughtful manner.

Application deadlines

Applicants seeking undergraduate admission must have the application
process completed by the dates as follow.

- Autumn Quarter—March 15
- Winter Quarter—August 1
- Spring Quarter—November 1

In addition to Loma Linda University (p. 24) admission requirements, the
applicant must also meet the following requirements:

1. Registered nurse (RN).
2. No grades below a C submitted for transfer.
3. Complete an interview with the RN-B.S. representative.
4. Completed an Associate in Science degree or diploma from an
   accredited school of nursing.
5. Have a license to practice nursing in California as a registered nurse.
6. Completed all non-nursing requirements or their equivalents on the
   lower division level.
7. Completed the following course prerequisites:

Domain 1: Religion and humanities (28 quarter units)

Religion:

Prorated, based on units taken at a Seventh-day Adventist college
or university. (See University Division of General Studies for religion
and humanities specifics.) Total units required are based on the
percentage of course work from an SDA college/university. Students
are required to take at least one course from the content area of
RELE and one from RELT.

Humanities:

Minimum of 12 units and must include at least three of the following
areas: civilization/history, fine arts, literature, modern language,
philosophy, or performing/visual arts (not to exceed 4 quarter units)

Domain 2: Scientific inquiry and analysis (29 quarter units)

Natural Sciences (17 units minimum):

Human anatomy and physiology with laboratory, complete sequence

Introduction to chemistry with laboratory, one quarter/semester

Basic medical microbiology with laboratory

Social Sciences (12 units minimum):

Sociology or Anthropology

General psychology

Developmental psychology (life span development)

Domain 3: Communication (12 quarter units)

English composition, complete sequence

Speech

Domain 4: Health and wellness (2-4 quarter units)

Physical education (two separate physical activity courses) \(^1\)

Nutrition (may be embedded in nursing content courses) \(^2\)

Domain 5: Electives

To meet total GE requirements and total degree requirements of 185
quarter units.

\(^1\) Required
\(^2\) Some of these may be completed while a student at LLU.

\(^1\) Integrated into previous nursing course

If the RN is a graduate of an accredited nursing program, the nursing
credits will be accepted as equivalent to the School of Nursing lower
division courses. For unaccredited schools, or for additional information
regarding transfer credit, see section on Transfer Credit (p. 38) under
Academic Policies. Credit for 300-level nursing courses will be granted
upon satisfactory completion of NRSG 337 Strategies for Professional
Transition and NRSG 407 Complex Nursing Concepts of Health and
Disease.

RELE/RELR ___ Religion elective(s) 3-4

Select one course from the following:

REL 406 Adventist Beliefs and Life (3)

REL 423 Loma Linda Perspectives (2)

REL 436 Adventist Heritage and Health (2)
Nursing — LVN to B.S.

Admissions

The Admissions Committee is looking for individuals who reflect a high degree of personal integrity, dependability, self-discipline, intellectual vigor, and a caring and thoughtful manner.

Application deadlines

Applicants seeking undergraduate admission must have the application process completed by the dates indicated as follows:

- Autumn Quarter—March 15
- Winter Quarter—August 1
- Spring Quarter—November 1

In addition to Loma Linda University (p. 24) admission requirements, the applicant must:

1. Have completed a high school diploma or its equivalent.
2. Be a licensed vocational nurse.
3. Have a current basic life support certificate approved by the American Heart Association.
4. Have earned a cumulative G.P.A. of 3.0 on all college course work. Grades below a "C" are nontransferable.
5. For students considering transfer of nursing course work, provide course descriptions or outlines for clinical nursing courses in order for the school to determine the amount of transfer credit to be granted.
6. Complete entrance tests required of all incoming students who are not registered nurses.
7. Complete an interview arranged by the director of admissions.
8. Complete prerequisite courses listed below.

The licensed vocational nurse may choose to complete a bachelor’s degree or the 45 quarter units of nursing, as prescribed by the California State Board of Registered Nursing, and be eligible to sit for the NCLEX-RN.

Domain 1: Religion and humanities (28 quarter units)

Religion:

Prorated, based on units taken at a Seventh-day Adventist college or university. (See University Division of General Studies for religion and humanities specifics.) Total units required are based on the percentage of course work from an SDA college/university. Students are required to take at least one course from the content areas of RELR, RELT, and one of the following required RELT courses:

- Humanities (12 units minimum):
  Must include at least three of the following areas: civilization/history, fine arts, literature, modern language, philosophy, or performing/visual arts (not to exceed 4 quarter units)

Domain 2: Scientific inquiry and analysis (29 quarter units)

Natural Sciences (21 units minimum):

- Intermediate algebra (or high school algebra II—not counted toward domain total) R
- Introduction to physics (or high school physics—not counted toward domain total) R

Human anatomy and physiology with laboratory, complete sequence 8
Introduction to organic chemistry and biochemistry, with laboratory 8
Basic medical microbiology with laboratory 5

Domain 3: Communication (12 quarter units)

English composition, complete sequence 8
Speech 4

Domain 4: Health and wellness (2-4 quarter units)

Physical education (two separate physical activity courses) 1
Nutrition (may have been integrated into LVN content) 3

Domain 5: Electives

To meet total GE requirements and total degree requirements of 185 quarter units.

R Required
1 Some of these may be completed while a student at LLU
2 May consider less units if course taken adequately covers this material.

**Total Units**: 110

---

1 Students are required to take at least one course from the content areas of RELE, RELR, and one of the required RELT courses listed above. Total units required are based on the percentage of course work from an SDA college/university. The maximum requirement is 16 units including transfer credit.

Total unit requirement for graduation is 185 quarter units (transfer units plus above-listed courses).

**Normal time to complete the program**

Four (4) years — 2.33 years (even [7] academic quarters) at LLU — based on full-time enrollment; part time permitted.
Graduate

The sections that follow describe the Master of Science (M.S.), Doctor of Nursing Practice (D.N.P.), and Doctor of Philosophy (Ph.D.) degrees offered by the School of Nursing; and list the courses for each. School of Nursing students are expected to operate under the general policies of the University and the school, as well as the specific policies of the degree in which they are enrolled. Graduate education provides the student opportunities to develop advanced knowledge, skills, and attitudes relevant to a specific area of interest in nursing. Programs of study prepare the nurse for practice, leadership, and research as appropriate to his/her professional role.

Academic policies

Academic residence

To qualify for a degree from the graduate department in nursing at Loma Linda University, the student must take a minimum of 80 percent of the academic curriculum while in residence at the University, i.e., 48 units for the master's degree; 55-119 units for Doctor of Nursing Practice, depending on the selected concentration area and 60-86 units for the Doctor of Philosophy degree.

Transfer credits

1. A transfer student may transfer credits up to 20 percent of the units required by the chosen program to be applied to the degree requirements at Loma Linda University. This transfer is limited to credits for which a grade of B (3.0) or better has been recorded and the course work was done at an accredited institution and meets the requirements of a course for the degree at LLLU.
2. A maximum of nine quarter units that have been previously applied to another degree may be accepted as advanced standing upon petition.
3. The maximum number of transfer credit towards a master's or doctoral degree may not exceed 20 percent of the minimum credits required for the degree.
4. Following acceptance into a graduate program, all required courses must be taken at Loma Linda University.
5. Credits taken through NEXus for graduate courses are not considered transfer credits.
6. Transfer credits will not be used to offset course work at this University with less than a B grade.

Academic standing

1. Course grades
   a. The expected earned grade level for graduate studies is a cumulative grade point average of 3.0 (B average) or higher.
   b. Students must earn a grade of B (85 percent) or higher in all courses. If the earned grade is less than a B, the course must be repeated, except as noted in 3 A and 4 A below.
   c. For all CNS and NP clinical courses, an earned grade of less than B (3.0) may not be repeated.
   d. For all core courses required, an earned grade of less than B (3.0) may not be repeated.
2. Withdrawal and repeating course
   a. A student may withdraw only one time from any given core, concentration, or clinical course. (See 4B and 5B below for exception for Nurse Anesthesia students).
   b. A student may repeat no more than one course in the program.
   c. Students requesting to repeat a clinical course due to a withdrawal are placed on a waiting list, according to the timing of the request.
   d. Nurse anesthesia students who withdraw from a course may not continue in the program.
   e. Nurse anesthesia students may not repeat a course.

3. Academic probation
   At the end of each quarter, student G.P.A.s will be reviewed. Students must be placed on probationary status if:
   a. The earned G.P.A. is less than 3.0 cumulatively
   b. If the earned G.P.A. is less than 3.0 in the nursing major
   c. If a course must be repeated due to a grade lower than an earned B in the CNS (core and concentration courses), Nursing Administration, Nursing Education concentration areas or in the DNP or PhD programs, the courses must be retaken and a grade of B or higher earned before proceeding in the clinical sequence if the low grade occurred in a clinical area that allows a course to be repeated (Nursing Administration, Nursing Education and DNP). To repeat the course, it will be necessary to wait until the course is offered again and has space.
   i. While on probation, a student:
      1. May not take the clinical focus courses, unless this is the course that must be repeated
      2. May not submit the comprehensive project
   4. Academic probation may be removed when the student:
      a. Retakes the course and earns a grade of B or higher.
      b. Raises the G.P.A. to 3.0 or higher the next quarter.
      c. Academic termination.
   5. Academic enrollment will be terminated if:
      a. The cumulative G.P.A. has not been raised to 3.0 or above while on academic probation.
      b. Any grade lower than B has not been raised when the course is retaken.
      c. A CNS or NP student earns a grade of B- (2.7) or lower in a clinical course.
      d. A nurse anesthesia student earns a grade of B- (2.7) or lower in any course.

Clinical probation

Clinical work must be evaluated as satisfactory. The faculty may recommend that the student be placed on clinical probation. While on probation, the student must demonstrate satisfactory clinical work as stipulated by the faculty; or the student will be dismissed from the school.

Clinical termination

A student may be dismissed from the program if there is evidence of:

1. Unsafe clinical behavior in any of the areas of knowledge, skill, and attitudes
2. Unethical clinical behavior, such as, but not limited to, falsification of records and/or reporting, photographing and/or recording in the clinical site, and posting patient information or photos on social media sites.

Application for candidacy

A student in the master's degree program will apply for candidacy on Form A after completing at least 25 units of required graduate course
work. A PhD degree student will be advanced to candidacy after successful defense of the dissertation proposal. A DNP degree student will be advanced to candidacy after successful defense of the project proposal.

**Time limits**
The time lapse from first enrollment in a graduate curriculum to the conferring of the master’s degree may not exceed five years. For the doctoral degrees, seven years are allowed after the date of admission. A student desiring reinstatement must reaply. This procedure implies a re-evaluation of the student’s total academic plan.

Any credit transferred to the school or taken in residence and submitted toward a graduate degree is nullified seven years from the date when the course was completed. Refer to university policy on satisfactory academic progress.

**Scholastic standing**
**Grade scale**
The graduate department in nursing uses the following percentages for determining grades:

<table>
<thead>
<tr>
<th>Percentage Range</th>
<th>Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>95-100%</td>
<td>A</td>
</tr>
<tr>
<td>92-94%</td>
<td>A-</td>
</tr>
<tr>
<td>88-91%</td>
<td>B+</td>
</tr>
<tr>
<td>85-87%</td>
<td>B</td>
</tr>
<tr>
<td>82-84%</td>
<td>B-</td>
</tr>
<tr>
<td>79-81%</td>
<td>C+</td>
</tr>
<tr>
<td>76-78%</td>
<td>C</td>
</tr>
<tr>
<td>71-75%</td>
<td>C-</td>
</tr>
<tr>
<td>68-70%</td>
<td>D+</td>
</tr>
<tr>
<td>63-67%</td>
<td>D</td>
</tr>
<tr>
<td>Below 62%</td>
<td>F</td>
</tr>
</tbody>
</table>

**Practicum experiences**
Practicum experiences shall be individually structured to meet students’ needs and program requirements. Practicum experiences are arranged by practicum faculty after consultation with advisors and appropriate agency personnel. Off-campus placement is formalized through written contract or letter of agreement. This process may take as long as six months. Students requesting practicum experiences at sites that will require additional costs—such as faculty travel, phone calls, or legal advice—are responsible for this expense.

For advanced practice CNS or NP concentrations, due to the intensive nature of the clinical courses, we strongly recommend that the student keeps their workload to less than 20 hours per week. Employment for CRNA students is strongly discouraged. Students are not permitted to work within 10 hours of the start of a clinical shift. Employment by title or function prior to graduation is forbidden.

**Comprehensive project**
A written, comprehensive project is required of all M.S. degree students (NGRD 610). The student is expected to integrate, evaluate, synthesize and apply theories and research studied in the graduate program. Each clinical track will guide development of the project.

**Thesis and dissertation**
Thesis is optional for the M.S. degree. The student’s research, thesis, project or dissertation preparation are under the direction of his/her guidance committee. The student is urged to secure the committee’s approval of the topic and research design as early as is feasible. Such approval must be secured before petition is made for advancement to candidacy.

**Dissertation format**
Consultation with the Faculty of Graduate Studies office is encouraged to help the student avoid formatting errors in the dissertation process that would require him/her to edit large sections of manuscript.

**Portfolio**
A portfolio, developed during the program of study is required of all students.

**Graduation requirements**
Degree candidates shall have:

1. Completed all requirements for admission to the respective curriculum.
2. Completed all requirements of the curriculum, including required course work, specified attendance, level of scholarship, and length of residence.
3. Given evidence of moral character, of due regard for Christian citizenship, and of consistent responsiveness to the established aims of the University and of the respective discipline.
4. Discharged financial obligations to the University.

It is the responsibility of the student to see that all requirements have been met.

A student who completes the requirements for a degree at the end of the Spring Quarter is expected to be present at the university’s ceremony for conferring of degrees and awarding of diplomas. Permission for the conferral of a degree in absentia is granted by the University upon recommendation of the dean of the school.

A student who completes the requirements for a degree at the end of the Autumn or Winter Quarter is invited, but not required, to participate in the subsequent conferring of degrees. Degrees are conferred at commencements only. See Section II of the Academic Policies.

The University reserves the right to prohibit participation in commencement by a candidate who has not satisfactorily complied with all requirements.

**Additional requirements/Policies**
For additional policies governing Loma Linda University students, see the academic policies and information (p. 35) section under the heading, About this University, in this CATALOG, as well as the University Student Handbook which can be accessed at www.llu.edu/student-handbook. Students are responsible for informing themselves of and satisfactorily meeting all regulations pertinent to registration, matriculation, and graduation.

**Nursing — M.S.**

**Learning outcomes for Master of Science**
Learning outcomes of the master’s degree program are designed to prepare nurse leaders with a Christian perspective to enable them to contribute to professional nursing through clinical practice, teaching, and
administration. Upon completion of the Master of Science degree, the graduate should be able to:

1. Synthesize and apply research findings as a foundation for evidence-based practice.
2. Apply informatics and health-care technologies to support data management and improve patient care.
3. Collaborate interprofessionally to improve patient and population health outcomes.
4. Utilize baccalaureate-level humanities, nursing, and science competencies as a basis for advanced nursing practice.
5. Use organizational and systems leadership, management, and teaching skills to promote high-quality and safe patient care.
6. Contribute to health policy and advocacy by working with clients, health professionals, and organizations to improve access, quality, and delivery of health care.
7. Apply quality improvement and safety methods, tools, performance measures, and standards within professional settings.
8. Engage in clinical prevention and health promotion to maintain and improve population health.
9. Utilize advanced knowledge acquired from nursing and cognate sciences as a basis for advanced nursing practice.

Admissions
In addition to Loma Linda University (p. 24) admission requirements, the applicant to the Master of Science program in nursing must also complete the following requirements:

1. Baccalaureate degree in nursing or its equivalent from a regionally accredited program.
2. GPA of 3.0, both cumulative and in nursing courses.
3. Current United States RN license before application and CA RN license before the start of classes.
4. Three electronic recommendations from recent professors or current work supervisor.
5. Interview by faculty members in the School of Nursing.
6. Health Science Reasoning Test (HSRT).

Application deadlines
Applicants seeking graduate admission must have the application process completed by the dates indicated in the following.

Nurse Educator, Nursing Administration

- Autumn Quarter—April 1
- Winter Quarter—August 1
- Spring Quarter—November 1

Pre-entrance requirements (p. 25):

1. Health clearance, including immunizations
2. Background check

Regulations
Nondegree course status
Up to 12 units of required core course work may be taken as a nondegree student, with the consent of the instructor, while the application submission and review are in progress. If grades of B or higher are earned, the course work may be applied toward the graduate degree upon acceptance into the program.

Course scheduling
Core nursing courses are scheduled to accommodate the typical working nurse.

Curriculum change
The school reserves the right to update and modify the curriculum without prior notice to maintain currency with standards in health care.

Students in continuous attendance will meet graduation requirements of the CATALOG under which they enter the School of Nursing unless change is necessary to comply with new professional standards.

General requirements
For information about requirements and practices to which all graduate students are subject, the student should consult the Catalog of Loma Linda University, Section II About the University and in Section III, About the Schools, School of Nursing.

M.S. concentrations
Demonstration of comprehensive learning is required, either through a project or requirements embedded in courses required for the Master of Science degree, depending on the selected area of concentration

- Nurse Educator: Adult-Gerontology (p. 335)
- Nurse Educator: Obstetrics and Pediatrics (p. 335)
- Nursing Administration (p. 337)
Nurse Educator: Adult–Gerontology Concentration

The nurse educator adult-gerontology concentration prepares nurses for a role as educator in either the academic or clinical setting, with a focus on the care of the individual from early adulthood through geriatrics.

**Normal time to complete the program**

Three (3) years (11 academic quarters) based on less than full-time enrollment.
Nursing Administration Concentration

The nursing administration option prepares nurses for leadership in a variety of organizational settings. The M.S. degree curriculum draws from the practice of nursing, management, and related fields; and includes administration, research, and clinical components.

Total Units 59

1  Acceptable alternate religion courses: RELE 534 Ethical Issues in Public Health, RELE 548 Christian Social Ethics, RELE 568 Bioethics and the Law

2  Units are in addition to minimum required for the degree.

Normal time to complete the program

Three (3) years (11 academic quarters) based on less than full-time enrollment.
Doctor of Nursing Practice

The Doctor of Nursing Practice (D.N.P.) degree offers B.S. or post-master’s degree curriculum. This curriculum allows B.S.- or M.S.-prepared registered nurses to earn doctorates, which will prepare them for assuming advanced practice in patient care and health-care systems' leadership roles. It addresses and meets outcome expectations as articulated by the American Association of Colleges of Nursing that advanced practice specialty areas be staffed by nurses with doctoral degrees.

Learning outcomes for Doctor of Nursing Practice
Learning outcomes for the D.N.P. degree program are designed to prepare nurse leaders with a Christian perspective to enable them to contribute to professional nursing through clinical practice, teaching, and administration. Upon completion of the D.N.P. degree, the graduate will be able to:

1. Provide leadership in the use of information systems/technology and patient care technology for the improvement and transformation of health care.
2. Utilize current scientific underpinnings for practice.
4. Participate in interdisciplinary collaboration for improving patient and population health outcomes.
5. Advocate for health care through policy analysis and development.
6. Apply organizational and systems leadership theory for quality improvement and systems thinking.
7. Demonstrate leadership in the promotion of advanced nursing practice and the nursing profession.
8. Incorporate into his/her practice the principles of practice prevention and population health for improving the nation’s health.
9. Develop and sustain therapeutic relationships with patients, families and other professionals, considering all aspects of care—including physical, mental, and spiritual—to facilitate optimal care and patient outcomes using evidence base-practice.

Admissions
In addition to Loma Linda University (p. 24) admission requirements, the applicant to the Doctor of Nursing Practice program must also complete the following:

Bachelors to Doctor of Nursing Practice program admission criteria

1. Baccalaureate degree or equivalent in nursing from a regionally accredited program.
2. GPA of 3.0, both cumulative and in nursing courses.
3. Current United States RN license before application and CA RN license before the start of classes.
5. Three electronic recommendations from recent professors or current work supervisor.
6. Interview by faculty members in the School of Nursing.
7. Health Science Reasoning Test (HSRT).
8. Additional criteria for nurse anesthesia applicants:
   a. Science GPA of 3.0 or higher.
   b. Unrestricted Registered Nurse license in the United States; unrestricted Registered Nurse license in California before matriculation and must be maintained until program completion.
   c. Three electronic recommendations from the following: one each from a spiritual advisor or pastor, an immediate supervisor in the critical care area in which the applicant is currently working, and a critical care/ICU coworker.
   d. Current certification in BLS, ACLS, and PALS is required before clinical courses begin and must be maintained until program completion; CCRN preferred.
   e. Eight hours of clinical observation with a CRNA highly recommended before admission interview.
   f. Minimum one year, full-time critical care RN experience (in the US) at time of matriculation (excluding orientation). Adult critical care experience preferred. ER will be considered. Experience is evaluated on an individual basis.
   g. Completion of an online questionnaire following submission of application. This questionnaire must be completed by the applicant before the admission deadline.
   h. Interview granted by Admissions Committee.

Post-Masters to Doctor of Nursing Practice program admission criteria

1. Completion of a master’s degree in nursing with a clinical major from a program or completion of a Bachelor’s degree in nursing and a Masters in a closely related field. The nursing degrees must be accredited by Commission on Collegiate Nursing Education (CCNE), National League of Nursing Accrediting Commission (NLNAC) or the Accreditation Commission for Education in Nursing (ACEN).
2. Undergraduate and Graduate GPA of 3.0, both cumulative and in nursing courses.
4. Three electronic recommendations from recent professors or current work supervisors.
5. Interview by faculty members in the School of Nursing.
6. Health Science Reasoning Test (HSRT).

Application deadlines
Applicants seeking graduate admission must have the application process completed by the dates indicated in the following.

- Nurse Anesthesia
  - Autumn Quarter Priority—November 1
  - Autumn Quarter Standard—December 15
- Clinical Nurse Specialist and Nurse Practitioner
  - Autumn Quarter—April 1
  - Winter Quarter—August 1
  - Spring Quarter—November 1

Pre-entrance requirements (p. 25):

1. Health clearance, including immunizations
2. Background check

Regulations

Nondegree course status
Up to 12 units of required core course work may be taken as a nondegree student, with the consent of the instructor, while the application
submission and review are in progress. If grades of B or higher are earned, the course work may be applied toward the graduate degree upon acceptance into the program.

**Course scheduling**

Core nursing courses are scheduled to accommodate the typical working nurse.

**Curriculum change**

The school reserves the right to update and modify the curriculum without prior notice to maintain currency with standards in health care.

Students in continuous attendance will meet graduation requirements of the CATALOG under which they enter the School of Nursing unless change is necessary to comply with new professional standards.

**General requirements**

For information about requirements and practices to which all graduate students are subject, the student should consult the Catalog of Loma Linda University, Section II About the University and in Section III, About the Schools, School of Nursing.

---

### Program requirements

**Bachelor of Science to Doctor of Nursing Practice:**

**Clinical Nurse Specialist concentration areas:**

- Clinical Nurse Specialist: Adult-Gerontology (p. 339)
- Clinical Nurse Specialist: Pediatrics (p. 341)
- Nurse Anesthesia (p. 343)

**Nurse Practitioner concentration areas:**

- Family Nurse Practitioner (p. 342)
- Primary Care Adult-Gerontology Nurse Practitioner (p. 344)
- Primary Care Pediatric Nurse Practitioner (p. 345)
- Psychiatric Nurse Practitioner (p. 346)

**Post-Masters to Doctor of Nursing Practice** (p. 347)

---

### Clinical Nurse Specialist: Adult-Gerontology Concentration

The clinical nurse specialist: adult-gerontology concentration prepares students for leadership roles as clinical nurse specialists within the health-care system. Clinical and theoretical content focuses on systems thinking, evidence-based practice, and translational research as related to adult and geriatric clients and families. The curriculum offers an opportunity to choose an emphasis in a selected vulnerable population with health-care needs.

The curriculum includes 540 hours of clinical practicum in the advanced practice role and 510 practicum hours for the D.N.P. role. The graduate is prepared for certification by the American Nurses Certification Corporation as a clinical nurse specialist in adult-gerontology nursing.

**Portfolio**

Prior to graduation, students are required to submit an online professional portfolio. Documentation of 510 doctoral leadership practice hours will be included in the portfolio.

**Normal time to complete the program**

Four (4) years (15 academic quarters) based on less than full-time enrollment
Clinical Nurse Specialist: Pediatrics Concentration

Closed to admissions for the 2019-2020 academic year.

The clinical nurse specialist: pediatric concentration prepares students for leadership roles as clinical nurse specialists within the health-care system. Clinical and theoretical content focuses on systems thinking, evidence-based practice, and translational research as related to nursing care of children and families. The curriculum offers an opportunity to choose an emphasis in a selected vulnerable population experiencing health-care needs. The curriculum includes 540 hours of clinical practice in the advanced practice role and 510 practicum hours for the DNP role. The graduate is prepared for certification by the American Nurses Certification Corporation (ANCC) as a clinical nurse specialist in acute-care pediatrics.

Family Nurse Practitioner Concentration

The family nurse practitioner clinical option prepares the nurse for a leadership role in the health-care system. Clinical and theoretical content focuses on systems thinking, evidence-based practice, and translational research as related to the primary health-care needs of family members from newborn through elders in consultation and collaboration with family practice physicians and other health-care providers. The curriculum includes 660 hours of clinical practice in the advanced practice role and 510 practicum hours for the DNP role. The curriculum prepares the graduate to be certified as a family nurse practitioner by the state of California and the American Nurses Certification Corporation.

Portfolio
Prior to graduation, students are required to submit an online professional portfolio. Documentation of 510 doctoral leadership practice hours will be included in the portfolio.

Normal time to complete the program
Four (4) years (15 academic quarters) based on less than full-time enrollment.

Nurse Anesthesia
The nurse anesthesia concentration is designed to educate critical care registered nurses in the nurse anesthetist role across the lifespan. Upon completion, graduates are able to exercise advanced levels of clinical judgment, systems thinking, and expanded responsibility, as well as become accountable for planning, implementing, and evaluating evidence-based strategies. Graduates are awarded a Doctor of Nursing Practice degree and are eligible to sit for the National Certification Examination of the National Board on Certification and Recertification of Nurse Anesthetists.

Primary Care Adult-Gerontology Nurse Practitioner Concentration

The primary care adult-gerontology nurse practitioner concentration prepares the nurse for a leadership role in the health-care system. Clinical and theoretical content focuses on systems thinking, evidence-based practice and translational research as related to the primary health-care needs of adults across the age spectrum in consultation and collaboration with primary care physicians and other health-care providers. The curriculum includes 600 hours of clinical practice in the advanced practice role and 510 practicum hours for the DNP role. The curriculum prepares the student to be certified as an adult-gerontology nurse practitioner by the state of California, the American Nurses Certification Corporation, and the American Association of Nurse Practitioners.

Psychiatric Nurse Practitioner Concentration

The psychiatric nurse practitioner (Psych NP) clinical option prepares the nurse for a leadership role in the health-care system. Clinical and theoretical content focuses on systems thinking, evidence-based practice, and translational research as related to the promotion of mental health, prevention, and treatment of psychiatric disorders in consultation and collaboration with psychiatrists and other mental health-care providers. The curriculum includes 570 hours of clinical practice in the advanced practice role and 510 practicum hours for the DNP role. The curriculum prepares the student to be certified as a psychiatric nurse practitioner by the state of California and the American Nurses Certification Corporation.

Portfolio

Prior to graduation, students are required to submit an online professional portfolio. Documentation of 510 doctoral leadership practice hours will be included in the portfolio.

Normal time to complete the program

Four (4) years (15 academic quarters) based on less than full-time enrollment.

M.S. to D.N.P.

The Master of Science degree to Doctor of Nursing Practice degree option prepares the advanced practice registered nurse, the nursing administrator, or the nurse educator for a leadership role in the health-care system. Theoretical content focuses on the development of leadership knowledge, skills, and attitudes. Systems thinking, evidence-based practice, and translational research are emphasized.

Advanced standing may be given for courses usually required for a master’s degree in advanced practice, administration, or education. Please see program requirements for more details. All students are required to complete the D.N.P. degree project.

1 Advanced standing may be given for content covered in a prior M.S. degree. Prior learning is evaluated and an individualized program of study is developed based on this evaluation and length of time since these courses were taken. Prior course work that partially meets the course outcomes will be augmented by registering for 1 to 6 units of NGRD 660 Integrative Leadership Case Study.

2 Advanced standing will be given if this specific course was taken as part of the M.S. degree program.

Portfolio

Prior to graduation, students are required to submit an online professional portfolio. Documentation of 510 doctoral leadership practice hours will be included in the portfolio.

Normal time to complete the program

Three (3) years (11 academic quarters) based on less than full-time enrollment.
Nursing – Ph.D.

The aim of the Doctor of Philosophy (Ph.D.) degree program in nursing is to prepare nurse scholars for leadership in education, health-care administration, and research. The Ph.D. degree in nursing is a research-oriented degree with emphases on the development of nursing science in the areas of vulnerable populations, health/wellness/wholeness, and health systems research. The nurse-scientist who completes this program should be committed to the generation of knowledge critical to development of nursing science and practice. Graduates join other nursing leaders in furthering the development of nursing science and improving health-care delivery throughout the world. The program is designed for entry with a minimum of a B.S. degree. Advanced standing, of up to 32 units, is given to students with a prior master’s degree in nursing. See program requirements for more details. The program completion range is three-to-seven years (projected mean is five years) depending on whether students are full or part time.

Learning outcomes for Doctor of Philosophy

The learning outcomes of the Ph.D. degree program are designed to prepare nurse scientists and scholars with a Christian perspective for leadership in education, health-care administration, and research within a global community. Upon completion of the Ph.D. degree, the graduate should be able to:

1. Embrace a holistic perspective on life and demonstrate this by integrating the bio-psycho-social-spiritual dimensions in teaching, scholarship, and service.
2. Extend Christ-centered values to nursing scholarship and education.
3. Serve as a nurse scholar through the generation and dissemination of knowledge relevant to nursing science, health policy, and the nursing profession.
4. Explain complex phenomena clearly in spoken and written English to both professional and lay audiences.
5. Demonstrate advanced competency and leadership in the use of technology for the purpose of generating new knowledge in nursing.
6. Engage in collaborative discourse, scholarship, and leadership contributing to health care and society.
7. Expand the knowledge and science in the provision of nursing-related care to diverse groups.

The curriculum

The Ph.D. degree program is offered using a year-round hybrid/blended format. The hybrid/blended format will use both face-to-face on the Loma Linda University campus, and distance-learning strategies. The curriculum has six domains: core courses (B.S. to Ph.D.), Ph.D. role courses, concentration/elective courses (to support the dissertation), methods courses (research methods and statistics), religion, and dissertation units. The department has identified approximately 20 courses within the School of Nursing that could be selected to satisfy requirements within the domains as well as a variety of courses in other Loma Linda University schools and the NEXus* consortium that may support the student’s dissertation interest.

The doctoral degree program is designed to provide an in-depth understanding of knowledge development within the discipline of nursing through philosophical, theoretical, and scientific methods of inquiry. The student is encouraged to select an individually focused area of advanced inquiry that will support his/her chosen area of expertise in nursing that falls within the broad scope of vulnerable populations, health/wellness/wholeness, or health systems research. The individual area of concentration should fit established research programs of the School of Nursing faculty or other University faculty members as advised.

* NEXus is a partnership among select Western Institute of Nursing institutions to facilitate enrollment in doctoral courses not available on the student’s home campus. Through NEXus, the institutions have identified courses that are available at a distance and open for enrollments from partner institutions.

Progression criteria

The following sequential elements are required for progression in the doctoral program:

1. Area of concentration developed and approval of student’s proposed academic plan by the end of the first year of full-time study.
2. Complete all core, concentration, and methods courses.
3. Pass oral comprehensive examination.
4. Successful defense of research proposal.
5. Advancement to candidacy.

Refer to guidelines from the Faculty of Graduate Studies* and the Ph.D. degree student handbook for dissertation format requirements.

The normal time to complete the program is three to seven years—(five [5] years projected mean) based on less than full-time enrollment.

*The Ph.D. Program Oversight: Faculty of Graduate Studies

Admissions

In addition to Loma Linda University (p. 24) admission requirements, the applicant to the Doctor of Philosophy degree program in nursing must also complete the following requirements:

1. Minimum of a baccalaureate degree in nursing from an accredited program. Applicants with a prior master’s degree in nursing are eligible to receive up to 32 units of advanced standing.*
2. GPA of 3.3, both cumulative and in nursing courses
3. Current RN license before application*
4. Three electronic recommendations from recent professors or current work supervisor
5. Interview by faculty members in the School of Nursing
6. Health Science Reasoning Test
7. Evidence of scholarly work as determined by faculty

Application deadlines

Applicants seeking graduate admission must have the application process completed by the dates indicated in the followi

- Autumn Quarter—April 1
- Winter Quarter—August 1
- Spring Quarter—November 1

* Non-nurses who have completed health related Master’s degree may be considered for admission on an individual basis.

¹ Advanced standing given for students with a prior masters degree in nursing.
² Advanced standing given for students with a prior masters degree in nursing if the course has been taken within the last five years.
³ Advanced standing up to 8 units given for students with a prior master’s degree in nursing.
⁴ Advanced methods.
⁵ NGRD 686 if study design is quantitative; NGRD 695 if study design is qualitative.

**Normal time to complete the program**

5.5 years based on less than full-time enrollment
The School of Pharmacy is delighted that you are interested in our program. Pharmacists play an integral role in caring for patients in a multidisciplinary approach within the health-care team. While the traditional role for pharmacists is to dispense medications to patients, the practice of pharmacy is extensive and has become a "hands-on" practice. In the community setting, pharmacists administer vaccines to patients and also conduct patient assessments of ailments such as hypertension, hyperlipidemia, and seizures in outpatient disease-based clinics. In the institutional setting, pharmacists work closely with physicians, nurses, and allied professionals to ensure that patients are receiving appropriate doses of medications per protocol. In order to gain these skills, knowledge of pharmacy practice in drug information, pharmaceutical care, clinical therapeutics, and experiential education is vital; along with an understanding of biomedical, pharmaceutical, social, and administrative science. This catalog will introduce you to the courses and services available to help you reach your goals.

The aim of our faculty, staff, and administration is to provide an environment that helps you develop into a caring, compassionate, competent, and skillful pharmacist. We are committed to ensuring that all students gain the knowledge and skills needed for the profession, and a dedication of lifelong service to others. While a student at Loma Linda University School of Pharmacy, you will have opportunities to participate in community outreach, including programs to underserved patient populations.

The University motto, "To make man whole," combined with the mission to continue the teaching and healing ministry to Jesus Christ, is the foundation on which all programs at Loma Linda University are built. It is our desire to prepare all graduates to fulfill this mission. Welcome to the school that will help you grow spiritually, mentally, physically, socially, and professionally for a life of service to those in need.

Michael D. Hogue, Pharm.D., FAPhA, FNAP
Dean, School of Pharmacy

School foundations
History
In 1994, a school of pharmacy was proposed to the Loma Linda University Board of Trustees; and in 1995, the board voted to continue to approve, in principle, the establishment of a school of pharmacy. The new School of Pharmacy's pioneering class of 2006 began on September 19, 2002. In July 2007, the Accreditation Council for Pharmacy Education granted full accreditation status to the School of Pharmacy. In October 2012, the School of Pharmacy moved into Shryock Hall, a historical building in the core of the LLU campus. The administrative team, Department of Pharmacy Practice, and Department of Experiential and Continuing Education now call Shryock Hall home. The Chan Shun Pavilion houses the Department of Pharmaceutical and Administrative Sciences and three research laboratories.

Mission, goals, and values
Our mission
In addition to the mission of Loma Linda University to continue the teaching and healing ministry of Jesus Christ, the School of Pharmacy is committed to:

- Educating competent, caring pharmacists who will serve as integral members of the health-care team.
- Expanding—through research—the development of therapeutic regimens that will advance the knowledge and technology available for the treatment of disease.
- Providing high-quality pharmaceutical care to all those within the global sphere of influence of Loma Linda University.

The School of Pharmacy educates pharmacists of the highest ethical and professional standards to deliver competent and compassionate pharmaceutical care. A diverse and dynamic educational environment produces students who are practitioners, health professionals, and providers of humanitarian service to a global community. Graduates will be dedicated to lifelong learning; developing new knowledge; advancing standards of practice; and integrating physical, mental, social, and spiritual dimensions of health.

Our goals
The goals of Loma Linda University School of Pharmacy are to:

- Provide pharmaceutical care in a global community.
- Expand and disseminate pharmaceutical knowledge through research and scholarly activities.
- Promote integrity and high ethical standards in conjunction with empathic attitudes that contribute to the well-being of patients and society.
• Engender and nurture the desire to serve humankind.
• Create an educational environment supportive of diverse populations and learning styles.
• Demonstrate pharmacy leadership within the University and the region.
• Encourage cultivation of self-education habits that foster lifelong learning.
• Instill positive personal health lifestyles that promote wholeness, wellness, and spiritual values.
• Incorporate educational techniques and technologies that best serve student learning.
• Promote responsible management of health-care resources and the environment.

Our values
The School of Pharmacy’s academic and co-curricular activities focus on the following seven values (J-CHIEFS):

• Justice—the commitment to equality and to treat others fairly, renouncing all forms of discrimination. The God of the Bible is One who calls people continually to justice. According to the prophets, religious faith could be genuine only when it led the believers to "seek justice, rescue the oppressed, defend the orphans, [and] plead for the widow."

• Compassion—the sympathetic willingness to be engaged with the needs and sufferings of others. Among the most memorable depictions of compassion in Scripture is the story of the Good Samaritan, which Loma Linda University has taken as a central symbol of its work.

• Humility—the willingness to serve others in a sacrificial manner, and the self-respect that renounces haughtiness or arrogance.

• Integrity—the quality of living a unified life in which one’s convictions are well-considered and match his/her actions. Integrity encompasses honesty, authenticity, and trustworthiness.

• Excellence—the commitment to exceed minimum standards and expectations.

• Freedom—the competency and privilege to make informed and accountable choices and to respect the freedom of others. God has called us not to slavery but to freedom.

• Purity/Self-Control—the commitment to be morally upright and moderate in all things, with complete control over one’s emotions, desires, and actions.

General regulations
Students of the University are responsible for informing themselves of and satisfactorily meeting all regulations pertinent to registration, matriculation, and graduation. Section III provides the general setting for the programs of each school and outlines the subject and unit requirements for admission to individual professional programs. It is important to review specific program requirements in the context of the general requirements applicable to all programs.

Transfer credit units
The School of Pharmacy does not accept students with advanced status into the Pharmacy Program.

Computer competency
Students must have computer proficiency prior to enrollment, which includes use of an e-mail system (including attaching a document); familiarity with a learning management system (Canvas...
or Blackboard); basic knowledge of word processing program(s), presentation program(s), and spreadsheet program(s). Students must also be capable of searching the Internet and navigating their computers.

Technical standards for admission, promotion, and graduation

Introduction
Pharmacy education requires that the accumulation of scientific knowledge be accompanied by the simultaneous acquisition of professional skills, attitudes, and behavior. The school’s faculty members have a responsibility to society to matriculate and graduate the best possible pharmacists. Thus, admission to the School of Pharmacy is offered only to those who present the highest qualifications for the study and practice of pharmacy. Technical standards presented in this document are requirements for admission to, promotion within, and graduation from the Loma Linda University School of Pharmacy.

It is the policy of Loma Linda University School of Pharmacy that no person shall be denied admission, promotion, or graduation on the basis of any disability, provided that the individual demonstrates ability to meet the minimum technical standards set forth herein. Standards are developed as criteria to achieve the Doctor of Pharmacy degree in preparation for licensure as a practicing pharmacist and for postgraduate professional training and education in any of the varied fields of pharmacy. Further, the safety of the patient must be guarded as the final and ultimate consideration. Therefore, it is not only reasonable, but also essential, for competent patient care to require minimum technical standards for the education of pharmacists.

Graduates of schools of pharmacy must have the knowledge and skills to function in a broad variety of clinical, administrative, and leadership situations, and to render a wide spectrum of pharmaceutical care. The School of Pharmacy acknowledges Section 504 of the 1973 Vocational Rehabilitation Act and PL 11-336, the Americans with Disabilities Act (ADA) 1993, but ascertains that certain minimum technical standards must be present in prospective candidates. The Accreditation Council for Pharmacy Education requires that the curriculum provides a general professional education, enabling each student to eventually practice as a pharmacist generalist. This requires the development of broad knowledge, skills, behaviors, ongoing self-directed learning, and the eventual ability to deliver competent pharmaceutical care within a reasonable time frame and within the context of the legal and ethical framework of the profession.

Technical standards
Technical standards specify those attributes the faculty considers necessary for initiating, continuing, or completing a high-quality pharmacy education program, thus enabling each graduate to enter practice, residency, or fellowship training. Faculty members have the responsibility to monitor the maintenance of these standards. Students must be able to independently perform all described functions. A candidate for the Doctor of Pharmacy degree must have aptitude, abilities, and skills in the following areas: observation, communication, motor coordination and function; intellectual-conceptual, integrative, and quantitative abilities; behavioral and social attributes; and ethical values.

The School of Pharmacy will consider for admission any applicant who meets the minimum technical standards set forth herein. Standards for the education of pharmacists.

The School of Pharmacy recognizes that certain student disabilities can be accommodated without compromising required standards and the integrity of the curriculum. Technological compensation can be made for some handicaps in these areas, but a candidate should be able to perform in a reasonably independent manner. The school is committed to the development of innovative and creative ways of opening the curriculum to competitive and qualified disabled candidates while protecting the care of patients. The use of a trained intermediary means that a candidate’s judgment must be mediated by someone else’s power of selection and observation. Therefore, third parties cannot be used to assist students in accomplishing curricular requirements in the skill areas specified above.

Observation
Students must be able to observe demonstrations and conduct exercises in a variety of areas related to contemporary pharmacy practice, including but not limited to monitoring of drug response and preparation of specialty dosage forms and experiments in the basic sciences. A student must be able to observe a patient accurately at a distance and close at hand, noting nonverbal as well as verbal signals. The student must be able to observe and interpret presented information. Specific observation requirements include, but are not limited to the following abilities: visualizing and discriminating findings on monitoring tests; reading written and illustrated material; observing demonstrations in the classroom or laboratory, including projected images; observing and differentiating changes in body movement; observing anatomic structures; discriminating numbers and patterns associated with diagnostic and monitoring instruments and tests; observing a patient’s environment; and competently using instruments for monitoring drug response.

Communication
A student should be able to speak, hear, and listen to patients in order to elicit information; describe changes in mood, activity, and posture; and perceive verbal as well as nonverbal communications. Students must be able to relate effectively and sensitively with patients and their caregivers/partners, and convey a sense of compassion and empathy. Students must be able to communicate effectively and sensitively with patients, colleagues, and other personnel in the School of Pharmacy. Communication includes speech, reading, writing, hearing, and computer literacy. Students must be able to communicate quickly, effectively, and efficiently in oral and written English with all members of the health-care team.

Specific requirements include but are not limited to the following abilities: communicating rapidly and clearly with members of the health-care team individually and collectively; eliciting a thorough medication and medical history; and communicating complex findings in appropriate terms that are understood by patients and their caregivers/partners, and members of the health-care team (fellow students, pharmacists, faculty and staff members, physicians, nurses, aides, therapists, social workers, and others). Students must be able to prepare and communicate concise but complete summaries of individual activities, decisions, and complex, prolonged encounters with patients. Students must be able to complete forms or appropriately document activities according to directions in a thorough and timely fashion.
Motor coordination and function
Students should have sufficient motor function and skills necessary to perform basic tasks in the practice of pharmacy and to elicit information from patients by various screening maneuvers. Students should be able to execute motor movements reasonably required to participate in the general care and emergency treatment of patients. They must be able to respond promptly to emergencies within the practice setting and must not hinder the ability of their co-workers to provide prompt care. Examples of such emergency treatment reasonably required of pharmacists include arriving quickly when called, administering cardiopulmonary resuscitation, applying pressure to stop bleeding, participating in the initiation of appropriate procedures, rapidly and accurately preparing appropriate emergency medication, and preparing sterile intravenous medications. Such actions require coordination of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision. Students must have sufficient sensory and motor function to monitor drug responses and to prepare and or dispense pharmaceuticals. A candidate should be able to perform basic laboratory tests (e.g., blood glucose and lipid levels); administer intramuscular and subcutaneous immunizations; compound sterile and nonsterile dosage forms; use current technology for drug information evaluation; and read EKGs, drug blood levels, and other laboratory results. It is also necessary for the student to be able to access printed and electronic disease information sources within a reasonable time and record data correctly so that it is clearly understood by other health professionals.

Intellectual—conceptual, integrative, and quantitative abilities
A student should possess sufficient intellectual, conceptual, integrative, and quantitative abilities to complete a rigorous and intense didactic and experiential curriculum. These abilities include measurement, calculation, rational reasoning, problem analysis and solving, decision making, judgment, numerical recognition, information integration, and solution synthesis. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relations of structures. Especially important is the appropriate and rapid calculation of dosages for a variety of patient-specific conditions, such as renal or hepatic failure, obesity, and cardiac or respiratory arrest. Additionally, calculations involving appropriate dilution or reconstitution of drug products, such as electrolytes, must be made accurately and quickly. Problem solving and critical skills demanded of all pharmacists require all of the above-mentioned intellectual abilities and must be performed quickly, especially in emergency situations. The ability to incorporate new information from peers or teachers and to locate and evaluate new information from the literature to be used appropriately in formulating assessments and pharmaceutical care plans is essential, as is good judgment in patient assessment and therapeutic planning for disease management. Students must be able to identify and acknowledge the limits of their knowledge to others when appropriate and be able to recognize when the limits of their knowledge indicate that further study or investigation is essential before participating in decision making. A student must be fully alert and attentive at all times in clinical settings.

Behavioral and social attributes
Empathy, integrity, honesty, concern for others, kindness, patience, good interpersonal skills, interest, and motivation are all required personal qualities. Students must possess the emotional and mental health required for full use of their intellectual abilities, the exercise of good judgment, the prompt completion of all responsibilities attendant to the screening and care of patients, and the development of mature, sensitive, and effective relationships with patients of differing cultures and backgrounds. Students must also be able to develop mature, sensitive, and effective relationships with patients and their caregivers and partners—providing comfort and reassurance when appropriate. Students must possess adequate endurance to be able to tolerate physically, intellectually, and emotionally taxing workloads; and to function effectively under stress or with distractions. At times, this requires the ability to be aware of and appropriately react to one’s own immediate emotional responses and environment. For example, students must maintain a professional demeanor and organization in the face of long hours and personal fatigue, dissatisfied patients, and tired colleagues.

Students must develop the skills necessary to instruct and supervise technical personnel assisting with the delivery of pharmaceutical services. Students are expected to accept appropriate suggestions and criticism and, if necessary, respond quickly, appropriately, and cooperatively by modification of behavior. Empathy, patience, integrity, concern for others, interpersonal skills, interest, and motivation are all personal qualities that should be assessed during admission and education processes.

Ethical values
A student must demonstrate the highest level of professional demeanor and behavior; and must perform in an ethical manner in all dealings with peers, faculty members, staff, and patients. Students must also be able to develop professional relationships with patients and their caregivers and partners while protecting patient confidentiality. Students must also meet the expected ethical standards set forth by the pharmacy profession. Good moral character, decent values, and principled judgment are paramount attributes for being a professional. In order to participate in key components of the curriculum, a student must be able to obtain and maintain a valid intern pharmacist license from the California State Board of Pharmacy and pass requisite criminal background checks and random illegal drug screens required by the Board of Pharmacy or affiliated clinical institutions of Loma Linda University.

Applicable technical standards requirements
The candidate/student

1. observes demonstrations and participates in experiments in the basic pharmaceutical sciences.
2. analyzes, synthesizes, extrapolates, solves problems, and reaches therapeutic judgments and monitoring parameters.
3. sufficiently uses the senses of vision and hearing and the somatic sensation necessary to perform a physical assessment. (For example, the candidate/student performs palpation, auscultation, and percussion.)
4. relates to patients of all cultures and backgrounds and establishes sensitive, professional relationships with them.
5. communicates therapeutic options and decisions to the patient and to colleagues with accuracy, clarity, and efficiency.
6. learns and performs routine laboratory tests and screening procedures.
7. performs with precise, quick, and appropriate actions in emergency situations.
8. displays good judgment in the assessment and treatment of patients.
9. possesses the perseverance, diligence, and consistency to complete the pharmacy school curriculum and to enter the practice of pharmacy.
10. accepts criticism and responds with the appropriate modification of behavior.
In summary
Candidates for the Doctor of Pharmacy degree must have somatic sensation and functional use of the senses of vision and hearing. Candidates must have sufficient use of senses (touch, pain, temperature, position, pressure, movement, and vibration) and motor function to permit them to carry out the activities described above. Students must be able to consistently, quickly, and accurately integrate all information received by whatever sense(s) employed; and must have the intellectual ability to learn, integrate, analyze, and synthesize data. Finally, students must have good moral character, decent values, and principled judgment; and are expected to meet the ethical standards set forth by the pharmacy profession.

Any faculty or administrative team member may question any enrolled student’s or admission candidate’s ability to meet any technical standard. A request for investigation of a specific individual must be made in writing to the associate dean for student affairs and admissions, detailing the reasons why such an evaluation is deemed necessary. The dean will be notified if such a request is granted.

Student life
The information on student life contained in this CATALOG is brief. The University Student Handbook more comprehensively addresses University and school expectations, regulations, and policies; and is available to each registered student. Students need to familiarize themselves with the contents of the Student Handbook. Additional information regarding policies specific to a particular school or program within the University is available from the respective school.

The School of Pharmacy prepares a school-specific Policy and Procedure Manual, which is provided to all pharmacy students. Regulations, policies, procedures, and other program requirements are contained in this manual.

Health check requirements
All new students are required to have the immunizations listed below before their first registration. Students will not be allowed to register without a valid and completed immunization record. It is strongly recommended that all required immunizations and physical examinations be obtained by the student before arrival on campus. All immunizations, except the third hepatitis B, can be completed in one month. Many county health departments offer these immunizations at a reduced cost.

Immunizations
• Measles, mumps, rubella (MMR)—Series of two injections must be current after 1980 or show a positive MMR titer.
• Tetanus/diphtheria/pertussis (Tdap)—Must be current within ten years. (Note: tetanus-only or Td vaccine does not meet the requirement; must contain the pertussis component.)
• Hepatitis B—Series of three injections, recombinant form-Engerix-B or Recombivax-HB; or series of two injections, intradermal form Heplisav-B consistent with Centers for Disease Control and Prevention current recommendations.
• Tuberculosis skin test (PPD Mantoux)—Must be current within six months. (If student tests positive, a chest X-ray report done within the past year is required.)
• Varicella (chickenpox)—Must show proof of a positive Varicella titer.

A completed immunization record form must be submitted to the School of Pharmacy Office and must be uploaded to the E-Value program in Experiential Education, as well as to Student Health Services. A valid and completed immunization record is required before the student can register.

Physical examination
Documentation of a physical examination is required for entrance into the program. For additional information, please contact Student Health Services directly at 909/558-8770.

Background check
Students are required to pass a background check prior to each Autumn Quarter registration to comply with clinical site regulations. Applicants receive detailed information through the applicant portal regarding the process for obtaining the background check.

Pharmacy intern license
California law requires that all pharmacy students be licensed as interns before participating in any pharmacy practice experience. Consequently, all enrolled students must possess a valid, non-probationary intern pharmacist license to participate in the experiential components of the Pharm.D. program. Application for this license is part of the orientation program scheduled prior to the start of the PY1 year.

Professional integrity
Loma Linda University seeks to educate ethical and proficient pharmacists within a Christian paradigm. Fundamental core values of compassion, integrity, freedom, excellence, justice, purity, and humility are expected of each student attending the School of Pharmacy. Integrity is important in upholding the standards of professional and personal conduct and is consistent with the oath that is taken upon graduation. It includes being accountable for one’s own conduct, as well as assuming responsibility for the professional behavior of one’s colleagues within the profession. Professionalism involves treating others with courtesy and respect. It is expected that all School of Pharmacy students will exhibit conduct that shows respect to others at all times.

Code of conduct
In harmony with the goals of Loma Linda University, students are expected to demonstrate a pattern of personal discipline with lifestyle expectations that are consistent with those of the Seventh-day Adventist Church. Joining the Loma Linda University family is an honor and requires each individual to uphold the policies, regulations, and guidelines established for all members of the University team. The following are expected of each member of the Loma Linda University family:

• To respect oneself.
• To respect the dignity, feelings, worth, and values of others.
• To respect the rights and property of others and to discourage vandalism and theft.
• To prohibit discrimination while striving to learn from differences in people, ideas, and opinions.
• To practice personal, professional, and academic integrity; and to discourage all forms of dishonesty, plagiarism, deceit, and disloyalty to the code of conduct.
• To foster a personal, professional work ethic within the Loma Linda University family.
• To foster an open, fair, and caring environment.
• To be fully responsible for upholding the Loma Linda University code.

Specific policies are outlined in greater detail in the University Student Handbook.
**CPR and first aid certification**

All students must be currently certified in cardiopulmonary resuscitation and first aid during their enrollment in the School of Pharmacy.

**Student organizations**

**Professional development**

Professional development activities occur within the curriculum (for-credit coursework) and as part of the co-curricular (not-for-credit, but required learning sessions/activities) program adopted by the faculty and required for completion prior to graduation. Students will learn to develop professional skills and abilities consistent with the expectations of the Accreditation Council for Pharmacy Education accreditation standards 3 and 4, as well as programmatic expectations articulated by the faculty as part of the curricular and co-curricular plans of study. We aim to graduate pharmacists who practice their profession with the highest degree of professionalism and with excellence.

**Professional organizations**

Involvement in professional organizations is an integral part of the educational and professional experience within the School of Pharmacy. The complete list of School of Pharmacy-recognized professional organizations can be found in the Professional Organization Policies and Procedure Manual. This manual is maintained by the Associate Dean for Student Affairs and Admissions.

**Organization membership by invitation**

The School of Pharmacy endorses three organizations in which student membership is by invitation only. Membership in these organizations is seen as prestigious and indicative of superior academic achievement and leadership.

- California Pharmacy Student Leadership
- Rho Chi Pharmaceutical Honor Society
- Phi Lambda Sigma National Pharmacy Leadership Society

**Class leadership**

Each class elects leaders to serve as student representatives to administration and to guide the class in addressing student-related issues. The Office of Student Affairs works closely with class leaders—assisting with class issues, helping plan events, and facilitating a strong communication link to and from students. Each class also elects a full-time faculty member to serve as class advisor. The advisor’s function is to serve as mentor, keep abreast of class issues, and maintain an open communication link with the associate dean for student affairs and admissions.

**Academic policies and procedures**

**Curriculum outcome objectives**

On August 21, 2014, the faculty approved and adopted the following outcomes, which are based on CAPE 2013 educational outcomes.

**Domain 1—Foundational Knowledge**

**Subdomain 1.1. Learner (Learner)—**Develop, integrate, and apply knowledge from the foundational sciences (i.e., pharmaceutical, social/behavioral/administrative, and clinical sciences) to evaluate the scientific literature, explain drug action, solve therapeutic problems, and advance population health and patient-centered care.

**Learning objectives**

By the end of the program, the graduate should be able to:

1.1.1. Develop and demonstrate depth and breadth of knowledge in pharmaceutical, social/behavioral/administrative, and clinical sciences.

1.1.2. Articulate how knowledge in foundational sciences is integral to: 1) clinical reasoning, 2) evaluation of future advances in pharmacotherapy, 3) supporting health and wellness initiatives, and 4) delivery of contemporary pharmacy services.

1.1.3. Integrate knowledge from foundational sciences to explain how specific drugs or drug classes work, and evaluate their potential value in individuals and populations.

1.1.4. Apply knowledge in foundational sciences to solve therapeutic problems and advance patient-centered care.

1.1.5. Analyze scientific literature related to drugs and disease to enhance clinical decision making.

1.1.6. Identify and analyze emerging theories, information, and technologies that may impact patient-centered and population-based care.

**Domain 2—Essentials for Practice and Care**

**Subdomain 2.1. Patient-centered care (Caregiver)—**Provide patient-centered care as the medication expert (collect and interpret evidence; prioritize; formulate assessments and recommendations; implement, monitor and adjust plans; and document activities).

**Learning objectives**

By the end of the program, the graduate should be able to:

2.1.1. Collect subjective and objective evidence related to patient, medications, allergies/adverse reactions, and disease by performing patient assessment (including physical assessment) from chart/electronic health records, pharmacist records, and patient/family interviews.

2.1.2. Interpret evidence and patient data.

2.1.3. Prioritize patient needs.

2.1.4. Formulate evidence-based care plans, assessments, and recommendations.

2.1.5. Implement patient-care plans.

2.1.6. Monitor the patient and adjust care plan as needed.

2.1.7. Document patient-care-related activities.

**Subdomain 2.2. Medication-use systems management (Manager)—**Manage patient health-care needs using human, financial, technological, and physical resources to optimize the safety and efficacy of medication-use systems.

**Learning objectives**

By the end of the program, the graduate should be able to:

2.2.1. Compare and contrast the components of typical medication-use systems in different pharmacy practice settings.

2.2.2. Describe the role of the pharmacist in impacting the safety and efficacy of each component of a typical medication-use system.
(i.e., procurement, storage, prescribing, transcription, dispensing, administration, monitoring, documentation, and outcomes).

2.2.3. Utilize technology to optimize the medication-use system.

2.2.4. Identify and utilize human, financial, and physical resources to optimize the medication-use system.

2.2.5. Manage health-care needs of patients during transitions of care.

2.2.6. Apply standards, guidelines, best practices, and established processes related to safe and effective medication use.

2.2.7. Utilize continuous quality improvement techniques in the medication-use process.

Subdomain 2.3. Health and wellness (Promoter)—Design prevention, intervention, and educational strategies for individuals and communities to manage chronic disease and improve health and wellness.

Learning objectives
By the end of the program, the graduate should be able to:

2.3.1. Describe the use of risk assessment, risk reduction, screening, education, and immunizations to provide systematic preventive care.

2.3.2. Provide prevention, intervention, and educational strategies for individuals and communities to improve health and wellness.

2.3.3. Participate with interprofessional health-care team members in the management of and health promotion for all patients.

2.3.4. Evaluate personal, social, behavioral, economic, and environmental conditions to improve health and wellness.

Subdomain 2.4. Population-based care (Provider)—Describe how population-based care influences patient-centered care, the development of practice guidelines and evidence-based best practices.

Learning objectives
By the end of the program, the graduate should be able to:

2.4.1. Assess the health-care status and needs of a targeted patient population.

2.4.2. Develop and provide an evidence-based approach that considers items—including cost, care, access, satisfaction needs, and cultural appropriateness of a targeted patient population.

2.4.3. Participate in population health management by evaluating, recommending, and/or adjusting interventions to maximize health.

Domain 3—Approach to Practice and Care

Subdomain 3.1. Problem solving (Problem Solver)—Identify problems; explore and prioritize potential strategies; and design, implement, and evaluate a viable solution.

Learning objectives
By the end of the program, the graduate should be able to:

3.1.1. Identify and define the primary problem.

3.1.2. Define basic and alternative goals.

3.1.3. Explore multiple solutions by organizing, prioritizing, and defending each possible solution.

3.1.4. Anticipate positive and negative outcomes by reviewing assumptions, inconsistencies, and unintended consequences.

3.1.5. Implement the most viable solution, including monitoring parameters, to measure intended and unintended consequences.

3.1.6. Reflect on the solution implemented and its effects to improve future performance.

Subdomain 3.2. Educator (Educator)—Educate all audiences by determining the most effective and enduring ways to impart information and assess understanding.

Learning objectives
By the end of the program, the graduate should be able to:

3.2.1. Conduct a learning needs assessment of constituents who would benefit from pharmacist-delivered education (e.g., patients/caregivers, technicians and interns, pharmacy students, fellow pharmacists, other health-care providers, legislators).

3.2.2. Select the most effective techniques/strategies to achieve learning objectives.

3.2.3. Demonstrate the ability to coordinate educational efforts with other health-care providers, when appropriate, to ensure a consistent, comprehensive, and team-based encounter.

3.2.4. Ensure that instructional content contains the most current information relevant for the intended audience.

3.2.5. Adapt instruction and delivery to the intended audience.

3.2.6. Assess audience comprehension.

Subdomain 3.3. Patient advocacy (Advocate)—Assure that patients’ best interests are represented.

Learning objectives
By the end of the program, the graduate should be able to:

3.3.1. Incorporate elements of Loma Linda University’s wholeness philosophy to empower patients to take responsibility for and control of their health.

3.3.2. Assist patients in navigating the complex health-care system.

3.3.3. Ensure patients obtain the resources and care required in an efficient and cost-effective manner (e.g., triage to social and/or other health-care services).

Subdomain 3.4. Interprofessional collaboration (Collaborator)—Actively participate and engage as a health-care team member by demonstrating mutual respect, understanding, and values to meet patient-care needs.

Learning objectives
By the end of the program, the graduate should be able to:

3.4.1. Establish a climate of shared values and mutual respect necessary to meet patient-care needs.

3.4.2. Define clear roles and responsibilities for team members to optimize outcomes for specific patient-care encounters.
3.4.3. Communicate in a manner that values team-based decision making and shows respect for contributions from other areas of expertise.

3.4.4. Foster accountability and leverage expertise to form a highly functioning team (one that includes the patient, family, and community) and promote shared patient-centered problem solving.

Subdomain 3.5. Cultural sensitivity (Includer)—Recognize social determinants of health to diminish disparities and inequities in access to quality care.

Learning objectives

By the end of the program, the graduate should be able to:

3.5.1. Recognize the collective identity and norms of different cultures without overgeneralizing (i.e., recognize and avoid biases and stereotyping).

3.5.2. Demonstrate an attitude that is respectful of different cultures.

3.5.3. Assess a patient’s health literacy and modify communication strategies to meet the patient’s needs.

3.5.4. Safely and appropriately incorporate patients’ cultural beliefs and practices into health and wellness care plans.

Subdomain 3.6. Communication (Communicator)—Effectively communicate verbally and non-verbally when interacting with an individual, group, or organization.

Learning objectives

By the end of the program, the graduate should be able to:

3.6.1. Interview patients using an organized structure, specific questioning techniques, and medical terminology adapted for the audience.

3.6.2. Actively listen and ask appropriate open- and closed-ended questions to gather information.

3.6.3. Use available technology and other media to assist with communication as appropriate.

3.6.4. Use effective interpersonal skills to establish rapport and build trusting relationships.

3.6.5. Communicate responsibly with assertiveness, persuasiveness, confidence, and clarity.

3.6.6. Demonstrate empathy when interacting with others.

3.6.7. Deliver and obtain feedback to assess learning and promote goal setting and goal attainment.

3.6.8. Develop professional documents pertinent to organizational needs.

Academic integrity policy

Academic dishonesty is an act of deliberate deceit in the fulfillment of a student’s obligations to the academic community. It includes, but is not limited to, the failure to observe rules of fairness in taking examinations or writing papers, plagiarism, fabrication and cheating. "Examinations" are defined as regularly scheduled tests, quizzes (scheduled or unscheduled), final examinations, comprehensive assessments, take-home tests, open-book tests, and any other assignment given by an instructor or preceptor whether for a grade, points toward a grade, or for zero points (e.g., a learning exercise).

a. Plagiarism is the act of presenting the work of another as if it were one’s own. It includes quoting, paraphrasing, summarizing or utilizing material from the Internet or from books, articles in periodicals, magazines, or newspapers without appropriate citation. In addition, any unacknowledged use of another’s ideas constitutes plagiarism, including the use of papers written by other students, interviews, radio or TV broadcasts, or any published or unpublished materials (e.g. letters, pamphlets, leaflets, notes or documents).

b. Fabrication is the act of contriving or making up material, data or other information (e.g. research data, patient test results) and submitting such as fact.

c. Cheating is the act of deceiving, which includes such acts as looking at another’s examination during the examination, using unauthorized aids (e.g. notes, electronic equipment) to retrieve or communicate information during examinations, or whatever else is deemed contrary to the rules of fairness including violation of specific rules designated by the instructor of the course.

d. Facilitation of academic dishonesty is the act of attempting to help someone engage in plagiarism, fabrication, cheating or any other type of academic dishonesty.

Disciplinary action for violation of the academic integrity policy may include receiving a failing grade on the examination or assignment, a failing grade in the course, suspension, or dismissal from the program.

e. School of Pharmacy procedures

(1) If any faculty member, employee or student of the School has reason to believe that academic dishonesty or unethical conduct may have occurred, the incident may be reported immediately (verbal or written). If the incident is not reported immediately, it must be reported in writing to the course coordinator within 48 hours. The course coordinator must report the incident to the Office of Academic Affairs. Failure to report breaches of integrity is considered a failure of academic and/or professional responsibility—and thus, may be subject to disciplinary action by the School or University. An instructor may take immediate action during an examination or other point generating activity in order to maintain the integrity of the academic process.

(2) When allegations of misconduct are made, the Office of Academic Affairs is responsible to ensure that an inquiry is made. This central reporting system allows patterns of behavior to be considered in determining the appropriate course of action. A discussion with the accused student will take place before formal action is taken. The student will have the opportunity to submit a written response concerning the specific incident.

(3) The Office of Academic Affairs will inform the student in writing if formal disciplinary action is taken. The student has the right to appeal the decision.

HIPAA violations

It is illegal for anyone to access any medical record that they have not been given specific permission to access including their own profile. HIPAA (protected health information) violations are reported directly to the dean. The dean will meet with the student to review the compliance
Interprofessional education
LLUSP provides interprofessional education (IPE) experiences for pharmacy students to develop their professional communication skills and to use their knowledge and experience to provide a team-based approach and patient-centered care.

It is required for all pharmacy students to participate in scheduled IPE related courses and events throughout their didactic education and clinical training.

Student progression/remediation

1. Any student who fails to achieve a minimum cumulative GPA of 2.0 in all courses at the conclusion of the academic year (PY1-PY3) will be dismissed from the Pharm.D program.

A minimum grade of C is required to pass all pharmacy courses (required and elective).

1. Upon failing a required course, and after completing all required courses which are in-progress, a PY1 student will be placed on a leave-of-absence and the intern license will be cancelled until she/he returns to retake the failed course work.

2. Upon failing a required course, and after completing all required courses which are in-progress, a PY2 and PY3 student may choose to enroll in elective courses for which she/he is qualified. This permits the student to maintain his/her intern license. The student is permitted to participate in campus activities and student organizations (no leadership roles or competitions), and maintain his/her intern license. Alternatively, the student may go on academic leave of absence and surrender his/her intern license, until she/he returns to re-take the failed coursework.

3. Upon return, the student must repeat the course(s) failed initially. Returning students are able to take elective courses for which they are qualified at their own discretion. Repeated courses are posted as actual grade earned (per LLU policy), however both grades remain on the transcript. Only the latter grade is used for G.P.A. calculations.

4. Failing more than nine credit hours of required course work, whether accumulated in a single academic term or throughout the entire academic program, will result in dismissal from the program. A student will have a maximum of six academic years to complete the Doctor of Pharmacy degree, beginning with the initial date of matriculation.

5. Students must complete nine units of elective courses by the end of the PY3 year.

6. Withdrawing from individual required courses (as a full-time student) is not permitted and will result in an automatic withdrawal from all enrolled courses for that term. Withdrawing from an entire block of courses requires administrative approval and requires the student to return and retake the entire block the next academic year.

7. Withdrawing from elective courses incurs no penalty as it pertains to the progression policy.

Progression/remediation policy for PY4

1. All APPE courses must be passed with a grade of "S" (satisfactory). Any student who receives a "U" (unsatisfactory) will have to repeat the APPE course.

2. Any student who fails one (1) APPE course during the PY4 year will be allowed to participate in the commencement ceremonies only if he or she does not have more than nine (9) credit hours of failed or withdrawn (see section "e") required courses since the start of the program. However, the student's degree will not be awarded until he or she successfully passes the previously failed rotation when it is offered in the following academic year.

3. Students failing two APPE courses will be dismissed from the program because they will have failed more than nine (9) credit hours of required courses.

Good academic standing
To remain in good academic standing, Pharmacy students must maintain a minimum cumulative grade point average of 2.0.

Academic monitoring
Each student's academic status will be reviewed by the Academic Standing Committee at the end of each academic term including each student's cumulative G.P.A. as reported by University Records. Each student being monitored by the Academic Standing Committee must follow the protocol from the Office of Academic Affairs and the Office of Student Affairs.

Academic dismissal
The progression policy addresses most elements of academic dismissal. The following two paragraphs address additional elements relating to academic dismissal. Required courses may not be attempted more than twice (i.e., a course may be repeated only once). Grades of D, F, and U are considered to be attempts to complete degree program courses. Failure to complete any course in the program within these limits will result in dismissal from the program. A dismissed student will receive written notification from the Academic Dean for academic affairs in person. The notice will include procedures for appeal. Dismissed students are required to turn in any LLU identification badges and will have their electronic and parking privileges revoked. The school will also notify the California Board of Pharmacy for termination of the student's intern pharmacist license.

Admission of dismissed students
A dismissed student may appeal his/her dismissal from the program directly with the Office of the Dean within five business days.

Withdrawal from the program
If, after having been registered, a student finds it necessary to withdraw during the course of a term, the Academic Dean of student affairs and admissions must be notified in writing. Arrangements for formal withdrawal must then be made by electronic submission. An exit interview with a member of the School of Pharmacy administration is required.

Graduation
A candidate for the degree of Doctor of Pharmacy at Loma Linda University shall meet all of the following requirements:
1. Satisfactory completion of all requirements for admission.
2. Satisfactory completion of all requirements of the curriculum, including:
   a. specified attendance in Chapel
   b. total number of credit units
   c. all specified didactic and experiential course work
   d. passing applicable qualifying and comprehensive assessment examinations
3. A cumulative grade point average of 2.0 or higher for the total degree program requirements.
4. Evidence of moral character, with due regard for Christian citizenship, and consistent responsiveness to the established aims of the University and of the school.
5. Evidence of good professional behavior through organizational activities, outreach involvement, and personal conduct.
6. Completion of an exit interview with School of Pharmacy administration.

A student failing to meet any of these requirements may not graduate until such time as all requirements are met.

Students may not participate in commencement exercises until all course work has been satisfactorily completed. Students with a maximum of one APPE to complete after the commencement date will be allowed to participate. Receipt of degree and certification of completion will occur only when all course work is done and degree requirements are met.

ACPE complaint policy
The accreditation standards and guidelines for the professional program in pharmacy leading to the Doctor of Pharmacy Degree states in Standard No. 20: Student Complaints Policy that “the college or school must produce and make available to students a complaints policy that includes procedures to be followed in the event of a written complaint related to one of the accreditation standards, students rights to due process, and appeal mechanisms. Students must receive information on how they can submit a complaint to the ACPE for unresolved issues on a complaint related to the accreditation standards.”

The ACPE complaints policy with instructions on how to file a complaint can be found at <http://www.acpe-accredit.org/complaints/default.asp>.

Experiential education
While enrolled in the Doctor of Pharmacy program, students are required to complete a supervised series of practice-based courses to prepare them for licensure as pharmacists. To qualify for licensure as a pharmacist, students must graduate from the School of Pharmacy with a Doctor of Pharmacy degree, complete required internship hours, and achieve passing scores on the North American Pharmacist Licensure Examination (NAPLEX) and the law examination for the state where they plan to practice.

The experiential program consists of both introductory (IPPE) and advanced (APPE) pharmacy practice experiences designed to meet the required structured, supervised, professional experience for a Doctor of Pharmacy degree. Students and their supervising preceptors are guided by the Loma Linda University School of Pharmacy Experiential Program Manual, which contains guidelines and policies for successful completion of the program.

The School of Pharmacy requires participation in introductory pharmacy practice experiences (IPPE) each year during PY1 through PY3 to enhance practice skills and prepare students to function as members of a health-care team. Advanced pharmacy practice experiences (APPE) comprise the entire PY4 curriculum and are designed to help students integrate and refine skills learned in the first three years of pharmacy (didactic and experiential) course work.

The purpose of the experiential education program is to apply knowledge from classroom and laboratory courses to patient care (pharmacy practice). The ultimate goal of the experiential program is to produce well-rounded, competent, caring, and responsible pharmacists who can deliver exemplary pharmaceutical care, as well as communicate effectively with diverse patients and other health-care professionals.

Experiential education requirements
During experiential courses, students are assigned to both hospital-based and community-based pharmacy practice settings under the direct supervision of a School of Pharmacy preceptor. Participation in the IPPE/APPE courses requires a valid California intern pharmacist license issued by the California Board of Pharmacy. Students completing IPPE/APPE experiences at sites outside of California must be licensed in the applicable state. When a student is participating in an IPPE or APPE rotation, Loma Linda University’s code of conduct and the guidelines found in the School of Pharmacy Student Policies and Procedures Manual are in effect throughout the completion of this experience. If experiential site regulations and policies differ from University policies, the site policies supersede. In addition to the above-mentioned guidelines, the following regulations are to be followed by all professional pharmacy students assigned to experiential sites or rotations.

- Attendance is mandatory. Punctuality is expected, and tardiness will not be tolerated.
- Students must maintain their University e-mail accounts and check them at least daily to keep apprised of important information or announcements.
- All experiential educational assignments are made through the Department of Experiential and Continuing Education and are the responsibility of the chair of the Department of Experiential and Continuing Education.
- Students are not to function as agents or employees of the site. They must identify themselves as pharmacy students from Loma Linda University School of Pharmacy. While participating in this graded experience, students shall not, under any circumstances, receive financial remuneration from the experiential site. Failure to adhere to this policy will result in suspension and removal from the rotation and receipt of a failing grade in the course.

The student is responsible for all financial obligations associated with his/her pharmacy education. He/She is also responsible for fulfilling all site requirements prior to each rotation within the time frame requested. These responsibilities include transportation, food, lodging, and any other incidental costs related to practice assignments. Concurrent employment during the experiential experience does not exclude or excuse students from any responsibilities associated with course requirements. The student must possess a valid driver’s license and is responsible for transportation to and from sites. IPPE rotations can be up to 70 miles from campus.

Loma Linda University School of Pharmacy students are required to dress and act professionally at all times. This expectation extends to experiential educational activities where the student is not on the
campus but receives instruction and guidance through a School of Pharmacy preceptor.

The Department of Experiential and Continuing Education requires all students to adhere to the School of Pharmacy dress code and to wear their Loma Linda University identification cards and short white laboratory coats at all times while at the experiential site. The laboratory coat must be white, clean, and freshly pressed. Students who attend out of dress code will be considered absent by the preceptor and sent home to fulfill dress code requirements prior to returning to the practice site.

In addition to the general school requirements, other rules may apply for students who are off site. If the experiential site implements special attire or dress code requirements, the more stringent of the dress code requirements prevails, whether that of Loma Linda University or of the off-site institution.

Pharmacy practice experience

The chair of the Department of Experiential and Continuing Education coordinates both introductory pharmacy practice experience (IPPE) and advanced pharmacy practice experience (APPE). Participation in the practice-based experiences requires:

- Immunizations: Students must safeguard themselves and be sure that all University-required immunizations are up to date. Students are responsible for keeping the records of their own immunizations accessible. For the protection of patients and the students themselves, it is highly recommended that students receive the influenza vaccine in September during their PY4 year. Some sites may require this immunization.

- HIPAA certificate: All students are required to complete HIPAA training and obtain a certificate of completion annually.

- Bloodborne pathogen training: All students are required to complete training and obtain a certificate of completion annually.

- Medicare fraud and abuse training: Students must complete training and obtain a certificate of training annually.

- Tuberculosis screening: Students must be screened and cleared for tuberculosis annually during their enrollment (complete a one- or two-step PPD test, depending on the practice site requirement). A chest X-ray may also be required when medically indicated. Students shall follow specific instructions provided by the Department of Experiential and Continuing Education. A record of tuberculosis screening clearance must be on file with student health.

- Background check: Loma Linda University School of Pharmacy and practice facilities require background checks of all personnel, including students who are placed on site for experiential education. Some institutions may require the student to sign a confidentiality agreement or disclosure statement. Annual review and update is required during the program.

- Random drug screening: Random drug screening may be required for some practice settings. This screening may be above and beyond school-mandated screening.

- Intern license: Students must hold valid, nonprobationary California pharmacist intern licenses throughout the advanced pharmacy practice experiences.

- CPR/First aid: Students must hold valid CPR and first aid certificates. Effective dates must be current through the completion of PY4.

- Student health card: Students must carry the Loma Linda University student health insurance card with them at all times.

Requirements for participation in the IPPE/APPE program are subject to modification based on the requirements for licensure and the requirements for placement in the participating practice settings.

Introductory pharmacy practice experience (IPPE)

The goals of the introductory pharmacy practice experience are to sharpen students’ clinical skills through direct patient-care activities in community, institutional, and ambulatory care settings; to introduce the student to different career opportunities in pharmacy; and to assist them in determining their career choices. Under the supervision of a School of Pharmacy preceptor, who is also a licensed pharmacist, the student will be provided opportunities to apply didactic knowledge to patient care in community, institutional, and ambulatory care settings early in the program. These experiences enhance communication, problem-solving, critical-thinking, and decision-making skills through direct patient-care activities.

Advanced pharmacy practice experience (APPE)

Students are required to complete a total of six advanced pharmacy practice experiences in specific clinical areas. Four experiences (each lasting six weeks) will be in required fields of hospital practice, ambulatory care, internal medicine, and clinical community practice. Two experiences will be in elective fields. All APPE must be completed under the supervision of a School of Pharmacy preceptor who is also a licensed pharmacist. In order to progress to the advanced pharmacy practice experiences, a student must achieve PY4 standing as defined by the School of Pharmacy.

Licensing

Pharmacy intern license

All School of Pharmacy students must have a current nonprobationary California intern pharmacist licenses. Students will be guided through the licensure application process during the first-year orientation. The intern licensure is required for the introductory pharmacy practice experiences (IPPE) and advanced pharmacy practice experiences (APPE). Information about the pharmacy intern license can be found online at <http://www.pharmacy.ca.gov/forms/intern_app_pkt.pdf>.

It is the student's responsibility to keep his/her pharmacy intern license current and valid. The Board of Pharmacy must be notified of address, enrollment status, or name changes within thirty days of the change. A photocopy of the student’s valid pharmacy intern license must be on file in the school’s Department of Experiential and Continuing Education.

Pharmacy intern hours

In order to be licensed as a pharmacist in California, the California State Board of Pharmacy requires each applicant to have completed a minimum of 1,500 hours of supervised pharmacy practice experience. As of January 1, 2016, an applicant for the pharmacist examination who has graduated on or after January 1, 2016, from an ACPE-accredited college of pharmacy or school of pharmacy recognized by the board shall be deemed to have satisfied those pharmacy practice experience requirements.
Financial information

The Office of the Dean is the final authority on all financial matters and is charged with the interpretation of all financial policies. Any exceptions to published policy in regard to reduction or reimbursement of tuition must be approved by the dean. Any statement by individual faculty members, program directors, or department chairs in regard to these matters is not binding on the school or the University unless approved by the dean.

Registration is not complete until tuition and fees on the required installment are paid; therefore, the student should be prepared to make these payments during scheduled registration for each academic year. There may be adjustments in tuition and fees as economic conditions warrant.

General financial practices

The student is expected to arrange for financial resources to cover all expenses before the beginning of each school year. Previous accounts with other schools or with this University must have been settled.

Deposits

Upon notification of acceptance, the applicant must deposit $500 to hold a place in the class. This amount is deducted from the tuition and fees due at registration and is nonrefundable should an applicant decide not to register.

International student deposit

Students who are not U.S. citizens or permanent residents entering Loma Linda University School of Pharmacy must deposit funds in the amount of the first full year of tuition. This deposit will be applied to the student’s account for education costs during his/her last term of enrollment. An international student’s deposit will be refunded if a student visa is not obtained.

Schedule of charges

The following charges are subject to change without notice.

Tuition

$45,000  Annual block tuition

Fees

$3,292  University enrollment fee (health-care insurance, Drayson Center membership, student activities, and publications)

Miscellaneous

$75  Application fee

$500  Acceptance deposit; nonrefundable, applicable to tuition

$1,500  Estimated books and supplies

$25  Returned check processing fee

$100-200  Late fee

Other charges

$90  California Board of Pharmacy internship license (application, examination, interim practice permit); plus Live Scan fingerprinting fee (cost varies).

On- and off-campus student housing

Students may go to <llu.edu/central/housing> for housing information and a housing application form.

Additional requirements

For additional policies governing Loma Linda University students, see Section II of this CATALOG, as well as the University Student Handbook. Students are responsible for informing themselves of and satisfactorily meeting all regulations pertinent to registration, matriculation, and graduation.

Pharmacy – Pharm.D.

The curriculum at Loma Linda University School of Pharmacy is intensive and dynamic to that ensure students are prepared for life-long learning and prepared to serve as the health-care system’s medication expert. The school reserves the right to make changes to the curriculum upon recommendation of the curriculum committee and adoption by the faculty. Students will be notified of any necessary changes.

Admissions

General entrance information

Applicants to the School of Pharmacy must fulfill the prerequisite course requirements listed below. For a course to fulfill the biology, chemistry, organic chemistry, and physics prerequisites, it must be taken at the level of those required for a science major in the field. Introductory courses are not acceptable. Courses accepted to fulfill the prerequisites for biochemistry may be taken at any level as long as the unit requirements are fulfilled. The minimum cumulative G.P.A. and cumulative mathematics/science G.P.A. considered for acceptance to the School of Pharmacy is 2.75 on a 4.00 scale.

Required courses (semester/quarter units)

- General biology, with laboratory* (8/12)
- General chemistry, with laboratory* (8/12)
- Organic chemistry, with laboratory* (8/12)
- General physics (one quarter or/semester), lecture and laboratory (4/4) Must include mechanics or Newtonian physics. Survey course is acceptable.
- General biochemistry (3/4) (or molecular biology or cell biology)

Decisions regarding the final determination of acceptable courses as prerequisites reside with the School of Pharmacy Admissions Committee in collaboration with the Office of University Records.

* A full sequence of course work is required for general biology, general chemistry and organic chemistry. The semester and quarter units listed in the table above are a general guideline for the minimum number of units that must be completed to fulfill the prerequisite requirements. These minimum units may not be the same in all universities/colleges.

In rare circumstances, an applicant who has not completed a bachelor’s degree may be considered for admission into the School of Pharmacy. An applicant without a bachelor’s degree must complete an additional 12 semester or 16 quarter units of coursework in Social and Behavioral sciences, an additional 12 semester or 16 quarter units of coursework in humanities and fine arts, and an additional six semester or nine quarter units of English composition.

Recommended courses

- Cellular and molecular biology
- Genomics
- Histology
Human Genetics
Immunology
Microbiology
Physiology

**Recommended experience**
It is highly recommended that applicants obtain volunteer or pharmacy work experience.

**Application and acceptance requirements**

**Application process**
The School of Pharmacy only accepts online applications through the central application service PharmCAS. The link to PharmCAS and other required forms are available online at <llu.edu/central/apply>.

**Procedure**
The application procedure is as follows:

- Online submission of Doctor of Pharmacy application through PharmCAS.
- When the PharmCAS application is received, Loma Linda University School of Pharmacy will request completion of an LLU secondary application.
- Three online letters of recommendation from previous instructors, employers (pharmacist employer, if possible), and a spiritual advisor (required). Letters of recommendation are now accepted only through the online application. Instructions for online letters are given once an application has been started. Committee letters are accepted from Seventh-day Adventist colleges/universities only and will fulfill the requirement for recommendation letters.
- Written personal statement (answer all questions in two pages or less).
- Projected College Work form (if applicable).
- Completed Academic Prerequisite Record form (available after the LLU secondary application is submitted).
- Payment of the $75 application fee by check or credit card, submitted with the online LLU secondary application.
- After the secondary application and letters of reference have been submitted and reviewed, the applicant may be invited for an interview. All application documents are evaluated by the School of Pharmacy Admissions Committee to determine if the applicant is accepted, placed on an alternate list, or denied. All applicants are notified of the final committee decision. Admission into the School of Pharmacy continues until the class is filled.

**Acceptance process**
The accepted applicant is sent an e-mail acceptance letter that includes a link to the online confirmation process and deadline. At this link, the accepted applicant can confirm and pay the $500 class-holding fee electronically. The class-holding fee can also be paid by check for an additional processing fee of $25. The class-holding fee is applied to the student’s financial account at the time of matriculation. Class-holding fees are nonrefundable. A follow-up acceptance letter is also mailed to the applicant’s home address.

**International applicants**
International applicants must have their transcripts reviewed by one of the following evaluation services prior to applying:

- Educational Credential Evaluators, Inc. (ECE) <http://www.ece.org/>
- World Education Services (WES) <http://www.wes.org/>

If the applicant’s native language is not English, or if most education was completed in a non-English program, a score of at least 79 (Internet based) on the Test of English as a Foreign Language (TOEFL) is required. Some consideration is given to applicants who have earned a college degree in an English-speaking country. Please visit <http://www.ets.org/toefl> for more information.

**Rolling admission**
The School of Pharmacy has a rolling admission policy in which completed applications are reviewed and students are accepted on a continual basis within the period from the time PharmCAS begins verifying applications for our program (typically September) through the end of March.

**Admission deadline**
The School of Pharmacy accepts applications through PharmCAS as soon as the PharmCAS application portal goes live (typically in July) through March (dates may vary; late applications are accepted by contacting the admissions office directly) for entry in September of the following year.

Transcripts, evaluation of international transcripts (if applicable), and TOEFL scores (if applicable) should be mailed to the following address:

Normal time to complete the program
Four (4) years (12 academic quarters) — full-time enrollment required

1 To be completed by the end of the third year (no more than 4 units of independent study can be applied to this requirement). Choose from the electives listed below. Elective courses are subject to change.
In 1967, the Loma Linda University School of Public Health became the 13th accredited school of public health in the United States. From our inception, we understood the importance of teaching relevant public health, from a faith-based perspective.

Whether online or on campus, our students reflect the culture and values of our school. Every quarter, when students share their practicum experiences during their poster presentations, I marvel at and appreciate the diversity of our students. A wealth of perspectives leading to relevant and innovative ideas, which students continue to display through their work in and out of the classroom.

I want to personally welcome and thank you for choosing to be a part of our legacy. We are proud of our more than 50 years of research and practice aimed at a vision of healthy people living in resilient communities, supported by equitable systems of health. Now, we stay true to our legacy through our mission of creating learning experiences for each generation.

I want you to know that we are listening to what you have to say. We want to hear your experiences in the classroom, on campus, in your practicums and beyond. Our success is measured by the opportunities you have to succeed as a student and later, as a professional. All of you are on your way to becoming our alumni. Just as we are proud of you, we want you to be proud of us, your future alma mater.

As you browse through these pages, I encourage you to take advantage of the many ways you can reach your professional goals—mainly, a degree in public health that will enable you to serve individuals, communities and systems of health in an increasingly global and connected community.

I would like to leave you with one final thought.

My mission in public health is underlined by a personal purpose. At this school of public health, a belief in a power greater than ourselves is what drives us. The actions of Jesus Christ inspire us and that inspiration informs our work. It is the reason we choose to teach, research, practice, study, and play at Loma Linda University School of Public Health. We believe that everyone has value and that value is connected to a greater purpose. During your time as a student, along with all the other exciting opportunities you’ll experience, I encourage you to focus on your spiritual journey.

Welcome to the Loma Linda University School of Public Health.

Helen Hopp Marshak, Ph.D.
Dean, School of Public Health

Mission, vision, values, and goals

Mission
We create learning experiences for each generation. We translate scientific discovery into action, improve health, spread hope and promote wholeness from our neighborhood to yours.

Vision
Healthy people living in resilient communities supported by equitable systems of health.

Values
Accountability—Our actions match our words. We take ownership of our roles within the school. Our customers are best served when each of us works in a timely and responsive manner. We accept responsibility for our actions with transparency and respect for others. Always striving for the best outcomes, we are proactive and committed to working together for the common good. As stewards of our resources, accountability is fundamental to fulfilling our mission and living our core values every day.

Relevance—We are listening. Our students merit the most advanced teaching methods. Our communities deserve practical health solutions backed by research. For this reason, we are always asking, “Do we matter?” We know the answer to why we matter when we meet our customer’s needs.

Diversity—Eyes at every angle piece together a complete picture. Diversity is not only about equality. It’s about perspective—one that is intentional. We respect our differences and value openness. It’s our belief that a wealth of perspectives leads to relevant and innovative ideas. Beyond informing thought, a culture of openness and respect embodies the spirit of our work in public health. Our geographic location allows us to capitalize on a wealth of viewpoints. We attribute our success to a wealth of experiences.

Innovation—We kindle an informed sense of wonder. We flourish under a mentality of continuous creativity and exploration of thought. We insist
that in order to make public health a success, we must work across disciplines. Responsible innovation requires flexibility and evaluation. It ensures growth and determines the impact of new ideas. We are willing to take calculated risks and continue moving our best ideas forward. At every level of our operation we are looking to make improvements; from improving how our students register for classes to defining new areas of study. Indeed, our innovation is one way we remain relevant.

**Wholeness—We strive for progress over perfection.** Wholeness is a perspective of the world that recognizes all facets of what it means to be human. It encompasses the integration of our spiritual, physical, intellectual components; our families, work, play. Despite its many facets, we continually consider our potential in relation to our reality. This translates into how we live each day; with humility, gratitude, and compassion. It keeps us grounded in what matters most.

**Faith-Inspired—Belief in a power greater than ourselves is what drives us.** As a school of public health founded in Christianity, the actions of Jesus Christ inspire us. Our faith informs our work. It’s the reason we’re at Loma Linda. We believe that everyone has value and that value is connected to a greater purpose. Wholeness is underlined by the relationship between health and faith. Behind our professional mission, we each have a personal purpose.

**Goals**
1. Constantly improve the quality of instruction in support of exceptional educational value.
2. Develop reciprocal and sustainable community-academic partnerships that lead to research, practice, and teaching that are responsive to societal needs.
3. Enhance the school’s visibility in support of efforts to maximize enrollment.
4. Enhance the school’s visibility in public health issues.
5. Enhance the school’s operating resources through increased external (nontuition) sources.
6. Strengthen infrastructure supporting excellence in grant writing.
7. Recruit and retain a student body that reflects the diversity of the population served.

**Educational goals**
Loma Linda University School of Public Health, a Seventh-day Adventist Christian institution, seeks to further the healing and teaching ministry of Jesus Christ “to make man whole” by:

- Educating ethical and proficient scholars through instruction, example, and the pursuit of truth.
- Expanding and providing advanced knowledge through research in various fields related to human health and disease.
- Providing advanced skills and competencies for professionals who plan to pursue a practice or research career.

**School foundations**

**History**
The school’s foundation was laid in 1948 with the organization of the School of Tropical and Preventive Medicine, the purpose of which was to provide a base for research and teaching. In 1964, plans were laid for faculty and facilities to meet the requirements of the Committee on Professional Education of the American Public Health Association (APHA). Three years later, the School of Nutrition and Dietetics (established in 1922) and the Division of Public Health and Tropical Medicine were accredited by APHA and organized under the name Loma Linda University School of Public Health. This name was changed to School of Health in October 1970 to reflect more clearly the school’s emphasis on lifestyle. In response to changing societal perceptions and definitions of “public health,” the original name, School of Public Health, was readopted in August 1987. The Center for Health Promotion, the Department of Preventive Medicine, and the Preventive Medicine Group were merged into the School of Public Health in 1990. The expanded resources realized by this merger stimulated further growth and development of the school to provide a dynamic learning and research environment for its students and faculty.

The school has maintained continuous accreditation since it was accredited at its inception in 1967 by the American Public Health Association. It is currently accredited by the Council on Education for Public Health (CEPH): 1010 Wayne Avenue, Suite 220, Silver Spring, MD 20910; and is also a member of the Association of Schools and Programs of Public Health (ASPPH). CEPH may be contacted at 202/789-1050.

**Master’s degree programs**
Master of Public Health (M.P.H.), Master of Health-Care Administration (M.H.A.), and Master of Science (M.S.) degree programs are designed for those with appropriate backgrounds who are seeking to acquire graduate-level competencies in public health, health-care administration, and nutrition.

**Online programs**
The School of Public Health offers master’s degree programs in an online format in two majors to meet the needs of qualified individuals who seek to develop graduate-level competencies in public health but who for a variety of reasons choose not to be full-time, on-campus students.

The School of Public Health has considerable experience offering distance learning programs at the master’s degree level. For more than thirty years, the School of Public Health has adapted its program delivery style to meet the needs of busy professionals. Currently the school offers an online postbaccalaureate certificate in health geoinformatics, and an online M.P.H. degree in two areas: population medicine and health education and wellness coaching. The Dr.P.H. degree in health education is also offered in a technology-mediated format. These programs cater to students in the U.S. and internationally.

**General degree requirements**
All applicants to the online programs must meet the general admissions requirements found in Section II of this CATALOG.

**Online program financial information**

**Financial policies**
Tuition for the online M.P.H. degree programs courses is the same as the on-campus tuition rate. Tuition must be paid in full at the time of registration.

**Financial clearance**
The student is expected to maintain a clear financial status at all times. Financial clearance must be obtained:

- before registering for any class;
- before receiving a diploma; or
School of Public Health

Before requesting a transcript, statement of completion, or other certification to be issued to any person, organization, or professional board.

**Loans**

Inquiry about loans should be directed to the University Office of Financial Aid. Only students who are accepted into a degree program or federal financial aid-approved certificate program are eligible to apply. For loan purposes, online students registered for 4 units per quarter are considered to be enrolled half time.

**Checks**

Checks should be made payable to Loma Linda University and should show the student’s name and social security or LLU ID student number to ensure that the correct account is credited.

**Online Master of Public Health**

The Online Master of Public Health Program is offered with majors in population medicine and in health education and wellness coaching. Each is a three-year, online program with online orientation, community, and courses. Students begin their program in any of the four quarters of the academic year.

The program includes an applied practice and integrative learning experiences.

**Course load**

A full-time graduate course load consists of eight units, and a half-time graduate course load is 4 units. Students in the distance learning program who need to qualify for financial aid must take a minimum of four units per quarter to establish and maintain eligibility.

**Proctors**

Some courses require a proctored examination. Each student is required to have on file a signed proctor contract with the name of a person who will serve as his/her permanent proctor. A proctored examination is automatically sent to this person. The proctor may not be a relative or someone living in the same house as the student. The registrar of a local college or university or a librarian is considered an appropriate proctor.

**Residence requirement**

There is no residence requirement for the online M.P.H. degree program. Students complete this program online.

**Additional requirements**

For additional policies governing Loma Linda University students, see Section II of this CATALOG, as well as the University Student Handbook. Students are responsible for informing themselves of and satisfactorily meeting all regulations pertinent to registration, matriculation, and graduation.

Centers

Center for Health Strategy and Innovation
Executive Director, Karl J. McCleary

Public health has gone through several eras where the focus of attention or paradigm has guided the actions of the field. At present, the concept of population health has emerged as a broader, more encompassing concept of public health that incorporates a range of factors that interact and affect the health of individuals, communities, and the population as a
whole. Unfortunately, these health outcomes frequently reflect inequities across the population. The Center for Health Strategy and Innovation seeks to identify and deploy successful strategies—evidence-based interventions, once adopted and implemented in practice and policy, help achieve desired improvements in population health. We accomplish this vital work through scholarship in dissemination and implementation science, which primarily focuses on organizations, communities, and systems.

Center for Teaching and Learning
Executive Director, Donna Gurule

The Center for Teaching and Learning houses the degree programs for the School of Public Health. It has the responsibilities of identifying ways to transform public health education, reporting assessment results for student learning outcomes, engaging and training faculty in pedagogy, course design, and faculty delivery, and providing excellent learning opportunities for our students utilizing technology and innovation. These are accomplished through scholarship in teaching and learning.

Center for Nutrition, Healthy Lifestyle, and Disease Prevention
Executive Director, Joan Sabaté

Cardiovascular disease, diabetes, chronic respiratory disease, and cancers account for 60% of all deaths worldwide, with an estimated 80% of these deaths occurring in low and middle income countries. These conditions are largely preventable through the adoption of healthy diets, physical activity, and avoidance of smoking. The center focuses on elucidating key dietary and other behavioral factors for the prevention of chronic diseases. Also, the center is compelled to focus effort on effective health education programs to improve diet quality and recover a healthy lifestyle in the US and globally.

Researchers at the center are leaders in the study of the health effects of plant foods, and the home of the world-renowned Adventist Health Study, providing the global community with strong evidence for healthy outcomes, and the prevention of chronic diseases when adopting a plant-based diet. Building on the Adventist Health Study’s unique 50 plus years of research in lifestyle and plant-based diets, the center pioneers new knowledge and aims to develop innovative, interdisciplinary, translational, and intervention research directed at reducing the risk, morbidity and mortality of unhealthy diets, sedentarism, and tobacco use related chronic diseases in the US and globally.

Admissions
Applicants must meet Loma Linda University (p. 24) and school-specific admissions requirements. The school’s admissions office and program director ensure that applicants are qualified for the proposed curriculum and are capable of profiting from the educational experience offered by this University. This is accomplished by examining evidence of scholastic competence, moral and ethical standards, and significant character and personality qualities. Applicants are considered for admission only upon recommendation of the program in which study is desired. Those who meet the requirements as well as published deadlines may enroll.

In selecting students, the admissions office and program director look for evidence of self-discipline, personal integrity, and intellectual rigor. They also look for evidence that applicants possess the capabilities required to complete the full curriculum in the allotted time and to achieve the levels of competence required.

Where to write
Correspondence about admissions to all programs and requests for application information should be addressed to the Office of Admissions, School of Public Health, Loma Linda, CA 92350; or via e-mail to <admissions.sph@llu.edu>.

Application review process
All completed applications are first reviewed by the admissions office. A recommendation on each application is then submitted to the appropriate program director, who makes the final decision regarding acceptance.

Procedure
The procedure for application and acceptance is given below.

1. Application. Submit a complete application and accompanying documents to SOPHAS (<www.sophas.org (http://www.sophas.org)>).
2. Transcripts. Official transcripts from all postsecondary institutions attended must be sent to SOPHAS. If accepted, official transcripts will then need to be sent to Loma Linda University, Admissions Processing, 11139 Anderson Street, Loma Linda, CA 92350.
3. International evaluations. All international (non-U.S.) transcripts must be submitted to one of the LLU-approved evaluation services. See <llu.edu/central/apply/intltrans.page> for a list of the approved companies. Copies of transcripts forwarded from evaluation services do not meet the requirement of official transcripts. They must be sent directly to LLU from the issuing institution. SOPHAS will only accept international transcripts submitted through World Education Services (<www.wes.org (http://www.wes.org)>). Please note: Transcript copies included only in official WES evaluation reports will also satisfy the requirement for official transcripts.
4. References. The applicant is asked to supply a minimum of three personal references. It is recommended that these include an academic reference, a reference from an employer, and a character or religious reference.
5. Pre-entrance examination. All official pre-entrance test scores (e.g., TOEFL [international applicants only], GRE or equivalent [e.g., MCAT]) as required by each program must be sent directly to SOPHAS by the testing organization.
6. Interview. The applicant’s records will be screened when the supplementary application is submitted and the file is complete. The file will then be forwarded for program review; and, if necessary, the applicant may be invited for a personal interview.
7. Acceptance. The accepted student receives an acceptance letter and a link that will prompt payment of the class-holding fee and confirmation of acceptance. Official transcripts will need to be submitted to Admissions Processing prior to registration for first term.
8. Pre-entrance health requirements/Immunizations. New students are required to have certain immunizations and tests before registration. In order to avoid having a hold placed on registration, the student is encouraged to provide documentation to the Student Health Service prior to the start of regular registration. For further information, contact the Student Health Service office at 909/558-8770.
9. Financial aid. Application for financial aid should be submitted early, even before the student is admitted into the program. For further information, visit <http://www.llu.edu/students/financial-aid/>.
10. Financial requirement. Non-U.S. citizens are required by U.S. immigration regulation to secure sufficient funds and pay for their first year tuition and fees before they can register. In addition, they...
must provide documentary evidence of sufficient funds for their second year. International students will receive the necessary visa applications and registration clearance after they have submitted their deposits and payment plans.

**Admissions decisions**
The Admissions Office and program director considers the following qualifications in making admission decisions:

Personal statement, letters of recommendation, overall G.P.A., GRE examination scores or equivalent, professional potential, and personal interview. Admission decisions are in one of two categories: regular admission or denial of admission.

**Admissions requirements**
Specific requirements—which vary from program to program—should be determined based on the student's area of interest. Requirements for admission into degree programs are specified in the next section.

**Prerequisite courses**
A grade of B or higher is required for all prerequisite courses. Prerequisites must be completed prior to acceptance.

**Entrance tests**
Scores from the Graduate Record Examination (GRE) or equivalent are required with the application. Application forms for the GRE and information regarding examination times and places are furnished by the Educational Testing Service, GRE-ETS, P.O. Box 6000, Princeton, NJ 08541-6000, U.S.A.; and at <http://www.ets.org>. Applicants for the M.H.A. degree in health care administration are required to submit scores from the Graduate Management Admission Test (GMAT) or equivalent, such as the GRE. Application for the GMAT are available at <http://www.mba.com/us>.

**General regulations**
Students are responsible for informing themselves of and satisfactorily meeting all regulations pertinent to registration, matriculation, and graduation. Section III of this CATALOG provides the general setting for the programs of each school and outlines subject and unit requirements for admission to individual professional programs. It is important to review specific program requirements in the context of the general requirements applicable to all programs.

**University e-mail accounts**
The University accepts its moral, ethical, and legal responsibility for informing and reminding students of deadlines, regulations, and processes by issuing an e-mail account to every student and communicating with students by e-mail. It is the students' responsibility to read and respond to their e-mail messages from the University.

**Learning environment**
**Technology facilities**
Technology-mediated and fully online courses are part of the school's curricula. Students should be prepared to use e-mail, electronic library resources, online survey tools, course management tools, and other Internet communication tools while engaged in the School of Public Health learning environment. Through the online M.P.H., the technology-mediated Dr.P.H. degree programs, and the online post-baccalaureate certificate programs, the School of Public Health demonstrates its commitment to moving forward with a technology-supported and technology-facilitated learning environment.

Tutorials are available to assist members of this learning community in using the school's various tools.

**Campus facilities**
Facilities for the School of Public Health—offices, lecture and seminar rooms, teaching and research laboratories, work and storage areas—are located mainly in and adjacent to Francis Nichol Hall. Additional offices and research facilities are located in the Parkland Building and the Centennial Complex.

**Academic policies**
Students are responsible for informing themselves of and satisfactorily complying with the policies and meeting the regulations pertinent to registration, matriculation, and graduation.

**Advanced standing**
Graduate students with previous course work in areas of public health may apply for limited units of advanced standing. If approved by the program director and the assistant dean for admission and records of the school, degree requirements may be reduced. Courses taken during the past five years are considered in an evaluation of the student's qualification for advanced standing. Competency in courses taken more than five years previously may be considered if the content has been used professionally on a regular basis. No advanced standing is granted for life experience that is not in conjunction with previous course work.

**Religion course work requirement**
Registration and completion of graduate-level religion course work is mandatory for completion of degree requirements. The religion requirement is designed to provide a spiritual dimension to the professional training of public health students, opportunities to further develop their skills in dealing with life's challenges, and for personal spiritual growth. Transfer of course units from other universities and institutions is not allowed; nor is a waiver option available, regardless of educational background. Traditional letter grading is required.

Selection of religion courses to fulfill requirements for the various degrees should be made in consultation with the advisor, using the course schedule published online at <llu.edu/central/ssweb>. Master's degree students are required to complete a three-unit, 500-level religion course per degree sought; and doctoral students are required to complete three 500-level religion courses in each of the religion content areas: ethical, relational, and theological studies. Only courses with REL_ code prefixes may be used to satisfy the religion course requirement. The religion requirement may not be waived by registering for a religion course at a university other than Loma Linda University.

**Student classification**
Students enrolled in courses prior to receiving official acceptance into the School of Public Health are classified as "nondegree" students by the University. Students may retain this status only by permission of the assistant dean for academic support for a maximum of 12 units of credit before official acceptance into the school.

**Convocation attendance**
Attendance at weekly University and quarterly school convocations is required. Unexcused absences are reported to the dean. Persistent failure to attend may jeopardize a student's regular standing.
Course attendance

Only duly registered students may attend classes. Students are expected to attend all required contact elements in a course. Absences in excess of 15 percent may be sufficient cause for a failing or unsatisfactory grade to be recorded.

Adding an additional M.P.H. major

Students who wish to add another major to their M.P.H. programs must complete a written petition to revise or make a changes in their programs. This request will be reviewed by the relevant departmental committee for approval to add the major. After approval, the student must work with the assigned advisor in the secondary department to determine the course work and other requirements that must be fulfilled for the additional major. These requirements must be specified on the Degree Compliance Report for the student within one quarter of acceptance into the added major; otherwise the student will be administratively withdrawn from the added major. Because each combination of majors is unique, there is no guaranteed timeline for completion of the requirements for the additional major. Adding another major may also impact financial aid. Additional majors require a minimum of 18 specified units from the major core course work beyond those required for the primary major, with a grade point average of at least 3.0 for those added units. Coordination of the field practicum experience between the two majors is also required. All successfully completed majors will be listed on the student’s transcript.

Time limit

The time lapse from first enrollment in courses applied to a master’s degree curriculum to the conferring of the degree may not exceed three years. For a doctoral degree, the maximum time allowed for advancement to candidacy is three years, and five years for completion of the degree program. Students who show evidence of appropriate academic progress may be granted up to two, one-year extensions for master’s and two, one-year extensions for doctoral degrees. They may not exceed the University maximum allowable time for degree completion of five years for a master’s degree and seven years for a doctoral degree. These extensions are not automatic but must be initiated by student request and be approved by the program director and the assistant dean for academic support. Exceeding the time limit requirements may have financial aid implications.

Academic probation

Students who are not making satisfactory academic progress, as defined elsewhere in this Catalog, will be placed on academic probation. Students with two quarters of unsatisfactory performance jeopardize their standing in a degree or certificate program.

Residency requirements

Residency requirements may be met by a student taking, through the School of Public Health, the minimum number of units specified for the appropriate degree.

The minimum didactic unit residency requirement for a single M.P.H. degree is 56 units (including up to nine units of transfer credit) and for a single Dr.P.H. degree is 54 units (plus applied practice experience and integrated learning experience) and for a single Ph.D. degree is 47 units (plus research/dissertation units). Advanced standing can be considered for previous course work relative to these requirements, but does not alter the minimum unit requirements for the degree.

Graduation requirements

A candidate for a degree shall have met the following conditions:

- Completed all requirements for admission.
- Satisfactorily completed all requirements of the curriculum, including specified attendance; number of credit units; specific course and field instruction; applicable qualifying and comprehensive examinations and culminating activities; and have a cumulative grade point average of 3.0 for graduate students, computed separately for the total degree program and for courses in the major area.
- Completed a field practicum or internship (if required by the program).
- Completed the culminating experience.
- Completed an online exit survey (at the conclusion of the program).
- Submitted a graduation petition two-to-four quarters before graduation, as specified by the University.
- Given evidence of responsiveness to the established aims of the University and of the school.
- Discharged financial obligations to the University and completed the exit interview with the Office of Student Finance.

The candidate who has completed the requirements at the end of the Spring Quarter is encouraged to be present at the conferring of degrees. Students desiring to participate in commencement ceremonies must do so at the spring (June) exercise immediately following completion of their assigned curricula.

The University reserves the right to prohibit participation in commencement exercises by a candidate who has not satisfactorily complied with all requirements.

Grievance policy

Grievances related to sexual harassment, racial harassment, or discrimination against the disabled shall be pursued in accordance with University policies specifically relating to these items. Grievances related to academic matters or other issues covered by specific school policies shall be made pursuant to the policies of the school in which the student is enrolled. A student who questions whether the process provided by the school has followed its policy in regard to his/her grievance may request the Office of the Provost to conduct a review of the process used by the school in responding to his/her academic grievance. For more detailed information, please see the University Student Handbook for School of Public Health grievance policy and procedures.

Academic advisement

It is the responsibility of students to know and fulfill all academic and graduation requirements and to make every reasonable effort to obtain adequate academic advisement. Frequent advisor contact helps to ensure that students have current academic information and are making adequate progress toward educational goals.

Continuing education

The school offers non-degree short courses and workshops at various locations in the United States and overseas to meet the continuing education needs of School of Public Health alumni, other health professionals, and lay persons in the church and community. In addition, most degree courses are approved for continuing education credit.

Financial information

The Office of the Dean is the final authority in all financial matters and is charged with the interpretation of all financial policies. Any exceptions to
published policy in regard to reduction or reimbursement of tuition must be approved by the dean. Any statement by individual faculty members, program directors, or center directors in regard to these matters is not binding on the school or the University unless approved by the dean.

Registration is not complete until tuition and fees on the required installment are paid; therefore, the student should be prepared to make these payments during scheduled registration for each academic year. There may be adjustments in tuition and fees as economic conditions warrant.

The student is expected to arrange for financial resources to cover all expenses before the beginning of each school year. Previous accounts with other schools or with this University must be settled prior to registration.

Traineeships
United States Public Health Service traineeships provide grant money in support of public health training to citizens of the United States or to persons having in their possession a visa granting permanent residence in the United States. Allocation is made by the school to those who demonstrate financial need and who undertake specific programs of study. Further availability is contingent upon congressional funding. Applications are available from the School of Public Health Office of Financial Administration.

Assistantships
A limited number of teaching and research assistantships are available through the academic programs and individual researchers. It is understood that the student will perform such duties as may be required by the one to whom the student is responsible, but such duties are not to exceed the equivalent of half-time employment. Students will be considered after they demonstrate knowledge and proficiency in the area in which they would work.

Application for financial aid
Before a fellowship, traineeship, or assistantship is awarded, the student must have secured regular admission to the school. The student's academic record, financial need, and potential productivity are among the factors considered in the awarding of financial aid. Preference is given to complete applications received by March 2. Early application is advised.

Loans
Loan funds may be available to School of Public Health students who show need as determined by a federal formula. Loans are restricted to citizens of the United States and eligible noncitizens. Certain funds are interest free while a student is enrolled at least half time. Inquiries about loans should be made to the Office of Financial Aid.

Schedule of charges
Effective Summer Quarter 2019 (subject to change by trustee action):

<table>
<thead>
<tr>
<th>Tuition</th>
<th>Master's students per unit: credit (on campus and online) $895</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Master's students per unit: audit (on campus and online) $448</td>
</tr>
<tr>
<td></td>
<td>Doctoral students per unit: credit (on campus or online) $975</td>
</tr>
</tbody>
</table>

| Special tuition charges | Field practicum and internship (100 hours/2units) $895 |

| Enrollment fee | $885 |
| Special charges | Application (nonrefundable) $50 |
|                | Acceptance deposit for master’s degree students (nonrefundable) $100 |
|                | Acceptance deposit for doctoral degree students (nonrefundable) $250 |
|                | Late payment fee $100 |
|                | Returned check fee $25 |
|                | Late registration fee $200 |
|                | Examination, other than regularly scheduled $50 |
|                | Equivalency examination $50 |

| Miscellaneous expenses | Health-care items not covered by insurance cost |
|                       | Breakage, damage, loss of University equipment cost |

| International student deposit | Master's student $8,000 |
|                               | Doctoral student $8,000 |

Refund policy
Tuition refunds are calculated on a prorated basis for up to 60 percent of the quarter, with no refund after that point. This calculation is based on the day a withdrawal from a course or program is processed by University Records. Students who drop a course from a block program of courses receive no refund.

If a student drops a course after completing 10 percent of a course, the student will receive a 90 percent refund. Because refunds are based on a percentage of the course completed, the days on which these percentage refunds will change are determined by the length of the term in which the course is scheduled.

Awards and honors
Students demonstrating superior scholarship, professionalism, and promise of future contribution to the field of public health may be nominated for recognition. Faculty members and staff are also eligible for certain awards.

The BECKY BUSHMAN AWARD, established by Mary and Bliss Bushman, is given to individuals who best demonstrate healthy lifestyles, academic achievement, and contributions to society.

The CALLICOTT-REGISTER AWARD is given as a tuition assistance award to qualified nutrition students.

The PRESIDENT’S AWARD is given annually to a student who has demonstrated superior or excellent scholarship, actively participated in the affairs of the student and church communities, actively participated in general community service, and shown evidence of commitment to the highest ideals of the University.

The CHARLIE LIU AWARD is given by the student association to an outstanding student, faculty, or staff member who reflects the life of Christ through a caring spirit, a listening heart, and a commitment to peace.
The DEAN’S AWARD is given annually to a student who has demonstrated superior or excellent scholarship, actively participated in the affairs of the student and church communities, actively participated in general community service, and shown evidence of commitment to the highest ideals of the School of Public Health.

Nomination is made annually for membership in DELTA OMEGA, the national honor society for public health. Nominees must be from the top 25 percent of their class and demonstrate promise of significant contribution to the field of public health.

The GLEN BLIX AWARD is given annually to the graduating doctoral student in preventive care who best exemplifies excellence and leadership in preventive care.

The HALVERSON AWARD is presented to a graduating student who exemplifies excellence and promise of leadership in health administration.

The HULDA CROOKS AWARD is the Loma Linda University School of Public Health’s premier student award acknowledging whole person excellence. The purpose of this endowment is to provide Loma Linda University School of Public Health funds for student awards for excellence, student-initiated research, and public health practice grants. The grants are designed to encourage Loma Linda University School of Public Health students to become involved in the practical application of their educational experience through research and public health practice. To receive a grant, students are required to submit proposals that will be competitively judged by the Awards and Traineeship Committee. Grant application will be considered once each academic school year, with up to two awards given each year.

Each year the School of Public Health presents cash awards of $2000 to two students in honor of Hulda Crooks. In addition, there are $1000-$3000 research and public health practice grants available to currently registered School of Public Health students.

The JEANNIE WEISSMAN RESEARCH AWARD is granted annually during the Spring Quarter to a Doctor of Public Health degree student who has maintained a G.P.A. of 3.2 or above and who has demonstrated financial need.

The P. WILLIAM DYSINGER EXCELLENCE IN TEACHING AWARD is given annually by the student association to a faculty member who exemplifies excellence in teaching, Christian commitment, and support for cultural diversity.

The RUTH WHITE AWARD is given to an outstanding student at commencement each year who exemplifies a spirit of cooperation and leadership, helpfulness in scholastic efforts, and sensitivity to students from diverse cultures.

The SELMA ANDREWS SCHOLARSHIP provides funding for international health majors to attend Global Health Council.

The WILLARD AND IRENE HUMPAL AWARD recognizes students who have gone the extra mile to give service to their church, their school, and their community; who are enthusiastic learners; and who have demonstrated financial need.

Program and area-specific scholarships and awards may be viewed on the SPH Web site.

Certificates

The School of Public Health offers certificates in various programs to meet the needs of qualified individuals seeking to develop competencies in specialties in public health. Instruction for certificate programs is primarily provided by regular School of Public Health faculty members during regular quarter terms. Students are responsible for following required registration procedures during regularly scheduled time periods. A minimum of 12 units, plus one (1) unit of religion is required for a certificate. Units may not be shared with a concurrent degree program.
General certificate information

Course work
Course sessions are conducted during regular term sessions. Certificate courses offered are required School of Public Health courses that carry the same credit units as courses applicable toward degree programs. Certificate courses are taught on a quarter-term system, although selected courses may be offered by special arrangements.

Religion course requirement
Registration and completion of a one-unit, graduate-level religion course is mandatory for completion of each certificate program. Religion courses must have an REL_ prefix and be offered through Loma Linda University. The purpose of the religion requirement is to provide a spiritual dimension to the professional training of public health students, to provide students with an opportunity to further develop their skills in dealing with life’s challenges, and to provide opportunity for personal spiritual growth. Course units will not be transferred from other universities or institutions; nor is waiver of this requirement an option, regardless of educational background. Traditional letter grading is required.

General certificate requirements
All applicants to the certificate programs must meet the general admissions requirements found in Section II of this CATALOG. Course work is graduate level; therefore, students must demonstrate eligibility for application to a graduate-level program.

Course format
In general, courses are taught in the same format as regularly scheduled on-campus courses. However, in addition, Web-based courses and/or intensive format courses may be utilized. These courses are tailored to the adult learner, with clear application and examples from the public health professional world. These courses represent the same course requirements and credit units as those applicable to graduate degree programs.

Grade point average
A grade point average of 3.0 (B) must be maintained.

• Maternal and Child Health – Certificate (p. 375)

Health-Care Administration – Certificate

Program director
Huma Shah

Closed to admissions for the 2019-2020 academic year.

With the development of the Affordable Care Act and the ever-changing world of health care, there is more need for people at all levels of management to have a broad understanding of how health-care delivery functions. This certificate will add a breadth of knowledge and key skills to persons with an interest in health-care administration, giving them an edge to fill health-care leadership roles.

Learner outcomes

1. Demonstrate an understanding of the health-care system in the United States.

2. Apply management skills to health-care settings, ensuring quality and efficient operations utilizing various theories and models.

3. Assess health system gaps and develop effective solutions that provide a competitive advantage by critical analysis that considers organizational competencies, capabilities, and resources.

Admissions requirements

• Bachelor’s degree from an accredited school
• G.P.A. of 3.0

One (1) year based on less than half-time enrollment

Health Geoinformatics – Certificate

Program director
Seth Wiafe

The purpose of the health geoinformatics certificate is to prepare participants to apply geospatial information science and technologies to public health practice, research, and learning. These skills are highly desired today as an integral part of health informatics competencies that are needed by health professionals—according to the 2011 RAND Corporation report, “Mapping the Gaps.”

The Health Geoinformatics Program certificate is designed primarily for health professionals and students who have completed a bachelor’s degree (or equivalent) from an accredited college or university with a cumulative G.P.A. of at least 3.0. Qualified candidates must demonstrate computer proficiency, although no previous experience with geographic information systems (GIS) technology is required. Advanced placement can be considered for applicants with previous GIS experience/training. In addition, interested Loma Linda University students, staff, and faculty who would like to learn about GIS applications in health may also apply.

Program learning outcomes

Upon successful completion of this program, students will be able to:

1. Apply principles of geospatial information science to health research and practice.
2. Use state-of-the-art GIS software and techniques for accessing the spatially defined health information for building useful geodatabases.
3. Use effective geospatial data while producing and publishing customized maps and other visual displays of health data.
4. Employ GIS-based methods and techniques of spatial analysis that support health research and decision making in public health practice and policy.
5. Competently apply geospatial technology and methods in at least one key area of health geographics, such as disease mapping, tracking and assessment of environmental hazards exposure, health planning
Health Geoinformatics — Certificate

and policy, population health, health education and communication, and analysis of access to health services.

6. Implement and manage health GIS projects in government, nongovernment, and community settings.

_Indicators of educational effectiveness_

1. Class project (course specific, at the discretion of the instructor).
2. Oral presentation (course specific, at the discretion of the instructor).
3. Portfolio (course specific, at the discretion of the instructor).
4. Participation in a qualifying examination offered annually by SkillsUSA, an organization that has partnered with the geospatial industry to develop a competition program that provides universities, colleges, and their students a way of validating their geospatial programs and measuring them against national standards.

Note: Indicators 1, 2, and 3 are course-specific at the discretion of the instructor.

The program is open to health professionals, current Loma Linda University students enrolled in a master’s or doctoral degree program, Loma Linda University faculty and staff (tuition benefits may apply), and anyone interested in GIS applications in the health field.

_Admisions requirements_

• A bachelor’s degree (or equivalent), with a cumulative G.P.A. of at least 3.0

Maternal and Child Health — Certificate

Closed to admissions for the 2019-2020 academic year.

Program director

Patti Herring

The purpose of this certificate is to familiarize students with the complex issues associated with planning, implementing, and evaluating maternal and child health programs for men and women.

Learner outcomes

Upon completion of this certificate program, students will be able to:

- Describe key public health issues in the field of maternal and child health.
- Utilize principles of behavior change in the promotion of maternal and child health.
- Plan, implement, and evaluate public health programs addressing multifaceted, integrated programs in maternal and child health based on current operational models.
- Write competitive proposals for grants and contracts in the field of maternal and child health.

Indicators of educational effectiveness

1. Appropriate course assignments and projects.
2. At least a bachelor’s degree (or equivalent), with a cumulative G.P.A. of at least 3.0.
3. Completion of certificate requirements.

Admissions requirements

This certificate program, primarily designed for M.P.H. degree or doctoral degree students whose focus is not maternal and child health, is offered in conjunction with such programs. Health professionals who have completed a bachelor’s degree (or equivalent) from an accredited college or university with a cumulative G.P.A. of 3.0 or higher may also be admitted into the program. Students from other schools and departments are encouraged to add a certificate in maternal and child health to their existing programs.
M.H.A.

Master of Health-Care Administration
The program leading to the Master of Health-Care Administration (M.H.A.) degree is designed to develop the management and administrative skills of those involved in the public and private health-care industries.

The Master of Health-Care Administration (M.H.A.) degree provides a broad understanding of health-care management and hands-on experience in applying learned principles. The M.H.A. degree is designed for those whose professional objective is a career in health-care management. The residency period provides experience in a health-care organization. Graduates are prepared for careers at administrative levels in health-care organizations—including hospitals, public agencies, health-care networks, group practices, long-term care, and managed care.

M.P.H.

Master of Public Health
The program leading to the Master of Public Health (M.P.H.) degree is designed to provide broad preparation in the fundamentals of public health, while at the same time offering opportunity for some specialization in areas of interest.

The degree is offered with major concentrations in the areas of epidemiology, global health, health education and wellness coaching, nutrition, and population medicine. Second major concentrations can be added in addition to the primary major.

Public health core requirements
All M.P.H. students are expected to develop skills and knowledge foundational to public health. This is accomplished by completing the following integrated, interdisciplinary public health core courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PCOR 501</td>
<td>Public Health for Community Resilience</td>
<td>5</td>
</tr>
<tr>
<td>PCOR 502</td>
<td>Public Health for a Healthy Lifestyle</td>
<td>5</td>
</tr>
<tr>
<td>PCOR 503</td>
<td>Public Health and Health Systems</td>
<td>5</td>
</tr>
</tbody>
</table>

Students are expected to identify a specific area of concentration or major. They may opt to add additional course work leading to a second major or area of emphasis.

Applied practice experience
In accordance with Loma Linda University's mission—"To make man whole"—the School of Public Health provides students with rich experiences, as well as training opportunities that include all dimensions of public health: physical, mental, spiritual, intellectual, and environmental. Part of this training occurs during the applied practice (AP) experience—which may be completed as a field practicum, applied research, or course-based activities, depending on the major. The applied practice experience at the School of Public Health is an opportunity for students to apply the knowledge they learn in the classroom, enhance their understanding of public health, and contribute to the health of the community in which they are engaged. The experience allows students to demonstrate their ability to synthesize and integrate prior learning into real-life, public health settings.

Integrative learning experience
The Integrative Learning Experience (ILE) gives the students an opportunity to demonstrate proficiency in the professional competencies required of public health professionals. This degree requirement occurs at the end of the of the program and is designed to enhance the student's professional knowledge and skills by developing a professional product and demonstrating proficiency in the specific program competencies.

This process involves collaboration with and mentoring by the program faculty and the advisor. In consultation with the advisor and program faculty, the student selects the program learning outcomes for which they will be assessed to determine if they have met the degree requirements for synthesis and application of learning. This product may include a practice-based project, essay-based comprehensive exam, capstone course or another experience that culminates with a high-quality written deliverable for assessment purposes.

E-Portfolios
In addition to the AP Experience and ILE, some programs may require students to complete a professional portfolio.

Residencies for physicians
Residency training in the specialties of general preventive medicine and public health and in occupational medicine, as well as a combined residency in family and preventive medicine, are offered by the School of Public Health for qualified physicians. Each residency training program is accredited by the Accreditation Council for Graduate Medical Education (ACGME) and prepare residents for certification by the American Board of Preventive Medicine (ABPM). Both preventive and occupational medicine specialties require the successful completion of an accredited M.P.H. degree.

Those interested in applying to these training programs should contact the residency office by calling 909/ 558-4918 or by visiting the following web address: <http://www.preventmedresidencies.com>

Preventive medicine residency
The three-year program consists of an internship year followed by two years of integrated academic and practicum experiences. One internship position is offered through the National Residency Matching Program (NRMP) each year. Additional positions are offered for PGY-2 applicants, if they have already completed an internship year.

The program combines the academic and practicum experience over two years. During this time, residents will complete their M.P.H. degree and rotate at the various training sites. Practice sites include Loma Linda University, the Loma Linda Veterans Affairs Healthcare System, Kaiser Permanente, Riverside County Department of Public Health, and the Inland Empire Health Plan.

Under the guidance of the residency and faculty members at the School of Public Health, each resident completes a scholarly activity on a topic of choice during their residency.

Family and preventive medicine residency
The Family and Preventive Medicine Residency Program combines curricular elements of a three-year family medicine residency and a three-year preventive medicine residency into an efficient training program of four years. During the first year, residents complete a family medicine internship. The remaining years include both family and preventive medicine rotations and M.P.H. degree course work. Practice sites include Loma Linda University, SAC Healthcare System, Loma Linda Veterans Affairs Healthcare System, Kaiser Permanente, San Bernardino County Department of Public Health, and the Inland Empire Health Plan.

Occupational medicine residency
The three-year program consists of an internship year followed by two years of integrated academic and practicum experiences. One internship position is offered through the National Residency Matching Program (NRMP) each year. Additional positions are offered for PGY-2 applicants, if they have already completed an internship year.
The program emphasizes the clinical and applied aspects of occupational and environmental medicine. The program combines the academic and practicum experience over two years. During this time, residents will complete their M.P.H. degree and rotate at the various training sites. The major clinical site is the Occupational Medicine Clinic at Loma Linda University. This residency program focuses on the health of individuals and groups in relationship to work, hazards in the workplace, and environmental issues. The program emphasizes the assessment of individual health hazards and the identification and promotion of practices that help to reduce risk and prevent or postpone disease and injury.

Under the guidance of the residency and faculty members at the School of Public Health, each resident completes a scholarly activity on a topic of choice during their residency.

**M.S.**

**Master of Science**

The Master of Science (M.S.) degree in nutrition is offered to meet the specific needs of those who desire advanced training in nutritional sciences and is a bridge to the Ph.D. in nutrition program offered by SPH. The Master of Science degree in nutrition prepares students with graduate-level research in plant-based nutrition science.

More information about these areas of specialization is found in the Nutrition Program section of this CATALOG.
Epidemiology — M.P.H.

Program director
David Shavlik

The M.P.H. degree in epidemiology is designed to give theoretical and practical training in how to study and control factors that influence health-related problems. This degree prepares students to work in federal, state, and local health departments/agencies, academic and research institutions, health maintenance organizations, and hospitals.

Program learning outcomes

Upon completion of this program, the graduate should be able to:

• Assist in design and implementation of epidemiologic studies.
• Analyze epidemiologic data using appropriate statistical methods and software.
• Report epidemiologic research results through oral and written reports.
• Critically review relevant health literature.
• Use and interpret principles of public health screening and surveillance programs.

Educational effectiveness indicators

Program learning outcomes as evidenced by:

• Signature assignments linked to course and noncourse requirements
• Field practicum report
• Culminating experience (http://llucatalog.llu.edu/public-health/masters-degrees/#mphtext)

Prerequisite

In addition to the entrance requirements for all M.P.H. degrees (http://llucatalog.llu.edu/public-health/masters-degrees/#admissionstext), applicants to the M.P.H. degree program in epidemiology must have taken:

• College algebra or equivalent (calculus preferred)
• Three semester or four quarter undergraduate courses in the biological sciences

or PHCJ 798A  Public Health Practicum

1 Total units reduced to 56 units for clinical doctorates.
2 Chosen in consultation with advisor

EPDM/STAT forums

During their program, students are required to attend a minimum of fifteen forums in epidemiology, biostatistics, and/or in the Adventist Health Study.

Integrative learning experience

See standard integrative learning experience requirements (p. 376). *

* For two of the three options (Demonstrating Proficiency and Service to the Profession), students in the Epidemiology MPH program will be required to deliver an oral presentation and prepare a manuscript.

Normal time to complete the program

1.75 years (seven [7] academic quarters) based on full-time enrollment; part time permitted

Global Health — M.P.H.

Program director
Monita Baba-Djara

Program description

The M.P.H. degree earned in the Global Health Program prepares a graduate to practice public health with a transformational development worldview—seeking positive change in the whole of human life materially, physically, socially, psychologically and spiritually. The M.P.H. degree in global health prepares graduates with technical competence and cross-cultural skills to create and manage sustainable health and development programs in diverse settings and populations worldwide.

Graduates of the global health program work in nongovernmental, civil-society, faith-based, and community-based organizations; county and state health departments; private foundations; public health enterprises; and public health practice organizations. Graduates also find positions in UN, international, and multilateral organizations, such as the World Health Organization, UNICEF, and the World Bank; and U.S. government organizations like the Centers for Disease Control and Prevention (CDC) and the United States Agency for International Development (USAID). Those with prior field experience and additional language/s proficiency
(for example, French or Spanish) generally have advantages for these positions.

The curriculum is organized around principles of:

- a Christian, faith-based worldview that respects and includes all faiths, as faith plays a major role in how communities address adversity and make decisions about health;
- transformational development and the social, cultural, economic, and environmental determinants of health;
- social justice, human rights, and equity among vulnerable populations;
- support for and empowerment of communities, families, and individuals in their efforts to attain optimal health and development.

The program is designed to build capacity in global health through:

- a series of knowledge-based courses for broad, comprehensive knowledge of the major concepts and issues in global health, the structure and governance of global health, and analytical and program skills to design global, national, and local health programs.
- a series of skills-based courses building competencies in program planning, management, resource management and evaluation, project-proposal preparation, partnership relationships, teamwork, communication, collection and use of community data, quantitative and qualitative research, advocacy, and leadership through community partnerships and projects in the local and global environments.

Program learning outcomes

By the end of this program, the graduate should be able to:

1. Assess global burden of disease and health status of populations.
2. Implement community health interventions across the project cycle.
3. Describe how diversity of populations and individuals influences policies, programs, services and the health of a population.
4. Collaborate with community partners and stakeholders to improve health of communities.
5. Analyze health systems in high, medium and low income countries.
6. Demonstrate leadership, professionalism, and the ability to work in teams.

Educational effectiveness indicators

Program learner outcomes as evidenced by:

- Signature assignments linked to course and non-course requirements
- Field practicum report
- Culminating experience (p. 376)

Prerequisite

1 This field-based course involves international travel and fulfillment of required prerequisites. A separate laboratory fee must be paid at the time of registration into this course (subject to change, if needed).

2 Choose from defined cognates (p. 372) or select from electives, in consultation with advisor.

Integrative learning experience

See standard integrative learning experience requirements (p. 376).

Normal time to complete the program

Two (2) years (six [6] academic quarters) based on full-time enrollment; part time permitted

Health-Care Administration – M.H.A.

The School of Public Health offers a Master of Health-Care Administration (M.H.A.) degree. The degree provides students with a broad understanding of health-care management in line with appropriate and relevant industry-leading competencies. In addition, students will engage in practical experience to apply the principles learned through an 800-hour practicum in the health sector. Graduates are prepared for administrative careers in health service organizations—including medical centers, health plans, physician groups and dental practices, and long-term and managed-care settings, among others.

This degree program provides students with the knowledge, skills, and practice necessary to further their administrative careers in the health-care sector.

Health professionals who are currently employed and have at least five years of professional work experience in health-care administration are eligible to apply for a waiver of up to nine units.
Program learning outcomes
Upon completion of this degree, the graduate should be able to:

- Describe key aspects of the health-care environment.
- Demonstrate leadership skills and accountability aptitude.
- Integrate strategic awareness and innovative thinking.
- Apply business management skills and stewardship principles.
- Demonstrate awareness of public health issues and policies.

Values
In addition to the seven values held by Loma Linda University, the M.H.A. degree program also upholds the following:

Professionalism—The demonstration of ethics, sound professional practice, social accountability, and community stewardship. The desire to act in a way that is consistent with one’s values and what one says is important.

Initiative—Identifying a problem, obstacle, or opportunity; and taking action in light of this identification to address current or future problems or opportunities. Initiative should be seen in the context of proactively doing things and not simply thinking about future actions.

Collaboration—The ability to work cooperatively with others, to be part of a team. Collaboration applies when a person is a member of a group of people functioning as a team.

Accountability—The ability to hold people accountable to standards of performance or to ensure compliance using the power of one’s position or force of personality appropriately and effectively, with the long-term good of the organization in mind.

Educational effectiveness
Educational effectiveness will be determined by papers, presentations, experiential exercises, tests, field practicum projects/papers, and an exit interview. There will also be a competency inventory survey conducted two times during the student’s program of study at Loma Linda University—upon starting the M.H.A. degree program and at the end—upon completion of all classes and the practicum experience.

Educational effectiveness indicators
Program learner outcomes as evidenced by:

- Signature assignments linked to course requirements and program learning outcomes
- Field practicum report
- Culminating experience

Prerequisites
The following undergraduate-level courses are required and may be taken as a MOOC or other online course where a certificate is received.

- Micro-economics (one course)
- Accounting (one course)

Health-care administration practicum
The M.H.A. includes supervised practical opportunities for emerging and experienced administrative health-care professionals. Students from this program with little-to-no health-care leadership experience will engage in an 800-hour practicum in a health-care setting—such as a hospital, long-term care facility, community clinic, or other health-care related organization. Students who enter the program with five years or more of health-care leadership experience will complete a project based on practical experience in which they will work with a health-care organization and assist or lead a current project in consultation with the faculty and the organizations leaders.

The purpose of the practical experience is to provide students with the opportunity to apply academic learning in an interdisciplinary environment and to integrate public health concepts and skills from their program of study. The depth and breadth of the experience varies by site location and project availability. This is done in the context of carefully planned and implemented field-based, real-world experience. The practical experience is participatory in nature rather than observational; and is designed to address students’ program competencies and career interests, while also making contributions to the site or organization where they are placed.

While the assigned hours will be spent at the organization, the student’s work will be guided and evaluated through a course he or she has registered for on Canvas/LiveText. The number of units for which a student will need to register will vary according to the hours or projects the student will complete each quarter. The practicum coordinator and/or program director will work closely with students and their mentors in monitoring student progress. Students will present their experiences to the program faculty and site supervisors in final papers and oral presentations.

Students who are accepted into the program with five years or more of health-care management experience will complete a consulting project focusing on identified weak areas within the program learning outcomes. These students will work with the program faculty to meet these requirements in a directed study course.

Students who are accepted into the program from a clinical background, or who are enrolled in a professional clinical program concurrent with enrollment in the M.H.A. degree program, are required to complete 400 hours in their practicum—with their clinical education being counted as exposure to practical and professional development.
Individuals who may benefit from the program

Individuals and organizations interested in management and administrative careers in health service organizations—including hospitals, health plans, physician groups and dental practices, and long-term, managed-care settings, among others, may benefit from the program.

Total Units 62

Practical experience

Practicum units in addition to the minimum didactic units required for the degree 16

HADM 724A Health-Care Administration Practicum (Total of 16 2-8 units/800 hours) 2

or HADM 724B Health-Care Administration Practicum
or HADM 724C Health-Care Administration Practicum
or HADM 724D Health-Care Administration Practicum

Choose a course in consultation with advisor

May substitute with HADM 594 Applied Health-Care Management Project for 2-4 units per approval of practicum director.

Noncourse requirements

Culminating experience. M.H.A. degree students are required to produce a final report at the end of the practicum experience and to present the findings at a formal presentation arranged as part of the grade for the practicum course. They will also complete a final project and portfolio as part of the Integrated Capstone (HADM 690 Health-Care Management Capstone).

Professional membership. During their first quarter, students are required to secure and maintain membership in the American College of Healthcare Executives (ACHE) for the duration of the M.H.A. degree program.

Colloquia. Participation in 10 hours of noncredit colloquia designed to acquaint students with various aspects of the health-care industry is required of all students.

Normal time to complete the program

Two (2) years (seven [7] academic quarters) based on full-time enrollment; part time permitted

Health Education and Wellness Coaching – M.P.H.

Program director

Anna Nelson

Program formats

Course work for the health education and wellness coaching program may be pursued in the following formats:

- a traditional, on-campus program (combination of on-campus and online coursework)
- an online program (combination of synchronous and asynchronous coursework)

The program leading to M.P.H. degree in health education and wellness coaching allows students to achieve the competencies necessary to promote health and wellness to individuals and communities alike. The integration of health education and wellness coaching courses will provide students with a combination of cutting-edge skills in health and wellness, health education, health coaching, and whole-person care.

The health education component of the program focuses on educational, interpersonal, community, and legislative factors that promote positive health behaviors. The curriculum emphasizes interventions based on scientific data and established behavioral and learning theories that promote public health through the processes of education and community organization.

Along with the knowledge of lifestyle-related diseases, health, nutrition, and fitness, the wellness coaching component of the curriculum delivers motivational and behavioral skills needed to enable graduates to become a part of the rapidly growing field helping individuals achieve optimal wellness.

Students who complete the curriculum may function as workplace wellness coordinators, health educators, and health coaches in a variety of public and private settings. They are academically prepared to conduct community assessments; design, implement, and evaluate health education interventions; organize health promotion efforts; and
assist individuals and communities to better utilize techniques of health behavior change.

Professional practice is addressed during the laboratory and field experience portions of the curriculum. Students may develop skills while working in community agencies, health care, school, and worksite settings.

Upon completion of the program, graduates are eligible to sit for the following credentialing examinations

- **CPH**—offered by the National Board of Public Health Examiners, [https://www.nbphe.org](https://www.nbphe.org).
- **National Board Certified Health & Wellness Coach (NBC-HWC)**—offered by National Board of Medical Examiners (NBME) and the International Consortium for Health & Wellness Coaching (ICHWC).
- **Certified Health Education Specialist (CHES) or MCHES**—offered by the National Commission for Health Education Credentialing, Inc., [http://www.nchec.org/](http://www.nchec.org/).
- **Certified Personal Trainer (ACSM-CPT)**—offered by American College of Sports Medicine, [https://acsm.org/](https://acsm.org/).

**Program learning outcomes**

By the end of the program, graduates of this program should be able to:

1. Accurately assess individual lifestyle-related risk factors for chronic diseases in culturally diverse populations.
2. Administer and manage health education.
3. Plan, implement, and evaluate health intervention programs.
4. Demonstrate empathetic coaching skills when delivering wellness counseling to clients.
5. Conduct culturally competent wellness coaching assessment, counseling, and evaluation for individuals and groups.

**Educational effectiveness indicators**

Achievement of program learning outcomes will be evidenced by:

- Signature assignments linked to course and non-course requirements
- Comprehensive examination

**Prerequisite**

- Behavioral science

Nutrition with coordinated program in dietetics — M.P.H.

Program director
Celine Heskey

The Master of Public Health (M.P.H.) degree curriculum in nutrition and dietetics enables students to meet the didactic and supervised practice requirements for registration eligibility in nutrition and dietetics. The purpose of registration is to protect the health, safety, and welfare of the public by encouraging high standards of performance by persons practicing in nutrition and dietetics.

Students in the M.P.H. degree curriculum may establish eligibility to write the registration examination to become registered dietitian nutritionists (RDN) by completing this program. The program is accredited by (ACEND) of the Academy of Nutrition and Dietetics (AND), <>https://www.eatrightpro.org/acend>.

Program learning outcomes

The curriculum integrates the requirements of the M.P.H. degree in nutrition with the competency requirements, foundation, knowledge, and skills to practice dietetics, as defined by ACEND. By the end of the program graduates should be able to:

- Describe the integration of biological mechanisms underlying the effect of food and nutrients on individual and population health outcomes.
- Function independently and collaboratively as a leader or member of a team, to plan, manage, and evaluate public health nutrition interventions.
- Critically analyze studies and nutrition and dietetics evidence-based guidelines for public health prevention, nutrition interventions, and research.
• Scrutinize public policies and processes related to food and nutrition and explore their impact on health outcomes.
• Examine the role of vegetarian dietary practices on human health, the environment and
• Demonstrate effectiveness in applying the nutritional care process consistent with competencies defined by the ACEND.
• Apply systems management and use of resources to the provision of nutritional services.

Educational effectiveness indicators
Program learner outcomes as evidenced by:
• Signature assignments linked to course and non-course requirements
• Field practicum report
• Integrative Learning Experience (p. 376)

Prerequisites
• General chemistry
• Organic chemistry
• Microbiology
• Anatomy and physiology
• Human nutrition or equivalent

Individuals who may benefit from the program
Graduates with bachelor’s degrees or higher who seek credentialing as RDNs.

Total Units | 26

Integrative learning experience
In addition to the standard integrative learning experience requirements (p. 376), students are expected to complete a written comprehensive exam, field practicum report, and E-portfolio (including 100 hours of community service).

Normal time to complete the program
2.66 years (nine [9] academic quarters) based on full-time enrollment; part time permitted

Nutrition — M.P.H.
Closed to admission for the 2019-2020 academic year.

Program director
Celine Heskey

The Master of Public Health (M.P.H.) degree program in nutrition provides specialized training in community nutrition within the multidisciplinary public health programs offered by the School of Public Health (SPH). The program is designed to train professionals to assume leadership positions in assessing community nutrition needs; and in planning, directing, and evaluating the nutrition component of health-promotion and disease-prevention efforts.

Public health nutritionists work in a variety of settings in government and voluntary agencies, public and private community health centers, ambulatory care clinics, schools, industries, private practice, and specialized community health projects. They function as directors and administrators of nutrition programs, nutrition care providers, advocates, educators, counselors, consultants, and researchers.

The curriculum of the M.P.H. degree in nutrition prepares students for careers in public health and community nutrition. It is appropriate for individuals with professional credentials, such as medicine, dentistry,
Nutrition — M.S.
dietetics, or nursing. Students may opt to complete a research project with publication potential in lieu of a field practicum.

Program learning outcomes
Upon completion of the program, graduates should be able to:

• Integrate their knowledge of biological mechanisms underlying the effect of food and nutrients on health to the solution of public health problems.
• Function independently and collaboratively as leader or member of a team to plan, manage, and evaluate community-based nutrition-promotion activities.
• Critically analyze studies and apply findings to nutrition interventions.
• Scrutinize public policies and processes related to food and nutrition and explore their impact on health outcomes.
• Articulate the role of vegetarian dietary practices on human health, the environment, and ecology.

Educational effectiveness indicators
Program learner outcomes as evidenced by:

• Signature assignments linked to course and non-course requirements
• Field practicum report
• Culminating experience (p. 376)

Prerequisites
• General chemistry
• Organic chemistry
• Microbiology
• Physiology
• Human nutrition or equivalent

Individuals who may benefit from the program

• Graduates of bachelor’s degree programs in chemistry, biology, and the social sciences, who seek advanced degrees in nutrition or the health professions.
• Health professionals, such as physicians, nurses, dentists, allied health professionals, and registered dietitians.

Culminating experience
In addition to standard culminating experience requirements (p. 376), students in the Nutrition MPH program will be required to complete a written comprehensive examination.

Normal time to complete the program
Two (2) years (eight [8] academic quarters) based on full-time enrollment; part time permitted

Nutrition — M.S.

Program director
Ella Haddad

The Master of Science (M.S.) degree Nutrition Program is suitable for persons planning to pursue a doctoral degree in nutrition or other related areas and for persons preparing to teach at the secondary or university level. The program provides effective investigative experiences and training for those interested in research careers in academic or industry settings. In addition, the program provides training in basic and applied nutrition for health professionals seeking skills for promoting healthful plant-based diets.

The M.S. degree requires a minimum of 48 units and includes research and a thesis or publishable paper. A written comprehensive examination is required.

The M.S. degree in nutrition program is offered to meet the specific needs of those who desire advanced training in nutritional sciences.

Program learning outcomes
By the end of the program, the graduate should be able to:

1. Explain physiological and biochemical mechanisms influencing human systems and how food and nutrients impact function.
2. Critically evaluate nutritional information based on scientific reasoning.
3. Demonstrate the role of vegetarian dietary practices in human health and environmental sustainability.
4. Communicate nutritional concepts appropriately to individuals and groups.
5. Design, conduct, and interpret research in nutrition.

**Educational effectiveness indicators**

Indicators of educational effectiveness include successful completion of a comprehensive examination, oral defense of a thesis and submission of the written thesis or a publishable paper.

**Prerequisite**

- Human nutrition
- General chemistry through organic chemistry
- Microbiology
- Physiology

**Individuals who may benefit from the program**

Persons who hold a baccalaureate degree in science, or physicians and other health professionals who desire to pursue teaching or a doctoral degree, may benefit from the program; as well as persons who desire training in nutritional sciences to prepare them for conducting and publishing applied nutrition research.

**Total Units** | 48-51 |

**Culminating experience**

Included in the culminating experience are a written comprehensive examination an oral research project defense, and a written thesis or publishable paper.

**Normal time to complete the program**

1.33 year (five [5] academic quarters) based on full-time enrollment; part time permitted.

**Population Medicine — M.P.H.**

**Program director**

Karen Studer

The Population Medicine Program is designed to meet the needs of practicing health professionals who have experience in direct patient care and wish to augment their current careers with additional information and skills in the health of populations. The students will be competent in analyzing the health of a patient population and understanding the social, environmental, and biological determinants of health in that population.

Individuals who may benefit from this program are practicing health professionals, such as physicians, dentists, pharmacists, nurses, social workers, physical therapists, and psychologists; and students who are currently enrolled in clinical practice-related doctoral degrees (e.g., M.D., D.O., D.D.S., Pharm.D.). This degree will provide clinicians with cutting-edge knowledge and a skill set to integrate population-based, health-care approaches into their everyday clinical practice.

**Program learning outcomes**

Upon completion of this degree, the graduate should be able to:

- Characterize the health of a community.
- Design and conduct an epidemiologic study.
- Investigate and respond to a cluster or outbreak.
- Analyzes and evaluates surveillance data.
- Develop or analyze a guideline for a proposed preventive service.
- Apply evidence-based guidelines for preventive services.
- Monitor and interpret a health status indicator for a community.
- Analyze data using statistical methods.

**Educational effectiveness indicators**

Program learner outcomes as evidenced by:

- Signature assignments linked to course and noncourse requirements
- Applied practice experience products
- Integrative learning experience product

**Prerequisites**

In addition to the entrance requirements for all M.P.H. degrees (p. 375), applicants to the M.P.H. degree program in population medicine must have:

- A health-care-related degree
  - Bachelor’s or master’s degree with two years of postgraduate, direct patient-care experience (e.g., nursing, social work, dental hygiene, physical therapy, occupational therapy, psychology).
  - Acceptance into or completion of clinical practice-related doctoral degree program (e.g., M.D., D.O., D.D.S., D.N.P., D.P.T.,
Doctoral degrees

Admissions

Admissions requirements for doctoral degree programs described below are in addition to the University admissions requirements (p. 24) and program requirements. The minimum eligibility requirements for admission to a doctoral degree program include the following:

- An M.P.H. degree or master's degree in a related field from a regionally accredited institution, with a G.P.A. of 3.5 or above. Applicants with a master's degree in another field may indicate their relevant training, research and/or practice experience, or educational background comparable to the M.P.H or the M.S. degrees. Dr.P.H. degree applicants who are admitted without an M.P.H. degree will be required to take PHCJ 606 Public Health Fundamentals, EPDM 509 Principles of Epidemiology, STAT 509 General Statistics or the equivalent courses to fulfill the public health fundamental learning outcomes described in section D.1 of the 2016 CEPH criteria.

- Satisfactory performance on GRE or equivalent is required; scores must have been attained within the past five years. Although there is no minimum GRE score requirement, 40th percentile or higher in each of the three sections of the GRE (verbal, quantitative, and writing) is considered competitive.

- Religious affiliation is not a requirement; but students are expected to adhere to on-campus requirements of modest dress, abstinence from alcohol and smoking, and attendance at weekly chapel, as applicable. Applicants must satisfy the program-specific admission requirements, including but not limited to prerequisite courses and years of experience. Admissions decisions are based on review of applicant's transcripts, written statement, research and/or practice interest, letters of recommendation, GRE scores or equivalent, and interview. Satisfying minimum requirements does not guarantee admission.

Dr.P.H. degree

The Doctor of Public Health (Dr.P.H.) programs prepare individuals for leadership positions in public health practice in health-care systems, governmental agencies, non-profit organizations, and community setting. The competency-based curriculum delivers advanced public health education with specific focus within concentrations, and applied practice and integrated learning experiences that address the doctoral foundational and concentration specific competencies. Students may enroll on a full- or part-time basis; however, they must advance to candidacy within three years of entering the program, and complete the program within five years. Majors are available in:

- Health Education – on campus and technology mediated
- Preventive Care
- Health Policy and Leadership

Dr.P.H. degree programs offer preparation for careers in which advanced expertise in program planning, implementation, evaluation and policy analysis are required. Students’ doctoral projects (integrated learning experiences) and applied practice experiences are key components in the development of critical thinking and leadership skills.

A minimum of two years is generally required to complete course work, for full-time students. Program plans are described under individual majors. The number of units of course work required to complete the program may be reduced but is not to be fewer than 54 units plus applied practice experience and integrated learning experience units at Loma Linda University.

The overall Dr.P.H. curriculum is designed using a faith-based lens to accurately reflect the mission and vision of Loma Linda University and the School of Public Health. Additionally, nine units of courses offered by the LLU School of Religion are included in the curriculum to allow
the students to enhance personal spiritual development as well as application of faith-based values to professional practice.

Dr.P.H. Foundational Competencies
The common core curriculum is based on the doctoral foundational competencies from 2016 CEPH criteria. These include:

Critical Analysis: Ability to synthesize and apply evidence based research and theory from a broad range of public health disciplines and health related data sources to advance programs, policies, and systems promoting population health.

Competencies:
1. Analyze quantitative, qualitative, mixed methods and policy analysis research and evaluation methods to address health issues at multiple levels (individual, group, organization, community and population).
2. Design a quantitative, qualitative, mixed methods, policy analysis or evaluation project to address a public health issue.
3. Explain the use and limitations of surveillance systems and national surveys in assessing, monitoring and evaluating policies and programs and to address a population's health.

Leadership, Management and Governance: Ability to create, communicate and apply shared vision, inspire trust and motivate others, build capacity and strategies, and identify and analyze ethical issues in addressing public health problems.

Competencies:
4. Propose strategies for health improvement and elimination of health inequities by organizing stakeholders, including researchers, practitioners, community leaders and other partners.
5. Propose strategies to promote inclusion and equity within public health programs, policies and systems.
6. Create a strategic plan
7. Create organizational change strategies
8. Propose human, fiscal and other resources to achieve a strategic goal.
9. Cultivate new resources and revenue streams to achieve a strategic goal.
10. Assess one's own strengths and weaknesses in leadership capacities including cultural proficiency.
11. Facilitate shared decision making through negotiation and consensus building methods.
12. Integrate knowledge, approaches, methods, values and potential contributions from multiple professions and systems in addressing public health problems.
13. Communicate public health science recognizing different communication styles and tools to diverse stakeholders including individuals at all levels of health literacy, for purposes of influencing behavior and policies.

Policy, Advocacy and Programs: Ability to design system-level interventions that influences population health outcomes in transdisciplinary team approaches that promote health equity and disease prevention across diverse communities and cultures.

Competencies:
14. Design a system-level intervention to address a public health issue.
15. Integrate knowledge of cultural values and practices in the design of public health policies and programs.
16. Integrate scientific information, legal and regulatory approaches, ethical frameworks and varied stakeholder interests in policy development and analysis.
17. Propose inter professional team approaches to improving public health.

Education and Workforce development: Ability to develop and apply pedagogical principles and skills to identify learning needs of a population and promote learning in academia, organizational and community settings.

Competencies:
18. Assess a population's knowledge and learning needs.
19. Use best practice modalities in pedagogical practices.
20. Deliver training or educational experiences that promote learning in academic, organizational or community settings.

Applied practice and integrated learning experience
All Dr.P.H. students will engage in an applied practice experience (AP) that results in a final product that is relevant to public health organizations. The culminating activity is an integrated learning experience (ILE) that includes a field-based project emphasizing advanced practice. Both AP and ILE will demonstrate integration of foundational and concentration-specific competencies.

Dr.P.H. degree corequisites
Students must have an M.P.H. from an accredited institution or complete courses in PHCJ 606 Public Health Fundamentals, EPDM 509 Principles of Epidemiology, STAT 509 General Statistics, and STAT 548 Analytical Applications of SAS and R or STAT 549 Analytical Applications of SPSS prior to taking doctoral level public health core courses.

Advancement to candidacy
Advancement to candidacy is granted by the Academic Dean. When the doctoral foundational course work is completed, the student must successfully pass a written comprehensive examination. The next step is the qualifying examination. The student is required to submit a concept paper describing the proposed doctoral project, and proposed Doctoral Project Guidance Committee. Students are advanced to candidacy when they successfully present their doctoral project proposals that include the rationale and significance to the field, approach and tools, and outcomes (deliverables). Successful completion of the doctoral project also requires a high quality written document (guidelines outlined in the SPH doctoral handbook).

Teaching experience
Each doctoral student is required to serve as a teaching assistant for a minimum of one quarter. Additional information is detailed in the school’s Doctoral Handbook.

Professional Development
All doctoral students are required to present their work (applied practice experience or integrated learning experience) at a scientific or professional conference either as a poster or as a short oral presentation.

Ph.D. degree
The Doctor of Philosophy (Ph.D.) programs prepare individuals for careers in scientific research and/or teaching at universities, in governmental agencies, industry and private organizations. The Ph.D. curriculum
provides advanced didactic training in a specific discipline, develops students' critical thinking and research skills to conduct independent research, and enhances written and oral communication to the scientific community to advance the field through dissertation and peer-reviewed publications. Students may enroll on a full- or part-time basis; however, they must advance to candidacy within three years of entering the program, and complete the program within five years. Majors are available in:

- Epidemiology
- Nutrition

Ph.D. degree programs offer preparation for careers in which advanced expertise in research and the discipline are required. Students' doctoral dissertation and peer-reviewed manuscripts are key components in the development of critical thinking, research and scientific communication skills.

A minimum of two years is generally required to complete course work, if full time. Program plans are described under individual majors. The number of units of course work required to complete the program may be reduced but is not to be fewer than 47 units plus 12 research/dissertation units at Loma Linda University. Students whose academic backgrounds include substantial graduate study in a cognate field may be granted advanced standing.

The overall Ph.D. curriculum is designed using a faith-based lens to accurately reflect the mission and vision of Loma Linda University and the School of Public Health. Additionally, nine units of courses offered by the LLU School of Religion are included in the curriculum to allow the students to enhance personal spiritual development as well as application of faith-based values to professional practice.

**Learner outcomes**

Please see the individual program descriptions for the specific program learning outcomes. Program learning outcomes tied to scientific communication, both oral and written, educational pedagogy, and professional and scientific ethics are shared across all doctoral programs (both Dr.P.H. and Ph.D.).

**Comprehensive and qualifying examinations**

Students are required to demonstrate ability and readiness to proceed with doctoral study and research by successfully passing the comprehensive examination. Degree specific descriptions of the comprehensive examination can be found in the school's *Doctoral (Ph.D.) Handbook*.

**Advancement to candidacy**

Advancement to candidacy is granted by the Academic Dean. When the required discipline specific and research methods courses are completed, the student must successfully pass a written comprehensive examination. The next step is the qualifying examination. The student is required to submit a concept paper describing the proposed dissertation research, and members of the proposed Dissertation Guidance Committee (DGC). Students are advanced to candidacy when they successfully defend (oral examination) their dissertation proposals. Proposals include background and introduction, rationale and significance of the proposed research, research methods, data collection and analyses, results and discussion (as peer-reviewed journal articles), summary, and conclusion. The details of this process are described in the school's *Doctoral (Ph.D.) Handbook*.

**Teaching experience**

All doctoral students are required to serve as a teaching assistant for a minimum of one quarter. Additional information is detailed in the school's *Doctoral (Ph.D.) Handbook*.

**Professional development**

All doctoral students are required to present their research work at a scientific conference either as a poster or as short oral presentation.

**Programs**

- Epidemiology — Ph.D. (p. 391)
- Health Education — Dr.P.H. (p. 392)
- Health Policy and Leadership — Dr.P.H. (p. 393)
- Nutrition — Ph.D. (p. 394)
- Preventive Care — Dr.P.H. (p. 396)
Epidemiology — Ph.D.

Interim program director
Michael Orlich

The aim of the Doctor of Philosophy (Ph.D.) degree program in epidemiology is to prepare students to effectively conduct epidemiologic research, apply epidemiologic principles and methods to address public health problems, and teach the discipline to others. The major research focus of the faculty in the program has been the epidemiology of chronic diseases linked to exposures such as tobacco use, air pollution, and diet. Studying the effects of diet on health and disease risk in populations is a particular strength of our program. The curriculum is designed to establish competence in classical and modern epidemiologic methods, to promote successful learning and application of emerging methods, and to prepare the graduate for successful interdisciplinary research collaboration with public health and medical professionals, nutritionists, biostatisticians, bioinformaticians, and biological scientists.

Program learning outcomes

Upon completion of the program, graduates will be able to:

- Apply advanced knowledge of the principles and methods of epidemiology to interpret and critically evaluate the results of epidemiologic analyses.
- Apply epidemiologic principles to design appropriate studies to evaluate exposure-disease hypotheses; communicate these study designs in a research grant proposal.
- Demonstrate proficiency in the principles and methods of data collection and management; obtain epidemiologic data and prepare it for analysis.
- Analyze complex data using appropriate statistical methods and computer programming resources to answer epidemiologic questions.
- Effectively communicate epidemiologic science, orally and in writing, to the scientific community and the public, to advance the field and to promote public health.
- Use best-practice modalities in pedagogy to deliver educational experiences in an academic setting.
- Apply the principles of scientific and professional ethics in research, teaching, and practice.

Educational effectiveness indicators

- Assessments from required courses
- Comprehensive examination
- Dissertation proposal defense (qualifying examination)
- Dissertation manuscript
- Submission of three manuscripts from the dissertation to peer-reviewed journals, one of which must be published or accepted for publication
- Oral defense of dissertation
- Teaching assistantship
- Presentation at a scientific conference

Prerequisites

Doctoral-level health professional degree or master's degree in epidemiology or in a related field or

Master's degree in a related field and the following courses:

- Anatomy and physiology
- Pathology
- Microbiology
- Biochemistry
- Genetics or molecular biology
- G.P.A. of 3.5 or higher preferred
- GRE or equivalent (above the 40th percentile in each section is favorable)

Individuals who may benefit from the program

Those who may benefit from the program include individuals seeking careers in:

- Academic epidemiology (research and teaching)
- Research in private industry, governmental agencies, or nonprofit organizations
- Public health epidemiology with a research focus

Additional requirements

Further details regarding non-course degree requirements are found in the SPH Doctoral Handbook.

Teaching assistantship

Ph.D. students are expected to assist faculty members with the teaching of epidemiology and/or biostatistics courses. It is the responsibility of doctoral students to obtain documentation from faculty members they have assisted.

Comprehensive examination

Doctoral students must pass a comprehensive examination prior to advancement to candidacy.

Dissertation proposal and proposal defense

After passing the comprehensive examination, each student will prepare a formal dissertation proposal. Successful defense of this proposal will lead to advancement to candidacy for the degree.

Presentation at scientific conference

The student must present one research project in poster or oral form at an appropriate professional conference.

Culminating experience

As a part of the culminating experience, the student must submit three manuscripts from the dissertation research to appropriate peer-reviewed journals, successfully defend the dissertation, and submit a committee-approved dissertation manuscript.

Scientific publication

The student must submit and have accepted for publication one of the three dissertation papers in an appropriate peer-reviewed journal prior to graduation. The two remaining dissertation papers must have been submitted to peer-reviewed journals prior to graduation.

Normal time to complete the program

Three to five (3-5) years based on full-time enrollment

Health Education — Dr.P.H.

Program director

Anna Nelson

The Dr.P.H. degree in health education is designed for individuals who desire to add depth to their health education specialization and develop research and leadership capabilities. The emphasis on health education offers advanced knowledge and competencies in the health education process and includes advocacy, critical analysis, leadership, professionalism, and ethics; as well as other health education domains. The Dr.P.H. degree in health education is offered in two formats: on-campus and online.

The online technology-mediated format is designed to meet the needs of working professionals. The curriculum consists of online asynchronous and synchronous courses (where online and on-campus students meet simultaneously for class via teleconference). Specific hardware and software requirements for the program must be met. Online students are required to comply with the online attendance requirements per LLU Distance Education Policy.

Graduates are eligible to sit for the credentialing examination in health education—CHES or MCHES—offered by the National Commission of Health Education Credentialing, Inc. <http://www.nchec.org/>.

Program learning outcomes

Upon completion of this program, the graduate should be able to:

- Synthesize assessment results to determine and prioritize health problems.
- Apply theoretical concepts and models in developing health interventions.
- Evaluate effectiveness of health education interventions.
- Provide mentorship and consultation on health education-related issues.
- Apply evidence-based research to develop advocacy efforts for policies and programs promoting health.

Educational effectiveness indicators

- Comprehensive examination
- Publishable research paper
- Doctoral project presentation

Prerequisite

In addition to the entrance requirements for all Dr.P.H. degrees (p. 388), each applicant to the Dr.P.H. degree program in health education must have:

- M.P.H. degree in health education, health behavior, or health promotion; or a master's degree in a health-related field preferred
- Postmaster's degree work experience preferred
• Social science (two courses, which may include psychology, sociology, or cultural anthropology)

**Program requirements**

**Corequisites**
See standard DrPH corequisites (p. 388).

**Dr.P.H. public health core**

**Practicum**

Practicum units are in addition to the minimum didactic units required for the degree

| PHCJ 795  Applied Practice                    | 2 |

**Applied practice experience and integrated learning experience**

All Dr.P.H. students will engage in an applied practice experience that results in a product that is relevant to public health organizations. The culminating activity is an integrated learning experience that includes a field-based project emphasizing advanced practice. Both applied practice experience and integrated learning experience will demonstrate integration of foundational and concentration specific competencies.

**Normal time to complete the program**

Three (3) years based on full-time enrollment

**Health Policy and Leadership – Dr.P.H.**

**Program director**
Jim Banta

The Dr.P.H. degree curriculum in health policy and leadership emphasizes a blend of professional and academic skills, such as leadership and management, finance and philanthropy, community engagement and advocacy, policy analysis and development, ethics, and research methods. The current, rapidly changing health and health-care landscapes—marked by significant health disparities and varied challenges—demands a diversity of leadership talents. Moreover, creative approaches are needed to meet these challenges. The Doctor of Public Health degree in health policy and leadership at Loma Linda University provides a unique and wonderful opportunity to serve at the very heart of the intersection of leadership and policy. The goal is preparing participants for success in leadership positions that have major influence on policies, programs, and the public health system.

**Program learning outcomes**

Upon completion of this program, the graduate should be able to:

1. Engage in reflective leadership and analyze a broad range of management and leadership issues, including governance, valuing diversity, planning, conflict resolution, and change management.
2. Demonstrate ability to evaluate the health policy development process, including problem identification, policy formulation, and implementation.
3. Demonstrate commitment to ethical choices and values of justice and equity by formulating strategies for policy advocacy.
4. Analyze community-building principles and develop strategies to address social determinants of health, including the delivery, quality, and costs of health and health care for individuals and populations.
5. Develop skills in evaluating, conducting, and reporting research.

**Educational effectiveness indicators**

- Comprehensive examination
- Applied project presentation
- Publishable paper
- Doctoral project presentation

**Individuals who may benefit from the program**

Participants could be mid-to-senior-level managers in public health, health care, public and government agencies, higher education, social welfare organizations, nongovernmental organizations (NGOs), faith-based organizations, community-based organizations (CBOs), and other related groups. Consistent with the program’s focus on social determinants of health to promote health equity, individuals from non-health sectors are encouraged to apply. It is highly encouraged that those
admitted into the program: (a) will have had sufficient experience in the workplace (three or more years), and (b) be currently employed in an organization that is supportive of their degree program and the unique requirement to develop a "learning environment" at the workplace.

**Prerequisite**

See entrance requirements for all Dr.P.H. degrees. (p. 388)

**Program requirements**

**Corequisites**

See standard DrPH corequisites (p. 388).

**Normal time to complete the program**

Three (3) years based on full-time enrollment

**Nutrition — Ph.D.**

**Program director**

Sujatha Rajaram

The aim of the Doctor of Philosophy (Ph.D.) degree in nutrition is to prepare students to effectively conduct nutrition research, apply nutritional science knowledge and appropriate research methods to address public health problems. The program is designed to provide an advanced curriculum in nutrition, professional skills, and competencies required to support careers in teaching and research. This program is unique in that it is situated in the School of Public Health in a health sciences university. Students enrolled in this program are able to concurrently complete coursework and practice experience necessary to sit for the registered dietitian nutritionist (RDN) exam if not already an RDN. The program engages in interdisciplinary research that encourages collaboration across public health disciplines and the basic sciences. The program promotes and builds on its core legacy of vegetarian and plant-based nutrition. Areas of curricular strength and research emphasis include plant-based diets and the health of the individual, populations and the planet, nutritional epidemiology, diet and chronic disease risk reduction, and community nutrition.

**Program learning outcomes**

Upon graduation from the Ph.D. in Nutrition program, the graduates should be able to:

- Evaluate advanced knowledge in nutritional science and explain the biological mechanism underlying the relationship between nutrients, foods, and diet pattern and health.
- Critically evaluate the evidence base and advocate for the role of plant-based diets in promoting health of the individual, population groups, and the planet.
- Apply analytical and fundamental concepts in nutritional epidemiology.
- Conduct a research study that addresses a nutrition problem, collect/abstract, analyze, and interpret the data and report findings.
- Effectively communicate nutritional science, orally and in writing, to the scientific community and the public, to advance the field and to promote public health.
- Use best-practice modalities in pedagogy to deliver educational experiences in an academic setting.
• Apply the principles of scientific and professional ethics in research, teaching, and practice.

**Educational effectiveness indicators**

• Assessment from required courses
• Comprehensive examination
• Dissertation proposal defense (qualifying examination)
• Dissertation manuscript: submission of two manuscripts from the dissertation to peer-reviewed journals. One manuscript published in peer-reviewed journal (from dissertation or non-dissertation).
• Oral defense of dissertation
• Teaching assistant
• Presentation at a scientific conference

**Prerequisites**

• Master’s degree in nutrition preferred; or an M.S. or M.P.H. degree with completion of all prerequisite courses; or a health professional degree at the master’s level or higher (M.D. or equivalent)
• Advanced biochemistry (may be taken concurrently with the program)
• Anatomy and physiology, microbiology, general chemistry and organic chemistry
• G.P.A. of 3.5 or higher preferred
• GRE or equivalent (above the 40th percentile in each section is favorable)

**Individuals who may benefit from the program**

Individuals seeking careers in:

• Academia (teaching and research)
• Researcher in private industry, governmental agencies, nonprofit organizations, research institutes
• Public health nutritionist
• Leadership role in academia and public health sector

**Program requirements**

**Total Units** 59

1 Register twice for a maximum six units. Each offering in an academic year will be a different topic

2 Choose in consultation with academic advisor. Must be graduate-level courses in nutrition, dietetics, public health, or basic sciences.
Preventive Care — Dr.P.H.

Program director
Hildemar Dos Santos

The Preventive Care Program is designed to prepare high-level health professionals in wellness and lifestyle-management intervention. Emphasis is on academic preparation, practical skills, and administrative abilities in developing, implementing, and evaluating programs and protocols designed to address a wide spectrum of health issues—particularly those dealing with chronic disease. These programs and protocols include physical and mental health risk appraisal, nutritional assessment and recommendations, exercise testing and prescription, and smoking-cessation counseling.

The program seeks to demonstrate and elucidate the intimate connection between mind and body. Graduates address the combined influences of nutrition, exercise, stress, smoking, and other lifestyle factors on the promotion of health and the prevention of disease.

This program is ideal for health practitioners such as physicians, nurses, dentists, physical therapists, registered dietitians, and occupational therapists. Non-health practitioners can apply for this program and we advise them to take the health and wellness coaching while in the program. Non-physicians are not able to practice medicine upon completion of this degree.

Program learning outcomes

Upon completion of this program, the graduate should be able to:

1. Design an addiction-prevention program that includes needs assessment, program development, marketing, budgeting and evaluation.
2. Design a professional practice to assist clients individually or in groups by applying lifestyle modification strategies.
3. Demonstrate successful motivational interviewing skills.
4. Design a weight-management program for a group or community that includes needs assessment, program development, marketing, budgeting and evaluation.
5. Design a preventive program for a specific disease (for instance, diabetes, hypertension, heart disease, etc.) that includes needs assessment, program development, marketing, budgeting and evaluation.

Educational effectiveness indicators

- Comprehensive examination
- Applied project presentation
- Publishable paper
- Doctoral project presentation

Prerequisite

In addition to the entrance requirements for all Dr.P.H. degrees (p. 388), applicants to the Dr.P.H. degree Preventive Care Program must have:

- Anatomy and physiology
- HPRO 526 Lifestyle Diseases and Risk Reduction (or equivalents to be evaluated by program director)

Program requirements

Corequisites

In addition to standard Dr.P.H. corequisites (p. 388), the Dr.P.H. program in preventive care requires the following courses in addition to units required for the degree. It is recommended these courses be taken early on in the program.

- HPRO 500 Stress Management
- HPRO 573 Exercise Physiology I
- NUTR 529 Health Aspects of Vegetarian Eating

Dr.P.H. public health core

**Applied practice experience and integrated learning experience**

All Dr.P.H. students will engage in an applied practice experience that results in a product that is relevant to public health organizations. The culminating activity is an integrated learning experience that includes a field-based project emphasizing advanced practice. Both applied practice experience and integrated learning experience will demonstrate integration of foundational and concentration specific competencies.

**Normal time to complete the program**

Three (3) years based on full-time enrollment.
Loma Linda University’s School of Religion has been entrusted with the mission of presenting the story of God’s gracious plan to redeem a lost and broken world through the life, death, and resurrection of Jesus Christ. The school’s mission, as part of Loma Linda University, is particularly focused on the teaching and healing ministry of Jesus Christ and the role it plays in equipping health-care practitioners to integrate Christian faith, health, and science. The school contributes to the University’s mission, vision and values by giving priority to the sacred task of serving students in its eight schools. Its use of mission-focused learning, through scholarship that expands knowledge and addresses the challenges health-care professionals face in today’s complex world, and provides a critical service to the university and world-wide Seventh-day Adventist church.

The school offers three master’s degrees: M.A. degree in bioethics, M.S.Chap. degree in chaplaincy, and M.A. degree in religion and society. These programs prepare graduates with theological educations and skills in bioethics and chaplaincy, and emphasizes religion’s relationship to culture and society. Within the framework of our academic programs, we offer a unique opportunity for students in other university programs to apply for dual enrollment in bioethics, and religion and society. Students enrolled in medicine, dentistry, and pharmacy are eligible to apply for admission to the bioethics and religion and society programs. Please refer to The Combined Degrees Programs of the University (p. 409) section to learn more about our dual enrollment degree programs.

We believe our academically rigorous programs and mission-focused courses cultivate a vibrant Christian community at LLU and help to prepare health care practitioners to go forth and “make man whole” as they embody the teaching and healing ministry of Jesus Christ. Welcome to Loma Linda University School of Religion.

Leo Ranzolin, Th.D.
Interim Dean, School of Religion
School foundations

History
In the configuration of Loma Linda University as a health sciences university, the role of religion as integrative in each of the programs of the University is mandated and continuously affirmed by the University administration and the Board of Trustees.

In July of 1990, the Faculty of Religion (now the School of Religion) was established to assist in this integration.

Philosophy
As implied by its motto, “To make man whole,” the University affirms these tenets as central to its view of education:

- God is the Creator and Sustainer of the universe.
- Humanity’s fullest development entails a growing understanding of the individual in relation to both God and society.
- The quest for truth and professional expertise, in an environment permeated by religious values, benefits the individual and society and advances the ministry of the Seventh-day Adventist Church.

Mission statement
The School of Religion is committed to continue the teaching and healing ministry of Jesus Christ by integrating Adventist faith with the world’s changing need.

Admissions
The program admissions committees of the University intend that an applicant to any of the schools is qualified for the proposed curriculum and is capable of profiting from the educational experience offered by this University. The admissions committees of the schools accomplish this by examining evidence of scholastic competence, moral and ethical standards, and significant qualities of character and personality. Applicants are considered for admission only on the recommendation of the program in which study is desired.

In addition to Loma Linda University (p. 24) admissions requirements, the applicant must also complete the following requirements:

- A four-year baccalaureate degree (or its equivalent) from an accredited college or university is a prerequisite for admission to the School of Religion. Transcripts of the applicant’s scholastic record should show appropriate preparation, in grades and content, for the curriculum chosen.
- See admission requirements for individual program in this CATALOG for G.P.A. requirements.
- A personal interview is desirable and should be arranged with the director of the program in which the student wishes to study.
- Since there is some variation in the pattern of undergraduate courses prescribed by different programs, the student should note the specific requirements of the chosen program. Deficiencies may be removed while enrolled; prerequisites must be completed prior to acceptance into the program.

Application deadlines
The School of Religion has a rolling admission policy for some programs in which completed applications are reviewed and students are accepted on a continual basis. Applications must be completed by the deadlines listed for the program in which the student wishes to enroll:

Master of Arts degree in bioethics and Master of Arts degree in religion and science

- Autumn Quarter: August 1 — Early Admissions for Autumn: May 1
- Spring Quarter: February 15 — Early Admissions for Spring: Nov. 1

Masters of Science in Chaplaincy degree

- Autumn Quarter: November 1 — Late Admissions for Autumn: May 1
Doctor of Science degree in religion and health
• Autumn Quarter: August 1 — Early Admissions for Autumn: May 1

General regulations
Students of the University are responsible for informing themselves of and satisfactorily meeting all regulations pertinent to registration, matriculation, and graduation. Section III gives the general setting for the programs of each school and the subject and unit requirements for admission to individual professional programs. It is important to review specific program requirements in the context of the general requirements applicable to all programs.

Academic probation
Degree students whose cumulative G.P.A. at the end of any quarter is less than 3.0 will be placed on academic probation. The number of units for subsequent registrations is restricted to a maximum of 12 per quarter. Students who are on academic probation and fail to earn a 3.0 for the next quarter, or who fail to have an overall G.P.A. of 3.0 after two quarters, jeopardize their standing in a degree or certificate program and may be dismissed from school.

Concurrent admission
Upon approval, students may be admitted to a School of Religion program while admitted to another program at Loma Linda University. Concurrent programs may be either formal (established curriculum in the University Catalog) or informal. Certain criteria must be met for both formal and informal concurrent programs before approval. The exception to this are the combined degrees programs (p. 409), discussed at the end of Section III of this CATALOG.

Financial information
The Office of the Dean is the final authority in all financial matters and is charged with the interpretation of all financial policies. Any exceptions to published policy in regard to reduction or reimbursement of tuition must be approved by the dean. Any statement by individual faculty members, program directors, or department chairs in regard to these matters is not binding on the school or the University unless approved by the dean.

Registration is not complete until tuition and fees on the required installments are paid; therefore, the student should be prepared to make these payments during scheduled registration for each academic year. There may be adjustments in tuition and fees as economic conditions warrant.

On- and off-campus student housing
Students may go to <llu.edu/central/housing> for housing information and a housing application form.

Additional requirements
For additional policies, governing Loma Linda University students, see Section II of this CATALOG, as well as the University Student Handbook. Students are responsible for informing themselves of and satisfactorily meeting all regulations pertinent to registration, matriculation, and graduation.

Programs
• Bioethics — M.A. (p. 400), Certificate (p. 400)
• Chaplaincy — M.S.Chap. (p. 401)
• Denominational Studies for Chaplains — Certificate (p. 403)
• Religion and Society — M.A. (p. 404)

Bioethics — M.A., Certificate

Program director
Whitney Braun

The purpose of the Bioethics Program—an interdisciplinary course of graduate study leading to a Master of Arts degree—is to prepare qualified persons to engage in education, research, and service pertinent to the ethical issues in health care, biotechnology, and bioethics.

This degree is designed primarily for two types of students: those who desire the Master of Arts degree as a step toward graduate work at the doctoral level, and those who wish to acquire the degree in order to complement their careers in health care or another field.

This academic program is enhanced by its close association with the Center for Christian Bioethics and its 4,000-volume library, as well as close proximity to the LLU Medical Center and numerous physicians involved in clinical and research ethics.

Objectives
Graduates of the Bioethics Program will be able to demonstrate:
1. A broad knowledge of the field of bioethics.
2. Mastery of at least one area of bioethical inquiry.
3. Research and writing skills of a caliber to contribute to bioethical literature.
4. An understanding of the relationship among personal, professional, and social ethics.

Course requirements
In order to receive the Master of Arts degree in bioethics from Loma Linda University, the student will complete a minimum of 48 units of course work as herein specified, with an overall grade average of B+ (3.30) or higher, with no grade lower than a C; and with no grade lower than a B- in a required course.

Transfer credits
Students are permitted to transfer up to eight units of approved graduate-level courses from other accredited institutions into the Bioethics Program. Approval must be requested from the program director.

Special features
RELE 598 Master’s Seminar I: This capstone seminar reflects on previous class work and involves integration of conceptual presuppositions, ethical theories, and ethical principles. Mastery of a broad knowledge of the field through an examination will be assessed by the bioethics faculty. A two-part comprehensive exam will be administered at the end of Master Seminar I. (All program faculty members and students are invited to attend sessions they choose from these two seminars.)

RELE 599 Master’s Seminar II: Each student enters class with a research paper, likely prepared in an earlier course. With collegial critique, these papers are prepared for publication. Papers demonstrate the ability to identify an issue, analyze it, use relevant literature, and creatively conceptualize or advance the discussion. PStudent who are professionals are encouraged to write for their professional publications,
adapting relevant size and editorial considerations. Paper(s) will total 20-25 pages.

Certificate

The Bioethics Program certificate is designed to provide basic competence in bioethics to a health-care professional.

Admissions

In addition to Loma Linda University (p. 24) and School of Religion (p. 399) admissions requirements, the applicant must also complete the following requirements:

Typically, applicants will meet the following criteria for admission:

1. Minimal GRE percentile scores of 60 (verbal), 60 (analytical writing), and 35 (quantitative). In some professional programs (e.g., M.D. and D.D.S.), students and graduates need not take the GRE, although other requirements apply.

2. An undergraduate grade point average of B+ (3.30) or better in the overall program.

3. An 800-word essay on the applicant’s background and goals and how earning an M.A. degree in bioethics at Loma Linda University is envisioned to further such goals.

4. A personal interview.

5. Three letters of recommendation from current or former professors.

More important than any single admissions factor is the cumulative sense that the applicant is capable of and committed to serious academic work. Hence, the applicant might also submit an essay—published or from previous class work—that demonstrates creative, analytical thinking.

Information on admission, tuition, and student life and an online application can be found on the Web at <llu.edu/central/apply>.

Normal time to complete the program

One (1) year (three [3] academic quarters) based on full-time enrollment; part time permitted

Chaplaincy — M.S.Chap.

Program director

Angela Li

The Master of Science in Chaplaincy (M.S.Chap.) program is theological and clinical based chaplaincy education at Loma Linda University. It has been developed using guidelines established by the Association of Professional Chaplains (APC), which oversees and rigorously maintains “best practice” standards for the chaplaincy profession. It is designed to meet a variety of students’ needs, namely:

- It meets the APC full board certification academic requirement.
- It is a professional degree that blends theological study with clinical experience.
Admissions

In addition to Loma Linda University (p. 24) and School of Religion (p. 399) admissions requirements, the applicants to the M.S. in Chaplaincy Program are expected to:

- Provide an undergraduate record from a regionally accredited institution with a grade point average of B (3.0) or better in the overall program and in the major field.
- Writing samples: CV, personal statement, and previous research paper (qualitative or quantitative).
- Three letters of recommendation (two academic and one pastoral).
- Interview (faculty members in relational studies and a representative from the LLUMC CPE program).
- The 16pf® Questionnaire Assessment. Located at https://www.psionline.com
- One (1) unit of CPE highly preferred

Program requirements

Students must complete 108 quarter credits from the list below, with an overall grade point average of B or better, with no grade lower than C, and no grade lower than a B- in a core course.

RELT 540 World Religions and Human Health
RELT 555 The Adventist Experience
RELT 560 Jesus the Revealer: The Message of the Gospel of John
RELT 565 Vision of Healing: The Message of the Book of Revelation

Project
RELG 696 Project
Internship (12 units of RELG 795, listed below, count toward the 108 units required for ACP board certification) 12

Total Units 108

Internship
Internship units do not count toward minimum didactic units required for the degree.
RELG 795 Clinical Internship (12 units = 400 hours) 48

Total Units 48

Clinical internship
Students must also satisfactorily complete four (4) units of clinical pastoral education (CPE) at an accredited CPE Center—400 clinical hours consists of one (1) unit (1 unit consists of 10 weeks for an intensive unit or 16 weeks for an extended unit). Each registration of RELG 795 Clinical Internship earns one (1) unit of CPE required by the APC board for certification. Twelve (12) of the 48 internship units from one of the four CPEs can be counted toward both graduation and the APC board certification.

Project
When students have completed the majority of their course work and at least some clinical work, they must also be able to articulate, in written form, all chaplaincy competencies, as defined by the Association of Professional Chaplains (APC). This will be based on their theoretical understanding, reflection, and personal experiences.

Noncourse requirements
Annual Evaluation
Students will be evaluated on their academic and clinical competencies at the end of Spring quarters of their first and second years.

Dean’s Exit Interview
Graduate candidates are required to attend exit interviews with the Dean of the School of Religion during the Spring quarter of their graduation year.

Normal time to complete the program
Three (3) years (11 consecutive academic quarters)—based on full-time enrollment; part time enrollment is permitted.

Denominational Studies for Chaplains – Certificate

Program director
Jon Paulien

Students are encouraged to inquire regarding admissions.

The fully online Denominational Studies for Chaplains Program is designed for practicing chaplains who lack academic course work in Adventist doctrine and who desire endorsement from the Adventist Chaplaincy Ministries (ACM) department of the General Conference of Seventh-day Adventists. This certificate will satisfy the denominational studies requirement.

The development of this certificate has been a collaborative effort between Loma Linda University and Loma Linda University Medical Center Chaplains Department, in consultation with ACM.

This certificate is a response to the stated need of ACM for denominational education that includes the following four areas:

1. Seventh-day Adventist history and heritage;
2. Seventh-day Adventist doctrines, beliefs, and practices;
3. Seventh-day Adventist perspectives on Daniel and Revelation and how they inform the issues of suffering and pain; and
4. Seventh-day Adventist health, wellness, and lifestyle issues.

Teaching methodology
The education model designed for this academic certificate will be through distance learning online modalities that use Canvas as its learning management system (LMS).

This certificate is a two-year program in which all courses and learning occur via the LMS. The learning activities for each course facilitate opportunities for personal growth via the online, class-driven learning activities. Students can begin the program in any given quarter and are expected to follow the course requirements as they are offered, one per quarter in a continual sequence. The program includes an individual report, preparation and presentation of a portfolio, and an exit interview—all conducted via the LMS and facilitated by video conference communication technology.

Program learning outcomes and performance
By the end of this program, the graduate should be able to:

1. Explain Adventist theological uniqueness and the biblical foundations of its doctrines.
2. Demonstrate competent use of Scriptures.
3. Explain Christian theology and history, with specific attention to Seventh-day Adventist life and thought.
4. Integrate Adventist doctrines into his or her ministry and as a representative of the Seventh-day Adventist Church.
5. Synthesize individual Adventist versions philosophies of ministry within the health-care setting.

Transfer credits
No transfer units are accepted for the Denominational Studies for Chaplains Program.

Admissions
In addition to Loma Linda University (p. 24) and School of Religion (p. 399) admissions requirements, the applicants to the Denominational Studies for Chaplains Program are expected to present/complete:

1. A college baccalaureate degree from an accredited institution.
2. A minimum overall undergraduate grade point average of 3.00. A provisional acceptance for eight units will be granted to those with a
program requirements

In order to receive the certificate in denominational studies for chaplains from Loma Linda University, a student must complete all courses listed below, with an overall grade point average of B (3.0) or higher, with no grade lower than a B- (2.7). No electives are offered.

Normal time to complete the program

Two (2) years (eight [8] academic quarters) based on less than half-time enrollment.

Religion and Society — M.A.

Program director

Zane Yi

The Master of Arts degree in Religion and Society, offering customizable options of study, is designed for those seeking to serve the church and world in the 21st century in a variety of capacities. The program is ideal for individuals seeking deeper biblical, theological, and philosophical insight, spiritual growth, practical competency, and cultural literacy in the context of a range of vocational settings—health care, the local church (non-ordained ministry), non-profit organizations, secondary education (teaching certifications must be obtained independently), and further graduate study.

Students may complete this program prior to beginning professional or graduate school. Students enrolled or enrolling in other LLU programs may be interested in pursuing it as a dual-degree option. Others may seek to complement already completed courses of study.

The curriculum covers the basic areas of theology, biblical studies, and Christian spirituality, and can also be customized around a particular area of interest. Using the resources of the School of Religion and the entire university, each student and his or her mentor will formulate and acquire faculty approval for a personalized area of emphasis that matches his or her interests and qualifications. Possible areas of emphases include:

- Biblical studies
- Christian theology
- Science and religion
- Health care
- Wholeness/whole person care
- Spirituality
- Social ethics
- Bioethics

Students may progress through the program at their own pace (up to five years maximum). All students must have a demonstrated proficiency with technology and have access to personal computers and the Internet.

Professors in the program represent areas of expertise such as biblical studies, theology, philosophy, world religions, practical theology, marriage and family therapy, cultural psychology, American church history, health education, nursing, spiritual care, and ethics. This diversity of specialists provides students with a rich and balanced program of study.

A mutual and shared respect for various cultures and beliefs is emphasized on the campus and in the classroom. Small class sizes allow for specified instruction and personal growth.

The program draws upon resources from across the Loma Linda University campus. These include the Center for Spiritual Life and Wholeness, the Center for Christian Bioethics, and the Center for Understanding World Religions that offer multiple programs, conferences, and lecture series intended for student enrichment.

Mentors

As soon as possible, but before the student has completed half of the program, the program’s administrative committee will link the student to a mentor who will provide support and guidance. Until then, the program director will mentor the student.

Program learning outcomes

By the end of this program, the graduate should be able to:

1. Responsibly interpret the Bible in an increasingly scientific, globalized, and pluralistic society.
   a. analyze major themes of Old Testament theology.
   c. apply basic principles of exegesis and hermeneutics to the Bible.
2. Assess Christian reflection and praxis as it engages with culture(s).
   a. identify core tenants of classical, Christian theology from a Seventh-day Adventist perspective.
   b. evaluate models of the relationship between church and culture.
   c. analyze one instance of cultural/theological contextualization and preservation.
3. Demonstrate a broad, basic knowledge of the field of ethics.
   a. compare major schools of normative ethics—deontological, consequentialist, and virtue.
   b. articulate ethical emphases in Christian Scripture.
   c. address a contemporary ethical issue utilizing Christian Scripture.
4. Demonstrate growth in spiritual maturity.
a. develop a personal theology of wholeness.
b. engage in practices that help attune one’s self to the spiritual meaning of everyday activities.
c. recognize a commitment to community involvement and service as a crucial component of wholeness.

Periodic review
In addition, each student’s achievements will be assessed every 12 units to determine the advisability of his or her continuing in the program.

Prerequisite
There are no prerequisites for this program, however, those who enter having taken few or no courses in religion must structure their programs considering the requirements. The opposite will be true for those who enter the program after having extensively studied religion but not the other subject(s) they desire to explore.

Core courses
Four of this program’s 12 courses are required: RELT 501, 502, 503; and RELG 696. The religion in science cluster—RELT 501 Religion and Society, RELT 502 Religion and Society, and RELT 503 Religion and Society—which may be taken in any sequence, provides intensive introductions to the field. One course is offered each quarter during the academic school year, and a course may be offered also in the summer. The fourth required course is the final project (RELG 696 Project). These four, four-unit courses, totaling 16 units, constitute one-third of the program. The remaining eight courses, totaling 32 units and two-thirds of the program, are selected by the student and approved by the administrative committee.

Transfer credits
Students are permitted to transfer up to eight units of approved graduate-level courses from other accredited institutions into the Religion and Society Program.

Admissions
In addition to Loma Linda University (p. 24) and School of Religion (p. 399) admissions requirements, the applicants to the M.A. in Religion and Society Program are expected to present/complete:

- A bachelor’s degree from an accredited institution. An undergraduate degree in religion is not required.
- An overall undergraduate Grade Point Average (G.P.A.) of at least 3.25.
- Acceptable scores in an approved standardized test such as the Graduate Record Exam (GRE), Medical College Admissions Test (MCAT) or Law School Admissions Test (LSAT).
- An essay (1,000 words) that specifies why the applicant is interested in this program, relevant background experiences, and how the program fits into personal and professional plans.
- An interview.
- Three letters of recommendation from previous teachers.

In addition to these considerations, acceptance into this program depends upon whether, at the time the student wishes to study, the School of Religion’s resources and his or her interests and goals overlap enough to make it a mutually beneficial experience.

Provisional Admission
A student who is promising, even though he or she does not meet one or more of the admission requirements, might be given a provisional acceptance for up to 12 units of study after which the administrative committee will determine whether or not he or she will be permitted to continue.

Program requirements
In order to receive the Master of Arts in Religion and Society, the student will complete a minimum of 48 units of course work as herein specified, with an overall grade point average of B+ or better, and no core course lower than a B.

Total Units 48

Areas of Emphasis
These are approved clusters of courses that focus on an area of student interest. Twelve units may be taken either at the School of Religion or elsewhere on campus, with approval.

Individualized program proposal
Before completing half of the program (24 units), with the mentor, the student will submit an individualized program for approval to the administrative committee. This will detail courses and other experience that will fulfill the degree’s requirements as well as establish the acceptable area of emphasis.

Noncourse requirements
Final Thesis
Within the contours of what is appropriate for Master of Arts degrees, the final thesis is to make an original contribution. It can be a major paper reporting on significant literary, historical, social science, laboratory or field research. The paper’s acceptability is determined by the administrative committee.

Normal time to complete the program
Two (2) years (six [6] academic quarters) based on full-time enrollment; part time permitted.
FACULTY OF GRADUATE STUDIES

Interim Director’s welcome

We are very pleased that you have chosen to continue your education at Loma Linda University in a graduate program coordinated by the Faculty of Graduate Studies (FGS). The FGS is an organization of scholars, scientists, and educators whose mission is to enhance the quality of research, scholarship, and discovery throughout the University. It cooperates with the eight schools in providing graduate programs that strive to meet the highest academic and intellectual standards.

Loma Linda University is a health sciences campus dedicated to creating learning environments that enable students to develop personal wholeness; to train for careers that serve local, national, and international communities; and to accept every person as having equal worth in the sight of God. Its mission is embodied in the Good Samaritan sculptures, a tableau that occupies a central position on the campus.

The FGS encourages students to engage in original research and creative study that will expand opportunities for wholeness, service, and mutual respect. You will find vigorous academic programs among the degrees sponsored by the Faculty, studies that will stretch your mind and that will encourage you to expand the boundaries of knowledge, understand your world, and apply Christian principles to your life and profession.

Our faculty and staff are here to assist you as you prepare for a career of creative service. Feel free to contact us by e-mail at graduatestudies@llu.edu.

Ronald Carter, Ph.D.
Provost and Interim Director, Faculty of Graduate Studies
Foundations of graduate study

Recognizing the need to provide advanced education, the College of Medical Evangelists (CME) organized its School of Graduate Studies in 1954. The new school conferred a Ph.D. degree in 1958—the first Ph.D. to be awarded by a Seventh-day Adventist institution of higher education.

In 1961 when CME became Loma Linda University, the University assumed oversight of the graduate education conducted by La Sierra College in Riverside, California. By 1963, the School of Graduate Studies had been renamed the Graduate School—with a home in a new building, named Frederick Griggs Hall in honor of a former department chair. The two campuses comprising Loma Linda University—La Sierra and Loma Linda—were separated in 1990.

In 2005, the Graduate School was restructured as the FGS. Since then, the FGS has continued to provide oversight of graduate programs, supported by other schools of the University; promote and encourage independent judgment, mastery of research techniques, and contribution to scholarly communication; and relate intellectual achievements to the service of humankind.

Philosophy

In the FGS of Loma Linda University, the essential concern of both faculty and students is the quest for meaning. Because this quest is served by knowledge, graduate students are obliged to achieve both broad and detailed mastery of their fields of study. They also participate with the faculty in the process by which knowledge is augmented.

Objectives

The FGS attempts to create an environment favorable to the pursuit of knowledge and meaning by:

1. Making available to graduate students who wish to study in a Seventh-day Adventist Christian setting the education necessary for scholarly careers in the sciences and the health professions.
2. Encouraging development of independent judgment, mastery of research techniques, and contribution to scholarly communication.
3. Relating intellectual achievement to the service of humankind.

General regulations

Students of the University are responsible for informing themselves of and satisfactorily meeting all regulations pertinent to registration, matriculation, and graduation. Section III gives the general setting for the programs of each school. The subject and unit requirements for admission to individual professional programs are also outlined in this section. It is important to review specific program requirements in the context of the general requirements applicable to all programs (Section II).

Application and admissions

The program admissions committees of the University intend that an applicant to any of the schools is qualified for the proposed curriculum and is capable of profiting from the educational experience offered by this University. The admissions committees of the schools accomplish this by examining evidence of scholastic competence, moral and ethical standards, and significant qualities of character and personality. Applicants are considered for admission only on the recommendation of the program in which study is desired.

Scholarship

Applicants are expected to present an undergraduate record with a grade point average of B (3.0) or better in the overall program and in the major field. Some students with an overall grade point average between 2.5 and 3.0 may be admitted provisionally to graduate standing, provided the grades during the junior and senior years are superior or other evidence of capability is available. International applicants are not eligible for provisional admission.

From master's to Ph.D. degree

Bypassing master's degree

A graduate student at this University may proceed first to a master's degree program. If at the time of application the student wishes to qualify for the Doctor of Philosophy degree program, this intention should be declared even if the first objective is to earn a master's degree.

If after admission to the master's degree program a student wishes to go on to the doctoral degree program, an application form should be submitted, along with letters of reference, to the dean(s) of the respective school(s). If the award of the master's degree is sought, the student will be expected to complete that degree before embarking on doctoral activity for credit. A student who bypasses the master's degree may be permitted, on the recommendation of the guidance committee and with the consent of the dean, to transfer courses and research that have been completed in the appropriate field, and that are of equivalent quality and scope, to his/her doctoral program.

Student life

The information on student life contained in this CATALOG is brief. The Student Handbook—which more comprehensively addresses University and school expectations, regulations, and policies—is available to each registered student. Students need to familiarize themselves with the contents of the Student Handbook. Additional information regarding policies specific to a particular school or program within the University is available from the respective school.

Academic information

Students are responsible for informing themselves of the policies and regulations pertinent to registration, matriculation, and graduation; and for satisfactorily meeting these requirements.

Financial information

Registration is not complete until tuition and fees on the required installment are paid; therefore, the student should be prepared to make these payments during scheduled registration for each academic year. There may be adjustments in tuition and fees as economic conditions warrant.

General financial practices

The student is expected to arrange for financial resources to cover all expenses before the beginning of each school year. Previous accounts with other schools or this University must have been settled.

On- and off-campus student housing

Students may go to <llu.edu/central/housing> for housing information and a housing application form.
Additional requirements
For additional policies governing Loma Linda University students, see Section II of this CATALOG, as well as the University Student Handbook. Students are responsible for informing themselves of and satisfactorily meeting all regulations pertinent to registration, matriculation, and graduation.

Degrees overseen by the Faculty of Graduate Studies
— The Faculty of Graduate Studies oversees the following doctoral and master’s degrees, as well as combined degrees programs.

Master’s degrees
• Anatomy — M.S. (p. 282)
• Biology — M.S. (p. 265)
• Bioethics — M.A. (p. 400)
• Cancer, Developmental, and Regenerative Biology — M.S. (p. 253)
• Endodontics — M.S. (p. 230)
• Geology — M.S. (p. 277)
• Implant Dentistry — M.S. (p. 233)
• Infection, Immunity, and Inflammation — M.S. (p. 256)
• Neuroscience, Systems Biology, and Bioengineering — M.S. (p. 259)
• Nutrition — M.S. (p. 386)
• Oral and Maxillofacial Surgery — M.S. (p. 234)
• Orthodontics and Dentofacial Orthopedics — M.S. (p. 235)
• Pediatric Dentistry — M.S. (p. 237)
• Periodontics — M.S. (p. 238)
• Prosthodontics — M.S. (p. 239)
• Religion and Society — M.A. (p. 404)

Doctoral degrees
• Anatomy — Ph.D. (p. 282)
• Biology — Ph.D. (p. 265)
• Cancer, Developmental, and Regenerative Biology — Ph.D. (p. 254)
• Earth Science — Ph.D. (p. 269)
• Epidemiology — Ph.D. (p. 391)
• Infection, Immunity, and Inflammation — Ph.D. (p. 257)
• Medical Scientist Training Program — M.D./Ph.D. (p. 289)
• Neuroscience, Systems Biology, and Bioengineering — Ph.D. (p. 260)
• Nursing — Ph.D. (p. 348)
• Nutrition — Ph.D. (p. 394)
• Physical Therapy — D.Sc. (p. 116), Ph.D. (p. 117)
• Psychology (clinical psychology) — Ph.D. (p. 175)
• Rehabilitation Science — Ph.D. (p. 61)
• Social Policy and Social Research — Ph.D. (p. 186)
• Systems, Families and Couples — Ph.D. (p. 172)

Combined degrees programs
• Psychology with Bioethics (Ph.D./M.A., Psy.D./M.A. (p. 410.))
• Social Welfare and Social Research with Bioethics (Ph.D./M.A. (p. 417))
THE COMBINED DEGREES PROGRAMS OF THE UNIVERSITY

A number of combined degrees programs are offered—each intended to provide additional preparation in the biomedical sciences or in the clinical, professional, or basic areas related to the student’s field of interest. The combined degrees programs provide opportunities for especially well-qualified (G.P.A. of 3.5 or higher) and motivated students to pursue professional and graduate education; and to prepare for careers in clinical specialization, teaching, or investigation of problems of health and disease in humans.

For admission to a combined degrees program, each student must have a baccalaureate degree and must already be admitted to the schools offering his or her chosen combined degrees program.

Students may be required to interrupt their professional study for two or more years (as needed) for courses and research for the graduate degrees sought.

The student’s concurrent status is regarded as continuous until the program is completed or until discontinuance is recommended. The usual degree requirements apply.

Interested and qualified students may choose from the formally combined degrees programs identified below or from informal concurrent programs. Students wanting to pursue informal concurrent degree programs must be granted permission by the director of the primary program in order to proceed with their requests. Formal requests are required to adhere to the policy on concurrent graduate degree programs. Final permission for an informal concurrent degree program must be obtained from the appointed subcommittee of the provost.

If a student chooses to withdraw from one program at any time, he or she must meet all requirements for the remaining degree. A student who decides to return to the second program after having completed the first program, must reapply, be admitted, and fulfill all requirements for the second degree.

Programs

For convenience in locating a combined degrees program, some programs are listed twice—the second time with the program names reversed—e.g., Criminal Justice with Social Work and Social Work with Criminal Justice. Combined degrees programs that must be entered in a specified order are listed only once. For example, a master’s degree student in bioethics cannot choose to add pharmacy (Pharm.D.), but a pharmacy student can choose to add the M.A. degree in bioethics. Such programs list the primary degree program first.

Counseling—BH with Marital and Family Therapy—BH with School Counseling—BH M.S./M.S./Certificate (p. 409)
Criminal Justice—BH with Social Work—BH M.S./M.S.W. (p. 418)
Dentistry—SD with Bioethics—SR D.D.S./M.A (p. 411)
Gerontology—BH with Social Work—BH M.S./M.S.W. (p. 419)
Marital and Family Therapy—BH with Counseling—BH with School Counseling Certificate—BH M.S./M.S./Certificate (p. 409)
Medical Scientist—SM M.D./Ph.D. (p. 289)
Medicine—SM with Bioethics—SR M.D./M.A. (p. 412)
Medicine—SM with Religion and Society—SR M.D./M.A. (p. 413)
Oral and Maxillofacial Surgery—SD with Medicine—SM Post-D.D.S. specialty certificate/M.D. (p. 413)
 Pharmacy—SP with Bioethics—SR Pharm.D./M.A. (p. 415)
Pharmacy—SP with Health Informatics—AH Pharm.D./M.S. (p. 416)
Social Work—BH with Criminal Justice—BH M.S.W./M.S. (p. 418)
Social Work—BH with Gerontology—BH M.S.W./M.S. (p. 419)

Counseling — M.S. with Marital and Family Therapy — M.S. with School Counseling — Certificate

Graduates of this dual-degree with certificate program receive a master’s degree in Counseling, a master’s degree in Marital and Family Therapy, and a School Counseling Certificate that allows them to apply for the Pupil Personnel Services credential within the state of California. Completion of the program requires a minimum of three years of full-time attendance. The 119-unit curriculum provides a mix of academic, experiential, and research activities essential for practice as a Clinical Counselor, Marriage and Family Therapist, and School Counselor.

Students with the dual degree have licensure options providing maximum flexibility. Graduates of this program are qualified to (a) sit for national Counseling licensure as well as the California-specific LPC license (b) sit for MFT licensure in California and obtain MFT licensure around the country with fewer requirements given our program's COAMFTE accreditation. Additionally, graduates are qualified to receive the Pupil Personnel Services certificate within the state of California.

Admissions

Applicants must meet the admission requirements for each program: M.S. degree in counseling (p. 158), and M.S. degree in marital and family therapy (p. 163).

Program requirements

Students must maintain a grade point average of 3.0 on a 4.0 point scale (or a letter grade of B) in order to progress successfully though the program and complete the degree. In addition, students must meet the knowledge, skills, and professional performance competencies outlined by the program.

A grade of B or better indicates that a student has mastered the knowledge, skill, and professional practice performance competencies outlined by the program. In order to progress successfully and complete the degree, students must meet both course and cumulative G.P.A. standards. The University allows students to repeat two courses per
Courses applicable to both degrees:

- COUN 682 | Clinical Counseling Practicum and Seminar 2             | 5     |
- COUN 691 | Process Approaches to Counseling and Psychotherapy     | 2     |
- COUN 692 | Cognitive Approaches to Counseling and Psychotherapy   | 2     |
- COUN 693 | Systemic Approaches to Counseling and Psychotherapy    | 2     |

**School counseling certificate:**

- COUN 574 | Educational Psychology                                 | 3     |
- COUN 679 | Professional School Counseling                         | 3     |
- COUN 681 | School Counseling Practicum and Seminar 3              | 2     |

**Total Units:** 119

1. Course applies to School Counseling Certificate (13 units).
2. Course taken 5 times for a total of 5 units.
3. Course taken twice for a total of 2 units.

### Clinical hours

In addition to the above, students are required to meet Board of Behavioral Sciences (BBS), Commission On Accreditation for Marriage and Family Therapy Education (COAMFTE), and Commission on Teacher Credentialing minimum clinical hour requirements for graduation.

Clinical hours overlap and can count for both degrees and certificate, in consultation with the Directors of Clinical Training.

At graduation, total student hours will range from 650 – 700 depending on population served while in clinical placement.

### Marital and family therapy (500 hours)

- MFAM 731 | Clinical Training                                      | 6     |
- MFAM 732 | Clinical Training                                      | 9     |

**Counseling (450 hours)**

- COUN 791 | Clinical Counseling Field Experience (LPCC)            | 3     |
- COUN 792 | Clinical Counseling Field Experience (LPCC)            | 3     |
- COUN 793 | Clinical Counseling Field Experience (LPCC)            | 3     |

**School counseling certificate (600 hours)**

- COUN 781 | School Counseling Field Experience (PPS)               | 4     |
- COUN 782 | School Counseling Field Experience (PPS)               | 4     |

### Normal time to complete the program

3.67 years (11 academic quarters) based on full-time enrollment; part time permitted

**Bioethics—M.A. with Psychology — Psy.D. or Ph.D.**

*Program director, Bioethics*

Whitny Braun

*Chair, Department of Psychology*

David Vermeersch

Closed to admissions for the 2019/2020 academic year.
Faculty
The faculty for the combined degrees Bioethics with Psychology Program is drawn from the School of Religion and from the Department of Psychology in the School of Behavioral Health.

The program
This program combines study for the M.A. degree in bioethics (offered by the School of Religion) with either the Psy.D. or Ph.D. degree in psychology (offered by the Department of Psychology of the School of Behavioral Health). The purpose of the combined degrees program is to facilitate more efficient completion of graduate programs in ethics and psychology for the student interested in both areas. Students who complete the program should be prepared to make significant interdisciplinary contributions to the fields of psychology and ethics. To enter this combined degrees program, students must gain acceptance into both the M.A. degree in ethics curriculum and to a doctoral degree in psychology. Admission information is available at the School of Behavioral Health.

Course requirements
Students in this combined degrees program will complete requirements with greater efficiency by taking a number of courses that fulfill requirements for both degrees. Approval for selective courses should be sought from both program advisors.

M.A. curriculum
A total of 48 quarter units is required for the M.A. degree. The following courses constitute the core requirements for students completing the M.A. degree in bioethics when taken with psychology as part of the combined degrees program:

Psychology—Ph.D. or Psy.D. curriculum
Students completing one of the doctoral curricula in psychology will complete all of the course requirements as listed in the School of Behavioral Health. (See Psychology Program for full information.)

Dentistry — D.D.S. with Bioethics — M.A.

Program director, Bioethics, School of Religion
Whitny Braun

Program coordinators, School of Dentistry
Mark Estey, DDS

Faculty
The faculty for the combined degrees program in Bioethics with Dentistry is drawn from Loma Linda University’s Schools of Religion and Dentistry.

Admissions
Students are selected through a competitive process led by the School of Dentistry in conjunction with the School of Dentistry’s Bioethics Program. Selection is based upon the recommendation of the School of Dentistry’s academic dean and dean of students and standard admission criteria for the M.A. degree in bioethics. DAT scores are accepted in lieu of the GRE.

The program
The combined degrees Bioethics with Dentistry Program is designed to fit the schedule of D.D.S. degree students. Ethics in dentistry is well-established at Loma Linda University. Loma Linda University’s School of Dentistry is one of a select few dental schools in the nation known for expertise in ethical issues.

An M.A. degree in bioethics taken as a stand-alone degree requires 48 units. However, the M.A./D.D.S. combined degrees reduce the total units required by 12 units in the following manner:

1. The eight units earned from the following four, two-unit courses in the dental curriculum can be counted for credit toward the M.A. degree in bioethics: a) RELR 717 Diversity and the Christian Health Professional, b) DNES 794 Public Health Dentistry, c) RELR 715 Christian Dentist in Community, and d) DNES 851 The Dentist and the Law. In order for these eight units to be counted toward the M.A. degree, the student must submit a supplemental eight-page paper that integrates the content of these four courses and relates the content to bioethics. These four courses have sufficiently similar content to bioethics that they warrant being applied to both the D.D.S. and the M.A. degree in bioethics, once the supplemental paper is approved.

2. Four units come from the deletion of RELR 734 Christian Ethics for Dentists from the combined degrees student’s curriculum because its content is substantively duplicated in the Bioethics Program; and the deletion of a two-unit religion elective from the dental curriculum, which will now be taken in the bioethics selectives.
M.A. degree requirements

The following courses from the D.D.S. curriculum will be counted double for the M.A. degree in bioethics once the supplemental papers, noted above, are approved.

Medicine — M.D. with Bioethics — M.A.

Program director, Bioethics, School of Religion
Whitney Braun

Program liaison, School of Medicine
Henry H. Lamberton

Faculty
The faculty for the combined degrees Bioethics with Medicine Program is drawn from Loma Linda University’s School of Religion and School of Medicine.

Admissions
Students are selected through a competitive process led by the School of Medicine in conjunction with the Bioethics Program. Selection is based upon the standard admission criteria for the M.A. degree in bioethics minus the GRE because the MCAT includes a critical-thinking component.

The program
An M.A. degree in bioethics taken as a stand-alone degree requires 48 units in bioethics courses. However, the M.A./M.D. combined degrees student is able to reduce the total units required by sharing 18 units between the two programs in the following manner.

1. 12 units from three courses in the medical curriculum count as credit toward the M.A. degree in bioethics: a) MDCJ 538 Medical Neuroscience, b) PSYT 526 Psychopathology, and c) PRVM 517 Lifestyle and Preventive Medicine. Acceptance of these courses for M.A. degree credit requires an integrative, supplemental eight-page paper that relates the courses’ content to bioethics. The rationale: These three courses in medicine have sufficiently relevant content to bioethics that they academically warrant being applied to the M.A. degree in bioethics requirements.

2. 4 units come from three School of Religion courses: a) RELE 704 Medicine and Ethics, b) RELE 714 Advanced Medical Ethics, and c) the deletion of one RELT course from the medical student’s combined degrees curriculum because its content is substantively duplicated in the Bioethics Program. (Students are informed of the combined degrees option at the beginning of their freshman year and are encouraged not to take RELE 704 Medicine and Ethics during Autumn Quarter if they are contemplating the combined degrees program. The School of Medicine’s determination about student acceptability for the combined degrees program can be made immediately after Autumn Quarter grades are posted.)

M.A. degree requirements
The following courses from the M.D. curriculum will be double counted for the M.A. degree in bioethics once the supplemental papers, noted above, are approved.

Medicine — M.D. with Religion and Society — M.A.

Program director, Religion and Society, School of Religion
Zane Yi

Program liaison, School of Medicine
Henry H. Lamberton

Faculty
The faculty for the combined degrees Religion and Society with Medicine Program is drawn from Loma Linda University’s Schools of Religion and Medicine.

Admissions
Students are selected through a competitive process led by the School of Medicine in conjunction with the Religion and Society Program in the School of Religion. Selection is based upon standard admission criteria for the M.A. degree in religion and society minus the GRE since the MCAT includes a critical-thinking component. Scholarship opportunities are available, please contact program directors for details.

The program
The program is designed for physicians seeking to serve the church and world in the 21st century and ideal for the medical professional seeking deeper biblical, theological, and philosophical insight, spiritual growth, practical competency, and cultural literacy. The curriculum covers the basic areas of theology, biblical studies, and Christian spirituality, and can also be customized around a particular area of interest.

An M.A. degree in religion and society taken as a stand-alone degree requires 48 units in religion and related courses. However, the M.D./M.A. combined degree student is able to reduce the total units required by sharing units between the two programs in the following manner.

First, Second, & Third Years

Oral and Maxillofacial Surgery — Certificate with Medicine — M.D.

The M.D./OMS program is designed to provide an opportunity for qualified dentists to obtain the Doctor of Medicine degree in a customized three-year period. Clinical surgical health-care delivery is emphasized. The content of the program conforms to the Standards of the Commission on Dental Accreditation and is designed to prepare the surgeon for certification by the American Board of Oral and Maxillofacial Surgery. Oral and maxillofacial surgery residents begin their residency program on the OMS service. They subsequently enter the second-year class at Loma Linda University School of Medicine with advanced standing. The residents then complete the second, third, and fourth years of medical school. The fifth year of the OMS residency consists of a full ACGME accredited postgraduate transitional year composed primarily of
general surgery rotations. During the final year, s/he functions as chief resident.

**Application process**

Application for admission should be submitted to the School of Dentistry by October 15 of the year prior to the summer of intended enrollment. The School of Dentistry participates in the Post Doctoral Application Service. Applicants are recommended to the School of Medicine for consideration in the six-year OMS program.

**Tuition**

Students in the OMS program with the School of Medicine are charged tuition and fees for the first two and one-half years of the program; tuition for the remaining years is waived.

Total Units 266

Pharmacy — Pharm.D. with Bioethics — M.A.

Program director, Bioethics, School of Religion
Whitney Braun

Program director, School of Pharmacy
Michael D. Hogue

Faculty
The faculty of the M.A./Pharm.D. combined degrees program is primarily drawn from Loma Linda University’s School of Pharmacy and School of Religion.

Admissions
Students are selected through a competitive process led by the School of Pharmacy in conjunction with the Bioethics Program. The School of Pharmacy academic dean recommends students, triggering a streamlined admissions process of the M.A. degree in bioethics. HSRT scores are accepted in lieu of the GRE for pharmacy students.

The program
The M.A./Pharm.D. combined degrees program is designed to fit the schedule of Pharm.D. students. Loma Linda University has been a leader in bioethics education for health-care professionals for nearly half a century. The School of Pharmacy places a high premium on moral values and is a pioneer as one of the very few pharmacy schools in the nation to offer a Pharm.D./M.A. combined degrees program.

An M.A. degree in bioethics taken as a stand-alone degree requires 48 units in bioethics courses. But the M.A./Pharm.D. combined degrees student is able to double count 25 units of the needed 48 units as follow:

1. Eight (8) units come from three courses in the pharmacy curriculum that are counted for M.A. degree in bioethics credit: a) RXSA 555 Epidemiology and Public Health, b) RXSA 547 Pharmacy Law, and c) RXSA 751 Social-Behavioral Aspects of Pharmacy Practice.

2. Eight (8) units come from the substitution of three School of Religion courses in the Pharm.D. curriculum with courses in the Bioethics Program because their content is duplicated.

3. Nine (9) units of additional credit come from three electives in bioethics taken by Pharm.D. students.

M.A. degree requirements

1 To be taken concurrently with RELE 524 Bioethics and Society. Contact program director for details.
Pharmacy – Pharm.D. with Health Informatics – M.S.

The School of Pharmacy will interview pharmacy students who express interest in the M.S. degree in health informatics. An online admission application for the program is required to facilitate enrollment, but the School of Pharmacy grants formal approval.

The deadline for submitting the application is June 1 of each year; decisions will be made by July 1 of each year. Selection will be based on the following criteria:

- For pharmacy students starting in the second year—
  - Minimum G.P.A. of 3.5 or ranked at the top 10 percent of the class
- For pharmacy students starting in the first year—
  - Minimum G.P.A. of 3.5 or ranked at the top 10 percent of the class
  - Evidence of past course work in informatics

Total Units: 219.5

1 Fulfills AHRM 514 Biostatistics for M.S. degree in health informatics.

Normal time to complete the program
Four (4) years (13 academic quarters), full-time enrollment required

Social Welfare and Social Research — Ph.D. with Bioethics — M.A.
Closed to admission for the 2019-2020 academic year.

Program director, Bioethics
Whitney Braun

Program director, Social Welfare and Social Research, Department of Social Work and Social Ecology
Larry Ortiz
Closed to admission for the 2019-2020 academic year.

Faculty
The faculty for the combined degrees—Bioethics with Social Welfare and Social Research Program is drawn from the School of Religion and from the Department of Social Work and Social Ecology in the School of Behavioral Health.

Purpose of the program
The purpose of the M.A./Ph.D. combined degrees—Bioethics with Social Welfare and Social Research Program is to facilitate an integrated and more efficient completion of two graduate degrees for students with strong interests in both bioethics and social policy. Students who complete this combined degrees program will be prepared to make significant interdisciplinary contributions to the field of social policy and ethics. Individuals working in the area of social policy must be able to undertake and publish research on social problems. This requires the ability to apply ethical theory to real-world policy scenarios. Graduates will be able to provide leadership to the social policy arena by conducting interdisciplinary research on various issues and agendas that have significant moral implications.

Admissions
To enter the proposed program, students must gain separate acceptance to both graduate programs. The Social Policy and Social Research Program director recommends students. This recommendation triggers a streamlined admissions process for the M.A. degree in bioethics.

Course work requirements
If an M.A. degree in bioethics is taken as a stand-alone degree, the requirement is 48 units. However, the M.A./Ph.D. combined degrees student is able to double count 13 of the needed 48 units. Specific courses are identified by footnote 1.

To the extent possible, research projects in both programs focus on the interface of ethics and social policy.

Ethics core
RELE 524 Bioethics and Society 3
RELE 545 Bioethics Case Conference I 1
RELE 589 Biblical Ethics 3
RELE 598 Master's Seminar I 3
RELE 599 Master's Seminar II 2
RELE 699 Directed Study 1

SPOL 613 Social Science Concepts I 3
Social Work — M.S.W. with Criminal Justice — M.S.

Program directors
Kimberly Freeman

Loma Linda University’s motto, “To make man whole,” provides a powerful and much-needed context in integrated practice. Both social work and criminal justice—within a behavioral health framework—emphasize recovery, healing, and restoration.

A multidisciplinary approach considers the biological, psychological, social, and spiritual well-being of victims, offenders, and communities; and provides a deeper understanding of crime and the struggle of the modern criminal justice system in a behavioral health context. The combined degrees program offers a unique opportunity for individuals interested in working in settings such as mental health court, detention centers, forensic inpatient programs, and forensic outpatient behavioral health systems.

Mission
The mission, program goals, and objective build on elements from the M.S.W and M.S. in criminal justice degrees. Please refer to each of these programs for this content.

General overview
The combined M.S.W./M.S. in criminal justice program is a seven-quarter, full-time curriculum that begins with the social work core course work required for all students. Course work during the first year of study includes the generalist practice curriculum, which is grounded in the liberal arts and the person-in-environment framework. Within this framework, students learn to promote social well-being and build on the strength and resiliency of all human beings through a range of prevention and intervention practice methods when working with diverse individuals, families, groups, organizations, and communities. During their second year, students complete a clinical practice specialization along with specialized courses and practicum in forensic behavioral health. Students choosing this area will focus on the needs of individuals in the criminal or juvenile justice systems who experience severe mental illness and who may also present with co-occurring substance use. Students will gain knowledge and skills in treatment programming. In addition, students will be prepared to assess and provide expert testimony regarding continued institutionalization versus readiness for community treatment.

Students gain knowledge and skills in treatment programming within a forensic mental health framework. This context prepares students to assess and provide expert testimony regarding continued institutionalization versus readiness for outpatient psychosocial rehabilitation, including the development and implementation of recovery and resiliency informed treatment plans. An integrated practicum and seminar class in criminal justice typically begins in the Summer Quarter of the second year.

The combined degrees emphasize a thoughtful reflection about integrated issues in both social work and criminal justice that provides students with a deeper understanding of practice issues affecting the field.

Liberal arts preparation
M.S.W. and criminal justice curricula are built on a liberal arts perspective. Individual applicants whose undergraduate degree does not reflect this perspective may be asked to enroll in additional courses, which must be completed before advancement to candidacy (prior to beginning the advanced curriculum).

Unit values are stated as quarter units. Content from multiple courses may be used to meet most requirements.

Program options
Alternate program options have been designed to address the varying needs of students, namely: a full-time, two-year option; a three-year, part-time option; and a four-year, part-time option.
Admissions
Admission requirements
Students wishing to take the dual degree must be admitted to both the M.S.W. (p. 190) and the M.S. in Criminal Justice (p. 183) programs separately. Applicants should refer to the admissions criteria for each program.

Program requirements
The 90-unit curriculum for the M.S.W. and M.S. degrees in Criminal Justice provides a mix of academic, experiential, and research activities essential for practice.

Students must maintain a grade point average of 3.0 on a 4.0 scale (or a letter grade of B) in order to progress successfully through the program and complete the degree. In addition, students must meet the knowledge, skills, and professional performance competencies outlined by the program.

A grade of B or better indicates that a student has mastered the knowledge, skill, and professional practice performance competencies outlined by the program. In order to progress successfully and complete the degree, students must meet both course and cumulative G.P.A. standards. The University allows students to repeat two courses per degree. Course repeat expectations set by the School of Behavioral Health may be found in the general regulations (p. 149) section of this CATALOG.

Normal time to complete the program
Seven (7) academic quarters (includes didactic courses and practicums) — based on full-time enrollment; part time permitted

Social Work – M.S.W. with Gerontology – M.S.

Program director
Kimberly Freeman

Social work and gerontology—within a behavioral health framework—address the models of wellness, recovery, and resiliency needed for working with older adults and their caregivers. The program’s multidisciplinary approach considers the biological, psychological, social, and spiritual well-being of older adults and provides students with knowledge and skills in providing resources, clinical services, and opportunities to older adults and their families. As such, the combined M.S.W. and M.S. degree in gerontology program offers a unique opportunity for individuals interested in working with older adults within a variety of behavioral health settings.
Mission, goals, and objectives
The mission, program goals, and objectives build on elements from both the M.S.W. (p. 187) and M.S. degrees in gerontology (p. 184).

General overview
The combined M.S.W./M.S. degrees in gerontology program is a seven-quarter, full-time curriculum that begins with the social work core course work required for all students. Course work during the first year of study includes the generalist practice curriculum which is grounded in the liberal arts and the person-in-environment framework. Within this framework, students learn to promote social well-being, and build on the strength and resiliency of all human beings through a range of prevention and intervention practice methods when working with diverse individuals, families, groups, organizations, and communities. During their second year, students complete a clinical practice specialization along with specialized courses in gerontology and geriatric practice. An integrated practicum and specialized seminar class in gerontology typically begins in the summer quarter of the final year.

Liberal arts preparation
The M.S.W. and M.S. degrees in gerontology curriculum is built on a liberal arts perspective. Individual applicants whose undergraduate degrees do not reflect this perspective may be asked to enroll in additional courses.

Please note: Any prerequisite requirements must be completed before admission to the combined degrees M.S.W/M.S. program.

Program options
Alternate program options have been designed to address the varying needs of students. As such, the program offers two-, three-, and four-year options.

Admissions
Admissions

Students wishing to take the dual degree must be admitted to both the M.S.W. (p. 190) and the M.S. in Gerontology (p. 184) programs separately. Applicants should refer to the admissions criteria for each program.

Program requirements
The M.S.W./M.S. in Gerontology degrees consists of 90 units of didactic course work in addition to professional practicum experiences. The dual degree program provides the mix of academic, experiential, and research activities essential for master's degree level students.

Students must maintain a grade point average of 3.0 (or a letter grade of B on a 4.0 scale) in order to progress successfully through the program and complete the degree. In addition, students must meet the knowledge, skills, and professional performance competencies outlined by the program.

All course grades should meet the minimum B (3.0) standard, which by university policy indicates satisfactory performance. Courses in which a student earns a grade below a B (3.0) may need to be repeated (or may not apply to the program) if competency in the subject area is related to practice performance with clients, and a grade less than a 3.0 represents marginal or unsatisfactory practice performance.

**COURSES**

**Allied Health—Conjoint (AHCJ)**

**Courses**

**AHCJ 101. Introductory Chemistry. 4 Units.**
Basic survey of matter, energy, and measurement. Includes atoms and molecules; chemical bonding; chemical reactions and reaction rates; gases, liquids, and solids; solutions and colloids; acids and bases; nuclear chemistry. Prerequisite: High school algebra or equivalent.

**AHCJ 102. Introductory Organic Chemistry. 4 Units.**
Introduces the study of compounds that contain carbon. Covers alkenes, alkynes, and aromatic compounds; alcohols, phenols, ethers, and halides; aldehydes and ketones; carboxylic acids and esters; amines and amides. Prerequisite: AHCJ 101; or equivalent.

**AHCJ 103. Introductory Biochemistry. 4 Units.**
Introduces the chemistry of living systems, including carbohydrates, lipids, proteins, and nucleic acids; enzyme chemistry, bioenergetics; carbohydrate, lipid, and protein metabolism; biosynthetic pathways; protein synthesis; chemical transmitters and immunoglobulins; body fluids, nutrition, and digestion. Prerequisite: AHCJ 101, AHCJ 102; or equivalent.

**AHCJ 105. Procedures in Phlebotomy. 5 Units.**
Designed for individuals who are interested in laboratory medicine and would like to become certified phlebotomists. Includes instruction in medical terminology, laboratory safety, basic anatomy and physiology, specimen-collection techniques, hazards/complications, quality assurance methods, and medicolegal issues of phlebotomy. Clinical rotation arranged at Loma Linda University Medical Center and affiliates. Prerequisite: Current CPR certificate.

**AHCJ 111. Introductory Physics. 4 Units.**
Focuses on mechanics and properties of matter and heat; emphasizes concepts. Per week: lecture three hours, laboratory three hours. Designed for students entering programs in the allied health sciences and nursing.

**AHCJ 112. Introductory Physics. 4 Units.**
Focuses on sound, light, electricity and magnetism, atomic and nuclear physics, and relativity; emphasizes concepts. Per week: lecture three hours, laboratory three hours. Designed for students entering programs in the allied health sciences and nursing.

**AHCJ 115. Introduction to Health Care Professions I. 2 Units.**
Introduces health-care professions, including their entry-level educational requirements at the undergraduate level. Content includes concepts of health care as practiced within the U.S. health-care system, roles of specific professions, job descriptions and scopes of practice for the clinical disciplines being profiled, modes of interprofessional interaction, work environments of profiled disciplines, educational requirements and costs, employment analysis and salary ranges.

**AHCJ 116. Introduction to Health Professions II. 2 Units.**
Introduces health-care professions, including their entry-level educational requirements at the graduate level. Content includes concepts of health care as practiced within the U.S. health-care system, roles of specific professions, job descriptions and scopes of practice for the clinical disciplines being profiled; modes of inter-professional interaction, work environments of profiled disciplines, educational requirements and costs, employment analysis and salary ranges.

**AHCJ 124. Introductory Medical Anthropology. 4 Units.**
An interdisciplinary study of human health and disease, health-care delivery systems, and biocultural adaptations in terms of biological, social, and psychological factors. Holistically examines health behaviors in terms of cultural, age, gender, sexual preference, religion, race, ethnicity, life experience, and economic diversity. Addresses barriers to care, problem-solving skills, and effective practice in a variety of settings by the health professional.

**AHCJ 135. Essentials of Human Anatomy and Physiology. 5 Units.**
Studies the structure and function of the human body, including organ systems. Prerequisite to many certificate and associate degree programs. Lecture and laboratory required.

**AHCJ 151. General Chemistry I. 4 Units.**
First quarter of a three-quarter sequence in general college chemistry. Meets the general chemistry requirement for science, engineering, and prehealth professional majors. Prerequisite: High school chemistry; college algebra.

**AHCJ 152. General Chemistry II. 4 Units.**
Second quarter of a three-quarter sequence in general college chemistry. Meets the general chemistry requirement for science, engineering, and prehealth professional majors. Prerequisite: AHCJ 151.

**AHCJ 153. General Chemistry III. 4 Units.**
Third quarter of a three-quarter sequence in general college chemistry. Meets the general chemistry requirement for science, engineering, and prehealth professional majors. Prerequisite: AHCJ 152.

**AHCJ 225. History of Radiation and Imaging 1890-1940. 3 Units.**
History of imaging and radiation from 1890 to 1940. Evolution of imaging practices and the use of radiation in society. Highlights the nature of change in imaging and use of radiation for medical, commercial, industrial, and military purposes. Examines cultural, institutional, and technological precedents that, along with geography, set the stage for advancements in technology and changes of ideologies.

**AHCJ 226. History of Radiation and Imaging 1940-Present Day. 3 Units.**
History of imaging and radiation from 1940 to the present. Recent evolution of imaging practices and the use of radiation in society. Highlights the nature of change in imaging and use of radiation for medical, commercial, industrial, and military purposes. Examines cultural, institutional, and technological precedents that, along with geography, set the stage for advancements in technology and changes of ideologies.

**AHCJ 228. Hispanic Culture for Allied Health Professionals. 4 Units.**
Introduces basic humanities concepts relevant to the Hispanic culture and its influence on how health care is provided today. Includes cultural awareness, heritage, health beliefs and practices, and culturally competent care and communication.

**AHCJ 241. Microbiology. 2.5 Units.**
Designed for students in the health sciences. History, classification, morphology, growth, control, transmission, and pathology of selected bacteria, viruses, fungi, rickettsia, and parasites. Host defenses against microbial pathogens, including specific and nonspecific immunity. Per week: lecture thirty hours, laboratory thirty hours. Course covers two quarters. Grade given upon completion of the 241, 242 sequence. Prerequisite: A college-level chemistry course.
AHCJ 242. Microbiology. 2.5 Units.
Designed for students in the health sciences. History, classification, morphology, growth, control, transmission, and pathology of selected bacteria, viruses, fungi, rickettsia, and parasites. Host defenses against microbial pathogens, including specific and nonspecific immunity. Per week: lecture 30 hours, laboratory 30 hours. Course covers two quarters. Grade given upon completion of AHCJ 241, 242 sequence. Prerequisite: AHCJ 241.

AHCJ 250. Human Anatomy and Physiology I. 5 Units.
A 5-unit course covering structure and function of: cells; primary tissues; the integument; osseous tissue and the skeletal system; muscle tissues and skeletal muscles; as well as an introduction to the nervous system. For students entering two- and four-year health professional programs such as physical therapy, occupational therapy, cardiopulmonary sciences, communication sciences and disorders, radiation technology, nursing, and other programs with an anatomy and physiology prerequisite.

AHCJ 251. Human Anatomy and Physiology II. 5 Units.
A 5-unit course covering the organization and functions of the central and peripheral nervous systems and the visceral organ systems. For students entering two- and four-year health professional programs—such as physical therapy, occupational therapy, cardiopulmonary sciences, communication sciences and disorders, radiation technology, nursing, and other programs with an anatomy and physiology prerequisite. Prerequisite: AHCJ 250, or equivalent.

AHCJ 305. Infectious Disease and the Health-Care Provider. 1 Unit.
Current issues related to infectious diseases, with emphasis on principles of epidemiology and etiology of HIV/AIDS. Disease pathology and modes of transmission as compared to hepatitis, tuberculosis, and influenza. Development of ethical response to psychosocial, economic, and legal concerns. Strategies and programs for education, prevention, and identification of resources. Impact on health-care workers; risk factors and precautions for blood-borne pathogens.

AHCJ 308. Professional Communications. 1.2 Unit.
Forms of written and verbal communication routinely required in the performance of the health-care manager’s duties. Projects include memos, letters, confidential FAX cover design, short reports, meeting notices, minutes, and creation of agendas.

AHCJ 314. Managing Stress. 3 Units.
Introduces stress management from a mind, body, and spirit perspective. Integration of component parts to provide a unified, composite basis for managing stress with whole person care. Integrates evidence-based, health psychology research for managing stress through lifestyle, and use of humor, music, exercise, rest/relaxation, religion/spirituality, and other relevant areas. Introduces tools needed to assess stress while striving for health and balance.

AHCJ 315. Psychosocial Aspects of Health Care. 3 Units.
Addresses psychosocial topics which optimize therapeutic outcomes. Focus on clinical competence and professional excellence involving health-care providers affected by pathology, impairment, functional limitation, and/or disability. Recommends roles and intervention strategies for health-care providers; including, those practicing nursing, physical and occupational therapy, speech-language pathology, physician assistant, respiratory therapy, social work, and medical laboratory science.

AHCJ 318. Emotional Intelligence and Leadership Skills for Health-Care Professionals. 3 Units.
Examines the foundational concepts of emotional and social intelligence. Students assess their strengths, design action plans to enhance their emotional and social intelligence competencies, and apply emotional and social intelligence concepts and theories to their personal and professional behavioral practices and to the management and leadership of others. Course based on a framework specific to the health-care environment.

AHCJ 320. ADL and Assistive Devices. 3 Units.
Introduces the implied adaptations necessary for an individual with disabilities to lead an effective life. Promotes an integrative perspective on all the biomechanical engineering that is necessary for activities of daily living and raises awareness of how orthotic and prosthetic devices interface in their purpose. Teaches the basic medical, custom seating principles.

AHCJ 323. Economics and Business Management. 3 Units.
Establishes principles of economics, financial management, and law as they apply to health-care settings, including: starting a new service, reimbursement, capital and operational budgeting, reading financial statements, and cost-saving measures.

AHCJ 324. Psychosocial Models and Interventions. 2 Units.
Models of stress, crisis, and psychological trauma related to health-care providers. Psychosocial reactions and responses of populations, individuals, and care providers to societal disruption and trauma, medical emergencies, and death and dying. Suicide intervention, critical incident debriefings, and death notification. Roles of psychiatrists, psychologists, social workers, family therapists, and chaplains. Provision of temporary, adequate psychological care during psychosocial crisis.

AHCJ 325. U. S. Health-Care Delivery System. 2 Units.
Overview of U.S. health-care delivery, including the history of health-care institutions, accrediting bodies, organizations that provide health care; regulations and standards, reimbursement methods used, and the professionals who provide services. Presents course from a systems perspective, including research into the future of health care.

AHCJ 326. Fundamentals of Health Care. 2 Units.
Foundation of basic patient care information and skills for allied health professionals entering the clinical environment. Integrated basic care knowledge and skills required by each profession.

AHCJ 328. Wholeness Portfolio I. 1 Unit.
Students develop an introductory portfolio that demonstrates progression toward the student learning outcomes set by Loma Linda University—including wholeness, Christ-centered values, commitment to discovery and lifelong learning, effective communication, embracing and serving a diverse world, and collaboration.

AHCJ 329. Organic Chemistry with Laboratory. 5 Units.
Studies carbon chemistry as related to organic compounds found in the human organism.

AHCJ 331. Human Resource Management. 3 Units.
Theory and practice of the management of people at work. Organizational behavior concepts and the problems of employee procurement, training, and motivation. Job evaluation, wage administration, employee benefits, and negotiating with labor unions. Preparation for both managing people and directing a department in a complex organization.

AHCJ 334. Biochemistry. 4 Units.
Chemistry and metabolism of carbohydrates, lipids, nucleic acids, and proteins. Chemical basis of life processes. Lecture and laboratory demonstrations to support student competency.
AHCJ 341. Cultural Perspectives in Professional Practice I. 3 Units.
First in a four-course sequence that progressively enhances students’ abilities to provide culturally sensitive care within a Western clinical context. Focuses on professional and academic aspects of writing; including, mastery of critical thinking processes that increase students’ abilities to solve problems, form opinions, and make decisions. Emphasizes proficiency in mechanics of speaking and writing in English, knowledge of rules regarding plagiarism, and application of APA guidelines.

AHCJ 342. Cultural Perspectives in Professional Practice II. 3 Units.
Second course in a four-course sequence that progressively enhances students’ ability to provide culturally sensitive care within a Western clinical context. Continues the focus on professional and academic aspects of writing; as well as on mastery of critical thinking processes that enhance the ability to solve problems, form opinions, and make decisions. Typical assignments emphasize proficiency in technical writing for the health-care professional, based on APA guidelines.

AHCJ 343. Cultural Perspectives in Professional Practice III. 3 Units.
Third in a four-course sequence that progressively enhances students’ abilities to provide culturally sensitive care within a Western clinical context. Focuses on professional and academic aspects of writing; including, mastery of critical thinking processes that increase students’ abilities to solve problems, form opinions, and make decisions. Emphasis on reflective and technical writing, including research papers that follow APA guidelines, and oral presentations.

AHCJ 344. Cultural Perspectives in Professional Practice IV. 3 Units.
Fourth course in a four-course sequence that progressively enhances students’ ability to provide culturally sensitive care within a Western clinical context. Emphasizes mastery of professional and academic aspects of writing; as well as of critical thinking processes that enhance the ability to solve problems, form opinions, and make decisions. Additional practice in writing research papers that follow APA guidelines; as well as in making oral presentations.

AHCJ 362. Anatomy. 3 Units.
Gross anatomy of the musculoskeletal system—emphasizing spatial orientation, joint structure, skeletal muscle origins, insertions, actions, nerves, and blood supply. A cadaver-based course.

AHCJ 368. Lifestyle Health and Wholeness. 3 Units.
Explores cardiovascular, metabolic, communicable, and nutritional lifestyle outcomes related to risk factors, screening approaches, and risk reduction. Includes whole person care utilizing natural means such as minimizing the use of prescription drugs, food supplements, and diet fads. Explores disease prevention and treatment through whole person lifestyle and evidence-based measures; inclusive of a perspective that explores the influence of religiosity on lifestyle health.

AHCJ 369. Therapeutic Humor in Health Care. 3 Units.
Distinguishes between humor and laughter and how each affects physiological, psychological, and sociological health. Discusses ways that health-care providers can incorporate humor into the care of patients and their families. Utilizes published research studies to support the efficacy of humor in health care as an evidenced-based practice. Designed for health-care providers who want to become knowledgeable and to utilize therapeutic humor in whole person care.

AHCJ 375. Physiology. 3 Units.
Physiology of the human body—including cellular, neuromuscular, cardiovascular, respiratory, gastrointestinal, renal, and endocrine physiology.

AHCJ 402. Pathology I. 4 Units.
Fundamental mechanisms of disease, including cell injury; inflammation, repair, regeneration, and fibrosis; and vascular, cardiac, respiratory, gastrointestinal, hepatobiliary, urinary, reproductive, endocrine, and integumentary pathologies.

AHCJ 403. Pathology II. 3 Units.
Fundamental mechanisms of disease, including the central and peripheral nervous systems, bone and joint, skeletal muscle, developmental, genetic, infectious, and parasitic pathologies; and neoplasia. Prerequisite: AHCJ 402.

AHCJ 404. Pharmacology. 1,2 Unit.
Introduces pharmacology, including study of pharmacochemistry, pharmacodynamics, and actions of pharmaceuticals commonly encountered in various allied health professions. Different sections register for 1 or 2 units. Identical topics for both sections, with greater depth and detail for 2-unit course.

AHCJ 407. Financial Management. 2 Units.
Financial aspects of health care involving prospective reimbursement system, analysis of various health-care reimbursement schemes, and hospital financial disbursements. Budget variance analysis, analysis of cost components, operating statements, and productivity related to a department budget. Special projects may be assigned as needed. Per week: lecture two hours.

AHCJ 410. Pathology for Health Professionals. 3 Units.
Studies the fundamental mechanisms of pathology pertaining to the neuromusculoskeletal systems. Focuses on the functional consequences of human diseases.

AHCJ 412. Anatomy. 9 Units.
Gross anatomy of the musculoskeletal system, emphasizing spatial orientation, joint structure, skeletal muscle origins, insertions, actions, nerve, and blood supply. A cadaver-based course.

AHCJ 418. Physiology I. 4 Units.
Physiology of the human body, including cellular, neuromuscular, cardiovascular, respiratory, gastrointestinal, renal, and endocrine physiology.

AHCJ 422. History of Disability. 3 Units.
Reviews the power issues relating to disabilities in the history of the United States. Delineates the patient’s rights from a historical context. Focuses on the contents and implementation of Americans with Disabilities Act (ADA). Outlines what role the ADA plays in the everyday practice of rehabilitation sciences.

AHCJ 426. Introduction to Computer Applications. 2 Units.
Hands-on instruction in Word, Excel, and PowerPoint. Lectures, laboratory assignments, quizzes, projects, and a practical examination. (Course not taught every quarter.)

AHCJ 448. Human Resource Management. 3 Units.
Human resource management from the department head point of view. Assesses the employment process from justification of a position until the position is filled and productive. Emphasizes position evaluation and development of the job description. Reviews labor unions from a management point of view. Wage analysis and employee benefits.

AHCJ 465. Seminars in Leadership. 2 Units.
Prepares graduates for entry into the new work requirements. Through observation and participation, students explore the responsibility of today’s employee to successfully integrate customer and community service and social responsibility.
AHCJ 493. Senior Portfolio I. 3 Units.
Allows students to progress toward building competence in SAHP and program outcomes (including diversity) for graduates.

AHCJ 494. Senior Portfolio II. 3 Units.
Building upon Portfolio I, students synthesize their learning and demonstrate their progress in building toward SAHP and program outcomes (including diversity), and beyond.

AHCJ 496. Special Topics in Allied Health Studies. 1-4 Units.
Lecture and discussion on a current topic in allied health studies. May be repeated for a maximum of 4 units applicable to degree program.

AHCJ 498. Wholeness Portfolio II. 1 Unit.
Students continue developing a portfolio that illustrates the potential graduate’s ability to meet the student learning outcomes set by Loma Linda University—including wholeness, Christ-centered values, commitment to discovery and lifelong learning, effective communication, embracing and serving a diverse world, and collaboration.

AHCJ 499. Directed Study. 1-4 Units.
Individual arrangements for students to study under the guidance of a program faculty member. May include readings, literature review, or other special or research projects. Minimum of thirty hours required for each unit of credit. Laboratory may be required in addition to class time. A maximum of 4 units applicable to any degree program.

AHCJ 506. Educational Evaluation and Clinical Assessment. 3 Units.
Introduces principles and techniques of designing evaluation activities and tests for measuring classroom learning and instructional products. Includes criteria-referenced approaches, formative and summative instruments, critical incident observations, portfolio assessment, and other measurement concepts.

AHCJ 507. Pharmacology in Rehabilitation. 3 Units.
Principles of pharmacology as related to diagnosis, prevention, and treatment of disease, including a presentation of the pharmacology and therapeutic value of drugs used in rehabilitation medicine. Related topics include pharmacokinetics, pharmacodynamics, adverse effects, drug interactions, and drug toxicity—with special consideration given to pediatric and geriatric pharmacology.

AHCJ 509. Transformational Teaching and Learning. 3 Units.
Explores theories and styles of learning and personality factors that relate to learning. Includes implications of effective intellectual, emotional, and social functioning within the context of structuring education for the adult learner. Includes analysis of the teaching process—from the setting of objectives, selection of content, and design of classroom and clinical teaching strategies (with particular emphasis on alternatives to lecturing) to assessment and evaluation.

AHCJ 510. Human Gross Anatomy. 9 Units.
Gross anatomy of the musculoskeletal system, with emphasis on spatial orientation, joint structure, skeletal muscle origins, insertions, actions, nerves, and blood supply. A cadaver-based course.

AHCJ 514. Kinesiology: Motor Control and Learning. 3 Units.
Advanced kinesiology, including movement science dealing with behavioral basis of motor control and motor learning from an information-processing perspective.

AHCJ 515. Curriculum Development in Higher Education. 3 Units.
Examines principles of curriculum development. Selection, organization, and evaluation of learning experiences. Examines the nature, place, and interrelationship of general and specialized education in higher education.

AHCJ 516. Clinical Imaging. 3 Units.
Explores modern imaging techniques used to assess musculoskeletal disorders and cardiovascular pathologies. Includes radiographs, CAT scans, MRIs, bone densitometry, PET scans. Emphasizes clinical ultrasound imaging as used in physical therapy.

AHCJ 519. Graduate Wholeness Portfolio. 1 Unit.
Students develop a portfolio that demonstrates the graduate student’s progress toward the student learning outcomes set by Loma Linda University—including wholeness, Christ-centered values, commitment to discovery and lifelong learning, effective communication, embracing and serving a diverse world, and collaboration.

AHCJ 524. Pharmacology. 2 Units.
Introduces pharmacology, including study of pharmacokinetics, pharmacodynamics, and actions of pharmaceuticals commonly encountered in various allied health professions.

AHCJ 528. Lifestyle Health and Wholeness. 3 Units.
Explores cardiovascular, metabolic, communicable, and nutritional lifestyle outcomes related to risk factors, screening approaches, and risk reduction. Includes whole person care utilizing natural means such as minimizing the use of prescription drugs, food supplements, and diet fads. Explores disease prevention and treatment through whole person lifestyle and evidence-based measures; inclusive of a perspective that explores the influence of religiosity on lifestyle health.

AHCJ 541. Managing Stress. 3 Units.
Provides a comprehensive approach to stress management that focuses on the integration, balance, and harmony of mind, body, spirit, and emotions. Examines the balance among the research of health psychology, the psychology of lifestyle, the science of psychoneuroimmunology, and holistic healing. Provides tools needed to identify and manage stress, as well as to achieve health and balance.

AHCJ 544. Advanced Functional Neuroanatomy. 3 Units.
Analyzes and applies neuroanatomy to lesions of the human nervous system; clinical significance of such lesions.

AHCJ 545. Legal and Ethical Issues in the Health Professions. 3 Units.
History and structure of federal and state governments, including torts, contracts, administrative law, criminal law, and reporting issues. Legal and ethical issues in patient confidentiality and release of patient information. The impact of technology on the collection and dissemination of patient information. Medical-legal liability issues, including corporate compliance.

AHCJ 546. Therapeutic Humor in Health Care. 3 Units.
Distinguishes between humor and laughter and how each affects physiological, psychological, and sociological health. Discusses ways that health-care providers can incorporate humor into the care of patients and their families. Utilizes published research studies to support the efficacy of humor in health care as an evidenced-based practice. Designed for health-care providers who want to become knowledgeable and to utilize therapeutic humor in whole person care.

AHCJ 548. Human Resource Management in the Health-Care Environment. 3 Units.
Discusses human resource management issues from the viewpoint of the health-care professional. Includes the legal foundation governing human resource management, as well as the impact that leadership has on the employee’s quality of work, motivation, and performance management. Human resource planning and job analysis, recruitment and selection, employee pay and benefit plans, labor management and collective bargaining. Opportunity for role playing and negotiation experiences. Paper required.
AHCJ 549. Professional Responsibility in Allied Health Professions. 3 Units.
Provides graduate students an advanced overview that combines aspects of substantive law and ethical guidelines in the profession. Focuses in part on handling problems that include the canons of ethics; duty to patients, the workplace, and the profession. Also covers legal aspects, such as conflicts of interest, solicitation, and professional discipline.

AHCJ 550. Organizational Theory. 3 Units.
Introduces students to the concepts needed to understand and predict the behavior of people in health-care organizations today. Covers foundations of organizational structure, leadership, politics, and conflict management.

AHCJ 555. Writing for Health-Care Professionals. 3 Units.
Writing for health professionals for professional publication. Selection of journal, preparation of abstract, manuscript or research paper for potential publication.

AHCJ 556. Administration in Higher Education. 3 Units.
Leadership philosophy and styles of administrative leadership in higher education, with particular application to health professions educational programs. Includes personnel management; budgeting; contracting for clinical placement; group leadership in committees; faculty selection, development, and evaluation; strategic planning; and policy development.

AHCJ 557. Integrating Emotional Intelligence Leadership into the Healthcare Professions. 3 Units.
Students examine their personal emotional and social competencies and apply these foundational concepts in the health care and educational environments. Specifically focuses on developing EI in leadership and supervisory roles. Emphasizes developing EI competencies in staff, faculty, and/or students.

AHCJ 560. Physiology. 4 Units.
Physiology of the human body, including neuromuscular, cardiovascular, respiratory, gastrointestinal, renal, and endocrine physiology.

AHCJ 564. Collaborative Learning in Higher Education. 3 Units.
Collaborative learning, theories of group-individual interaction, and the communication process. Educational orientation to the utilization of groups to enhance motivation, commitment, and learning in higher education.

AHCJ 566. Theoretical Foundations of Leadership. 3 Units.
A web-based course that introduces students to the discipline of leadership. Focuses on the relevance of leadership through study of trait theory, situational leadership, transactional v. transformational leadership, leadership v. management, and leadership ethics. Students will reflect upon theoretical approaches, correlate those approaches with personal experience, and apply those approaches in the professional setting.

AHCJ 567. Personal Leadership. 3 Units.
A Web-based course that focuses on the discovery and growth of an individual's personal leadership style. Students reflect upon various leadership qualities at the personal level, complete the Life Styles Inventory (LSI-1), analyze data from the LSI-1, and discuss the recommendations for increased effectiveness.

AHCJ 568. Spirituality and Health: The Wholeness Connection. 3 Units.
Examination of physiological mechanisms of the central nervous, neuroendocrine, and immune systems, and religious/spiritual beliefs and practices impacting physical and mental health. Includes integrative psychoneuroimmunology and how devout religious/spiritual beliefs and practices affect a sense of well-being, quality of life, and longevity. Explores applications of spiritual care to practice; including, the theology of healing, body/spirit connections, and roles of faith and meaning.

AHCJ 569. Computers and Electronics for Clinicians. 3 Units.
Explains the roles of computers and electronics in a clinical setting. Equipment used in a classroom setting.

AHCJ 575. Couples, Families, and Disabilities. 3 Units.
Examines the effects disabilities have on couples and family systems, and contributions family members make during the rehabilitation of disabled individuals. Looks at discourse patterns taking place within a disabled person; within the disabled person's family and social support system; and, most importantly, within the context of the individual, the family, and medical and rehabilitation providers. Addresses issues of human sexuality, reproduction, and disability.

AHCJ 576. Basics of Marketing. 1 Unit.
Provides an overview of the principles of developing a marketing strategy. Illustrates how marketing can assist an organization in arriving at a competitive advantage; and in creating, capturing, and sustaining value in the eyes of the buyer.

AHCJ 577. Science of Happiness. 3 Units.
Focuses on a fundamental finding from positive psychology that happiness is inextricably linked to wholeness, strong social ties, and contributing to something bigger than self. Students learn about the cross-disciplinary research supporting this view, spanning the fields of psychology, neuroscience, biology, and religion.

AHCJ 579. Instructional Effectiveness. 3 Units.
Develops strategies for instructional effectiveness, as well as processes for evaluation and assessment, that apply to face-to-face and online interactions.

AHCJ 586. Curricula Planning in Health Sciences. 3 Units.
Applies curriculum-development theories and approaches to the health science arena. Students develop a learning-centered curriculum.

AHCJ 587. Introduction to Approaches in Music Therapy. 3 Units.
Assesses the strengths and needs of clients and utilizes music interventions—creating, singing, moving to, and/or listening to music—to address the physical, emotional, cognitive, and social needs in support of accomplishing individualized therapeutic goals.

AHCJ 588. Fundamentals of Human Resource Management. 3 Units.
Introduces students to the fundamentals of human resource management in the private, public, and nonprofit sectors. Covers employee development, legal compliance, and diversity management from a health-care perspective.

AHCJ 589. Strategic Planning in Health-Care Organizations. 3 Units.
Applies health-care systems knowledge and skills to real-life assessment scenarios. Focuses on integrating systems components and analyzing their interactions in the health-care industry. Emphasizes development of systems assessment techniques that facilitate understanding of the traits of a particular organization; its strengths, weaknesses, areas of growth, and changes needed. Includes an organizational assessment and application of didactic content presented in other courses.
AHCJ 599. Directed Teaching. 3 Units.
Student develops a specialty module and presents it in a classroom or clinical setting. Includes course application, course syllabus, measuring instrument, student course evaluation, and lesson plans. Prerequisite: Consent of instructor or of program director.

AHCJ 600. Active Online Learning. 3 Units.
Online course (organized around the AVLL standard for online instruction). Focuses on integration of active learning strategies, meaningful interactions, and stimulating learning experiences. Modules include: introduction, course organization, a safe learning environment, the relational basis of learning, integration of faith, appropriate assessment, and the needs of individual learners.

AHCJ 699. Directed Study. 1-6 Units.
Individual arrangements for advanced students to study under the guidance of a program faculty member. May include reading, literature review, and/or other special projects. Minimum of thirty hours required for each unit of credit.

AHCJ 705. Infectious Disease and the Health Care Provider. 1 Unit.
Current issues related to infectious diseases, with emphasis on principles of epidemiology and etiology of HIV/AIDS. Disease pathology and modes of transmission compared to hepatitis, tuberculosis, and influenza. Development of ethical response to psychosocial, economic, and legal concerns. Strategies and programs for education, prevention, and identification of resources. Impact on health-care workers; risk factors and precautions for blood-borne pathogens.

AHCJ 721. Wholeness Portfolio I. 1 Unit.
Students continue developing a portfolio that illustrates the potential graduate's ability to meet the student learning outcomes set by Loma Linda University—including wholeness, Christ-centered values, commitment to discovery and lifelong learning, effective communication, embracing and serving a diverse world, and collaboration.

AHCJ 722. Wholeness Portfolio II. 1 Unit.
Students continue developing a portfolio that illustrates the potential graduate's ability to meet the student learning outcomes set by Loma Linda University—including wholeness, Christ-centered values, commitment to discovery and lifelong learning, effective communication, embracing and serving a diverse world, and collaboration.

Allied Health Research Methods (AHRM)

Courses

AHRM 354. Statistics for the Health Professions. 3 Units.
Fundamental procedures in collecting, summarizing, analyzing, presenting, and interpreting data. Measures of central tendency and variation, probability, binomial and normal distribution, hypothesis testing and confidence intervals, t-tests, chi-square, correlation, and regression. Introduction to SPSS statistical package for computer data analysis.

AHRM 471. Statistics and Research for Health Professionals I. 3 Units.
Presents statistical methods relative to research design for health professionals, with introduction to SPSS statistical package for computer data analysis. Discusses philosophical approaches to scientific inquiry, range of research designs, roles of variables, and ethics.

AHRM 472. Statistics and Research for Health Professionals II. 3 Units.
Advanced conceptual frameworks, data analyses, and techniques in quantitative and qualitative research. Emphasizes process for obtaining and using evidence-based research. Prerequisite: AHRM 471.

AHRM 475. Health-Care Research and Statistics. 4 Units.
Statistical methods presented in the context of health-care research. Rationale for research questions, definition of populations, roles of variables, reliability and validity of research tools, common research designs, internal and external validity of research designs. Descriptive statistics, confidence interval, hypothesis testing concepts, t-tests, chi-square tests, correlation and regression. Interpretation of computer output. Evaluation of the health-care literature.

AHRM 514. Biostatistics. 3 Units.
Fundamental procedures of collecting, summarizing, presenting, analyzing, and interpreting data. Sampling, measures of central tendency and variation, probability, binomial distribution, normal distribution, sampling distributions and standard error, confidence intervals, hypothesis testing, t-tests, chi-square, correlation, and regression. Introduces computer analysis for solution of statistical problems.

AHRM 518. Nonparametric Statistics for the Health Professions. 3 Units.
Introduces nonparametric statistical methods in the context of applications for health professionals. Uses the SPSS statistical package for data analysis. Students learn to identify, design, analyze, and interpret studies using nonparametric statistics. Nonparametric tests covered include the Mann-Whitney U test, Wilcoxon signed-ranks test, Friedman test, Kolmogorov-Smirnov test, Spearman rank correlation, and chi-square tests. Prerequisite: Beginning statistics course.

AHRM 571. Statistics and Research for Health Professionals I. 3 Units.
Presents statistical methods relative to research design for health professionals, with introduction to SPSS statistical package for computer data analysis. Discusses philosophical approaches to scientific inquiry, range of research designs, roles of variables, and ethics. Critical analysis of scientific literature related to an identified professional practice area, which results in an evidence-based practice paper.

AHRM 572. Statistics and Research for Health Professionals II. 3 Units.
Advanced conceptual frameworks, data analyses, and techniques in quantitative and qualitative research. Emphasizes process for obtaining and using evidence-based research. Data analysis of a small data set in order to answer a research question and write a formal results section complete with appropriate tables and graphs. Prerequisite: AHRM 571.

AHRM 581. Research and Statistics I. 3 Units.
In-depth study of research designs: their advantages and disadvantages, including pretest/posttest designs; posttest-only, control group designs; time series designs; factorial designs; randomized block and repeated-measures designs; and incomplete block designs. Introduces clinical trials, sequential research designs; and single case, experimental designs. Measures and analyzes validity and reliability. Survey-instruments(s) design. Power calculations for choosing appropriate sample sizes.

AHRM 582. Research and Statistics II. 3 Units.
Analyzes data using one-way ANOVA with multiple comparisons, factorial ANOVA designs, randomized complete and incomplete block designs, and repeated measures. Introduces multiple correlation and regression and model building using multiple regression techniques. Evaluates research literature that uses multivariate analysis for data analysis. Introduces nonparametric statistics. Interprets multivariate analysis computer output.
AHRM 595. Research and Statistics Concepts and Methods: Intermediate. 3 Units.
In-depth study of research designs, including completely randomized and randomized block designs. Use of and interpretation of statistical tests such as ANOVA, multiple linear regression, multivariate analysis, and correlations; includes introduction to nonparametric statistical tests. Measures and analyzes data for validity and reliability studies. Evaluates research literature that uses multivariate data.

AHRM 604. Research-Proposal Writing. 3 Units.
Student prepares a research proposal, including components essential for submission to the Institutional Review Board. Emphasizes writing skills in preparation of literature review, purpose, conceptual framework, proposed methodology, and statistical analysis. Includes ways in which proposal serves as the basis for a published article.

AHRM 605. Critical Analysis of Scientific Literature. 2,3 Units.
Critical evaluation of scientific literature. Includes critical assessment of study rationale, population inclusion/exclusion criteria, sampling and randomization techniques, sample size, appropriateness of research design, choice of data analysis, structure and content of tables and graphs, interpretation of statistical results, and applications to practice. Additional evaluation time required for third unit of credit.

Anatomy (ANAT)

Courses

ANAT 301. Head and Neck Anatomy, DH. 4 Units.
Gross anatomy of the head and neck. Lecture and demonstration.

ANAT 303. General and Oral Histology and Embryology. 3 Units.
Microscopic study of fundamental cells, organs, tissues, and systems of the body. Analyzes in detail the pulp, periodontal tissues, alveolar process, oral mucosa, and calcified tissues of the tooth. Includes development of head and neck structures.

ANAT 507. Stem Cell Biology and Medicine. 4 Units.
Provides students with information on the latest developments in animal and human stem cell research and on the potential application of stem cells to medicine. Explores the derivation, manipulation, and differentiation of embryonic, germ, and adult stem cells. Lectures presented by faculty participating in stem cell research in areas of their expertise.

ANAT 510. Gross Anatomy. 8.5 Units.
Supports the organ system curriculum in the first year of medical education. Teaches students the morphological setting upon which clinical knowledge and experiences are built. Approaches anatomy from a gross structural perspective. Students use knowledge to recognize clinical variations and abnormalities in preparation for their medical careers.

ANAT 511. Human Anatomy for Dentists I. 5 Units.
An in-depth study of the human anatomical sciences, including: gross anatomy, general and oral histology, embryology, and neuroscience as they relate to the dental profession. Designed for students in the first year of dentistry, and for students in the dental track of the biomedical sciences postbaccalaureate certificate program.

ANAT 512. Human Anatomy for Dentists II. 5 Units.
An in-depth study of the human anatomical sciences, including gross anatomy, general and oral histology, embryology, and neuroscience as they relate to the dental profession. Designed for students in the first year of dentistry, and for students in the dental track of the biomedical sciences postbaccalaureate certificate program.

ANAT 513. Human Anatomy for Dentists III. 5 Units.
An in-depth study of the human anatomical sciences, including gross anatomy, general and oral histology, embryology, and neuroscience as they relate to the dental profession. Designed for students in the first year of dentistry, and for students in the dental track of the biomedical sciences postbaccalaureate certificate program.

ANAT 515. Human Embryology. 2 Units.
Reviews the morphologic processes and molecular basis of human development. Includes the production of human gametes, fertilization, gastrulation, placentation, and development of the major organ systems. Emphasizes clinically relevant features of pregnancy and developmental processes that are susceptible to malformation.

ANAT 516. Neuroscience GS. 6 Units.
Integrated approach to the fundamentals of neuroanatomy and neurophysiology, with applications to clinical neurology.

ANAT 525. Special Topics: Advanced Dissection. 1-4 Units.
Detailed dissection of a specified body region. Demonstration and lecture. May be repeated for additional credit. Offered on demand. Prerequisite: ANAT 541; or equivalent with approval of program director or department chair.

ANAT 527. Advanced Clinical Anatomy for Nurse Anesthetists. 5 Units.
Emphasizes detailed description and applied anatomy of the body systems (cardiovascular, respiratory renal, hepatic nervous, and endocrine) relevant to the nurse anesthetist.

ANAT 529. Gross Anatomy and Embryology. 10.5 Units.
Provides the morphological foundation upon which clinical knowledge and experiences are built. Supports the organ-system curriculum in the freshman year. Approaches anatomy from gross structural and embryological perspectives. Provides students with the knowledge necessary to recognize clinical variations and abnormalities during their medical careers.

ANAT 541. Gross Anatomy GS. 7 Units.
Anatomy of the head, neck, locomotor system, thorax, abdomen, pelvis, and perineum. Correlated with radiology, applied features, and embryological development. Summer and Autumn quarters.

ANAT 542. Cell Structure and Function GS. 7 Units.
The microscopic structure of cells, tissues, and organs of the human body. Autumn Quarter.

ANAT 544. Human Embryology Lecture. 2 Units.
The plan of development as it pertains to humans. Considers principles.

ANAT 548. Introductory Flow Cytometry. 1 Unit.
Introduction to basic flow cytometry-based techniques used to identify experimental, basic science and translational research questions, and to develop research proposals. Includes flow cytometry sample preparation, and data collection, analysis, and presentation.

ANAT 558. Applied Gross Anatomy GS. 3 Units.
Emphasizes practical application of the anatomical knowledge covered in human gross anatomy. Considers applied anatomy problems involving biomechanical functions of the body, as well as application of anatomical principles to specific fields of human activity. Prerequisite: ANAT 541; or consent of instructor.

ANAT 594. Directed Study in Anatomy. 1-7 Units.
Intensive study of a selected topic approved by the chair of the department. Individual guidance by a staff member.
ANAT 697. Research. 1-8 Units.
ANAT 699. Dissertation. 1-5 Units.
ANAT 891. Anatomy Elective. 1.5-18 Units.
A self-designed and self-directed dissection elective in the fourth year of the MD curriculum with emphasis on the head, neck, abdomen, pelvis, thorax, back, or limbs—correlating basic anatomy with clinical applications.

Anesthesiology (ANES)
Courses
ANES 891. Anesthesiology Elective. 1.5-27 Units.
Offers fourth-year medical students the opportunity to explore various areas of anesthesiology, including research.

Anthropology (ANTH)
Courses
ANTH 315. Cultural Anthropology. 4 Units.
Advanced course in ethnology and social organization. Explores the nature of culture, giving special attention to such features as technology, economic activities, community organization, kinship and marriage, social control, magic and religion, the arts, and other forms of cultural behavior. Presents a wide array of examples from societies around the world.

Behavioral Health—Conjoint (BHCJ)
Courses
BHCJ 303. Cultural Learning. 4 Units.
Students develop skills in learning a culture by applying principles from two modes of inquiry: ethnography and ethnology. Practice gathering cultural information and data through ethnographic interviews, as well as through research in the human relations area files. Focuses on developing knowledge of a particular culture in which the student has an interest.

BHCJ 501. Critical Thinking. 4 Units.
Develops in postbaccalaureate students critical-thinking skills, including: evaluating ideas, using dialogical learning for deep reliable knowledge, thinking inductively and deductively, accurately conceptualizing for better decision making and behavioral choices, applying critical thinking to academic success and life-long learning.

BHCJ 502. Classroom Teaching Strategies. 3 Units.
Addresses pedagogical issues including, but not limited to: developing a healthy learning environment in the classroom, developing effective teaching strategies, fostering effective learning strategies in students, preparing syllabi, lecturing, managing classroom discussion, evaluating students’ performance.

BHCJ 505. Personal Finance. 2 Units.
Comprehensive introduction to responsibilities within professional practice and personal finance management. Includes financial management, loans and debt reduction strategies, retirement planning, risk management, and human resource management; and, personal and practice decisions based on related legal, ethical, and financial issues.

BHCJ 514. Editing, Style, and Grammar for Academic Writing and Publication. 2 Units.
Focuses on mastery of the editing stage of academic manuscript preparation. Applicable to all academic works, including publishable research results, term papers, dissertations, theses, and proposals. Covers the self-editing option, editing techniques, grammar, punctuation, and style. Addresses APA and other styles.

BHCJ 515. Researching and Writing Graduate Level Papers. 2-4 Units.
Provides skills for critical writing, including organization, development of idea, and presentation of conclusion. Develops skills applicable to the preparation of term papers in the students’ disciplines.

BHCJ 550. Fundamentals of Dialectical Behavior Therapy. 2 Units.
Examines the theory, empirical foundations, and applications of dialectical behavior therapy (DBT), an evidenced-based psychosocial treatment initially developed for suicidal individuals with borderline personality disorder (BPD). Familiarizes students with the techniques of DBT, as well as the latest research on and adaptations for use of DBT with other populations.

BHCJ 585. Sociology of Communities. 4 Units.
Examines classical and contemporary theories of community. Provides a theoretical foundation for applied social science professional programs that require an understanding of the community in contemporary society.

BHCJ 615. Writing for Thesis/Dissertation. 2-4 Units.
Develops skills necessary for researching and writing theses and dissertations. Includes researching literature in electronic and library sources; and collecting, filtering, paraphrasing, and organizing data from literature. Develops editing skills that may be applied to any prose writing involved in producing a thesis or dissertation—including proposals, abstracts, introductions, reviews of literature, write-ups of data analyses, and conclusions.

BHCJ 649. Integration of Behavioral Health in Primary Care. 2 Units.
Introduces the integration of behavioral health in primary care settings. Focuses on how a wholistic (bio-psychosocial-spiritual) approach to behavioral health care (including the integration of diet and exercise) can improve emotional well-being and health-care outcomes. All students in the school’s behavioral health disciplines encouraged to take this course.

Biochemistry (BCHM)
Courses
BCHM 510. Fundamentals of Human Biochemistry. 2.5 Units.
Supports the organ system curriculum in the first year of medical education. Combines lectures, in-class quizzes, and case-based exercises to teach the biochemical basis for cell structure and function, emphasizing an integrated approach to the understanding of protein structure and function; intermediary metabolism of carbohydrates, lipids, proteins, and nucleic acids; and the metabolic patterns of selected tissues.

BCHM 515. Introduction to Bioinformatics. 2 Units.
Introduces bioinformatics methods and their application to biological research. Provides a conceptual understanding of the algorithms behind standard bioinformatics software, as well as practical experience in programs and databases commonly utilized in biological research.

BCHM 517. Scientific Foundations of Nurse Anesthesia Practice. 2 Units.
Provides students with an understanding and appreciation of scientific phenomena and with the ability to apply scientific methods, critical thinking, and problem-solving skills in exploring, conserving, and managing their environments.
**BCHM 518. Fundamentals of Human Biochemistry. 2.5 Units.**
Provides a foundation in the nature and properties of biological molecules in the human body. Presents the biochemical basis for cell structure and function. Emphasizes an integrated approach to protein structure and function; the intermediary metabolism of carbohydrates, lipids, proteins, and nucleic acids; and, metabolic patterns of selected tissues.

**BCHM 519. Medical Biochemistry, Molecular Biology, and Genetics. 4.5 Units.**
Comprehensive course in biochemistry and molecular biology that establishes the biochemical basis for cell structure, emphasizes an integrated approach to the understanding of cellular metabolism, provides a biochemical/genetic/molecular basis for understanding disease, and examines the mechanisms for genetic information flow in prokaryotic and eukaryotic cells. Course restricted to Biomedical Science Program (certificate).

**BCHM 529. Fundamentals of Human Biochemistry and Genetics. 4.5 Units.**
A lecture sequence for first-year medical students in biochemistry and molecular biology that establishes the biochemical basis for cell structure, emphasizes an integrated approach to the understanding of cellular metabolism, and examines the mechanisms for genetic information flow in eukaryotic cells.

**BCHM 530. Biochemical Basis of Human Disease SM. 2 Units.**
A series of lectures for second-year medical students designed to provide a biochemical/genetic/molecular basis for understanding human diseases.

**BCHM 544. Advanced Topics in Biochemistry. 2-4 Units.**
Recommended for the Ph.D. degree (2+2+2). Recent examples include proteins: modern methods of study; selected cellular events in carcinogenesis; enzyme kinetics; transgenic plants for human health.

**BCHM 550. Clinical Exposure in Oncology. 1 Unit.**
Exposes students to various aspects of cancer care as they observe physicians delivering care to patients at all stages of cancer—newly diagnosed, preoperative, postoperative, and survivorship. Discussion of diagnosis, workup, stage, and treatment plan. Attendance at didactic lectures, tumor board, and grand rounds that highlight the importance of a multidisciplinary approach to cancer management. Prerequisite: PHSL 555.

**BCHM 551. Special Problems in Biochemistry. 2-6 Units.**
**BCHM 605. Seminar in Stem Cells and Cancer. 1 Unit.**
Discussion of contemporary primary literature and exploration of stem cell biology related to cancer. Introduction to concepts in the cancer field, stem cell biology, critical evaluation of scientific literature, and cutting-edge research techniques. Prerequisite: IBGS 511, IBGS 512, IBGS 522, IBGS 523.

**BCHM 610. Cancer Journal Club. 1 Unit.**
A journal-club format that includes discussion of recent advances in cancer research. Critical evaluation of the experimental approaches used in the papers discussed—designed to enhance students’ problem-solving and presentation skills, and to develop an appreciation for the rigor needed to conduct hypotheses-driven cancer research.

**BCHM 697. Research. 1-10 Units.**
**BCHM 699. Dissertation. 1-5 Units.**
**BCHM 891. Biochemistry Elective. 1.5-12 Units.**
Fourth-year elective that allows the student to create materials for team-based learning in the biochemical basis of human disease. Includes identifying a disorder that has clear and characteristic biochemical manifestations; as well as preparing a set of teaching notes, assessment tools, and application exercises.

**Biology (BIOL)**

**Courses**

**BIOL 116. Introduction to Human Biology. 3 Units.**
Introductory course in human biology. Explores basic principles of human anatomy and physiology and their relationships to social functioning. Fulfills the human biology prerequisite for the master’s degree Social Work Program.

**BIOL 406. Marine Biology. 4 Units.**
Surveys marine species of the world and the oceanographic processes and ecological interactions that affect them. Emphasizes tropical and coral ecosystems. Includes an independent project. Four class hours per week, plus all-day field trips (usually on Sunday).

**BIOL 407. Herpetology. 3 Units.**
Covers a broad range of topics in herpetology, including systematics, diversity, morphology, physiology, behavior, ecology, conservation, and research methodology. Focuses field experience on Southern California herpetology. Two hours lecture, three-hour laboratory each week.

**BIOL 409. Mammalogy. 4 Units.**
Studies the mammals of the world, with emphasis on North America. Includes classroom and field study of systematics, distribution, behavior, and ecology. Per week: class three hours, one three-hour laboratory.

**BIOL 414. Biology of Marine Invertebrates. 4 Units.**
Behavior, physiology, ecology, morphology, and systematics of marine invertebrates, with emphasis on morphology and systematics. Three class hours per week, one-day field trip alternate weeks, or the equivalent.

**BIOL 415. Ecology. 4 Units.**
Principles of terrestrial, aquatic, and marine ecology—with a focus on individual, population, community, and ecosystem levels of organization. Laboratory work includes field studies that examine ecological principles. Per week: class three hours, laboratory three hours.

**BIOL 426. Invertebrate Paleontology. 4 Units.**
Structure, classification, ecology, and distribution of selected fossil invertebrate groups. Considers principles and methods involved in the study and analysis of invertebrate fossils. Per week: class three hours, plus one three-hour laboratory.

**BIOL 427. Vertebrate Paleontology. 4 Units.**
Fossil vertebrates, with emphasis on the origins of major groups. Systematics, biology, and biogeography of ancient vertebrates. Per week: class three hours, plus one three-hour laboratory.

**BIOL 428. Genetics and Speciation. 4 Units.**
Introduces genetic mechanisms of biological change. Processes of inheritance through time evaluated in their ecological context.

**BIOL 437. Animal Behavior. 4 Units.**
Behavioral mechanisms of animals and their role in survival. Lectures and projects.
BIOL 439. Behavioral Ecology. 4 Units.
Examines in depth how behavior contributes to the survival of animals, with emphasis on behavioral strategies that reflect adaptation to the animal’s environment.

BIOL 444. Paleobotany. 4 Units.
Fossil plants; their morphology, paleoecology, taphonomy, classification, and stratigraphic distribution. Analyzes floral trends in the fossil record. Per week: class three hours, plus one three-hour laboratory or field trip.

BIOL 449. Biodiversity and Conservation. 3 Units.
Examines contemporary issues related to diminishing biodiversity on regional and global scales, and the need to conserve both biodiversity and the critical habitats that support threatened flora and fauna.

BIOL 456. Techniques in Vertebrate Ecology. 3 Units.
Theory and practice of vertebrate ecology research, including marking methods, population estimation, home range and habitat analysis, and radiotelemetry. Software used extensively for analysis of data, some of which will be collected during field trips.

BIOL 465. Introduction to GIS for the Natural Sciences. 2 Units.
Principles and practice of GIS data acquisition, data editing, map making, and geodatabase management. Recommended for students beginning a research project.

BIOL 466. Multivariate Statistics. 3 Units.
Practical, software-based application of multivariate statistics to complex data sets, including both null hypothesis testing and practical significance. Builds on the foundation of an introductory statistics course.

BIOL 475. Philosophy of Science and Origins. 4 Units.
Concepts in the history and philosophy of science, and the application of these principles in analyzing current scientific trends.

BIOL 479. Readings in Biology. 1-4 Units.
Studies, analyzes, and discusses current and classic papers.

BIOL 488. Current Topics in Biology. 1-4 Units.
Reviews cutting-edge literature in the biological sciences. Different sections may be repeated for additional credit.

BIOL 495. Undergraduate Research. 1-4 Units.
Student pursues original investigation and/or literature study under the direction of a faculty member. May be repeated for additional credit.

BIOL 497. Special Projects in Biology. 1-4 Units.
Student responsible for a special research project in the field, laboratory, museum, or library. May be repeated for additional credit.

BIOL 502. Orientation to Graduate Biology. 1 Unit.
Introduces students to skills and strategies for successfully navigating through EBS as graduate biology students. Provides opportunities for discussion, activities related to topic areas, discovery, group exchange, instruction, and critical evaluation and decision making regarding ethical practices in research.

BIOL 504. Biology of Marine Invertebrates. 4 Units.
Behavior, physiology, ecology, morphology, and systematics of marine invertebrates, with emphasis on morphology and systematics. Per week: class three hours; one-day field trip alternate weeks, or the equivalent.

BIOL 505. Marine Biology. 4 Units.
Surveys marine species of the world, and the oceanographic processes and ecological interactions that affect them. Emphasizes tropical and coral ecosystems. Includes an independent project. Per week: class four hours, plus all-day field trips (usually on Sundays).

BIOL 507. Herpetology. 3 Units.
Covers a broad range of topics in herpetology, including systematics, diversity, morphology, physiology, behavior, ecology, conservation, and research methodology. Field experience focuses on southern California herpetology. Per week: Two hours lecture and a three-hour laboratory.

BIOL 515. Biogeography. 3 Units.
Present and past distribution and migrations of the natural populations of organisms.

BIOL 517. Ecological Physiology. 4 Units.
Studies the interface between the individual and the environment, with emphasis on unusual environments, in order to explore the limits of physiological systems. Per week: class four hours. Offered alternate years.

BIOL 518. Readings in Ecology. 2 Units.
Studies, analyzes, and discusses current and classic papers.

BIOL 529. Mammalogy. 4 Units.
Studies the mammals of the world, with emphasis on North America. Includes classroom and field study of systematics, distribution, behavior, and ecology. Per week: class three hours, one three-hour laboratory. Additional work required beyond BIOL 409.

BIOL 539. Behavioral Ecology. 4 Units.
Examines in depth how behavior contributes to the survival of animals, with an emphasis on behavioral strategies that reflect adaptation to the animal’s environment.

BIOL 545. Genetics and Speciation. 4 Units.
Comparative analysis of species concepts, mechanisms of speciation, and analysis of micro- and macroevolution. Prerequisite: A course in genetics and philosophy of science.

BIOL 546. Techniques in Vertebrate Ecology. 3 Units.
Theory and practice of vertebrate ecology research, including marking methods, population estimation, home range and habitat analysis, and radiotelemetry. Software used extensively for analysis of data, some of which will be collected during field trips.

BIOL 549. Biodiversity and Conservation. 3 Units.
Examines contemporary issues related to diminishing biodiversity on regional and global scales and the need to conserve both biodiversity and the critical habitats that support threatened flora and fauna.

BIOL 554. Molecular Genetics. 3 Units.
An overview of the molecular basis of life, with emphasis on DNA as an information storage medium. The systems of information retrieval found in prokaryotes and eukaryotes.

BIOL 558. Philosophy of Science. 4 Units.
Studies selected topics in the history and philosophy of science, and applies these principles in analyzing contemporary scientific trends.

BIOL 559. Philosophy of Science and Origins. 1 Unit.
Studies selected topics in the history and philosophy of science, and applies these principles in analyzing current scientific trends. Provides an advanced update in the topic for students who have had a similar course at the undergraduate level.

BIOL 565. Introduction to GIS for the Natural Sciences. 2 Units.
Principles and practice of GIS data acquisition, data editing, map making, and geodatabase management. Recommended for students who are beginning a research project.
BIOL 566. Multivariate Statistics. 3 Units.
Practical, software-based application of multivariate statistics to complex data sets, including both null hypotheses testing and practical significance. Builds on the foundation of an introductory statistics course.

BIOL 588. Current Topics in Biology. 1-5 Units.
Reviews cutting-edge literature in the biological sciences. Different sections may be repeated for additional credit.

BIOL 589. Readings in Biology. 1-4 Units.
Studies, analyzes, and discusses current and classic papers on an individual basis with advisor.

BIOL 607. Seminar in Biology. 0.5 Units.
Seminar presentations by guest scientists on recent research and developments in biological science. No student presentation required.

BIOL 616. Research and Experimental Design. 2 Units.
Concepts, methods, and tools of research, including experimental design and data analysis.

BIOL 617. Proposal Writing and Grantmanship. 2 Units.
Develops skills in writing proposals and acquiring funding for research. Increases understanding of the culture of research. Reviews the infrastructure of science funding and identifies individualized sources of potential funding. Presents successful proposal-writing strategies for both governmental and nongovernmental sources of funding. Emphasizes development of effective writing skills during preparation of the student's thesis or dissertation proposal.

BIOL 618. Writing for Publication. 1 Unit.
Explores the mechanics and processes of preparing, submitting, revising, and resubmitting a manuscript for publication in a peer-reviewed journal. Designed for students who are well along in the process of writing their first manuscript for publication. Prepares students to handle the manuscript revision process when the manuscript is returned from reviewers, as well as the final stage of resubmission to the journal.

BIOL 658. Advanced Philosophy of Science readings. 2 Units.
Reading and discussion of selected references in the philosophy of science, and the application of these concepts in the practice of scientific research and interpretation, including their influence on scientific study of origins. Best taken near the end of a student's graduate program. Two-hour class session per week.

BIOL 695. Special Projects in Biology. 1-4 Units.
Student responsible for a special research project in the field, laboratory, museum, or library. May be repeated for additional credit.

BIOL 697. Research. 1-8 Units.
See department checklist for recommended number of units.

BIOL 698. Thesis Research. 1-8 Units.
Credit for research and for writing the master's thesis. Grade received does not indicate whether thesis is completed and approved.

BIOL 699. Dissertation Research. 1-8 Units.
Credit for research and for writing the doctoral dissertation. Grade received does not indicate whether dissertation is completed and approved.

Courses

CEPT 245. Cardiovascular Anatomy and Physiology. 3 Units.
Explores normal and pathological cardiovascular anatomy and physiology. Emphasizes myocardial excitation, contraction, intracardiac flow, intracardiac pressure, valve function, coronary anatomy, and ventricular function. Studies in detail the electrical conduction system and cardiovascular hemodynamic principles. Introduces pathological coronary anatomy, as well as abnormalities of the cardiovascular system.

CEPT 248. Cardiovascular Patient Assessment. 2 Units.
Principals of assessment for the patient with cardiovascular disorders, including: health history, physical assessment techniques, interpretation of laboratory data, diagnostic data, chest radiography, auscultation, and diagnostic procedures. Interview techniques and the development of patient care techniques specific to the cardiovascular patient.

CEPT 251. Cardiac Electrophysiology and Rhythm Recognition I. 2 Units.
Clinical use of diagnostic tests and procedures related to cardiac electrophysiology disease states. Introduces anatomical and physiologic concepts of rhythm generation and cardiac electrophysiology pathways, with emphasis on basic rhythm recognition and evaluation.

CEPT 252. Cardiac Electrophysiology and Rhythm Recognition II. 2 Units.
Application and interpretation of the 12-lead system. Emphasis on recognition of the acute myocardial infarction and common myocardial pathologies; includes axis deviation, acute ischemic conditions, electrolyte imbalances, bundle-branch block, and infarct imposters. Highlights patient assessment, data collection, and use of the 12-lead to guide rapid intervention. American Heart Association advanced cardiac life support certificate issued upon successful course completion.

CEPT 253. Cardiac Electrophysiology and Rhythm Recognition III. 3 Units.
Clinical use of diagnostic tests and procedures related to intracardiac catheter placement and the electrograms created during EP studies/procedures. Improves recognition and interpretation of intracardiac electrograms. Introduces anatomical and physiological concepts of rhythm generation and cardiac electrophysiology pathways. Emphasizes basic intracardiac electrogram recognition, which, combined with practice, leads to greater interpretation proficiency during cardiac EP procedures/studies. Prerequisite: CEPT 251, CEPT 252.

CEPT 258. Fundamentals of Biomedical Science. 2 Units.
Study and application of basic sciences related to physiology and pathophysiology, integrating the concepts into the fundamentals of biomedical electronics—specifically the physical sciences to cardiac management.

CEPT 261. Cardiac Electrophysiology Science I. 3 Units.
Principles of cardiac electrophysiology, including electrophysiology conduction, pathways and mapping, measurements of refractory periods, aberrant conduction of the myocardium, tests of sinus node function, atrial and ventricular extra-stimulus testing, pacing protocols for diagnostic electrophysiology studies, and cardiac resynchronization. Emphasizes application to the clinical setting.

CEPT 262. Cardiac Electrophysiology Science II. 3 Units.
Medical instrumentation and clinical application used in cardiac electrophysiology. In-depth study of the technical knowledge used for diagnostic, interventional, and therapeutic modalities. Applies scientific principles to the operation of laboratory equipment. Identifies correct patient-specific or appropriate device system adjustments.
CEPT 263. Cardiac Electrophysiology Science III. 3 Units.
Continues CEPT 261 and 262, developing advanced knowledge, skills, and application of mapping and monitoring systems. Explores device features, therapy options, and hands-on troubleshooting in depth. Includes case study review.

CEPT 271. Cardiology Diseases and Therapeutics I. 2 Units.
Overview of pathophysiology of cardiac diseases. Describes appropriate therapy for acute and chronic cardiovascular disease states. Emphasizes scientific support for treatment modalities and reviews current treatment trends for cardiovascular diseases.

CEPT 272. Cardiology Diseases and Therapeutics II. 2 Units.
Addresses major cardiac pathologies, congenital and acquired. Focuses on cardiac rehabilitation science and current therapy of the cardiac patient. Includes applied knowledge of relevant risk factors and fosters appreciation of cardiovascular disease prevention. Emphasizes the function of exercise in disease prevention, as well as the role nutrition plays in promoting cardiovascular health. Discusses testing protocols and exercise prescription, along with evidence-based therapies.

CEPT 275. Cardiovascular Pharmacology. 3 Units.
Pharmacological agents currently used in the treatment of cardiovascular disease management, including biophysical, biochemical, and cellular basis of treatment, pharmacokinetics, pharmacodynamics, and therapeutics. Emphasizes pharmaceuticals commonly given to and used to treat cardiac patients.

CEPT 281. Cardiac Electrophysiology Procedures I. 3 Units.
Indications for technology-based evaluations and diagnostic and therapy interventions. Focuses on interventions that minimize procedural and device-related complications. Includes information related to patient monitoring and comfort. Laboratory practice and techniques.

CEPT 282. Cardiac Electrophysiology Procedures II. 3 Units.
Continues to explore advanced cardiovascular diagnostic and therapeutic procedures. Laboratory practice and techniques.

CEPT 285. Cardiology. 3 Units.
Assists the health-care provider to develop assessment skills and to increase knowledge of medical management of the patient with acute and chronic cardiovascular disorders. Focuses on anatomy and physiology, underlying pathophysiology, advanced history taking and physical assessment, cardiovascular pharmacology, electrical modalities, cardiac diagnostic testing, and current research.

CEPT 321. Cardiac Electrophysiology Clinical Practicum I. 0.5 Units.
Introduces the clinical setting. Orient the student to environments in which the CEP specialist works. Student participates in or conducts a health history and physical assessment of the cardiac patient and learns proper documentation procedures. Hands-on experience to assist development of basic clinical skills. Introduces procedures, diagnostic examinations, and equipment utilized in cardiac procedures.

CEPT 322. Cardiac Electrophysiology Clinical Practicum II. 1.5 Unit.
Clinical experience and application of cardiac electrophysiology procedures, interventions, instrumentation, and patient-care interactions. Preceptors in the clinical settings facilitate experiences that enable students to develop and enhance competencies related to cardiac testing and procedures. Includes practice with components of communicating effectively with clients, their families, and other members of the health-care team.

CEPT 323. Cardiac Electrophysiology Clinical Practicum III. 1.5 Unit.
Clinical assignments to assist the student in gaining specific experiences that enable him/her to develop and enhance competencies in cardiac testing and patient evaluation. Guided by clinical preceptors, student rotates through multiple environments relevant to the practice of cardiac electrophysiology.

CEPT 324. Cardiac Electrophysiology Clinical Practicum IV. 2 Units.
Student rotates through several clinical environments in order to gain advanced competencies in all content areas. Includes, but is not limited to Holter scanning, cardiac rehabilitation, exercise testing, pacemaker technologies, and cardiac mapping.

CEPT 345. Case Studies in Cardiac Electrophysiology. 2 Units.
Prepares students for the dynamic and changing nature of the specialized field of electrophysiology. Includes case study review.

CEPT 348. Cardiac Electrophysiology Seminar. 3 Units.
A comprehensive view of the rapidly evolving field of interventional cardiology. Studies new developments, technological innovations, and advances in clinical application.

**Child Life Specialist (CHLS)**

**Courses**

CHLS 501. Hospitalized Infant and Toddler Development. 3 Units.
Emphasizes the development of infants and toddlers in hospital settings. Presents theory and research regarding socialization, emotional development, and temperament. Discusses bereavement, appropriate health, safety, and nutritional practices, and use of tools for effective practice.

CHLS 502. Introduction to the Child-Life Profession. 3 Units.
Teaches the evolution and history of child life, as well as the theoretical framework that guides the profession. Discusses topics such as professionalism and ethics as they relate to child-life practice. Exposes students to relevant research that constitutes an integral component of evidence-based practice. Shares clinical expectations for matriculation and certification through the Association of Child Life Professionals.

CHLS 503. Preparation for Clinical Placement. 3 Units.
Helps students develop a child-life specialist identity for clinical practice through readings, discussion of clinical practice placements, and formation of a personal philosophy. Students construct a cover letter, resume, and portfolio; as well as research clinical placement sites and become aware of the child-life specialist placement application and interviewing requirements. Discusses ACLP eligibility requirements and internship curriculum modules.

CHLS 504. Child Life Administration and Program Development. 3 Units.
Introduces students to the history and development of the child life profession. Health-care environment, administrative issues, program development, and outcome assessment process. Develops competencies and skills necessary to effectively administer a child life program.
CHLS 505. Cross-Cultural Perspectives in Health Care. 3 Units.
Introduction to the diversity of cultures and its impact on the delivery of health-care services. Explores characteristics of composition, cultural practices and preferences, and health-care issues faced by selected cultures. Presents human differences, preferences, biases, and stereotypes. Fosters development of awareness, sensitivity, and competence required to affirm diversity in health-care and practice settings.

CHLS 506. Therapeutic Play for Children Affected by Illness and Injury. 3 Units.
Teaches the developmental aspects of play therapy, in collaboration with the developmental stages of the child/teen and family in the context of a health-care setting. Provides student with an experiential understanding of play therapy, recreation therapy, education, and practice.

CHLS 507A. Aspects of Illness and Disease. 3 Units.
Teaches the child life student about the childhood disease process and describes the pathophysiology, symptoms, diagnostic testing, and treatment of disease. How disease affects the child and family’s behavioral, social, and emotional development and coping strategies.

CHLS 507B. Aspects of Illness and Disease. 3 Units.
Provides students with information regarding the effects of disease and/or injury on the physical, emotional, and social needs of children/adolescents and their families. Discusses medical terminology as it relates to the hospitalized child. Provides students with techniques—from medical, psychological, and social aspects—to effectively deal with behaviors that accompany hospitalization.

CHLS 508. Grief and Loss. 3 Units.
Promotes understanding of various theories, and practices specific interventions that assist hospitalized children/teens or adult family members when they encounter issues of death, loss and/or grief. Students examine how these issues affect them personally and professionally; and describe their own epistemology regarding death, loss and grief. Examines these issues from a family-system’s perspective in a hospital setting.

CHLS 509. Child-Life Assessment. 3 Units.
Orients students to child life in hospitals and other health-care environments; and gives attention to stress and coping assessments, along with other interventions used to assist patients and families. Examines additional interventions and significant variables, such as providing emotional support for families and encouraging optimum development of children facing a broad range of challenging experiences. Addresses roles and responsibilities of membership on an interdisciplinary team.

CHLS 600. Child Life Theory and Practice. 3 Units.
Examines children and their families in a health care setting from the perspective of a child life specialist. Demonstrates the role of the child life specialist in minimizing the stress and anxiety experienced during hospitalization. Focuses on educational and play components, as well as the general support and scope of practice that are unique to the field of child life.

CHLS 604. Child Life Internship Seminar I. 4 Units.
Blends didactic and experiential learning in order to bridge the gap between child-life theory and the application of child-life principles. Prepares students for clinical work in the field of child life. Discusses the clinical requirements recommended by the Association of Child Life Professionals (ACLP), with emphasis on the ACLP’s standards of clinical practice. Enrollment requires registration for CHLS 701: Clinical Training. Prerequisite: CHLS 608.

CHLS 605. Child Life Internship Seminar II. 4 Units.
Blends didactic and experiential learning in order to bridge the gap between child-life theory and the application of child-life principles. Prepares students for work in the field of child life through the principles of clinical course work shared in class. Discusses the clinical requirements recommended by the Association of Child Life Professionals (ACLP) and gives special attention to the standards of clinical practice set forth by the official documents of ACLP. Prerequisite: CHLS 608.

CHLS 606. Parenting Medically Fragile Children. 3 Units.
Introduces students to parenting issues related to the medically fragile child. Provides knowledge of theories, techniques, skills, available community resources, and legal and ethical considerations that pertain to this specific group.

CHLS 607. Child Life Professional. 3 Units.
Prepares students for entering the professional field of child life by demonstrating clinical assessment, documentation, and skills related to child life practice. Includes application of ethical principles, as well as issues of professionalism. Requires a 100-hour practicum.

CHLS 608. Child Life Practicum. 1 Unit.
Students carry out assigned playroom duties: supervise activities that foster creativity, divert patients from stress and worry, and normalize their environment; and provide opportunities for patients and families to socialize and engage in developmentally appropriate activities. Students assist with bedside interaction and interventions and assist staff with escorting patients to other locations of the hospital for special programming.

CHLS 609. Global Practice: Child Life Specialist. 3 Units.
Introduction to child life practice in a global context. Examines ethical and practice issues associated with delivery of pediatric psychosocial services in health-care systems in underdeveloped and developed environments. Gives critical attention to issues of pediatric and adolescent growth and development, family-centered care, grief and loss, and advocacy. Shares models for learning and collaboration within the context of health-care delivery.

CHLS 610. Child Life Internship II. 4 Units.
Blends didactic and experiential learning in order to bridge the gap between child-life theory and the application of child-life principles. Prepares students for work in the field of child life through the principles of clinical course work shared in class. Discusses the clinical requirements recommended by the Association of Child Life Professionals (ACLP) and gives special attention to the standards of clinical practice set forth by the official documents of ACLP.

CHLS 694. Directed Study: Child Life Specialist. 1-4 Units.
Individual study in areas of special interest concerning the pediatric patient and family. May be repeated for credit at the discretion of the faculty.

CHLS 700. Clinical Training. 2 Units.
A child-life practicum designed as an introductory experience for individuals interested in pursuing the child-life profession. Students enroll in an approved hospital site, complete 100-120 hours, and meet with a supervisor who meets ACLP requirements.

CHLS 701. Clinical Training. 6 Units.
Hands-on clinical training experience that provides the student with an opportunity to build on course work and put theory into practice while working in a variety of hospitals and related settings under the direction of a certified child-life specialist (CCLS). 600 hours required through ACLP.
CHLS 702. Clinical Training. 6 Units.
Hands-on clinical training experience that provides the student with an opportunity to build on course work and put theory into practice while working in a variety of hospitals and related settings under the direction of a certified child-life specialist (CCLS). 600 hours required through ACLP. Prerequisite: CHLS 608.

Clinical Laboratory Science/Cytotechnology (CLSC)

Courses

CLSC 301. Introduction to Radiographic Procedures I. 2 Units.
Introduces the nature and description of radiographic procedures for the nonradiologic technologist, with an emphasis on radiographic procedures used in the collection of cytologic specimens. Applies principles, medical techniques, and instrumentation to a radiographic setting. Includes observation laboratory.

CLSC 302. Introduction to Radiographic Procedures II. 2 Units.
Introduces the nature and description of radiographic procedures for the nonradiologic technologist, with an emphasis on radiographic procedures used in the collection of cytologic specimens. Applies principles, medical techniques, and instrumentation to a radiographic setting. Includes observation laboratory.

CLSC 341. Gynecologic Cytology. 11 Units.
Study of the anatomy, histology, and cytology of the female genital tract—including cytohormonal changes, nonneoplastic abnormalities, premalignant and malignant lesions, and rare extraterine malignacies. Students interpret clinical history, explain significance of data, render diagnoses, and offer recommendations for further testing. Lecture and laboratory.

CLSC 351. Respiratory Cytology. 8 Units.
Study of the anatomy, histology, and cytology of the respiratory tract—including fine needle aspiration of the lung. Students interpret clinical history, explain significance of data, render diagnoses, and offer recommendations for further testing. Lecture and laboratory.

CLSC 353. Urinary Tract and Prostate Cytology. 3 Units.
Study of the anatomy, histology and cytology of the urinary tract—including the bladder, ureters, renal pelvis, kidney, and prostate. Students interpret clinical history, explain significance of data, render diagnoses, and offer recommendations for further testing. Lecture and laboratory.

CLSC 357. Gastrointestinal Tract Cytology. 2 Units.
Study of the anatomy, histology, and cytology of the gastrointestinal tract—including the esophagus, stomach, small and large intestines, and colon. Students interpret clinical history, explain significance of data, render diagnoses, and offer recommendations for further testing. Lecture and laboratory.

CLSC 364. Body Fluid Cytology. 5 Units.
Anatomy, histology, and cytology of fluids from serosal cavities, including CSF. Students interpret clinical history, explain significance of data, render diagnoses, and offer recommendations for further testing. Lecture and laboratory.

CLSC 371. Cytopreparation Techniques. 3 Units.
Collection techniques; fixation and staining procedures; preparation of monolayers, smears, and cell blocks from various cytologic specimens. Includes basic laboratory skills, such as universal precautions, reagent preparation, centrifugation, pipetting, and micropipetting. Introduces basic laboratory operations, including quality control, quality assurance, laboratory safety, and emergency preparedness. Lecture, demonstration, and laboratory.

CLSC 373. Histotechnology Techniques. 1 Unit.
Technical preparation of tissue specimens for microscopic evaluation, with emphasis on special stains and immunohistochemistry. Lecture and observation laboratory.

CLSC 381. Fine Needle Aspiration Cytology I. 4 Units.
Study of the benign and malignant cells aspirated from thyroid, salivary gland, breast, liver, pancreas, lymph node, soft tissue masses, and other miscellaneous organs. Includes fine needle aspiration techniques, touch prep of cores preparation, and rapid on-site adequacy assessment. Students interpret clinical history, explain significance of data, render adequacy assessment and/or diagnoses, and offer recommendations for further testing. Lecture and laboratory.

CLSC 382. Fine Needle Aspiration Cytology II. 6 Units.
Study of the benign and malignant cells aspirated from thyroid, salivary gland, breast, liver, pancreas, lymph node, soft tissue masses, and other miscellaneous organs. Includes fine needle aspiration techniques, touch prep of cores preparation, and rapid on-site adequacy assessment. Students interpret clinical history, explain significance of data, render adequacy assessment and/or diagnoses, and offer recommendations for further testing. Lecture and laboratory.

CLSC 406. Pathophysiology. 3 Units.
Advanced didactic study of disease processes and corresponding pathologic findings of major organ systems of the human body.

CLSC 411. Histopathology I. 4 Units.
Didactic and microscopic study of basic normal tissue types of major organs and systems of the human body, with emphasis on function and clinical relevance of histologic structures.

CLSC 412. Histopathology II. 4 Units.
Didactic and microscopic study of basic pathology of major organs and systems of the human body, with emphasis on relevance to field of cytotology.

CLSC 432. Current Research Techniques. 3 Units.
Introduces current research techniques and skills development. Techniques in immunocytochemistry, image and flow cytometry, and molecular pathology.

CLSC 471. Advanced Cytology Practices I. 2 Units.
Provides further practical experience by working with routine cytology specimens. Includes cytopreparation; microscopic evaluation of gynecologic and nongynecologic specimens, with an emphasis on fine needle aspiration specimens, maintenance of regulatory statistics, and error identification.

CLSC 472. Advanced Cytology Practices II. 2 Units.
Expands clinical experience with advanced theory and techniques, including image-assisted screening, LIS operation, mock proficiency testing, and use of telepathology.

CLSC 481. Supervised Cytology Research Project I. 2 Units.
Research project under the supervision of the program director. Oral presentation and paper.
CLSM 482. Supervised Cytology Research Project II. 2 Units.
Research project under the supervision of the program director. Oral presentation and paper.

CLSM 494. Cytology Practicum. 11 Units.
Eleven weeks of clinical cytology internships in a variety of cytopathology laboratories. Students rotate through all phases of diagnostic service work and laboratory functions (pre-analytical, analytical, and postanalytical). Independent microscopic evaluation of gynecologic, nongynecologic, and fine needle aspiration specimens.

Clinical Laboratory Science/Medical Technology (CLSM)

Courses

CLSM 105. Procedures in Phlebotomy. 4 Units.
Training in venipuncture and skin puncture, medical terminology, laboratory safety, CPR, basic anatomy and physiology, specimen-collection techniques, hazards/complications, quality assurance methods, and medicolegal issues of phlebotomy. Clinical rotation arranged at Loma Linda University Medical Center and affiliates. CPR training and certificate arranged for students not already certified. Prerequisite: Current CPR certificate.

CLSM 303. Urine and Body Fluid Analysis I. 2 Units.

CLSM 307. Medical Parasitology. 3 Units.
Medically important parasites: life cycles, clinical features, infective diagnostic stages. Demonstrations, slide studies, and diagnostic procedures. Lecture and laboratory.

CLSM 309. Quantitative Analysis (Chemical). 4 Units.
Provides a rigorous background in chemical principles particularly important to analytical clinical chemistry. Develops an appreciation for the task of judging the accuracy and precision of experimental data and the application of statistical methods. Covers both fundamental and practical aspects of chemical analysis; neutralization titrations; acid-base titrations; spectrophotometric methods; and electrochemical and chromatographic methodologies. Lecture and laboratory.

CLSM 315. Physiology. 4 Units.
Physiology of the human body including cellular, neuromuscular, cardiovascular, respiratory, gastrointestinal, renal, and endocrine systems.

CLSM 321. Hematology I. 4 Units.
Examines normal hemostatic physiology, cellular development, and hemostasis in the human. Introduces pathophysiology, with emphasis on clinical and laboratory evaluation of hemostatic status. Theory and background of laboratory procedures used in diagnosis and treatment of hemostatic and other diseases. Stresses proficiency in evaluation of normal and abnormal cellular morphology. Lecture and laboratory.

CLSM 322. Hematology II. 4 Units.
Theory and background of routine and special laboratory procedures used in diagnosis and treatment of hemostatic and other diseases. Emphasizes peripheral blood-cell morphology, hematopoieses, maturation, and kinetics. Pathophysiology of hemostatic disorders, including anemias and hematologic malignancies. Correlation of hemostasis testing with clinical hemostatic disorders. Lecture and laboratory. Prerequisite: CLSM 321.

CLSM 325. Clinical Immunology. 3 Units.
Presents the basic principles of immunology. Topics covered include humoral and cell-mediated immunity, complement, autoimmunity, immunodeficiency, hypersensitivity, tumor immunology, transplant immunology, virology, syphilis serology, and immunologic laboratory techniques. Emphasizes principles, laboratory procedures, and clinical significance. Lecture and laboratory.

CLSM 327. Clinical and Pathogenic Microbiology I. 5 Units.
Introduces clinical laboratory identification methods and procedures. Lecture and laboratory.

CLSM 328. Clinical and Pathogenic Microbiology II. 5 Units.
Nature and control of microorganisms encountered in clinical material and various anatomical sites. Emphasizes antimicrobial agents, mycology, and virology, including hepatic viruses and HIV/AIDS. Lecture and laboratory. Prerequisite: CLSM 327; or consent of instructor.

CLSM 331. Biochemistry. 5 Units.
Chemical structure and metabolism of carbohydrates, amino acids, lipids, and nucleic acids. Protein synthesis, functions, and analysis. Enzymes and their structure, function, kinetics, and regulation. Lecture and laboratory.

CLSM 332. Clinical Chemistry I. 4 Units.
Clinical chemistry procedures and their clinical significance in medicine, with focus on the following areas: fluids and electrolytes, acid-base balance, carbohydrates and diabetes mellitus, and proteins. Presents quality assurance, method evaluation, and establishment of reference ranges. Lecture and laboratory. Prerequisite: CLSM 331; or consent of instructor.

CLSM 333. Clinical Chemistry II. 4 Units.
Clinical chemistry procedures and their clinical significance in medicine, with focus on the following areas: lipids, lipoproteins, cardiovascular disease, enzymes, liver function, the endocrine system; thyroid, parathyroid, adrenal cortex and catecholamines, and steroids; reproduction, pregnancy, and fetal well-being; therapeutic drug monitoring and toxicology. Lecture and laboratory. Prerequisite: CLSM 332.

CLSM 341. Immunohematology I. 3 Units.

CLSM 342. Immunohematology II. 3 Units.

CLSM 396. CLS Junior Seminar. 1 Unit.
Prepares student for entry into the senior year clinical practicum. Introduces student to the clinical laboratory and its operations by direct observation and discussions to include pre-analytical, analytical, and postanalytical areas. Students expected to apply knowledge acquired from all disciplines within the junior year curriculum. Visits to off-site locations may be required.
CLSM 411. Urine and Body Fluid Analysis II. 1 Unit.
Correlates theory and clinical experience with and applies them to analytical techniques. Assesses and interprets data. Evaluates and compares methodologies. Urinalysis screening procedures and applications in the diagnosis of renal, systemic, and metabolic diseases. Processing, analysis, and morphologic evaluation of body fluids. Prerequisite: CLSM 303.

CLSM 413. Diagnostic Microbiology. 6 Units.
Correlates theory and clinical experience with and applies them to analytical techniques. Assesses and interprets data. Evaluates and compares methodologies. Directed study and review of diagnostic bacteriology, mycology and virology. Emphasizes isolation and identification of pathogenic microorganisms. Includes susceptibility testing, instrumentation, and rapid identification methods. Prerequisite: CLSM 307, CLSM 327, CLSM 328.

CLSM 414. Clinical Parasitology. 2 Units.
Correlates theory and clinical experience with and applies them to analytical techniques. Assesses and interprets data. Evaluates and compares methodologies. Directed study and review of medical parasitology. Emphasizes testing for and identification of pathogenic parasites. Prerequisite: CLSM 307.

CLSM 422. Hematology III. 6 Units.
Correlates theory and clinical experience with and applies them to analytical techniques. Assesses and interprets data. Evaluates and compares methodologies. Directed study and review of hemostasis, cellular quantification and identification techniques, and clinical hematology. Includes white cell, red cell, platelet, and hemostatic disorders. Prerequisite: CLSM 321, CLSM 322.

CLSM 434. Clinical Chemistry III. 5 Units.
Correlates and applies theory and clinical experience with analytical techniques. Assesses and interprets data. Evaluates and compares methodologies. Directed study and review include: carbohydrates, proteins, lipids, enzymology, electrolytes, acid-base balance, endocrine system, and therapeutic drug monitoring. Prerequisite: CLSM 333.

CLSM 435. Immunoassay and Molecular Diagnostic Techniques. 3 Units.
Reviews common immunoassay and molecular diagnostic assay methodologies utilized in the clinical laboratory. Includes immunoassay technologies (EIA, ELISA, EMIT, FPIA), and chemiluminescence; and, molecular diagnostic techniques (nucleic acid extraction and purification, gel electrophoresis, nucleic acid hybridization and blots, DNA sequencing, and amplification technologies). Examines signal, target amplification, and real-time technologies. Addresses laboratory design and safety issues. Prerequisite: CLSM 325; or consent of the instructor.

CLSM 442. Immunohematology III. 3 Units.
Applies theory and techniques routinely used in transfusion medicine. Emphasizes correlation with clinical experience. Directed study and review include type and screen, antibody identification, investigation of hemolytic disease of the newborn, hemotherapy, and hazards of transfusion. Assesses and interprets data. Overview of donor facilities: donor criteria, records management, component preparation, blood storage, and infectious disease testing. Prerequisite: CLSM 341, CLSM 342.

CLSM 451. Clinical Laboratory Management I. 2 Units.
Introduces management theory, including: management styles, professional communications, business ethics, group theory, team building, process management, process control, and personnel.

CLSM 452. Clinical Laboratory Management II. 2 Units.
Financial management, with emphasis on concepts, tools, and strategies underlying financial decision making. Topics include health-care reimbursement systems, coding, billing, development of operating budgets, and financial reports. Concepts of financial negotiations, inventory management, and financial planning. Integrates and applies analytical techniques used in the service industries.

CLSM 453. Clinical Laboratory Management III. 2 Units.
Introduces theories of quality management, organization, strategic planning, and the decision-making process. Reviews and analyzes government agencies, legislation, and regulatory bodies that impact laboratory management. Compares quality systems-management philosophies.

CLSM 455. Special Procedures. 4 Units.
Clinical and theory-based assessment and interpretation of data. Evaluation and comparisons of methodologies including immunoassays, thin-layer and high-pressure liquid chromatography, electrophoresis, spectrophotometry, toxicology, amino acids assay, rapid-detection testing for bacteria and viruses, polymerase and ligase chain reactions, Western blot assays, serology, and current immunologic techniques. Prerequisite: CLSM 325, CLSM 333.

CLSM 471. Clinical Practicum I. 5 Units.
Thirteen weeks of supervised clinical laboratory experience in selected areas, including parasitology, hematology, urinalysis, and body fluids. Student performs tests routinely done in these areas of the clinical laboratory.

CLSM 472. Clinical Practicum II. 5 Units.
Thirteen weeks of supervised clinical laboratory experience in selected areas, including: microbiology and immunohematology, with experience in transfusion services and in a blood-collection facility. Student performs tests routinely done in these areas of the clinical laboratory. Emphasizes clinical-laboratory quality-control procedures and evaluation.

CLSM 473. Clinical Practicum III. 5 Units.
Thirteen weeks of supervised clinical laboratory experience in selected areas, including: chemistry and special procedures. Student performs tests routinely done in these areas of the clinical laboratory. Incorporates experience in administrative duties.

CLSM 474A. Clinical Correlations. 1 Unit.
Interactively bridges knowledge from textbook to clinical practice and decision making. Stimulates students' intellectual curiosity as it applies to laboratory medicine—including interpretation of laboratory data, case study analysis, impact on patient treatment and prognosis, assessment of validity of laboratory data, and administration of mock board examinations.

CLSM 474B. Clinical Correlations. 1 Unit.
Interactively bridges knowledge from textbook to clinical practice and decision making. Stimulates students' intellectual curiosity as it applies to laboratory medicine—including interpretation of laboratory data, case study analysis, impact on patient treatment and prognosis, assessment of validity of laboratory data, and administration of mock board examinations.

CLSM 474C. Clinical Correlations. 1 Unit.
Interactively bridges knowledge from textbook to clinical practice and decision making. Stimulates students' intellectual curiosity as it applies to laboratory medicine—including interpretation of laboratory data, case study analysis, impact on patient treatment and prognosis, assessment of validity of laboratory data, and administration of mock board examinations.
CLSM 496. Clinical Laboratory Science Seminar I. 1 Unit.
Introduces capstone projects which incorporate skills developed and knowledge obtained in the Clinical Laboratory Science Program junior year. Project must be of current interest. Topics may include laboratory coding for inpatient and outpatient health-care settings. Prerequisite: Satisfactory completion of Clinical Laboratory Science Program junior-year courses, or consent of instructor.

CLSM 497. Clinical Laboratory Science Seminar II. 1 Unit.
Continues assigned capstone project. Presents relevant contemporary topics. Prerequisite: CLSM 496; or consent of instructor.

CLSM 498. Clinical Laboratory Science Seminar III. 2 Units.
Preparation of capstone project with application of educational methodologies and objective writing skills developed and knowledge obtained during the Clinical Laboratory Science Program junior and senior years. Project-related topics include presentation skills, assessment of impact on clinical outcomes, and analysis and implementation of clinical applications. Prerequisite: CLSM 496, CLSM 497; or consent of instructor.

CLSM 499. Clinical Laboratory Science Independent Study. 1-5 Units.
Project or paper to be submitted on a topic of current interest in an area related to medical technology. Regular meetings provide student with guidance and evaluation. Elected on the basis of need or interest.

Coding Specialist (HLCS)

Courses

HLCS 236. Pharmacology. 2 Units.
Introduces pharmacology, including a review of pharmaceuticals used in diagnosis, prevention, and treatment of disease as commonly encountered in medical records.

HLCS 238. Essentials of Human Diseases. 3 Units.
Surveys human diseases, including the etiology, pathogenesis, and clinical manifestations of commonly encountered diseases.

HLCS 239. Introduction to Health Records Science. 3 Units.
Introduces health-care facilities and the information systems involving health records. In-depth study of health record content, confidentiality of health-care information, and professional ethics.

HLCS 241. Medical Terminology. 2 Units.
Prefixes, suffixes, and root words used in the language of medicine. Terms pertaining to pathology and surgery. Terms studied by body system: gastroenterology, cardiology, neurology, musculoskeletal, dermatology, ophthalmology, otorhinolaryngology, and respiratory.

HLCS 242. Coding I. 4 Units.
Principles and conventions of ICD-10-CM and ICD-10-PCS coding in diseases and procedures pertaining to infectious diseases; diseases of blood, endocrine, respiratory, digestive, genitourinary, skin, and musculoskeletal systems; and mental disorders.

HLCS 243. Coding II. 4 Units.
Principles and conventions of ICD-10-CM and ICD-10-PCS coding in diseases and procedures pertaining to pregnancy, perinatal conditions, poisonings, injuries, complications of medical and surgical care, the circulatory system, and neoplasms. Prerequisite: HLCS 242.

HLCS 245. Coding III. 4 Units.
Principles of current procedural coding terminology (CPT) at the intermediate level, including: surgical coding for all body systems; medical procedures; anesthesia coding; radiology, pathology, and laboratory coding for inpatient and outpatient health-care settings. Modifier assignment. Also includes laboratory practice on 3M software. Prerequisite: HLCS 243.

HLCS 247. Computer Applications in Health Care. 2 Units.
Introduces health-care information systems concepts and applications. Focuses on software application in the health-care arena. Specific topics addressed include: general system theory; data management; interoperability; health record applications (e.g., encoder, ADT-R, ROI, etc); electronic health records; personal health records; mobile technology; telemedicine; bioinformatics; health information exchange; patient informatics applications; and emerging trends in health information technology.

HLCS 254. Evaluation and Management Coding for Billing and Reimbursement. 2 Units.
Principles of billing and third-party reimbursement as they relate to physician professional coding and APC assignment for health-care institutions. Includes E&M coding conventions and modifiers. Covers principles of health service billing, including billing terminologies, the billing process, and universal billing forms for the various physician-practice settings. Includes laboratory practice using actual patient records and 3M encoding software to enhance student proficiency.

HLCS 257. Coding Special Topics. 3 Units.
Coding-system usage by reimbursement agencies, laws governing these processes, and federally supervised coding auditing to assure that the laws of coding are followed. Health-care delivery systems and internal billing and reimbursement in these settings. Requirements of state and federal coding regulatory agencies, ethics of coding, coding quality, and coding compliance. Content varies to accommodate the changing nature of health care reimbursement processes and laws. Prerequisite: HLCS 245.

HLCS 292. Computer Applications in Health Care II. 2 Units.
Introduces health-care information systems concepts and applications. Focuses on software application in the health-care arena. Specific topics addressed include: general system theory; interoperability; specific health record applications (encoder, ADT-R, ROI, etc); electronic health records; personal health records; and patient informatics applications. One hour required each week.

HLCS 296. Coding Practicum I. 2 Units.
Twelve-week (six hours per week) coding laboratory provides a capstone experience for students who have completed all academic course work in coding. Enables students to apply all state and national coding and reimbursement regulations to a variety of inpatient and outpatient records. Provides students the opportunity to improve speed and accuracy prior to entering the job force. Prerequisite: HLCS 257.

HLCS 692. Coding Practicum II. 2 Units.
Continues HLCS 961. HLCS 962 includes an additional twelve-week (six hours per week) coding laboratory experience under direct supervision of an instructor. Prerequisite: HLCS 961.

Communication Sciences and Disorders (CMSD)
Courses

CMSD 217. Beginning Sign Language. 3 Units.
Focuses on learning American Sign Language (ASL) for conversational purposes. Finger spelling, a sign vocabulary of approximately 500 words, and acquisition of the basic grammatical rules of ASL. ASL contrasted with the various sign systems currently being used in educational settings in this country.

CMSD 267. Speech-Language Pathology Assistant Fieldwork. 2 Units.
Guided observation of clinical management of individuals with communication disorders. Supervised clinical experience in assisting the speech-language pathologist in a school and hospital setting. Course may not be taught every year.

CMSD 284. Introduction to Speech-Language Pathology and Audiology. 3 Units.
Major types of disorders. Etiology and treatment. Survey course for students majoring in speech-language pathology and audiology, prospective teachers, and others who may encounter speech-language or hearing disorders in their professions.

CMSD 304. Hearing Science. 4 Units.
Introduces basic theories and laboratory exercises in acoustics, psychoacoustics, and physiological acoustics.

CMSD 314. Language Science. 4 Units.
Introduces techniques of linguistic analyses used in the study of phonology, morphology, syntax, and semantics.

CMSD 318. Transcription Phonetics. 3 Units.
Student develops transcription skills using the International Phonetic Alphabet.

CMSD 324. Language Disorders of Children. 4 Units.

CMSD 334. Speech Sound Disorders in Children. 4 Units.
Definition, classification, etiology, diagnosis, and treatment of phonological/articulation disorders. Prerequisite or concurrent: CMSD 318.

CMSD 367. SLPA Practicum and Ethics. 4 Units.
Discussion of scope of practice and requirements for licensure for SLPAs in the state of California. Discussion of ethical issues related to the profession. Guided observation of clinical management of individuals with communication disorders. Supervised clinical experience in assisting the SLP in a school or hospital setting.

CMSD 368. SLPA Scope of Practice. 1 Unit.
Addresses the laws, regulations, ethics, and clinical principles and procedures within the scope of practice of the speech-language pathologist assistant. Prerequisite or concurrent: CMSD 369.

CMSD 369. SLPA Fieldwork Experience. 3 Units.
Guided observation of clinical management of individuals with communication disorders. Supervised clinical experience in assisting the speech-language pathologist in a school, hospital, or private clinical setting. Prerequisite or concurrent: CMSD 368.

CMSD 376. Anatomy of Speech-Hearing Mechanism. 4 Units.
Anatomy and physiology of auditory-vocal communicative process.

CMSD 388. Communication across the Lifespan. 4 Units.
Overview of language development and normal changes over the lifespan. Development of language from infancy to adolescence, and the effects of aging on communication. Includes study of hearing.

CMSD 417. Speech Science. 4 Units.
Acoustic and physiological correlates of speech-sound production.

CMSD 424. Adult Language Pathology. 4 Units.
Impairment of language and speech related to organic neuropathology.

CMSD 426. Behavior Management Applications with Special Populations. 4 Units.
Addresses the principles of behavior modification and discrete trials training as they apply to persons with autism, developmental delays, congenital syndromes, and attention deficit hyperactivity disorders.

CMSD 436. Speech and Hearing Science. 4 Units.
Outline of fundamental properties of sound creation, transmission, and reception. Utilizes those properties for an in-depth analysis of English consonants, vowels, and prosodies; focusing on applications within the fields of communication sciences and disorders, and audiology.

CMSD 444. Organic Speech Disorders. 4 Units.
Introduces the classification, cause, manifestations, assessment, and treatment of craniofacial disorders/cleft palate, tongue thrust, dysarthria, apraxia of speech, and dysphagia.

CMSD 445. Techniques for ESL and Accent Modification. 2 Units.
Principles and procedures for teaching English as a second language (ESL) and accent modification to bilingual speakers of English.

CMSD 448. Disorders of Fluency. 3 Units.
Overview of fluency disorders in children and adults. Addresses the nature of developmental stuttering and introduces basic therapy techniques used to promote fluency.

CMSD 449. Voice Disorders. 3 Units.
Introduction to healthy and disordered voice. Overview of definition, classification, etiology, diagnosis, and treatment of voice disorders. Vocal characteristics of pitch, intensity, quality, and resonance are discussed.

CMSD 454. Introduction to Audiology. 4 Units.

CMSD 464. Introduction to Aural Rehabilitation. 4 Units.
Explores methods and techniques used with hearing-impaired children and adults who depend on hearing aids, cochlear implants, or assistive devices to develop or improve auditory and visual reception and speech production. Prerequisite: CMSD 454.

CMSD 467. Speech-Language Pathology and Audiology Practicum. 1-4 Units.
Supervised practice in diagnosis and therapy.

CMSD 477. Bilingualism and Biculturalism. 3 Units.
Focuses on clinical competencies and cultural sensitivity necessary and appropriate for addressing the needs of bicultural and bilingual persons. The impact of such knowledge is addressed as it pertains to speech-language pathology assessment and intervention.

CMSD 485. Clinical Methods in Speech-Language Pathology. 4 Units.
Principles and procedures of speech-language therapy within and across disorders. Methods of determining treatment effectiveness. Regulations governing public school services.

CMSD 486. Diagnostic Methods in Speech-Language Pathology. 4 Units.
Purposes for assessment. Procedures employed in describing and diagnosing speech-language impairments.
CMSD 488. Autism Spectrum Disorders. 4 Units.
Characteristics, classifications, theories of etiologies, and principles of management of the autism spectrum disorders. Emphasizes assessment methods and intervention. Prerequisite: CMSD 324, CMSD 426, CMSD 485, CMSD 486.

CMSD 499. Speech-Language Pathology and Audiology Independent Study. 1-2 Units.
Student submits a project or paper on a topic of current interest in an area related to speech-language pathology and audiology. Regular meetings to provide the student with guidance and evaluation. Elected on the basis of need or interest.

CMSD 511. Graduate Portfolio I. 2 Units.
The first in a series of two courses that provides students with a format for demonstrating their acquisition of the knowledge and skills that prepare them for entry into the profession. Students learn the requirements for professional accreditation and certification, and of licensing entities; and develop a professional portfolio. Emphasizes ethical, business, and legislative considerations in speech-language pathology.

CMSD 512. Graduate Portfolio II. 1 Unit.
The second in a series of two courses that teaches students the requirements for professional accreditation and certification, and of licensing entities; and that helps them continue to develop an organized means of demonstrating the knowledge and skills acquired during their graduate program. Requires development of a professional portfolio.

CMSD 514. Anatomy of Speech-Hearing Mechanism. 4 Units.
Addresses anatomy and physiology of basic human auditory-vocal communicative processes. In addition to scheduled classes, students required to meet monthly to discuss application to clinical populations.

CMSD 515. Transcription Phonetics. 3 Units.
Student develops transcription skills using the International Phonetic Alphabet. In addition to scheduled classes, students required to meet monthly to discuss application to clinical populations.

CMSD 516. Speech and Hearing Science. 3 Units.
Introduces and explores basic theories in acoustics, psychoacoustics, and speech perception and production. Includes basic physics and algebra, as well as the application of scientific principles to clinical practice.

CMSD 520. Communication across the Lifespan. 4 Units.
Overview of language development and normal changes over the lifespan. Development of language from infancy to adolescence, and the effects of aging on communication. Includes study of hearing. Includes monthly meetings to discuss clinical applications.

CMSD 521. Language Disorders of Children. 4 Units.
Addresses impairments of language development in children, formal and informal assessment of children, and programming and planning of remediation procedures. Students meet monthly to discuss application to clinical populations. Prerequisite or concurrent: CMSD 520.

CMSD 522. Organic Speech Disorders. 4 Units.
Introduces the classification, cause, manifestations, assessment, and treatment of craniofacial disorders/cleft palate, tongue thrust, dysarthria, apraxia of speech, and dysphagia. In addition to scheduled classes, students required to meet monthly to discuss application to clinical populations.

CMSD 523. Seminar in Early Childhood Language Disorders. 3 Units.
Addresses the principles and procedures in assessment and interventions of language disorders in children. Emphasizes early-language learners (birth to 3 years).

CMSD 525. Seminar in School-Aged Child Language Disorders. 3 Units.
Addresses the principles and procedures of assessment and intervention of preschool, primary, and adolescent school-age children with language disorders. Emphasizes school-age learning in the areas of semantics, syntax, pragmatics, narrative, and phonological awareness.

CMSD 529. Adult Language Pathology. 4 Units.
Addresses impairment of language and speech related to organic neuropathology. In addition to scheduled classes, students required to meet monthly to discuss application to clinical populations.

CMSD 533. Language Science. 4 Units.
Introduces techniques of linguistic analysis used in the study of phonology, morphology, syntax, and semantics. In addition to scheduled classes, students required to meet monthly to discuss application to clinical populations.

CMSD 534. Speech Sound Disorders in Children. 4 Units.
Addresses definition, etiology, characteristics, prevention, assessment, and intervention for phonological/articulation disorders. In addition to scheduled classes, students required to meet monthly to discuss application to clinical populations.

CMSD 535. Voice Disorders. 3 Units.
Discusses diagnosis and intervention techniques used with children and adults displaying a variety of voice disorders. Includes demonstration and operation of instrumentation used for physiological and acoustic analysis of abnormal voice production.

CMSD 536. Speech and Hearing Science. 4 Units.
Fundamental properties of sound creation, transmission, and reception. Utilizes those properties for an in-depth analysis of English consonants, vowels, and prosodies; focusing on applications within the fields of communication sciences and disorders, and audiology. Prerequisite: CMSD 515.

CMSD 537. Clinical Methods in Speech-Language Pathology. 4 Units.
Addresses principles and procedures of speech and language therapy within and across disciplines. Addresses methods of determining treatment effectiveness. Discusses regulations governing public school services. In addition to scheduled classes, students required to meet monthly to discuss application to clinical populations.

CMSD 538. Diagnostic Methods in Speech-Language Pathology. 4 Units.
Discusses purpose of assessment, including procedures employed in describing and diagnosing speech and language impairments. In addition to scheduled classes, students required to meet monthly to discuss application to clinical populations.

CMSD 539. Introduction to Audiology. 4 Units.
Provides anatomy and physiology of the auditory mechanism. Addresses the nature of acoustic stimulus, disorders of the ear, and problems of the hard-of-hearing. Covers pure-tone audiometry. Applicable for California audiometric certification. In addition to scheduled classes, students required to meet monthly to discuss application to clinical populations.

CMSD 545. Issues in School Speech-Language Pathology. 3 Units.
Addresses issues confronted by school speech-language pathologists, including PL 94-142, IDEA, NCLB, planning for and conducting IEPs, scheduling and caseload management, evaluating and assessing students from diverse backgrounds, due process, and advocating for students.

CMSD 546. Laryngopharyngeal Endoscopy Techniques. 1 Unit.
Provides hands-on learning of rigid and flexible endoscopy techniques within the scope of practice for speech pathologists in the assessment and management of communication and swallowing disorders.
CMSD 554. Swallowing Disorders. 3 Units.

CMSD 564. Seminar: Aural Rehabilitation and Cochlear Implants/Hearing Aids. 3 Units.
Studies the mechanisms for achieving hearing rehabilitation—including amplification, speech reading, auditory training, hearing-aid orientation, and speech conservation. Considers hearing-aid function and philosophies of rehabilitation for the hearing impaired (e.g., auditory, aural, manual, and total communication).

CMSD 567. Clinical Practice in Speech-Language Pathology and Audiology, Advanced. 1-6 Units.
Supervised practice in diagnosis and therapy.

CMSD 576. Instrumentation in Speech and Hearing I. 1 Unit.
Lecture, discussion, and laboratory experience in the areas of speech acoustics, speech production and perception, psychoacoustics, and speech and hearing physiology.

CMSD 577. Bilingualism and Biculturalism. 3 Units.
Focuses on clinical competencies and cultural sensitivity necessary and appropriate for addressing the needs of bicultural and bilingual persons. The impact of such knowledge is addressed as it pertains to speech-language pathology assessment and intervention.

CMSD 585. Seminar in Professional Aspects of Speech-Language Pathology. 3 Units.
Emphasizes ethical, business, and legislative considerations in speech-language pathology. Students develop a professional resume and practice interviewing. Covers professional issues such as advocacy, clinical supervision, and diversity.

CMSD 586. Educational Fieldwork I. 1 Unit.
Initial supervised therapy on the elementary and/or secondary level and/or in a classroom for the severely language-handicapped child.

CMSD 587. Counseling in Communication Disorders. 3 Units.
Explores the counseling role of the speech-language pathologist and identifies clinician responsibilities in working with individuals of different cultures, ethnicity, gender, age, and belief systems.

CMSD 588. Educational Fieldwork II. 8 Units.
Supervised therapy on the elementary and/or secondary level and/or in a classroom for the severely language-handicapped child.

CMSD 589. Remediation/Advanced Directed Teaching. 1 Unit.
For students who have not successfully completed CMSD 588. Requires remediation or completion of clinical skills necessary for work in the public schools. Prerequisite: CMSD 588.

CMSD 596. Medical Fieldwork I. 1 Unit.
Initial supervised clinical practice in a medical center, rehabilitation facility, or skilled nursing facility.

CMSD 597. Medical Fieldwork II. 8 Units.
Supervised clinical practice in a medical center, rehabilitation facility, or skilled nursing facility.

CMSD 598. Research Methods and Professional Literature in Communication Sciences and Disorders. 3 Units.
Lecture and discussion that facilitates the student’s ability to read and interpret professional literature, develop research ideas, and develop professional writing skills.

CMSD 599. Remediation/Externship. 1 Unit.
For students who have not successfully completed CMSD 597. Requires remediation or completion of clinical skills necessary for work in medical settings. Prerequisite: CMSD 597.

CMSD 679. Seminar: Motor Speech Disorders/Augmentative Communication. 3 Units.
Problem-based learning seminar that focuses on etiology, characteristics, evaluation, and treatment of motor speech disorders, including the dysarthrias and apraxia.

CMSD 682. Seminar: Traumatic Brain Injury. 3 Units.
Explores pathophysiology, diagnosis, and rehabilitation of cognitive communication disorders in children and adults with traumatic closed-head injuries. Lecture and discussion format emphasizes reading current professional literature and developing skills in formal and informal assessment and functional treatment.

CMSD 684. Seminar: Adult Language Disorders. 3 Units.
Problem-based learning seminar that focuses on etiology, characteristics, evaluation, and treatment of acquired adult language disorders.

CMSD 685. Seminar: Stuttering. 3 Units.
Provides practical instruction in assessment and remediation with individuals who stutter and/or clutter.

CMSD 687A. Seminar: Open Seminar. 1 Unit.
Facilitates students’ advanced study of current issues in the diagnosis and treatment of communication disorders.

CMSD 697. Research. 1-4 Units.
Independent study on a research project selected in consultation with the advisor. For advanced students. May be repeated once. Student’s transcript will show specific area of study, for example: SPPA 699 Directed Study: Adult Language Disorders.

Counseling and Family Science Global (CFSG)

Courses

CFSG 584. Global Health. 3 Units.
Overview of the current status of global health care. Examines the ethical and practice issues associated with delivery of pediatric health care in underdeveloped health-care systems—giving critical attention to issues of pediatric and adolescent growth and development, policies, trends, advocacy, population growth, and disease. Addresses current trends of child-life professionals in global settings.
Counseling (COUN)

Courses

COUN 501. Research Tools and Methodology: Quantitative. 3 Units.
Current social research methods, practice in the use of techniques, consideration of the philosophy of the scientific method, and familiarization with MFAM test instruments. Cross-listing: MFAM 501.

COUN 502. Research Tools and Methodology: Qualitative. 3 Units.
Qualitative methodology. Prepares students to undertake research projects using the intensive interview method of qualitative research. Explores practical and epistemological issues and problems in qualitative research in a workshop format. Cross-listing: MFAM 502.

COUN 515. Crisis Intervention and Client Advocacy. 3 Units.

COUN 524. Psychopharmacology and Medical Issues. 3 Units.
Introduces common physical and medical issues related to the practice of counseling. Students learn a biopsychosocial-spiritual model to assess and intervene—emphasizing psychopharmacology, neuroanatomy, the mind-body relationship, and research relative to the field of counseling.

COUN 528. Culture, Socioeconomic Status in Therapy. 3 Units.
Addresses current information and historical narratives related to cultural diversity that impact belief systems, communication patterns, roles, and expectations within human relationships and systems. Examines SES and a wide range of social, racial, and ethnic factors that create meanings for individuals, couples, families, and mental health counselors. Emphasizes populations that become professional partners or clients served within this geographic region. Cross-listing: MFAM 528.

COUN 540. Foundations of Counseling and Psychotherapy. 3 Units.
Examines history and scope of counseling specialties, principles of collaboration among diverse mental health professionals, factors influencing counseling process, and basic counseling skills. Addresses social ecology impacting consumers and providers within health care. Opens ongoing process of nurturing personal qualities related to counseling practice.

COUN 547. Social Ecology of Individual and Family Development. 3 Units.
Studies human individual development and its relationship to the family life cycle from birth through aging and death of family members. Discusses biological, psychological, social, and spiritual development in the context of family dynamics involving traditional two-parent families, alternative partnerships, single parents, blended families, and intergenerational communities. Cross-listing: MFAM 547.

COUN 556. Psychopathology and Diagnostic Procedures. 3 Units.
Explores the history and development of psychopathology and how it relates to current clinical practice in general and marriage and family therapy in particular. Utilizes the multiaxial classifications of the DSM-IV as a practical basis for diagnostics. Prerequisite: A course in abnormal psychology. Cross-listing: MFAM 556.

COUN 568. Groups: Process and Practice. 3 Units.
Surveys major theoretical approaches, including individual theories, marital groups, network, and family therapy groups. Group laboratory experience provided wherein students apply theory to practice and develop group leadership skills. Cross-listing: MFAM 568.

COUN 574. Educational Psychology. 3 Units.
Explores educational psychology through application of development and learning theories to instruction, achievement motivation, self-esteem, classroom management, supportive and disruptive processes on school sites, campus standards, disciplinary practices, legal/ethical issues. Requires research of effective educational practices and related foundations. Prerequisite: General psychology.

COUN 575. Counseling Theory and Applications. 3 Units.
Counseling theories and applications necessary for work as counselors, therapists, and other mental health professionals. Historical overview of all theories from psychoanalytic, Adlerian, existential, person-centered, Gestalt, behavior, cognitive behavior, reality, feminist, postmodern (solution-focused and narrative), family systems, and integrative perspectives. Meaningful integration of ethics, theory, and experience on personal and case-study levels.

COUN 576. Exceptional and Medically Challenged Children. 3 Units.
Studies the determinants, characteristics, problems, and adjustments of individuals who deviate markedly from the norm in their mental, physical, emotional, or social aptitudes, traits, and tendencies. Emphasizes education and career planning.

COUN 577. Assessment in Counseling. 3 Units.
Develops competencies and understandings for selecting, administering, and interpreting the major types of standardized tests and inventories used in psychology and education. Theoretical principles and issues presented with hands-on applications. Practicum required.

COUN 579. Career Theories and Applications. 4 Units.
Study of career theories such as Holland, Ginzberg, Super; as well as multiple approaches, including family and systemic influences on career choice. Application made to values, ethics, meaning, decision making, and individual differences in twenty-first century work places. Includes laboratory experience in the field.

COUN 584. Advanced Child and Adolescent Development. 2,3 Units.
Psychodynamics involved in child and adolescent problems with respect to the family relationship. Demonstrates a variety of counseling approaches to the treatment of children and adolescents, with emphasis on diverse settings (e.g., education, hospital, and agency). Cross-listing: MFAM 584.

COUN 604. Social Context in Clinical Practice: Gender, Class, and Race. 3 Units.
Introduces social inequalities that result in unfairness, health disparities, assaults to personal dignity, and family stress. Focuses on how one’s position within social hierarchies—such as gender, socioeconomic status, race, and sexual orientation—affects psychological and relational health. Examination of how family therapists and counselors address these social contextual factors as part of a recovery-based approach that empowers people within their relationships and social systems.Cross-listing: MFAM 604.

COUN 614. Law and Ethics. 3 Units.
Examines laws, ethical standards, and current trends for mental health professionals as delineated by organizations such as ACA, ASCA, BBS, and CTC. Reviews legal and ethical guidelines for mental health counseling with individuals and families, including topics related to child welfare, separation, divorce, and financial aspects of family maintenance. Emphasizes ethical counselor-client relationships and collaboration with mental health colleagues. Explores counselor’s sense of self, human values, professional behavior, scope of practice, and ethics. Assists in understanding impact of culture, poverty, social stress, and biology on the recovery process.
COUN 624. Individual and Systems Assessment. 3 Units.
Applies psychological testing methods in the diagnostic assessment of individual, family, and group behavioral dynamics as encountered in marriage and family counseling. Observations and/or laboratory experience. Cross-listing: MFAM 624.

COUN 638. Family Therapy and Chemical Abuse. 3 Units.
Examines current theories of etiology of substance use disorders and the effects of psychoactive drug use. Emphasizes assessment and evaluation strategies; impact on mental, biological, relational, and community systems; evidence-based prevention and treatment approaches within a recovery process orientation. Explores issues of regional multicultural competence, human diversity, and access to care. Cross-listing: MFAM 638.

COUN 644. Child Abuse and Family Violence. 3 Units.
Presents characteristics of physical and emotional abuse, neglect, sexual molestation, and family violence including offender and nonoffender traits. Focus on treatment including individual, group, and family therapy. Ethical and legal issues, community resources, and multidisciplinary approaches to child abuse. Examines cultural, SES, poverty and/or social stress impacts on mental health and recovery. Cross-listing: MFAM 644.

COUN 674. Human Sexual Behavior. 3 Units.
Sexuality in contemporary society from the sociopsychological viewpoint. Anatomy and physiology of human sexuality; reproduction, normal and abnormal sexual response, psychosexual development, human fertility, human sexual dysfunction. Integration of systems theory. A minimum of thirty contact hours.

COUN 675. Dynamics of Aging. 1,2 Unit.
Studies aging and related processes of personal and systemic change, such as developmental and self-actualization challenges, retirement, chronic illness, long term care, losses, and other end-of-life issues. Additional unit of study involves laboratory field experience.

COUN 678. Consultation and Program Evaluation. 3 Units.
Examines principles and practices of consultation and program evaluation within educational and clinical counseling environments. Emphasizes systemic concepts, leadership development, counselor advocacy, relational competence, team building, and professional accountability of personnel and programs.

COUN 679. Professional School Counseling. 3 Units.
Integrates knowledge and skills essential for development, implementation, coordination, and supervision of counseling programs within educational institutions—with emphasis on the role and function of school counselors in preschool, elementary, middle, and secondary grades. Applications made to state graduation requirements, case management, school law, community, consultation, and professional ethics.

COUN 680. Field Experience in Counseling. 3-9 Units.
Addresses educational assessment, personal and social counseling, academic and career counseling, program development, program coordination and supervision, consultation, legal aspects, and professional ethics in schools and other agencies. Meets State Pupil Personnel Services requirement of a minimum of 600 clock hours in two educational levels, public school activity, and involvement with students from diverse cultural, ethnic, and language backgrounds.

COUN 681. School Counseling Practicum and Seminar. 1 Unit.
Focuses on California standards for the Pupil Personnel Services Credential in School Counseling. Addresses professional development and practice of school counseling. Enrollment restricted to students in the M.S. degree in Counseling Program and in the School Counseling Certificate Program. Requires minimum of two quarters of COUN 681 School Counseling and practicum.

COUN 682. Clinical Counseling Practicum and Seminar. 1 Unit.
Focuses on California standards for licensure as a licensed professional clinical counselor (LPCC). Addresses professional development and practice of clinical counseling through readings, case presentations, University mentoring, and group process. Enrollment restricted to students in M.S. degree in Counseling Program. Registration in COUN 682 required during every quarter of field experience in clinical counseling.

COUN 691. Process Approaches to Counseling and Psychotherapy. 2 Units.
Explores advanced process approaches to theory and experiential work fundamental to self-awareness, relationship skills, behavioral observations, self-regulatory processes, emotion-focused therapy, and counselor-client contact with individuals and groups.

COUN 692. Cognitive Approaches to Counseling and Psychotherapy. 2 Units.
Integrates advanced cognitive approaches with experiential work, including current practice of cognitive behavioral therapies such as DBT and TF-CBT. Includes live demonstrations of professional counseling, in-class role play, and laboratory experiences that utilize recording and evaluation of student practice sessions. Enrollment restricted to candidates in clinical degree programs.

COUN 693. Systemic Approaches to Counseling and Psychotherapy. 2 Units.
Integrates theory and advanced approaches to counseling individuals and groups within various systems. Demonstrates evidenced-based psychoeducation programs, therapy structures, and mental health delivery methods, with emphasis on recovery care and trauma response models. Enrollment restricted to candidates in clinical degree programs.

COUN 694. Directed Study: Counseling. 1-4 Units.
Directed study in counseling.

COUN 781. School Counseling Field Experience (PPS). 4 Units.
Requires successful completion and evaluation of 200 hours of counseling activities supervised by a PPS-credentiald school counselor at a public school site. Students may continue an on-going field experience registration over a period of five quarters, with an In Progress (IP) notation until the fifth quarter, which must be graded as Satisfactory (S) or Unsatisfactory (U).

COUN 782. School Counseling Field Experience (PPS). 4 Units.
Requires successful completion and evaluation of 200 hours of counseling activities supervised by a PPS-credentiald school counselor at a public school site. Students may continue an on-going field experience registration over a period of five quarters, with an In Progress (IP) notation until the fifth quarter, which must be graded as Satisfactory (S) or Unsatisfactory (U).

COUN 783. School Counseling Field Experience (PPS). 4 Units.
Requires successful completion and evaluation of 200 hours of counseling activities supervised by a PPS-credentiald school counselor at a public school site. Students may continue an on-going field experience registration over a period of five quarters, with an In Progress (IP) notation until the fifth quarter, which must be graded as Satisfactory (S) or Unsatisfactory (U).
COUN 784. School Counseling Field Experience. 3 Units.
Fourth course in a series of 3-unit registrations (COUN 781-786) for University-arranged field experience in school counseling. Requires that student document 100 hours of counseling practicum; obtain a certificate of clearance from the California Commission on Teacher Credentialing; and subsequently complete 100 hours of supervised counseling in a public school, with on-site supervision by a PPS-credentialed school counselor. Enrollment restricted to students in the M.S. degree in Counseling Program and/or the School Counseling Certificate Program who are working toward the pupil personnel services credential (PPS) in school counseling.

COUN 791. Clinical Counseling Field Experience (LPCC). 3 Units.
Requires successful completion and evaluation of 150 hours—at least 100 of which must be supervised, face-to-face clinical counseling supported by a minimum of 50 hours involving supervision, reporting, documentation, and other counseling-related activities. Students may continue an on-going field experience registration over a period of five quarters, with an In Progress notation (IP) until the fifth quarter, which must be graded as Satisfactory (S) or Unsatisfactory (U).

COUN 792. Clinical Counseling Field Experience (LPCC). 3 Units.
Requires successful completion and evaluation of 150 hours—at least 100 of which must be supervised, face-to-face clinical counseling supported by a minimum of 50 hours involving supervision, reporting, documentation, and other counseling-related activities. Students may continue an ongoing field experience registration over a period of five quarters, with an In Progress notation (IP) until the fifth quarter, which must be graded as Satisfactory (S) or Unsatisfactory (U).

COUN 793. Clinical Counseling Field Experience (LPCC). 3 Units.
Requires successful completion and evaluation of 150 hours—at least 100 of which must be supervised, face-to-face clinical counseling supported by a minimum of 50 hours involving supervision, reporting, documentation, or other counseling-related activities. Students may continue an on-going field experience registration over a period of five quarters, with an In Progress (IP) notation until the fifth quarter, which must be graded as Satisfactory (S) or Unsatisfactory (U).

Criminal Justice (CRMJ)

Courses

CRMJ 515. Crime and Society. 3 Units.
Discusses crime as a social problem and surveys its criminal justice responses. Provides an overview of criminological theory by placing crime in its cultural, social, political, and historical context. Describes the criminal justice system from an institutional perspective; and examines the intersecting roles of the police, forensic science agencies, the courts, and corrections as they aim to promote justice in the context of the social good.

CRMJ 517. Criminal Procedure and Rules of Evidence. 3 Units.
Presents criminal procedures as guided by the U.S. Constitution. Focuses on 4th-, 5th-, 6th-, and 14th-Amendment rights. Includes the introduction of scientific evidence in criminal trials as the point of intersection between science and law, pretrial discovery rules, access to expert witnesses and testing, and federal and state rules of admissibility as they shape the content and process of evidence presentation by expert witnesses.

CRMJ 519. Expert Testimony: Procedure and Practice. 2 Units.
Familiarizes students with judicial procedure, and provides opportunity in a simulated trial setting for them to practice testifying as expert witnesses.

CRMJ 520. Restorative Justice. 3 Units.
Provides a new perspective on the purpose and role of the criminal justice system by examining how restorative justice attempts to forge new relationships between offenders and the people and communities they have victimized.

CRMJ 574. Theories of Crime and Restitution. 3 Units.
Surveys theory and research with respect to the core criminology and restitution theories. Emphasis is on the practical application of the theoretical concepts introduced in the readings.

CRMJ 588. Topics in Forensic Science. 2 Units.
Addresses current interests in specific areas of forensic science, offered at the discretion of the Department of Social Work and Social Ecology. Topics may include quality assurance, forensic chemistry and controlled substances, forensic biology, forensic toxicology, questioned documents, and others. Sections consist of lectures but may also include laboratory experience under the guidance of criminalists.

CRMJ 599. Directed Study/Special Project. 1-4 Units.
Limited to matriculating master’s degree in criminal justice students who wish to pursue independent investigations in criminal justice practice or policy under the direction of a department faculty member.

CRMJ 620. Forensic Mental Health. 3 Units.
Overviews the specialized mental health and substance-abuse disorders treatment for persons incarcerated in jails, prisons, or special forensic psychiatric hospitals. Reviews effective treatment methods in forensic institutions and examines the current criminal justice system's handling of persons with mental illness and substance-abuse disorders.

CRMJ 630. Criminal Justice Planning and Administration. 3 Units.
Examines the structure, function, and effective operation of criminal justice agencies and organizations—including law enforcement, the courts, and corrections—within the overall context of the criminal justice system.

CRMJ 697. Research. 2 Units.
Supports students who choose to complete the thesis option. Provides research matriculation in the collection and analysis of data for the thesis. Students required to register for two quarters, or a total of 4 units.

CRMJ 698. Thesis. 2 Units.
The culminating work of the student's independent research, under the direction of the research advisor. Registration during the quarter in which student defends research and submits final document to the department and School of Behavioral Health.

CRMJ 757A. Professional Practicum and Seminar. 3 Units.
Experiential learning in criminal justice. Students must satisfactorily complete 160 practicum hours and 20 hours of concurrent seminar.

CRMJ 757B. Professional Practicum and Seminar. 3 Units.
Experiential learning in criminal justice. Students must satisfactorily complete 160 practicum hours and 20 hours of concurrent seminar.

CRMJ 757C. Professional Practicum and Seminar. 3 Units.
Experiential learning in criminal justice. Students must satisfactorily complete 160 practicum hours and 20 hours of concurrent seminar.

CRMJ 787. Advanced Professional Practicum and Seminar. 4 Units.
Experiential learning in advanced criminal justice practice. Students must satisfactorily complete 200 practicum hours and 20 hours of concurrent seminar.

Dental Anesthesiology (ANDN)
Courses

ANDN 314. Dental Anesthesia: Local Anesthesia and Inhalation Sedation. 4 Units.
A philosophy of patient management, including use of local anesthetics and nitrous oxide/oxygen sedation, as well as the physiological and psychological aspects of pain and anxiety. Covers the history of anesthesia, patient evaluation, pharmacology, armamentarium and complications regarding use of these agents, and management of office emergencies. Students practice local anesthetic injections and administer nitrous oxide/oxygen to each other.

ANDN 521. Principles of Medicine, Physical Diagnosis, and Hospital Protocol. 1 Unit.
Studies methods recognizing normal and abnormal physical conditions. Reviews organ systems to expand the dentist’s general medical knowledge. Specific topics reviewed include blood diseases, systemic diseases, cardiac disease, patient admission, physical examination, and hospital charting. Repeated registrations required to fulfill total units.

ANDN 547. Anesthesia Grand Rounds. 1 Unit.
Weekly meeting of the Department of Dental Anesthesiology featuring guest lecturers who present a variety of current topics in anesthesiology. One session per month designated as the Mortality and Morbidity Conference.

ANDN 549. Contemporary Anesthesia. 1 Unit.
Presents current concepts, practice, and controversies in general anesthesia. Reviews textbook chapters on a weekly basis during the Fall and Winter quarters.

ANDN 604. Anesthesia Literature Review. 1 Unit.
Weekly session reviews current anesthesia literature.

ANDN 652. Introduction to General Anesthesia. 1 Unit.
Focuses on rapid acquisition of basic knowledge of the important elements of general anesthesia by new anesthesia residents in their first month of training.

ANDN 654. Practice Teaching in Anesthesia. 1 Unit.
Provides opportunity for second-year residents to participate in teaching anesthesia-related topics to first-year residents.

ANDN 674. Crisis Management in Anesthesia. 0.5 Units.
Provides opportunity for residents to respond to simulated anesthesia challenges and complications as their anesthesia knowledge and skills are developed. Offered at the LLU simulation center each quarter over the 24-month program.

ANDN 697A. Research. 1 Unit.
Student identifies a research project, prepares a protocol, and obtains approval for the protocol. Multiple registrations may be needed to complete these research activities.

ANDN 697B. Research. 1 Unit.
Student participates in ongoing research or original projects, collects and analyzes data, and writes a report of findings. Multiple registrations may be needed to complete research activities.

ANDN 697C. Research. 1 Unit.
Resident completes research project, holds a public presentation of research, and submits a publishable paper to his/her research guidance committee (RGC) for approval. Multiple registrations may be needed to complete the publishable paper.

ANDN 746. General Anesthesia. 10 Units.
Administration of general anesthesia and regional block anesthesia to a variety of medical and dental patients in the operating room, under the supervision of attending anesthesiologists. A minimum of 300 clock hours per quarter (8 quarters) required to fulfill total units.

ANDN 751. Dental Anesthesia: Local Anesthesia and Inhalation Sedation. 4 Units.
A philosophy of patient management, including use of local anesthetics and nitrous oxide/oxygen sedation, as well as the physiologic and psychologic aspects of pain and anxiety. Course covers the history of anesthesia, patient evaluation, pharmacology, armamentarium, complications regarding use of these agents, and the management of office emergencies. Students practice local anesthetic injections and administer nitrous oxide/oxygen to each other.

ANDN 801. Dental Anesthesia: Advanced Topics. 2 Units.
Theory of general anesthesia. Hospital dentistry, patient evaluation, medical consultations. Reviews local anesthesia and introduces additional techniques of pain and anxiety control.

Dentistry (DENT)

Courses

DENT 700. Dental Fundamentals I. 16 Units.
Introduction to terminology, morphologic characteristics, and interrelationships of permanent teeth. Introduces periodontal diseases and their classifications. Techniques for producing intraoral and extraoral radiographs and digital images, digital image processing, radiation protection and safety, and infection control. Presents source, use, and manipulation of dental materials, and their physical properties relative to dentistry.

DENT 710. Professionalism, Mission, and Personal Development I. 3 Units.
Introduces skills required for communication in a healthcare environment. Addresses individual, professional, and practical issues confronted by the dentist as a health-care professional. Discusses ethical issues in contemporary dentistry. Provides Christian resources for ethical decision making.

DENT 720. Patient-Centered Care I. 4 Units.
Introduces patient care, fundamentals of dental assisting, and the EHR leading to becoming an integral part of the dental team.

DENT 730. Biomedical Sciences and Oral Ecosystems I. 35 Units.

DENT 750. Dental Fundamentals II. 40.5 Units.
Continues DENT 700, furthering the knowledge and development of skills to practice general dentistry. Prerequisite: DENT 700.

DENT 760. Professionalism, Mission, and Personal Development II. 3.5 Units.
Continues DENT 710, focusing on skills to thrive in a professional environment. Life skills taught to maintain a balanced life in mission and personal development. Prerequisite: DENT 710.
DENT 770. Patient-Centered Care II. 10 Units.
Continues DENT 730. Introduces skills to move students from working as an assistant to becoming a disease control-level dental provider. Prerequisite: DENT 730.

DENT 780. Biomedical Sciences and Oral Ecosystem II. 18 Units.
Continues DENT 730, focusing on how to relate the body’s systems and environment with the practice of dentistry. Prerequisite: DENT 730.

DENT 800. Dental Fundamentals III. 23 Units.
Continuation of DENT 750. Further knowledge and development of skills in the practice general dentistry. Prerequisite: DENT 750.

DENT 810. Professionalism, Mission, and Personal Development III. 2 Units.
Continues DENT 760, focusing on skills to thrive in a professional environment. Teaches life skills to maintain a balanced life in mission and personal development. Prerequisite: DENT 760.

DENT 820. Patient-Centered Care III. 16.5 Units.
Clinical application of the principles of dentistry. Opportunities to gain experience in cases of the type treated by the general dentist—including attendant diagnostic procedures, planning and sequencing of treatment, disease-control procedures, and appropriate continuing-care procedures following treatment. Prerequisite: DENT 770.

DENT 830. Biomedical Sciences and Oral Ecosystems II. 10 Units.
Continuation of DENT 730. Focus on relating the body’s systems and environment with the practice of dentistry. Prerequisite: DENT 780.

DENT 850. Dental Fundamentals IV. 3 Units.
Provides foundational knowledge and skills necessary to perform endodontic treatment on uncomplicated permanent teeth. Treatment planning and problem solving in removable prosthodontics and combination cases. Prerequisite: DENT 800.

DENT 860. Professionalism, Mission, and Personal Development IV. 8 Units.
Continues DENT 810, focusing on skills to thrive in a professional environment. Teaches life skills to maintain a balanced life in mission and personal development. Prerequisite: DENT 810.

DENT 870. Patient-Centered Care IV. 46 Units.
Clinical application of the principles of dentistry. Opportunities to gain experience in cases of the type treated by the general dentist—including attendant diagnostic procedures, planning and sequencing of treatment, disease-control procedures, and appropriate continuing-care procedures following treatment. Prerequisite: DENT 820.

DENT 880. Biomedical Sciences and Oral Ecosystems IV. 2 Units.
Continues DENT 830, focusing on relating the body’s systems and environment with the practice of dentistry. Prerequisite: DENT 830.

**Dental Educational Services (DNES)**

**Courses**

DNES 200. Curricular Practical Training. 0 Units.
Presents opportunities for service learning in different environments. Increases students’ awareness of the importance of oral health education and professional practice and, in the process, gives them insight into different cultural and socioeconomic conditions. Students develop an understanding of LLUSD service learning heritage and the role they play in promoting the healing and teaching ministry of Jesus Christ to their community.

DNES 305. Etiology and Management of Dental Caries. 2 Units.
Etiology, prevention, and management of dental caries. The specific plaque hypothesis; the role of diet, host resistance, and time in caries. Remineralization, principles of medical management, caries risk assessment, patient education.

DNES 400. Interprofessional Laboratory Experience. 0 Units.
An interprofessional laboratory experience that allows dental and dental hygiene students to interact, communicate, and problem solve in a simulated clinical setting with students from other disciplines.

DNES 500. Curricular Practical Training. 0 Units.
Presents opportunities for service learning in different environments. Develops in students an increased awareness of the importance of oral health education and professional practice and, in the process, provides insights into different cultural and socioeconomic conditions. Develops students’ understanding of LLUSD service learning heritage and the role they play promoting the healing and teaching ministry of Jesus Christ to their community.

DNES 504. Curricular Practical Training for IDP. 0 Units.
Presents opportunities for service learning in different environments. Develops an increased awareness of the importance of oral health education and professional practice and, in the process, provides insights into different cultural and socioeconomic conditions. Develops students’ understanding of LLUSD service learning heritage and the role they play promoting the healing and teaching ministry of Jesus Christ to their community.

DNES 700. Orientation to Tooth Morphology. 2 Units.
Tooth morphology, terminology, morphologic characteristics, and the interrelationship of permanent teeth. Laboratory experience waxing various teeth.

DNES 705. Etiology and Management of Dental Caries. 2 Units.

DNES 707. Personal Development. 2 Units.
Introduces students to individual, professional, and practical issues confronted by the dentist as a member of the health professions. Topics include understanding human behavior, as well as maladaptive behaviors; developing coping skills and a professional perspective; and managing stress.

DNES 708. Introduction to the Dental Profession. 1 Unit.
Overview of dentistry as it has evolved into a health-care profession. History of dentistry, characteristics of professions, dental ethics, purpose and structure of professional organizations, discussion of the specialties. Introduces personal finance.

DNES 718. Communication Basics for the Dentist. 1 Unit.
Introduces students to the skills required for communication in a health-care environment. Topics include basic communication skills, problem-solving strategies, patient-provider communication, and communication with special needs populations (e.g., pediatric patients).

DNES 794. Public Health Dentistry. 2 Units.
Introduces community dentistry, oral epidemiology, public health programs, preventive dentistry, health education, and volunteer programs.

DNES 800. Interprofessional Laboratory Experience. 0 Units.
An interprofessional laboratory experience that allows dental and dental hygiene students to interact, communicate, and problem solve in a simulated clinical setting with students from other disciplines.
DNES 804. Applied Statistics. 2 Units.
Introduces research methodology. Develops critical statistical thinking, enabling students to critique research results reported in dental journals and to understand and correctly interpret the research so that new findings can be properly implemented in dental practice. Provides students with statistical tools necessary to pursue lifetime learning in the dental sciences.

DNES 806. Research Design. 2 Units.
Developing a research protocol. Authoring skills, role of the mentor and investigator, topic selection, assurances and approvals (animals/IRB), fiscal responsibility, and research misconduct.

DNES 806L. Research Design Laboratory. 1 Unit.
Student reviews literature and designs a research proposal in preparation for professional presentation of a table clinic. Student conducts research experiment or project culminating in presentation of the results at a professional meeting.

DNES 807. Practice Management I. 2 Units.
Management of a dental practice and dental career development: a personal strategic career plan and development of a resume. Interpretation of basic accounting reports and statements such as balance sheets, income statements, and cash flow. Development of a personal budget. Management of student and other debt.

DNES 809. Practice Management II. 2 Units.

DNES 851. The Dentist and the Law. 2 Units.
Addresses statutes, regulations, and case law that govern the practice of dentistry.

DNES 889. National Board Part II Review. 2 Units.
Reviews basic and clinical sciences and their application in case-based testing format to prepare students for National Dental Board Examination Part II.

**Dental Hygiene (DNHY)**

**Courses**

DNHY 303. Dental Materials and Techniques. 2 Units.
Materials and equipment used in dentistry. Practice in the manipulation and use of common materials. Includes a laboratory component.

DNHY 305. Oral Anatomy Lecture. 2 Units.
Anatomy of the teeth and surrounding tissues.

DNHY 305L. Oral Anatomy Laboratory. 1 Unit.
Laboratory for DNHY 305, Oral Anatomy Lecture.

DNHY 309. Radiology I. 3 Units.

DNHY 310. Radiology II. 3 Units.
Continues laboratory techniques. Intraoral and extraoral radiographic interpretation—including anatomy, pathology, and interpretation of the disease process of the oral hard tissues. Basic fundamentals of radiographic selection criteria. Includes laboratory component.

DNHY 311. Preclinical Dental Hygiene I Lecture. 2 Units.
Preclinical phases of dental hygiene, including instrumentation techniques, patient management, intra- and extraoral soft-tissue assessment, charting procedures, disease processes, patient-health assessment, basic operative preparation, clinical asepsis, and oral health-care techniques.

DNHY 321L. Preclinical Dental Hygiene I Laboratory. 2 Units.
Laboratory course for DNHY 321, Preclinical Dental Hygiene I.

DNHY 322. Preclinical Dental Hygiene II Lecture. 2 Units.
Continues DNHY 321. Prerequisite: DNHY 321.

DNHY 322L. Preclinical Dental Hygiene II Laboratory. 2 Units.
Laboratory course for DNHY 322, Preclinical Dental Hygiene II Laboratory. Prerequisite: DNHY 321, DNHY 321L.

DNHY 323. Preclinical Dental Hygiene III. 2 Units.
Continues DNHY 322. Prerequisite or concurrent*: DNHY 321, DNHY 322*, DNHY 321L, DNHY 322L*.

DNHY 323L. Preclinical Laboratory. 1 Unit.
Laboratory course for DNHY 323, Preclinical Laboratory. Prerequisite or concurrent*: DNHY 321L, DNHY 322L*, DNHY 321, DNHY 322*.

DNHY 328. Dental Hygiene Portfolio Practicum. 1 Unit.
Student develops a capstone project to show evidence of personal growth and success in the dental hygiene core competencies.

DNHY 375. Dental Hygiene Clinic. 1 Unit.
Clinical application of skills and techniques of dental hygiene. Prophylaxes on pediatric and adult patients.

DNHY 376. Dental Hygiene Clinic. 4 Units.
Continues DNHY 375. Prerequisite or concurrent: DNHY 375.

DNHY 380. Medically Compromised Patients. 2 Units.
Lectures dealing with the medically compromised patient relative to the use of local anesthetics, drug interactions, need for antibiotic premedication, and necessary modification in treatment planning. Repeated registrations required to fulfill total units.

DNHY 381. Pharmacology for the Dental Hygienist I. 2 Units.
Introduces the basic principles of pharmacology. Emphasizes the use, actions, and clinical implications/contraindications to medications used by dental patients.

DNHY 382. Pharmacology for the Dental Hygienist II. 2 Units.
Continues DNHY 381. Emphasizes application through the use of case studies.

DNHY 390. Introductory Statistics. 2 Units.
Fundamentals of statistical analysis and critique of research data in scientific literature and in student research projects. Inferential and descriptive statistics, frequency distribution, histograms, bar graphs, and statistical tests. Computer applications in preparing and analyzing research data. Domain II.

DNHY 405. Introduction to Periodontics. 2 Units.
Reviews gross and microscopic anatomy of the periodontium in health and disease. Primary etiology of periodontal disease. Examines patient’s clinical periodontal status. Introduces the diagnostic and treatment-planning process.

DNHY 406. Orthodontics Concepts for Dental Hygiene. 1 Unit.
Applies basic skeletal and dental growth, and development to orthodontics. Includes treatment modalities and procedures required for successful practice of orthodontics.
DNHY 408. Professional Ethics. 2 Units.
Develops understanding of hygienist's obligations to the public and to his/her professional association. Defines the ethical and mature conduct expected of professional health-care providers. Compares and contrasts professional ethics and personal morality as they relate to dental hygiene practice.

DNHY 409. Jurisprudence and Practice Management. 2 Units.
Laws and regulations that govern the practice of dental hygiene, with special emphasis on California regulations. Standards of government regulations. Obligations of the hygienist to the public and to his/her profession.

DNHY 411. Dental Hygiene Topics I. 2 Units.
Student develops advanced hygiene-care planning skills, with emphasis on knowledge synthesis. Topics cover aspects of patient care, including whole-patient care and patients with special needs.

DNHY 412. Dental Hygiene Topics II. 2 Units.
Continues instruction in advanced clinical skills. Areas covered include pulp vitality, dentinal hypersensitivity, esthetic whitening procedures, chemotherapeutic agents, and use of technology for the dental hygiene process of care.

DNHY 413. Dental Hygiene Topics III. 2 Units.
Topics related to employment for dental hygienists. Additional topics include various opportunities in the dental hygiene profession and educational advancement strategies.

DNHY 414. Personal Finance. 2 Units.
Personal finance topics, including credit, taxes, insurance, real estate, budgeting, housing, and inflation.

DNHY 415. Applied Nutrition. 2 Units.
Basic concepts of nutrition. Balance, adequacy, nutrient density, dietary choice, weight management, nutrition, and oral health. Addresses nutritional needs of children and the aged, and medically and dentally compromised patients. Dietary assessment and counseling.

DNHY 416. Dental Health Education I. 2 Units.
Current theories and principles of psychology as they relate to learning and teaching, personality development and change, and interpersonal processes and dynamics.

DNHY 417. Dental Health Education II. 2 Units.
Principles and practices involved in teaching dental public health. Fieldwork in local schools and community. Methods and practice of professional presentation.

DNHY 421. Research I. 2 Units.
Introduces research methodology. Evaluates literature, emphasizing statistics adequate for interpretation of the literature. Student reviews literature and designs a research proposal in preparation for professional presentation of a table clinic or informational project. In progress (IP) given until completion of all units for this course.

DNHY 422. Research II. 2 Units.
Review and emphasis of research methodology. Develops literature review, emphasizing statistics adequate for interpretation of the literature. Student continues to develop a research proposal in preparation for professional presentation of a table clinic or informational project. Student conducts research experiment or project culminating in presentation of the results at a professional meeting. In progress (IP) given until completion of all units for this course.

DNHY 431. Public Health Dentistry. 3 Units.
Philosophy, principles, language, and objectives of public health and public health dentistry. Critical review of the literature.

DNHY 435. Special Topics in Periodontal Therapy. 2 Units.
Studies advanced periodontal topics and special problems related to periodontal therapy.

DNHY 450. Junior Clinical Seminar. 1 Unit.
A two-quarter course that introduces topics and issues directly and indirectly related to the comprehensive practice of dental hygiene.

DNHY 451. Clinical Seminar I. 1 Unit.
Topics and issues related to clinical competency and development of critical-thinking skills through the use of patient-care examples and class discussion.

DNHY 452. Clinical Seminar II. 1 Unit.
Topics and issues related to clinical competency and preparation for the clinical board examination. Student development of advanced patient-care plans.

DNHY 453. Clinical Seminar III. 1 Unit.
Topics and issues related to clinical competency. Presentation of advanced patient-care plans. Prerequisite or concurrent: DNHY 452.

DNHY 475. Dental Hygiene Clinic I. 4 Units.
Integrates all components of oral health care into the clinical treatment of patients.

DNHY 476. Dental Hygiene Clinic II. 4 Units.
Integrates all components of oral health care into the clinical treatment of patients. Prerequisite or concurrent: DNHY 475.

DNHY 477. Dental Hygiene Clinic III. 4 Units.
Integrates all components of oral health care into the clinical treatment of patients. Prerequisite for concurrent*: DNHY 475, DNHY 476*.

DNHY 495. Dental Hygiene National Board Preparation. 1,2 Unit.
Lecture and case-based reviews of the entire dental hygiene curriculum, including, but not limited to: prerequisite basic sciences; preclinical, laboratory, and clinical sciences; and behavioral sciences. Reviews in preparation for the dental hygiene national board examination directly related to concurrent test-taking skill workshops based on standardized testing evidence for success.

DNHY 497. Advanced Shadowing Experience. 12 Units.
An elective course open to students seeking shadowing experience in dental hygiene. Credits do not count toward an academic degree.

Dermatology (DERM)

Courses

DERM 891. Dermatology Elective. 1.5-27 Units.
Offers fourth-year medical students the opportunity to explore various areas of dermatology, including research.

Dietetics (DTCS)

Courses

DTCS 301. Human Nutrition. 3 Units.
Fundamentals of normal nutrition. Carbohydrates, proteins, fats, vitamins, minerals; their roles in human metabolism. Introduction to nutrition in the life cycle. Per week: lecture three hours.
DTCS 302. Food Selection and Presentation. 5 Units.
Foods and their nutritive values. Changes associated with maturation, preservation, table preparation, transportation, and storage in relation to food safety. Nutritional concepts and cultural food patterns in planning and producing meals. Meal service in family, social, and professional settings. Per week: lecture three hours, practicum six hours. Laboratory fee.

DTCS 304. Community Nutrition. 4 Units.
Community-based nutrition education which requires knowledge of normal nutrition and life-cycle issues. Includes nutrition assessment; medical nutrition-therapy topics; legislative processes and politics; program planning, implementation, management, and evaluation; counseling, teaching, and facilitating group processes; interpreting data and research findings; identifying and accessing community nutrition resources.

DTCS 305. Professional Issues in Nutrition and Dietetics. 1 Unit.
Examines the growth of nutrition and dietetics as a profession, and the role of the professional in the restoration and maintenance of health. Nontraditional roles of the registered dietitian and dietetic technician, registered. Emphasizes development of professionalism, accountability, and responsibility for life-long learning. Requires preparation of a professional portfolio and a project completed throughout the program and submitted prior to graduation. May be repeated once for credit.

DTCS 311. Human and Clinical Nutrition for Nursing. 4 Units.

DTCS 312. Clinical Nutrition for Nursing. 2 Units.
Nutrition intervention in the prevention and treatment of disease in the clinical setting.

DTCS 321. Nutrition and Human Metabolism. 4 Units.
Nutritional requirements and metabolism of essential nutrients for the human organism at the cellular level. Focuses on macro- and micronutrients metabolism. Per week: lecture four hours. Prerequisite: Anatomy and physiology, biochemistry.

DTCS 329. Organic Chemistry with Applications for Nutrition. 4 Units.
Covers the nomenclature, chemical/physical properties, and common reactions of carbon-based compounds relevant to human nutrition.

DTCS 334. Biochemistry with Applications for Nutrition. 4 Units.
The chemistry and metabolism of carbohydrates, lipids, proteins, and nucleic acids. Preliminarily investigates the chemical basis of life processes, emphasizing aspects of human nutrition. Includes laboratory experiments to support student competency. Prerequisite: DTCS 329; or equivalent.

DTCS 338. Introduction to Clinical Nutrition. 2 Units.
Basic knowledge of the responsibilities of the clinical dietitian: familiarizing students with the electronic medical record and the nutrition care process. Emphasizes nutrition assessment knowledge and skills.

DTCS 340. Nutrition through Life Stages. 3 Units.
Includes a review of basic nutrition, as well as normal nutrition needs of individuals across the lifespan, with a focus on pregnancy and lactation; normal infant growth and development; and childhood and adolescence. Adult men's and women's health issues, geriatrics, food allergies, vegetarian diets, obesity, and eating disorders.

DTCS 342. Medical Nutrition Therapy I. 5 Units.

DTCS 343. Medical Nutrition Therapy II. 5 Units.
Basic bio-chemical and pathophysiological processes necessitating dietary modifications in clinical patients with pulmonary disease; disorders of the digestive, liver, and biliary systems, and pancreas; alcoholism; renal disease; solid-organ transplantation; and sepsis/trauma. Nutrition assessment, patient interviewing, and counseling. Applies enteral and parenteral nutrition support when indicated. Introduces preparation of an in-depth case study.

DTCS 371. Quantity Food Purchasing, Production, and Service. 5 Units.
Emphasizes methods to achieve quantitative and qualitative standards in quantity food production. Menu planning for institutions. Practicum in food purchasing, production, and service. Open to dietetics students only. Per week: lecture two hours, practicum nine hours.

DTCS 372. Food Systems Organization and Management. 4 Units.
Studies food-service systems. Effective utilization of resources within the food system. Computer application in food-systems management. Per week: lecture two hours, practicum six hours.

DTCS 395. Nutrition and Dietetics Practicum. 12 Units.
Supervised experience in medical nutrition therapy, community, and administrative dietetics in hospitals, outpatient clinics, public health departments, and food systems. Performance review and evaluation. Ten weeks (400 clock hours) during the summer at the end of the junior year.

DTCS 405. Senior Seminar. 1 Unit.
Develops professional skills, team efforts to market nutrition in the community, volunteer efforts in the community, professional networking, and special topics as determined by nutrition and dietetics faculty. Emphasizes professional portfolio and transition to entry-level nutrition educator/dietitian/food service director. Introduces preparation of an in-depth case study.

DTCS 442. Nutrition Counseling. 3 Units.
Applies techniques of nutrition counseling, with emphasis on improving skills in verbal and nonverbal communication, assertiveness, dealing with cultural differences, dealing with death and dying. Skills in administration for the nutrition counselor. Ethical implications in health care. Per week: lecture two hours, practicum three hours.

DTCS 445. Nutrition Care Management. 4 Units.
Applies operations analysis, financial management, quantitative decision making, and productivity-management techniques to enhance the delivery of nutrition care. Staff justification, continuous quality improvement, reimbursement for nutrition services, case management, and entrepreneurship.

DTCS 452. Advanced Nutrition. 4 Units.
Covers three interrelated topics in modern nutrition research: functional foods that provide physiological benefit beyond meeting basic nutritional needs; food toxicology—that is, the physiological consequences of natural and synthetic toxins found in the foods we consume; and nutritional genomics applied to evaluation of the links between nutrition, health, and the human genome. Prerequisite: DTCS 321.
DTCS 453. Advanced Medical Nutrition Therapy. 3 Units.
Theory and application of critical-care nutrition to complex medical conditions. Interpretation and synthesis of fluid and electrolyte balance, acid/base balance, vital signs, ICU monitoring forms, interpretation of laboratory data and diagnostic tests, medical and surgical history, and drug/nutrient interactions. Focus on a problem-list approach to nutrition assessment, documentation, intervention, and outcome evaluation. Per week: lecture two hours, practicum three hours.

DTCS 461. Food Science. 4 Units.
Chemical, physical, and biological effects of maturation, processing, storage, and preservation on the structure, composition, palatability, product quality, and microbiological safety of food and its additives. Per week: lecture four hours, laboratory three hours. Laboratory fee. Prerequisite: Basic foods, human nutrition, organic chemistry.

DTCS 473. Medical Nutrition Therapy Affiliation. 6,12 Units.
Student applies knowledge and skills in clinical facilities as s/he works with a staff dietitian and confers with supervisor to develop and enhance advanced-level professional competence. Student completes a major project relating to medical nutrition therapy. For 6 units, minimum of five weeks (200 clock hours); for 12 units, minimum of ten weeks (400 clock hours). May take more than once for credit.

DTCS 476. Exercise Physiology in Medical Nutrition Therapy. 3 Units.
Basic preparation for development and leadership of exercise programs. Includes: exercise-physiology training, acute and chronic effects of exercise, simple assessment of fitness, role of exercise in prevention of common health problems, and management of selected risk factors. Discusses endurance, strength, flexibility, and aerobic exercises. Laboratory included. Prerequisite: Anatomy and physiology.

DTCS 499. Nutrition and Dietetics Independent Study. 1-5 Units.
Project or paper to be submitted on a topic of current interest in an area of nutrition and dietetics. Regular meetings provide the student with guidance and evaluation. Elected on the basis of need or interest.

DTCS 504. Metabolism of Nutrients. 5 Units.
The study of normal metabolism of carbohydrates, lipids, and proteins. Includes vitamin and mineral involvement, as well as metabolic changes due to the presence of various hormonal states.

DTCS 506. Professional Seminar in Nutrition and Dietetics. 1 Unit.
Review and application of topics in nutrition and dietetics in preparation for professional practice and the registration examination for dietitians. Student presentations covering professional competencies and material essential for high-level practice.

DTCS 510. Public Health Nutrition Issues and Policies. 3 Units.
Nutrition policies and interventions that lead to prevention of and care for diseases prevalent in the community. Genetic and environmental influences related to nutrition health studies.

DTCS 517. Carbohydrates and Lipids. 4 Units.
A comprehensive study of the sources, metabolism, and function of carbohydrates and lipid—including their influence on human health and disease states.

DTCS 518. Proteins, Vitamins and Minerals. 4 Units.
A comprehensive study of the sources, metabolism, and function of proteins, vitamins, and minerals—including their influence on human health and disease states.

DTCS 519. Functional Foods and Phytochemicals. 2 Units.
Study of phytochemicals and their impact on treatment and prevention of diseases and their role in health maintenance.

DTCS 526. Pharmacology in Medical Nutrition Therapy. 2 Units.
Pharmacology at the graduate level, including kinetics, dynamics, and therapeutics of drugs. Basic definitions, sources of information, classification of drugs, and principles and mechanisms of drug actions. Emphasizes drug-nutrient interactions.

DTCS 534. Pediatric Medical Nutrition Therapy. 3 Units.
Management of the nutrition needs of the pediatric population. Focuses on growth and development in the normal and abnormal child. Addresses the biochemical and physiological conditions that necessitate dietary modifications in the clinical management of the patient. Per week: lecture 2 hours, practicum 3 hours.

DTCS 536. Health Care Financial Management. 3 Units.
Management of the nutrition care-management system involving prospective reimbursement and dietitian billing, business plan development, budget development and analysis of budget variances, operation statements, and productivity related to a department budget.

DTCS 542. Nutrient Delivery, Education, and Counseling. 2 Units.
Techniques and models used in the nutrition intervention step of the nutrition care process. Investigates food/nutrient provision, education (assessment to evaluation), counseling (theoretical basis/approach and strategies); as well as coordination of nutrition care.

DTCS 544. Medical Nutrition Therapy II. 5 Units.
Basic biochemical and pathophysiologic processes that necessitate dietary modifications in the clinical management of the patient with pulmonary disease—including cystic fibrosis; digestive disorders; disorders of the liver, biliary system, and pancreas; alcoholism; renal disease; solid-organ transplantation; sepsis/trauma; metabolic disorders; and neurologic disorders—including spinal cord injury and stroke. Continues nutrition assessment, patient interviewing, and counseling. Applies enteral and parenteral nutrition support when indicated in the clinical management of patients with these conditions. Introduces preparation of an in-depth case study. Graduate level project will be required. Per week: lecture 3 hours, practicum 6 hours.

DTCS 545. Nutrition Care Management. 4 Units.
Applies classical management theories and current application in the delivery of nutrition care; applies continuous quality management, staffing decision making, operations analysis, business planning, quantitative decision making, and productivity-management techniques to enhance the delivery of nutrition care. Includes reimbursement for nutrition services, servant leadership, case management, and entrepreneurship. Major paper due at end of quarter.

DTCS 554. Advanced Medical Nutrition Therapy. 3 Units.
Uses case-study approach to apply critical care nutrition to complex medical conditions. Interprets and synthesizes decision information regarding fluid and electrolyte balance, acid-base balance, vital signs, ICU and surgical history, and drug-nutrient interactions. Focuses on problem-based evaluation. Develops and analyzes a clinical case study. Emphasizes geriatric care and the special needs of this population.

DTCS 566. Food Chemistry and Experimental Foods. 4 Units.
Chemical, physical, and biological changes of food in processing and preservation. Experimentation in recipe development and improving the nutritional quality of food.
DTCS 574. Advanced Food Systems Management. 3 Units.
Develops competencies in total quality management; quality control; production planning, including forecasting production demand; linear programming; program evaluation and review technique (PERT); productivity management, including line balancing; financial management, including economics; food and labor cost control; budgeting project; and financial analysis of operations. Per week: lecture 3 hours, practicum three hours.

DTCS 575. Food Systems Management. 4 Units.
Develops administrative skills in effective management of food systems. Qualitative and quantitative standards, budget development and analysis, labor-management relations, computer-assisted information system.

DTCS 576. Exercise Physiology in Medical Nutrition Therapy. 3 Units.
Develops leadership in the development and presentation of exercise programs. Includes exercise-physiology training, acute and chronic effects of exercise, simple assessment of fitness, role of exercise in prevention of common health problems, and management of selected risk factors. Discusses endurance, strength, flexibility, and aerobic exercises. Laboratory included.

DTCS 584. Contemporary Issues in the Dietetic Profession. 4 Units.
Investigates nutrition trends in the public arena. Reviews current nutrition topics in popular literature, with evaluation of health implications using peer-reviewed evidence.

DTCS 585. Operations Management in Food and Nutrition Services. 4 Units.
Develops conceptual skills in operation of a food or nutrition service using quantitative decision making, forecasting, planning tools, development of quality standards and control mechanisms, job design, layout, work measurement, inventory control, and information systems.

DTCS 589. Capstone Course in Nutrition and Dietetics. 3 Units.
Develops a systems viewpoint of advanced medical nutrition therapy, management skills, and application of technology. Advanced application of operations management in nutrition care; development and application of high ethical standards in all aspects of the profession—including patient care; and human-resource management. Identifies trends that affect the operation of the department.

DTCS 599. Nutrition and Dietetics Independent Study. 1-5 Units.
Project or paper to be submitted on a topic of current interest in an area of nutrition and dietetics. Regular meetings provide the student with guidance and evaluation. Elected on the basis of need or interest.

DTCS 605. Nutrition Seminar. 1 Unit.
Study and discussion of current topics in nutrition. Requires a major paper, including meta-analysis of literature and presentation of a nutrition topic.

DTCS 694. Research. 1-8 Units.
Independent research for doctoral degree candidates and qualified master's degree students on problems currently being studied in the department, or in other department(s) with which they collaborate. Research program arranged with faculty member(s) involved. Minimum of 100 hours required for each unit of credit. Written report required.

DTCS 777. Food Systems Management Affiliation. 6 Units.
Five weeks (200 hours) of supervised experience in food systems management in health care or school food service. May be repeated for additional credit. Prerequisite: DTCS 575.

DTCS 778. Clinical Nutrition Affiliation. 6,12 Units.
Student applies knowledge and skills in clinical facilities as s/he works with a staff dietitian and confers with supervisor to develop and enhance advanced-level professional competence. Student completes a major project relating to medical nutrition therapy. For 6 units, minimum of five weeks (200 clock hours); for 12 units, minimum of ten weeks (400 clock hours). May be repeated for additional credit.

DTCS 795. Nutrition and Dietetics Graduate Practicum. 12 Units.
Supervised professional practice in medical nutrition therapy, community nutrition, and food systems management. Professional experiences in health care, public health centers, and food production facilities. Performance review and assessment, written weekly reports of learning achieved, and review. May be repeated for additional units. Ten weeks (400 clock hours) during the summer term.

Emergency Medical Care (EMMC)

Courses

EMMC 217. Community Emergency Response Team I. 1 Unit.
Theory and practice of the community emergency response team role. Addresses disaster preparedness, fire suppression, disaster medical care, search and rescue, crisis psychology, response to terrorism, and team organization and administration. Requires completion of skills laboratory.

EMMC 301. Pathophysiology in Emergency Care I. 3 Units.
Develops understanding of human anatomy and physiology to integrate pathophysiology, disease mechanisms, and dysfunction within an emergency medicine framework. Emphasizes integration of organ systems ranging from cardiac, vascular, respiratory, gastrointestinal, and genitourinary; along with specific mechanisms—such as injury, inflammation, and infection—that highlight pathology in medical patients.

EMMC 302. Pathophysiology in Emergency Care II. 3 Units.
Advances knowledge and integration of pathophysiology within emergency medicine by adding additional organ systems and approaches to disease mechanisms. Emphasizes integration of neurology, endocrine, musculoskeletal, and multisystem areas with a focus on injury and inflammation in trauma patients.

EMMC 303. Pathophysiology in Emergency Care III. 2 Units.
Focuses on critical thinking, conceptual knowledge, and application of the foundational principles of pathophysiology. Emphasizes recognition of common disease states, integration of the disease mechanisms and process, and presentation of case reflections to summarize pathology in patients presenting with medical or traumatic complaints.

EMMC 308. Pharmacology. 3 Units.
General overview of pharmacology, including pharmacokinetics, pharmacodynamics, and therapeutics of drugs. Basic definitions, sources of information, classification of drugs, and principles and mechanisms of drug actions. Emphasizes prehospital drug categories.

EMMC 314. ECG Interpretation and Analysis. 2 Units.
Develops basic ECG interpretation skills. Focuses on anatomy and physiology, underlying pathophysiology, and basic rhythm recognition. Overview of related treatments. Emphasizes skills needed by bedside practitioner to differentiate between benign and life-threatening dysrhythmias.
EMMC 315. Cardiology. 3 Units.
Development of assessment skills and medical management of patients with acute and chronic cardiovascular disorders. Focuses on anatomy and physiology, underlying pathophysiology, advanced history taking and physical assessment, cardiovascular pharmacology, electrical modalities, cardiac diagnostic testing, and current research. Emergency care of patients with myocardial infarction and cardiovascular trauma. Interaction with cardiac patients and clinical observation of diagnostic studies.

EMMC 316. 12-Lead ECG Interpretation. 2 Units.
Application and interpretation of the 12-lead system. Emphasizes recognition of the acute myocardial infarction. Includes identifying axis deviation, acute ischemic conditions, electrolyte imbalances, bundle-branch block, and infarct impostors. Attention to care of cardiac patients, emphasizing patient assessment, data collection, and use of the 12-lead to guide rapid intervention. Certificate issued upon successful course completion.

EMMC 317. Community Emergency Response Team Development and Instruction. 2 Units.
Development of sustainable community emergency response team (CERT) programs. Review of core CERT knowledge, competencies, and instructional techniques in disaster preparedness, fire suppression, disaster medical care, search and rescue, crisis psychology, response to terrorism, and team organization and administration. Discussion of adult learning theories and skills instruction. Meets federal/state criteria to become a CERT trainer. Prerequisite: EMMC 217 or equivalent CERT Basic certification.

EMMC 325. Current Issues in Emergency Medical Care. 2 Units.
Seminar-style discussion on current issues and controversies in emergency medicine. May include topics such as prehospital use of thrombolytic therapy; managed care; primary-care, advanced scope paramedic practice, etc.

EMMC 331. Theories of Emergency Medical Services I. 3 Units.
Introduces prehospital medical services. Roles and responsibilities of paramedics and EMTs. EMS systems design, constraints, and operating problems. EMS environment and scene issues. Medical-legal issues. History and current state of prehospital care and medical oversight.

EMMC 332. Theories of Emergency Medical Services II. 3 Units.
Investigates the dimensions of emergency medical services. Influence of environment on oxygen delivery. Develops paradigms for EMS. Decision making in the constrained environment. Stress models and role theories. Discusses EMS as sequential environments from public health to critical care.

EMMC 389. Junior Seminars. 0.5, 1 Units.
Discusses issues of professionalism and career development in the whole person context; written, oral, and electronic communication; writing and research skills; use of computer resources.

EMMC 425. Instruction and Curriculum Design in Emergency Services. 3 Units.
Methods of instruction and curriculum design for adult learners. Classroom management techniques and instruction in public education, in-service and continuing education, higher education, clinical teaching, conferences, and individual guidance. Applies curriculum design theories to instructional units and objectives, and assessment procedures and tools. Introduces learning-experience design, appropriate technology selection, learner centered materials, and respect for diversity in learning.

EMMC 429. Psychosocial Models and Interventions. 3 Units.
Applies major models of stress, crisis, and psychological trauma to the roles of health-care providers. Addresses psychosocial reactions and responses of populations, individuals, and care providers to societal disruption and trauma, medical emergencies, and death and dying. Addresses suicide intervention, critical incident debriefings, and death notification as well as methods of providing temporary, adequate psychological care for individuals in psychosocial crisis.

EMMC 435. Disasters, WMD, and Terrorism. 3 Units.

EMMC 436. Trauma and Surgical Care. 3 Units.

EMMC 445. Perinatal and Pediatric Care. 3 Units.
Emergency evaluation and care of the perinatal and pediatric patient. Cardiovascular, gastrointestinal, hematologic, renal, and metabolic conditions and treatment. Discusses appropriate versus inappropriate child development and behavior, including developmental stages, temperaments, feeding disorders, sleep disorders, mentally challenged, and attention deficit. Psychosocial aspects of pediatric, child, and adolescent psychiatric disorders.

EMMC 446. Physical Diagnosis. 3 Units.

EMMC 447. Geriatrics and Aging. 3 Units.
A forum for discussing current trends in aging and for identifying the needs of an older population. Discusses psychological and social changes in the older adult. Physiologic process of aging and the medical considerations unique to age. Management of geriatric trauma, medical emergencies, and the impact of chronic diseases. Establishing a social response to aging and viable health care-delivery models for older adults.

EMMC 448. Advanced Physical Diagnosis and Critical Care. 3 Units.

EMMC 451. Health Care Management for Prehospital Providers. 2 Units.
Basic principles of management and how they relate to EMS systems. Federal, state, and local authority for EMS delivery and services, resources for and constraints of EMS systems, relationship to and impact on public safety and health care-delivery systems, interface of public and private organizations, current and future issues.
Emergency Preparedness and Response (EMPR)

Courses

EMPR 524. Local and State Emergency Preparedness and Response. 3 Units.
Utilizes a case-study approach to examine the actions and interventions of public health practitioners and emergency managers applied to multiple phases of a disaster. Emphasizes development of an operational understanding of the emergency support functions that have local and regional application, as well as of public health emergencies faced by local communities.

EMPR 525. National and International Emergency Preparedness and Response. 3 Units.
Utilizes a case-study approach to examine the actions and interventions of public health practitioners and emergency managers in multiple phases of a disaster. Emphasizes development of an operational understanding of the emergency support functions that have national and global application, as well as the public health emergencies faced by global communities.

EMPR 526. Public Health Issues in Emergency Preparedness and Response. 3 Units.
Examines the critical public health considerations and environmental health issues of concern in an emergency, disaster, or complex humanitarian emergency. Covers public health responsibilities of assessment, water and food, shelter, sanitation, and prevention of communicable diseases. Utilizes case studies and a table-top exercise to provide practical application of the principles presented in the class.

EMPR 540. Seminars in Emergency Preparedness and Response. 3 Units.
Provides current events and case studies to illustrate current issues in emergency preparedness and response. Guided discussions on infectious disease, isolation, and quarantine; WMDs; biosurveillance and medical countermeasures; surge capacity and medical evacuation; psychosocial impacts; role of technology. Emphasizes situational analysis, public relations, and risk communication.

Endodontics (ENDN)

Courses

ENDN 534. Endodontic Treatment Conference. 1-2 Units.
Evaluates and discusses diagnosis, treatment planning, prognosis, and outcome of endodontic treatment cases. Repeated registrations required to fulfill the total units.

ENDN 601. Principles of Endodontics. 2 Units.
Comprehensive study of various aspects of endodontics. Repeated registrations required to fulfill the total units.

ENDN 604. Literature Seminar in Endodontics. 2 Units.
Reviews literature pertaining to the principles and practice of endodontics. Repeated registrations required to fulfill total units.

ENDN 654. Practice Teaching in Endodontics. 1 Unit.
Supervised teaching in the endodontic preclinical laboratory and predoctoral clinic. Repeated registrations required to fulfill total units.
ENDN 657. Written/oral Board Review Course for the American Board of Endodontics. 2 Units.
Weekly lecture series that exposes advanced specialty students to the crucial content and format of the American Board of Endodontics (ABE) examination. Assists students with preparing for and taking the required written portion of the examination prior to completion of the endodontics program, and exposes them to the oral examination that is part of the board certification process for the endodontics profession.

ENDN 697A. Research. 1 Unit.
Student identifies a research project, prepares a protocol, and obtains approval for the protocol. Multiple registrations may be needed to complete these research activities.

ENDN 697B. Research. 1 Unit.
Conducting the actual research project, including the data collection. Multiple registrations may be needed to complete these research activities.

ENDN 697C. Research. 1 Unit.
Student completes research project, holds a public presentation of research, and submits a publishable paper to his/her research guidance committee (RGC) for approval. Multiple registrations may be needed to complete the publishable paper.

ENDN 698. Thesis. 1 Unit.

ENDN 725. Clinical Practice in Endodontics. 1-8 Units.
Provides practice and experience in all aspects of endodontics. Emphasizes obtaining experience in treating complex endodontic cases. Repeated registrations required to fulfill total units.

ENDN 726. Clinical Practice of Implant Dentistry in Endodontics. 1,2 Unit.
Clinical experience in the diagnosis and treatment of patients who may benefit from implant dentistry therapy. Repeated registrations required to complete total units.

ENDN 831. Endodontics I. 1 Unit.
Didactic course provides foundational knowledge to prepare the student to manage patients with diseases of pulpal origin.

ENDN 832. Endodontics II. 2 Units.
Preliminary laboratory course that introduces basic skills necessary to perform endodontic treatment on permanent teeth with uncomplicated root canal systems. IDP students complete 2 units over the D3 Spring and Summer quarters before a final grade is given.

ENDN 834. Endodontics III. 1 Unit.
Didactic course that contains essential information on various topics in endodontics and elevates the students’ diagnostic and treatment-planning skills.

ENDN 835. Endodontics IV. 1 Unit.
Secondary laboratory course that reinforces prior basic skills taught in ENDN 832, and introduces additional skills necessary to perform endodontic treatment on uncomplicated permanent teeth using advances in technology.

English (ENGL)
ENVH 558. Global Environmental Health. 2 Units.
Global implications of human impact on terrestrial, atmospheric, and marine environments. Considers dilution and dispersion of pollutants, climatic changes, endangered species, desertification, deforestation, vehicle emissions, free-trade agreements, renewable resources, and export of hazardous industry to developing nations. Impact of political, economic, and cultural factors on present and future mitigation strategies.

ENVH 566. Outdoor Air Quality and Human Health. 3 Units.
Sources and characteristics of air pollutants and their effects on humans and human environment. Methods used in sampling of pollutants, controls, and abatement of air-quality standards violations. Prerequisite: Program prerequisite courses; or written consent of program advisor.

ENVH 567. Hazardous Materials and Solid-waste Management. 3 Units.
Production, collection, transportation, treatment, recycling, and disposal of solid wastes and hazardous materials. Toxic effects and hazard-producing characteristics of these materials; and the process of disposal-site design, siting, and operation. Prerequisite: Program prerequisite courses; or written consent of program advisor.

ENVH 568. Water Quality Assurance. 3 Units.
Principles and processes involved in providing safe and adequate water supplies. Water-source development, quantity and quality assurance, source and system design, and inspection parameters. Protection of water sources from contamination; and the abatement of, and correction techniques applied to, degraded water quality. Potable water supplies, fresh and saline bodies of water, and municipal liquid-waste disposal. Prerequisite: Program prerequisite courses; or written consent of program advisor.

ENVH 569. Environmental Sampling and Analysis. 4 Units.
Practical laboratory experience that serves as an introduction to techniques used in measurement and evaluation of environmental health problems. Techniques pertinent to air, water, and food sanitation. Occupational stressors and radiological health. Prerequisite: Program prerequisite courses; or written consent of program advisor.

ENVH 575. Indoor Air Quality. 3 Units.
Social and technical factors associated with nonindustrial, indoor air-quality issues. Ventilation, source assessment, complaint investigations, control measures, sanitation, building design, enforcement criteria, and case studies. Prerequisite: Microbiology or consent of instructor.

ENVH 581. Principles of Industrial Hygiene. 3 Units.
Introductory course in industrial hygiene. Industrial/occupational health, hygiene and safety, philosophy, legislation, and regulation. Prerequisite: Program prerequisite courses; or written consent of program advisor.

ENVH 586. Environmental Health Administration. 3 Units.
Introduces the administration and management of organizations involved in environmental health within the context of the health-care system. Provides an overview of regulatory and policy issues, applicable statutes, and emerging management systems.

ENVH 587. Environmental Toxicology. 3 Units.
Principles and mechanisms of toxicology as applied to environmentally encountered toxic agents. Toxicants of current public health importance and their pathologic effect on representative tissues and organs. Dose-response relationships; hazard and risk assessment; and determination of toxicity of environmental carcinogens, teratogens, mutagens, pesticides, metals, plastics, and organic solvents. Prerequisite: Program prerequisite courses; or written consent of program advisor.

ENVH 589. Environmental Risk Assessment. 3 Units.
Principles and methods of risk assessment associated with human exposure to toxic chemicals and other environmental hazards. Quantitative risk-assessment methodologies and approaches. Ecological risk assessment; risk management issues involved in taking appropriate public health action; risk communication, acceptability, and perception; and informational resources.

ENVH 605. Seminar in Environmental and Occupational Health. 1 Unit.
Areas of current interest. May be repeated for additional credit.

ENVH 694. Research. 1-14 Units.
Independent research on problems currently receiving study in the department. Research program arranged with faculty member(s) involved. Minimum of thirty hours required for each unit of credit. Limited to qualified master’s degree students. Prerequisite: Consent of instructor responsible for supervision and of program advisor.

ENVH 696. Directed Study/Special Project. 1-4 Units.
Individual arrangements for advanced students to study under the guidance of a program faculty member. May include readings, literature reviews, or other special projects. Minimum of thirty hours required for each unit of credit. A maximum of 4 units applicable to any master’s degree program. Prerequisite: Consent of instructor responsible for supervision and of program advisor.

Environmental Sciences (ENVS)

Courses

ENVS 401. Earth System Science and Global Change. 4 Units.
A systems-level approach to understanding environmental issues. Explores the dynamic biogeophysical processes in the atmosphere, biosphere, geosphere, hydrosphere, and sociosphere. Focuses on acquiring an interdisciplinary understanding of the basic principles and concepts of earth system science and the human dimensions of global environmental change.

ENVS 434. The Environmental Context of Community Health. 3 Units.
Presents biological, ecological, and human environmental factors found in environmental and community health studies. Includes: asset assessments; identification of key needs; and, dialogue with community partners. Consideration of possible implementation strategies and experience in a developing country. Includes three weeks of on-site environmental and community health study in a developing country.

ENVS 455. Environmental Law and Regulation. 4 Units.
Introduces local, state, federal, and global laws and policies regarding the use, ownership, protection, and regulation of natural resources. Emphasizes understanding of the decision-making process behind the rights and limits of private, public, and governmental parties when utilizing or protecting natural resources.

ENVS 485. Seminar in Environmental Sciences. 0.5 Units.
Selected topics dealing with recent developments. May be repeated for additional credit.

ENVS 487. Internship in Environmental Sciences. 4,8 Units.
Working under the joint supervision of a faculty member and an off-campus sponsor, student develops an environmental sciences academic component within the internship. Student also participates directly in the maintenance or conservation of the environment. May be repeated for additional credit for up to 8 units. Prerequisite: Internship and registration approval by a faculty member in the Department of Earth and Biological Sciences.
ENVS 488. Topics in Environmental Sciences. 1-4 Units.
Reviews current knowledge in specified areas of environmental sciences. Registration indicates specific topic to be studied. May be repeated for additional credit. Offered on demand.

ENVS 495. Special Projects in Environmental Sciences. 1-4 Units.
Special project in the field, laboratory, or library under the direction of a faculty member. May be repeated for additional credit.

ENVS 497. Undergraduate Research. 1-4 Units.
Original investigation and/or literature study pursued under the direction of a faculty member. May be repeated for additional credit.

**Excellence in STEM Experiential Education (EXSD)**

**Courses**

**EXSD 504. EXSEED STEM Education. 3 Units.**
Individually and collaboratively investigate STEM/STREAMS initiatives and programs at all K-12 levels. Includes examination of state and Seventh-day-Adventist education standards, exploring an interdisciplinary approach to STEM/STREAMS education using a project-based learning approach through a mission-focused learning lens. Incorporates a blend of hands-on workshops, readings, and reflective discourse opportunities. Grant proposal writing will be considered a voluntary and enhancing component.

**Epidemiology (EPDM)**

**Courses**

**EPDM 414. Introduction to Epidemiology. 3 Units.**
Methods and strategies used to investigate distribution, determinants, and prevention of disease in human populations. Disease classification, measures of disease frequency and relative effect, and methods used to isolate effects. Assessments of environmental conditions, lifestyles, and other determinants of disease. Interpretation of results and statistical associations. Critical evaluation of scientific literature. Laboratory included. Prerequisite or concurrent: STAT 414.

**EPDM 509. Principles of Epidemiology. 3 Units.**
Outlines principles and methods used to investigate distribution, determinants, and disease prevention strategies. Includes: measures of disease frequency, effect, and potential impact; comparison and contrast of study designs; methods to identify and control confounding; methods to improve validity, information, and selection bias; and, methods to assess causation, evaluate statistical significance, evaluate screening for latent disease, and interpret results. Prerequisite or concurrent*: STAT 509 or STAT 521*; AHCJ 472 or AHCJ 572; or consent of instructor.

**EPDM 510. Epidemiologic Methods I. 3 Units.**
An intermediate-level course on epidemiologic concepts and methods. Topics include causation, measures of disease occurrence, measures of effect, study design, types of bias, assessment and correction for bias, confounding, and interaction. Prerequisite: EPDM 509; STAT 521; or consent of instructor.

**EPDM 511. Epidemiologic Methods II. 3 Units.**
Second course in the epidemiologic methods sequence. Advanced study designs and multivariable modeling of exposure-disease relationships. Includes: hybrid and incomplete designs; the model-building approach; generalized linear and multi-variate models; and, maximum likelihood theory. Prerequisite: EPDM 510; STAT 522; or consent of instructor.

**EPDM 512. Epidemiologic Methods III. 3 Units.**
Expands coverage of generalized linear models and time-to-event models. Covers contemporary advancements in epidemiologic methods in the analysis of observational data. Exercises focus on data analysis and written reports. Prerequisite: EPDM 511; STAT 522; or consent of instructor.

**EPDM 515. Clinical Trials. 3 Units.**
Theory and practice of intervention studies, including community and clinical trials. Course includes components of a trial protocol, different types of trial design, analysis methods, and ethical considerations. Prerequisite: EPDM 509; STAT 509 or STAT 521.

**EPDM 520. Data Collection Methods. 3 Units.**
An overview of the principles and procedures of data collection as applied to the health sciences. Topics covered include: research designs; different research techniques (quantitative, qualitative, and mixed methods); modes of data collection; sampling methods; questionnaire development; sources of error in data collection; and ethical research. Students develop a data-collection instrument and perform data collection from initial conceptualization of the research topic.

**EPDM 525. Special Topics in Epidemiology. 1-4 Units.**
Lecture and discussion on a current topic in epidemiology. May be repeated for a maximum of 4 units applicable to degree program. Prerequisite or concurrent: EPDM 509.

**EPDM 530. Disease Distributions and Determinants I. 3 Units.**
First of a two-course sequence on the distributions of common diseases and their determinants. Covers the epidemiology of cardiovascular disease, diabetes, obesity, and related risk factors that include nutritional and social epidemiology. Prerequisite: EPDM 509; or consent of instructor.

**EPDM 531. Disease Distributions and Determinants II. 3 Units.**
Second of a two-course sequence on the distributions of common diseases and their determinants. Covers the epidemiology of cancer, genetic and molecular epidemiology, environmental epidemiology, and related risk factors. Includes special topics. Prerequisite: EPDM 509; or consent of instructor.

**EPDM 544. Epidemiology of Infectious Disease. 3 Units.**
Applies epidemiologic concepts, methods, and principles to infectious diseases of public health significance. Addresses "old," changing, and emerging diseases. Discusses the role of surveillance systems in infection control and the potential of developing appropriate public health interventions within the context of prevention, control, and eradication programs. Prerequisite or concurrent: EPDM 509.

**EPDM 555. Epidemiologic Methods in Outcomes Research and Continuous Quality Improvement. 3 Units.**
Epidemiologic methods of outcomes research and continuous quality improvement techniques in medical care processes. Includes: medical care as a process; use of control charts in process improvement; measurement of quality of care; and, patient satisfaction. Addresses cost benefit, cost effectiveness, cost utility, and decision-tree analysis applied to medical care and public health. Prerequisite: EPDM 509 or EPDM 510.

**EPDM 567. Epidemiology of Aging. 3 Units.**
Presents global demographic trends, determinants, and measures of population-age structure. Includes: health, morbidity, disability, and mortality; mechanisms, biomarkers, and genetics of aging; chronic disease risk factors and prevention; research and clinical trials; ethics; economics; and, drug use. Prerequisite or concurrent: EPDM 509 or EPDM 510; STAT 509 or STAT 521.
EPDM 588. Environmental and Occupational Epidemiology. 3 Units.
Evaluates principles and approaches used in the assessment of environmental exposure; selection of applicable study designs; and, determination of analytic methods used in the investigation of environmental health problems. Epidemiologic analysis of selected and controversial environmental exposures that impact public health practice, disease morbidity, and mortality outcomes. Prerequisite: EPDM 509 or EPDM 510; STAT 509 or STAT 521.

EPDM 605. Seminar in Epidemiology. 1 Unit.
Discussion of current topics in epidemiology and statistics. Requires Fall quarter registration with participation Fall, Winter, and Spring quarters.

EPDM 606. Doctoral Seminar in Epidemiology. 1 Unit.
Discussion of current topics in epidemiology and statistics important for professional development. Requires Fall quarter registration with participation Fall, Winter, and Spring quarters for a minimum of 9 units.

EPDM 610. Advanced Epidemiologic Methods. 4 Units.
Provides in depth training in study designs and multivariable modeling of exposure-disease relationships. Uses model-building approaches, including causal diagrams, methods of variable selection and specification, confounding, interaction, and trend testing. Focuses on survival analysis concepts. Prerequisite: EPDM 509; EPDM 510; STAT 521; STAT 522; STAT 548.

EPDM 625. Special Topics in Epidemiology. 1-3 Units.
Lecture and discussion on a current topic in epidemiology. May be repeated for a maximum of 6 units applicable to degree program. Recommended for doctoral students. Prerequisite: EPDM 509.

EPDM 635. Epidemiological Studies of Adventists. 1 Unit.
Reviews and critically evaluates the epidemiological research conducted in Seventh-day Adventist populations. Examines the history, rationale, methods, findings, and scientific contributions of this research. Prerequisite: EPDM 509.

EPDM 645. Epidemiology of Tobacco Use and Control. 2 Units.
An epidemiological overview of the tobacco pandemic—global/national tobacco trends, socioeconomic impact, prevention/control issues, and multisectoral strategies. Describes tobacco’s “hidden” burden relative to infectious diseases and adverse maternal-infant outcomes. Introduces basic tools to measure tobacco use, monitor tobacco policy implementation, conduct surveillance/evaluation of global/local tobacco control programs. Facilitates participation in ongoing field-based projects.

EPDM 664. Epidemiology of Cardiovascular Disease. 2 Units.
Examines both the descriptive and etiologic epidemiology of the major cardiovascular diseases, including hypertension, ischemic heart disease, congestive heart failure, and stroke. Covers the experimental designs and analytic techniques commonly used in cardiovascular epidemiology. Critically reviews the experimental and epidemiological evidence relating risk factors for cardiovascular diseases. Reviews the design and results of major cardiovascular disease intervention studies. Prerequisite: EPDM 509.

EPDM 665. Epidemiology of Cancer. 2 Units.
Examines both the descriptive and etiologic epidemiology of cancer. Examines recent statistics and historic trends for disease burden, incidence, survival, and mortality in the US and globally. Critically reviews the literature on the etiology, risk factors, and prevention of particular high-incidence/mortality cancers, with an emphasis on the role of lifestyle factors (tobacco, alcohol, diet, physical activity, and obesity). Prerequisite: EPDM 509.

EPDM 668. Molecular Epidemiology. 2 Units.
Provides an overview of basic concepts of molecular epidemiology, with a focus on applications of biomarkers in epidemiology. Covers technologies, tools, and design considerations for epidemiologic studies involving biomedical data. Includes a survey of standard techniques for statistical analysis in molecular epidemiology. Prerequisite: EPDM 509.

EPDM 685. Preliminary Research Experience. 2 Units.
Experience gained in various aspects of research under the guidance of a faculty member and by participation in an ongoing project. Must be completed prior to beginning dissertation research project. Limited to doctoral degree students.

EPDM 694. Research. 1-14 Units.
Independent epidemiologic research program arranged with faculty member(s) involved. Written report and oral presentation required. Prerequisite: Consent of instructor responsible for supervision and of academic advisor.

EPDM 697. Dissertation Proposal. 1-10 Units.
Student develops the written dissertation proposal. Doctoral dissertation committee chairman works with the student on mutually agreed-upon objectives. Evaluation based on the accomplishment of these objectives. Culminates in a written and oral dissertation proposal defense and advancement to candidacy. Doctoral students only. Successful completion of comprehensive exams.

EPDM 698. Dissertation. 1-14 Units.
Based on the doctoral research study, student writes a dissertation in submitted-paper format, submits the individual manuscripts to scientific journals, and responds to reviewers’ comments. Prerequisite: EPDM 697 and advancement to candidacy.

EPDM 699A. Applied Research. 1 Unit.
Independent epidemiologic research. Research program arranged with faculty member(s) involved. Written report and oral presentation required.

EPDM 699B. Applied Research. 1 Unit.
Independent epidemiologic research. Research program arranged with faculty member(s) involved. Written report and oral presentation required.

EPDM 699C. Applied Research. 1 Unit.
Independent epidemiologic research. Research program arranged with faculty member(s) involved. Written report and oral presentation required.

EPDM 699D. Applied Research. 1 Unit.
Independent epidemiologic research. Research program arranged with faculty member(s) involved. Written report and oral presentation required.

Family Medicine (FMDN)

Courses

FMDN 599. Directed Elective Study. 1.5-18 Units.

FMDN 701. Family Medicine Clerkship. 1.5-6 Units.

Presents concepts and practice of family-centered primary health care in family medicine. Includes: patient assessment; basic diagnosis and treatment; recognition of psychosocial problems; and, the practice of integrative and whole person care by assessing patient strengths and stresses within the context of family, community, support systems, and spiritual life.
FMDN 821. Family Medicine Subinternship. 1.5-6 Units.
A four-week rotation during which the senior subintern participates as a member of the family medicine inpatient service team. Provides experience in managing hospitalized patients and hospital follow-up, with emphasis on increasing decision-making skills. Increases students’ knowledge about acute illnesses and treatment, and familiarizes students with management of patients over the period of transition from the inpatient to the outpatient setting.

FMDN 891. Family Medicine Elective (General Family Medicine). 1.5-27 Units.
Offers fourth-year medical students the opportunity to explore various areas of family medicine, such as outpatient clinics, palliative medicine, sports medicine, research, etc.

Family Studies (FMST)

Courses
FMST 518. Advanced Theories in Child Development. 3 Units.
Examines child development from the perspectives of family systems, symbolic interactionism, structural functionalism, family development, social construction, and others. Investigates theories and stages of development—from birth through adolescence—from classical and contemporary literature in the physical, cognitive, language, social, emotional, and moral development domains.

FMST 526. Marriage and the Family. 3 Units.
Studies the family from perspectives of psychology, anthropology, biology, history, politics, and religion. Investigates the major movements or moving forces in society that have influenced families living in the United States and elsewhere. Evaluates the important contemporary issues in families and presents theories of family functioning that inform therapeutic and educational interventions by professionals.

FMST 534. Family Life Education Module 1. 3 Units.
Covers content, critical thinking, and application of issues related to laws and ethics in the practice of family life education, family law, and public policy matters in the United States of America and around the world; and substantive areas in the marriage and family literature. Prepares family life educators with content required for certification as family life educators and related family life professionals.

FMST 535. Family Life Education Module 2. 3 Units.
Treats content, critical thinking, and application of issues in family life education, parent education and guidance, and family resource management that are important to the knowledge base of family life educators and related family life professionals.

FMST 604. Advanced Qualitative Methods. 4 Units.
An overview of qualitative methods and their application to research of marriage and family therapy. Includes an examination of ethnographics, naturalistic inquiry, phenomenological research, the grounded theory approach, and narrative inquiry.

FMST 684. Doctoral Seminar. 1 Unit.
Students develop and refine their dissertation proposals through presentation and discussion with faculty and other students in a workshop format. Dissertation proposal is an expected outcome of this series of courses.

FMST 694. Directed Study: Family Studies. 1-3 Units.
FMST 697. Research. 1-6 Units.
Independent research relating to marital and family therapy, under the direction of a faculty advisor.

FMST 699. Dissertation Research. 1-20 Units.
Completes independent research contributing to the field of family studies. Prerequisite: Advancement to doctoral candidacy.

Geology (GEOL)

Courses
GEOL 204. Physical Geology. 4 Units.
Introductory geology course that provides the student with a broad picture of geological processes operating on and within the earth. Introduction to minerals, sedimentary and igneous rocks, and fossils. Weathering, earthquakes, volcanism, erosion and sedimentation, and plate tectonics. Three class hours, one three-hour laboratory or field trip per week.

GEOL 316. Mineralogy. 4 Units.
Studies minerals, including: crystallography and crystal chemistry, phase diagrams, and systematic classification. Mineral identification based on hand sample, optical, and other analytical techniques. Three class hours and one three-hour laboratory or field trip per week.

GEOL 317. Igneous and Metamorphic Petrology. 4 Units.
Systematically studies igneous and metamorphic rocks, including: classification by petrography and geochemical methods; application of one-, two-, and three-component phase diagrams; and models of petrogenesis. Three class hours and one three-hour laboratory or field trip per week.

GEOL 416. Sedimentology and Stratigraphy. 6 Units.
Focus on the sedimentary rock record through a study of rock types, depositional processes, and models. Stratigraphic nomenclature and approaches to correlation on local, regional, and global scales. Laboratory analysis of primary and diagenetic mineralogy, textures, and sedimentary structures in clastic and carbonate rocks. Field descriptions of sedimentary rocks, structures, and sequences; and field experience in interpreting depositional processes and stratigraphic relationships.

GEOL 424. Structural Geology. 4 Units.
Theory of stress and strain and examination of rock deformation in a framework of plate tectonics. Examples presented in field settings.

GEOL 426. Invertebrate Paleontology. 4 Units.
Structure, classification, ecology, and distribution of selected fossil invertebrate groups. Principles and methods involved in the study and analysis of invertebrate fossils. Three class hours and one three-hour laboratory per week.

GEOL 427. Vertebrate Paleontology. 4 Units.
Systematics, biology, and biogeography of ancient fossil vertebrates, with emphasis on the origins of major groups.

GEOL 434. Introduction to GIS for the Natural Sciences (2). 2 Units.
Principles and practice of GIS data acquisition, data editing, map making, and geodatabase management. Recommended for students beginning a research project.

GEOL 435. GIS Spatial Analysis for the Natural Sciences (3). 3 Units.
Advanced analysis of GIS data; statistical analysis, geographic analysis of spatial data, and methods of displaying, editing, and modeling spatial data using ArcGIS and related GIS tools. Recommended for students who have research data in hand to analyze.
**GEOL 436. Low Temperature Geochemistry. 4 Units.**
Principles of the chemistry of systems that pertain to surface geological and environmental settings. Major topics include: water quality, mineral solubility, natural systems represented by chemical equations, carbonate equilibrium systems, mineral stability plots, and oxidation-reduction systems. Prerequisite: College chemistry; consent of instructor.

**GEOL 443. Historical Geology. 4 Units.**
Overview of salient geological and paleontological features in the geological record, explaining the way they are interpreted in the formulation of models of Earth's history.

**GEOL 444. Paleobotany. 4 Units.**
Fossil plants; their morphology, paleoecology, taphonomy, classification, and stratigraphic distribution. Analyzes floral trends in the fossil record. Requires an independent study title request form that describes the specific area covered in the class and course requirements.

**GEOL 445. Modern Carbonate Depositional Systems. 3 Units.**
Examines modern and Pleistocene carbonate systems in the field, using these environments as models for understanding sediment production, facies development, and early diagenesis for many ancient carbonates. Requires rigorous hiking and snorkeling in shallow water.

**GEOL 456. Field Methods of Geologic Mapping. 4 Units.**
Advanced geologic mapping of complex areas, with interpretation of their history; includes mapping of igneous, metamorphic, and sedimentary rocks. Experience in preparation of geologic reports of each mapped locality.

**GEOL 457. Hydrogeology. 4 Units.**
Theory and geology of groundwater occurrence and flow, the relation of ground water to surface water, and the potential distribution of ground water by graphical and analytical methods. Three class hours and one three-hour laboratory per week.

**GEOL 475. Philosophy of Science and Origins. 4 Units.**
Concepts in the history and philosophy of science, and application of these principles in analyzing current scientific trends.

**GEOL 485. Seminar in Geology. 0.5 Units.**
Presentations and discussion of selected topics featuring recent developments. Members of all geology meet together.

**GEOL 486. Research and Experimental Design. 2 Units.**
Concepts, methods, and tools of research—including experimental design and data analysis.

**GEOL 487. Field Geology Studies. 1-6 Units.**
Special field study trips lasting one or more weeks. Student involvement required, including field presentations and fieldwork assignments, such as the measurement and analysis of sedimentary sections, facies profiling, paleontologic excavation, mapping, or other geological or paleontology field activity. One unit of credit per week. May be repeated for additional credit.

**GEOL 488. Topics in Geology. 1-4 Units.**
A didactic course in a specified area of earth science to cover time-sensitive subjects or topics on demand. Requires an independent study title request form that describes the specific area covered in the class and course requirements.

**GEOL 489. Readings in Geology and Paleontology. 1-4 Units.**
Focused readings and discussion of literature with course instructor in a seminar setting. Requires an independent study title request form that describes the specific area covered in the class and course requirements.

**GEOL 495. Special Projects in Geology. 1-4 Units.**
Special project in the field, laboratory, museum, or library under the direction of a faculty member. Registration indicates the specific field of the project.

**GEOL 497. Undergraduate Research. 1-4 Units.**
Credit for supervised research activities, including activities related to completion of the senior thesis. Requires an independent study title request form that explains the research and evaluation criteria.

**GEOL 510. Orientation to Graduate Geology. 1 Unit.**
Provides a platform for introducing students to skills and strategies for successfully navigating through their graduate degree and for planning their future professional career development.

**GEOL 512. Invertebrate Paleontology. 4 Units.**
Structure, classification, ecology, and distribution of selected fossil invertebrate groups. Considers principles and methods involved in the study and analysis of invertebrate fossils. Per week: Class three hours, plus one three-hour laboratory. Additional work required beyond GEOL 426.

**GEOL 513. Vertebrate Paleontology. 4 Units.**
Fossil vertebrates, with emphasis on the origins of major groups. Systematics, biology, and biogeography of ancient vertebrates. Additional work required beyond GEOL 427.

**GEOL 514. Paleobotany. 4 Units.**
Fossil plants, their morphology, paleoecology, taphonomy, classification, and stratigraphic distribution. Analyzes floral trends in the fossil record. Per week: three class hours and one three-hour laboratory or field trip. Additional work required beyond GEOL 444.

**GEOL 516. Sedimentology and Stratigraphy. 6 Units.**
Rock types, depositional processes, and models. Stratigraphic nomenclature and approaches to correlation on local, regional, and global scales. Laboratory analysis of primary and diagenetic mineralogy, textures, and sedimentary structures in clastic and carbonate rocks. Field descriptions of sedimentary rocks, structures, and sequences; and field experience in interpreting depositional processes and stratigraphic relationships. Requires additional laboratory and field activities over GEOL 416.

**GEOL 517. Modern Carbonate Depositional Systems. 3 Units.**
Examines modern and Pleistocene carbonate systems in the field, using these environments as models for understanding sediment production, facies development, and early diagenesis for many ancient carbonates. Requires additional laboratory and field activities over GEOL 416.

**GEOL 518. Earth Structure, Process, and History. 4 Units.**
Study of geological processes and the resulting geological record. Introduces minerals and rocks, sedimentary and igneous processes, fossils, plate tectonics, geological history, and models of earth history. Student prepares a teaching module on the topic. Open only to students in the M.S. degree program in natural sciences. Per week: class three hours, one three-hour laboratory or field trip.

**GEOL 526. Introduction to GIS for the Natural Sciences. 2 Units.**
Principles and practice of GIS data acquisition, data editing, map making, and geodatabase management. Recommended for students beginning a research project.
GEOL 535. GIS Spatial Analysis for the Natural Sciences. 3 Units.
Advanced analysis of GIS data; statistical analysis, geographic analysis of spatial data, and methods of displaying, editing, and modeling spatial data using ArcGIS and related GIS tools. Recommended for students who have research data in hand to analyze.

GEOL 545. Taphonomy. 4 Units.
Processes that affect an organism from death until its final burial and fossilization, and utilization of this information in reconstructing ancient assemblages of organisms. Three class hours per week. One laboratory per week to study, describe, and interpret fossil assemblages of vertebrates, invertebrates, and microfossils.

GEOL 554. Limnogeology. 4 Units.
Ancient lake deposits, including their sedimentologic, paleontologic, mineralogic, geochemical, and stratigraphic characteristics. Investigates as analogs the depositional processes occurring in modern lakes. Laboratory and several extended field trips.

GEOL 555. Carbonate and Evaporite Geology. 4 Units.
Advanced course on the geology of carbonate and evaporite rocks, including: petrography, depositional systems, diagenesis, and overview of current topics of research. Includes weekly laboratory experience in the analysis of carbonate and evaporite samples and a field trip to ancient carbonate sequences.

GEOL 556. Paleoenvironments. 3 Units.
Venue to learn skills to distinguish and reconstruct ancient depositional environments. Applies paleontologic, sedimentologic, and geochemical data and methods to interpretation of paleoenvironments, with emphasis on organism-sediment relationships. Investigates as analogs processes, sediments, and organisms in modern depositional environments.

GEOL 557. Paleoenvironments Field Trip. 1 Unit.
Field-based geology that integrates with GEOL 556, Paleoenvironments. Ten days spent visiting a variety of ancient and modern depositional environments. Published observations reviewed and relived to develop a regional context and collect primary field data.

GEOL 558. Philosophy of Science. 4 Units.
Selected topics in the history and philosophy of science, and application of these principles in analyzing contemporary scientific trends.

GEOL 559. Philosophy of Science and Origins. 1 Unit.
Studies selected topics in the history and philosophy of science, and applies these principles in analyzing current scientific trends. Provides an advanced update in the topic for students who have had a similar course at the undergraduate level.

GEOL 560. Analysis of Sedimentary Rocks. 4 Units.
Provides exposure to a range of analytical tools used to answer questions in sedimentary geology. Emphasizes three instruments—optical microscope, x-ray diffractometer, and scanning electron microscope—and introduces other analytical approaches. Participants will use case studies to develop skills in project design, collection of quantitative data, and evaluating existing datasets.

GEOL 566. Clastic Sedimentary Geology. 4 Units.
Advanced course on the geology of clastic sedimentary rocks—including: petrography, depositional systems, diagenesis, and overview of current topics of research. Includes weekly laboratory experience in the analysis and description of clastic rock samples and a field trip to ancient clastic sequences.

GEOL 567. Stratigraphy and Basin Analysis. 4 Units.
Addresses vertical and lateral relationships of sedimentary units and facies in the context of the development and filling of sedimentary basins within a chronostratigraphic framework. Emphasis on the impact of tectonics, sea level variations, and autogenic processes and their expression as sequences with specific stratigraphic geometries in different basin types. Both surface (field outcrop studies) and subsurface (well logs and seismic stratigraphy) approaches to basin analysis will be covered.

GEOL 575. Hydrogeology. 4 Units.
Theory and geology of groundwater occurrence and flow, the relation of groundwater to surface water, and the potential distribution of groundwater by graphical and analytical methods. Three class hours and one three-hour laboratory per week.

GEOL 588. Topics in Geology. 1-4 Units.
A didactic course in a specified area of earth science to cover time-sensitive subjects or topics on demand. Requires an independent study title request form that describes the specific area covered in the class and course requirements.

GEOL 594. Readings in Geology and Paleontology. 1,2 Unit.
Focused readings and discussion of the literature with the course instructor in a seminar setting. Requires an independent study title request form that describes the specific area covered in the class and course requirements.

GEOL 595. Readings in Limnogeology. 1 Unit.
Readings and analysis of current and classic scientific literature dealing with modern and ancient lake environments—including geochemistry, sedimentology, biology and paleontology, and related subjects. Activities include student presentations of papers, discussion, and research proposals and reports. One extended, multiday field trip required.

GEOL 607. Seminar in Geology. 0.5 Units.
Presentations and discussion of selected topics featuring recent developments. Members of all geology programs meet together.

GEOL 616. Research and Experimental Design. 2 Units.
Concepts, methods, and tools of research—including experimental design and data analysis.

GEOL 617. Proposal Writing and Grantsmanship. 2 Units.
Develops skills in writing proposals and in acquiring funding for research. Increases understanding of the culture of research. Reviews the infrastructure of science funding and identifies individualized sources of potential funding. Presents successful proposal-writing strategies for both governmental and nongovernmental sources of funding. Emphasizes development of effective writing skills during preparation of the student’s thesis or dissertation proposal.

GEOL 618. Writing for Publication. 1 Unit.
Explores the mechanics and processes of preparing, submitting, revising, and resubmitting a manuscript for publication in a peer-reviewed journal. Designed for students who are well along in the process of writing their first manuscript for publication. Prepares students to handle the manuscript revision process when the manuscript is returned from reviewers, as well as the final stage of resubmission to the journal.

GEOL 658. Advanced Philosophy of Science readings (2). 2 Units.
Reading and discussion of selected references in the philosophy of science, and the application of these concepts in the practice of scientific research and interpretation, including their influence on scientific study of origins. Best taken near the end of a student’s graduate program. Two-hour class session per week.
GEOL 695. Special Projects in Geology. 1-4 Units.
Special project in the field, laboratory, museum, or library under the direction of a faculty member. Registration indicates the specific field of the project.

GEOL 697. Research. 1-8 Units.
Credit for supervised research activities. Requires an independent study title request form that explains the research and evaluation criteria.

GEOL 698. Thesis Research. 1-8 Units.
Credit for supervised research activities and for writing of the master’s thesis. Requires an independent study title request form that explains the research and evaluation criteria. Grade received does not indicate whether thesis is completed and approved.

GEOL 699. Dissertation Research. 1-8 Units.
Credit for supervised research activities and for writing the doctoral dissertation. Requires an independent study title request form that explains the research and evaluation criteria. Grade received does not indicate whether dissertation is completed and approved.

Gerontology (GERO)

Courses

GERO 515. Diversity and Aging. 3 Units.
Assists students in understanding the complexity of variables related to the aging process. Examines ethnicity, gender, social class, and culture within the context of the physical, mental, social, political, and financial effects of aging.

GERO 599. Directed Study/Special Project. 1-4 Units.
Limited to matriculating master’s degree in gerontology students who wish to pursue independent investigations in criminal justice practice or policy under the direction of a department faculty member.

GERO 615. Economics and Management Issues of Older Adult Services. 4 Units.
Acquaints students with economic and management issues and their impact on social policies that direct older adult services. Uses descriptions of economic and management issues to analyze system impact on social policies related to the older adult population. Students learn how to meet the challenges inherent in a dynamic and rapidly changing environment and develop skills and competencies for meeting future challenges and bridging the gap between theory and practice.

GERO 617. Bio-psycho-social-spiritual Theories of Aging. 4 Units.
An interdisciplinary team-taught learning experience that provides an integrative understanding of the bio-psycho-social-spiritual aspects and theories of aging, and the impact of these on older adults and their families.

GERO 654. Therapeutic Interventions with Older Adults. 3 Units.
Integrates theories and practice skills needed for effective interventions with older adults and their families. Considers the significance of the individual's bio-psychosocial-spiritual history within an environmental context while also recognizing the specific needs of older adults. Assessment and evidence-based clinical intervention methods that bridge health and mental health services are also examined along with service delivery and case-management systems.

GERO 697. Research. 2-4 Units.
Supports students choosing to complete the thesis option. Provides research matriculation in the collection and analysis of data for the thesis. Students required to register for two quarters, or a total of 4 units.

GERO 698. Thesis. 2 Units.
The culminating portion of the student's independent research, under the direction of the research advisor. Students register for class during the quarter in which they defend their research and submit their final document to the department and to the School of Behavioral Health.

GERO 757A. Professional Practicum and Seminar. 3 Units.
Students complete 3 units of professional practicum during each quarter. Each 3 units require 160 hours of practicum and 20 hours of seminar.

GERO 757B. Professional Practicum and Seminar. 3 Units.
Students complete 3 units of professional practicum during each quarter. Each 3 units require 160 hours of practicum and 20 hours of seminar.

GERO 757C. Professional Practicum and Seminar. 3 Units.
Experiential learning in gerontology settings. Students placed at practicum sites that serve geriatric clients. Students must satisfactorily complete 160 practicum hours and 20 hours of concurrent seminar.

GERO 787. Advanced Professional Practicum and Seminar. 4 Units.
Experiential learning in advanced gerontology practice. Students must satisfactorily complete 200 practicum hours and 20 hours of concurrent seminar.

Global Health (GLBH)

Courses

GLBH 516. HIV/AIDS: Implications for Public Health. 3 Units.
Historical, epidemiological, and public health aspects of HIV/AIDS. Viral, immunologic, laboratory, and clinical manifestations associated with HIV/AIDS. Includes: approaches to preventing/controlling the epidemic; socioeconomic, political, and health impact of HIV/AIDS; and, related implications such as legal, ethical, and health-care management issues.

GLBH 517. Cultural Issues in Health Care. 3 Units.
Critical analysis of broad sociocultural and political forces that impact domestic and international health, and health-care access and delivery. Addresses how culture informs the understanding and experience of health and illness. Introduction to assessment of race relations and ethnocentric beliefs and attitudes that contribute to the gap between marginal populations and health-care providers. Presents sociocultural change strategies within the context of power and privilege.

GLBH 524. Cultural Competence and Health Disparities. 2 Units.
Introduces diversity and cultural responsiveness in public health and health care. Examines population diversity, health professions diversity, and cultural responsiveness in addressing and eliminating disparities in national and global health. Discusses biological inheritance, race and ethnicity identifiers, socioeconomic, socioenvironment, and health-care beliefs and behavior. Introduces cultural competency in public health and tenets for developing and applying cultural awareness.

GLBH 545. Integrated Community Development. 4 Units.
Analyzes issues, challenges, resources, and strategies in implementing and managing integrated community development and health projects. Focuses on basic development needs of rural and urban communities. Taught from the perspectives of anthropology, sociology, agriculture, economic development, and public health. The final course in the GLBH core curriculum. Restricted to students in the major. Prerequisite: GLBH 564, GLBH 565, GLBH 566, GLBH 567, GLBH 568, GLBH 569.
GLBH 550. Women in Development. 3 Units.
Global epidemiological profile of women in terms of educational patterns, economic productivity, social status, and mortality and morbidity patterns. Risks to physical and psychosocial health. National and international legal and regulatory issues and programs to promote access to health care, economic productivity, and the health of women.

GLBH 561. Epidemiology of Tobacco Use and Control I. 3 Units.
First of three courses addressing the tobacco pandemic. Provides a foundation for global/national tobacco-prevention and -control strategies. Explores its epidemiology and its significant impact on societal health and economics. Examines underlying principles governing multi-sectoral and multidisciplinary approaches developed as part of the coordinated public health response. Introduces of monitoring, surveillance, and evaluation techniques used in tobacco prevention/control programs.

GLBH 562. Epidemiology of Tobacco Use and Control II. 3 Units.
Explores the foundation for tobacco control. Includes: tobacco-control policy, and legislative and regulatory measures; socioeconomic status variables; research in tobacco use; individual and environmental factors that influence susceptibility to tobacco dependence; countering the tobacco industry; partnerships in tobacco control; monitoring, surveillance, evaluation, and reporting of tobacco use and control; and developing a national plan of action for tobacco control.

GLBH 564. Fundamentals of Global Health I. 3 Units.
A three-course series that addresses the context and realities of global health and transformational development. Includes analysis of the burden of disease at global, national, and local levels; cultural, social, economic, and environmental determinants of health; infectious and noncommunicable diseases; reproductive, maternal, newborn, and child health; nutrition; injuries and violence; and current global health events. Students research a low-middle income country throughout the year.

GLBH 565. Interventions in Community Health and Development I. 3 Units.
First of three courses addressing methodological techniques and skills applicable to planning, implementation, and evaluation of primary health-care programs. Focuses on improvement of health, safety, and well-being of all people in local and global settings by promoting wellness, preventing avoidable disease, disabilities, and deaths, and eliminating social and health disparities.

GLBH 566. Fundamentals of Global Health II. 3 Units.
Second in a three-course series addressing global health and transformational development. Analysis of public health systems at the global, national, and subnational levels. Includes: assessment of health workforce; health financing; policies and programs; health supply logistics; and, the role of disasters, politics, conflict, and war in public health.

GLBH 567. Interventions in Community Health and Development II. 3 Units.
Second of three courses addressing methodological techniques and skills applicable to planning, implementation, and evaluation of primary health-care programs. Focuses on improvement of health, safety, and well-being of all people in local and global settings by promoting wellness, preventing avoidable disease, disabilities, and deaths, and eliminating social and health disparities. Prerequisite: GLBH 565.

GLBH 568. Fundamentals of Global Health III. 3 Units.
Third in a three-course series addressing global health and transformational development. Study of nongovernmental, UN, bilateral, and multi-lateral organizations involved in global health. Includes: financing; engagement in professional career development activities; and, preparation of a complex funding application such as The Global Fund to Fight AIDS, Tuberculosis, and Malaria. Prerequisite: GLBH 564, GLBH 566; or consent of instructor.

GLBH 569. Interventions in Community Health and Development III. 3 Units.
Third of three courses addressing methodological techniques and skills applicable to planning, implementation, and evaluation of primary health-care programs. Focuses on improvement of health, safety, and well-being of all people in local and global settings by promoting wellness, preventing avoidable disease, disabilities, and deaths, and eliminating social and health disparities. Prerequisite: GLBH 565, GLBH 567.

GLBH 584. Special Topics in Global Health. 1-3 Units.
Lectures and discussions on a current topic in global health. May be repeated for a maximum of 3 units applicable to degree program.

GLBH 605. Seminar in Global Health. 1 Unit.
Issues, trends, organizational structure, and practice of international public health. Issues impacting global health, the structure and functions of government and NGOs in the delivery of public health services, and preparation to practice international health. Selected guest lecturers and student participation.

GLBH 700. MIP-Peace Corps Field Practicum. 0 Units.
Designed for students who must maintain continuous registration in the School of Public Health as a condition of the twenty-seven month Peace Corps field practicum that is part of their master’s degree program.

GLBH 797. MIP Residency in Global Health. 12 Units.
Individual, guided study in operational field practice, under faculty supervision. Limited to graduate students in the INTH Master’s Internationalist Program (M.P.H./MIP) whose projects have been approved by their committee.

Graduate Dentistry (GRDN)

Courses

GRDN 514. Introduction to Biomedical Research. 4 Units.
Provides basic information necessary to develop a research proposal. Focuses on applied statistics, as well as proposal writing—which emphasizes critical evaluation of the literature, proposal design, and proposal methodology. Culminates in an approved research proposal suitable for submission to the departmental Research Guidance Committee (RGC). Lectures, seminars.

GRDN 535. Clinical Oral Pathology. 2 Units.

GRDN 601. Practice Management. 2 Units.
Prepares student for specialty practice. Concepts of employment, records, incorporating, insurance, and practice planning.

GRDN 609. Professional Ethics. 2 Units.
Provides students with a theological and philosophical framework for professional ethics. Topics include individual rights, autonomy, informed consent, and responsibilities of the professional person in the dental field, as well as in society as a whole.
GRDN 622. Biomedical Science I. 2 Units.
Advanced, course offered every other year (alternating with GRDN 623) during Autumn Quarter. Course content includes applied oral bacteriology, immunology, topics in oral medicine, applied pharmacology, and orofacial pain. Students expected to have prior basic knowledge in the various topic areas.

GRDN 622A. Biomedical Science. 2 Units.
Advanced, one-quarter course offered Fall Quarter annually. Includes an overview of immunology, developmental anatomy of the head and neck, TMD symptomology and treatment modalities, bacterial cytology, growth and metabolism, emerging infectious diseases with focus on HIV/AIDS and Hepatitis C, dental caries and caries risk assessment, antibiotics and their mechanisms of action and clinical application, viral diseases, and the connection between oral and systemic diseases.

GRDN 622B. Biomedical Science II. 4.5 Units.
Advanced, two-quarter course offered every other year (alternating with GRDN 622) during Autumn and Winter Quarters. Course content includes cell biology, applied oral pathology, biology of hard tissues, physiology, and biochemistry. Students expected to have basic knowledge in the various topic areas.

GRDN 632. Basic Microsurgery Techniques. 2 Units.
An integrated, forty-hour laboratory course tailored to the needs of the individual student. Principles and application of microscope operator and use, microinstrumentation, microdissection, micromanipulation, and microsuturing techniques. Performance of various microvascular and microneural repair procedures.

GRDN 700. Advanced Dental Education Remediation. 1-8 Units.
Outlines how deficiencies will be remediated and reassessed for the course in question.

Gynecology and Obstetrics (GYOB)

Courses

GYOB 599. Gynecology and Obstetrics Directed Study. 1.5-18 Units.
GYOB 701. Gynecology and Obstetrics Clerkship. 1.5-9 Units.
Addresses normal and high-risk obstetrics and gynecology, women’s health, reproduction, birth control, gynecological cancers, and gynecological pathology in a clinical setting. Includes examinations, diagnoses, procedures, deliveries, and surgeries.

GYOB 891. Gynecology and Obstetrics Elective. 1.5-27 Units.
Offers fourth-year medical students the opportunity to explore various areas of gynecology and obstetrics, such as benign gynecology, high-risk obstetrics, lactation, oncology, research, etc.

Health Administration (HADM)

Courses

HADM 501. Health Policy and Leadership Seminar. 1 Unit.
An orientation seminar designed for the first or second quarter of the M.P.H. degree in health policy and leadership. Identifies the expectations of the degree, raises awareness and understanding of academic standards, and promotes cohort and professional loyalty.

HADM 505. Managerial Statistics and Epidemiology for Healthcare. 4 Units.
Overview of basic statistical and epidemiological concepts and tools, with the objective of showing how they can be used to improve management decisions in the health sector. Includes interpretation and analysis of statistical associations, and distribution and understanding and applying determinants of health events and disease outcomes in human populations.

HADM 506. Fundamentals of Health-Care Finance. 3 Units.
Covers different forms of business organizations and their impact on taxes and cash flows. Focuses particularly on third-party payer system, time value of money, financial risk and return, debt and equity financing, securities valuation, market efficiency, debt refunding, and lease financing. Prerequisite: HADM 507 or equivalent.

HADM 507. Principles of Accounting in Health Care. 3 Units.
Overview of the accounting cycle, balance sheets, income statements, basic accounting principles, ethics, internal controls, accounting for assets, current liabilities, and stockholder’s equity. Course can be waived by students who have taken an upper division accounting course prior to enrolling at this University from an accredited four-year university. Prerequisite: Accounting course or consent of instructor.

HADM 509. Principles of Health Policy and Management. 3 Units.
Introduces concepts of the health policy process and factors that impact health and access to health care, including but not limited to organizing, financing, and delivering health services. Familiarizes students with concepts of the health policy process, emphasizing the leadership and management skills necessary to navigate the necessary changes in the current health system and to demonstrate understanding of the policy development process.

HADM 510. Health Policy Analysis and Synthesis. 3 Units.
Introduces major approaches for understanding the health policy process. Explores how to identify and analyze the forces and interests involved in health policy issues, including stakeholder analysis. Examines how to write a policy brief and describes various techniques of advocating for health policy change.

HADM 514. Health-Care Economics. 3 Units.
Uses analytical tools of economics to describe the behavior of various agents in the health-care industry, including providers and patients, third party payers, the government, and the pharmaceutical industry. Explores the importance of health-care labor markets; analyzes the issue of equity, efficiency, and costs; and explores differences between health-care systems around the world.

HADM 525. Special Topics. 1-4 Units.
Lecture and discussion on a current topic in health policy and management or leadership. May be repeated for a maximum of 8 units applicable to degree program.

HADM 528. Organizational Behavior in Health Care. 3 Units.
Focuses on understanding, predicting, and influencing human behavior in an organization. Students gain experience using practical individual and group case studies and reading/researching organizational behavior books and topics that facilitate thinking through problems/issues and finding solutions as leaders, managers, and employees in organizations.
HADM 529. Applied Leadership Concepts in Health-Care Organizations. 3 Units.
Enhances and applies leadership principles related to managing change process, building and strengthening teams, practicing skills in persuasion and resolution of conflicts, and developing innovative and skilled leaders. Uses case studies and interactive methods to create an innovative environment in which students can apply and enhance their knowledge of the health-care industry.

HADM 534. Health-Care Law. 3 Units.
Examines health care as a highly regulated industry, providing students with an understanding of the vast range of legal issues facing health-care practitioners and administrators. Gives particular attention to topics in regulatory compliance, medical malpractice, health-care contracting, and employment law.

HADM 536. Health Policy Communications. 3 Units.
Strategies for advancing health policy messages. Identifies various forms of public communication and provides techniques for communicating effectively with the mass media and stakeholders in the health system. Focus on critical thinking in addition to oral and written communication.

HADM 542. Managerial Accounting for Health-Care Organizations. 3 Units.
Financial data used in decision making. Cost behavior, activity-based costing, cost allocation, product costing and pricing, operational budgets, capital budgeting, and behavioral aspects of control. Prerequisite: HADM 507; One course in financial accounting, or consent of instructor.

HADM 545. Government Policy and Health Disparities. 3 Units.
Overview of health disparities in framing health policy discussions. Examines the federal government’s use of funding and regulation to influence health-care delivery in the United States. Reviews the role of state and local governments in developing and implementing health policy. Explores how research is used in documenting disparities and evaluating interventions.

HADM 546. Attaining Philanthropic Support: Fundamentals of Fundraising. 2 Units.
Provides an overview of working in the nonprofit sector postgraduation, and the essentials of how to fund raise—especially from private sources such as individuals, foundations and corporations, and other entities. Addresses the technical, methodological, relational, and ethical principles that undergird fund-raising.

HADM 554. Applied Leadership Concepts in Health-Care Organizations. 3 Units.
Purposefully explores how the strategic management of human resources creates value and delivers results in health care. Addresses an emerging human-resource paradigm, in addition to focusing on the traditional perspectives of human resources that center around the personnel function.

HADM 574. Managing Human Resources in Health-Care Organizations. 3 Units.
Provides a general introduction to the literature of leadership and management, especially as they apply to managing nonprofit organizations. Focuses particularly on the competencies, skills, responsibilities, and expectations of managers and leaders (in their differentiated roles) as found within current theoretical and practice frameworks.

HADM 580. Foundations of Leadership. 3 Units.
Reviews the art and science of fund-raising. Includes: the psychology of fund raising; donor motivation; fund-raising plans; research in fund-raising; annual funds and direct mail; major gift development; grant proposals; the “ask” process; planned giving and capital campaigns; staffing development offices; proposal and case statement development; gift stewardship; and, software-driven accountabilities and reporting.

HADM 577. Governance for Non-Profit Excellence. 3 Units.
Survey of leadership in organizational settings. Includes: differential roles of volunteer board members, agency executives, and staff members; nominating and recruiting board members; legal and other policies affecting board members; agendas, minutes and board manuals; crisis and conflict management; managing volunteers; visioning and long-range planning; non-profit accountabilities; and, meetings and consensus building.

HADM 578. Foundations of Fund Development. 3 Units.
Reviews current trends in health-care financing; integrated delivery systems; managed care, as well as some focus on health-care operations, including: billing, coding, pricing, utilization review, case management, and systems. Reviews and discusses current events and research relating to the health-care system structure throughout the world and relative to U.S. health-care policy.

HADM 559. Health-Care Marketing. 3 Units.
Applies marketing concepts to health care delivery systems. Emphasizes a strategic market-management approach for developing or evaluating strategies and programs for a health care organization.

HADM 564. Health-Care Finance. 3 Units.
Covers capital structure decisions, capital budgeting, financial analysis and forecasting, project risk analysis, working capital management, business valuation, mergers and acquisitions, reimbursement methods, and financial risk management. Prerequisite: HADM 506.
HADM 584. Current Topics in Health Policy and Leadership. 1 Unit.
Lectures and discussion on current issues in leadership. Specific content varies from quarter to quarter. May be repeated for additional credit.

HADM 585. Policy Development for a Twenty-First Century Health System. 3 Units.
Addresses the unique application of leadership theory and best practice to the field of public health, health care, and related areas.

HADM 586. Building Healthy Communities: Integrative Health Policy. 3 Units.
Examines the public health system, how health policy is developed, and the diverse stakeholders involved in the process. Examines effective partnerships with government agencies, the private sector, nongovernmental organizations, communities, and social entrepreneurs. Explores and analyzes in depth how these partnerships have worked together to make positive health improvements through effective policies will be explored.

HADM 587. Health Policy Analysis and Research. 3 Units.
Provides students with the skills needed to translate research into policy and practice. Examines how research impacts public health and health policies. Explores the relationship between statistics, research, and public policy; and understanding policy development and the politics that inform public health policy. Focuses on collaboration with government agencies and community groups in evaluating outcomes associated with changing policies at the institution, community, and state levels.

HADM 588. Leadership, Policy, and Environmental Change. 3 Units.
Examines public health approaches to improve health through environmental and policy change. Explores theoretical and practical applications of legislative advocacy in the area of health policy.

HADM 589. Advanced Practice in Leadership. 3 Units.
Explores leadership through reflection on and analysis of past experiences, readings in textbook and articles, discussion of contemporary leadership theories, and learning activities designed to apply this knowledge to the student's personal setting. Focuses especially on discussion of issues encountered in leading teams and organizations. Assesses leadership style as well as applied leadership, change theory, entrepreneurial skills, and innovative practice.

HADM 594. Applied Health-Care Management Project. 2 Units.
Development of an applied project for a health-care organization. Prerequisite: HADM 607; completion of 40 units of program requirements; program director approval.

HADM 595. Leadership—Past, Present, and Future. 3 Units.
An in-depth study of the historical and theoretical foundations of leadership, exploring a wide range of sources across time and culture. Emphasizes major theories influencing the current understanding of leadership and its relationship to management. Prerequisite: HADM 582 or equivalent.

HADM 601. Quantitative Methods in Health-Care Management. 3 Units.
Use of quantitative techniques to analyze processes and apply decision-making tools to optimize performance in health-care institutions. Includes forecasting, facility location and layout, resource allocation, workload management, productivity measurement, supply chain and inventory management, quality control and improvement, project management, and queuing theory. Prerequisite: STAT 509; or consent of instructor.

HADM 604. Health Systems Strategic Planning. 3 Units.
Describes strategic planning process and examines tools needed to analyze external factors and internal capabilities related to an organization. Includes: development of vision, mission, and goal statements; objectives; control mechanisms; human resource management; marketing; finance; and, impact of business, demographic, cultural, political, and regulatory decisions on long-term success.

HADM 605. Health-Care Quality Management. 3 Units.
Focuses on quality systems that include developing clear mission or vision, setting measurable strategic quality goals, deploying goals for action by identifying specific activities to be done, and controlling results. Analysis of quality process in health care historically, with emphasis on key strategies for success.

HADM 607. Orientation to Professionalism Seminar. 1 Unit.
Prepares students for professional distinction in their careers through participation in a seminar series, resume preparation, self-assessments, and other activities. Serves as an orientation to either the 800-hour practicum series (HADM 724) or the applied project-based course (HADM 594).

HADM 614. Research Design and Practice I. 3 Units.
Introduces research methods, including ethnography. Examines literature for information on processes, and provides field experience for participation observations, interviewing, and the discovery of theory. Includes ethical consideration and the development of a research proposal.

HADM 615. Research Design and Practice II. 3 Units.
Planning and conducting a research project. Advanced analysis of appropriate research design for research and development of a publishable research paper for a peer-review journal. Prerequisites: HADM 614.

HADM 620. Health Policy Theories and Concepts. 3 Units.
Introduces key theories, writers, and conceptual frameworks that influence contemporary health policy analysis and development. Reviews the evolution of health policy in the US. Examines the health policy development process, which includes problem identification, policy formulation, and implementation.

HADM 625. Health Policy Advocacy and Civic Engagement. 3 Units.
Matches students with public health–related agencies or coalitions to gain in-depth knowledge of agenda setting, power analysis, legislative research, and legislative advocacy in relation to specific health issues. Explains the impact of the political process and develops skills associated with community organizing and civic engagement for policy advocacy and communicating effectively using traditional and innovative strategies, including but not limited to mass and social media.

HADM 685. Preliminary Research Experience. 3 Units.
Experience gained in various aspects of research under the guidance of a faculty member and by participation in an ongoing project. Must be completed prior to beginning the dissertation research project.

HADM 689. Graduate Seminar in Leadership. 2 Units.
While working under the direction of a department faculty member, student applies leadership theory to specific situations and evaluates the effectiveness of such interventions. Limited to doctoral students. Permission of instructor required. May be repeated for a total of 8 units.
HADM 690. Health-Care Management Capstone. 3 Units.
A capstone course that completes the M.B.A. degree program. Integrates the core and cross-cutting health care management competencies, resulting in a learning experience that combines health care perspectives, theories, skills, and tools in an applied format. Final products--derived through case studies, guest lectures, and literature review--include a comprehensive strategic plan that incorporates all the elements of a business plan designed specifically for a health care organization.

HADM 697. Dissertation Proposal. 1-10 Units.
Doctoral student develops a dissertation proposal and works in collaboration with the research adviser on mutually agreed-upon objectives that will provide the basis for evaluation. Culminates in a dissertation proposal. Prerequisite: Successful completion of comprehensive exams.

HADM 698. Dissertation. 1-8 Units.
Doctoral student prepares dissertation manuscript presenting results of the research study. Prerequisite: HADM 697 and advancement to candidacy.

HADM 699. Applied Research. 1-4 Units.
Assignment to private, government, international, or voluntary health agency or other approved organization where practical application of the materials studied on campus is made under the guidance of the department faculty and the organization involved. Research project that includes substantial analysis of data and discussion of results. Written report and oral presentation required. Prerequisite: Consent of department advisor and of instructors responsible for supervision.

HADM 724A. Health-Care Administration Practicum. 2 Units.
Provides experiential learning opportunities in health-care administration with an emphasis on student skill sets and interests, and organizational needs. Includes 100 clock hour practicum.

HADM 724B. Health-Care Administration Practicum. 4 Units.
Provides experiential learning opportunities in health-care administration with an emphasis on student skill sets and interests, and organizational needs. Includes 200 clock hour practicum.

HADM 724C. Health-Care Administration Practicum. 6 Units.
Provides experiential learning opportunities in health-care administration with an emphasis on student skill sets and interests, and organizational needs. Includes 300 clock hour practicum.

HADM 724D. Health-Care Administration Practicum. 8 Units.
Provides experiential learning opportunities in health-care administration with an emphasis on student skill sets and interests, and organizational needs. Includes 400 clock hour practicum.

Health Care Administration (HCAD)

Courses

HCAD 305. Health-Care Communication. 3 Units.
Basic communication applications of health-care organizations. Communication theory, language, oral reporting, conducting meetings and conferences, interpersonal techniques of listening and interviewing, nonverbal communication, crises management, and public relations and multicultural as well as ethical considerations.

HCAD 328. Health-Care Organizational Behavior. 3 Units.
Applies behavioral-science concepts to understanding individual and group behavior in health-care organizations. Topics include: attitude formation, perceptual processes, motivation, job design, reward systems, leadership, group processes, organizational structure and design.

HCAD 359. Health-Care Marketing. 3 Units.
Surveys major marketing topics, including consumer behavior, product, pricing, placement, and promotions.

HCAD 374. Health-Care Human Resources. 3 Units.
Purposefully explores how the strategic management of human resources creates value and delivers results in health care. Addresses an emerging human-resource paradigm in addition to focusing on the traditional perspectives of human resources that center around the personal function.

HCAD 401. Health-Care Operations Management. 3 Units.
Explains quantitative methods used to analyze and improve organizational processes within a health care organization. Decision analysis, break-even analysis, materials management, linear programming, queuing theory, quality management, network modeling, and game theory.

HCAD 409. Principles of Health-Care Administration. 3 Units.
Introduction to the administration of organizations within the context of the economic, regulatory, and financial constraints of the health-care delivery system. Areas covered include: concepts of organizational management; the management functions (planning, decision making, organizing, staffing, directing, and controlling); budgeting; committees and teams; adaptation, motivation, and conflict management; authority, leadership, supervision; and human resource management.

HCAD 414. Sustainability for Health-Care Management. 3 Units.
Approaches health care management by focusing on health-care sustainability guidelines that reflect the intrinsic relationship between delivering quality health care and the ecological health of the community. Examines social trends and drivers of sustainable health systems and explores various approaches for health care providers and systems to become better stewards of the environment. Studies the relationship between hospital design, sustainability initiatives, and quality of care.

HCAD 417. GIS for Health-Care Management. 3 Units.
Use of geographic information system (GIS) methods to address key issues faced by managers responsible for health-care systems in government or private sector organizations. Focuses on geodesign; that is, the use of geotechnologies to find optimal solutions to geospatially defined issues. Introduces fundamentals of mapping, spatial query, pattern analysis, and spatial statistics. Emphasizes methods for modeling key processes in health care including suitability, movement, and interaction.

HCAD 465. Health-Care Financial Management. 3 Units.
Focuses on accounting and financial management principles and concepts relevant to department-level management of health services organizations. Explores the financial environment in which health-care organizations operate.

HCAD 498. Health-Care Policy and Strategy. 3 Units.
Strategic planning process and tools needed to analyze external factors and internal capabilities as they relate to particular organizations. Development of vision, mission, goals, objectives, and control mechanisms. Provides insight into best practices for implementing developed strategy as it relates to the human resource management, marketing, and finance departments.
Health-Care Business and Leadership (HCBL)

Courses

HCBL 345. Project Management in Health Care. 3 Units.
Evaluate, recommend, negotiate, and manage projects for health-care applications. Project management techniques that integrate resources and facilitate workflow to produce desired outcomes.

HCBL 346. Legal and Ethical Environment in Health Care. 3 Units.
Focuses on health-care law, confidentiality, and ethics. Topics include liability theories, patient consent, privacy and security, evidence and discovery, and risk management, and compliance.

HCBL 434. Financial Management for Health Care. 3 Units.
Budget variance analysis, analysis of cost components, operating statements, and productivity related to a department budget. Examines financial accounting systems, financial evaluation ratios, and reports. Cost benefits realization preparation.

HCBL 471. Information Systems Management in Health Care I. 4 Units.
Detailed analysis of information systems used to support patient care, with emphasis on system development life cycle and support of health information technologies. Focuses on information governance initiatives.

Health Geoinformatics (HGIS)

Courses

HGIS 421. Cartography and Map Design. 3 Units.
Cartographic principles and guidelines, including geodesy, map projections, coordinate and locational systems, scale and distance, direction, vertical factors, mapping methods and techniques, and graphic representation of Earth patterns. Provides the foundation for understanding advanced geospatial technologies, including GIS, remote sensing, and global positioning systems.

HGIS 422. Principles of Geographic Information Systems. 4 Units.
Comprehensive overview of the concepts, functions, applications, technologies, and trends pertaining to automated geographic information systems (GIS). Framework for understanding the design, development, implementation, and management of GIS. Topics include: GIS hardware and software considerations, data resources, technical issues and applications in GIS.

HGIS 423. Practical Issues in GIS. 4 Units.
Addresses key tasks and issues in the implementation and management of government and private sector GIS systems. Includes: principles and approaches for GIS implementation; project management; organizational issues; GIS needs assessments, software/hardware considerations; financial and staffing requirements; project scope delineation; project planning and control; and, pilot projects.

HGIS 424. Desktop GIS Software Applications. 4 Units.
Introduces state-of-the-art, PC-based GIS applications. Student acquires the conceptual knowledge as well as the hands-on experience needed to optimally utilize available functions within desktop GIS technology for display, editing, analysis, and presentation of spatial and thematic data. Focuses on ArcView GIS and its analytical extensions.

HGIS 434. Advanced GIS Software Applications. 3 Units.
Comprehensive overview of the concepts, functions, skills, applications, technologies, and trends of modern remote sensing in environmental and health data acquisition and analysis; as well as applications in related public health issues. Topics include GIS-based image interpretation and data generation, satellite remote sensing, introduction to IDRISI Kibananjo and ERDAS Imagine; as well as other modeling tools, such as ArcGIS Modler, Stella, ArcPAD, GPS, CARTALink, etc.

HGIS 435. Sources, Capture, and Integration of GIS Data. 3 Units.
Provides overview of some of the technologies and methods used in capturing, processing, integrating, and displaying GIS data. Topics include: global positioning systems, satellite digital imagery, image processing, aerial photography, digital orthophotography, GIS applications for the World Wide Web, and GIS data sources on the Internet. Fundamentals of conceptual and physical design, construction, currency, and integrity of geospatial databases.

HGIS 436. Spatial Analysis with GIS. 4 Units.
Focuses on modeling and analyzing complex spatial relationships in GIS. Addresses selective retrieval of spatial information, and computation or mapping of statistical summaries. Includes: advanced quantitative statistics for analyzing data feature types and structures; investigating patterns in spatial data; feature manipulation; distance measurement; spatial overlay; proximity, spatial correlation, point pattern, surface, network, and grid analyses; spatial interaction; and, spatial modeling.

HGIS 437. GIS in Public Health. 2 Units.
Reviews GIS methods and analytical techniques for improving public health research and practice in epidemiology, health promotion, international health/development, health care administration, environmental health and contamination, and emergency management. Current applications of GIS technology and methods at international, national, and local levels. Prerequisite: HGIS 436.

HGIS 438. Introduction to Web GIS. 4 Units.
Introduces basic Web-based techniques, design and publication of maps, and geographic analyses. Includes: Web map design and geographic analysis via the Internet; REST Web services; building geospatial mashup applications; optimizing Web map services; creating and using geoprocessing Web services; and, mobile GIS.

HGIS 498. Health Geographics Senior Project. 2,4 Units.
Three-quarter senior research or applications project conducted during the student's final academic year. Student demonstrates mastery of spatial analysis skills by assessing relevant public and oral presentations. May be repeated for additional credit. Must have a total of 12 units. Paper and oral presentation required during final quarter of registration.

HGIS 499. Directed Study/Special Project. 1-4 Units.
Individual arrangements for undergraduate, upper division students to study under the guidance of a program faculty member. May include readings, literature review, or other special projects. Minimum of thirty hours required for each unit of credit. A maximum of 4 units applicable to any undergraduate degree program.
HGIS 521. Cartography and Map Design. 2 Units.
Map design and content, design procedures, production techniques, color selection, use of text, creation of visual hierarchy and visual balance. Explores thematic and general mapping with use of GIS data for mapping purposes. Discusses ArcGIS software. Map critiquing. Provides the foundation for understanding advanced geospatial technology, including GIS, remote sensing, and global positioning systems.

HGIS 522. Principles of Geographic Information Systems and Science. 2 Units.
Comprehensive overview of the concepts, functions, applications, technologies, and trends pertaining to automated geographic information systems (GIS). Topics include: GIS hardware and software considerations, data resources, technical issues and applications in GIS.

HGIS 523. Practical Issues in GIS. 3 Units.
Addresses key tasks and issues in the implementation and management of government and private sector GIS systems. Includes: principles and approaches for GIS implementation; project management; organizational issues; GIS needs assessments, software/hardware considerations; financial and staffing requirements; project scope delineation; project planning and control; and, pilot projects.

HGIS 524. GIS Software Applications and Methods. 3 Units.
Project-oriented course introduces state-of-the-art, PC-based GIS technology and applications. Provides the conceptual knowledge and hands-on experience needed to optimally utilize available functions within desktop GIS technology for modeling, displaying, editing, analyzing, and presenting spatial and thematic data. Focuses on ArcGIS and its analytical extensions, as well as Leica Geosystems ERDAS Imagine.

HGIS 525. Seminar in Geographic Information Systems. 1 Unit.
Covers various aspects of GIS technology and its applications to health that might otherwise be excluded from the usual and customary health informatics academic curriculum. Topics of interest include metadata creation and management, health informatics spatial data infrastructure, data interoperability, and mobile mapping technology. Presenters with specific expertise invited to cover areas of interest.

HGIS 527. Geospatial Technologies for Emergency Preparedness and Management. 3 Units.
Applies geospatial technology, data, tools, and methods to preparedness and emergency management. Includes: integration of existing geospatial tools into the framework of emergency preparedness and management; strategies for improving geospatial decision support; and, issues related to data availability, security, and policies. Prerequisite: HGIS 524; prior knowledge of GIS.

HGIS 531. Health Care Geographics. 2 Units.
GIS in health services research and the health-care sector. Introduces GIS-based methods of mapping, modeling, and analyzing issues, such as patients’ access to health care and services, locating new medical facilities and health services, delineating medical service areas and consumer markets. Presents emerging applications of GIS to the scale of individual facilities and the mapping of the human body itself.

HGIS 532. Introduction to Web GIS. 3 Units.
Introduces basic Web-based techniques, design and publication of maps, and geographic analysis through the Internet. Students learn how to design Web maps and implement geographic analysis via the Internet. Includes lectures, laboratory exercises, and a final project. Emphasizes understanding of REST Web services, building geospatial mashup applications, optimizing Web map services, creating and using geoprocessing Web services, and mobile GIS.

HGIS 533. GIS Applications in Environmental Health. 2,3 Units.
Addresses GIS display, modeling, analysis of environmental hazards/toxicants, and population exposure to environmental contaminants. Includes: geography and modeling of hazard sources; hazard surveillance; spatial characterization/modeling of contamination; GIS-enhanced risk assessment/management; management of public health safety problems; and, applications of GIS to environmental health and disaster/emergency responses. Prerequisite: HGIS 524 or HGIS 536; or consent of instructor.

HGIS 534. Remote Sensing Applications in the Health Services. 3 Units.
Overview of concepts, functions, skills, applications, technologies, and trends in modern remote sensing for environmental and health data acquisition and analysis. Includes: GIS-based image interpretation and data generation; satellite remote sensing; remote sensing applications; and, software and modeling tools.

HGIS 535. Advanced Remote Sensing Application and Systems Modeling in Health and Earth Science. 3 Units.
Introduces systems science enhancing research and application within environment, health, and earth systems. Includes, dynamic modeling tools, and application of systems thinking and analysis to specific interdisciplinary issues within public health and other applied sciences.

HGIS 536. Spatial Analytic Techniques and GIS. 3 Units.
Modeling and analyzing complex spatial relationships through GIS technology. Selective retrieval of spatial information and computation or mapping of statistical summaries. Advanced methods of analysis using spatial statistics. Prerequisite: HGIS 522 or HGIS 524; or consent of instructor.

Health Informatics (HLIF)
Courses

HLIF 510. Health-Care Information Systems. 4 Units.
Development and diffusion of current and futuristic information systems in health-care organizations. Explores an array of systems, from modular applications to enterprise-wide systems. Encompasses the concepts of EHR, PHR, HIE, regulatory movements, system architecture, system theory, and strategic planning for information systems. Course includes weekly laboratory (2-4 hours) focused on demonstrating competency with Microsoft Excel.

HLIF 515. The U.S. Health-Care System. 3 Units.
Analysis of health-care delivery in the United States, including organizations that provide health care, health-care professionals, beliefs and values, access issues, medical technology, regulatory requirements, reimbursement methods, and cost containment. Examines the evolution of the health-care delivery system beginning with the preindustrial era and ending with projections for the future of health-care delivery in the United States.

HLIF 520. Data Management: Modeling and Development. 3 Units.
Explores the concepts of data and the criticality of appropriate data management to successfully model, develop, and implement health-care information systems. Specific topics include database management, data integrity, knowledge management, data mining, data integration, data visualization, data architecture, and data warehousing.

HLIF 525. Management of Health-Care Data and Information. 2 Units.
"Investigates and analyzes standardization movements and reimbursement systems in health informatics. Topics addressed include SDOs, HL7, federal standardization, ANSI, UMLS, EDI, SNOMED CT, and revenue cycle management."

HLIF 526. Quality and Performance Improvement for Health Care. 2 Units.
Explores methods, design, and process for quality improvement within health-care organizations. Topics covered include workflow analysis, error prevention, problem detection, problem solving, change management, and systems evaluation.

HLIF 530. Data Analytics and Decision Support. 3 Units.
"Studies various data sources available for healthcare data analytics, along with direct application of software tools and techniques to extract, transform, analyze, visualize healthcare data. Review of strategies supporting decision support and knowledge management."

HLIF 532. Financial Management in Health Care. 2 Units.
Study of economics and financial management in health-care organizations. Analyses of economic market impacts, various health-care payment mechanisms, ratio analysis, cost-benefit analysis, operational and capital budgeting, and investment strategies.

HLIF 540. Leadership Perspectives and Practice. 3 Units.
Examines organizational culture and the various structures, designs, and models as they relate to leadership. Specific topics include change management, personnel management, governance, ethics, group dynamics, and human factor in health informatics.

HLIF 545. System Design, Implementation, and Management. 3 Units.
Study of the fundamentals of the system development life cycle (SDLC)—including system analysis assessment, techniques and tools, system design/development strategies, system implementation and operations, and system evaluation.

HLIF 548. Human Computer Interactions. 2 Units.
Critical analysis of the cognitive science and human factors related to EHRs, PHRs, and consumer informatics. Topics addressed include user needs, application design concepts, patient empowerment, and human-computer interaction.

HLIF 555. Health-Care Vendor and Project Management. 2 Units.
Investigates contemporary health-care information systems vendor offerings and effective techniques for establishing effective vendor relationships. Topics include request for information, request for proposals, contract negotiations, and project management.

HLIF 560. Policy Development for Privacy and Security in Health-Care Systems. 3 Units.
Study of the regulatory, social, and ethical issues of privacy and security in health care information systems. Topics covered include HIPAA, breech legislation/reporting requirements, security requirements/defenses, business continuity planning, and other regulatory issues related to privacy and security.

HLIF 565. Technical Structures in Health Informatics. 3 Units.
Examines the principles of computer science as related to the development and diffusion of technology supporting health-care information systems. Topics covered include technical infrastructure support of the following: business continuity, daily operations, wireless communication, security, EDI/HIE, networking protocols, system integration, programming languages, and system integration issues. Introduces students to computer programming and software development.

HLIF 570. Professional Portfolio. 2 Units.
Development of a professional e-portfolio that includes a personal video of introduction, the development of personal and professional goals, resume and cover letter writing, major projects completed from each course and from previous work experience, career mapping, reaction papers in response to the University's core values, publications completed, service learning, and other items as developed during the program.

HLIF 575. Capstone Project and Special Topics in Health Informatics. 2 Units.
Summative evaluation based on completion of either a systems application business plan or a data-analytics project utilizing competencies gained in the program. Facility-based or theory-based projects. Preparation and presentation of a complete capstone project.

HLIF 580. Health-Care Policy. 2 Units.
Analysis of current health-care policy development at a local, regional, state, and national levels. Includes review and critical analysis of proposed policy and contemporary forces impacting various policy agendas.

HLIF 584. Professional Practicum and Seminar for Health Informatics. 2 Units.
Experiential learning in health informatics. Students must satisfactorily complete 110 practicum hours. Second year standing in MSHI program; successful completion of all curriculum courses for the first 6 quarters of the program.

HLIF 599. Health Informatics Independent Study. 1-4 Units.
Student submits a project or paper on a topic of current interest in an area of health information administration. Regular meetings to provide the student with guidance and evaluation. Elected on the basis of need or interest. May be repeated.
Health Information Administration (HLIN)

Courses

HLIN 301. Introduction to Health Data Management. 4 Units.
Introduces scope, functions, and administration of health information management as a profession. Overview of documentation content and structure of paper, hybrid, and electronic health records. Requirements of accrediting, certifying, and licensing entities that guide patient health-data collection, with emphasis on acute care settings. Surveys functions within a health information management department.

HLIN 303. Clinical Classification Systems I. 3 Units.
Principles and conventions for ICD-10-CM and ICD-10-PCS coding techniques by body system and disease process. Basic coding techniques for diagnoses, surgical procedures, and other reasons for health-care encounters.

HLIN 304. Clinical Classification Systems II. 3 Units.
Continues coding techniques and conventions for ICD-10-CM and ICD-10-PCS by body system and disease process. Basic coding techniques for diagnoses, surgical procedures, and other reasons for health-care encounters.

HLIN 305. Health-Care Statistical Applications. 3 Units.
Problem-solving approach to health-care statistical applications and data presentation. Introduces research statistics. Laboratory sessions include instruction in the use of Microsoft Excel for data presentation and analysis.

HLIN 308. Introduction to Data Analytics. 4 Units.
Introduces data management, collection, analysis, and uses in health care. Concepts of transforming data into information, data analytic techniques, and data presentation. Uses software tools for the manipulation, analysis, and presentation of data. Introduces basic health-care statistical techniques.

HLIN 314. Computer System Architecture. 2 Units.
Study of computer system architecture and infrastructure: hardware, software, network topologies and components, networking and telecommunications, terminology, and concepts. Provides an understanding of how a computer works and the reasoning behind computer design.

HLIN 321. Health Information Science and the Health-Care System I. 4 Units.
Overview of U.S. health-care delivery, including the history of health-care institutions, external governance, regulations and standards, reimbursement methods, and the health-care organizations and professionals that provide services. Introduction to information management in health care.

HLIN 322. Health Information Science and the Health-Care System II. 4 Units.
Expanded concepts of information management in health care, including practical applications in information science, accrediting bodies, data management, documentation guidelines and requirements, and data integration standards. Practical applications of information governance in alternative health-care delivery systems. Prerequisite: HLIN 321.

HLIN 325. Pharmacology for Health Information Administration. 2 Units.
Provides understanding of pharmacology as required for medical record analysis, audits, and other related studies. Basic definitions, sources of information, and classification of drugs.

HLIN 334. Clinical Classification Systems. 4 Units.
Overview of clinical classification systems, terminologies, vocabularies, and nomenclatures. Internal and external auditing systems for coding compliance.

HLIN 335. Advanced Classification Systems and Coding Compliance. 4 Units.

HLIN 340. Seminar and Portfolio for Health Information Management. 4 Units.
Study of computer system architecture and infrastructure: hardware, software, network topologies and components, networking and telecommunications, terminology, and concepts. Technology support for data collection, storage, analysis, and reporting—including database development and management for meeting user information needs. Construction of data manipulation, extraction, and reporting tools.

HLIN 344. Health-Care Informatics and Database Management. 4 Units.
Students develop a portfolio that illustrates their acquisition of the knowledge and skills that prepare them for entry into the profession, as well as reflects on the student learning outcomes set by Loma Linda University—including wholeness, Christ-centered values, commitment to discovery and lifelong learning, effective communication, embracing and serving a diverse world, and collaboration. Service learning requirements included.

HLIN 347. Advanced Information Privacy and Security. 4 Units.
Compares requirements affecting the privacy, security, control, and disclosure of health information. In-depth analysis of legislation governing privacy and security measures in health care. Data quality tools and measures. Examination of security safeguards, including risk assessment, contingency planning and data recovery for various technologies. Prerequisite: HCBL 346.

HLIN 348. Pathopharmacology for Health Information Administration. 4 Units.
Study of the disease processes in human body systems, as well as drug interventions used in treatment and prevention of disease.

HLIN 354. Professional Practice Experience. 3 Units.
Simulated professional practice experiences and assignments in health information management and technology, during the Spring Quarter of the junior year; includes use of software-as-a-service systems. Written and oral reports of experience.

HLIN 361. Professional Practice Experience I. 1 Unit.
Supervised experience in health information departments and other areas of health care or health-related facilities. Includes applied laboratory assignments for health information administration professional courses.

HLIN 362. Professional Practice Experience II. 1 Unit.
Supervised experience in health information departments and other areas of health care or health-related facilities. Includes applied laboratory assignments for HIIM professional courses.

HLIN 365. Professional Practice Experience III. 1 Unit.
Supervised clinical experience in a health facility or health-related organization, with simulated laboratory experiences and assignments, during the Spring Quarter of the junior year. Written and oral reports of experience. Prerequisite: Successful completion of required fall quarter courses, enrollment in or completion of required winter courses, and enrollment in required spring quarter courses; or permission of department chair.
HLIN 395. Professional Practice Experience I—Junior Affiliation. 3 Units.
Three-week supervised clinical experience in a health facility or health-related organization at the end of the junior year. Written and oral reports of experience, with classroom discussion. Not required of registered health information technologists (RHITs). Prerequisite: Completion of junior-year courses and laboratory assignments; or permission of the department chair.

HLIN 401. Health Information Systems I. 4 Units.
The first in a series of two courses focusing on information system planning, development, and management in health care. Topics addressed include system architecture, technology infrastructure, integration, and interoperability; application categories employed in health care, including electronic health records; data management strategies, including data quality and standardization movements; decision support; consumer informatics; human computer interfaces; and data and system security.

HLIN 402. Health Information Systems II. 5 Units.
Second course in a series of two courses focusing on information system planning, development, and management in health care. Topics include system architecture, technology infrastructure, integration, and interoperability; application categories employed in health care, including electronic health records; data management strategies, including data quality and standardization movements; decision support; consumer informatics and human-computer interfaces; and data and system security.

HLIN 404. Clinical Terminologies and Vocabularies. 2 Units.
Clinical terminologies, code sets, classifications systems, and nomenclatures as used in the electronic health record.

HLIN 407. Financial Management for Health Information Management. 2 Units.
Budget variance analysis, analysis of cost components, operating statements, and productivity related to a department budget. Examines financial accounting systems, financial evaluation ratios, and reports. Cost benefits realization preparation.

HLIN 408. Reimbursement for Health Care. 2 Units.
Financial aspects of health care involving prospective reimbursement systems, analysis of various health-care reimbursement schemes, and financial disbursements. Management issues in reimbursement using DRGs, APCs, and other prospective payment systems. Strategies and techniques for successful revenue cycle management.

HLIN 430. Quality Management and Performance Improvement in Health Care. 3 Units.
Continuous quality improvement methodologies and processes applied to patient safety and satisfaction, internal and external regulatory requirements, risk management, evidence-based medicine, and utilization review to achieve optimum patient care.

HLIN 432. Database Management. 2 Units.
Theories and steps of database development using Microsoft Access. Design and construct relationships, forms, advanced queries with SQL, reports, and macros.

HLIN 435. Seminar and Portfolio for Health Information Management II. 4 Units.
Students continue to develop a portfolio that illustrates the potential graduate’s ability to meet the student learning outcomes set by Loma Linda University. Provides students with a format for demonstrating their acquisition of the knowledge and skills that prepare them for credentialing and entry into the profession. Prerequisite: HLIN 340.

HLIN 437. Data Analytics and Visualizations for Health Care. 4 Units.
Introduces data analytics in health care. Concepts of transforming data into useful information to support organizational decisions and outcomes management. Utilizes software tools for the manipulation, analysis, and visualization of data. Applies statistical methods with data extraction methodologies, data exploration, and mining.

HLIN 438. Revenue Cycle Management for Health Care. 4 Units.
In-depth analysis of the U.S. health-care reimbursement system. Addresses principles of revenue cycle management, payment methodologies, and associated data requirements.

HLIN 439. Management in Health Care. 4 Units.
Principles of management and human resources, including: human resource acquisition, training, development, and evaluation; productivity; benchmarking; problem solving, and decision making.

HLIN 440. Leadership and Strategy Management in Health Care. 4 Units.
Leadership theory and principles, including: communication skills; negotiating and influencing; team building and management; workflow optimization; strategy and vision planning; diversity and cultural influences. Reflection and evaluation assessment of personal awareness, strengths, and weaknesses.

HLIN 442. Legal Aspects of Health Information Administration II. 3 Units.

HLIN 444. Corporate Compliance in Health Care. 3 Units.
Practical application of the guiding principles of corporate compliance in health-care organizations. Analyzes standards and policies established by the Center for Medicare and Medicaid Services. Studies in-depth The Joint Commission, HIPAA, qui tam laws, and fiscal intermediaries —emphasizing business ethics and integrity. Includes the process of institutional audits for fraud and abuse. Includes clinical documentation improvement theory as it relates to health care.

HLIN 445. Coding Seminar. 2 Units.
Advanced coding concepts and comprehensive review of all health-care coding systems. Current procedural terminology (CPT) at the beginning and intermediate levels. Reviews the federally supervised coding auditing process, including state and federal coding and billing regulations, chargemaster maintenance, coding ethics, coding quality, and coding compliance. Various code sets and terminologies used in health-care systems. Overview of E & M coding. Prerequisite: HLIN 304; or equivalent.

HLIN 451. Quality Improvement in Health Care. 3 Units.
Quality improvement methodology. Data retrieval, display, and follow-up for various sectors of health care. Mechanisms for promoting facility-wide participation in achieving optimum patient care, as delineated in medical staff-information management, accreditation, and government standards. Risk management as an integral facet of quality improvement. Relationship to corporate compliance.

HLIN 454. Professional Practice Experience II. 4 Units.
Directed experience at an approved health-care or health-related facility. Applies skills and knowledge to management. Written and oral reports of experience, with classroom discussion. International experience may be available. Prerequisite: HLIN 354.
HLIN 462. Professional Practice Experience IV. 1 Unit.
Supervised experience in health information departments and other areas of health care or health-related facilities, with emphasis on management. Includes applied laboratory assignments for HIIM professional courses.

HLIN 463. Professional Practice Experience V. 1 Unit.
Supervised experience in health information departments and other areas of health care or health-related facilities, with emphasis on management. Includes applied laboratory assignments for HIIM professional courses.

HLIN 472. Information Systems Management in Health Care II. 4 Units.
Advanced study of information system development, diffusion, and strategic application in health care. Examines system usability, regulatory compliance, advanced security, interoperability, and valuation. Health information organizations and operations, consumer and public health informatics, internal and external data integrity and validity. Prerequisite: HCBL 471.

HLIN 475. Research Methods in Health Information Management. 3 Units.
Introduces the scientific method in research. Focuses on the major steps of the research process as these steps relate to research report evaluation, proposal writing, literature review, development of conceptual framework, identification of variables, statement of hypotheses, research design, and analysis and presentation of data. Common research design and assessment of risk in epidemiologic studies.

HLIN 483. Alternative Delivery Systems in Health Care. 4 Units.
Focuses on health information management in delivery systems such as: long-term care, hospital-based and free-standing ambulatory care, hospice, home health, dialysis centers, veterinary medicine, consulting, correctional facilities, mental health, substance abuse, dental, rehabilitation, managed care, and cancer registry. Health record content, format, and regulatory requirements; the role of the HIM professional; data collection; risk and utilization management; and quality improvement areas.

HLIN 484. Current Topics in Health Information Administration. 4 Units.
Focuses on career planning, management skills, and professional development. Health information management professionals working in various health-care settings share their knowledge and experience with students. Includes preparation exercises for the national credentialing examination.

HLIN 493. Health Information Management I. 4 Units.
Introduces basic management functions, philosophies, principles, and tools of health-care management. Emphasizes management theory, management tools, and application. Specific topics include: planning, organizing, controlling, management by objective, problem solving and decision making, and group dynamics.

HLIN 494. Health Information Management II. 4 Units.
Advanced study of topics relevant to management and leadership in the HIM profession, including leadership theory and strategies; ergonomics/ workplace design; individual and organizational productivity; innovation and change management; labor legislation; emotional intelligence; cultural and workforce diversity; ethical and social responsibility; disaster preparedness; entrepreneurship; tactical and strategic planning; contemporary leadership issues.

HLIN 495. Professional Practice Experience Senior Affiliation. 3 Units.
Directed experience at an approved health care or health-related facility. Applies skills and knowledge to management. Written and oral reports of experience, with classroom discussion. International experience may be available.

HLIN 499. Health Information Administration Independent Study. 1-4 Units.
Student submits a project or paper on a topic of current interest in an area of health information administration. Regular meetings to provide the student with guidance and evaluation. Elected on the basis of need or interest. May be repeated.

Health Professions Education (HPED)

Courses

HPED 504. Pedagogy and Technology. 3 Units.
Teaching and learning theories adapted to technology. Explores learning management systems. Overview of instructional design.

HPED 517. History and Philosophy of Adventist Medical and Health Education. 3 Units.
Explores the essence of Loma Linda University and the Seventh-day Adventist philosophy of medical and health education as found in the writings of Ellen G. White and others. Discusses the core values of LLU and the science and promotion of healthy lifestyles and health-care delivery.

HPED 525. Education Theory for the Health Professional. 3 Units.
Overview of education theories relevant to andragogy and education of health professionals. Also explores theories of online teaching and learning.

HPED 535. Current Issues in Health Professions Education. 3 Units.
Explores education foundations and trends in the different health professions. Reviews historic transitions and issues currently impacting the professions.

HPED 551. Master's Thesis I. 3 Units.
Selection of research topic, evaluation of current literature on the subject, and construction of data collection instrument. Students can select this option in lieu of the HPED Capstone Project 1. Prerequisites: completion of the core courses in the MS degree program in Health Professions Education, and in consultation with the program director.

HPED 552. Master's Thesis II. 3 Units.
Collection of data using approved instrument, analysis of results, discussion, and documentation of findings according to thesis format. Prerequisites: Successful completion of HPED 551 Master's Thesis I and consent of program director.

HPED 561. Leadership in the Health Professions I. 3 Units.
Inventory and assessment of personal leadership skills and strengths in a faith-based context.

HPED 562. Leadership in the Health Professions II. 3 Units.
Overview of theories of leadership as applied to academic and health professions contexts. Study of leadership characteristics of significant individuals. Prerequisite: HPED 561 Leadership in the Health Professions I.

HPED 573. Readings in Academic Leadership. 3 Units.
Dynamics of leadership in an academic environment. Explores and discusses the historical and current natures of academic leadership.

HPED 581. Capstone Project in Health Professions Education I. 3 Units.
Students address and present a substantial issue related to their professional area of interest, as well as design and implement a scholarly approach towards its resolution. Emphasizes the design, literature review, and needs assessment of the project. A thesis option available for students requiring a directed research study.
Health Promotion and Education (HPRO)

Courses

HPRO 500. Stress Management. 2 Units.
Covers aspects of stress as it relates to health. Addresses definitions of stress, emphasizing the potential effect of stress on physical and mental diseases. Presents coping mechanisms, e.g., cognitive behavior therapy, music therapy, spirituality, and several other techniques. Presented in a service-learning format in which students are in direct contact with the community applying stress-prevention and coping strategies.

HPRO 501. Human Anatomy and Physiology I. 6 Units.
Systematic investigation of the form and function of human biological systems. Laboratory included. Limited to doctoral degree students.

HPRO 502. Human Anatomy and Physiology II. 6 Units.
Continues HPRO 501. Systematically investigates the form and function of human biological systems. Laboratory included. Limited to doctoral degree students.

HPRO 509. Principles of Health Behavior. 3 Units.
Introduces key health behavior-change theories and psychosocial determinants of health behaviors. Provides an overview of motivation, stress and coping, addiction, culture, and religion as related to health behavior. Laboratory emphasizes communication, leadership, and group process activities.

HPRO 515. Mind-Body Interactions and Health Outcomes. 3 Units.
Studies the effect of the neurological system on physical health, with a focus on psychoneuro-immunology. Summarizes scientific disciplines that study brain, immune system, and health behavior interactions that provide the healthcare professional with an integrative understanding of lifestyle, whole person care for immune system function and wellness. Prerequisite: Anatomy and physiology, biochemistry.

HPRO 519. Pharmacology. 3 Units.
Basic and clinical pharmacology. Emphasizes drugs of concern to health promotion specialists. Principles of drug addiction, drug receptors and pharmacodynamics, pharmacokinetics, and practical uses for drugs. Prerequisite: Anatomy and physiology, general chemistry, organic chemistry, biochemistry.

HPRO 524. Child and Adolescent Health. 3 Units.
Studies developmental and health problems unique to the child and adolescent periods of life. Focuses on special needs and public health programs designed to reach children and adolescents. Gives attention to special problems, such as social adaptation, juvenile delinquency, drug abuse, suicide, adolescent pregnancy.

HPRO 526. Lifestyle Diseases and Risk Reduction. 3 Units.
Discusses current lifestyle diseases, including: cardiovascular, metabolic, communicable, and nutritional. Concepts regarding risk factors, screening approaches, and risk reduction, with impact on specific health parameters. Prerequisite: Anatomy and physiology, or consent of instructor.

HPRO 527. Obesity and Disordered Eating. 3 Units.
Explores causes and development of obesity, principles of weight management, and relapse prevention. Includes discussion of the causes and treatment of anorexia nervosa and bulimia.

HPRO 529. Preventive and Therapeutic Interventions in Chronic Disease. 3 Units.
Specific preventive care techniques dealing with lifestyle and chronic disease in the clinical environment. Multidisciplinary lifestyle interventions in the prevention and treatment of dyslipidemia, diabetes, hypertension, osteoporosis, sleep disorders, and other chronic conditions. Uses case studies and role playing to explore interventions in a variety of clinical scenarios.

HPRO 530. Fundamentals of Research in Health Behavior and Health Education. 3 Units.
Introduces research in behavioral health and health education sciences. Application of research principles and techniques to quantitative research methods and surveys in health education. Includes: reading and use of published research; development of research questions; hypotheses testing; selection of research methods; data collection; causal inference; reliability; validity; measurement; and, research ethics.

HPRO 531. Pathology of Human Systems I. 3 Units.
Fundamental mechanisms of disease, including degenerative changes and physical and chemical injury. Reviews diseases by organ system: endocrine, biliary, hepatic, respiratory, digestive, urogenital, skeletal, and central nervous. Limited to doctoral degree students.

HPRO 532. Pathology of Human Systems II. 3 Units.
Introduces micropathological organisms. Surveys tissue changes in infectious diseases. Growth disorders, including: basic genetic problems and neoplasia; cardiovascular, circulatory, and inflammatory systems. Limited to doctoral degree students. Prerequisite: HPRO 531.

HPRO 534A. Research Methods. 2 Units.
Philosophy of scientific research, sources of research invalidity, quantitative and qualitative literature review techniques, setting research goals and objectives, quasi-experimental and experimental design, research ethics. Requires presentation and critique of published research and literature review. Taken over the course of two quarters for a total of 4 units (HPRO 534A, 2 units Winter Quarter; and HPRO 534B, 2 units Spring Quarter). Doctoral students only. Prerequisite: STAT 509.

HPRO 534B. Research Methods. 2 Units.
Philosophy of scientific research, sources of research invalidity, quantitative and qualitative literature review techniques, setting research goals and objectives, quasi-experimental and experimental design, research ethics. Requires presentation and critique of published research and literature review. Taken over the course of two quarters for a total of 4 units (HPRO 534A, 2 units Winter Quarter; and HPRO 534B, 2 units Spring Quarter). Doctoral students only. Prerequisite: HPRO 534A.

HPRO 535. Health Education Administration and Leadership. 3 Units.
Analyzes the managerial and leadership roles of the health education specialist in both public and private health organizations. Emphasizes organizational structure and health communication; as well as managing, supervising, marketing, decision making, and other administrative roles.
HPRO 536. Program Planning and Evaluation. 2 Units.
Introductory course that utilizes the planning cycle to address public health problems. Analyzes trends in health-care planning. Applies planning cycle to selected topics. Provides overview of evaluation design, methodology, and instrument development for health education programs. Laboratory included.

HPRO 537A. Community Programs Laboratory—A. 2 Units.
First in a three-course sequence operationalizing qualitative research methods. Includes: conducting observational assessments, windshield surveys, and personal interviews; participating in focus groups; and, compiling secondary data for a community-needs assessment. Preparation for implementation and evaluation of health education programs.

HPRO 537B. Community Programs Laboratory—B. 1 Unit.
Student-designed marketing and evaluation plans for community-based health education program. Student implements and evaluates programs developed during HPRO 537A. Prerequisite: HPRO 537A.

HPRO 537C. Community Programs Laboratory—C. 1 Unit.
Students continue their marketing plan while implementing and evaluating their programs in the community. Students write a plan for program sustainability with community organizations as stakeholders.

HPRO 538. Health Education Program Development and Evaluation. 3 Units.
Uses program-planning theories, models, and diagnostic techniques to design, deliver, and evaluate health promotion and education programs in community, occupational, educational, and health care settings. Presents steps in the health educational planning process. Includes: assessments; goals and objectives; intervention strategies; behavioral and educational theories; instructional delivery and designs; evaluation; and, reporting.

HPRO 539. Policy and Issues in Health Education. 3 Units.
Examines and discusses policy issues, trends, and strategies relating to health education—including but not limited to HIV/AIDS, women’s health, injury prevention and control, tobacco and other drug issues, and health issues in ethnically diverse populations. Provides opportunities to develop and improve presentation skills. Project included.

HPRO 540. Writing for Health Professionals. 3 Units.
Writing by health professionals for popular, lay, or professional publications. Student selects journal or magazine, writes query letter, and prepares abstract and manuscript in final form for submission. Includes preparation of camera-ready art. Preparation of two publishable papers. Limited to doctoral degree students.

HPRO 544. Health Education Evaluation and Measurement. 3 Units.
Student selects and develops health education and psychosocial measurement instruments, determines validity and reliability of evaluation tools, provides overview of data-collection methods and protocols, analyzes and interprets results, and communicates evaluation findings. Limited to doctoral degree students.

HPRO 553. Addiction Theory and Program Development. 3 Units.
Applies addiction process theory in a practical way to program development. Emphasizes alcohol, tobacco, and other drug (ATOD) problems, using case studies and extensive reading as part of a problem-solving approach. The epidemiological, pathological, physiological, psychological, and spiritual bases for prevention and treatment of addictions. Laboratory included.

HPRO 555. Exercise Physiology I. 3 Units.
Basic preparation for development and leadership of exercise programs. Includes exercise physiology, training, acute and chronic effects of exercise, simple assessment of fitness, role of exercise in prevention of common health problems, and management of selected risk factors. Discusses endurance, strength, flexibility, and aerobic exercises. Laboratory included.

HPRO 556. Exercise Physiology II. 3 Units.
Physiologic basis of the normal body function during exercise. Emphasizes the training effects of aerobic exercise. Noninvasive laboratory methods of the study of the circulatory and respiratory systems. Laboratory included. Prerequisite: HPRO 573; and basic physiology.
HPRO 586. Introduction to Preventive Care. 1 Unit.
Provides overview of preventive care’s role within public health. Orientation to doctoral program, with attention to professional portfolio preparation. Limited to doctoral degree students in preventive care.

HPRO 587. Preventive Care Practice Management. 2 Units.

HPRO 588. Health Behavior Theory and Research. 4 Units.
Analyzes factors contributing to health behavior decisions. Theory and research relevant to individual, family, organization, and community behavior. Emphasizes critical-thinking, professional writing, and oral presentation. Application of theory to development of a basic research proposal. Limited to doctoral degree students. Consent of instructors for nondoctoral degree students. Prerequisite: HPRO 509; or equivalent.

HPRO 589. Qualitative Research Methods. 3 Units.
Applies qualitative methods to instrument design, sampling, and data collection. Focuses on public health issues, ethics, and theory-building. Supervised needs assessment in a selected community.

HPRO 590. Worksite Wellness. 3 Units.
Prepares students to enter the field of corporation wellness as leaders not only in developing, implementing, and evaluating wellness workplace programs; but also in decreasing the burden on corporation health, morale, budget, and performance caused by lifestyle-related diseases.

HPRO 595. Community Project. 1-4 Units.
Provides the student with an individual, hands-on experience to apply the principles learned in the didactic courses of the health education program. Students plan, implement, and evaluate a health education intervention based on the findings of the needs assessment. Programs consist of several sessions, individually planned and taught by the student. Minimum of thirty hours required for each unit of credit. A maximum of 4 units applicable. Prerequisite: Consent of instructor.

HPRO 596. Directed Study/Special Project. 1-4 Units.
Individual arrangements for advanced students to study under the guidance of a program faculty member. May include reading, literature review, or other special projects. Minimum of thirty hours required for each unit of credit. A maximum of 4 units applicable to any master’s degree program. Prerequisite: Consent of instructor and of program advisor.

HPRO 597. Dissertation Proposal. 1-10 Units.
Doctoral student develops the written dissertation proposal and collaborates with doctoral dissertation committee chair on mutually agreed-upon objectives, which will serve as the basis for evaluation. Culminates in a written and oral dissertation proposal defense and advancement to candidacy. Prerequisite: Successful completion of comprehensive exams.

HPRO 598. Dissertation. 1-14 Units.
Student prepares a manuscript presenting results of the doctoral research study. Limited to doctoral degree candidates. Prerequisite: Advancement to Candidacy.

HPRO 704A. Internship. 2 Units.
Training and supervised experience (minimum of 100 clock hours) with other health professionals in applied settings. Opportunity to work with individuals, families, and groups in assessing health and building relationships conducive to health-promoting behavior changes. Limited to doctoral (preventive care) degree students. May be repeated for a total of up to 12 units.

HPRO 704B. Internship. 4 Units.
Training and supervised experience (minimum of 200 clock hours) with other health professionals in applied settings. Opportunity to work with individuals, families, and groups in assessing health and building relationships conducive to health-promoting behavior changes. Limited to doctoral (preventive care) degree students. May be repeated for a total of up to 12 units.

HPRO 704C. Internship. 6 Units.
Training and supervised experience (minimum of 300 clock hours) with other health professionals in applied settings. Opportunity to work with individuals, families, and groups in assessing health and building relationships conducive to health-promoting behavior changes. Limited to doctoral (preventive care) degree students.

HPRO 704D. Internship. 8 Units.
Training and supervised experience with other health professionals in applied settings. Opportunity to work with individuals, families, and groups in assessing health and building relationships conducive to health-promoting behavior changes. Limited to doctoral (preventive care) degree students. A ten-week (40 hours/week) field internship.

Implant Dentistry (IMPD)

Courses

IMPD 505. Patient Presentation Seminar. 1 Unit.
Prepares students to enter the field of corporation wellness as leaders not only in developing, implementing, and evaluating wellness workplace programs; but also in decreasing the burden on corporation health, morale, budget, and performance caused by lifestyle-related diseases. Limited to doctoral (preventive care) degree students. A ten-week (40 hours/week) field internship.

IMPD 547. Implant Dentistry Grand Rounds. 1 Unit.
Weekly review of surgeries scheduled for the upcoming week in order to facilitate successful outcomes. Includes analysis of challenges, latest recommendations, techniques for minimizing postoperative side effects, and implementation of strategic surgical procedures.
IMPD 561. Dental Bioengineering. 2 Units.
Studies the structures and properties of dental implant materials and implant prosthetic superstructures.

IMPD 585. Implant Prosthodontics. 2 Units.
Gives the graduate student in implant dentistry in-depth didactic and clinical instruction in techniques and procedures related to the rehabilitation of patients with prosthetic devices supported by dental implants. Advanced clinical and laboratory procedures, emphasizing implant restorations for completely and partially edentulous patients. Emphasizes attachments and superstructure design. Repeated registrations required to fulfill the total units.

IMPD 601. Literature Review in Implant Dentistry. 2 Units.
Reviews historical and/or fundamental implant dentistry literature. Repeated registrations required to fulfill the total units.

IMPD 604. Current Literature Review in Implant Dentistry. 2 Units.
Gives the postdoctoral students in implant dentistry a deeper understanding of the research and literature currently available. Repeated registrations required to fulfill the total units.

IMPD 611. Introduction to Implant Dentistry. 2 Units.
Overview of the clinical science of implant dentistry, including etiology, therapy, clinical methods, and record keeping.

IMPD 612. Advanced Implant Dentistry. 2 Units.
Provides postdoctoral students with the knowledge and techniques of advanced prosthodontic and implant procedures—notably those involved in sinus graft surgery, surgical repairs of implant defects, and the principles involved in immediate loading of implants.

IMPD 631. Oral Implant Surgery. 1 Unit.
Instruction in basic and advanced implant surgery principles. Repeated registrations required to fulfill the total units.

IMPD 634. Diagnosis and Treatment Planning in Implant Dentistry. 1 Unit.
Didactic and clinical aspects of diagnosis and treatment planning for patients with complex dental problems. Repeated registrations required to fulfill the total units.

IMPD 637. Peri-Implant Histopathology. 1 Unit.
Gives the postdoctoral student in implant dentistry a better understanding of the implant interface and biological changes that take place in the tissues surrounding dental implants following their placement.

IMPD 654. Practice Teaching in Implant Dentistry. 1-3 Units.
Teaching experience in implant prosthodontics and implant surgery.

IMPD 696. Scholarly Activity in Implant Dentistry. 1 Unit.
Selected didactic, clinical, and/or laboratory activity developed by the program director or a designated program faculty member. Primarily designed for students to fulfill the certificate requirements for scholarly activity/research in implant dentistry. Multiple registrations may be needed to complete these activities.

IMPD 697A. Research. 1 Unit.
Student identifies a research project, prepares a proposal, and obtains approval for the protocol. Multiple registrations may be needed to complete these research activities. This is a required course for the Master of Science (M.S.) and Master of Science in Dentistry (M.S.D.) degrees.

IMPD 697B. Research. 1 Unit.
Conducting the actual research project, including the data collection. Multiple registrations may be needed to complete these research activities.

IMPD 697C. Research. 1 Unit.
Student completes research project, holds a public presentation of research, and submits a publishable paper to his/her research guidance committee (RGC) for approval. Multiple registrations may be needed to complete the publishable paper.

IMPD 698. Thesis. 1-8 Units.

IMPD 725. Clinical Practice in Implant Dentistry. 4 Units.
Experience in the clinical diagnosis and treatment of patients who may benefit from implant dentistry therapy. Repeated registrations required to fulfill total clock hours. A minimum of 120 clock hours per quarter. Repeated registrations required to fulfill total units.

IMPD 726. Clinical Practice in Periodontics in Implant Dentistry. 2 Units.
Clinical experience in the diagnosis and treatment of periodontal diseases. Repeated registrations required to fulfill total units. A minimum of sixty clock hours per quarter. Repeated registrations required to fulfill total units.

IMPD 727. Clinical Practice of Prosthodontics in Implant Dentistry. 2 Units.
Advanced clinical practice in the treatment of individuals with fixed, removable, maxillofacial, and implant prostheses. Repeated registrations required to fulfill total units. A minimum of sixty clock hours per quarter. Repeated registrations required to fulfill total units.

---

**Instructional Design and Media Technology (IDMT)**

**Courses**

IDMT 521. Instructional Design I. 3 Units.
Examines adult instructional theories and teaching approaches to increase student learning outcome success. Exposes students to latest instructional resources, techniques, and technology. Emphasizes communication during the design process and use of instructional theories and tools to communicate course content effectively.

IDMT 522. Instructional Design II. 3 Units.
Develops and applies strategies for instructional theory utilizing media, including making rational choices regarding technology and communication.

IDMT 531. Host Systems and Authoring I. 3 Units.
Provides a working knowledge of various online educational systems, as well as the basic approaches to and differences in creating courses within those systems. Not a programming course.

IDMT 541. Digital Media Production I. 3 Units.
Introduces students to the production process basics (editing, graphics, and animation) needed to create effective instructional modules. Students shoot, edit, and deliver a completed DVD and upload to the web a digital file of a completed instructional module. Along with hands-on learning of the entire process, students explore key concepts relating to visual learning and how to create and communicate effectively with visual images.

IDMT 542. Digital Media Production II. 3 Units.
Explores advanced production techniques (editing, graphics, and animation), emphasizing the production of an instructional video. Introduces shooting and editing techniques unique to creating interactive, instructional media. Students produce an online instructional video and an interactive educational module for a tablet. Prerequisite: IDMT 541.
IDMT 561. Graphics I. 3 Units.
Introduces students to Adobe Photoshop and exposes them to advanced graphic capabilities of editing software packages. Emphasizes exploration of layout techniques that maximize educational effectiveness. Prerequisite: IDMT 521, IDMT 541, IDMT 542.

IDMT 564. Motion Graphics I. 3 Units.
An Adobe After Effects introductory course. Students become proficient with the software, research various characteristics of visual learning, and create simple interactive motion graphics that can be included in an interactive educational module. Prerequisite: IDMT 521, IDMT 542, IDMT 541, IDMT 542.

IDMT 571. Animation I. 3 Units.
Introduces students to 2D and 3D animation software packages. Emphasizes proper animation techniques as specific software packages are learned. Students research existing education-focused animations.

IDMT 581. Instructional Design and Media Technology Internship I. 3 Units.
The first of two required internships that provides opportunity for students to work for a short time in areas that will provide practical experience. Encourages students to seek opportunities that emphasize the creative side of media production. Prerequisite: IDMT 521, IDMT 542, IDMT 541, IDMT 542.

IDMT 582. Instructional Design and Media Technology Internship II. 3 Units.
The second of two required internships. Encourages students to seek opportunities that specifically provide experience creating digital courses or working with community partners. Prerequisite: IDMT 521, IDMT 542, IDMT 541, IDMT 542, IDMT 518 and one IDMT elective.

Integrated Biomedical Graduate Studies (IBGS)

Courses

IBGS 501. Biomedical Communication and Integrity. 2 Units.
Improves students' scientific communication skills, as well as increases their awareness of proper ethical conduct in biomedical research. Teaches appropriate techniques for written and oral presentations; as well as ethics and standard practices for record keeping, data analysis, and authorship.

IBGS 502. Biomedical Information and Statistics. 2 Units.
Introduces students to the basics of statistical analysis in a relevant biomedical setting. Additionally, provides practical information on the use of database systems and software tools for data management and analysis.

IBGS 503. Biomedical Grant Writing. 2 Units.
Encompasses the process of writing a biomedical research grant from medical problem through final draft of an NIH-style research proposal. With guidance from the instructor, students design and write a research proposal that is ready for submission to the NIH. Familiarizes students with potential funding sources, the process of formulating a fundable research plan, and communicating that plan in an appropriate format.

IBGS 511. Cellular Mechanisms and Integrated Systems I. 6 Units.
The first quarter of a two-quarter sequence designed to give first-year graduate students an exposure to major core concepts of molecular and cellular biology.

IBGS 512. Cellular Mechanisms and Integrated Systems II. 6 Units.
The second quarter of a two-quarter sequence designed to give first-year graduate students an exposure to major core concepts of molecular and cellular biology.

IBGS 513. Cellular Mechanisms and Integrated Systems III. 8 Units.
The third quarter of a three-quarter sequence designed to give first-year graduate students a broad, integrated exposure to the molecular and cellular basis of modern human biology. Focuses on how cells and molecules work together to create functioning organs, ending with a treatment of genetic, lifestyle, and microbial contributions to human pathology. Prerequisite: IBGS 511, IBGS 512.

IBGS 522. Cellular Mechanisms and Integrated Systems II Journal Club. 2 Units.
A component of IBGS, taught in a journal-club format. Presents and discusses recent literature related to IBGS 512.

IBGS 523. Cellular Mechanisms and Integrated Systems III Journal Club. 2 Units.
Employs a journal-club format that explores contemporary topics of program-specific interest to class participants.

IBGS 525. Translational Research Training. 2 Units.
This is an interactive course that brings graduate students together with medical students, clinical residents and clinical fellows in a small group setting, where they learn to develop a translational research plan for addressing clinical problems and engage various components of the community to facilitate and foster translational research leading to improved patient care and healthier communities. This course has been approved as a service learning course.

IBGS 537A. Special Topics in Biomedical Sciences. 1-4 Units.
Current topics in biomedical sciences. Specific content varies from quarter to quarter. May be repeated for additional credit.

IBGS 537B. Special Topics in Biomedical Sciences. 1-4 Units.
Current topics in biomedical sciences. Specific content varies from quarter to quarter. May be repeated for additional credit.

IBGS 537C. Special Topics in Biomedical Sciences. 1-4 Units.
Current topics in biomedical sciences. Specific content varies from quarter to quarter. May be repeated for additional credit.

IBGS 604. Introduction to Integrative Biology Presentation Seminar. 1 Unit.
Students attend a series of research descriptions presented by graduate students.

IBGS 605. Integrative Biology Presentation Seminar. 1 Unit.
A seminar course that gives graduate students in the basic sciences an opportunity to practice oral presentations on current research or current literature covering the various aspects of regulatory and integrative biology as applied to molecules, cells, tissues, organs, systems, and microbes. Students and faculty participate in a discussion and critical evaluation of the presentation.

IBGS 607. Integrated Biomedical Graduate Studies Seminar. 1 Unit.
Weekly seminars presented by invited speakers in the biomedical sciences disciplines. Students required to register for course every quarter throughout their training.

IBGS 696. Research Rotations. 1 Unit.
Incorporates the research rotations to be completed before assignment to a dissertation or thesis laboratory.
IBGS 698. Thesis. 1-5 Units.
Addresses development of a thesis document, presentation of results, and project defense. May coincide with completion of the degree but does not equate with degree completion.

IBGS 699. Dissertation. 1-5 Units.
Student produces a dissertation document describing the research project and its results, and defends the project from challenges offered by the members of his or her faculty dissertation committee. May coincide with completion of the degree but does not equate with degree completion, which requires submission of the final dissertation to the Faculty of Graduate Studies. Prerequisite: Successful completion of the written comprehensive examination.

International Dentist Program/Clinics (IDPC)

Courses
IDPC 815. Clinical Orientation I - IDP. 2 Units.
Introduces the electronic patient record, reviews radiology safety, discusses professional liability, and introduces clinical regulatory compliance in dentistry. Introduces partner activities involving data gathering, radiology, periodontics, and photography.

IDPC 816. Clinical Orientation II - IDP. 1 Unit.
Builds on IDPC 815. Continues instruction related to the electronic patient record; discusses patient-management techniques, treatment planning, and practice-management issues; discusses clinic policies and infection control. Discusses financial planning for patients, as well as quality assurance and improvement. Continues partner activities, interpretation of data, and case presentation—including periodontal diagnoses.

IDPC 817. Clinical Orientation III - IDP. 1 Unit.
Builds on IDPC 815 and IDPC 816. Continues instruction related to the electronic patient record, bridging the transition from preclinical to clinical experience. Discusses long-term assessment of care outcomes and professional relationships. Continues partner activities.

IDPC 825. General Clinics. 15 Units.
Includes direct patient care through rotations in urgent care, pediatric, service learning, and screening blocks. Requires registrations Autumn and Winter quarters of the IDP3 year to fulfill the total units.

IDPC 826. General Clinics. 6 Units.
Provides direct patient care experience in urgent care, pediatric, service learning, and screening settings.

IDPC 827. General Clinics. 13 Units.
Provides direct patient care experience in urgent care, pediatrics, service learning, and screening settings.

IDPC 835. General Clinics. 19 Units.
Includes direct patient care through rotations in urgent care, pediatric, service learning, and screening blocks.

IDPC 836. General Clinics. 16 Units.
Provides direct patient care experience in urgent care, pediatric, service learning, and screening settings.

IDPC 845. General Clinics - Direct Patient Care. 18 Units.
Includes direct patient care.

IDPC 846. General Clinics. 16 Units.
Provides direct patient care experience in urgent care, pediatric, service learning, and screening settings.

International Dentist Program/General (IDPG)

Courses
IDPG 718. Communication Basics for the International Student. 1 Unit.
Student develops interpersonal competencies in the various professional communication roles expected of a dentist. Topics include team building, cross-cultural communication, dental fears and phobias, mental illness, and behavior change.

IDPG 845. Evidence-Based Dentistry. 2 Units.
Scientific methods in dental research. Includes critical evaluation of published articles, research design, statistical analysis, evaluation of results, design of research reports, extensive reviews of various topics.

International Dentist Program/Oral Pathology (IDPO)

Courses
IDPO 534. Oral Medicine: Orofacial Pain and TMD. 2 Units.
Differential diagnosis of orofacial and temporomandibular joint pain, including basic guidelines for initial therapy. Utilizes TMD patient cases for group and class discussions. Introduces diagnosis and treatment of neuropathic pain and headaches. Case presentations focus on nonodontogenic pain that presents as toothache and/or gingival pain. Offered Winter Quarter of odd-numbered years for IDP3 and IDP4 students.

IDPO 535. Oral Pathology and Diagnosis. 3 Units.
Graduate-level survey of pathology. Studies developmental, infectious, immunologic, neoplastic, and metabolic disorders of the head and neck. Includes epidemiology, etiology, clinical and/or radiographic features, microscopic features, and management of disease. Emphasizes differential diagnosis and management of dental lesions.

IDPO 720. Oral and Maxillofacial Radiology for the IDP Program. 2 Units.
Emphasizes the integral role played by the radiographic examination in the diagnostic process in dentistry, in conjunction with the clinical examination. Reinforces the basic principles of oral and maxillofacial radiology.

IDPO 725. Patient Assessment and Data Management II. 2 Units.
Builds on IDPO 723 by continuing physical evaluation, data collection, and the problem-oriented dental record. Supervised clinical experience with fellow students as "patients." Student develops a treatment plan and presents it to the patient. Continued computer-based treatment plan management.

IDPO 726. Patient Diagnosis and Treatment Planning. 2 Units.
Discusses treatment options in treatment planning, with case-based treatment planning exercises. Introduces computer-based treatment plan management.

IDPO 826. Oral and Maxillofacial Surgery. 2 Units.
Reviews oral and maxillofacial surgery—including medical history pharmacology, instrumentation, procedures, dental emergencies, and complications. Includes a laboratory component.
IDPO 827. Oral and Maxillofacial Surgery. 2 Units.

International Dentist Program/Periodontics and Pediatric Dentistry (IDPP)

Courses
IDPP 754. Fundamentals of Periodontics. 2 Units.
Overview of clinical periodontics—including etiology of periodontal disease, oral hygiene instruction, scaling, root planing, antimicrobial therapy, and a variety of surgical concepts and techniques. Anticipated results of therapy, including options of surgical versus nonsurgical approaches. Includes a laboratory component.

IDPP 755. Pediatric Dentistry Clinic—IDP. 1 Unit.
Dental care of children in their primary, fixed, and young permanent dentition. Etiology of disease, prevention of oral disease, growth-and-development analysis, treatment planning, restorative procedures, and arch length control.

IDPP 756. Pediatric Dentistry. 2 Units.

IDPP 756L. Pediatric Dentistry Laboratory. 1 Unit.
Technique course that accompanies IDPP 756. Student performs operative procedures for amalgam and composite resin on simulated primary and young permanent teeth. Student performs pulpotomies on primary molar teeth and prepares primary teeth for stainless steel, open-faced stainless steel, and resin crowns. Fabricates unilateral and bilateral space maintainers.

IDPP 759. Periodontal Therapy. 2 Units.
Reviews the basic principles and techniques used in cavity preparation and restoration of teeth with silver alloy. Lecture and laboratory course.

IDPR 701. Operative Dentistry I. 2 Units.
Reviews basic principles and techniques used in cavity preparation and restoration of teeth with silver alloy. Lecture and laboratory course.

IDPR 702. Operative Dentistry II. 2 Units.
Extends basic principles and techniques of cavity preparation and restoration of teeth with aesthetic restorative materials. Studies the source, use, and manipulation of dental materials and their physical properties relative to dentistry. Lecture and laboratory course.

IDPR 704. Introduction to Occlusion. 2 Units.
Studies the temporomandibular joint, muscles of mastication, and the teeth in static and dynamic positions.

IDPR 750. Dental Materials. 2 Units.
Reviews current dental materials, with evidence-based dentistry.

IDPR 761. Removable Prosthodontics I. 2 Units.
Reviews the basic clinical and laboratory removable prosthodontic procedures involved in the fabrication of removable prosthesis. Includes a laboratory component.

IDPR 762. Removable Prosthodontics II. 2 Units.
Reviews the laboratory phases of diagnosing, planning treatment for CD, immediate CD, and relines. Includes a laboratory component.

IDPR 763. Removable Prosthodontics III. 2 Units.
Biomechanics of removable partial dentures and their design and fabrication. Diagnosis and treatment planning for removable partial dentures. Clinical and laboratory procedures and sequencing of treatment for removable partial and complete dentures. Lecture and laboratory course.

IDPR 771. Fixed Prosthodontics I. 2 Units.
Reviews basic tooth preparation for single-casting restorations, tissue management, impression techniques, and temporary restorations. Lecture and laboratory course.

IDPR 772. Fixed Prosthodontics II. 2 Units.
Reviews the basic design and fabrication of multiple unit fixed partial denture, tissue management, impression techniques, and temporary restorations—including single units and fixed partial dentures. Lecture and laboratory course.

IDPR 854. Implant Dentistry for the IDP Student. 3 Units.
Scientific and technical foundation for implant surgery and expansion of basic implant procedures. Postplacement care, long-term maintenance, and clinical complications associated with dental implants. Emphasizes restoration of single implants, multiple quadrant posterior implants, and over-denture implants. Lecture and laboratory course.

Marital and Family Therapy (MFTH)

Courses
MFTH 501. Fundamentals of Supervision in Marital and Family Therapy. 3 Units.
Research and theory regarding the supervision of marriage and family therapy trainees and interns. Can be used toward the requirements for certification as an AAMFT-approved supervisor.

MFTH 502. Advanced Supervision in Marital and Family Therapy. 1 Unit.
Mentoring of supervision of MFT trainees and interns in a clinical setting. Hours earned apply toward certification as an AAMFT-approved supervisor. Must complete 30 hours of supervision and 5 hours of supervision mentoring. Prerequisite or Corequisite: MFTH 501.
MFTH 504. Advanced Theory in Marital and Family Therapy. 4 Units.
Provides a metaperspective for analysis and development of systemic-relational theories guiding marital and family therapy practice. Conceptualization and deconstruction of philosophical, religious, political, sociological, and ecosystemic notions. Preparation to critique and develop MFT theory with an emphasis on ethical and social-contextual aspects of case conceptualization and implications for recovery-based practice.

MFTH 505. Advanced Family Studies. 4 Units.
A critical survey of the research and theory growing out of the fields of human development and family studies. Provides students with a background on the social and historical factors that form the context in which families are defined and function. Students apply course material to the practice of family life education and family therapy.

MFTH 506. Foundations of Systems Thinking: Theory and Neuroscience. 3 Units.
Connects philosophical underpinnings of foundational systemic and relational theories to current social neuroscience research with implications and applications for relational practice. Examines the theory and neuroscience of interplay among biological systems, social processes, relational dynamics and behavior; with a particular emphasis on recursive epistemology, the construction of relational experiences, emotions, attachment, and trauma.

Applies postmodern theories and clinical applications to family therapy. Focuses on social constructionist thinking and solution-focused therapy that reflects a paradigm shift from a problem-centered approach to one of resilience. Facilitates personal empowerment in the face of societal inequities and pathologizing discourses. Includes the collaborative language systems approach. Prerequisite: Admission to a CFS doctoral program or MFAM 564.

MFTH 508. Clinical 3—Larger and Multiple Systems in MFT Practice. 3 Units.
Examines a multisystemic framework that includes biological, interpersonal, family, community, school, and organizational systems. Emphasizes the influence of contextual issues—such as gender, race, class, sexual orientation, and ethnicity—on emotion, behavior, and relationship patterns related to mental health and family issues in couples and family therapy practice.

MFTH 509. Clinical Issues. 3 Units.
Special topics related to systems/reational practice in marital and family therapy.

MFTH 519. Teaching in Higher Education. 2 Units.
Discusses theory, techniques, and processes in the teaching of MFT, including an examination of didactic and experiential techniques.

MFTH 520. Practicum in Teaching. 3 Units.
Provides the bridge between state-of-the-art pedagogical skills and the practical application of those skills in teaching in the classroom and other community settings. With a focus on teaching, students engage in curriculum planning, testing, course delivery in family science, and development of teaching and self-evaluation skills toward continuous quality improvement in the art and science of teaching.

MFTH 521. E-Learning: Construction and Design. 2 Units.
Responding to movement of universities toward technology-based instruction, prepares doctoral students to design and construct online and distance education curricula. Emphasizes utilization of Blackboard and Desire2Learn applications. Students create online course modules for undergraduate or master’s-level instruction in a family or counseling-related field of study. Prerequisite: Prior teaching or teaching assistance experience. MFTH 519 recommended.

MFTH 522. E-Learning: Delivery and Management. 2 Units.
Emphasizes mastery of online course development and delivery of virtual class communities in higher education. Presents cutting-edge online course instruction; including, Website maintenance, student communications, and grading.

MFTH 524. Marital and Family Therapy Administration: Organizational Structure, Process and Behavior. 3 Units.
Helps students understand how organizations operate and the effect of different contingency factors on the choices managers make. Covers essential theories and concepts for managing in the twenty-first century. Treats behavioral processes with reference to organizational structure and design. Employs larger-systems theory to assist in the development of effective leadership skills.

MFTH 525. Advanced Marital and Family Therapy Assessment and Testing. 3 Units.
Examines testing, diagnosis, and assessment in the practice of marital and family therapy. Emphasizes development of a comprehensive assessment model that integrates traditional models of mental health assessment with cybernetic, developmental, and interactional perspectives. Case material spans individual, couple, and family assessments in clinical and research settings. Students administer instruments and integrate findings into an overall systemic framework.

MFTH 526. Advanced Marital and Family Therapy and Organizational Assessment. 4 Units.
Prepares marriage and family therapy doctoral degree students with skills and knowledge to become competent with methods of relational assessment in clinical and research settings. Emphasizes understanding, evaluation, and utilization of both individual and family-based assessments in organizational settings. Students assess the strengths and weakness of instruments in order to determine the best fit for a program, clinical topic, or research project.

MFTH 528. Organizations: Structure, Process, and Behavior. 3 Units.
Helps students understand how organizations operate and how different contingency factors can affect the choices managers make. Covers essential theories and concepts for managing in the twenty-first century. Treats behavioral processes with reference to organizational structure and design. Larger-systems theory and leadership skills.

MFTH 534. Family Therapy and Medicine. 3 Units.
Examines the interface of medical practice and family therapy in common medical family therapy settings. Explores the culture of medicine, including usual medical practices and procedures. Outlines adaptations of the medical model used by family therapists. Offers models for collaboration of medical family therapists with medical practitioners. Addresses behavioral health intervention strategies for families with health and wellness issues.

MFTH 539. Health and Illness in Families. 4 Units.
Examines the biopsychosocial-spiritual aspects of illness and their impact on individuals, couples, and family systems across the lifespan. Students locate, interpret, and critique the scholarly literature used to study illness as it pertains to families. Highlights major issues, trends, theories, and models in health care; and their implications.
MFTH 540. Medical Family Therapy. 3 Units.
Provides an overview of medical family therapy and the theoretical models that can be applied to clinical work within medical settings. Addresses contextual issues that impact health of patients and family members. Includes personal and professional aspects of providing ethical, holistic, and collaborative clinical care in medical settings.

MFTH 541. Medical Family Therapy Seminar 1. 1 Unit.
In a workshop format incorporating presentation and discussion with faculty and peers, students develop their expertise in researching specific issues relevant to their practice. Focuses on evidence-based interventions and relevant psychotropic medications. Prerequisite or Concurrent: MFTH 540.

MFTH 542. Medical Family Therapy Seminar 2. 1 Unit.
In a workshop format that incorporates presentation and discussion with faculty and peers, students develop their understanding of the impact of spiritual practices on health, illness, grief, and loss. Focuses on culturally sensitive interventions.

MFTH 543. Medical Family Therapy Seminar 3. 1 Unit.
In a workshop format that incorporates presentation and discussion with faculty and peers, students enhance their professional development. Students learn to market their services to physicians and those in the health-care field, to network professionally, and to prepare for a job search.

MFTH 545. Research and Practice with Couples and Families. 3 Units.
A scholarly and critical review of the literature in family social science, with application of this literature to the practice of family life education and/or marital and family therapy. Students interact with the material to critically challenge historical approaches and develop new insights and understandings that would shape present and future practice of interventionists that work with families.

MFTH 546. Advances in Family Sciences. 3 Units.
Focuses on current issues, trends, and approaches in the field of family social science; and interacts with newer advances in the field resulting from changes in practice, sociocultural, political, and technological arenas. Presents professional practice as an evolving process for practitioners in the twenty-first century.

MFTH 547. Organizational Development and Change. 3 Units.
Helps students understand the application of behavioral and family science knowledge to improve organization performance and organization functioning. Discusses the process of planned change and the change process. Includes interpersonal and group processes such as T-groups, process consultations, and team building. Addresses conflict resolutions, organizational lifespan, leadership skills, and critical-incident stress debriefing.

MFTH 556. Management Consulting and Professional Relations. 3 Units.
Capstone course for the system consultation and professional relations concentration in the doctoral programs in the Department of Counseling and Family Sciences. Students integrate theories, knowledge, and skills from MFTH 528, 555, and 557. Assists students to apply expertise in organizational assessment, behavior, and change to practical and real life.

MFTH 557. Organizational Assessment. 3 Units.
How to make an assessment of an organizational system. Addresses data collection and analysis, outcome evaluation, and how to present assessment in a systemic manner.

MFTH 554. Social Context of Health. 3 Units.
Explores ways inequalities in health and illness are patterned by social context. Provides an overview of the mental and physical health-care system in the United States. Focuses on social contextual and structural factors that affect individual and family health and resilience which give rise to disparities in access and treatment within the health-care system.

MFTH 601. Statistics I. 4 Units.
First in a series of three statistics courses. Focuses on basic, foundational behavioral statistics. Includes causality, levels of statistical measurement, frequencies distribution, measures of central tendency, dispersion, probability theory, normal distribution, and ANOVA.

MFTH 602. Statistics II. 4 Units.
Second in a series of three statistics courses. Focus on multivariate techniques. Includes ANOVA, ANCOVA, MANOVA, MANCOVA, formulation and computation of multiple regression models using scalar and matrix algebra, multivariate analysis of variance, regression diagnostics and solutions, regression with categorical dependent variables.

MFTH 603. Statistics III. 4 Units.
Third in a series of three statistics courses. Includes nonlinear regression models, logistic regression, discriminant analysis, path analysis, factor analysis, and structural modeling; and, social network analysis and multilevel modeling. Prerequisite: MFTH 602.

MFTH 604. Advanced Qualitative Methods. 4 Units.
Preparation to conduct and evaluate qualitative research in marital and family therapy and family studies. Introduction to a social constructionist critique of research which includes considering questions such as the researcher’s role and relationship to the research process, objectivity, reflexivity, credibility, and the construction of knowledge. Examination of qualitative methodologies including grounded theory.

MFTH 605. Advanced Quantitative Methods. 4 Units.
Focuses on survey research design and data analysis. Includes research idea development, relational hypotheses formation, survey planning and management, questionnaire and item design, sampling, systemic clinical data measurement, logic of analysis, and problems of statistical interpretation and threats to internal and external validity.

MFTH 606. Issues in MFT Research. 4 Units.
Addresses current issues in marriage and family therapy (MFT) research as a basis for on-going inquiry and program development in the field. Emphasizes research history, trends in the field, and evidence-based approaches to recovery. Focuses on the process of designing, implementing, and disseminating research to support the field of MFT.

MFTH 607. Scholarly Skills. 1 Unit.
Orientation to bibliographic search engines and databases for writing critical literature reviews. Emphasizes search terms, development of a bibliographic database, and organization of a scholarly review.

MFTH 608. Analysis and Presentation Issues in Research. 3 Units.
Third of three research courses. Identifies issues such as specifying research questions/problems, using relevant literature, selecting and using appropriate analytical tools, summarizing empirical results, and presenting results for proposals in a variety of settings. Focuses on quantitative approaches, meta-analyses, and mixed methods approaches.
MFTH 624. Program Development for Families and Communities. 3 Units.
Examines core components of systemic/relation programs designed to address mental health problems within the context of families and larger systems. Explains the elements of systemic programming that address clinical treatment problems/populations, as well as prevention and intervention issues affecting schools, neighborhoods, and other communities. Using the systemic/relation paradigm of the field, students create programs reflecting their areas of interest.

MFTH 625. Grant Writing. 3 Units.
Study and practice in locating, developing, and responding to great grant opportunities of interest to marriage and family therapists and the mental health populations they serve. Students develop their own systemic/relation program, training, research, or dissertation grant ideas; locate potential funding sources; tailor applications and proposals to each funding source; and critique and refine proposals to meet professional and grantor standards.

MFTH 626. Program Evaluation and Monitoring. 3 Units.
Addresses formative and summative evaluations using quantitative, qualitative, and mixed method designs. Emphasizes program evaluation and clinical outcomes, and collaboration with stakeholders to ensure evaluation reports meet intended purposes. Includes assessment of program need, theory and adherence, process and performance, outcomes, impact, and efficiency.

MFTH 627. Advanced Program Development and Evaluation. 2 Units.
Participants develop D.M.F.T. degree project proposals through intensive literature review, consultation with organization and community stakeholders, discussion with faculty and peers, and refinement resulting from feedback following formal presentations. The D.M.F.T. degree proposal is the expected outcome from this two-quarter class. For D.M.F.T. degree students only. Prerequisite: MFTH 624, MFTH 625, MFTH 626.

MFTH 634. Practicum in Marital and Family Therapy. 3 Units.
A three-quarter practicum applying systems/relation therapy to relational distress and mental health symptoms. Emphasizes a positive, strengths-based approach to resilience. Section 1: addresses gender, culture, socioeconomic, and political aspects of practice. Section 2: focuses on student’s mode of systemic conceptualization and how to work with in-session process. Section 3: emphasizes religious beliefs and spirituality, and moral and ethical imperatives in relationally-based practice.

MFTH 637. Special Projects in Health and Illness in Families. 1.3 Unit.
Independent study in which students who have taken MFTH 544 participate in research, program development or evaluation, or clinical activities related to the integration of relational health and wellness. Prerequisite or concurrent: MFTH 544.

MFTH 668. Qualitative Research Practicum. 3 Units.
Gives students the opportunity to continue developing the skills needed to conduct and report the qualitative research begun in MFTH 604. Students expected to engage in a research project, with particular emphasis on analysis and manuscript preparation.

MFTH 694. Doctoral Seminar. 1 Unit.
Ph.D. degree students develop and refine their dissertation proposals in a workshop format through presentation and discussion with faculty and other students.

MFTH 695. Project Research. 1-12 Units.
Required research associated with the capstone project for the D.M.F.T. degree.

MFTH 697. Research. 1-6 Units.
Independent research relating to marital and family therapy or family studies under the direction of a faculty advisor.

MFTH 698. Dissertation Research. 1-10 Units.
Completes independent research contributing to the field of marital and family therapy.

MFTH 785. Professional Clinical Training in MFT. 1.5,3 Unit.
Supervised experience in the practice of marital and family therapy. Hours represent face-to-face direct client contact. May be repeated.

MFTH 785A. Begin Clinical Training in Couple, Marital, and Family Therapy. 0 Units.
Enables students to consult with clinical director to set up and begin supervised clinical practice in the field of couple, marital, and family therapy. Acceptance into a CFS doctoral program.

MFTH 785B. Clinical Training in Couple, Marital, and Family Therapy. 4 Units.
Provides direct client contact in the practice of couple, marital, and family therapy and documents completion of a minimum of 200 hours of direct client contact. Meets AAMFT-approved standards and applies toward 40 hours of clinical experience. May cover up to five quarters and be repeated five times.

MFTH 786. Professional Development Proposal. 0 Units.
Must be registered for at least one quarter prior to eligibility for 786A. The student’s professional development plan must be formulated and approved by the faculty during this course.

MFTH 786A. Professional Development in Marital and Family Therapy. 1.5-12 Units.
Doctoral-level experience in marital and family therapy under the supervision of a senior-level family therapist/mentor. Must be arranged in advance in the department. A total of 36 units required for graduation. Prerequisite: MFTH 786.

MFTH 786B. Professional Internship in Marital and Family Therapy—Clinical. 2.4 Units.
Supervised client contact (face-to-face hours only) in the practice of marital and family therapy.

Marriage and Family (MFAM)

Courses

MFAM 501. Research Tools and Methodology: Quantitative. 3 Units.
Current social research methods, practice in the use of techniques, consideration of the philosophy of the scientific method, and familiarization with MFAM test instruments. Cross-listing: COUN 501.

MFAM 502. Research Tools and Methodology: Qualitative. 3 Units.
Qualitative methodology. Prepares students to undertake research projects using the intensive interview method of qualitative research. Explores practical and epistemological issues and problems in qualitative research in a workshop format. Cross-listing: COUN 502.

MFAM 515. Crisis Intervention and Client Advocacy. 3 Units.
MFAM 516. Play Therapy. 2 Units.
Experiential course that teaches practitioners and graduate students to apply play therapy techniques in dealing with childhood problems such as molestation, physical abuse, depression, trauma, and family conflict.

MFAM 524. Psychopharmacology and Medical Issues. 3 Units.
Introduces common physical and medical issues related to the practice of marriage and family therapy. Students learn a biopsychosocial-spiritual model to assess and intervene—with emphasis given to psychopharmacology, neuroanatomy, the mind-body relationship, and research relative to the field of medical family therapy.

MFAM 528. Culture, Socioeconomic Status in Therapy. 3 Units.
Addresses current information and historical narratives related to cultural diversity that impact belief systems, communication patterns, roles, and expectations within human relationships and systems. Examines SES and a wide range of social, racial, and ethnic factors that create meanings for individuals, couples, families, and mental health counselors. Emphasizes populations that become professional partners or clients served within this geographic region. Cross-listing: COUN 528.

MFAM 535. Case Presentation and Professional Studies. 3 Units.
Introduction to mental health recovery-oriented care. Exploration of personal biases toward various cultures/ethnicities, and how poverty and social stress impact consumers. Reviews ethics developed by the Board of Behavioral Science, the American Counseling Association, and the American Association of Marriage and Family Therapists. Examines spirituality and client-centered advocacy as important processes. Explores the interface between MFTs, counselors, and other professionals.

MFAM 536. Case Presentation and Documentation. 3 Units.
Through observation of live cases, trains student in applied psychotherapeutic techniques, assessment, diagnosis, prognosis, and treatment of premarital, couple, family, aging population, the severely mentally ill, and child relationships. Examines dysfunctional and functional aspects, including recovery process, health promotion, evaluation from a systems perspective, documentation, and illness prevention.

MFAM 537. Case Presentation. 3 Units.
The third of six quarters of training work that the student will be expected to complete during the course of his/her on-campus practicum experience. Focuses on the development of a theoretical orientation as a way to develop, critique, and refine the personal and theoretical perspectives of the therapist. A clinically oriented seminar in which students are asked to prepare brief and focused presentations of individual, marital, or family cases.

MFAM 538. Theory and Practice of Conflict Resolution. 2 Units.
Overviews the field of conflict management and resolution. Basic theories and methodologies in the field, with opportunity to develop basic clinical mediation skills.

MFAM 539. Solution-Focused Family Therapy. 2 Units.
Provides an in-depth understanding of solution-focused family therapy and practice. Focuses on the work of de Shazer and Berg, along with the foundational constructs of MRI.

MFAM 545. Gender Perspectives. 2 Units.
Explores the identities, roles, and relationships of women and men in light of social, cultural, and historical perspectives. Explores implications for behavioral health professionals who work with families.

MFAM 547. Social Ecology of Individual and Family Development. 3 Units.
Studies human individual development and its relationship to the family life cycle from birth through aging and death of family members. Discusses biological, psychological, social, and spiritual development in the context of family dynamics involving traditional two-parent families, alternative partnerships, single parents, blended families, and intergenerational communities. Cross-listing: COUN 547.

MFAM 549. Christian Counseling and Family Therapy. 2 Units.
Integrates Christian concepts and family therapy in a conceptual and clinical context.

MFAM 551. Family Therapy: Foundational Theories and Practice. 3 Units.
Provides an overview of the major theories in marriage and family therapy. Explores systemic theory concepts in light of the major models of family therapy. Examines students to the recovery process and consumer advocacy. Examines evidence-based models—such as cognitive behavioral, multidimensional family therapy (MDFT), and emotional-focused therapy. Through MDFT, exposes students to the treatment of addicted adolescents and their families.

MFAM 552. Couples Therapy: Theory and Practice. 3 Units.
Overview of the couples/marital therapy literature—including divorce, child rearing, parenting, step parenting, and blended families. Evidence-based practices studied relevant to consumer treatment and recovery. Examines how culture, SES, poverty, social, stress, and addiction affect clinical practice.

MFAM 553. Family Systems Theory. 3 Units.
Reviews Bowen theory of family systems. Introduction to family psychotherapy as an outgrowth of the theory. Students examine their own families of origin.

MFAM 555. Narrative Family Therapy. 2 Units.
Narrative therapy and social construction as important developments in social theory and in clinical practice. Uses narratives and the role they play in a person’s life through language and meaning systems. Examines issues of power, collaboration, culture, community, and re-authoring narratives, particularly in the works of Michael White and David Epston.

MFAM 556. Psychopathology and Diagnostic Procedures. 3 Units.
Explores the history and development of psychopathology and how it relates to current clinical practice in general and marriage and family therapy in particular. Utilizes the multiaxial classifications of the DSM-IV as a practical basis for diagnostics. Prerequisite: A course in abnormal psychology. Cross-listing: COUN 556.

MFAM 559. Cognitive-Behavioral Couples Therapy. 2,3 Units.
Experiential course that surveys major cognitive-behavioral family therapy therapists, and integrates treatment techniques into practice in laboratory.

MFAM 564. Family Therapy: Advanced Foundational Theories and Practice. 3 Units.
Comprehensively surveys more recent therapy models, such as narrative, collaborative language systems, and solution-focused theory. Using these models, student learns to assess and consider diagnosis; as well learn the role of language, meaning, and process in relationships. Class examines the theoretical strengths and limitations of these models in relation to culturally diverse populations.
MFAM 567. Treating the Severely and Persistently Mentally Ill and the Recovery Process. 3 Units.
Addresses identification, treatment, and referral procedures for severely mentally ill consumers in diverse populations. Focuses on the recovery process and on evidence-based or agreed-upon approaches during treatment. Includes etiology, diagnosis, treatment planning, and prevention of mental and emotional disorders, and dysfunctional behavior.

MFAM 568. Groups: Process and Practice. 3 Units.
Surveys major theoretical approaches, including individual theories, marital groups, network, and family therapy groups. Group laboratory experience provided wherein students apply theory to practice and develop group leadership skills. Cross-listing: COUN 568.

MFAM 584. Advanced Child and Adolescent Development. 3 Units.
Psychodynamics involved in child and adolescent problems with respect to the family relationship. Demonstrates a variety of counseling approaches to the treatment of children and adolescents, with emphasis on diverse settings (e.g., education, hospital, and agency). Cross-listing: COUN 584.

MFAM 604. Social Context in Clinical Practice: Gender, Class, and Race. 3 Units.
Introduces social inequalities that result in unfairness, health disparities, assaults to personal dignity, and family stress. Focuses on how one’s position within social hierarchies—such as gender, socioeconomic status, race, and sexual orientation—affects psychological and relational health. Examination of how family therapists and counselors address these social contextual factors as part of a recovery-based approach that empowers people within their relationships and social systems. Cross-listing: COUN 604.

MFAM 605. Gestalt Family Therapy. 2 Units.
Principles of Gestalt psychology and therapy; the relationship between the individual and the physical, emotional, societal, and spiritual environment. Group experience that permits the spiritual and affective aspects of Gestalt therapy to be expressed and integrated with systems theory.

MFAM 606. Emotionally Focused Couples Therapy. 2 Units.
Students examine the theory of emotionally focused therapy and concentrate on the work and research of Susan Johnson.

MFAM 614. Law and Ethics. 3 Units.
Examines child welfare, separation, and divorce law, and financial aspects of family maintenance. Includes case management, referrals, professional and client interactions, ethical and interprofessional relations, legal responsibilities, and confidentially. Explores interactions among the practitioner’s sense of self and human values, professional behavior, scope of practice, and ethics. Examination of impacts of culture, SES, poverty, social stress, and biology on the recovery process.

MFAM 624. Individual and Systems Assessment. 3 Units.
Applies psychological testing methods in the diagnostic assessment of individual, family, and group behavioral dynamics as encountered in marriage and family counseling. Observations and/or laboratory experience. Cross-listing: COUN 624.

MFAM 635. Case Presentation and Legal Issues. 3 Units.
A clinically oriented course in which students prepare brief and focused oral and/or video presentations of individual, marital, or family cases with which they are currently working at their clinical placements that demonstrate an understanding of systems theory; as well as of legal, ethical, cultural, SES, spiritual, and developmental issues. Students discuss how cases support consumer advocacy.

MFAM 636. Case Presentation and Client-Centered Advocacy. 3 Units.
Examines the recovery process in relation to case write-ups. Ongoing individual, marital, and family cases formally presented by trainees discussing how consumer advocacy is supported; as well as collaboration with other mental health practitioners. Requires an in-depth case write-up on a couple or family that demonstrates an understanding of legal, ethical, cultural, SES, spiritual, client-centered advocacy, recovery model, disability act and services, and developmental issues.

MFAM 637. Case Presentation and Global Practices. 3 Units.
Students receive case supervision and prepare for a final oral comprehensive examination that requires four videotaped segments of the case over a minimum of six sessions or six hours, depending upon the clinic site; a write-up of the case; an epistemology paper; and a vignette.

MFAM 638. Family Therapy and Chemical Abuse. 3 Units.
Examines current theories of etiology of substance use disorders and the effects of psychoactive drug use. Emphasizes assessment and evaluation strategies; impact on mental, biological, relational, and community systems; evidence-based prevention and treatment approaches within a recovery process orientation. Explores issues of regional multicultural competence, human diversity, and access to care. Cross-listing: COUN 638.

MFAM 644. Child Abuse and Family Violence. 3 Units.
Examines characteristics of physical and emotional abuse, neglect, sexual molestation, and family violence including offender and nonoffender traits. Focus on treatment including individual, group, and family therapy. Ethical and legal issues, community resources, and multidisciplinary approaches to child abuse. Examines cultural, SES, poverty, and/or social stress impacts on mental health and recovery. Cross-listing: COUN 644.

MFAM 645. Advanced Substance Abuse-Treatment Strategies. 3 Units.
Presents information about addictions treatment for adults, adolescents, families, groups, and those with multiple diagnoses. Prerequisite: MFAM 638.

MFAM 654. Practicum in Drug and Alcohol Counseling. 1 Unit.
Practicum course in which students discuss with individuals and families and apply current theories and strategies for treating substance use disorders. Explores issues of multicultural competence, human diversity, and access to care. Prerequisite: Acceptance into the Drug and Alcohol Counseling certificate.

MFAM 665. Structural and Multidimensional Family Therapy. 2 Units.
Enhances observational, conceptual, planning, and intervention skills. Increases ability to understand verbal and nonverbal communication and evidence-based family therapies. Broadens understanding of structural and multidimensional family therapy.

MFAM 674. Human Sexual Behavior. 3 Units.
Sexuality in contemporary society from the sociopsychological viewpoint. Anatomy and physiology of human sexuality; reproduction, normal and abnormal sexual response, psychosexual development, human fertility, human sexual dysfunction. Integration of systems theory. A minimum of thirty contact hours.

MFAM 694. Directed Study: Marriage and Family. 1-4 Units.
Individual study in areas of special interest concerning the family and its problems. May be repeated for credit at the discretion of the faculty.

MFAM 731. Clinical Training. 6 Units.
For MFT students beginning their clinical training. An IP grade will be assigned until student completes 200 hours at an approved site.
MFAM 732. Clinical Training. 9 Units.
For students who have completed MFAM 731 and are at an approved clinical site. Students register for 9 units and receive an IP grade until 500 hours or five consecutive quarters have been completed.

MFAM 734. Professional Clinical Training. 1.5,3 Unit.
Supervised clinical counseling of individuals, couples, families, and children. At least one hour of individual supervision per week and two hours of case presentation seminar per week. Continuous registration for this portion of the clinical training until completion of at least 500 clock hours.

MFAM 734A. Professional Clinical Training. 1.5-6 Units.
Supervised clinical counseling of individuals, couples, families, and children. At least one hour of individual supervision per week and two hours of case-presentation seminar per week. Continuous registration for this portion of the clinical training until completion of at least 300 clock hours.

MFAM 744. Clinical Internship. 1 Unit.
Supervised clinical counseling of individuals, couples, families, and children. One hour of individual supervision per week. Postgraduates only. Approved by internship coordinator.

Mathematics (MATH)

Courses

MATH 111. College Algebra. 4 Units.
A study of the properties of the real and complex number systems, linear and quadratic equations, factoring, exponents, inequalities and polynomials. Course emphasizes functions (algebraic, exponential and logarithmic). Note: This course does not apply toward a mathematics major or minor. Students will enroll through Loma Linda University for course content and instruction provided online by the Division of Science and Mathematics of Union College in Lincoln, Nebraska. Grades will be filed with and transcripts will be provided by Loma Linda University.

Medical Education Services (MNES)

Courses

MNES 791. Third-year Elective. 3 Units.
Gives students an opportunity to spend time (two weeks) in a specialty that holds particular interest to them, allowing them to develop their skills to a level that will be beneficial in their fourth-year electives.

Medicine—Conjoint (MDCJ)

Courses

MDCJ 508. Cell Structure and Function. 8.5 Units.
A fully integrated, comprehensive course that develops knowledge and skills relating normal microscopic and submicroscopic anatomy to cellular biology, cellular physiology, and immunology. General pathology, the common thread for the course, familiarizes students with morphologic and functional changes affecting cells exposed to a variety of normal and, to a lesser extent, abnormal environments.

MDCJ 509. Introduction to Medical Practice Management. 4 Units.
Introduction to management of a medical practice. Includes: business operations; financial, human resources, information, quality, and risk management; organizational governance; and, patient care systems.

MDCJ 510. Capstone Project. 3 Units.
Surveys literature focusing on a clinical problem addressed in the basic science courses of the first-year medical curriculum. Culminates with a term paper on the researched topic.

MDCJ 519. Foundations of Clinical Medicine. 17 Units.
An integrative course consisting of interactive, patient-centered contextual learning; along with an organ system-based curriculum throughout the first year of medical school—emphasizing development of communication and physical examination skills, professionalism, mind-body interaction, pain management, end-of-life care, child and elder abuse, domestic violence, and sexuality. Introduces human development across the life cycle.

MDCJ 520. Basis of Medical Genetics. 2 Units.
First of two courses providing foundations in genetics and molecular biology, including mechanisms for genetic information and its flow in eukaryotic cells. Introduction to causes of genetic disorders and familial disease, and genetic components of common disorders. Preparation for transition to sophomore-year clinical applications and clinical case presentations.

MDCJ 521. Applications of Clinical Genetics. 2 Units.
Second of two courses expanding upon the genetic/molecular basis of human diseases. Preparation for clinical practice and offers tools for lifelong learning.

MDCJ 527. Cell Structure and Function. 8.5 Units.
Describes basic and organ system histology relative to cell biology, immunology, and general pathology, and applies this material to general pathology. Develops skills in use of the microscope, and in diagnostic and clinical problem solving.

MDCJ 528. Evidence-Based Medicine and Information Sciences. 3.5 Units.
Promotes acquisition of the five fundamental skills of evidence-based medicine. Includes: how to ask clinically relevant questions; how to acquire answers to questions commonly asked by physicians; how to critically appraise the medical literature; how to apply results of the medical literature to patients; and how to self-assess progress in the acquisition of the foregoing skills. Begins the process of self-directed, lifelong learning.

MDCJ 530. Pathophysiology and Applied Physical Diagnosis. 11 Units.
Introduction to pathophysiologic principles underlying mechanisms of disease. Applies pathophysiologic principles to a variety of new situations that require problem solving and synthesis in a clinical context. Promotes development of clinical skills and professionalism.

MDCJ 538. Medical Neuroscience. 3.5 Units.
Provides a broad-based foundation in neuroscience. Addresses basic normal neuroanatomy and neurophysiology of the human central and peripheral nervous systems. Employs neurologic examination to evaluate central and peripheral nervous systems. Presents how to accurately localize lesions of the central and peripheral nervous systems and use technologies that can diagnose neurologic conditions.

MDCJ 539. Diseases of Neuroscience. 4 Units.
Applies tools derived from the basic building blocks of neuroanatomy and neurophysiology to the clinical neurologic examination of patients with a broad array of neurologic diseases or conditions.

MDCJ 560. Basis of Medical Genetics. 2 Units.
Lays basic foundations in genetics and molecular biology, including mechanisms for genetic information and its flow in eukaryotic cells. Introduction to causes of genetic disorders and familial disease, and genetic components of common disorders.
MDCJ 599. Medicine Conjoint Directed Study. 1-18 Units.
Individual arrangements for students to study under the guidance of a program faculty member. May include reading, literature review, lectures or other special projects. Minimum of thirty hours required for each unit of credit. Does not fulfill requirements towards the M.D. degree.

MDCJ 821. Preventive Medicine and Population Health. 1.5-6 Units.
Introduces clinical preventive medicine, quality improvement and patient safety, motivational interviewing, and care of the underserved in clinic and public health settings. Orientation to allied health professions, and complementary and alternative medicine.

MDCJ 891. Whole Person Care. 1.5-30 Units.
Offers fourth-year medical students the opportunity to explore various aspects of whole person care, film and medicine, law and medicine, tropical medicine, and patient safety.

**Medicine (MEDN)**

**Courses**

MEDN 599. Medicine Directed Study. 1.5-18 Units.

MEDN 701. Medicine Clerkship. 1.5-15 Units.
A third-year internal medicine course that provides the knowledge and develops in students the skills and attitudes necessary to care for the adult patient. Utilizes bedside teaching, lecture, and independent learning to achieve the stated goals. One outpatient and two inpatient rotations allow students to experience different patient conditions and populations while exposing them to both acute and chronic medical illnesses.

MEDN 821. Medicine Subinternship. 1.5-6 Units.
Builds upon and expands the core knowledge established during the third-year clerkship. Student assumes more responsibility in patient care and, functioning essentially as the intern on the case, works closely with the senior resident and attending physician to provide optimal care that is evidence-based, cost efficient, and effective.

MEDN 822. Medicine Intensive Care. 1.5-6 Units.
A four-week service on a medical intensive care unit where students are expected to learn the foundations of care in the ICU. Students participate actively in the care of patients admitted to the ICU—integrating and applying their knowledge as they follow patients on a daily basis. Prerequisite: MEDN 701.

MEDN 891. Medicine Elective. 1.5-27 Units.
Provides an opportunity for students to explore various areas of internal medicine, such as cardiology, nephrology, gastroenterology, etc.

**Maternal Newborn Child Health (MNCH)**

**Courses**

MNCH 520. Maternal/Child Health: Policy and Programs. 3 Units.
Examines national and global public health programs, problems, and policies—targeting infants, children, and childbearing women. Explores issues such as poverty, access to and utilization of health care, adolescence, disabilities, family planning, HIV, and AIDS within socioeconomic, political, and ethical frameworks. Emphasizes interdisciplinary delivery of services within a public health setting to improve the well-being of mothers, infants, and children.

MNCH 567. Reproductive Health. 3 Units.
Using the life-cycle approach, focuses on reproductive health as a human right for both men and women. Examines public health policy; programs; and, to some degree, clinical interventions at various points of the reproductive life cycle. Explores issues that affect health and fertility, including family-planning technologies; reproductive tract infections, including HIV; and the impact of violence on reproductive health. Draws on reproductive health programs.

MNCH 614. Seminar in Maternal and Child Health Practice. 3 Units.
Examines a variety of maternal, newborn, and child health topic areas addressing a wide range of health behaviors, environmental factors/conditions, health systems, and determinants of health that affect the health, wellness, and overall quality of life for these populations and their families. Analysis of issues—through input from experts, discussion, and student participation—of trends and current practices affecting maternal, newborn, and child health.

**Microbiology (MICR)**

**Courses**

MICR 515. Introduction to Bioinformatics and Genomics. 2 Units.
Introduces computer-aided analysis of macromolecules and the study of genes and their products on the level of whole genomes.

MICR 521. Medical Microbiology. 6 Units.
Systematically studies bacteria, fungi, viruses, and animal parasites of medical importance; pathogenic mechanisms; methods of identification and prevention; and clinical correlation.

MICR 530. Immunology. 4 Units.
Introduces selected topics of modern immunology to graduate students, emphasizing understanding key paradigms.

MICR 537. Selected Topics in Molecular Biology. 1-3 Units.
Critically evaluates current progress in a specific research area of molecular biology, including recently published papers and unpublished manuscripts. May be repeated for additional credit.

MICR 540. Physiology and Molecular Genetics of Microbes. 3 Units.
Advanced graduate course covering various hot topics in both microbial physiology and molecular genetics—such as diversity of microbes on earth, engineering new metabolic pathways, mechanisms of gene regulation and gene transfer, and comparative genomics.

MICR 547. Medical Microbiology. 4.5 Units.
Covers basic biology of medically important microbial pathogens and mechanisms of their disease pathologies in the context of organ systems. Addresses pathologic mechanisms, signs and symptoms of major infectious diseases, developing differential diagnoses, and treatment and prevention of these diseases.

MICR 570. Mechanisms of Microbial Pathogenesis. 3 Units.
In-depth exploration of molecular mechanisms of pathogenesis and host response for selected bacteria, viruses, and parasites. Topics include endotoxins, exotoxins, tools to identify genes crucial to virulence, and a discussion of selected paradigms of microbe-host interaction. Vaccine development serves as a unifying theme linking the host-pathogen interactions. Focuses on evidence for current concepts, using primary journal articles.

MICR 605. Colloquium. 1 Unit.
Presentations by peers on a topic selected and directed by a faculty member. (All students required to attend the colloquium. Students registered for colloquium are required to give a presentation.).
Microbiology (MICR) Courses

MICR 606. Graduate Seminar. 1 Unit.
Student presentation in the form of a seminar. (Course requirement normally fulfilled by presentation of the dissertation or thesis seminar. Other major student presentations may also qualify.)

MICR 624. Special Problems in Microbiology. 2-4 Units.
Designed primarily for students enrolled in a course work M.S. degree program who elect to work on a research problem.

MICR 625. Independent Study in Microbiology Literature. 2-4 Units.
Explores in depth a specific topic, selected in consultation with the mentor, such as the antecedents for theses or dissertation research. (Formal proposal for the scope and evaluation of the independent study must be approved by the faculty prior to enrollment in this course. Does not satisfy an elective requirement in the microbiology and molecular genetics program.)

MICR 626. Special Topics in Microbiology. 2-4 Units.
Critically evaluates current progress in a specific research area, including recently published papers and unpublished manuscripts. (Each course taught by a resident or a visiting scientist who is a recognized authority in the research area under discussion. Students may register for multiple courses under this designation.)

MICR 697. Research. 1-7 Units.

MICR 698. Thesis. 1-3 Units.

MICR 699. Directed Elective Study. 1.5-12 Units.
Offers fourth-year medical students the opportunity to explore various areas of microbiology, including research.

Natural Sciences (NSCI) Courses

NSCI 286. Topics in Biology. 1-4 Units.
Reviews current knowledge in specified areas of the biological sciences. Registration should indicate the specific topic to be studied. May be repeated for additional credit. Offered on demand.

NSCI 288. Topics in Geology. 1-4 Units.
Reviews current knowledge in specified areas of the earth sciences. Registration should indicate the specific topic to be studied. May be repeated for additional credit. Offered on demand.

Neurology (NEUR) Courses

NEUR 599. Directed Elective Study. 1.5-12 Units.

NEUR 701. Neurology Clerkship. 1.5-6 Units.
Preparation to competently evaluate, document, localize, diagnose, and discuss treatment of adult patients exhibiting neurological symptoms. Addresses neurologic emergencies and chronic outpatient neurologic conditions.

NEUR 891. Neurology Elective. 1.5-27 Units.
Offers fourth-year medical students the opportunity to explore various areas of neurology, including research.

Neurosciences, Systems Biology and BioEngineering (NSBB) Courses

NSBB 500. Foundations in Neuroscience. 4 Units.
Overview of neuroscience with attention to current research and problems in the field. Includes basic neuroanatomy and neurophysiology of the human central and peripheral nervous systems. Prerequisite: Undergraduate-level biology, inorganic chemistry, organic chemistry, and general physics; previous experience with computer programming preferred but not required; a course in statistics preferred but not required.

NSBB 504. Neuroscience Methods. 4 Units.
Provides an in-depth overview of historical and current methods used to perform experiments focused on learning about neural circuits in the body, spinal cord, and brain. Emphasizes understanding of neuron labeling using dyes that can be seen in bright-field and fluorescent microscopy, recording methods for quantifying neuron activity, psychophysical experiments to assess neural function, behavioral assays, optogenetics, and the use of molecular markers. Prerequisite: NSBB 500.

NSBB 506. Fundamentals of Electrophysiology. 4 Units.
Presents fundamental theory and applications of electrophysiological methods in the context of neuroscience and biomedical research. Focuses on electrophysiological concepts and electrophysiological experiments in excitable tissues. Prerequisite: Undergraduate-level biology, inorganic chemistry, and general physics. Calculus preferred, but not required.

NSBB 507. History of Neuroscience. 3 Units.
Provides graduate and medical students with a detailed overview of the history of neuroscience from the classical Greek period through contemporary neuroscience research and clinical neurology/neurosurgery. Emphasizes experiments designed to provide current models of how the brain works. Emphasizes historical changes in treatment and clinical practice that inform current understanding of the nervous system. Prerequisite: Undergraduate-level biology and general chemistry; NSBB 500 recommended.

NSBB 510. Cortical Circuits. 3 Units.
Focuses on the development, function, and dysfunction of the cortex of the brain. Emphasizes understanding of neuronal proliferation, differentiation into circuits, and the resulting interaction of cortical circuits that generate motion and integrate touch, vision, and vestibular inputs to generate conscious perception, the network basis of learning and memory, and cortical oscillations (including cortical rhythmic networks). Prerequisite: NSBB 500.

NSBB 515. Contemporary Neuroimaging. 3 Units.
Provides an in-depth overview of historical and current imaging methods used to perform experiments focused on learning about the structure and function of neurons and the peripheral and central circuits they develop. Emphasizes understanding of neuron labeling using microscopy imaging techniques. Prerequisite: NSBB 500.

NSBB 520. Neuroinflammation: Neuron-Glia Interactions. 3 Units.
Provides graduate students with a current understanding of neuronal-glial interactions in the context of neuroinflammation and its relevance to neurological disorders. Develops competency in the fundamental concepts of cross-communication between disciplinary fields, and how they are applied to diseases of significant social, medical, and economic burden. Prerequisite: NSBB 500; Immunology (recommended).
NSBB 524. Systems Biology Journal Club. 2 Units.
Provides students with the opportunity to survey current research literature in a specialized topic within the domain of systems biology. Prerequisite: MICR 515.

NSBB 525. Bioengineering Journal Club. 2 Units.
Provides students with the opportunity to survey current research literature in a specialized topic within the domain of bioengineering. Prerequisite: NSBB 500, NSBB 571; MICR 515.

NSBB 526. Neurosciences Journal Club. 2 Units.
Provides students with the opportunity to survey current research literature in a specialized topic within the domain of neuroscience. Prerequisite: NSBB 500.

NSBB 551. Systems Biology – A Practical Approach. 2 Units.
Provides a general overview of systems biology approaches that enhance understanding of molecular mechanisms underlying the different phenotypes of living cells. Emphasize the most recent developments and future directions in this new and rapidly developing field, particularly focusing on genomics, epigenomics, and transcriptomics.

NSBB 552. Data Analytics. 3 Units.
Provides a general overview of systems biology approaches that enhance understanding of molecular mechanisms by integrating various types of data. Emphasizes the most recent developments and future directions in this new and rapidly developing field, particularly focusing on genomics, epigenomics, and transcriptomics.

NSBB 553. Advanced Bioinformatics — Sequence and Genome Analysis. 4 Units.
Explores ways in which computational techniques can be applied to help solve problems related to biology and biochemistry. Focuses on sequence and genome analysis with genomics and bioinformatics tools. Prerequisite: NSBB 551.

NSBB 555. Genomics and Bioinformatics: Tools. 4 Units.
Teaches students to create extremely useful programs using PERL to solve biological problems. Focuses on sequence and genome analysis with genomics and bioinformatics tools. Prerequisite: NSBB 551.

NSBB 557. Integration of Computational and Experimental Biology. 4 Units.
A multidisciplinary introduction to computational methods used to analyze experimental biological data. Introduces mathematical concepts needed to understand protein structure and dynamics, protein-protein interactions (structures and networks), gene regulatory networks, signal transduction networks, metabolic networks, and kinetic modeling of cellular processes. Also covers techniques used to derive experimental data. Prerequisite: MICR 515; NSBB 552; and programming experience.

NSBB 571. Engineering Analysis of Physiological Systems. 3 Units.
Provides basic engineering analytical tools for quantifying physiological systems behavior. Addresses several key systems, using engineering methodology to evaluate the system of interest for solving particular problems. Prerequisite: A first course in ordinary differential equations is essential; working knowledge of computer manipulation and programming (recommended).

NSBB 572. Cellular and Molecular Engineering. 3 Units.
Emphasizes engineering and biochemical/biophysical concepts intrinsic to specific topics at the cellular and molecular level. Includes receptor-ligand dynamics in cell signaling and function; DNA replication and RNA processing; cellular energetics and control of gene expression; membrane structure; transport and traffic; biological process; and mechanics of cell division and protein and cellular engineering approaches. Prerequisite: NSBB 570.

NSBB 575. Orthopaedic Regenerative Engineering and Mechanobiology. 4 Units.
Introduces advanced biomechanics and mechanobiology of skeletal tissues—including bone and cartilage—through an understanding of structure-function relationship in biological tissues. Focuses on bone and cartilage regenerative engineering approaches based on scaffolds, stem cells, and mechanotransduction. Prerequisite: PTGR 591, PTGR 592 (recommended); NSBB 579 (recommended); general biology.

NSBB 579. Bioengineering Fabrication. 3 Units.
Provides a foundational skill set for using 3D software; for computer numerical control (CNC) machining, 2D laser cutting, additive 3D printing, and data collection with Raspberry Pi and Arduino devices; and for understanding intellectual property. Students use campus resources and local maker-spaces to complete a project focused on a bioengineering application.

NSBB 580. Medical Imaging Physics. 3 Units.
Includes medical imaging science and the radiological modalities, basic radiation physics and the interaction of radiation with matter, the physics of X-ray production, computed tomography, magnetic resonance imaging, ultrasound and nuclear medicine, quality control, and safety, as well as clinical applications in each modality. Prerequisite: Undergraduate level physics course and biology course.

NSBB 584. Medical Image Analysis. 2 Units.
Introduces theory, processing, analysis, and high-level applications of commonly used digital image techniques. Presents common computer programs and tools for image analysis. Prerequisite: Undergraduate-level class in calculus and one of the following: introduction to programming, numerical analysis, computational statistics, or related topics; previous experience with computer programming highly recommended; course in statistics helpful but not required.

NSBB 585. Radiation Detectors for Medical Applications. 4 Units.
Provides students with a broad overview of radiation detectors for medical applications in general, with emphasis on scintillation detectors and their applications in positron emission tomography. Prerequisite: Undergraduate B.S. degree or equivalent in one of the following areas: physics or biophysics, chemistry or biochemistry, engineering or bioengineering.

NSBB 587. Radiation Therapy Physics. 4 Units.
Provides graduate and medical students with a broad understanding of the processing and analysis of basic physics in regards to applications within the context of radiation therapy. Designed to provide students with a basic understanding of basic physical sciences, with the necessary specialist knowledge required to develop a career in radiation therapy. Prerequisite: Undergraduate B.S. degree in the field of physics, chemistry, computer science, or engineering.
NSBB 697. Research. 1-8 Units.
The final and central requirement for research-related degrees within the neurosciences, systems biology, or bioengineering programs. Successful completion of this original, independent research project demonstrated through production of a written summary of the research project and approval by the student's mentor and/or research committee. NSBB 697 research units applicable to both the master's and Ph.D. degrees. Prerequisite: Successful completion of course work leading to research.

Neurosurgery (NEUS)

Courses
NEUS 891. Neurosurgery Elective. 1.5-27 Units.
Offers fourth-year medical students the opportunity to explore various areas of neurosurgery, including research.

Nursing (NRSG)

Courses
NRSG 217. Psychiatric Mental Health Nursing. 6 Units.
Focuses on the care of adult patients experiencing cognitive, mental, and behavioral disorders. Integrates concepts of crisis intervention, therapeutic communication, anger management, and coping skills throughout the course. Provides the student through clinical experience an opportunity to apply theoretical concepts and implement safe patient care to patients in selected mental health settings. Prerequisite: NRSG 232, NRSG 233.

NRSG 224. Nursing Pathophysiology. 5 Units.
Focuses on the altered processes of human physiology. Emphasizes exploration of changes of biological processes of the body and the effects of homeostasis. Studies alteration of health problems, along with the associated clinical manifestations and treatments. Builds foundations for understanding the rationale behind assessment, findings, and nursing intervention.

NRSG 230. Principles of Professionalism, Clinical Reasoning, and Self-Care. 4 Units.
Teaches personal and professional accountability and principles of self-care that enhance the student's ability to cope with stressors and succeed in the academic setting, as well as in the nursing profession. Teaches students to think in a systematic and logical manner that equips them to make sound clinical nursing judgments.

NRSG 231. Foundations of Nursing. 3 Units.
Provides an introduction to the profession of nursing and the roles of the nurse. Formation of the role of the professional nurse, including scope of practice and supporting guidelines. Explores current issues in health care and professional accountability of the nurse, including patient-centered care, safety; confidentiality; communication; and upholding regulatory, legal, and ethical principles. Applies nursing knowledge to an adult/aging individual in the community.

NRSG 232. Fundamentals of Nursing. 7 Units.
Expands on the roles of the nurse, and profession-related and patient-care concepts. Emphasizes physical, psychological, developmental, spiritual, and cultural aspects of whole person care. Introduces basic nursing skills, the nursing process, and the decision-making framework to assist in developing effective clinical judgment skills. Prerequisite: NRSG 224, NRSG 230, NRSG 231.

NRSG 233. Health Assessment. 3 Units.
Provides knowledge and skills to conduct whole person health assessment of the adult patient. Emphasizes taking a basic health history, as well as performance of a complete physical examination--including physiological, psychological, sociocultural, and spiritual assessments. Skills laboratory experiences provide an opportunity to practice physical assessment skills. Prerequisite: NRSG 231.

NRSG 244. Strategies for Academic Success. 1 Unit.
Assesses student needs, learning styles, strengths, challenges/barriers in order to provide individualized approaches to learning strategies essential for success in nursing education and practice.

NRSG 299. Directed Study. 1-8 Units.
Opportunity for clinical learning in a selected area of nursing. Prerequisite: Consent of instructor and the associate dean.

NRSG 301. Adult Health Nursing I. 6 Units.
Focuses on the care of adult and older adult patients with health alterations that require medical and/or surgical intervention. Introduces the care of older adults while focusing on their unique physiological and psychological needs. Emphasizes the care of patients with alterations in selected body functions. Integrates concepts of patient-centered care, cultural sensitivity, informatics, safe practice, and professionalism throughout the course. Prerequisite: NRSG 224, NRSG 232, NRSG 233.

NRSG 302. Adult Health Nursing II. 8 Units.
Focuses on the care of adult patients with complex medical/surgical health problems. Emphasizes helping patients and their families cope with alterations in body functions. Integrates concepts of pharmacology, health promotion and education, evidence-based practice, and interdisciplinary collaboration throughout the course. Clinical experiences that provide the student an opportunity to apply theoretical concepts and skills to implement safe care to patients. Prerequisite: NRSG 301.

NRSG 303. Adult Health Nursing III. 7 Units.
Focuses on advanced concepts of nursing care as they relate to patients with complex, multisystem alterations in health. Emphasizes implementing time management and organizational skills while managing the care of patients with multiple needs and collaborating with interdisciplinary team. Integrates complex clinical skills; as well as priority setting, clinical judgment, and tenets of legal and theoretical practice throughout the course. Prerequisite: NRSG 302.

NRSG 305. Nursing Pharmacology. 2 Units.
Provides an introduction to the principles of pharmacology, including pharmacokinetics, pharmacodynamics, medication interactions, and potential adverse medication reactions. Emphasizes drug classifications and nursing care related to the safe administration of medication to patients across the life span. Prerequisite: NRSG 224.

NRSG 314. Obstetrical and Neonatal Nursing. 5 Units.
Provides an integrative, family-centered approach to the care of mothers and neonates. Emphasizes normal and high-risk pregnancies, normal growth and development, family dynamics, and the promotion of healthy behaviors in patients. Includes clinical experiences that provide the student an opportunity to apply theoretical concepts and implement safe patient care to mothers and neonates in selected settings. Prerequisite: NRSG 301.
NRSG 315. Child Health Nursing. 6 Units.
Provides an integrative, family-centered approach to the care of children from infancy through adolescence. Emphasizes normal growth and development, family dynamics, common pediatric disorders, and the promotion of healthy behaviors in patients. Includes clinical experiences that provide the student an opportunity to apply theoretical concepts and implement safe patient care to children in selected settings. Prerequisite: NRSG 302.

NRSG 316. Wellness and Health Promotion. 3 Units.
Introduces concepts of health, wellness, healthy lifestyle behaviors, and health promotion. Examines factors that influence health and health behaviors and the dynamics of behavior change, with an emphasis on motivational theory; exemplary behaviors in nutrition, physical activity, stress management, and tobacco cessation related to health and wellness; and, wellness for the student and practicing nurse. Prerequisite: NRSG 224, NRSG 231.

NRSG 324. Nursing Informatics and Evidence-Based Practice. 3 Units.
Provides an overview of nursing informatics as it relates to the provision of safe, quality, patient-centered care. Emphasizes the establishment and provision of evidence-based practice. Stresses the use of information management systems in the collection, management, and communication of patient data; as well as the maintenance of patient privacy and confidentiality.

NRSG 337. Strategies for Professional Transition. 4 Units.
Student assesses and strengthens the application of skills in communication, research, professional responsibility, teaching-and-learning process, management, nursing process, and individual empowerment. Additional skills include nursing informatics, orientation to LLU campus/University setting, assessment and development of learning objectives, critical thinking, and portfolio development. Prerequisite: Admission to RNBS program.

NRSG 338. Essential Leadership Concepts for Nursing Licensure. 1 Unit.
Management issues related to entry into nursing practice. For students who have a previous B.S./B.A. degree or LVN taking the 45 unit option and who wish to sit for boards at the end of the junior year. Course does not apply towards the bachelor’s degree.

NRSG 339. Nursing Externship. 1 Unit.
An elective work-study course that provides opportunity for experiential understanding of the nature of nursing in the work place. Focuses on application of the Neuman framework. The student, under the supervision of an RN preceptor, applies previously learned skill in providing direct patient care. Prerequisite: NRSG 408.

NRSG 340. Introduction to Epidemiology for Nursing. 2,3 Units.
Explores disease occurrence in human populations. Includes: observation and interpretation in clinical decision making; promotion of optimum patient outcomes; assessment and measurement of disease occurrence; prevention of illness; infection control; and, evaluation of research that impacts delivery of care on local, national, and global levels. Focus on hospital infections required for 3rd unit. Prerequisite or concurrent*: NRSG 375 or NRSG 376*.

NRSG 405. Health Transitions and Post-Acute Care. 3 Units.
Provides a wholistic approach to care of clients transitioning across the health-illness continuum and health-care settings. Focuses clinical experiences on chronic disease management in post-acute settings. Addresses physiological and psychological needs and common health alterations of older adults, including end-of-life. Introduces community resources that facilitate continuity of care, and promote safety and optimal wellness. Prerequisite or concurrent*: NRSG 303, NRSG 314, NRSG 315*, NRSG 316.

NRSG 407. Complex Nursing Concepts of Health and Disease. 6 Units.
Explores complex pathophysiological concepts across the lifespan, using a systems approach. Applies multifaceted alterations at the cell/system levels and functional changes to nursing practice. Uses etiology, pathogenesis, and clinical manifestations to investigate and understand common disease processes. Prerequisite: NRSG 337.

NRSG 408. Critical Care Nursing. 8 Units.
Focuses on advanced concepts of nursing care as they relate to critically ill patients. Emphasizes implementation of time management and organizational skills while managing the care of patients’ multiple needs, and collaborating with the interdisciplinary team. Integrates complex clinical skills; as well as priority setting, clinical judgment, and tenets of legal and ethical practice throughout the course. Prerequisite: NRSG 303, NRSG 314, NRSG 315, NRSG 316.

NRSG 409. Home Health Nursing. 3 Units.
Holistic care of the client system across the lifespan within the home. Clinical experience focuses on acute and chronic stressors. Introduces community resources to facilitate continuity of care and to promote optimal wellness. Prerequisite: NRSG 314, NRSG 315, NRSG 316, NRSG 317.

NRSG 414. Management and Leadership for the Registered Nurse. 5 Units.
View of the health-care agency or nursing unit as the core system, with lines of defense and lines of resistance. The management process as the set of interventions aimed at maintaining or restoring a state of equilibrium and order within the organization. The role of the first-line manager observed and some aspects experienced. Prerequisite: NRSG 337; NRSG 407.

NRSG 415. Community Mental Health Nursing. 4 Units.
Delivers community mental health nursing care in a variety of clinical settings. Assesses stressors and developing primary, secondary, and tertiary interventions within community populations at risk for psychosocial stress and illness. Emphasizes psychoeducational group interventions. Examines the impact of life stressors and includes principles of health promotion through behavior change. Prerequisite: For RN to B.S. students only. NRSG 337, NRSG 407.
NRSG 416. Public Health Nursing. 4 Units.
Focuses on the optimal wellness of the community as client. Includes, intervention strategies emphasizing primary, secondary, and tertiary prevention with micro- and macro-client systems; assessing factors influencing population health and the use of evidence-based practices in the delivery of spiritually and culturally appropriate interventions; and, the role of the nurse as advocate for social justice. Prerequisite: NRSG 404, NRSG 405, NRSG 408.

NRSG 416L. Public Health Nursing Clinical Laboratory. 4 Units.
Clinical application focusing on the optimal wellness of the community as client. Intervention strategies emphasizing primary, secondary, and tertiary prevention with micro-/macro-client systems. Prerequisite or concurrent*: NRSG 404, NRSG 416*.

NRSG 418. Capstone Nursing Practicum. 6 Units.
Provides student the opportunity to function as a contributing member of the interprofessional team, and to collectively apply the knowledge and practice the skills acquired in previous courses. Gives students the opportunity to provide care to a caseload of patients that is safe, evidence-based, patient-centered, and focused on promoting positive patient outcomes. Emphasizes demonstration of professional behaviors. Prerequisite: NRSG 408.

NRSG 419. Capstone Nursing Leadership. 6 Units.
Facilitates transition to the role of a professional nurse in the health-care system. Emphasizes contemporary issues and management concepts; development of the skills of delegation, conflict management, and leadership, legal and ethical issues with a focus on personal accountability and responsibility; and, analysis of health-care policy, fiscal responsibility, and standards of practice according to regulatory requirements and institution policies. Prerequisite or concurrent: NRSG 408.

NRSG 420. NCLEX Preparation for Second-Degree Students. 2 Units.
Focuses on preparation for the NCLEX–RN examination, with emphasis on ATI capstone review and professional/licensure issues. Available for students with BS/BA degrees and for LVNs taking the NCLEX early. Prerequisite or concurrent: NRSG 408.

NRSG 424. Professional RN Capstone. 7 Units.
Focuses on professional nursing development to promote wellness of individuals, families, and groups under diverse circumstances in clinical practice. Enhances interprofessional decision-making while exploring ethical, professional, and clinical issues. Prerequisite: NRSG 337, NRSG 407.

NRSG 426. Public Health Nursing for Working RNs. 4 Units.
Focuses on promoting a healthy population. Integrates public health and nursing science to provide an evidence-based foundation for improving the public’s health. Examines social and ecological determinants of health, along with health disparities and vulnerable populations. Integrates the concepts of primary, secondary, and tertiary interventions. Prerequisite: NRSG 337, NRSG 404, NRSG 407.

NRSG 426L. Public Health Nursing Clinical Laboratory for the Working RN. 3 Units.
A supervised clinical experience designed for the RN to BS nursing student. Includes the clinical application of public health nursing—public health with a focus on populations while addressing individuals, families, and groups. Intervention strategies utilize primary, secondary, and tertiary prevention in the community. Includes independent and group work in a variety of community settings. Prerequisite or concurrent*: NRSG 337, NRSG 426*.

NRSG 428. Health Promotion for RNs. 4 Units.
Examines health promotion in relation to health models. Utilizes evidence-based practice to promote wellness and optimum health across the lifespan. Examines the role of lifestyle behaviors in health promotion and illness prevention. Applies strategies for health behavioral change to promote wellness and optimum health across the lifespan. Applies the role of lifestyle behaviors in health behavioral change to promote high-level wellness in individuals. Prerequisite: NRSG 337.

NRSG 429. Nursing Research. 3 Units.
Promotes clinical decision making, based on evidence, through the exploration and integration of current scientific evidence, use of clinical reasoning, identification of patient preferences, and assessment of available resources. Provides the knowledge and understanding of qualitative and quantitative systems of inquiry. Focuses on analysis and synthesis of evidence to answer a clinical question relevant to nursing practice and patient-centered care. Prerequisite: NRSG 324.

NRSG 434. Public Health Nursing Laboratory for the Working RN. 3 Units.
The clinical application of public health with a focus on vulnerable populations. Intervention/strategies involve health promotion and disease prevention in the community. Clinical experiences include independent work in a variety of community workplace settings. Designed for the RN to B.S. student who is not seeking state certification as a public health nurse. Prerequisite or concurrent*: NRSG 337, NRSG 426*.

NRSG 435. Capstone Leadership for the Second-Degree Nursing Student. 4 Units.
Explores development of organizational theories and the roles and functions of leaders and managers. Examines current competencies in the area of nursing leadership. Emphasizes application of leadership concepts, not only within health-care organizations, but also at the personal level as the students interact with nurses in leadership roles. Prerequisite or concurrent: NRSG 408.

NRSG 497. Advanced Clinical Experience. 3-12 Units.
An elective course open to students seeking clinical experience in nursing.

NRSG 499. Directed Study. 1-8 Units.
Opportunity for clinical experience in a selected area of nursing. Prerequisite: Consent of instructor and the associate dean.

NRSG 519. Advanced Role Development for the Nurse Anesthetist. 4 Units.
Examines advanced practice registered nurse roles and core competencies. Focuses on issues relevant to nurse anesthesia practice, including history of nurse anesthesia, role of the nurse anesthetist in California, and an overview of ethical medical-legal issues. Emphasizes collaborative communication and the nurse anesthetist as educator. Per week: theory three hours, practicum zero hours.

NRSG 527. Clinical Practicum and Correlation Conference IV. 4 Units.
Continued supervised experience in the full scope of anesthesia practice. Emphasizes exposure to advanced anesthetic and surgical techniques. Clinical correlation conference participation includes attendance at required grand rounds and conferences, participation in class discussions and projects, and review of selected anesthetic concepts and techniques. Per week: theory 1 hour, practicum 3 hours. Prerequisite: NRSG 526.

NRSG 528. Clinical Practicum and Correlation Conference V. 4 Units.
Provides unrestricted experience in advanced anesthetic techniques and surgical specialties during clinical practicum. Prerequisite: NRSG 527.
NURSING 529. Clinical Practicum and Correlation Conference VI. 4 Units. Development and implementation of anesthetic care plans using major techniques for all surgical specialties, with increasing independence based on individual skill levels. Provides opportunities for refinement of decision-making skills in preparation for the independent management of anesthetics. Prerequisite: NRS 528.

NURSING 565. Primary Care Adult-Gerontology Nurse Practitioner V. 6 Units. Final clinical practicum. Emphasis on integrating prior learning and increasing clinical competence in primary care settings. Includes case study discussions and on-line certification practice testing. Per week: lecture zero hours, practicum eighteen hours. Prerequisite: NRGD 564.

Courses

NURSING 500. Gerontological Health and Wellness. 2 Units. Continues development of the advanced practice role of health promotion, maintenance, and management. Focuses on fragile elders with acute and chronic conditions.

NURSING 501. Primary Care Adult-Gerontology Nurse Practitioner I. 5 Units. Introduces the role, professional responsibilities, and clinical practice of the primary care adult-gerontology nurse practitioner (AGNP). Focuses on primary health care concepts related to health maintenance and promotion of optimal wellness and common, acute illnesses of the adult. Per week: lecture 3 hours, practicum 6 hours. Prerequisites: NGRD 621, NGRD 622, NGRD 624, NGRD 625.

NURSING 502. Primary Care Adult-Gerontology Nurse Practitioner II. 6 Units. Focuses on the AGNP role of health promotion and management of reproductive health and related conditions across the adult life span. Per week: lecture 3 hours, practicum 9 hours. Prerequisite: NGRD 501.

NURSING 503. Primary Care Adult-Gerontology Nurse Practitioner III. 8 Units. Continues focus on the AGNP role of health promotion and management of patients with common chronic conditions across the adult life span. Per week: lecture 4 hours, practicum 12 hours. Prerequisite: NGRD 502.

NURSING 504. Primary Care Adult-Gerontology Nurse Practitioner IV. 8 Units. Focuses on health maintenance and management of patients with complex acute and chronic conditions across the adult life span. Per week: lecture 4 hours, practicum 12 hours. Prerequisite: NGRD 503.

NURSING 505. Primary Care Adult-Gerontology Nurse Practitioner V. Practicum. 8 Units. Emphasis on integrating prior learning and increasing clinical competence in primary care settings. Includes discussion and on-line certification practice testing in addition to final practicum. Per week: lecture 1 hour, practicum 21 hours. Prerequisite: NGRD 504.

NURSING 509. Primary Care Adult-Gerontology Nurse Practitioner. Skills Laboratory. 1 Unit. Focuses on kinetic learning and practice of primary care clinical skills and procedures. An IP will be assigned at the end of each quarter until all skills laboratory activities for the clinical program are completed. Prerequisite: NGRD 501.

NURSING 510. Family Nurse Practitioner: Pediatrics and Adolescent. 5 Units. Introduces the FNP student to basic primary health-care concepts of children, from birth to 21 years of age, related to health maintenance, promotion, and assessment. Emphasizes developmental milestones and anticipatory guidance. Introduces common pediatric diseases and management. Per week: theory 3 hours, clinical 6 hours.

NURSING 511. Family Nurse Practitioner I. 5 Units. Introduces the role, professional responsibilities, and clinical practice of the primary care family nurse practitioner (FNP). Focuses on primary health-care concepts related to health maintenance and promotion of optimal wellness and common, acute illnesses across the life span. Per week: lecture 3 hours, practicum 6 hours. Prerequisites: NGRD 621, NGRD 622, NGRD 624, NGRD 625.

NURSING 512. Family Nurse Practitioner II. 6 Units. Focuses on the FNP role of health promotion and management of reproductive health and related conditions across the adult life span. Per week: lecture 3 hours, practicum 9 hours. Prerequisite: NGRD 511.

NURSING 513. Family Nurse Practitioner III. 8 Units. Focuses on health maintenance and management of patients with complex acute and chronic conditions across the adult life span. Per week: lecture 4 hours, practicum 12 hours. Prerequisite: NGRD 512.

NURSING 514. Family Nurse Practitioner IV. 8 Units. Focuses on health maintenance and management of patients with complex acute and chronic conditions across the adult life span. Per week: lecture 4 hours, practicum 12 hours. Prerequisite: NGRD 513.

NURSING 515. Family Nurse Practitioner V. Practicum. 8 Units. Emphasis on integrating prior learning and increasing clinical competence in primary care settings. Includes discussion and on-line certification practice testing in addition to final practicum. Per week: lecture 1 hour, practicum 21 hours. Prerequisite: NGRD 514.

NURSING 519. Family Nurse Practitioner: Skills Lab. 1 Unit. Focuses on kinetic learning and practice of primary care clinical skills and procedures. An IP will be assigned at the end of each quarter until all skills laboratory activities for the clinical program are completed. Prerequisite: NGRD 511.

NURSING 531. Primary Care Pediatric Nurse Practitioner I. 4 Units. Focuses on basic primary health-care concepts of children from birth through young adulthood related to health maintenance and promotion of optimal wellness; along with the assessment of physiological, psychological, sociocultural, developmental, and spiritual variables. Introduces and discusses the role, professional responsibilities, and clinical practice of the pediatric nurse practitioner as an advanced practice registered nurse. Prerequisites: NGRD 621, NGRD 622, NGRD 624, NGRD 625.

NURSING 532. Primary Care Pediatric Nurse Practitioner II. 6 Units. Continues development of the PNP primary care role for children from birth through 21 years of age, related to assessment and management of common or acute illnesses, while incorporating health maintenance and prevention. Per week: theory 3 hours, practicum 9 hours. Prerequisite: NGRD 531.

NURSING 533. Primary Care Pediatric Nurse Practitioner III. 6 Units. Continues development of the PNP primary care role in screening, assessment, and management of chronic diseases in children from birth through 21 years of age. Per week: theory 3 hours, practicum 9 hours. Prerequisite: NGRD 532.

NURSING 534. Primary Care Pediatric Nurse Practitioner IV. 6 Units. Emphasizes the assessment and management of children from birth to 21 years of age with rare complex chronic health problems such as genetic syndromes and children with special needs. Per week: theory 3 hours, practicum 9 hours. Prerequisite: NGRD 533.
NGRD 535. Primary Care Pediatric Nurse Practitioner V. 6 Units.
Emphasizes the development of advanced clinical skills in conjunction with the advance practice role. Discusses health-care issues related to policy, ethics/culture, and research. Per week: theory 3 hours, practicum 9 hours. Prerequisite: NGRD 534.

NGRD 536. Primary Care Pediatric Nurse Practitioner VI: Practicum. 7 Units.
Focuses on integration and synthesis of knowledge and skills under the guidance of an expert preceptor, with the goal of working independently and collaboratively within a health-care team. Includes discussion and certification practice testing in addition to final practicum. Per week: practicum 21 hours. Prerequisite: NGRD 535.

NGRD 539. Primary Care Pediatric Nurse Practitioner: Skills Laboratory. 1 Unit.
This skills lab is designed to equip pediatric nurse practitioner students with common ambulatory care skills most often used in pediatric primary care clinics. An IP will be assigned at the end of each quarter until all skills lab activities for the clinical program are completed.

NGRD 541. Psychiatric Nurse Practitioner I. 4 Units.
Focuses on psychopharmacology principles and treatment in clinical management of psychiatric disorders and symptoms across the life span. Per week: theory 3 hours; clinical 3 hours. Prerequisites: NGRD 621, NGRD 622, NGRD 624, NGRD 625.

NGRD 542. Psychiatric Nurse Practitioner II. 6 Units.
Focuses on mental health promotion and assessment of psychiatric disorders occurring in children, adolescents, adults, and families across the life span. Per week: theory 3 hours, clinical 9 hours. Prerequisite: NGRD 541.

NGRD 543. Psychiatric Nurse Practitioner III. 6 Units.
Focuses on modalities of evidence-based treatment of children, adolescents, and family with common, chronic, and complex psychopathology; and on clinical experience in the assessment and management of these psychiatric disorders. Per week: theory 3 hours, clinical 9 hours. Prerequisite: NGRD 542.

NGRD 544. Psychiatric Nurse Practitioner IV. 6 Units.
Focuses on modalities of evidence-based treatment of the adult, geriatric, and family with common, chronic, and complex psychopathology; and on clinical experience in the assessment and management of these psychiatric disorders. Per week: theory 3 hours, clinical 9 hours. Prerequisite: NGRD 543.

NGRD 545. Psychiatric Nurse Practitioner V. 6 Units.
Focuses on modalities of evidence-based psychotherapies, as well as complementary and alternative approaches across the lifespan—with emphasis on select psychiatric disorders, community psychiatric populations, and brief solution-oriented psychotherapy. Prerequisite: NGRD 544.

NGRD 546. Psychiatric Nurse Practitioner VI: Practicum. 7 Units.
Final clinical practicum with opportunity to develop autonomy while working with preceptors in clinical settings. Focuses on integration of learning from all prior psychiatric nurse practitioner courses and clinical experiences. Includes discussion and certification practice testing in addition to final practicum. Per week: theory 1 hour, practicum 18 hours.

NGRD 549. Psychiatric Nurse Practitioner VII: Skills Laboratory. 1 Unit.
Focuses on practice of psychiatric care clinical skills and procedures.

NGRD 551. Adult - Gerontology: CNS I. 4 Units.
Focuses on theoretical basis of advanced nursing practice for adult and aging clients related to health-care delivery and continuity of chronic illness care in vulnerable populations. Contents applied to selected client populations. Prerequisites: NGRD 621, NGRD 622, NGRD 625.

NGRD 552. Adult - Gerontology: CNS II. 4 Units.
Focuses on the physiological basis of advanced practice nursing care of adult and aging clients with specific acute and chronic health conditions. Utilizes a systems approach to the management of complex patient problems.

NGRD 553. Adult - Gerontology: CNS III. 4 Units.
Focuses on issues relevant to the clinical nurse specialist caring for the adult and aging client. Includes topics and applications relevant to organization leadership, clinical reasoning, quality improvement, collaboration, consultation, finances, and other concepts necessary for CNS role implementation. Per week: theory 2 hours, clinical 6 hours.

NGRD 554. Adult - Gerontology: CNS Clinical Practicum. 2-8 Units.
Experiential learning of the advanced practice role under the guidance of faculty and clinical experts in the area of adult and aging. Emphasizes the clinical competencies outlined by AACN. Per week: clinical hours variable. Prerequisite: NGRD 551, NGRD 552, NGRD 553.

NGRD 561. Pediatrics: CNS I. 4 Units.
Focuses on theoretical basis of advanced nursing practice for the child and family related to health-care delivery and continuity of chronic illness care in vulnerable populations. Students apply content to selected client populations. Prerequisites: NGRD 621, NGRD 622, NGRD 625.

NGRD 562. Pediatrics: CNS II. 4 Units.
Focuses on the pathophysiological basis of advanced practice nursing care of the child with specific acute and chronic health conditions. Utilizes a systems approach to the management of complex patient problems.

NGRD 563. Pediatrics: CNS III. 4 Units.
Focuses on issues relevant to the clinical nurse specialist caring for the child and family. Includes topics and applications relevant to organization leadership, clinical reasoning, quality improvement, collaboration, consultation, finances, and other concepts necessary for CNS role implementation. Per week: theory 2 hours, clinical 6 hours.

NGRD 564. Pediatrics:CNS Clinical Practicum. 2-8 Units.
Experiential learning of the CNS advanced practice role under the guidance of faculty and clinical experts in the area of the child and family. Emphasizes the clinical competencies outlined by AACN. Per week: clinical hours variable.

NGRD 571. Advanced Role for the Nurse Anesthetist I. 2 Units.
Examines advanced practice registered nursing roles, with an emphasis on the role of the nurse anesthetist, issues relevant to nurse anesthesia practice, and wellness.

NGRD 572. Advanced Role for the Nurse Anesthetist II. 2 Units.
Examines the regulation of nurse anesthesia practice, ethical and legal aspects of nurse anesthesia practice, the business of anesthesia, and the various roles of the nurse anesthetist. Prerequisite: NGRD 571.

NGRD 573. Scientific Foundations of Nurse Anesthesia Practice. 4 Units.
Focuses on the application of principles of chemistry and physics to the practice of anesthesia.

NGRD 574. Anesthesia Equipment and Technology. 2 Units.
Examines various equipment and technology utilized in anesthesia practice.
NGRD 575. Advanced Clinical Anatomy for the Nurse Anesthetist I. 2 Units.
Emphasizes the clinical significance of selected respiratory, nervous, vascular, and musculoskeletal system anatomical structures and associated functional aspects as they relate to the practice of anesthesia.

NGRD 576. Advanced Clinical Anatomy for the Nurse Anesthetist II. 2 Units.
Emphasizes the clinical significance of selected respiratory, nervous, vascular, and musculoskeletal system anatomical structures and associated functional aspects as they relate to the practice of anesthesia.

NGRD 577. Advanced Physiology for the Nurse Anesthetist. 4 Units.
Examines selected aspects of advanced cell biology and systems physiology that are related to homeostasis and foundational to the practice of anesthesia.

NGRD 578. Advanced Physiology and Pathophysiology for the Nurse Anesthetist I. 4 Units.
Examines normal human physiology and the causes, processes, and clinical manifestations of disease. Focuses on pathophysiology of the cardiovascular, pulmonary, musculoskeletal, and neuromuscular systems; and the anesthesia management of patients with associated disorders. Also examines pediatric and obstetric physiology and pathophysiology relevant to the practice of anesthesia. Prerequisite: NGRD 577.

NGRD 579. Advanced Physiology and Pathophysiology for the Nurse Anesthetist II. 4 Units.
Examines normal human physiology and the causes, processes, and clinical manifestations of disease. Focuses on pathophysiology of the endocrine, gastrointestinal, hepatic, and renal systems; and the anesthesia management of patients with associated disorders. Also examines pediatric and obstetric physiology and pathophysiology relevant to the practice of anesthesia. Prerequisite: NGRD 577, NGRD 578.

NGRD 580. Advanced Health Assessment for Nurse Anesthetists. 4 Units.
Focuses on health history and physical assessment as they relate to the perioperative patient population. Includes invasive and noninvasive systems assessment and diagnostic methods. Principles and application of health promotion strategies for the CRNA population.

NGRD 581. Advanced Pharmacology for the Nurse Anesthetist I. 6 Units.
Applies principles of pharmacology to the practice of anesthesia, including the pharmacodynamics, pharmacokinetics, pharmacotherapeutics, and toxicology of inhalation anesthetics, intravenous anesthetics, opioid agonists and antagonists, non-opioid analgesics, neuromuscular blocking agents, and anesthetic adjuncts.

NGRD 582. Advanced Pharmacology for the Nurse Anesthetist II. 2 Units.
Applies principles of pharmacology to the practice of anesthesia, including the pharmacodynamics, pharmacokinetics, pharmacotherapeutics, and toxicology of local anesthetics and anesthetic adjuncts. Prerequisite: NGRD 581.

NGRD 583. Advanced Pharmacology for the Nurse Anesthetist III. 2 Units.
Applies principles of pharmacology to the practice of anesthesia, including the pharmacodynamics, pharmacokinetics, pharmacotherapeutics, and toxicology of autonomic agents and additional drugs of interest. Prerequisite: NGRD 582.

NGRD 584. Principles of Nurse Anesthesia Practice I. 4 Units.
Examines basic principles of anesthesia related to the perianesthetic management of patients undergoing surgical, diagnostic, and therapeutic procedures, culminating in the creation and implementation of a simulated anesthetic plan of care.

NGRD 585. Principles of Nurse Anesthesia Practice II. 4 Units.
Builds upon basic principles of anesthesia and introduces advanced concepts in the individualized perianesthetic management of patients with cardiovascular, pulmonary, and neurological disorders. Culminates in the creation and implementation of an anesthetic plan of care, including the diagnosis and treatment of simulated altered physiological responses coincident to the provision of anesthesia services and cardiovascular and/or pulmonary complications. Prerequisite: NGRD 584.

NGRD 586. Principles of Nurse Anesthesia Practice III. 4 Units.
Focuses on the individualized perianesthetic management of patients with various coexisting diseases across the lifespan, including neonatal, pediatric, obstetric, and geriatric patient populations. Prerequisite: NGRD 584, NGRD 585.

NGRD 587. Principles of Nurse Anesthesia Practice IV. 4 Units.
Focuses on the perianesthetic management of special patient populations and surgical subspecialties. Prerequisite: NGRD 585, NGRD 586.

NGRD 590. Clinical Practicum I. 2 Units.
Introduces the clinical setting through preceptored experiences in the management of patients throughout the perianesthetic continuum. Prerequisite: NGRD 584, NGRD 585.

NGRD 591. Clinical Practicum II. 2 Units.
Preceptored clinical experience in the full scope of nurse anesthesia practice. Focuses on basic principles of anesthesia, including preparation of the anesthetizing area and successful creation and implementation of an anesthetic plan of care. Prerequisite: NGRD 590.

NGRD 592. Clinical Practicum III. 2 Units.
Preceptored clinical experience in the full scope of nurse anesthesia practice. Focuses on basic principles of anesthesia, emphasizing refinement of anesthetic management to improve patient safety and prevent iatrogenic complications. Prerequisite: NGRD 590, NGRD 591.

NGRD 593. Clinical Practicum IV. 2 Units.
Preceptored clinical experience in the full scope of nurse anesthesia practice. Focuses on predicting and preventing anesthetic management issues in cases with increasing complexity. Prerequisite: NGRD 590, NGRD 591, NGRD 592.

NGRD 594. Clinical Practicum V. 4 Units.
Preceptored clinical experience in the full scope of nurse anesthesia practice. Focuses on basic and advanced principles of anesthesia through the introduction of specialty rotations. Prerequisite: NGRD 590, NGRD 591, NGRD 592, NGRD 593.

NGRD 595. Clinical Practicum VI. 4 Units.
Preceptored clinical experience in the full scope of nurse anesthesia practice. Focuses on refinement of anesthetic management skills through continued participation in specialty clinical rotations. Prerequisite: NGRD 590, NGRD 591, NGRD 592, NGRD 593, NGRD 594.

NGRD 596. Clinical Practicum VII. 4 Units.
Preceptored clinical experience in the full scope of nurse anesthesia practice. Focuses on the development and implementation of anesthetic care plans using all major techniques for all surgical specialties. Prerequisite: NGRD 590, NGRD 591, NGRD 592, NGRD 593, NGRD 594, NGRD 595.

NGRD 597. Clinical Practicum VIII. 4 Units.
Preceptored clinical experience in the full scope of nurse anesthesia practice. Focuses on refinement of decision making with increased flexibility and speed. Prerequisite: NGRD 590, NGRD 591, NGRD 592, NGRD 593, NGRD 594, NGRD 595, NGRD 596.
NGRD 598. Clinical Practicum IX. 4 Units.
Culminating clinical course focusing on refinement and demonstration of requisite knowledge, skills, and competences necessary for entry into practice. Prerequisite: NGRD 590, NGRD 591, NGRD 592, NGRD 593, NGRD 594, NGRD 595, NGRD 596, NGRD 597.

NGRD 600. Teaching and Learning Theory. 3 Units.
Explores the components of the teaching-learning process, including traditional and current modalities. Provides opportunities for students to practice specific teaching strategies.

NGRD 601. Curriculum Development in Higher Education. 3 Units.
Emphasizes the basic principles of curriculum building (needs assessment, program planning, implementation, and evaluation) within the context of the purposes, trends, and issues of the undergraduate curriculum in higher education. Considers content in nursing science and physical therapy and related disciplines in the context of the philosophical base and nursing and physical therapy theory. Synthesizes knowledge and application through a curriculum development project.

NGRD 602. Assessment of Learning Outcomes. 3 Units.
Explores methods of assessing classroom and clinical performance in nursing. Assists students in developing measurement instruments that assess clinical reasoning. Discusses test administration, results analysis, and appropriate feedback. Addresses social, ethical, and legal issues related to evaluation, testing, and grading.

NGRD 603. Educational Leadership. 2 Units.
Focuses on development of leadership skills within the nursing education arena that facilitates quality education. Explores the processes of moving from a nurse faculty role to a leadership role with a perspective toward developing educational approaches that meet current and future needs of students and facilitate the development of nursing faculty. Learned leadership to advance nursing education by being involved with others, being authentic, and creating an environment for change.

NGRD 604. Teaching Practicum. 3 Units.
Assists the student in developing the ability to teach both theory and clinical components in the specialty area of choice. Emphasizes the nurse teacher as facilitator of learning. Integrates expected knowledge and skills related to educational methodology and clinical nursing. Practice teaching done in the classroom and clinical setting. Per week: theory 0 hours, practicum 9-12 hours. Prerequisite: NGRD 600.

NGRD 605. Clinical Practicum: Nurse Educator. 3 Units.
Focuses on in-depth clinical expertise in selected area of nursing practice. Considers strategies to use clinical expertise in facilitating future nursing students’ learning.

NGRD 606. Nursing Administration Practicum. 1-8 Units.
Provides opportunities for the ongoing development and refinement of leadership capability in selected areas of nursing administration. Students showcase competencies in the synthesis and application of nursing, management, economic, and human resources theories to solve real-world issues of importance to the profession and the workplace. Per week: lecture 0 hours, practicum 3-30 hours. Prerequisites: NGRD 652; HADM 528.

NGRD 610. Master's Comprehensive Project. 2 Units.
Comprehensive project based on a PICOT question as appropriate for focus area of study. Prerequisites: NGRD 651, NGRD 658; Completion of clinical courses required for concentration area.

NGRD 621. Pharmacology in Advanced Practice I. 2 Units.
Principles of pharmacodynamics, pharmacotherapeutics, and pharmacokinetics. Overview of specific major drug classifications, discussion of the therapeutic use of drugs, and application to medical conditions. Addresses specific legal and ethical issues for advanced practice.

NGRD 622. Pharmacology in Advanced Practice II. 3 Units.
Focuses on specific major drug classifications, discussion of the therapeutic use of these drugs, and their application to medical conditions.

NGRD 623. Neonatal Pharmacology. 3 Units.
Advanced principles of neonatal pharmacotherapeutics, pharmacodynamics and pharmacokinetics. Additional overview of specific drug classifications within the neonatal population. Prerequisite NGRD 621.

NGRD 624. Advanced Health Assessment. 4 Units.
Focuses on advanced health assessment skills and knowledge necessary to successfully conduct a comprehensive history and physical throughout the lifespan. Emphasizes a wholistic plan of care, including health promotion strategies, while considering cultural and developmental variations of the patient.

NGRD 625. Advanced Clinical Pathophysiology. 4 Units.
Provides graduate students with an integrated understanding of normal human physiology and the most common pathological changes that occur throughout the lifespan. Focuses on using pathophysiological concepts to explain clinical observations and management.

NGRD 629. Special Topics. 1-4 Units.
Lecture and discussion of a current topic in graduate nursing bearing on the theory or practice of one aspect of the discipline. Specific content varies from quarter to quarter. May be repeated for additional credit.

NGRD 650. Advanced Role Development and Collaboration. 4 Units.
Focuses on transition to advanced practice and doctoral role. Topics include advanced practice nursing, theoretical bases, competencies, interprofessional collaboration, legal requirements, evidence-based practice, research, and professional writing.

NGRD 651. Theoretical Foundations for Evidence-Based Practice. 4 Units.
Focuses on the philosophical, theoretical, and scientific foundations of nursing practice and research. Examines evidence-based models and theories for use in clinical decision making, program development, and research design.

NGRD 652. Health-Care Systems Leadership. 4 Units.
Applies leadership theories and organizational models to complex professional and systems issues addressed by the advanced practice nursing leader. Focuses on development of leadership competencies for quality health care.

NGRD 653. Health Systems Policy Development and Advocacy. 4 Units.
Evaluates the impact of sociopolitical systems/processes within the context of current trends and issues affecting population health. Explores the impact of nursing on systems in the workplace, community, professional organizations, and government. Emphasizes strategic planning, policy formation, and advocacy.

NGRD 654. Social Determinants of Health. 4 Units.
Examines factors that contribute to disease prevention, health promotion, and well-being in vulnerable and diverse populations. Analyzes models, programs, and systems that address assessment, implementation, and evaluation for safe, equitable, culturally competent, and just health care.
NGRD 655. Health Systems Finance. 4 Units.
Focuses on health-care economics and finance—including evaluation of financial reports, business plans, and cost-benefit analyses of care-delivery systems. Explores strategies for optimizing fiscal resources to ensure safe patient care and best practices.

NGRD 656. Outcomes Assessment for Strategic Planning. 4 Units.
Examines and evaluates patient outcomes across the health-care system. Considers strategic planning, quality improvement, and information and technology systems that promote excellence in nursing practice and research.

NGRD 657. Intermediate Statistics. 4 Units.
Topics in intermediate statistics—including ANOVA, multiple regression, other multivariate statistical procedures, and interpreting computer output. Applies statistical analysis in translational research and research design.

NGRD 658. Nursing Research and Translational Science. 4 Units.
Provides a comprehensive understanding of scientific thinking, research methods, and translation science. Focuses on the research and evidenced-based practice (EBP) roles of scholarship for doctorally prepared nurse leaders. Prerequisite: NGRD 657.

NGRD 659. Professional Writing for Nurse Leaders. 4 Units.
Principles and methods of scholarly writing for research and evidence-based practice (EBP) dissemination.

NGRD 660. Integrative Leadership Case Study. 1-6 Units.
Focuses on integration of advanced concepts for DNP practice. Provides opportunity to extend learning from previous academic work to achieve the knowledge needed for the D.N.P. degree. Course may be processed as an IP but must be completed before beginning NGRD 667 DNP Proposal Development.

NGRD 664. Advanced Statistics. 4 Units.
Explains the different methods of multivariable analyses and other advanced statistical methods (multiple linear, multiple logistic regression, and survival analysis); and indicates reasons for choosing one method over another. Students required to perform an appropriate multivariable analysis on a data set, conduct an appropriate literature review for confounding variables, and present their findings within a specific time frame. Prerequisite: NGRD 657.

NGRD 667. DNP Proposal Development. 3 Units.
Examines the Iowa Model of Research in Practice (IMRP) guidelines and process to systematically develop the approach for implementation of an evidence-based project to improve patient care quality. Includes identification of the EBP question, the search for evidence, and steps for effective translation of the project into the specific practice setting.

NGRD 669A. DNP Practice Inquiry Project. 4 Units.
The first of six courses in the development of the DNP project. Student focuses on identifying and describing in detail the project problem, forming the project guidance committee and project team in the practice setting, and beginning development of the DNP project paper and PowerPoint presentation. Prerequisite or concurrent*: NGRD 656, NGRD 657, NGRD 658, NGRD 667*.

NGRD 669B. DNP Practice Inquiry Project. 4 Units.
The second of six courses in the development of the DNP project. Student comprehensively reviews and critiques relevant literature, works through the IRB approval process, and continues developing the DNP project paper and PowerPoint presentation. Prerequisite or concurrent*: NGRD 667, NGRD 669A*.

NGRD 669C. DNP Practice Inquiry Project. 2 Units.
The third of six courses in the development of the DNP project. Student pilots the project in the practice setting, and continues developing the DNP project paper and PowerPoint presentation. Prerequisite or concurrent: NGRD 669A, NGRD 669B.

NGRD 669D. DNP Practice Inquiry Project. 2 Units.
The fourth of six courses in the development of the DNP project. Student implements the change project using appropriate communication strategies with key personnel; and adapts change strategies appropriately, while continuing to develop the DNP project paper and PowerPoint presentation. Prerequisite: NGRD 667, NGRD 669A, NGRD 669B, NGRD 669C.

NGRD 669E. DNP Practice Inquiry Project. 2 Units.
The fifth of six courses in the development of the DNP project. Student monitors and analyzes the change project, evaluates key variables, implements adjustments as needed, identifies implications for future work. Student continues developing the DNP project paper and PowerPoint presentation. Prerequisite or concurrent: NGRD 669D.

NGRD 669F. DNP Practice Inquiry Project. 2 Units.
The last of six courses in the development of the DNP project. Student develops results for dissemination through publication and presentation, and completes the DNP project paper and PowerPoint presentation. Prerequisite or concurrent: NGRD 669E.

NGRD 679. Writing for Professional Publication. 4 Units.
Provides a review of fundamental writing skills appropriate for doctoral nursing students and a mentored writing experience that includes information, resources, and guidance to facilitate development of a publishable manuscript.

NGRD 680. Strategies for Advanced Theory Development in Nursing. 4 Units.
Engages the student in examining and applying the process of concept and theory development. Students analyze phenomena of interest, use selected strategies to construct conceptual relationships, and evaluate theoretical frameworks for development of nursing science. Prerequisite: NGRD 651.

NGRD 681. Philosophical Foundations of Nursing Science. 4 Units.
Explores the development of scientific thought and knowledge. Examines sources of knowledge and the assumptions underlying major approaches to scientific inquiry. Critiques these approaches in relation to knowledge development of nursing science.

NGRD 683. Mentored Research. 2 Units.
Student participates in the research process or engages in research activities guided by mentors. Experience contributes to ongoing development of the student’s knowledge in research planning, design conduct, analysis, or dissemination. Research activity may continue beyond one quarter (IP eligible). Acceptance into the Ph.D. degree program in nursing.

NGRD 684. Quantitative Research Methods. 4 Units.
Examines quantitative research methods applicable to advancing and developing nursing science. Topics range from the formulation of research problems and questions to discussing and identifying complex designs and methods. Guides the student in development of a quantitative research proposal that focuses on an area of study that may serve as the initial step in conducting independent dissertation research. Prerequisite: Minimum of one doctoral-level statistics course, or equivalent.
NGRD 685. Qualitative Research Methods. 4 Units.
Overview of qualitative research methods. Emphasizes selected qualitative and mixed research methodologies specific to social, clinical, and health services research. Topics include theoretical bases for conducting qualitative research; research design; data gathering, including interviewing, observation, archival and historical research, and data analysis and writing. Introduces various approaches for integrating qualitative and quantitative methodologies.

NGRD 686. Applied Psychometrics for Health Care. 4 Units.
Advanced study of psychological tests and application in the health sciences. Includes review of basic statistics and an introduction to more advanced analyses important to test development and evaluation. Focuses on methods of test development, procedures for evaluating psychometric adequacy, and issues in the use and interpretation of test scores. Prerequisite: STAT 531 or equivalent.

NGRD 688. Nursing Science Seminar. 1 Unit.
Nursing phenomena. Focus varies according to national emphases in nursing research and focus areas of participants. Emphasizes critical examination of conceptual, theoretical, and methodological issues relative to the selective topic. Prerequisite: Doctoral standing or consent of instructor.

NGRD 689. Spiritual Care: Theory, Research and Practice. 4 Units.
Examines spirituality and religiosity in the context of health and illness, and provides or coaches others in providing spiritually sensitive health care. Emphasizes empirical, personal, and ethical sources of knowledge about spirituality and religiosity, using knowledge generated in health care, psychology, anthropology, and other fields.

NGRD 695. Advanced Qualitative Research. 4 Units.
Builds upon NGRD 685 Qualitative Research Methods. Focuses on in-depth exploration of descriptive qualitative methods, including coding, with expansion and application of the method for dissertation design. Prerequisites: NGRD 685.

NGRD 696. Master’s Thesis. 1-5 Units.
Completion of the requirements of the master’s thesis. Prerequisites: NGRD 657; NGRD 658; approval of advisor.

NGRD 697. Dissertation Research. 1-8 Units.
Development, conduct, analysis, and defense of dissertation research. IP may be applied as needed, depending on the progress of the work. Prerequisite: Satisfactory completion of the Comprehensive Examination.

NGRD 699. Guided Study. 1-6 Units.
Opportunity for intensive study in a selected area of nursing, under faculty direction.

**Nutrition (NUTR)**

**Courses**

NUTR 490. Topics in Foods and Food Preparation. 1 Unit.
On-line course provides an introduction to foods and food preparation. Includes relationship of food composition to food preparation, cultural and ethnic food patterns, sensory evaluation of food, and culinary techniques.

NUTR 504. Nutritional Metabolism. 5 Units.
Studies the static and dynamic aspects of the metabolism of carbohydrates, lipids, amino acids, proteins, nucleic acids, enzymes, hormones, vitamins, and minerals in the normal healthy human.

NUTR 509. Public Health Nutrition and Biology. 3 Units.
Introduces the concepts of nutrition and biology as related to public health. Includes life-cycle issues and discussion of major nutrition-related diseases and their prevention. Integrates molecular and biological approaches to public health problems; and addresses the role of nutritional assessment, intervention, and policy to solve public health issues.

NUTR 510. Advanced Public Health Nutrition. 3 Units.
Advances in public health nutrition and the science base for application to the prevention of disease in the community. Includes nutritional guidelines, policies, monitoring systems, efficacious interventions throughout the life cycle, and interactions between genetic and nutritional factors. Prerequisite: NUTR 504 or equivalent.

NUTR 517. Advanced Nutrition I: Carbohydrates and Lipids. 4 Units.
Advanced study of the nutrition, metabolism, and function of carbohydrates and lipids as related to health and disease. Prerequisite: NUTR 504; or biochemistry equivalent; or consent of instructor.

NUTR 518. Advanced Nutrition II: Proteins, Vitamins, and Minerals. 4 Units.
Advanced study of the nutrition, metabolism, and function of proteins, vitamins, and minerals as related to health and disease.

NUTR 519. Phytochemicals. 2 Units.
Discusses the role of phytochemicals in disease prevention and treatment. Reviews current research in this area.

NUTR 525. Nutrition Policy, Programs, and Services. 3 Units.
Develops professional skills in management of nutrition programs. Includes legislative advocacy and analysis of current nutrition programs at local, state, and federal levels. Laboratory.

NUTR 526. Nutrition Counseling and Education. 2 Units.
Counseling skills, specifically counseling one-on-one and groups, in order to facilitate changes in nutrition status. Teaching/learning styles, development of therapeutic relationships with patients/clients, and development of listening skills. Case-study evaluation and development of group education lesson plans. Includes 1 unit of laboratory.

NUTR 527. Assessment of Nutritional Status. 3 Units.
Provides a foundation for understanding how to collect and interpret anthropometric, biochemical, clinical, and dietary data; and for understanding how to use such data in analyzing food and nutrient intake and needs in individuals, groups, and populations of varying health statuses. Includes 1 unit of laboratory.

NUTR 529. Health Aspects of Vegetarian Eating. 3 Units.
Introduces concepts of vegetarian nutrition as related to health and longevity. Addresses nutritional adequacy, as well as the benefits of vegetarian eating related to the prevention of major chronic diseases, such as heart disease, cancer, obesity, diabetes, and osteoporosis. Covers the interplay between the risks and benefits of vegetarian eating.

NUTR 531. Community Nutrition Intervention I. 2 Units.
Provides training and practice identifying/assessing community health issues. Students collaborate with local associations and faculty advisers to analyze a public health issue and evaluate intervention alternatives using an asset-based, problem-solving approach.

NUTR 532. Community Nutrition Intervention II. 1 Unit.
Laboratory focusing on the implementation and evaluation of strategies to address community health issues identified and analyzed in NUTR 531. Service learning course. Prerequisite: NUTR 531.
NUTR 534. Maternal and Child Nutrition. 3 Units.
Advanced study of the role of nutrition in human growth and development during the prenatal period, lactation, infancy, and childhood.

NUTR 535. Research Applications in Nutrition. 3 Units.
Overview of research methods in nutrition. Provides an understanding of foundational issues of research design from both the quantitative and qualitative perspectives, as well as understanding of the sequence of procedures in proposal development. Laboratory included.

NUTR 537. Nutrition Education Practicum. 1 Unit.
Provides experience in evidence-based education in an outpatient setting. Student applies culturally sensitive medical nutrition therapy, counsels individuals and groups, develops patient-education materials, shadows health-care professionals, and engages patients in an integrated health-care setting for 30 hours—providing nutrition resources to staff and patients as needed. May be repeated for additional credit.

NUTR 556. Nutritional Applications in Lifestyle Intervention. 3 Units.
Review of literature on the basic nutrients, protein, fat, carbohydrate, vitamins, minerals, and water. Develops skills to analyze, evaluate, and prescribe dietary intake for weight loss, weight maintenance, and weight gain. Reviews current dietary guidelines and pertinent food components relative to their health effects. Trains in skills, tools, and strategies for effective nutrition education. Practical training in nutritional assessment and education skills for lifestyle interventions.

NUTR 557. Nutrition Care Process for Diabetes and Heart Disease. 2 Units.
Knowledge, application, and practice applying the nutrition care process and terminology in assessing patients with diabetes and heart disease; and developing critical thinking skills in identifying and documenting information available in patients’ medical chart. Includes 1 unit of laboratory.

NUTR 564. Contemporary Issues of Vegetarian Diets. 2 Units.
Introduces scientific and social issues of vegetarian diets. Provides background information on the history and rationale of vegetarianism, as well as data on the health benefits and risks of a vegetarian diet.

NUTR 578. Exercise Nutrition. 3 Units.
Nutritional needs of professional and recreational athletes. The role of macro- and micronutrients and of supplements as ergogenic aids. Presents overview of current research in the areas of exercise nutrition.

NUTR 585. Topics in Global Nutrition. 3 Units.
Discussion of current issues of importance in international nutrition.

NUTR 595. Special Topics in Nutrition. 1-4 Units.
Current topics in nutrition. May be repeated for additional credit.

NUTR 597. Special Topics in Clinical Nutrition. 1-3 Units.
Current topics in clinical nutrition. May be repeated for additional credit.

NUTR 605. Seminar in Nutrition. 1 Unit.
Explores current major issues in nutrition. Students choose and research a topic or problem and discuss their findings in class. Written report required. May be repeated for additional credit. Prerequisite: Five graduate units in nutrition; or consent of instructor.

NUTR 608. Doctoral Seminar in Public Health Nutrition. 1-3 Units.
Enhances skills relative to scientific literature review, critical thinking, scientific discussion with peers, presentation using advanced audiovisual aids, writing review paper and abstract as per peer-reviewed journal requirements. Maximal interaction with faculty, peers, and visiting nutritional professionals. Limited to doctoral degree students in nutrition. May be repeated for additional credit.

NUTR 608A. Scientist Forum. 1 Unit.
Provides a venue for critically appraising the scientific literature and current topics in the field, understanding the ethical principles of being a scientist, professional presentations, interacting with faculty and peers, participating in dissertation proposal and dissertation defense, and IRB training. Students enroll during the Fall, Winter, and Spring quarters of their second year in the doctoral program for a total of 3 units.

NUTR 608B. Scientist Forum. 1 Unit.
Provides a venue for critically appraising the scientific literature and current topics in the field, understanding the ethical principles of being a scientist, professional presentations, interacting with faculty and peers, participating in dissertation proposal and dissertation defense, and IRB training. Prerequisite: NUTR 608A.

NUTR 608C. Scientist Forum. 1 Unit.
Provides a venue for critically appraising the scientific literature and current topics in the field, understanding the ethical principles of being a scientist, professional presentations, interacting with faculty and peers, participating in dissertation proposal and dissertation defense, and IRB training. Prerequisite: NUTR 504, NUTR 518. or equivalent.

NUTR 617. Preventive Nutrition I: Carbohydrates and Lipids. 2 Units.
Critically reviews the current scientific literature to discuss topics surrounding advances in macronutrient (CHO and lipid) metabolism, discusses the role of quantity and quality of carbohydrate and fat in disease prevention, and provides the rationale and science base of its application to practice. Prerequisite: NUTR 504, NUTR 517. or equivalent.

NUTR 618. Preventive Nutrition II: Protein, Vitamins and Minerals. 2 Units.
Advanced study of current knowledge in nutrition and the rationale and science base of its application to practice in the prevention of disorders. Focuses on the role of proteins, vitamins, and minerals. Prerequisite: NUTR 504, NUTR 517, or equivalent.

NUTR 619. Preventive Nutrition III: Phytochemicals. 3 Units.
Critically review of the current scientific literature to discuss topics surrounding advances in phytochemical metabolism and foods and food groups that are phytochemical rich; and to understand their role in disease prevention.

NUTR 620. Advanced Topics in Nutrition. 3 Units.
Lecture and discussion of an advanced topic in nutrition bearing on the theory or practice of one aspect of the discipline. Specific content varies from year to year. May be repeated for additional credit. Topics may include: nutrigenomics and epigenetics, environment and nutrition, microbiome and diet, etc. Limited to doctoral degree students.

NUTR 634. Concepts of Nutritional Epidemiology. 3 Units.
Overview of nutritional epidemiology. Includes: nutritional epidemiology literature; variations in diet; advantages and limitations of diet- assessment techniques; design, development; validation of food-frequency questionnaires; nutrient biomarkers; implications of total energy intake; and, measurement error and correction. Prerequisite: STAT 521 or PHCJ 615; consent of instructor.

NUTR 639. Research Methods in Nutrition. 2 Units.
Introduces students to the research process related to clinical/human nutrition investigation, familiarizing them with the steps to follow as they organize their research in a logical, focused and efficient way. Covers development of a research question, a research plan, and a study design. Gives consideration to subject selection, sample size, and ethical issues. Prerequisite: STAT 521.
NUTR 643. Advanced Applications in Nutritional Epidemiology. 2 Units.
Applies critical thinking to the development of nutritional epidemiology research. Includes: expansion and enhancement of nutrition databases; critical appraisal of self-reported exposure and outcome data; and, access to and exploration of AHS-2 databases. Prerequisite: NUTR 634.

NUTR 664. Vegetarian Nutrition: Person, Population, Planet. 3 Units.
Presents and discusses the scientific and social issues related to vegetarian diets. Provides background information on the history and rationale for vegetarianism, as well as evidence for the health benefits and risks of a vegetarian diet. A forum in which to discuss personal attitudes and lifestyle approaches to vegetarianism. For doctoral students only.

NUTR 678. Advanced Exercise Nutrition. 3 Units.
Discusses current research in the field of exercise nutrition; nutritional needs of professional and recreational athletes; and the role of macro- and micronutrients as ergogenic aids. Requires a presentation and a term paper on a current research topic in exercise nutrition. Limited to doctoral students. Instructor approval required for master's degree students.

NUTR 685. Preliminary Research Experience. 2 Units.
Experience in various aspects of research under the guidance of a faculty member and by participation in an ongoing project. Must be completed prior to beginning dissertation/research project. Limited to doctoral degree students.

NUTR 694. Research. 1-12 Units.
Independent research for doctoral degree candidates and qualified master's degree students on problems currently being studied in the program, or in other program(s) with which they collaborate. Research program arranged with faculty member(s) involved. Minimum of 100 hours required for each unit of credit. Written report required.

NUTR 695. Thesis. 2 Units.
Preparation of report of individual, guided experimental-research study in nutrition, under direct faculty supervision. Limited to graduate students whose thesis project has been approved by their research committee.

NUTR 696. Directed Study/Special Project. 1-4 Units.
Individual arrangements for advanced students to study under the guidance of a program faculty member. May include readings, literature reviews, or other special projects. Minimum of thirty hours required for each unit of credit. A maximum of 4 units applicable to any master's degree program.

NUTR 697. Dissertation Proposal. 1-10 Units.
Doctoral student develops a written dissertation proposal and works in collaboration with the dissertation committee chair on mutually agreed-upon objectives that will provide the basis for evaluation. Culminates in a written and oral dissertation proposal defense and advancement to candidacy. Prerequisite: NUTR 697 and advancement to candidacy.

NUTR 698. Dissertation. 1-14 Units.
Student prepares manuscript presenting results of doctoral research study. Limited to doctoral degree students.

NUTR 799B. Dietetic Practicum. 6 Units.
Assignment to hospital or other school-approved organization where practical application of the materials studied regarding food service and medical nutrition therapy is made under the guidance of department faculty and the organization involved. Intended to meet the dietetic practice hours of the Graduate Coordinated Program in Public Health Nutrition and Dietetics.

NUTR 799D. Dietetic Practicum. 12 Units.
Assignment to hospital or other school-approved organization where practical application of the materials studied regarding food service and medical nutrition therapy is made under the guidance of department faculty and the organization involved. Intended to meet the dietetic practice hours of the Graduate Coordinated Program in Public Health Nutrition and Dietetics.
OCTH 509. Design and Technology. 2 Units.
Introduces a broad spectrum of assistive technologies which address the gap in occupational performance. Examination and assessment of theoretical and societal issues, population and policy trends, scientific advances, environmental constraints, and funding opportunities. Explores principles of universal design and public policy that support engagement in home and community environments.

OCTH 510. Functional Kinesiology. 1 Unit.
Applies anatomical and mechanical fundamentals of human motion to conduct muscle testing and goniometry. Emphasizes upper extremity. AHCJ 510.

OCTH 511. Conditions in Occupational Therapy: Orthopedic. 4 Units.
Common orthopedic and rheumatological disorders, and the implications for participation in occupations across the lifespan. Introduces safety issues surrounding these disorders, as well as the influence of contexts. Prerequisite: AHCJ 510.

OCTH 512. Conditions in Occupational Therapy: Neuroscience. 4 Units.
Reviews common neurological disorders and the implications for participation in occupations across the lifespan. Examines guiding theories and evidence-based practice. Introduces safety issues surrounding these disorders, as well as the influence of contexts. Prerequisite: OCTH 506.

OCTH 514. Conditions in Occupational Therapy: Behavioral Health. 4 Units.
Examines common disorders and guiding theories related to behavioral health and the implications for participation in occupations across the lifespan. Explores roles and how occupations and roles are related, resulting in healthy emotional connections and occupational participation. Discusses safety issues surrounding these disorders, as well as the influence of context.

OCTH 515. Conditions in Occupational Therapy: Infants, Children, Youth. 4 Units.
Reviews common disorders and conditions, along with implications for participation in occupations for infants, children, and youth from individual and family perspectives. Examines guiding theories, evidence-based practice, federal laws, and policies related to these populations. Introduces safety issues surrounding these disorders, as well as the influence of contexts.

OCTH 516. Conditions in Occupational Therapy: General Medicine. 4 Units.
Reviews common general medicine disorders and the implications for participation in occupations across the lifespan in both traditional and nontraditional settings. Examines guiding theories and evidence-based practice. Introduces safety issues and standard protocols surrounding these disorders, as well as the influence of contexts. Prerequisite: OCTH 510.

OCTH 517. Introduction to Physical Agent Modalities. 1 Unit.
Prepares the student for use of physical agent modalities with differential diagnoses in multiple practice settings. Discusses treatment goals and use of physical agent modalities within practice guidelines, assesses common practice techniques, explores regulations and safety, and reviews the process for obtaining advanced practice certification in physical agent modalities.

OCTH 521. Analysis and Intervention I: Orthopedic. 3 Units.
Assesses common orthopedic conditions, including safe transfer techniques; as well as training in the use of adaptive equipment. Treatment planning emphasizes evaluation findings and safety considerations of the client's condition and contexts.

OCTH 522. Analysis and Intervention: Behavioral Health. 3 Units.
Introduces assessments for common behavioral health diagnoses. Emphasizes designing and coordinating occupation-based and client-centered interventions. Demonstrates ability to facilitate groups, and implements de-escalation strategies. Applies wholistic approach in working with clients to promote health and participation in a variety of contexts.

OCTH 523. Analysis and Intervention: Neuroscience. 3 Units.
Introduces assessment of clients with common neurological disorders such as changes in cognitive, visual/perceptual, balance, and coordination skills. Includes conditions' impacts on participation in occupations. Addresses safety and adaptation of tools, techniques, and the environment to client needs. Emphasizes treatment planning based on the synthesis of evaluation findings and safety considerations of clients' conditions and contexts.

OCTH 524. Analysis and Intervention: Infants, Children, Youth. 3 Units.
Introduces analysis and treatment planning for common diagnoses and conditions of infants, children, and youth. Emphasizes design and coordination of evidence-based, client-centered interventions. Design and coordination of groups and family-centered care. Applies wholistic approach in working with clients to promote health and participation in a variety of contexts. Prerequisite: OCTH 502.

OCTH 527. Analysis and Intervention: General Medicine. 3 Units.
Student synthesizes evaluation and assessments to develop intervention plans for clients with general medicine conditions, and to promote participation in occupations. Student demonstrates ability to safely transfer clients and to provide patient and family training; as well as ability to adapt tools, techniques, and environment.

OCTH 530. Sensorimotor. 2 Units.
Includes evidence-based current rehabilitation trends and best practice relevant to adult neurological rehabilitation. Emphasizes sensorimotor approaches to rehabilitation, CIMT, NDT, PNF, Rood, Brunnstrom, and clinical decision making. Integrates neurologic and orthopedic rehabilitation strategies through activities of daily living. Prerequisite: OCTH 506.

OCTH 534. Introduction to Sensory Processing. 2 Units.
Explores sensorimotor theory, assessment, and intervention to enable understanding and implementation of sensory-based therapies. Provides skill sets used by occupational therapy practitioners to promote roles and participation in areas of occupation, such as activities of daily living, play, sleep, and education.

OCTH 544. Advanced Occupational Therapy History. 3 Units.
Provides the student with an extensive understanding of the history of occupational therapy by critically reviewing historical incidents, the history of occupational therapy and societal theories and practices, political conditions, and historical incidents. Facilitates the student's ability to enact advocacy and to better understand future projections in the field.

OCTH 545. Current Trends in Occupational Therapy Practice. 3 Units.
Provides an overview of current trends in the field of occupational therapy and health care. Topics may include issues related to health-care funding, policy, emerging practice areas, and health disparities.

OCTH 551. Occupation and Wellness. 2 Units.
Provides the student with an understanding of the connections among occupation, occupational therapy practice, and wellness by critically investigating research and theoretical perspectives. Leads to a better understanding of the uniqueness of an occupational perspective of health and its relationship to daily living.
OCTH 552. Professional Transition. 3 Units.
Provides the student with an opportunity to explore a variety of topics relevant to transitioning into occupational therapy professional practice. Preparation for national certification examination.

OCTH 560. Occupational Therapy Advocacy and Leadership. 3 Units.
Introduces business for occupational therapy practitioners, including financial statements and budgetary processes, marketing, management, and consultation. Emphasizes the use of strategic planning for decision-making processes of program development, productivity, and accountability. Introduces roles and responsibilities of leadership; and explores standards of practice, supervision, and advocacy options for populations and the profession.

OCTH 570. Critical Inquiry and Evidence-Based Practice I. 1 Unit.
 Defines evidence-based practice (EBP) and its relevance to occupational therapy practice and professional growth. Describes steps to complete EBP and discusses common statistical methods used in occupational therapy research. Includes philosophical approaches to scientific inquiry, range of research designs, roles of variables, and ethics.

OCTH 574. Critical Inquiry and Evidence-Based Practice II. 3 Units.
Student develops and implements a scholarly research proposal by systematically identifying and investigating a problem, issue, or question of relevance to occupational therapy practice. Emphasizes writing skills and critical analysis in preparation of literature review, purpose, conceptual framework, proposed methodology, and data analysis for the Institutional Review Board proposal.

OCTH 575. Critical Inquiry and Evidence-based Practice III. 2 Units.
Student finalizes research proposal and implements a scholarly research project by systematically engaging in data collection, data management, and data analysis. Incorporates research ethics.

OCTH 576. Critical Inquiry and Evidence-based Practice IV. 2 Units.
Student implements a scholarly research proposal by systematically analyzing data relevant to occupational therapy practice. Emphasizes synthesis of findings and writing scholarly paper.

OCTH 598. Occupational Therapy Advanced Specialty Tracks. 1-3 Units.
Presents in-depth practice application in an area of occupational therapy. Opportunity to pursue various topics related to current trends. Develops advanced clinical skills, where appropriate.

OCTH 600. Occupational Science and Health Promotion. 3 Units.
Explores occupational science as an academic discipline and how it supports occupational therapy’s role in health promotion. Utilizes theoretical perspectives and research to analyze and understand occupation’s relationship to lifestyle, health, well-being, and prevention.

OCTH 601. Spirit of Diverse Abilities I. 3 Units.
Examines perspectives in order to view and understand the disability experience and the role of spirituality and occupational justice in practice. Emphasizes theoretical approaches. Discusses role of occupational therapy in social justice.

OCTH 602. Spirit of Diverse Abilities II. 3 Units.
Explores and discusses the experience of disability and occupational injustice. Explores and applies these concepts in relation to the profession of occupational therapy and the greater society. Students explore issues such as homelessness, diversity, disparity, and ethics. Prerequisite: OCTH 601.

OCTH 604. Health, Society, and Participation. 3 Units.
Incorporates health and participation to integrate the individual, community, and greater society. Students engage in grant searching and grant writing. Discusses logic models and program. Emphasizes participatory research; program development; needs assessment; healing environments; social justice issues; global issues; World Health Organization; International Classification of Functioning, Disability and Health; AIDS; culture; and mission work in relation to the profession of occupational therapy.

OCTH 605. Education for Health Professionals. 3 Units.
Explores the philosophical foundations of knowledge and learning theory. Prepares health professionals for the roles and expectations of education in academic and practice settings. Discusses instructional design, media, student assessment, teaching skills, course development, mentoring, and curriculum design.

OCTH 606. Leadership for Health Professionals. 3 Units.
Explores leadership theory, administrative characteristics and strategies, professionalism, team facilitation, clinical reasoning, ethics, and advocacy. Students participate in legislative process and analyze international issues and social justice in relation to professional practice.

OCTH 632. Capstone I: Introduction to Theory & Research. 4 Units.
Introduces theoretical foundations and designs for research. Emphasizes skills necessary to plan and develop an independent research study. Grant-writing instruction for funding of capstone projects. Students design their capstone experience with guidance from the primary course instructor: identification of a focus area, objectives, goals, outcomes, onsite instructor, faculty mentor, and time frame.

OCTH 633. Capstone Proposal: IRB or Program Development. 4 Units.
Reflective discussions of research interests and experiences; and, proposed research design, planning, conceptual framework, methodology, and data analysis as preparation for development and eventual implementation of a research proposal or capstone activity. Focus on Institutional Review Board training and successful proposal submission. Prerequisite: OCTH 631, OCTH 632.

OCTH 634. Capstone II. 3 Units.
Continues the capstone project. Students complete a needs assessment and program development, data collection, data management techniques, and introduction to various data analysis strategies. Individual projects and activities vary.

OCTH 635. Capstone III. 4 Units.
Implements capstone approved in OCTH 634. Critical discussion of experiences and problem solving with classmates.

OCTH 636. Capstone IV. 4 Units.
Completes implementation aspects of capstone. Initiates preparation of a manuscript and participation in online critical discussions with classmates.

OCTH 637. Professional Publication and Dissemination. 4 Units.
A culmination course in which students reflect on their capstone experiences and complete their program development. Students prepare a professional manuscript to be submitted for publication. Critical discussion with peers regarding knowledge transference to impact individuals, society, the profession, and clinical practice. Prerequisite: OCTH 636.

OCTH 699. Directed Study. 2,3 Units.
Student pursues an area of special interest under the direction of the faculty advisor. Topic must be approved by the occupational therapy department.
OCTH 701. Service in Occupational Therapy Practice. 1 Unit.
Includes philosophy of service, learning by experience, reflection, and civic engagement. Provides opportunity for students to apply critical thinking skills, team-based learning, and information learned in didactic course work to collaborate with the community and address client and community needs.

OCTH 702. Service Learning I. 3 Units.
Service learning experiences utilize active learning strategies that involve students in experience, reflection, sustainability, and civic engagement. Emphasizes needs assessment. Encourages collaboration with community partners and addresses the needs of the community through the development of the service learning project. Develops critical thinking and team-based learning skills.

OCTH 703. Service Learning II. 3 Units.
Supervised interactions in service learning experiences utilizing active learning strategies that involve students in experiences to apply the knowledge to practice, and develop understanding of client needs, sustainability, and civic engagement. Encourages collaboration with community partners, and addresses needs of the community through implementation and reflection of the service learning project. Develops critical thinking and team-based learning skills. Prerequisite: OCTH 702.

OCTH 711. Level I Fieldwork. 1 Unit.
Observation and supervised interaction in clinical and/or community-based programs to introduce students to fieldwork experience, apply knowledge to practice, and develop understanding of the needs of clients.

OCTH 712. Level I Fieldwork. 1 Unit.
Observation and supervised interaction in clinical and/or community-based programs to introduce students to fieldwork experience, apply knowledge to practice, and develop understanding of the needs of clients.

OCTH 713. Level I Fieldwork. 2 Units.
Supervised interaction in a school-based setting to allow student to apply knowledge to practice, and to develop understanding of client needs.

OCTH 721. Level II Fieldwork Experience 1. 8 Units.
A twelve-week (forty hours/week) supervised fieldwork experience in clinical and/or community-based programs. Emphasizes assessment, planning, treatment, problem solving, administration, and professionalism. Successful completion necessary before student is eligible to take the certification examination.

OCTH 722. Level II Fieldwork Experience 2. 8 Units.
A twelve-week (forty hours/week) supervised fieldwork experience in clinical and/or community-based programs. Emphasizes assessment, planning, treatment, problem solving, administration, and professionalism. Successful completion necessary before student is eligible to take the certification examination.

Occupational Medicine (OMED)

Courses

OMED 524. Foundations of Occupational Health and Safety. 3 Units.
Overview of fundamental aspects of occupational health and safety, including: occupational epidemiology; risk/hazard assessment, control, and communication; and industrial hygiene, safety, and ergonomics. Prerequisite: Consent of instructor.

OMED 525. Clinical Toxicology, and Occupational Health Disorders. 3 Units.
Overview of general principles and basic concepts toxicology, major mechanisms of toxicity, and responses of various organ systems to toxicants. Includes toxicological principles and management of selected substances and toxic agents, as well as evaluation of validity of toxicological literature.

OMED 526. Occupational Health and Safety Law and Ethics. 4 Units.
Addresses occupational health law and ethical issues necessary to advise effectively across the spectrum of stakeholders. Applies advanced knowledge and skills in understanding and navigating the regulatory framework in managing the health of worker populations. Focuses on advanced epidemiology as applied to acute and chronic disease, surveillance and protection programs, clinical preventive services, and risk/hazard control and communication. Covers reporting and program compliance.

Ophthalmology (OPHM)

Courses

OPHM 891. Ophthalmology Elective. 1.5-27 Units.
Offers fourth-year medical students the opportunity to explore various areas of ophthalmology, including research.

Oral and Maxillofacial Surgery (OMFS)

Courses

OMFS 604. Selected Topics in Oral and Maxillofacial Surgery. 1 Unit.
Covers current topics in oral and maxillofacial surgery, and practice management during weekly seminars and monthly grand rounds by experts in their respective fields.

OMFS 605. Integrated Orthodontic and Surgical Correction of Dentofacial Deformities. 1 Unit.
Addresses preoperative diagnosis, planning, intraoperative procedures, and postoperative care of orthognathic patients. Includes: congenital and developmental deformities; surgical-orthodontics patient management; preoperative skeletal, dental, and soft-tissue analyses; and cephalometric analysis in treatment planning.

OMFS 606. Applied Surgical Anatomy. 1 Unit.
Applies anatomic principles involved in clinical diagnosis and in assessing clinical problem areas. Discusses anatomic consequences of surgical and treatment procedures and the anatomic aspects of emergencies occurring in practice. Emphasizes the vascular supply and innervation of structures of the oral cavity, and adjacent areas of the head and neck.

OMFS 607. Principles of Medical History, Physical Examination, and Clinical Medicine. 2 Units.
Focuses on developing accurate history-taking and physical examination skills. Specific topics include review of organ systems and associated pathology (physical and laboratory), hospital protocol, and charting. Residents perform history and physical (H&P) on medical and surgical patients. Emphasizes proficiency in developing differential diagnoses of common medical and surgical problems.
OMFS 608. Surgical Oral and Maxillofacial Pathology Conference. 0.5 Units.
Uses recent pathology cases as the basis for review and discussion of common and ominous lesions encountered. Emphasizes differential diagnosis and patient management. Guest lecturers cover selected topics in oral and maxillofacial pathology. Repeated registrations required to fulfill the total units.

OMFS 609. Literature Review in Oral and Maxillofacial Surgery. 0.5 Units.
A monthly discussion of recent literature from selected journals. Reviews classic landmark articles and their impact on the specialty. Repeated registrations required to fulfill total units.

OMFS 614. Clinical Experience in Oral and Maxillofacial Surgery Practice. 7 Units.
Addresses oral and maxillofacial surgery with emphasis on dentoalveolar surgery, complicated fractures of the facial bones, resective maxillofacial surgery, surgical orthognathic correction, treatment of developmental and acquired deformities of the jaw, implant surgery, temporomandibular joint surgery, and osseous grafting of postresection and postraumatic maxillofacial defects.

OMFS 615. Current Trends in Medicine and Surgery. 2 Units.
Off-service specialty seminars on a wide range of topics, including anesthesia, internal medicine, ICU care, general surgery, and various specialty topics. Repeated registrations required to fulfill the total units.

OMFS 616. Application of Surgical Principles to Orthognathic Surgery. 1 Unit.
Introductory multidisciplinary lecture-seminar emphasizing preoperative diagnosis, treatment planning, intraoperative procedures, and postoperative care of orthognathic patients; description of congenital and developmental deformities, emphasizing all aspects of surgical orthodontic patient management.

OMFS 617. Critical Decision Making in Oral and Maxillofacial Surgery. 1 Unit.

OMFS 618. Introduction to General Anesthesia. 1 Unit.
Introduces the theory and practice of general anesthesia.

OMFS 696. Scholarly Activity in Oral and Maxillofacial Surgery. 1 Unit.
Selected didactic, clinical, and/or laboratory activity developed by the program director or a designated program faculty member. Primarily designed for residents to fulfill the certificate requirements for scholarly activity/research in oral and maxillofacial surgery. Multiple registrations may be needed to complete these activities.

OMFS 697A. Research. 1 Unit.
Student identifies a research project, prepares a protocol, and obtains approval for the protocol. Multiple registrations may be needed to complete these research activities.

OMFS 697B. Research. 1 Unit.
Conducting the actual research project, including the data collection. Multiple registrations may be needed to complete these research activities.

OMFS 697C. Research. 1 Unit.
Resident completes research project, holds a public presentation of research, and submits a publishable paper to his/her research guidance committee (RGC) for approval. Multiple registrations may be needed to complete the publishable paper.

OMFS 698. Thesis. 1 Unit.

OMFS 805. Oral and Maxillofacial Surgery I. 1 Unit.
Theory of oral surgery. Etiology, diagnosis, and surgical treatment of oral conditions and diseases commonly encountered in general practice. Familiarizes student with fundamental surgical techniques, principles involved in extraction of teeth, and selection and use of equipment.

OMFS 811. Oral and Maxillofacial Surgery II. 2 Units.
Continues preparatory topics for general practice. Surgical complications, management of impacted teeth, odontogenic infections, preprosthetic surgery, introduces maxillofacial trauma, surgical treatment of cysts and tumors, orthognathic surgery.

**Oral Diagnosis, Radiology and Pathology (ODRP)**

**Courses**

**ODRP 311. General and Oral Pathology DH. 5 Units.**
Basic disease processes and selected organ system diseases. Discusses common and important oral mucosal, soft tissue, and jaw lesions. Emphasizes signs for early recognition and differential diagnosis.

**ODRP 501. Principles of Microbiology DN. 4 Units.**
Fundamentals of general and oral microbiology and the principles of infection and treatment supported by current research data. Discusses bacterial, viral, and fungal diseases pathogenic to humans in the context of the immunological basis of the host/pathogen relationship. Emphasizes organisms relevant to dentistry, as well as causative agents of dental disease. Studies and evaluates specific aspects of infection control, sterilization and disinfection, and the significance of dental disease.

**ODRP 701. Radiology I: Clinical Procedures. 1.5 Unit.**
Techniques for producing intraoral and extraoral radiographs and digital images, digital image processing, radiation protection and safety, and infection control. Covers viewing of radiographic and digital images, technique, handling, anatomy, and errors.

**ODRP 725. Patient Assessment and Data Management. 3 Units.**
Introduces students to all portions of the comprehensive oral evaluation—including the patient interview, all parts of the examination, and the use of the problem-oriented record for diagnosis and treatment planning. Includes supervised clinical experience of examination procedures, with fellow students acting as patients.

**ODRP 726. Patient Diagnosis and Treatment Planning. 1.5 Unit.**
Concepts of diagnosis and treatment planning. Introduces procedures used to treat most common dental problems, sequencing of the treatment plan, and use of the disease-control treatment plan and the definitive treatment plan. Case-based, small-group treatment planning exercises.

**ODRP 735. Dental Emergency Diagnosis and Treatment. 1 Unit.**
Diagnosis and management of dental emergencies, including general emergencies, endodontic, pediatric, and prosthodontic emergencies, hard-and soft-tissue trauma, forensic issues, substance abuse, child abuse and dealing with difficult patients.
ODRP 751. General and Systemic Pathology I. 4 Units.
Studies basic disease mechanisms and disease processes, including host responses to pathogens and injury, repair, immune disorders, hemodynamic disorders, neoplasia and genetic disorders. Begins the study of disease processes of the organs and systems with emphasis on epidemiology, etiology and pathogenesis, morphologic and clinical disease manifestations, and major treatment modalities.

ODRP 752. General and Systemic Pathology II. 4 Units.
Continues study of disease processes of the various organs and systems. Emphasizes epidemiology, etiology and pathogenesis, morphologic and clinical disease manifestations, and major treatment modalities. Prerequisite: ODRP 751.

ODRP 755. Radiology II: Theory and Interpretation. 2 Units.

ODRP 756. Radiology III: Oral & Maxillofacial Radiology. 1.5 Unit.
Presents an orderly and sequential approach to the formulation of a radiographic differential diagnosis. Establishes a working diagnosis based on the radiographic findings of patients affected by lesions or conditions involving the teeth, jaws and adjacent oral anatomy. A differential diagnosis is obtained by including or excluding certain lesions or conditions based on their radiographic manifestations and clinical presentation.

ODRP 761. Oral Pathology and Diagnosis. 6 Units.
Studies oral mucosal and soft-tissue lesions, developmental and genetic disorders, jaw lesions, salivary gland disorders, oral manifestations of systemic diseases, and some diseases of the skin and head and neck. Includes epidemiology, etiology and pathogenesis, clinical and/or radiographic features, microscopic features, and management of disease, emphasizing differential diagnosis.

Introduces diagnosis and treatment of temporomandibular joint disorders (TMD). Teaches anatomy, pathology, and diagnostic imaging of the temporomandibular joint. Presents clinical features and mechanisms of masticatory muscle pain, disc disorders, occlusal disorders, and arthritis of the TMJ. Includes patient cases focusing on these disorders. Student learns how to perform an orofacial pain examination and initial treatment for patients with temporomandibular joint disorders.

ODRP 808. Oral Medicine II: Medically Compromised Patient. 2 Units.
Etiology, pathophysiology, clinical presentation, medical management, and dental treatment modifications for patients with medical conditions of the cardiovascular, pulmonary, gastrointestinal, genitourinary, endocrine, immunologic, hematologic, and neurologic systems; as well as psychiatric disorders and infectious and oncologic diseases. Case-based, small-group discussions.

Advanced topics on temporomandibular joint disorders and orofacial pain. Introduces diagnosis and management of acute and chronic orofacial pain conditions, including neuropathic pain, headaches, and comorbid psychiatric disorders. Student learns to recognize, screen, and make appropriate referrals for chronic orofacial pain. Case presentations focus on nonodontogenic pain that presents as tooth pain.

ODRP 821. Special Care Dentistry. 1 Unit.
Instruction in the multidisciplinary medical and dental assessment and management of older adults. Includes clinical experience in a multidisciplinary team setting.

ODRP 826. Oral Medicine IV: Clinical Oral Pathology and Oncology. 2 Units.

Oral Pathology (ORPA)

Courses

ORPA 533. Radiology Topics for Graduate Dental Programs. 2 Units.
Applies principles of radiology to the specialty level. Presents new imaging modalities, as well as methods to create a custom image center for the provider’s needs. Equips provider to evaluate equipment, state laws, and other factors in setting up a modern practice.

Orthodontics (ORDN)

Courses

ORDN 524. Introduction to Graduate Orthodontics. 12 Units.
Lecture course outlining the principles of applied design, the application of forces to produce tooth movement, and the tissue response to such forces. Overview of orthodontics to prepare the student for clinical practice of orthodontics diagnosis and treatment planning, including cephalometrics, growth forecasting, and preparation of visual treatment objectives.

ORDN 524L. Introduction to Graduate Orthodontics Laboratory. 6 Units.
Selected laboratory projects to enhance the didactic portion of the course.

ORDN 525. Materials Science and Mechanics. 2 Units.

ORDN 526. Applied Anatomy. 2 Units.
Fundamentals of anatomy as applied to a special region or application.

ORDN 527. Clinical Photography. 1 Unit.
Clinical proficiency in intraoral and extraoral photography. Discusses and uses photographic equipment and techniques on orthodontic patients. Camera, lens, and flash required.

ORDN 535. Advanced Cephalometrics. 2 Units.
Studies cephalometrics from a historical perspective to the present time, including most of the major analyses.

ORDN 536. Concepts of Physical Anthropology. 2 Units.
Basic and classic concepts of physical anthropology as they relate to orthodontics.

ORDN 545. Growth and Development. 3 Units.
Principles of growth and development from the subcellular to the tissue level. Emphasizes myogenesis and osteogenesis. Prenatal and postnatal development of the face and jaws, including the classic concepts of facial growth. Considers general growth, with the goal of developing ability to recognize abnormal signs, observe variations, diagnose pathological conditions, know the normal, predict height, and use various standards to assess growth and development.
ORDN 546. Fundamentals of Occlusion. 2 Units.
The development of the human face and dentition. A concept of dynamic functioning occlusion.

ORDN 571. Diagnosis and Treatment Planning I. 2 Units.
Student diagnoses and treats assigned patients.

ORDN 574. Diagnosis and Treatment Planning II. 2 Units.
Continues ORDN 571, with follow-up of clinical cases with progress records.

ORDN 584. Current Orthodontics Literature I. 2 Units.
 Presents current papers in various subspecialties of orthodontics.

ORDN 591. Current Orthodontics Literature II. 2 Units.
 Presents current papers in various subspecialties of orthodontics.

ORDN 597. Orthognathic Surgery Theory and Literature Review. 2 Units.
 Presents current papers in various subspecialties of orthodontics, with primary emphasis on surgical orthodontics. Presents cases with various problems requiring surgery.

ORDN 604. Seminar in Orthodontics. 1 Unit.
Critically reviews suggested etiological factors of malocclusion. Problems of diagnosis and the rationale of various treatment philosophies. Liberally uses current literature. Discussion by guest lecturers with demonstrated competence in the field.

ORDN 605. Advanced Seminar in Orthodontics. 1 Unit.
Second-year seminar. Design of clinical diagnosis and practice management. Repeated registrations to fulfill the total units required.

ORDN 606. Craniofacial Genetics. 2 Units.
Basic genetics. Introduces craniofacial clinic.

ORDN 608. Speech, Language, Breathing, and Orofacial Myofunction. 1 Unit.
Studies areas related to speech, language, breathing, and behavior affecting the orofacial complex and occlusion.

ORDN 634. Orthodontics Clinical Conference. 2 Units.
Students prepare and present diagnosis, case analysis, and treatment plan—with primary emphasis on difficult and unusual cases.

ORDN 635. Finishing Mechanics I. 2 Units.
Orthodontic treatment modalities, emphasizing finishing mechanics for the patient.

ORDN 636. Finishing Mechanics II. 1 Unit.
A seminar course created for first-year graduate orthodontic students, exposing them to alternate treatment philosophies and modalities. Guest orthodontists present the main portion of the course and demonstrate their treatment concepts in finishing orthodontic cases.

ORDN 654. Practice Teaching in Orthodontics. 1-4 Units.
Students gain experience in teaching clinical orthodontics to predoctoral dental students. Repeated registrations to fulfill the total units required.

ORDN 655. Temporomandibular Function and Dysfunction. 2 Units.
The temporomandibular joint and dysfunction in health and disease. Diagnosis, treatment planning, and treatment of the temporomandibular joint, emphasizing the integration of orthodontics and temporomandibular joint treatment.

ORDN 657. Orthodontic Board Preparation. 1-6 Units.
Student presents completed orthodontic cases to faculty and other students. Prepares for the American Board of Orthodontics. Repeated registrations required to fulfill the total units required.

ORDN 697A. Research. 1 Unit.
Student identifies a research project, prepares a proposal, and obtains approval for the protocol.

ORDN 697B. Research. 1-4 Units.
Conducting the actual research project, including the data collection. Multiple registrations may be needed to complete these research activities.

ORDN 698. Thesis. 3 Units.

ORDN 725. Clinical Practice in Orthodontics. 7 Units.
Diagnosis and treatment of assigned patients, including adults. Repeated registrations to fulfill the total units/clock hours required.

ORDN 751. Principles of Orthodontics I. 1 Unit.

ORDN 801. Minor Tooth Movement. 2 Units.
Lecture, laboratory demonstration, and clinical exercise prepares students to diagnose and treat limited clinical problems. Applies theory. Minor tooth movement.

ORDN 811. Principles of Orthodontics II. 1 Unit.

Orthopaedic Surgery (ORTH) Courses

ORTH 891. Orthopaedic Surgery Elective. 1.5-27 Units.
Offers fourth-year medical students the opportunity to explore various areas of orthopaedic surgery, including research.

Orthotics and Prosthetics (ORPR) Courses

ORPR 301. Orthotics and Prosthetics Laboratory and Technical Skills. 3 Units.
Introduces the baseline of material and safety practice of orthotics and prosthetics design, fabrication, and repairs. Provides a solid foundational knowledge of the principles and applications of orthotics and prosthetics materials, technologies, designs, and processes associated with the manufacture of custom devices.

ORPR 305. Orthotic Fitting Techniques. 3 Units.
Teaches methods of biometrics, shape capture, and fitting criteria for orthotic devices. Expands knowledge and techniques of applied anatomy in the fitting of orthotic and assistive devices in activities of daily living and patient’s occupational needs.

ORPR 310. Patient Management, Assessment, and Documentation. 3 Units.
Orthotic and prosthetic patient-care models, patient rights, and ethical practice of care. Advanced principles and processes of patient assessment, management, and complete documentation within the context of interprofessional referrals, interactions, and reimbursement as applied both to the in- and outpatient context.

ORPR 315. Pedorthics. 3 Units.
Clinical application of biomechanical interventions of the ankle-foot structure as it refers to walking, medical issues of the foot, and activity levels. Applied anatomical knowledge of the foot and sports medicine within the context of shoes and shoe modifications.
ORPR 320. Biomechanical Evaluation. 3 Units.
Establishes orthotic and prosthetic biomechanical principles and interventions in the context of normal body mechanics and musculoskeletal pathologies. Examines how these interventions serve to maximize healing, manage pain, support movement and function. Encompasses whole body considerations for the kinetic effects, including gait, ADL, occupational and recreational functions.

ORPR 323. Economics, Business Management, and Entrepreneurship. 3 Units.
Establishes principles of economics, financial management, and law as they apply to health-care settings, including: starting a new service, reimbursement, capital and operational budgeting, reading financial statements, and cost-saving measures.

ORPR 325. Medical Terminology. 3 Units.
Language of medicine, including: word construction, word analysis, definitions, and the use of terms related to medical science—specifically to orthotics and prosthetics. Course information organized by body systems. Applies knowledge to documentation, interdisciplinary communication, and medical justification as it applies to orthotic and prosthetic care.

ORPR 330. Lower Extremity Orthotics I. 3 Units.
Studies foot and ankle-foot orthoses—including myoelectric orthoses—from an anatomical design and fabrication perspective. Effects of their application to the body kinematics and kinetic chain. Considerations for specific pathological applications, as well as awareness of implied benefits and risks. Outcome measurements for particular static and dynamic designs.

ORPR 340. Lower Extremity Prosthetics I. 3 Units.
Studies the etiology of amputations below the knee. Considers surgical and immediate postoperative issues as they relate to patient experience, prosthetic outcome, and gait. Looks at prosthetic component selection; socket, interface, and suspension designs in the context of ambulation levels and activities; and specialty applications. Examines skin and tissue physiology, both from a design and end-user perspective. Considers cost and efficiency based on component selection.

ORPR 345. Spinal Orthotics. 3 Units.
Examines spinal anatomy, biomechanics, and pathology. Fabrication, fitting, and application of orthotics following critical and differential diagnoses. Application and proper fitting of halos and cervical, thoraco-lumbar, and lumbar devices. Special consideration of design, plaster casting techniques, and CAD measurements for management of scoliosis. Interpret standard radiographs, measure and interpret spinal deformities, and recommend appropriate orthotic management.

ORPR 402. Pathology I. 3 Units.
Fundamental mechanisms of disease, including cell injury; inflammation, repair, regeneration, and fibrosis; and vascular, cardiac, respiratory, gastrointestinal, hepatobiliary, urinary, reproductive, endocrine, and integumentary pathologies.

ORPR 404. Materials Science in Orthotics and Prosthetics. 3 Units.
Introduces the science of materials found in the body and those used to support the body. Includes the composition of common orthopedic and prosthetics materials. Overview of mathematics, physics, simple and complex movement, anatomy, physiology, and thermodynamics which create a rationale behind material and fabrication choices. Addresses chemical composition, stress-strain curves, fatigueability, and other essential characteristics considered in orthotic and prosthetic design.

ORPR 405. Gait Analysis. 3 Units.
Observation and analysis of normal human locomotion contrasted with pathological gait, and their implications for orthotic and prosthetic interventions and care.

ORPR 410. Orthotic and Prosthetic Clinical Rotation. 1 Unit.
Assigns student to a weekly clinic, department, or specialty—with a focus on familiarization with specific orthotic and prosthetic services. Student reports to his/her cohorts in a once-a-month didactic presentation at the weekly grand rounds, which can include lectures from industry providers on the topic of choice. Site allocation determined by program director; student accountable to quarterly assigned clinical supervisor.

ORPR 414. Kinesiology I. 3 Units.
Introduces advanced kinesiology topics, including movement science dealing with the behavioral basis of motor control and motor learning from an information-processing perspective. Kinesiology from an O&P perspective focusing primarily on the lower limbs, with some introduction to upper limb involvement.

ORPR 415. Lower Extremity Orthotics II. 3 Units.
Advanced study of knee-ankle-foot orthoses, knee orthoses, hip orthoses, reciprocating gait orthoses, and standing frames from an anatomical design and fabrication perspective. Effects of their application to the body kinetic chain. Considers specific pathological applications, including implied benefits and risks. Outcome measurements for particular static and dynamic designs. Introduces CAD/CAM technologies both for image capture and fabrication.

ORPR 420. Lower Extremity Prosthetics II. 3 Units.
Etiology of transfemoral amputations. Surgical and immediate postoperative issues related to patient experience, prosthetic outcome, and potential for gait. Prosthetic component selection, socket interface, and suspension designs addressing amputation levels and activities. Specialty applications. Mechanical, hydraulic, and electronic knee-motion control. Cost and efficiency calculations. CAD/CAM shape capture and fabrication considerations such as mechanical and electronic alignment capture.

ORPR 425. CAD/CAM Technologies. 3 Units.
Applications of CAD/CAM technologies used in clinical practice. Use of most common shape/image capture systems, manipulations, and interfaces with the various central fabrication methods. Includes use of CADs/CAMs in orthotics and prosthetics, including foot orthoses, spinal orthoses, cranial helmets and prosthetic limbs. Data storage and manipulation for use in the fabrication process with technical assistance.

ORPR 430. Upper Extremity Orthotics. 3 Units.
Applies anatomy, kinesiology, and biomechanics to serve specific upper extremity neuromuscular needs. Determines the use of functional and electrically powered orthoses based on differential diagnoses. Examines myoelectric assisted translateral motion rehabilitation. Teaches function, purpose, and building of wrist- and cable-driven orthoses.

ORPR 435. Upper Extremity Prosthetics. 3 Units.
Studies the etiology of upper limb and forequarter amputations. Considers shape capture, socket design, interface, and suspension in the context of cosmetic, body-powered, and myoelectric functional prostheses. Includes special needs adaptations for occupational and sports situations. Give attention to the distinctions of functionality, efficacy, and cost. Studies the bionic arm and hand and the computer training that goes with this particular technology.
ORPR 439. Computers and Electronics for O&P Clinicians. 3 Units.
Basic theory of electricity, transistors, computer circuits, and computer programming. Discusses electrons, structure of the atom, resistance, capacitance, Ohm’s law, and basic transistor theory. Windows programming. Includes laboratories and three programming assignments.

ORPR 440. Bionics and Cyborg Technology. 3 Units.
Examines emerging bionic technologies aimed at merging man with machine. Includes competencies and promotion of these devices in the context of scientific research and potential patient applications. Examines bionic control systems’ embedded software development and associated function. Topics include proficiency in the implementation of cybernetic feedback systems in ortho-prosthetic devices.

ORPR 491. Research I. 1.5 Unit.
Introduces the scientific method in health science research. Focuses on problem identification, literature review, conceptual framework, identification of variables, statement of hypothesis, experimental design, and analysis and presentation of data. Includes critical evaluation of research literature. Applies the research process to problems in allied health fields, development of a research proposal, pilot testing, testing and data forms, and research implementation in a practice setting. Prerequisite: AHCJ 471, AHCJ 472.

ORPR 505. Current Issues in Orthotics and Prosthetics. 3 Units.
Reviews and discusses concerns and current advances relating to orthotics and prosthetics, e.g., legislation, regulations, education, professional organization, interdisciplinary patient care, and reimbursement issues.

ORPR 506. Advanced Specialty Tracks in Orthotics and Prosthetics. 3 Units.
Presents the newest clinical treatment applications over the spectrum of the patient population in the field of orthotics and prosthetics.

ORPR 510. Advanced Clinical Rotations. 1 Unit.
Clinical experience focusing on familiarization with specific orthotic and prosthetic services. Supervised experience providing comprehensive orthotic and prosthetic clinical care. Opportunities to report in clinical, professional, and private sector settings.

ORPR 514. Clinical Affiliation. 8 Units.
Establishes a clinical affiliation with a facility that complies with ENCOPE residency standards and that has been approved by the Professional Development Committee and the EL-MSOP locally assigned site supervisor. Student completes the 500 clinical contact hours required for graduation.

ORPR 515. Topics in Orthotics and Prosthetics. 1-6 Units.
Lecture and discussion related to the practice of orthotics and prosthetics. Content varies from quarter to quarter. (May be repeated for additional credit for a maximum 6 quarter units.)

ORPR 518. Kinesiology II. 3 Units.
Examines the mechanical basis of movement in relation to length of muscles, tension developed by muscles under various conditions, anatomical arrangement of the origin and insertion of bones and joints, and biomechanics of complex movement, such as gait and balance. Uses physics principles to explain the mechanics of movement. Topics include linear movement, rotational movement, work and energy, muscle-length tension relationships, single and multiple joint biomechanics, and gait and balance.

ORPR 522. Self-Care Portfolio and Community Outreach. .5 Units.
Inventory of self-care and process to accomplish it. Puts self-care in the context of life-long learning, relational responsibility, and social justice. Applies principles of effective community leadership engagement, locally and globally.

ORPR 526. Prosthetics III. 3 Units.
Focuses on upper and lower limb amputations and prosthetics. Etiology of hip and transscaporectomy amputations, surgical and immediate postoperative issues related to patient experience, prosthesis outcome, and potential for gait. Includes care of the extreme sports amputee, socket interface, suspension designs, skin and tissue physiology, and mechanical and hydraulic knee-motion control. Introduces CAD/CAM shape capture, and fabrication considering mechanical and electronic alignment capture.

ORPR 527. Orthotics III. 3 Units.
Examines the mechanical basis of movement in relation to length of muscles, tension developed by muscles under various conditions, anatomical arrangement of the origin and insertion of bones and joints, and biomechanics of complex movement, such as gait and balance. Uses physics principles to explain the mechanics of movement. Topics include linear movement, rotational movement, work and energy, muscle-length tension relationships, single and multiple joint biomechanics, and gait and balance.

ORPR 528. Rehabilitation in Developing Nations. 3 Units.
Examines the physical rehabilitation state of affairs in developing nations. Outlines specific challenges with rehabilitation delivery from logistics, materials, and cost perspectives. Points out alternative methods to maximize rehabilitation with minimal cost.

ORPR 534. Applied Functional Neuroanatomy. 3 Units.
Evidence-based coverage of the applied functional neuroanatomy of several common adult progressive and nonprogressive neurological diseases. Emphasizes motor control, stroke, traumatic brain injury, spinal cord injury, multiple sclerosis, Parkinson’s disease, Guillain-Barre syndrome, amyotrophic lateral sclerosis, and vestibular pathology. Includes literature review, lecture, discussion, and laboratory sessions.

ORPR 575. Couples, Families, and Disabilities. 3 Units.
Examines the effects disabilities have on couples and family systems, and contributions family members make to the rehabilitation process of individuals with disabilities. Looks at discourse patterns taking place within a person with a disability, within the person’s family and social support system, and among the individual, family, and medical and rehabilitation providers. Addresses the issues of human sexuality, reproduction, and disability.

ORPR 592. Research II. 1.5 Unit.
Guides and equips students as they work toward completion of their capstone research thesis, which is presented at the annual Capstone Research Day. Includes data-collection review and completion, APA-style formatting rules, data analysis with application of appropriate statistics, graphing, write up of discussion and results.
ORPR 593. Research Ill. 3 Units.
Culminates all research-track courses in a project comprising a master's degree thesis, a research paper, a presentation, and a poster. Includes data analysis and statistical interpretation.

Otolaryngology (OTOL)

Courses
OTOL 891. Otolaryngology Elective. 1.5-27 Units.
Offers fourth-year medical students the opportunity to explore various areas of otolaryngology, including research.

Pathology (PATH)

Courses
PATH 501. Anatomy and Pathology I. 4 Units.
A systems-based approach to the study of human anatomy utilizing cadaver dissection, relating gross and microscopic anatomy and associated pathologies.

PATH 502. Anatomy and Pathology II. 4 Units.
A systems-based approach to the study of human anatomy utilizing cadaver dissection, relating gross and microscopic anatomy and associated pathologies.

PATH 517. Human Systemic Pathology. 9.5 Units.
Application of basic science principles to patient care. Introduction to important diseases and anomalies of each human organ system and their impacts on patients. Emphasizes etiologies, pathogeneses, microscopic and macroscopic morphologic features, pathophysiologies, biologic behaviors, and relevant laboratory findings. Addresses analytical thinking, productive skills of cooperation among team members, and appropriate use of laboratory testing.

PATH 521. Anatomical Techniques I. 3 Units.
Designed specifically for pathologists' assistant students. Comprehensive coverage of surgical and autopsy pathology techniques. Incorporates histology and medical terminology, including clinical and pathologic correlations.

PATH 522. Anatomical Techniques II. 3 Units.
Designed specifically for pathologists' assistant students. Comprehensive coverage of surgical and autopsy pathology techniques. Incorporates histology and medical terminology, including clinical and pathologic correlations.

PATH 524. Clinical Microbiology for Pathologists' Assistants. 3 Units.
Studies of pathologically pertinent microbes and pathogenic mechanisms; overview of methods of identification and antibiotic sensitivities.

PATH 551. Disease Mechanisms I. 3 Units.
Comprehensive study of mechanisms of disease and clinical correlations, based on Robbins’ Pathologic Basis of Disease.

PATH 552. Disease Mechanisms II. 3 Units.
Builds on the basic courses in the pathologists’ assistant curriculum. Requires students to use critical-thinking skills in the participatory discussion sessions. Prepares students for clinical practicum experiences.

PATH 564. Biomedical Photography. 1 Unit.
Investigates the use of digital cameras, scanners, Adobe®, photomicrography, and macrophotography. Examines fundamental processes applied in digital photography to a wide range of specimen types.

PATH 581. Basic Pathologic Microanatomy. 2 Units.
Designed specifically for pathologists’ assistant students. Covers normal microanatomy, including clinical correlations and grossing techniques. Lectures enhanced by multihead microscopy sessions.

PATH 582. Advanced Microanatomy. 2 Units.
Designed specifically for pathologists’ assistant students. Covers disease states in microanatomy, including clinical correlations. Lectures enhanced by multihead microscopy sessions.

PATH 598. Clinical Laboratory Management. 2 Units.
Laboratory organization and examination of principles and practices of laboratory management.

PATH 599. Directed Study. 1.5-18 Units.
PATH 644. Clinical Pathology Seminar. 2 Units.
Provides pathologists' assistant students with an overview of clinical pathology, relating clinical testing to disease processes.

PATH 741. Pathology Review I. 2 Units.
An intense review of clinical and anatomical pathology theory with assigned presentations and clinical cases.

PATH 742. Pathology Review II. 2 Units.
An intense review of clinical and anatomical pathology theory with assigned presentations and clinical cases.

PATH 743. Pathology Review III. 2 Units.
An intense review of clinical and anatomical pathology theory with assigned presentations and clinical cases.

PATH 744. Pathology Review IV. 2 Units.
An intense review of clinical and anatomical pathology theory with assigned presentations and clinical cases.

PATH 761. Pathologists’ Assistant Practicum I. 9 Units.
Rotations in surgical and autopsy pathology to include forensics and pediatrics in a variety of clinical settings, such as academic health centers, community hospitals, and private laboratories.

PATH 762. Pathologists’ Assistant Practicum II. 9 Units.
Rotations in surgical and autopsy pathology to include forensics and pediatrics in a variety of clinical settings, such as academic health centers, community hospitals, and private laboratories.

PATH 763. Pathologists’ Assistant Practicum III. 9 Units.
Rotations in surgical and autopsy pathology to include forensics and pediatrics in a variety of clinical settings, such as academic health centers, community hospitals, and private laboratories.

PATH 764. Pathologists’ Assistant Practicum IV. 9 Units.
Rotations in surgical and autopsy pathology to include forensics and pediatrics in a variety of clinical settings, such as academic health centers, community hospitals, and private laboratories.

PATH 891. Pathology Elective. 1.5-27 Units.
Offers fourth-year medical students the opportunity to explore various areas of pathology, including but not limited to hematopathology, molecular embryopathy, and research.

Public Health Core (PCOR)
Courses

PCOR 501. Public Health for Community Resilience. 5 Units.
Provides an integrated public health core experience focusing on the health of communities and leading to community engagement. Introduces service learning. Major focus areas include biostatistics, health policy and management, environmental health sciences, epidemiology, and social behavioral sciences (health education). Also includes general public health principles and cross-cutting content as viewed through the lenses of faith, health equity, and global health.

PCOR 502. Public Health for a Healthy Lifestyle. 5 Units.
Provides an integrated public health core experience focusing on the health of individuals, identifying factors influencing behavioral and physical health. Introduces service learning. Major focus areas include biostatistics, health policy and management, environmental health sciences, epidemiology, and social behavioral sciences (health education). Also includes general public health principles and cross-cutting content as viewed through the lenses of faith, health equity, and global health. Prerequisite: PCOR 501.

PCOR 503. Public Health and Health Systems. 5 Units.
Provides an integrated public health core experience focusing on health systems. Includes policy and advocacy for health issues, as well as structure and function of health systems. Major focus areas include biostatistics, health policy and management, environmental health sciences, epidemiology, and social behavioral sciences (health education). Also includes general public health principles and cross-cutting content as viewed through the lenses of faith, health equity, and global health.

Pediatric Dentistry (PEDN)

Courses

PEDN 503. Pediatric Dental Seminar. 2 Units.
Selected clinical topics in pediatric dentistry. Requires repeated registrations to fulfill total units.

PEDN 508. Pediatric Hospital Dentistry Seminar. 2-4 Units.
Hospital protocol and the care of patients in a hospital environment.

PEDN 512. Oral Sedation Seminar. 2 Units.
Pharmacology, medical considerations, clinical applications, and protocols for oral sedation.

PEDN 521. Principles of Medicine and Physical Diagnosis. 2 Units.
Medical and physical diagnosis for the pediatric dental patient.

PEDN 524. Introduction to Orthodontics. 2 Units.
Diagnosis and treatment planning for clinical orthodontics.

PEDN 524L. Introduction to Orthodontics Laboratory. 1,2 Unit.
Fabrication of various orthodontic appliances.

PEDN 604. Pediatric Dental Literature. 2-12 Units.
Pediatric dental literature study, including literature found on the reading list of the American Board of Pediatric Dentistry. Repeated registrations required to fulfill the total units.

PEDN 654. Practice Teaching for Pediatric Dentistry. 1-5 Units.
Student gains experience teaching pediatric dentistry in clinical and laboratory settings. Repeated registrations required to fulfill the total units.

PEDN 680. Elective Study for Advanced Education Students of Pediatric Dentistry. 1-10 Units.
Topics selected by students in the advanced education program in pediatric dentistry and by department faculty. Repeated registrations required to fulfill the total units.

PEDN 696. Scholarly Activity in Pediatric Dentistry. 1 Unit.
Selected didactic, clinical, and/or laboratory activity developed by the program director or a designated program faculty member. Primarily designed for residents to fulfill the certificate requirements for scholarly activity/research in pediatric dentistry. Multiple registrations may be needed to complete these activities.

PEDN 697A. Research. 1 Unit.
Student identifies a research project, prepares a protocol, and obtains approval for the protocol. Multiple registrations may be needed to complete these research activities.

PEDN 697B. Research. 1 Unit.
Conducting the actual research project, including the data collection. Multiple registrations may be needed to complete these research activities.

PEDN 697C. Research. 1 Unit.
Resident completes research project, holds a public presentation of research, and submits a publishable paper to his/her research guidance committee (RGC) for approval. Multiple registrations may be needed to complete the publishable paper.

PEDN 698. Thesis. 1-3 Units.
Required for M.S.-degree track.

PEDN 725. Pediatric Dental Clinic. 8 Units.
Clinical pediatric dental experience in both the outpatient and inpatient settings for patients with a variety of clinical needs and problems. Repeated registrations required to fulfill total units.

PEDN 753. Pediatric Dentistry I Lecture. 2 Units.

PEDN 753L. Pediatric Dentistry I Laboratory. 1 Unit.
Technique course to accompany PEDN 753. Students perform operative procedures for amalgam and composite resin on simulated primary and young permanent teeth. In addition, students perform pulpotomies on primary molar teeth and prepare primary teeth for stainless steel, open-faced stainless steel, and resin crowns. Unilateral and bilateral space maintainers are fabricated.

PEDN 821. Pediatric Dentistry II. 1 Unit.

PEDN 825. Pediatric Dentistry Clinic. 3.5 Units.
Dental care of children in their primary, mixed, and young permanent dentition. Etiology of disease, prevention of oral disease, growth and development analysis, treatment planning, restorative procedures, and arch length control.
PEDN 875. Pediatric Dentistry Clinic. 3 Units.
Continuing dental care of children in their primary, mixed, and young permanent dentition. Etiology of disease, prevention of oral disease, growth and development analysis, treatment planning, restorative procedures, and arch length control.

Pediatrics (Peds)
Courses
Peds 599. Pediatrics Directed Study. 1.5-18 Units.
Peds 701. Pediatrics Clerkship. 1.5-12 Units.
Applies growth and development across age groups to the clinical setting. Includes: history-taking and interpersonal skills for patient and family interactions; diagnosis and management of acute and chronic illnesses; and, approaches to preventive health care. Addresses well-child care; abnormal growth patterns; and, obesity, developmental delays, acute upper respiratory infections, lower respiratory tract infections, diarrhea, rashes, dehydration, and fever in children.
Peds 821. Pediatrics Subinternship. 1.5-6 Units.
Experience in independently collecting patient histories, performing physical examinations, and formulating differential and primary diagnoses. Includes: identifying the reason for admission, selection of diagnostic testing based on the chief complaint, providing a family-centered approach to patient care, and identifying the need for immediate supervising physician involvement.
Peds 822. Pediatrics Intensive Care. 1.5-6 Units.
Addresses history taking in patients who are critically ill or unable to communicate, recognition of relevant physical examination findings, management of critically ill patients, interactions with family members, documentation of the admission H&P or daily progress notes, and preparation of orders. Presents criteria for continued ICU admission or transfer.
Peds 891. Pediatrics Elective. 1.5-27 Units.
Offers fourth-year medical students the opportunity to explore various areas of pediatrics, including but not limited to inpatient and outpatient care, endocrinology, rheumatology, neurology, oncology, and research.

Periodontics (PERI)
Courses
PERI 524. The Periodontium. 2 Units.
Reviews literature concerning the anatomy (macro-, micro-, and ultrastructural) and the physiology of the periodontium.
PERI 531. Periodontal Pathology. 2 Units.
Reviews literature that forms the basis for current concepts of the etiology and pathogenesis of periodontal diseases. Repeated registrations required to fulfill the total units.
PERI 601. Periodontal Therapy. 2 Units.
Reviews literature that forms the basis for current concepts of the treatment of periodontal diseases. Repeated registrations required to fulfill the total units.
PERI 604. Current Periodontal and Implant Literature. 2 Units.
Reviews most recent issues of periodontal and implant scientific journals. Repeated registrations required to fulfill the total units.
PERI 605. Implant Literature Review. 2 Units.
Reviews literature providing the basis for implant surgery, as well as concepts for implant restoration. Repeated registrations required to fulfill the total units.

PERI 608. Dental Specialty Practice Management. 2 Units.
Assists graduate students with transition from school to private practice. Includes practical discussion of and guidance relevant to such considerations as staff, insurance, banking, referral communications, and legal aspects of dentistry. Students required to bring in articles on practice management and to present a business plan for their first few years in practice.
PERI 611. Introduction to Periodontics. 2 Units.
Overview of the clinical science of periodontics, including epidemiology, etiology, therapy, clinical methods, and record keeping.
PERI 614. Implant Treatment Planning. 2 Units.
Limited to residents enrolled in two disciplines (i.e., advanced education in periodontics and implant surgery, and advanced prosthodontics). Residents required to present cases that involve mutual interests. Repeated registrations required to fulfill the total units.
PERI 624. Moderate Sedation in Periodontics. 4 Units.
Addresses administration of moderate, intravenous sedation as preparation to meet or exceed requirements for certification by the California Board of Dentistry. Meets requirements for accreditation by the Commission on Dental Accreditation of the American Dental Association.
PERI 634. Clinical Conference. 1,2 Unit.
Case management conference to assist the student in diagnosis, treatment planning, and the management of periodontal diseases and implant surgery. Repeated registrations required to fulfill the total units.
PERI 654. Practice Teaching in Periodontics. 1 Unit.
Experience in teaching the predoctoral dentistry student. Repeated registrations required to fulfill the total units.
PERI 696. Scholarly Activity in Periodontics. 1 Unit.
Selected didactic, clinical, and/or laboratory activity developed by the program director or a designated program faculty member. Primarily designed for students to fulfill the certificate requirements for scholarly activity/research in periodontics. Multiple registrations may be needed to complete these activities.
PERI 697A. Research. 1 Unit.
Student identifies a research project, prepares a protocol, and obtains approval for the protocol. Multiple registrations may be needed to complete these research activities.
PERI 697B. Research. 1 Unit.
Conducting the actual research project, including the data collection. Multiple registrations may be needed to complete these research activities.
PERI 697C. Research. 1 Unit.
Student completes research project, holds a public presentation of research, and submits a publishable paper to his/her research guidance committee (RGC) for approval. Multiple registrations may be needed to complete the publishable paper.
PERI 698. Thesis. 1 Unit.
PERI 705. Fundamentals of Periodontics I. 2 Units.
PERI 706. Fundamentals of Periodontal Surgery—Techniques and Instrumentation. 2 Units.
Introduces rationale, fundamental techniques, and instrumentation of periodontal surgery. Close seminar and clinic instruction and direct “one-on-one” teaching and learning of the salient aspects of periodontal surgery, using patients receiving treatment.

PERI 725. Clinical Practice in Periodontics. 1-6 Units.
Clinical experience in the diagnosis and treatment of periodontal diseases. Repeated registrations to fulfill the total units/clock hours required.

PERI 726. Clinical Practice in Implant Surgery. 2 Units.
Clinical experience in the diagnosis and treatment regarding implant surgery. A minimum of sixty clock hours per quarter (twelve quarters) required to fulfill total units.

PERI 741. Fundamentals of Periodontics II. 2 Units.
Reviews chronic periodontitis, aggressive periodontitis, necrotizing periodontal diseases, and periodontitis as manifestations of systemic disease. Reviews developmental or acquired deformities and conditions such as mucogingival deformities and occlusal trauma. Reviews clinical evaluation and introduces the diagnostic and treatment-planning process. Discusses the interactions among periodontics and other dental disciplines.

PERI 742. Essential Periodontal Therapy Laboratory. 4 Units.
Laboratory exercises in the proper implementation of basic periodontal therapy, such as oral hygiene instruction, periodontal charting and examination, periodontal instrumentation using curettes, scalers (both hand and ultrasonic), the sharpening of instruments; culminates in a partner prophlaxis. Prerequisite: PERI 705.

PERI 765. Essential Periodontal Therapy. 2 Units.
Focuses on nonsurgical periodontal therapy—including self-performed plaque control, scaling, root-planing, periodontal maintenance, local antimicrobial agents, systemic antibiotics, and host reponse modulation. Utilizes interactive teaching, student-directed inquiry; and introduces evidence-based decision making in the management of periodontitis patients.

PERI 805. Periodontal Surgical Therapy. 1 Unit.

Pharmaceutical Sciences (RXPS)

Courses
RXPS 511. Pharmaceutics I. 2 Units.
The first in a series of three courses that presents the physicochemical and biological factors affecting the stability, kinetics, bioavailability, and bioequivalence of drugs in dosage forms. Applies this knowledge to dosage form design, formulation, and drug-delivery systems. Focuses on the theory, technology, formulation, evaluation, and dispensing of solid, semisolid, and liquid dosage forms. Laboratory sessions involve students in the preparation and evaluation of dosage forms.

RXPS 512. Pharmaceutics II. 4 Units.
Surveys conventional dosage forms—including oral, topical, and parenteral medications—with emphasis on formulation, preparation, and effectiveness. Continues RXPS 511.

RXPS 513. Pharmaceutics III. 3 Units.
Studies the mathematical, physicochemical, and biological principles concerned with the formulation, preparation, and effectiveness of pharmaceutical dosage forms. Continues RXPS 512. Prerequisite: RXPS 512.

RXPS 515. Pharmaceutics Laboratory I. 0.5 Units.
Laboratory designed for the student to apply pharmaceutical principles and to develop proficiency when compounding selected formulations and employing aseptic techniques. Prerequisite: RXPS 511. Corequisite: RXPS 512.

RXPS 516. Pharmaceutics Laboratory II. 0.5 Units.
Continues RXPS 515.

RXPS 524. Physiology I. 4 Units.
The first in a sequence of three courses. Covers the nervous, endocrine, and urinary systems. Focuses on physiological processes required for maintenance of whole-body homeostasis. Presentation of anatomical relationships and structures serves to support the physiological topics discussed. Emphasizes targets for pharmaceutical intervention and the relationship between biochemical processes and drug metabolism and action.

RXPS 525. Physiology II. 3 Units.
The second in a sequence of three courses. Covers the gastrointestinal, cardiovascular, and respiratory systems. Focuses on the physiological processes required for maintenance of whole-body homeostasis. Presentation of anatomical relationships and structures serves to support the physiological topics discussed. Emphasizes targets for pharmaceutical intervention and the relationship between biochemical processes and drug metabolism and action.

RXPS 580. Immunology. 2 Units.
Introduces core concepts of the immune system's function and its application to immunotherapy. Includes overview of the cells and organs of the immune system, the innate and adaptive immune systems, immunopathologies and their application to immunotherapy.

RXPS 581. Biochemistry I. 3 Units.
The first in a two-part series that addresses the structure-function relationships of major biomolecules; enzymes in biochemistry; human energy metabolism; and major pathways for human protein, carbohydrate, and lipid metabolism. Discusses important organic functional groups, nomenclature and physical properties, characteristic reactions, stereochemistry, and acid-base properties that are important considerations for drug action. Emphasizes principles of biochemistry as they relate to pH and buffers; hemostasis; enzyme functions; regulation of intermediary metabolism; chemical signaling; and interconversions in the living system, including the role of vitamins, hormones, and enzyme inhibitors. Discusses biotechnological advances, when appropriate.

RXPS 582. Biochemistry II. 3 Units.
The second in a two-part series that addresses the structure-function relationships of major biomolecules; enzymes in biochemistry; human energy metabolism; and major pathways for human protein, carbohydrate, and lipid metabolism. Discusses important organic functional groups, nomenclature and physical properties, characteristic reactions, stereochemistry, and acid-base properties that are important considerations for drug action. Emphasizes principles of biochemistry as they relate to pH and buffers; hemostasis; enzyme functions; regulation of intermediary metabolism; chemical signaling; and interconversions in the living system, including the role of vitamins, hormones, and enzyme inhibitors. Discusses biotechnological advances, when appropriate.
RXPS 584. Biochemistry. 4 Units.
Covers foundations of biochemistry and pharmacology; enzyme function and regulation; regulation of gene expression; principles of pharmacogenomics; and carbohydrate, lipid, and amino acid metabolism. Prepares students to apply the concepts learned to aspects of pharmaceutical care designed to improve health outcomes for patients.

RXPS 610. Pharmacokinetics. 4 Units.
Teaches the basic principles of absorption, distribution, metabolism, and elimination of drugs from the body. Focuses on physical, physiological, and biochemical factors that impact these processes. Includes clinical pharmacokinetics principles and practical examples in the recitation periods. Prerequisite: Successful completion of all P1-level courses and P2; Autumn Quarter standing.

RXPS 615. Learning and Memory. 2 Units.
Introduces students to evidence-based, effective strategies to optimize learning and memory. Develops active learners with lifelong learning skills to promote success not only in school but also in the workplace.

RXPS 616. Neuropsychopharmacology. 3 Units.
Fundamentals of neuropsychopharmacology, including the functional organization of the brain, and the physiology and biochemistry of major neurotransmitters. Examines how medications and drugs of abuse affect the brain and alter behavior. Discusses common brain disorders with a focus on the mechanisms of action of drugs used for treatment.

RXPS 617. Natural Products in Current Therapeutics. 2 Units.
A journal club-style course in which students lead the discussion and dialogue. Explores specific cases of natural product-derived therapeutics from the history of discovery, synthesis, and biological activity to drug development and marketing. Students perform literature searches, read and summarize journal articles, present summaries of multiple articles on a similar topic, and prepare topical presentations for the class.

RXPS 619. Nutrition and Culinary Arts. 2 Units.
Develops basic nutrition and culinary arts skills for patient care. Addresses disease reversal, lifestyle-change programs, lifestyle medicine, culinary medicine, culinary prescription, and the whole-food plant-based diets. Includes: chronic disease classification, disease reversal research, label reading, portion size, nutrient comparisons, budgeted meal planning, and community health strategies.

RXPS 630. Biochemical Aspects of the Obesity and Metabolic Syndrome. 2 Units.
Explores biochemical factors related to obesity. Emphasizes the impact of these factors on currently available pharmacotherapeutic options and development of new therapies. Focuses on the role of pharmacist-guided lifestyle interventions on the treatment of obesity and metabolic syndrome.

RXPS 651. Principles of Medicinal Chemistry I. 3 Units.
The first in a three-course sequence that focuses on the chemistry of drug entities. Effects of a drug’s chemistry on its various properties, such as pharmacology, toxicology, absorption, distribution, metabolism, excretion, mechanism of action, drug-drug interactions, dosage form formulation(s), stability, cost, and use.

RXPS 652. Principles of Medicinal Chemistry II. 4 Units.
The second in a three-course sequence that focuses on the chemistry of drug entities. Effects of a drug’s chemistry on its various properties, such as pharmacology, toxicology, absorption, distribution, metabolism, excretion, mechanism of action, drug-drug interactions, dosage form formulation(s), stability, cost, and use. Prerequisite: RXPS 651.

RXPS 653. Principles of Medicinal Chemistry III. 3 Units.
The third in a three-course sequence that focuses on the chemistry of drug entities. Effects of a drug’s chemistry on its various properties, such as pharmacology, toxicology, absorption, distribution, metabolism, excretion, mechanism of action, drug-drug interactions, dosage form formulation(s), stability, cost, and use. Prerequisite: RXPS 652.

RXPS 661. Medicinal Chemistry and Pharmacology I. 5 Units.
First of two courses covering the chemical and pharmacological aspects of pharmacotherapeutic agents. Reviews organic functional groups and heterocycles, introductory principles of medicinal chemistry, drug absorption and metabolism, cholinergic and adrenergic drugs, respiratory agents, aspects of men’s and women’s health, antihyperlipoproteinemia, diabetes, cardiac health, analgesics and anti-inflammatory medications.

RXPS 662. Medicinal Chemistry and Pharmacology II. 5 Units.
Second of a two-course sequence covering the chemical and pharmacological aspects of pharmacotherapeutic agents. Topic areas include antidepressants, anxiolytics, antipsychotics and other related CNS topics, cancer chemotherapy, autoimmune disorders, antibiotics, antiviral medications, and antifungal medications. Prerequisite: RXPS 661.

RXPS 710. Dietary Supplements. 2 Units.
Introduces the use of herbs and other supplements in patient health. Topics include key regulatory and practical concerns; resources for supplement information; and evidence-based use and adverse effects of commonly used supplements for CNS, digestive, reproductive, immune, fitness, and other conditions.

RXPS 719. Nutrition and Metabolic Syndrome. 2 Units.
Introduces the role of nutrition, including dietary supplements, in patient health. Topics include the basics of nutrition and nutritional adequacy; vegetarian diets, including the Adventist Health Study; and nutritional considerations related to metabolic syndrome.

RXPS 730. Current Topics in Medicinal Chemistry and Drug Design. 1 Unit.
Focuses on discovery and design of new drugs for new therapeutic targets, and on development of new approaches for treatment of diseases.

RXPS 782. Special Topics in Pharmaceutical Sciences. 1-4 Units.
Lecture and discussion on a current topic in pharmaceutical sciences. May be repeated for a maximum of 6 units.

RXPS 783. Special Topics in Pharmaceutical Sciences. 1-4 Units.
Lecture and discussion on a current topic in pharmaceutical sciences. May be repeated for a maximum of 6 units.

RXPS 784. Special Topics in Pharmaceutical Sciences. 1-4 Units.
Lecture and discussion on a current topic in pharmaceutical sciences. May be repeated for a maximum of 6 units.

Pharmacology (PHRM)

Courses

PHRM 501. Pharmacology and Therapeutics SD. 4 Units.
Principles of drug action; drug receptors, absorption and fate of drugs, drug toxicity, and drug development. Systematically considers the pharmacology and clinical applications of the major drugs used by dental patients. Simulations illustrating the effects of drugs in animals and man.

PHRM 503. Clinical Pharmacology in Dentistry. 2 Units.
Review of medications used for the treatment of common medical disorders, and their effect on the management of the dental patient—including the use of local anesthetics, antibiotics, and analgesics.
PHRM 515. Medical Pharmacology. 6 Units.
Applies basic sciences to the selection of optimal pharmacologic and nonpharmacologic therapies. Introduction to fundamental principles of pharmacology, including pharmacodynamics and pharmacokinetics. Emphasizes drug mechanism of action, mechanism of side effects, patient-specific factors, and drug indications. Provides opportunities for self-directed learning, team building, and interdisciplinary team-based patient care.

PHRM 554. Neuropharmacology. 4 Units.
Systematically discusses drugs that affect primarily the nervous system, with major emphasis on mechanism of action.

PHRM 564. Cardiovascular and Renal Pharmacology. 3 Units.
Systematically discusses drugs that affect primarily the cardiovascular and renal systems, emphasizing mechanism of action. Offered on demand.

PHRM 584. Drug Metabolism and Biochemical Pharmacology. 4 Units.
Discusses in detail the fate of drugs in the body, together with related aspects of biochemical actions of drugs.

PHRM 684. Special Problems in Pharmacology. 2-6 Units.
Assignments in literature reviews and/or laboratory exercises.

PHRM 697. Research. 1-6 Units.

PHRM 699. Dissertation. 1-6 Units.

PHRM 891. Pharmacology Elective. 1.5-27 Units.
Offers fourth-year medical students the opportunity to explore various areas of pharmacology, including research.

Pharmacy Conjoint (RXRX)

Courses

RXRX 500A. Professional Development. 1.5 Unit.
A three-course sequence. Emphasizes professional knowledge, skills, abilities, behaviors, and attitudes required to produce a competent, practice-ready professional; and to develop a successful career in pharmacy. Focuses on well-being and professionalism/professional identity. Prerequisite: PY1 standing.

RXRX 500B. Professional Development. 1.5 Unit.
Continuation of RXRX 500A. Prerequisite: RXRX 500A.

RXRX 501. School of Pharmacy Forum. 0 Units.
Presents current topics affecting pharmacy, health care, and career paths from a multidisciplinary perspective. Offered on a weekly basis throughout the four-year program.

RXRX 506. Introduction to Pharmacy Leadership. 1 Unit.
Offers academic credit for activities related to leadership development associated with the California Pharmacy Student Leadership Program. Strengthens leadership behavior. Students invited to take part in this program must register for this course and complete it as a condition of their participation. May be repeated once for a maximum of 2 units. Prerequisite: Permission of the Office of Student Affairs; PY-1 Spring Quarter professional year standing.

RXRX 600A. Professional Development. 1.5 Unit.
A three-course sequence. Emphasizes professional knowledge, skills, abilities, behaviors, and attitudes required to produce a competent, practice-ready professional; and to develop a successful career in pharmacy. Focuses on health literacy. Prerequisite: PY2 standing.

RXRX 600B. Professional Development. 1.5 Unit.
Continuation of RXRX 600A. Prerequisite: RXRX 600A.

RXRX 601. School of Pharmacy Forum. 0 Units.
Presents current topics affecting pharmacy, health care, and career paths from a multidisciplinary perspective. Offered on a weekly basis throughout the four-year program.

RXRX 700A. Professional Development. 1.5 Unit.
A three-course sequence. Emphasizes professional knowledge, skills, abilities, behaviors, and attitudes required to produce a competent, practice-ready professional; and to develop a successful career in pharmacy. Focuses on interdisciplinary communication and team STEPPS. Prerequisite: PY3 standing.

RXRX 700B. Professional Development. 1.5 Unit.
Continuation of RXRX 700A. Prerequisite: RXRX 700A.

RXRX 701. School of Pharmacy Forum. 0 Units.
Presents current topics affecting pharmacy, health care, and career paths from a multidisciplinary perspective. Offered on a weekly basis through the third professional year. throughout the four-year program.

RXRX 704. STEPPS. Prerequisite: PY3 standing.

RXRX 706. Introduction to Pharmacy Leadership. 1 Unit.
Offers academic credit for activities related to leadership development associated with the California Pharmacy Student Leadership Program. Strengthens leadership behavior. Students invited to take part in this program must register for this course and complete it as a condition of their participation. May be repeated once for a maximum of 2 units. Prerequisite: Permission of the Office of Student Affairs; PY-1 Spring Quarter professional year standing.

RXRX 798. Independent Study with Faculty. 1-4 Units.
Development of an individual research or project. Includes: description of the research or project; associated budget; and, assessment methods. May be repeated for a total of 4 units toward the 9-unit elective requirement.

Pharmacy Practice/Drug Information (RXDI)

Courses

RXDI 664. Drug Information and Literature Evaluation. 3 Units.
Introduces drug information resources, retrieval, and evaluation. Includes: forms of drug literature; primary, secondary, tertiary, and Internet resources; documentation of drug information requests; and, reporting adverse drug reactions. Discusses issues related to herbal medicine and alternative therapeutic options.

Pharmacy Practice/Experiential Education (RXEE)

Courses

RXEE 580. Introductory Pharmacy Practice Experience—Community I. 3 Units.
Introduction to pharmacy practice in a community setting. Focuses on pharmacist, technician, health-care provider, and patient interactions. Prerequisite: RXEE 690, and a valid pharmacist intern license.

RXEE 591. Introduction to Community Pharmacy Practice I. 2 Units.
Part of a two-course sequence for practical exposure to community pharmacy practice. Student learns through practicum and reflection the basic skills required in community pharmacy practice.

RXEE 592. Introduction to Community Pharmacy Practice II. 2 Units.
Part of a two-course sequence for practical exposure to community pharmacy practice. Student learns basic skills required in community pharmacy practice through practicum and reflection.

RXEE 580. Introductory Pharmacy Practice Experience—Community II. 2 Units.
Introduction to pharmacy practice in a community setting with emphasis on applying clinical knowledge to patient counseling and education on prescription and self-care medications. Addresses pharmacist, technician, other health-care provider, and patient interactions. Prerequisite: RXEE 580, and a valid pharmacist intern license.
RXEE 690. Introduction to Hospital Pharmacy Practice. 2 Units.
Exposes students to the various clinical, administrative, and distributive roles and responsibilities of a hospital pharmacist. Prerequisite: P2 standing.

RXEE 790. Introduction to Clinical Pharmacy Practice. 2 Units.
Exposes students to a variety of clinical pharmacy services—including ambulatory care, medicine, and a number of specialty practice areas. Prerequisite: P3 standing.

RXEE 821. Advanced Pharmacy Practice Experience I. 6 Units.
Supervised clinical pharmacy practice experience that provides advanced pharmaceutical care skills and opportunities in a specific area of pharmacy practice.

RXEE 822. Advanced Pharmacy Practice Experience II. 6 Units.
Supervised clinical pharmacy practice experience that provides advanced pharmaceutical care skills and opportunities in a specific area of pharmacy practice.

RXEE 823. Advanced Pharmacy Practice Experience III. 6 Units.
Supervised clinical pharmacy practice experience that provides advanced pharmaceutical care skills and opportunities in a specific area of pharmacy practice.

RXEE 824. Advanced Pharmacy Practice Experience IV. 6 Units.
Supervised clinical pharmacy practice experience that provides advanced pharmaceutical care skills and opportunities in a specific area of pharmacy practice.

RXEE 825. Advanced Pharmacy Practice Experience V. 6 Units.
Supervised clinical pharmacy practice experience that provides advanced pharmaceutical care skills and opportunities in a specific area of pharmacy practice.

RXEE 826. Advanced Pharmacy Practice Experience VI. 6 Units.
Supervised clinical pharmacy practice experience that provides advanced pharmaceutical care skills and opportunities in a specific area of pharmacy practice.

RXEE 827. Advanced Pharmacy Practice Experience VII. 6 Units.
Supervised clinical pharmacy practice experience that provides advanced pharmaceutical care skills and opportunities in a specific area of pharmacy practice.

RXEE 828. Advanced Pharmacy Practice Experience VIII. 6 Units.
Immersion in clinical practice within inpatient settings. Addresses comprehensive pharmaceutical care plans within the Pharmacist Patient Care Process. Prerequisite: Successful completion of didactic courses; valid pharmacist intern license.

Pharmacy Practice/Therapeutics (RXTH)

Courses
RXTH 529. Strategies for Achieving a Successful Career in Pharmacy. 2 Units.
Explores factors that determine job satisfaction and success in the pharmacy workplace, as well as contemporary changes in the pharmacist job market that directly affect pharmacist employability. Guides students in the development of strategies that will enable them to effectively compete in a highly competitive job market, optimizing their chances of achieving job satisfaction and success once employed.

RXTH 560. Pharmacist-Guided Self Care. 5 Units.
Introduces students to pathophysiology, pharmacologic, and nonpharmacologic management of conditions indicated for self-treatment. Enables students to provide patient-centered care through gathering pertinent information by patient interviewing, assessing the appropriateness of self-treatment or referral, recommending over-the-counter (OTC) products, and developing a patient-specific treatment plan—including patient education, counseling, and follow up.
RXTH 570. Introduction to Disease Management. 2.5 Units.
Introduces students to medical terminology, physical examination, interpretation of major diagnostic tests/labatory results, and important patient safety considerations. Familiarizes students with various disease states—such as benign prostatic hyperplasia, urinary incontinence, glaucoma, gout, osteoarthritis, and rheumatoid arthritis. Prepares students to assess patients and determine the appropriate nonpharmacologic and pharmacologic treatment options for specific conditions.

RXTH 603. Interprofessional Dental Clinic. 2 Units.
Provides opportunity for pharmacy and dentistry students to work and learn together in the setting of an urgent care dental facility. Students interview patients and collect data (chief complaint, medical history, medication history, etc.) pertinent to the patients' dental care. Emphasizes the collaboration of different professions to deliver health care and improve the health of patients. Develops communication skills between health care providers.

RXTH 604. Medical Missions. 3 Units.
Prepares students to participate in an organized, interprofessional, cross-cultural medical mission trip, health-care experience, or international health program. Includes hands-on, experiential learning that enhances competence in physical assessment. Reviews major chronic diseases encountered in select medical mission destinations, including the appropriate role for student pharmacists in diagnosis and treatment.

RXTH 605. Advanced Diabetes Management. 2 Units.
Advances students' knowledge and skills applicable to issues regarding personalized treatment of diabetes. Topics include lifestyle management, social issues, mental health issues, type 1 DM, type 2 DM, and diabetes management technology. Challenges students to use guidelines, literature, personalization, and professional judgment in approaching patient care.

RXTH 606. Antimicrobial Stewardship. 1 Unit.
Develops an understanding of the role of the pharmacist in antimicrobials stewardship programs (ASP), as well as the process of ASP. Includes hospital practice and administrative duties associated with ASP.

RXTH 608. Viral Infections Evidence-Based Therapy. 2 Units.
Introduces students to chronic hepatitis C virus (HCV) and human immunodeficiency virus (HIV) infections, focusing on evidence-based treatment of these viral infections. Students interpret clinical data for various available therapies that allow them to select patient-specific treatments based on evidence. Students examine issues of internal, external, statistical, and clinical validity as they relate to specific patient cases in HCV and HIV.

RXTH 609. Advanced Literature Evaluation. 1 Unit.
Provides an opportunity for students to critically evaluate journal articles in a systematic format. Introduces students to the journal club format of presenting literature and learning how to assess the merit of studies with respect to design, statistical methods, and potential applications.

RXTH 610. Introduction to Pharmacy Informatics. 1 Unit.
Provides a foundation for understanding health information technology (HIT) and pharmacy informatics. Presents the HIT and specific informatics language that make up the infrastructure for real-world information management and health information exchange.

RXTH 611. Introduction to Nuclear Pharmacy. 2 Units.
Introduction to radiopharmaceuticals. Includes: routinely used diagnostic and therapeutic agents; evaluation of radiopharmaceuticals in terms of indications, dosages, side effects, drug interactions, and potential for pharmacist intervention; practice guidelines and regulatory requirements for radiopharmaceuticals and nuclear pharmacy; and, diagnostic and therapeutic utility of radiopharmaceuticals.

RXTH 614. Parenteral and Enteral Nutrition. 1.5 Unit.
Provides a comprehensive review of malnutrition in critically ill patients, and discusses the treatment approach based on patient’s medical and nutritional status and requirements. Introduces students to therapy-related complications and discusses how to prevent and manage them.

RXTH 619. Clinical Pharmacokinetic Dosing and Monitoring. 3 Units.
Integrates the principles of pharmacokinetics—including factors affecting the absorption, distribution, metabolism, excretion, and binding of drugs—into the process of monitoring, evaluating, and adjusting a specific dosing regimen. Teaches students to interpret laboratory results, assess clinical findings, and apply pharmacokinetic principles to determine an individualized dosing regimen for a specific patient, based on drug serum concentrations and clinical circumstances.

RXTH 671. Fluids and Electrolytes. 2 Units.
Covers the pathophysiology and management of conditions related to fluid, electrolyte, anemia, acid-base, and nutritional disorders. Discusses pharmacotherapy, dietary requirements, and sources of electrolytes. Enables students to manage these disorders, establish and employ rational treatment, and provide parameters to monitor progress of recommended therapies.

RXTH 674. Renal and Respiratory Diseases. 3.5 Units.
Covers the pathophysiology, management, and drug therapy of conditions related to renal and respiratory diseases. Prepares students to manage renal and respiratory diseases, establish and employ rational treatment, and provide parameters to monitor progress of the regimens.

RXTH 683. Endocrine. 3.5 Units.
Introduces students to the pathophysiology and disease-state management of common endocrine disorders. Introduces students to pharmacology, pharmacokinetics, and pharmacodynamics of agents used in the treatment of these common endocrine disorders. Prepares students to integrate their current knowledge and skills of therapeutics to formulate individualized therapeutic plan for patients. Prerequisite: Completion of all P1 and Autumn Quarter P2 courses.

RXTH 684. Cardiovascular I. 3.5 Units.
Teaches the pathophysiology, management, and drug therapy of hypertension, hyperlipidemia, and coronary artery diseases. Includes the pharmacology, pharmacokinetics, and pharmacodynamics of agents used in the treatment of these diseases. Emphasizes evidence-based medicine and national guidelines for the management of these diseases. Prepares students to determine the most appropriate treatments and monitoring parameters.

RXTH 685. Cardiovascular II. 3.5 Units.
Teaches the pathophysiology, management, and drug therapy of thromboembolic disorders, arrhythmia, stroke, transplantation, pulmonary hypertension, and heart failure. Includes the pharmacology, pharmacokinetics, and pharmacodynamics of agents used in the treatment of these diseases. Prepares students to determine the most appropriate treatments and monitoring parameters.
RXTH 701. Pediatric Pharmacotherapy. 2 Units.
Expands the student’s therapeutic knowledge regarding common pediatric disease states and prepares students to identify and address common drug-related problems in pediatric patients. Prerequisite or concurrent*: RXTH 704*, completion of winter quarter of PY3 year.

RXTH 702. Advanced Topics in Neurology and Therapeutics. 2 Units.
Develops the knowledge and skills necessary for scientific inquiry and promotes an enduring attitude of self-learning. Elements include creative and critical thinking, literature analysis, and discussion of findings. Students assigned projects and activities. Prerequisite: RXTH 771.

RXTH 703. Advanced Topics in Critical Care. 2 Units.
Presents disease states and treatments in critically ill patients in the clinical environment. Preparation for clinical rotations and inpatient pharmacy practice.

RXTH 704. Special Populations. 3 Units.
Introduces students to the core concepts involved in the care of pediatric and geriatric patients. Expands students’ knowledge base of pharmacology, pharmacokinetics, and pharmacodynamics of drugs. Includes anatomy, physiology, pharmacology, pharmacokinetics, pharmacotherapy, and clinical trial evidence. Students integrate knowledge, attitudes, and skills in a variety of ways to accomplish the course outcomes.

RXTH 708. Mental Health in the Movies. 2 Units.
Evaluates the depiction of mental health conditions in various media, including books and movies.

RXTH 757. Advanced Cardiovascular Life Support. 3 Units.
Focuses on the development of skills necessary for the management of patients with acute cardiovascular emergencies.

RXTH 770. Infectious Diseases I. 3.5 Units.
Introduces students to the pharmacology, pharmacokinetics, and pharmacodynamics of anti-infective agents; as well as management (evaluation, treatment, monitoring, and follow-up) of patients with various infections. Integration of students’ knowledge and skills in a variety of ways to accomplish course outcomes.

RXTH 771. Central Nervous System II. 3.5 Units.
Introduces students to management (evaluation, treatment, monitoring, and follow-up) of patients with neurological conditions (Table I). Describes basic pathophysiology of common neurological conditions, along with pharmacokinetic and pharmacodynamic properties of the most common therapeutic agents. Provides practical experience in managing patients with neurological conditions, along with additional comorbid conditions, through case-based activities.

RXTH 772. Infectious Diseases II. 3.5 Units.
Introduces students to the pharmacology, pharmacokinetics, and pharmacodynamics of anti-infective agents; as well as management (evaluation, treatment, monitoring, and follow-up) of patients with various infections. Integrates students’ knowledge and skills in a variety of ways to accomplish course outcomes. Prerequisite: RXTH 770.

RXTH 773. Central Nervous System I. 3.5 Units.
Introduces students to management (evaluation, treatment, monitoring, and follow-up) of patients with psychiatric illnesses (Table I). Describes basic pathophysiology of common psychiatric illnesses, along with pharmacokinetic and pharmacodynamic properties of the most common therapeutic agents. Provides practical experience in managing patients with psychiatric illness, along with additional comorbid conditions, through case-based activities.

RXTH 774. Gastrointestinal Disorders. 2.5 Units.
Introduces students to the pathophysiology and management (assessment, evaluation, treatment, monitoring, and patient education) of common gastrointestinal disorders, liver diseases, hepatitis, and other topics such as stress ulcer prophylaxis. Covers the pharmacology, pharmacokinetics, and pharmacodynamics of agents used in the treatment of these diseases. Assimilates relevant literature and current guidelines into treatment plans.

RXTH 775. Oncology. 2.5 Units.
Introduces student pharmacists to the pathophysiology, pharmacology, and therapeutic management of common hematologic malignancies and solid tumors. Students gain an understanding of the management of adverse side effects due to chemotherapy. Provides an avenue for student pharmacists to practice critical-thinking skills and clinical decision making using interactive, case-based lecturing and recitation cases.

RXTH 782. Special Topics in Pharmacy Practice. 1-4 Units.
Lecture and discussion on a current topic in pharmacy practice. May be repeated for a maximum of 6 units.

RXTH 783. Special Topics in Pharmacy Practice. 1-4 Units.
Lecture and discussion on a current topic in pharmacy practice. May be repeated for a maximum of 6 units.

RXTH 784. Special Topics in Pharmacy Practice. 1-4 Units.
Lecture and discussion on a current topic in pharmacy practice. May be repeated for a maximum of 6 units.

Pharmacy/Social and Administrative Sciences (RXSA)

Courses

RXSA 545. Public Health and Lifestyles. 3 Units.
Introduction to principles of public health and public health practice. Addresses how pharmacy practice interfaces with public health delivery in a variety of settings; identification and evaluation of public health education programs; and, how the pharmacist ensures conditions under which all people can be healthy.

RXSA 547. Pharmacy Law. 2 Units.
Introduces students to the most relevant federal and state laws and regulations that define legal and ethical pharmacy practice. Provides students with the tools necessary to practice pharmacy consistent with these standards. Includes lectures, discussions, small-group problem solving, assignments, and examinations.

RXSA 555. Epidemiology and Public Health. 3 Units.
Examines the fundamentals of public health epidemiology. Addresses distribution and determinants of health and illness, factors contributing to health promotion and disease prevention, implementation of activities that advance public health and wellness, and immunization delivery.

RXSA 600. Philippines Medical Mission Preparation. 1 Unit.
Orientation to cultural, professional, and clinical experiences in the Philippines. Surveys geographical, cultural, and epidemiological history of the Batangas people. Reviews preparation of medications to be dispensed during the mission. Describes the pharmacist’s scope of practice in the medical mission and provision of competent pharmacy care. Develops and implements mission responsibilities, tasks, and itineraries.
RXSA 618. Writing for Publication. 3 Units.
Addresses publishable, professional writing. Includes: pre-writing exercises, basic components of articles, journal style sheets, bibliographies, citing works within a text, and writing conventions such as mechanics, usage, and sentence formation.

RXSA 640. Epidemiology and Biostatistics. 3 Units.
Introduces epidemiology, basic statistical concepts, analytical methods, and medical literature-evaluation techniques. Exposes students to biostatistical concepts through clinical application of statistics, using SPSS7 or other currently available statistical packages. Prerequisite: Successful completion of all P1-level courses; P2; Autumn Quarter standing.

RXSA 646. Principles of Management. 3 Units.
Introduces pharmacy students to the five core managerial sciences, i.e., human resource management, operations management, marketing, accounting, and finance. Particularly emphasizes human resource management and operations management skills. Lectures incorporate real-life management cases for discussion, followed by lecture on the principles of management topics.

RXSA 650. Biostatistics. 3 Units.
Exposure to commonly used descriptive and inferential statistical techniques. Addresses selection of appropriate parametric and non-parametric statistical tests for research and interpretation of findings in the literature. Includes presentation of statistical information in tabular and graphical formats.

RXSA 743. Health Systems, Reimbursement, and Pharmacoeconomics. 3 Units.
Explores health outcomes research and pharmacoeconomic analyses. Includes: cost-benefit analyses across drug treatments; resource allocation; practice guidelines for pharmacoeconomic evaluation; pharmacists’ roles in the health-care system; and, drug and clinical pharmacy reimbursement in practice settings.

EXSA 748. Advanced Topics in Pharmacy Law. 1 Unit.
Exposes the student to current issues in pharmacy law and regulation both at the federal and state levels. Introduces pending legislation at both the state and federal levels. Assigned legal articles and pending legislation read and presented during class allow the student to become familiar not only with the issue(s) being presented, but also to analyze and present the issues’ impact on the practice of pharmacy in general and on the student’s personal practice of pharmacy.

RXSA 750. Wall Street Journal. 1 Unit.
Students read selected Wall Street Journal health-related articles and discuss the events that have resulted in news coverage each week in the areas of pharmaceutical/biotechnology, providers/insurance, research, policy, and medical products.

RXSA 751. Social-Behavioral Aspects of Pharmacy Practice. 3 Units.
Focuses on models and theories of behavior change with particular emphasis on public health, health education, preventive health, health promotion, and pharmacological practice. Includes patient and needs assessments.

RXSA 757. Clinical Research and Methodology (CRM). 2 Units.
Builds on the principles of biostatistics and drug information to develop the skills necessary for a practitioner to design and develop a clinical research study worthy of scholarly publication and presentation. Highly recommended for students who wish to pursue a career in managed care, pharmacy practice in an academic setting, or as a clinical coordinator in hospital settings. Offered Spring Quarter of PY3. Prerequisite: Completion of RXDI 664 and RXSA 640 with a grade of B- or better.

Philosophy (PHIL)

Courses

PHIL 616. Seminar in the Philosophy of Science. 2 Units.
Explores the meaning(s) of scientific facts, laws, and theories—with special attention to the development of scientific thought, the nature of scientific discovery, contrasting interpretations of scientific inquiry, and the ethical ramifications of scientific discovery.

Physical Education Activity (PEAC)

Courses

PEAC 110. Independent Activities. 1 Unit.
Develops an appropriate fitness/activity program in conjunction with the instructor. Develops motor skills and physical stamina in a manner that will promote lifelong involvement in physical activity.

PEAC 128. Recreation Swimming. 1 Unit.
Covers the mechanics of a variety of strokes, training methods, training principles, and safety through swim techniques that maximize fitness outcomes and minimize injuries. Designed to teach and apply the principles of lifetime physical fitness, utilizing the five major components of cardiorespiratory endurance, muscular strength, muscular endurance, flexibility, and body composition. Prerequisite: Students must have beginning swimming ability as determined by the instructor.

Physical Medicine and Rehabilitation (PMRH)

Courses

PMRH 891. Physical Medicine and Rehabilitation Elective. 1.5-27 Units.
Offers fourth-year medical students the opportunity to explore various areas of physical medicine and rehabilitation, including pain management and research.

Physical Therapist Assistant (PTAS)

Courses

PTAS 201. Anatomy. 4 Units.
Anatomy of the human body, with emphasis on the neuromuscular and skeletal systems, including anatomical landmarks. Basic neuroanatomy of the central nervous system.

PTAS 203. Applied Kinesiology. 3 Units.
Introduces functional anatomy of the musculoskeletal system. Applies biomechanics of normal and abnormal movement in the human body. Lecture and laboratory.

PTAS 204. Applied Gait. 1 Unit.
Introduces normal phases of gait. Identifies common gait abnormalities. Clinical application towards therapeutic exercises and gait training. Lecture and laboratory.

PTAS 205. Introduction to Physical Therapy. 1 Unit.
Physical therapy practice and the role of the physical therapist assistant in providing patient care. Quality assurance. Interpersonal skills. Introduces the multidisciplinary approach. Familiarizes the student with health care facilities and government agencies.

PTAS 206. Documentation Skills. 1 Unit.
Introduces basic abbreviations, medical terminology, chart reading, and note writing.
PTAS 212. Physical Therapy Procedures. 3 Units.
Principles of basic skills in the physical therapy setting. Goniometry. Sensory- and gross-muscle testing. Mobility skills in bed and wheelchair and transfer training. Gait training and activities of daily living. Body mechanics, positioning, and vital signs. Identifies architectural barriers. Teaching techniques for other health care providers, patients, and families. Wheelchair measurement and maintenance. Lecture and laboratory.

PTAS 224. General Medicine I. 3 Units.
Introduces general medical conditions, including pathology and management of medical problems: diseases of the body systems— including cardiovascular, urinary, digestive, nervous, endocrine, and musculoskeletal systems. Theoretical principles and practical application of respiratory techniques, exercises, and postural drainage. CPR certification required prior to the end of the term. Prerequisite: PTAS 201.

PTAS 225. Neurology. 3 Units.
Introduces neurological conditions, including pathology and management of medical problems of stroke, head injury, Parkinson’s disease, spinal cord and nerve injuries, and other conditions.

PTAS 226. Orthopaedics I. 3 Units.
Introduces common orthopaedic conditions, pathologies, and surgical procedures involving the peripheral joints. Introduces joint mobilization. Procedures and progression of therapeutic exercises for each specific joint covered as these exercises relate to tissue repair and healing response. Practical laboratory includes integration of treatment plans and progressions.

PTAS 227. Therapeutic Exercise. 2 Units.
Introduces therapeutic exercise theories and practical applications. Tissue response to range of motion, stretch, and resistive exercise. Laboratory covers practical applications of various types of exercise techniques and machines used in the clinics, and a systematic approach to therapeutic exercise progression.

PTAS 231. Physical Therapy Modalities. 3 Units.
Introduction to the administration and practice of physical therapy modalities (biophysical agents), including heat and cold applications, hydrotherapy, massage, aquatic therapy, physiology and control of edema, standard precautions, sterilization techniques, and pain management. Lecture and laboratory. Prerequisite: PTAS 201.

PTAS 234. General Medicine II. 1 Unit.
Introduces equipment, lines, tubes, and procedures for interventions in acute/inpatient settings by the physical therapist assistant. Mobilization, functional mobility, exercise, and transfers within the acute care setting. Identifies the roles of multidisciplinary team members managing critical care patients. Prerequisite: PTAS 212, PTAS 224.

PTAS 236. Applied Electrotherapy. 3 Units.
Principles and techniques of electrotherapy procedures, including basic physiological effects. Indications and contraindications for specific electrotherapy modalities. Practical application and demonstration of modalities in a laboratory setting.

PTAS 238. Wound Care. 1 Unit.
Normal structure and function of the skin. Pathology of the skin, including problem conditions, burns, and wounds. Lecture and laboratory to include wound identification, measuring, dressing, treatments, and debridement. Model wounds used for hands-on training.

PTAS 241. Applied Pediatrics. 2 Units.
Normal and abnormal development, from conception to adolescence. Emphasizes developmental sequence, testing, and treatment of neurological and orthopaedic disorders. Practical laboratory.

PTAS 243. Applied Geriatrics. 3 Units.
Introduces various aspects of geriatric care. Wellness care and adaptation to exercise modalities. Procedures pertaining to the geriatric patient. Diagnosis and aging changes that affect function in geriatric rehabilitation.

PTAS 251. Orthopaedics II. 3 Units.
Introduces common orthopaedic conditions, pathologies, and surgical procedures of the spine. Treatments, procedures, and progression of therapeutic exercises of the spine as related to tissue repair and healing response. Practical laboratory includes integration of treatment plans and progressions.

PTAS 252. Applied Neurology. 3 Units.
Introduces techniques to facilitate neurodevelopmental treatment, proprioceptive neuromuscular facilitation, Brunnstrom, and principles of therapeutic exercise of the cardiac patient. Practical laboratory.

PTAS 261. Physical Therapy Practice. 1 Unit.
Student observes evaluations, treatments, and various diagnoses; completes a resume and a state licensing application; and prepares and presents a case study and in-service. Billing procedures and third-party payors.

PTAS 264. Applied Orthotics and Prosthetics. 2 Units.
Introduces basic principles in the use of selected prosthetic and orthotic devices. Exposes student to various types of devices; discusses patient adjustment to devices. Examines indications and contraindications for orthotic and prosthetic use with patients seen in physical therapy. Prerequisite: PTAS 203.

PTAS 265. Professional Seminar. 1 Unit.
Contemporary theories and practices of physical therapy. Topics covered by faculty and guest lecturers include: sports taping, ortho taping, soft tissue, geriatric experience through affective learning, and vestibular rehabilitation. Lecture and laboratory.

PTAS 275. Psychosocial Aspects of Health. 2 Units.
Psychological and sociological reactions to illness or disability. Includes trauma, surgery, and congenital and terminal illness. Individual and family considerations.

PTAS 293. Physical Therapist Assistant Clinical Experience I. 6 Units.
One six-week assignment to be completed during the Spring Quarter. Students exposed to a variety of clinical settings. Forty clock hours per week of supervised clinical experience. Combined total of eighteen weeks—including PTAS 293, 294, 295—of clinical experience prepares the student for entry-level performance.

PTAS 294. Physical Therapist Assistant Clinical Experience II. 6 Units.
One six-week assignment to be completed during the Summer Quarter. Students exposed to a variety of clinical settings. Forty clock hours per week of supervised clinical experience. Combined total of eighteen weeks—including PTAS 293, 294, 295—of clinical experience prepares the student for entry-level performance.

PTAS 295. Physical Therapist Assistant Clinical Experience III. 6 Units.
The terminal, six-week assignment completed during the final quarter of the program. Exposes students to a variety of clinical settings. Forty clock hours per week of supervised clinical experience. The combined total of eighteen weeks—including PTAS 293, 294, 295—of clinical experience prepares the student for entry-level performance.
Courses

PHTH 501. Neurology I. 3 Units.
Physical therapy management of individuals with balance and vestibular disorders resulting in impairments, functional limitations, and disabilities. Emphasizes application and integration of theoretical constructs, evidence-based practice, examination, evaluation, diagnosis, prognosis, intervention, and outcomes measurements.

PHTH 502. Neurology II. 3 Units.
Physical therapy management of individuals with neurological disorders (including stroke, traumatic brain injury, multiple sclerosis, Parkinson’s disease, Guillain-Barre syndrome, and amyotrophic lateral sclerosis) resulting in impairments, functional limitations, and disabilities. Emphasizes the application and integration of theoretical constructs, evidence-based practice, examination, evaluation, diagnosis, prognosis, intervention, and outcomes measurement.

PHTH 503. Neurology III. 3 Units.
Physical therapy management of individuals with spinal cord injury and amputations resulting in impairments, functional limitations, and disabilities. Emphasizes the application and integration of theoretical constructs, evidenced-based practice, examination, evaluation, diagnosis, prognosis, intervention, and outcomes measurement.

PHTH 504. Neurology IV. 3 Units.
Continued development of critical thinking and refinement of previously learned neurologic patient management skills and introduction to new content supporting neurologic physical therapy practice.

PHTH 505. Integrated Clinical Experience. 1 Unit.
A year-long course that provides the students—assisted by faculty and clinical therapist—experience with mock and real patients. Emphasis is on critical thinking related to assessment, safety, and treatment progression. Course incorporates didactic education into practical application.

PHTH 506. Exercise Physiology. 3 Units.
Addresses physiologic, metabolic, circulatory, and structural adaptations, responses, and interactions that occur during acute and chronic exercise. Includes body fat analysis and risk of disease in the obese client. Applies tests and measures to concepts and applications of exercise prescriptions.

PHTH 508. PT Communication and Documentation. 2 Units.
Introduces principles and dynamics of professional communication. Emphasizes basic skills needed in a clinical setting, including but not limited to the following: evaluations, progress notes, discharge summary, workers compensation, prescriptions, patient interviews, letters of justification, electric formats, and legal considerations related to all aspects of the above.

PHTH 509. Biophysical Agents. 3 Units.
Fundamental principles, physiological effects, and application techniques in the use of biophysical agents, including thermotherapy, cryotherapy, hydrotherapy, ultrasound, and electrotherapy procedures. Manual modalities, including massage techniques, myofascial and trigger point release. Lecture and laboratory.

PHTH 510. Kinesiology. 3 Units.
Fundamental principles of joint and muscle structure and function related to the development of treatment strategies for the physical therapist. Analyzes and applies the biomechanics of normal and pathological movement of the human body. Functional anatomy of the musculoskeletal system, including palpatory techniques for bone, ligament, and muscle.

PHTH 511. Clinical Orthopaedics. 2 Units.
Addresses the physical therapist’s management of patients with functional impairments stemming from orthopaedic pathologies in all body regions. Introduces patient/client management; including, examinations, evaluations, diagnoses, prognoses, interventions, and outcomes. Emphasizes postoperative rehabilitation to enhance outcomes following orthopaedic procedures.

PHTH 512. Clinical Psychiatry. 2 Units.
Introduces mental and personality disorders. Reviews abnormal behaviors commonly found in a clinical setting.

PHTH 513. Therapeutic Procedures. 3 Units.

PHTH 514. Manual Muscle Testing. 3 Units.
Methods of evaluating muscle strength and function using specific and gross manual muscle tests. Integrates manual muscle testing with other aspects of patient care. Live patient demonstrations and discussion regarding each patient. Lecture, demonstration, and laboratory.

PHTH 516. Histology. 2 Units.
Surveys fundamental tissues (epithelial, connective, muscle, and nervous) and the histopathology of selected diseases, including changes in bone and cartilage.

PHTH 517. Movement Science. 2 Units.
An integrative approach to movement impairment and neuromuscular approaches in the evaluation and management of musculoskeletal pain syndromes. Identifies clinical reasoning and examination of movement patterns. Extensive laboratory practice with patient/case studies.

PHTH 518. Aspects of Health Promotion. 2 Units.
Dynamics of physical therapy involvement in health promotion for the individual and the community. Factors in the promotion of a healthy lifestyle, including cardiovascular enhancement, stress reduction and coping mechanisms, nutritional awareness, weight management, and substance control. Students design and implement community-based health education program.

PHTH 519. Locomotion Studies. 3 Units.
Basic and advanced observational analysis of normal and abnormal human locomotion in adults. Compares differences in gait impairments at each joint and at different stance/swing phases. Use of assessment tools and clinical reasoning in the attributes and interventions of normal and abnormal gait characteristics. Basic pathological and soft tissue impairments to gait cycle. Correlates energy expenditure to gait.

PHTH 521A. Orthopaedics 1A. 3 Units.
Discusses physical therapy examination, evaluation, and interventions relevant to the clinical management of musculoskeletal conditions of the upper extremities. Presents instruction related to orthopaedic physical therapy interventions—including joint mobilization, hand splinting, and other selected manual techniques for specific upper extremity musculoskeletal conditions. Utilizes lecture, laboratory, and case studies to develop and integrate these concepts.

PHTH 521B. Orthopaedics 1B. 3 Units.
Students further develop concepts of examination, differential diagnosis, prognosis, and interventions that are expanded to patients with musculoskeletal conditions of the lower extremities. Utilizes lecture, laboratory, and case studies to develop and integrate these concepts.
PHTH 522. Orthopaedics II. 3 Units.

PHTH 523. Orthopaedics III. 3 Units.
Evidence-based theory of lumbopelvic, lumbar and thoracic spine examination, evaluation, and physical therapy intervention. Expanded principles of functional anatomy, tissue and joint biomechanics, pathology, and treatment. Differentiates etiology of lumbar, lumbopelvic, and thoracic pain.

PHTH 525. General Medicine. 3 Units.
An understanding of medical and surgical disorders for the physical therapist. Basic pathology and/or etiology and clinical manifestations. Medical treatment for conditions within selected specialties of: endocrinology, arthritis, oncology, and integumentary management.

PHTH 526A. Cardiopulmonary I. 3 Units.
Anatomy and physiology of the cardiovascular system as applied to patient management. Physical therapy management of patients diagnosed with cardiac diseases and complications. Identifies disease processes, including definition, etiology, pathophysiology, clinical presentation, and the clinical course of cardiac conditions. Analyzes and examines ECGs of various forms with basic interpretation. Includes lecture and laboratory.

PHTH 526B. Cardiopulmonary II. 3 Units.
Normal anatomy and physiology of the pulmonary system as applied to physical therapy management. Medical and physical therapy management of patients diagnosed with pulmonary diseases and complications. Analyzes arterial blood gases in a systematic manner and relates findings to the disease and ventilatory process. Discusses PFTs for obstructive and restrictive diseases. Includes lecture and laboratory.

PHTH 528. Therapeutic Exercise I. 3 Units.
Introduces basic exercise techniques used in the practice of physical therapy. Techniques include, ROM, stretching/flexibility, joint mobilization, muscle performance (including strength, power, and endurance), and aquatic rehabilitation.

PHTH 530. Therapeutic Exercise II. 3 Units.
Formulation and implementation of exercise prescriptions based on impairments and protocols. Opportunities to design treatment progressions for the extremities. Emphasizes spinal stabilization approaches for the axial skeleton.

PHTH 532. Biostatistics I. 2 Units.
Fundamental procedures of analyzing and interpreting data. Sampling, probability, descriptive statistics, normal distribution, sampling distributions and standard error, confidence intervals and hypothesis testing, power, effect size. Introduction to epidemiological measures to estimate risk and select measures of clinical improvement.

PHTH 534. Soft Tissue Techniques. 2 Units.
Physical therapy evaluation and treatment-planning strategies for individuals with orthopedic dysfunction primarily related to soft tissue injury resulting in pathology, impairments, functional limitations, and disabilities. Emphasizes laboratory hands-on application and integration of theoretical constructs, evidenced-based practice, examination, evaluation, intervention, and measurement of outcomes.

PHTH 539. Integrative Physiology. 4 Units.
Physiology of the human body, including integumentary, skeletal, muscular, neuronal, cardiovascular, respiratory, endocrine, digestive, urinary, and reproductive physiology.

PHTH 540. Concepts of Acute Care. 2 Units.
Presents procedures, equipment, lines and tubes, medications, and treatments used while treating adult and pediatric patients in the acute care setting. Covers ICU, NICU, and CCU using current research on mobilization and improving function. Identifies roles of multidisciplinary team members managing critical care patients.

PHTH 555. Medical Screening. 2 Units.
Examines typical sequential human development observed throughout prenatal, infant, toddler, and childhood periods, in the context of physical therapy; and provides an introduction to atypical development. Emphasizes observation of motor development and learning, and identification and documentation of movement for both the typically and atypically developing child.

PHTH 558. Pediatrics II. 3 Units.
Addresses pediatric NDT, sensory processing disorders, spasticity assessment, and case management of clients with developmental disabilities including, cerebral palsy, spina bifida, and muscular dystrophy. Addresses pediatric NDT, sensory processing disorders, spasticity management, and adaptive equipment options. Includes preparing realistic, measurable objectives. Includes laboratory demonstrations.

PHTH 559. Geriatrics. 2 Units.
Overview of the normal and pathological changes seen during the aging process as related to physical therapy. Includes theories and demographics of aging, physiological and psychosocial changes, principles of geriatric rehabilitation, pharmacology, orthopedic considerations, fall risk, and fall prevention.

PHTH 561. Physical Therapy Administration. 4 Units.
Principles of organization and administration in health-care delivery. Multidisciplinary approach to patient management and patient-therapist relations. Administration of physical therapy services. Professionalism, medicolegal considerations, supervision and training of support personnel. Departmental design and budgetary considerations.

PHTH 563. Scientific Inquiry I. 2 Units.
Using the team-based learning approach, introduces students to the terminology, methodology, and skills needed to become efficient and critical consumers of published evidence. Teaches students the elements of focused clinical questions development, hypothesis development, study designs, sampling techniques, study variables, measurement, reliability, validity, threats to validity, and statistics as they relate to evidence-based practice.
PHTH 564A. Scientific Inquiry II A. 1 Unit.

Students learn the elements of evidence-based practice, how to balance evidence with patients’ preferences and clinical expertise, and how to become lifelong learners using evidence-based practice. Guided by a faculty advisor, students develop a focused clinical question; obtain, analyze, synthesize, and integrate evidence; and then evaluate outcomes related to the question.

PHTH 564B. Scientific Inquiry II B. 1 Unit.

Students create and submit a written systematic review of the evidence gathered and appraised in PHTH 564A Scientific Inquiry II A. Evidence-based practice experience culminates in a formal oral presentation of the findings to an audience of faculty and peers. Prerequisite: PHTH 563, PHTH 564A.

PHTH 566. Pathology. 4 Units.

Fundamental mechanisms of disease, including cell injury, inflammation, repair, fluid disorders, neoplasms; developmental, genetic, pediatric, immune, infectious, physical, dietary, blood, vascular, and heart diseases.

PHTH 567. Pain Science. 2 Units.

Integrates conceptual frameworks that address clinical transitioning from acute to chronic pain. Presents functional connectivity brain patterns related to pain signatures. Reviews functional MRI pain research related to clinical presentations of acute, chronic, and neuropathic pain, and pain-prone personality disorders. Applies a classification system for identifying chronic pain patients and introduces counseling management strategies.

PHTH 568. Integrative Neuoroanatomy. 4 Units.

Basic anatomy and function of the central, peripheral, and autonomic nervous systems and related structures. Gross anatomy of the brain and spinal cord. Functional consideration of cranial nerves, tracks, and nuclei of major systems. Lecture, slides, and laboratory with specimens, models, and exercises.

PHTH 569. Clinical Neurology. 2 Units.

Introduces the practice of neurologic physical therapy. Emphasizes neurologic disorders routinely encountered by physical therapists and their clinical manifestations. Presents components of the neurologic physical therapy examination.

PHTH 571. Physical Therapy Practicum I. 1 Unit.

A two-week, forty clock hours per week, clinical education experience. Allows students to begin utilizing physical therapy clinical and professional skills learned during the first year of the DPT curriculum. Supervision by a licensed physical therapist. Includes direct patient care, as well as possible participation in specific site team conferences, demonstrations, special assignments, and observation.

PHTH 572. Physical Therapy Practicum II. 2 Units.

A four-week, forty clock hours per week, clinical education experience. Students apply and practice knowledge and skills learned in general medicine, neurologic, orthopedics, and preventive care/wellness as they relate to patients across the lifespan. Supervision by a licensed physical therapist. Includes direct patient care, as well as possible participation in specific site team conferences, demonstrations, special assignments, and observation.

PHTH 573. Physical Therapy Practicum III. 1.5 Unit.

Third in a series of three practica. Provision of direct patient care during full-time clinical placement and participation at acute, outpatient, neurorehabilitation, orthopedics, geriatrics, pediatrics, sports medicine, or wellness/preventive care settings. Offered Summer quarter of the third academic year.

PHTH 575. Orthopaedics IV. 1 Unit.

A three-quarter course that integrates examination procedures taught in the orthopaedic curriculum. Culminates in a comprehensive laboratory practical that includes the five elements of patient/client management, as described in the Guide to Physical Therapy Practice: examination, evaluation, diagnosis, prognosis, and intervention.

PHTH 586. Orthotics and Prosthetics. 2 Units.

Clinical reasoning in the attributes and interventions of normal and abnormal gait characteristics based on the field of orthotics and prosthetics. Instruction with various types of orthotics and prosthetics in order to collaborate with O&P clinicians and patients in locomotion rehabilitation.

PHTH 595. Clinical Imaging. 3 Units.

Introduction to general principles of pharmacology, including actions of commonly used medications on physiological processes related to physical therapy.

PHTH 596. Orthopaedics V. 3 Units.

Introduces the practice of orthopaedic physical therapy. Emphasizes the specialized area of orthopedic physical therapy.

PHTH 597. Specialized Interventions in Physical Therapy. 3 Units.

Presents the newest evidenced-based clinical evaluation and treatment applications over the spectrum of the patient population in the field of physical therapy. Emphasizes the specialized area of orthopedic physical therapy.

PHTH 598. Pharmacology. 2 Units.

Introduction to general principles of pharmacology, including actions of commonly used medications on physiological processes related to physical therapy.

PHTH 701. Physical Therapy Affiliation I. 5 Units.

First of three 10-11 week, long-term clinical experiences in an affiliated site under the mentorship of a licensed physical therapist using a standardized assessment tool. Average weekly attendance of 40 hours expected. Clinical settings include acute care, neurorehabilitation, orthopedics, geriatrics, sports medicine and wellness clinics, pediatrics, subacute and long-term care. Program provides preparation for attendance and overall assessment.

PHTH 702. Physical Therapy Affiliation II. 5 Units.

Second of three 10-11 week, long-term clinical experiences in an affiliated site under the mentorship of a licensed physical therapist using a standardized assessment tool. Average weekly attendance expected is 40 hours. Clinical settings include acute care, neurorehabilitation, orthopedics, geriatrics, sports medicine and wellness clinics, pediatrics, subacute and long-term care. Program provides preparation for attendance and overall assessment.

PHTH 703. Physical Therapy Affiliation III. 5 Units.

Third of three 10-11 week, long-term clinical experiences in an affiliated site under the mentorship of a licensed physical therapist using a standardized assessment tool. Average weekly attendance expected is 40 hours. Clinical settings include acute care, neurorehabilitation, orthopedics, geriatrics, sports medicine and wellness clinics, pediatrics, and subacute and long-term care. Program provides preparation for attendance and overall assessment.
PTGR 731. Advanced Orthopaedic Studies. 3 Units.
Specialty track that provides opportunity to pursue, in greater depth, various topics related to current trends in orthopaedic physical therapy, and to develop advanced clinical skills, where appropriate.

PTGR 732. Advanced Neurologic Studies. 3 Units.
Continued development of critical thinking, refinement of previously learned neurologic patient management skills, and introduction to new content supporting neurologic physical therapy practice.

PTGR 733. Advanced General Medicine Studies. 3 Units.
Specialty track that provides opportunity to pursue, in greater depth, various topics related to current trends in general medicine physical therapy, and to develop advanced clinical skills, where appropriate.

PTGR 736. Residency Level Clinical Experience. 1 Unit.
Clinical mentorship under the supervision of a master clinician. Didactic instruction that draws upon a variety of strategies, including case reviews, 1:1 patient mentoring, experiential video analysis and feedback, activities that involve scientific inquiry, and interpretation of the literature and/or clinical experiences.

### Physical Therapy – Graduate (PTGR)

#### Courses

**PTGR 500. Integrative Approach to Early Rehabilitation. 3 Units.**
Advanced study in acute and subacute rehabilitation as it applies to the early intervention of physical therapy. Emphasizes wound care management and treatment; cardiopulmonary assessment and treatment; ECG interpretation; and the evaluation process for acute rehabilitation, including spinal cord injury and stroke. Reviews comprehensive team approach, with utilization of neuropsychology and case management.

**PTGR 501. Advanced Orthopaedic Specialty Tracks I. 3 Units.**
Presents the newest clinical treatment applications over the spectrum of the patient population in the field of orthopaedic physical therapy. Emphasis on the cervicothoracic spine and the shoulder girdle.

**PTGR 502. Advanced Orthopaedic Specialty Tracks II. 3 Units.**
Presents the newest clinical treatment applications over the spectrum of the patient population in the field of orthopaedic physical therapy. Emphasizes the thoracolumbar and the lumbopelvic regions.

**PTGR 503. Medical Documentation and Billing. 3 Units.**
Emphasizes expanded skills in medical documentation and communication in the clinical setting. Includes documentation following Medicare guidelines and the Guide to Physical Therapy Practice, justification of care using measurable objective data, home health episodic payment, billing and reimbursement, workers' compensation, interdisciplinary communication, medical dictation, and electronic medical records and documentation related to physical therapy.

**PTGR 504. Science and Biomechanics of the Fascia and the Art of Myofascial Release. 3 Units.**
Bridges the science and art of myofascial release to learn clinically and anatomically based approaches to myofascial release. Focuses on how the fascia and muscle create dysfunction in the human body and increase stress to the system, leading to the occurrence of symptoms encountered clinically in the form of common musculoskeletal pathologies.

**PTGR 505. Orthopaedic Intervention: Regional Interdependency of the Cervical Spine & Upper Extremities. 3 Units.**
Advanced clinical assessment, treatment, and management of orthopaedic disorders of the upper extremities. Emphasis on regional interdependency. Includes biomechanics, examination, and intervention of the cervical spine and shoulder complexes, emphasizing refinement of the cervico-thoracic spine and upper-quarter screen and evaluation. Includes lecture and laboratory.

**PTGR 506. Soft-Tissue Mobilization. 3 Units.**
Helps practicing physical therapy clinicians optimize skills and refine selection of the most effective soft-tissue mobilization techniques to maximize specific musculoskeletal functional outcomes. Students learn new techniques and refine and master previously learned techniques through lecture, demonstration, practical examinations, and hand-on techniques.

**PTGR 507. Advanced Pediatric Clinical Practice. 3 Units.**
Physical therapy management of the pediatric patient. Emphasizes observation and analysis of typical development, common movement dysfunctions, and evidenced-based interventions and treatment techniques for the developmentally delayed child.

**PTGR 508. Current Topics in Neurological Rehabilitation. 3 Units.**
Presents evidence-based physical therapy treatment applications for neurologically impaired patients across the lifespan. Evaluation and treatment of patients with acquired brain injury, stroke, spinal cord injury, vestibular disorders, diabetic neuropathies, and amputations. Emphasizes designing treatment plans, integrating family training, and maximizing independence using the International Classification of Functioning, Disability and Health (ICF) model.

**PTGR 509. Function-Based Rehabilitation. 3 Units.**
Evidenced-based course that covers physical therapy practice relevant to adult neurological rehabilitation. Emphasizes NDT, motor learning, and clinical decision making. Exposes students to material through problem-based learning, literature review, lecture, discussion, and intensive hands-on sessions focused on mastery of manual therapy application.

**PTGR 510. Neurologic Upper Extremity Management. 3 Units.**
Evidenced-based course that covers physical therapy practice relevant to adult neurological rehabilitation. Emphasizes a PNF perspective with a focus on clinical decision making. Exposes students to material through problem-based learning, literature review, lecture, discussion, and intensive laboratory sessions focused on mastery of manual therapy application.

**PTGR 511. Advanced Clinical Practice I: Orthopaedic Rehabilitation. 3 Units.**
Student demonstrates and practices advanced examination, assessment, and treatment of the lumbar spine, pelvic girdle, and lower extremities. Lecture and demonstration.

**PTGR 512. Advanced Clinical Practice II. 3 Units.**
Physical therapy management of individuals with vestibular disorders resulting in dizziness and postural instability. Emphasizes application and integration of theoretical constructs, evidenced-based practice, examination, evaluation, diagnosis, prognosis, intervention, and outcomes measurement. Learner-centered pedagogy requiring considerable weekly preclass preparation.

**PTGR 513. Advanced Clinical Practice III. 3 Units.**
Advanced clinical decision-making skills, with focus on patient classification, clinical-diagnosis practice parameters, and practice guidelines. Emphasizes development of clinical algorithms, clinical prognostic skills, and outcome measures.
PTGR 514. Professional Systems in Management I. 3 Units.
Administering the academic department: personnel selection, development, and evaluation; finance; team development; and leadership theories.

PTGR 515. Cardiopulmonary Approaches to Assessment, Wellness, and Disease. 3 Units.

PTGR 516. Movement Science of the Upper Quarter. 3 Units.
Presents pathomechanics of spine and upper extremity injuries. Explores the role of muscular imbalance in the pathogenesis of orthopaedic disorders of the upper quarter, and how faulty biomechanics contribute to injuries. Diagnosis, analysis, and evaluation of normal and abnormal movement patterns. Development and design of specific interventions aimed at changing movement dysfunctions of the upper quarter.

PTGR 517. Movement Science: Lower Quarter Biomechanical Relationships. 3 Units.
Presents pathomechanics of lumbar spine and lower extremity injuries. Explores the role of muscular imbalance in the pathogenesis of common orthopaedic disorders of the lower quarter and how faulty biomechanics can contribute to injuries. Diagnosis, analysis, and evaluation of normal and abnormal movement patterns. Development and design of specific interventions aimed at changing movement dysfunctions of the lower quarter.

PTGR 518. Topics in Rehabilitation. 1-6 Units.
Lecture and discussion of current topics relating to the practice of physical therapy. Content varies from quarter to quarter. (May be repeated for additional credit for a maximum of 6 quarter units.)

PTGR 519. Home Health Physical Therapy for the Post-Acute Patient. 3 Units.
An in-depth course for physical therapy students interested in the home health setting. Special emphasis on Medicare guidelines and the requirements necessary to excel in this progressive and growing setting.

PTGR 520. Cervical Spine. 3 Units.
Evaluation and treatment of patients using best practices and advanced orthopedic skills for the cervical spine. Differentiates clinical conditions and enhances clinical decision making. Integrates manual therapy into patient care. Links clinical practice guidelines to the International Classification of Functioning, Disability, and Health for impairment and function-based diagnosis, examination, and intervention.

PTGR 521. Lumbar Spine. 3 Units.
Evaluation and treatment of patients using best practices and advanced orthopedic skills for the lumbar spine. Differentiates clinical conditions and enhances clinical decision making. Integrates manual therapy into patient care. Links clinical practice guidelines to the International Classification of Functioning, Disability, and Health for impairment and function-based diagnosis, examination, and intervention.

PTGR 522. Assessment and Management of the Knee. 3 Units.
Evaluation and treatment of patients using best practices and advanced orthopedic skills for musculoskeletal conditions of the knee. Differentiates clinical conditions and enhances clinical decision making. Integrates manual therapy into patient care. Links clinical practice guidelines to the International Classification of Functioning, Disability, and Health for impairment and function-based diagnosis, examination, and intervention.

PTGR 523. Advanced Neurological Rehabilitation. 3 Units.
Studies in-depth the patient with spinal cord injury, including etiology, current treatment techniques in acute and outpatient settings, and principles of exercise physiology. Reviews research activities with regard to a cure for spinal cord injury, as well as the legal aspects of ADA and the individual with a spinal cord injury.

PTGR 524. Women's Health Issues I. 3 Units.
Clinical aspects of women's health issues. How to develop a women's health program in the clinical setting. Introduces various pathologies and treatment strategies for specific diagnoses that could be encountered in the clinical setting. Women's health during adolescence, the reproductive years, and the geriatric years.

PTGR 525. Women's Health Issues II. 3 Units.
Advanced course further exploring women's health issues—including treatment strategies for women during various phases of their lives. Anatomy and physiology during adolescence, the reproductive years, and the geriatric years.

PTGR 526. Health-related Quality of Life and Health Satisfaction in Health Care. 3 Units.
Involves students in the incorporation of Loma Linda University's motto, "To make man whole," as a critical aspect of improving quality of life. Emphasizes ways to improve quality of life in aging and disabled populations. Uses quality-of-life and health-satisfaction instruments and outcomes to inform students' decision making and patient care across the life span and as an indicator of successful aging. Students develop a quality-of-life intervention program.

PTGR 527. Skilled Nursing Facility Physical Therapy Practice, Interventions and Outcomes. 3 Units.
Orientation to the skilled nursing clinical setting. Topics include, Medicare, Medicaid/Medi-Cal, and private insurance billing and regulations; resource utilization groups; common patient populations; treatment strategies; and, outcome measurements. Discussion and integration of evidence-based practice maximizing outcomes, compliance, and patient satisfaction.

PTGR 528. Residency Level Advanced Seminars. 1 Unit.
Accurate interpretation of emerging evidence with applications to physical therapy conditions. Contextually incorporates traditional classroom instruction, group activities and projects, case presentations, live demonstrations, case-based problem-solving sessions, and role-play activities into the clinical setting. Preparation for specialization certification by the American Board of Physical Therapy Specialists.

PTGR 529. Integumentary and Lymphatic Systems: Evaluation and Intervention. 3 Units.
Provides physical therapists with knowledge and skills to identify patients at risk for development of integumentary and lymphatic complications; to prescribe preventive measures to promote skin and lymphatic integrity; and to treat conditions once they develop.

PTGR 531. Advanced Orthopaedic Procedures I. 3 Units.
Student demonstrates and practices advanced examination and treatment of the lumbar spine, pelvic girdle, and lower extremities.
PTGR 532. Advanced Orthopaedic Procedures II. 3 Units.
Student demonstrates and practices advanced examination and treatment of the cervical spine, shoulder girdle, and upper extremities.

PTGR 533. Advanced Orthopaedic Procedures III. 3 Units.
Student demonstrates and practices advanced examination and treatment of the lumbar spine, thoracic spine, and rib cage.

PTGR 534. Sensory Integration Disorders. 3 Units.
Exploration of sensory integration disorders—including nystagmus, fluid abnormalities of the inner ear, and physical therapy management of individuals with chronic motion sensitivity and cervicogenic dizziness. Course emphasizes application and integration of theoretical constructs and evidenced-based practice. Prerequisite: PTGR 512.

PTGR 535. Sensory Integration Disorders II. 3 Units.
Explores sensory integration disorders and clinical applications. Emphasizes fluid abnormalities of the inner and middle ear, cervicogenic dizziness, theoretical constructs, and evidence-based practice. Learner-centered hybrid course pedagogy includes three on-line and two face-to-face classes. Prerequisite: PTGR 534.

PTGR 536. Sensory Integration Disorders III. 3 Units.
Explores sensory integration disorders and clinical applications. Emphasizes the neurophysiology of nystagmus, push-pull system, Ewald’s laws, and dynamic visual acuity testing. Learner-centered hybrid course pedagogy that includes three on-line and two face-to-face classes. Prerequisite: PTGR 534.

PTGR 550. Introduction to Psychoneuroimmunology: The Science of Whole Person Care. 3 Units.
Studies the effect of the neurological system on physical health, with a focus on psychoneuroimmunology. Summarizes scientific disciplines that study brain, immune system, and health behavior interactions that provide the health-care professional with an integrative understanding of lifestyle, whole person care for immune system function, and wellness.

PTGR 551. Clinical Translation of Pain Science. 3 Units.
Overview of pain science; including, chronic pain, the neurobiology of pain, pain mechanisms, psychological and cognitive aspects of pain, and measurement and assessment of pain. Examines neuropathic pain and its contribution to the "centralized pain" component and cognitive behavioral therapies. Discusses pharmacology concepts that help "retrain the brain" in patients suffering acute pain, while preventing the progression to chronic pain.

PTGR 552. Pain Science: Interactions of the Brain and Body. 3 Units.
Study of the transition from acute to chronic pain states. Distinguishes among peripheral neurogenic, central, and somatic pain mechanisms, and provides a foundation for the management of pain disorders through clinical decision-making. Utilizes functional MRI and neurocognitive function to recognize relationships among the brain, personality disorders, and acute and chronic pain.

PTGR 553. Clinical Reasoning and Critical Thinking in Physical Therapy. 3 Units.
Examines aspects of the “cognitive engine” related to evaluation, management, and decision-making for orthopaedic physical therapy patients. Develops use of goal-directed thinking, and analytical and evaluative questioning. Supports data gathering and interpretation, evaluation methodology, treatment planning and execution, and prognosing. Provides support for defending, justifying, and rationalizing clinical decisions.

PTGR 554. Writing for the Physical Therapy Professional and Educator. 3 Units.
Develops clear, precise, and audience appropriate writing skills. Links practical applications to common writing situations found in the health professions and education, ranging from intradisciplinary written communication to preparing abstracts and manuscripts for submission.

PTGR 555. Grant Writing for Health Professionals. 3 Units.
Addresses proposal-writing skills essential for acquiring competitive grant funding from government agencies and private foundations. Includes content knowledge, writing proficiency, research skills, originality, creativity, alignment with agency guidelines, and development and submission of a compelling proposal.

PTGR 556. Research and Journal Club Seminars. 1 Unit.
Presents novel and developing topics in the field of rehabilitation and medicine. Provides interactions with well-established and emerging investigators. Encourages state-of-the-art approaches and thinking in rehabilitation scholarship, with emphasis on physical therapy research and innovations.

PTGR 557. Doctoral Dissertation Seminar. 1 Unit.
A year-long course that assists doctoral students with development of dissertation chapters through the oral defense of the dissertation. Emphasis on the literature review, research design, committee formation, institutional review board training, time and project management, framing of chapters, dissertation format standards, and dissertation defense etiquette.

PTGR 570. Muscle Energetics and Biochemistry. 3 Units.
Surveys biochemistry and metabolic pathways related to muscle function during exercise and at rest. Includes muscle biochemistry, glycolysis, gluconeogenesis, beta oxidation, protein metabolism, and nutritional requirements of the cell. Emphasizes metabolic, cardiac, pulmonary, and neurological disorders that limit optimal muscle function and development of physical therapy protocols to minimize limitations. Covers prerequisites in organic and cellular chemistry.

PTGR 571. Advanced Physiology I: Neurobiology. 3 Units.
Surveys cell and whole-body physiology. Includes physiology of the neuron and nerve conduction, molecular transport at the cellular level, cardiovascular and renal physiology, gastrointestinal physiology, endocrinology, and neurophysiology. Emphasizes muscles and neurophysiology as they relate to the cardiovascular, respiratory, and endocrine systems.

PTGR 572. Advanced Physiology II: Exercise and Thermoregulation. 3 Units.
Focuses on energy sources utilized by the body for exercise, neural and mechanical structures of mechanisms that control body movements, environmental influences on exercise performance, the physiology of thermoregulation, and principles of aerobic and anaerobic exercise. Applies concepts and principles to normal and disabled human conditions.

PTGR 573. Pathokinesiology of Gait. 3 Units.
Advanced observational analysis of normal and abnormal human locomotion, with comparison of pathological differences.
PTGR 574. Current Issues in Basic Science. 3 Units.
Studies the current issues in basic science, as related to physical therapy. Topics may include current advances in biomechanics, cell and molecular biology, tissue engineering and transplants, pharmacology, and presentation of basic science research. Content includes scientific literature reviews and participation in a wet lab activity that includes development of a question or hypothesis and experimental plan, possible execution of the plan, and interpretation of results.

PTGR 577. Pharmacology in Physical Therapy. 3 Units.
Principles of pharmacology as related to diagnosis, prevention, and treatment of disease, including a presentation of the pharmacology and therapeutic value of drugs used in rehabilitation medicine. Related topics include pharmacokinetics, pharmacodynamics, adverse effects, drug interactions, and drug toxicity—with special consideration given to pediatric and geriatric pharmacology.

PTGR 578. Medical Screening for Physical Therapists. 3 Units.
Screening for nonneuromusculoskeletal origins for the musculoskeletal complaints of patients who commonly seek rehabilitation in the physical therapy setting. Particularly emphasizes components of the history and physical examination that suggest medical pathology requiring a medical referral. Knowledge and skills related to screening for medical pathologies of the 11 body systems in patients with musculoskeletal complaints of the thorax, pelvis, spine and extremities.

PTGR 579. Clinical Imaging for Physical Therapist. 3 Units.
Explores modern imaging techniques used to assess musculoskeletal disorders and cardiovascular pathologies. Includes radiographs, CAT scans, MRIs, bone densitometry, PET scans. Emphasizes clinical ultrasound imaging as used in physical therapy.

PTGR 580. Movement Science: Bio-control. 3 Units.
Emphasizes application and discussions of the contemporary knowledge of motor control and learning to individuals with movement dysfunctions.

PTGR 584. Functional Magnetic Resonance Imaging. 3 Units.
Introduces students to the techniques applied in functional magnetic resonance imaging and their applications. Covers the theoretical basics of MRI, different types of techniques and software used for processing, group analysis, and interpretation of results.

PTGR 585. Three-dimension Medical Imaging Quantitation. 3 Units.
Introduces basic principles of medical imaging as they relate to volumetrics and 3D rendering. Topics include: concept of the voxel, 3D image generation, multilinar reformat measurements, segmentation, and data presentation. Hands-on experience with 3D imaging software that teaches common tools sets for 3D processing. Prerequisite: PTGR 584.

PTGR 586. MATLAB. 3 Units.
Discusses general programming concepts; different ways to plot, visualize, and explore data; and typically used toolboxes and functions in MATLAB.

PTGR 590. Political Advocacy and Health Policy for Physical Therapists. 3 Units.
Focuses on health-care advocacy at the national, state, grassroots, and local levels as it promotes the interests of patients, professionals, and organizations involved in health-care delivery. Students examine and discuss policy issues and strategies relevant to physical therapists and other health professionals and educators; and learn a systematic, comprehensive approach to political advocacy and policy activism.

PTGR 591. Biomechanics I. 3 Units.
Reviews classic concepts in biomechanics at the tissue, joint, and whole body level. Provides a basic understanding of classic and current biomechanical research and how to interpret/synthesize this research. Explores topics related to muscle and tendon function/dysfunction, joint lever biomechanical demands and function, and whole body analysis of human movement. Facilitates the development of theoretical framework for biomechanical research questions.

PTGR 592. Biomechanics II. 3 Units.
Reviews methodologies related to the biomechanics of human movement. Areas of focus include kinematics, kinetics, energetic, inverse dynamics, data processing and interpretation, and muscle force measurements. Focuses on the interpretation of kinematic, kinetic, and energetic data and appropriate measures to quantify movement. Facilitates the development of methods to test biomechanical research questions and apply biomechanical concepts to the clinical environment. Prerequisite: PTGR 591.

PTGR 599. Comprehensive Examination. 0 Units.
Required written examination to be completed at the end of the second didactic year for the Doctor of Science degree and the Doctor of Philosophy degree in physical therapy science. Comprehensively evaluates student’s knowledge in four domains without the assistance of outside resources: education, research, clinical practice/science, and ethics/professionalism. Successful completion required for continuation in the program. Prerequisite: PHTH 535 or AHCJ 530; PHTH 536 or AHCJ 531; AHCJ 599.

PTGR 690. Research Rotations. 1-3 Units.
Involves students in the research and discovery culture of the University and clinical settings through observation of and/or participation in ongoing faculty research and grant projects; as well as graduate student research projects. Includes research data-collection equipment, mentorship, dissertation defenses, research-finding presentations, and/or pilot studies that students design for this practicum experience.

PTGR 693. Research and Statistics III: Development and Approval of Research Topic and Questions. 3 Units.
Research-topic selection, development of research questions, literature review, oral defense of research topic, questions and proposed research design, and approval. Prerequisite: AHRM 582.

PTGR 694. Proposal Development and Institutional Review Board Approval. 3 Units.
With oversight by the research guidance committee, student develops a written research proposal that describes the problems to be investigated, the hypotheses and assumptions to be developed, and the proposed experimental design; and that subsequently is submitted to the Office of Sponsored Research for Institutional Review Board approval. Prerequisite: PTGR 693.

PTGR 695. Research and Statistics V: Data Collection. 3 Units.
Research data planning, setup, standardization of procedures, collection, electronic data capture, management, and storage leading to dissertation.

PTGR 696. Research and Statistics VI: Data Analysis. 3.6 Units.
Individual arrangements for doctoral students to work with their research guidance committee on analysis and presentation of research data. Student prepares manuscript presenting results of doctoral research study.
Physicians Assistant (PAST)

Courses

PAST 501. Anatomy for Physician Assistants I. 2 Units.
First of three courses in anatomy for physician assistants. Study of the anatomical structure of the human body by organ system. Includes dissection of cadavers and preserved specimens; and, histology, anatomic relations, and the anatomical basis for disease, injury and dysfunction.

PAST 502. Anatomy for Physician Assistants II. 2 Units.
Second of three courses in anatomy for physician assistants. Study of the anatomical structure of the human body by organ system. Includes dissection of cadavers and preserved specimens; and, histology, anatomic relations, and the anatomical basis for disease, injury and dysfunction. Prerequisite: PAST 501.

PAST 503. Anatomy for Physician Assistants III. 2 Units.
Third of three courses in anatomy for physician assistants. Study of the anatomical structure of the human body by organ system. Includes dissection of cadavers and preserved specimens; and, histology, anatomic relations, and the anatomical basis for disease, injury and dysfunction. Prerequisite: PAST 501, PAST 502.

PAST 504. Primary Care Pediatrics. 2 Units.
Introduces common medical and surgical disorders encountered in pediatric medicine. Emphasizes primary care concepts in the care of children. Introduces rare disorders that the physician assistant may encounter in primary care. Presentation of disease processes mirrors adult medicine by discussing etiology, pathophysiology, clinical presentation, diagnostic work-up, and management.

PAST 505. Women's Health Care. 2 Units.
Common problems encountered in caring for women; management of these problems. Etiology, pathophysiology, clinical presentation, and diagnostic work-up.

PAST 511. Pharmacology for Physician Assistants I. 2 Units.
The first of three parts of a continuum of courses that study the basic concepts of pharmaceuticals used in the diagnosis, prevention, and treatment of diseases—including a systematic presentation of pharmacology and the therapeutic value of the drugs used in medicine. Related topics include drug legislation, routes of administration, adverse effects, drug interactions, and drug toxicity, with special consideration to pediatric and geriatric pharmacology. Prerequisite: PAST 511.

PAST 512. Pharmacology for Physician Assistants II. 2 Units.
The second of three parts of a continuum of courses that studies the basic concepts of pharmaceuticals used in the diagnosis, prevention, and treatment of diseases—including a systematic presentation of pharmacology, and the therapeutic value of the drugs used in medicine. Related topics include drug legislation, routes of administration, adverse effects, drug interactions, and drug toxicity, with special consideration to pediatric and geriatric pharmacology. Prerequisite: PAST 511.

PAST 513. Pharmacology for Physician Assistants III. 2 Units.
The third of three parts of a continuum of courses that studies the basic concepts of pharmaceuticals used in the diagnosis, prevention, and treatment of diseases—including a systematic presentation of pharmacology and the therapeutic value of the drugs used in medicine. Related topics include drug legislation, routes of administration, adverse effects, drug interactions, and drug toxicity, with special consideration of pediatric and geriatric pharmacology. Prerequisite: PAST 511, PAST 512.

PAST 516. Physician Assistant Professional Issues. 2 Units.
A history of the physician assistant (PA) profession and current trends and issues. Includes the PA’s role in health-care delivery, political, legal, and intraprofessional factors that affect PA practice, and the PA’s role in relation to physicians and other health-care providers. Addresses professional responsibility and biomedical ethics, professional organizations, program accreditation, graduate certification and recertification, employment considerations, and professional liability.

PAST 547. Basic Medical Science. 3 Units.
Provides an overview of scientific principles as they pertain to the practice of clinical medicine. Emphasizes microorganisms commonly encountered by physician assistants in clinical practice. Provides a foundation for principles of clinical medicine and pharmacology.

PAST 551. Normal and Pathologic Physiology for Physician Assistants I. 2 Units.
Exploration of normal physiological function from a systems-based medical perspective which serves as a foundation for understanding the process of disease. Includes etiology, pathogenesis, and clinical manifestations of medical disorders.

PAST 552. Normal and Pathologic Physiology for Physician Assistants II. 2 Units.
Exploration of normal physiological function from a systems-based medical perspective which serves as a foundation for understanding the process of disease. Includes etiology, pathogenesis, and clinical manifestations of medical disorders. Prerequisite: PAST 551.

PAST 553. Normal and Pathologic Physiology for Physician Assistants III. 2 Units.
Exploration of normal physiological function from a systems-based medical perspective which serves as a foundation for understanding the process of disease. Includes etiology, pathogenesis, and clinical manifestations of medical disorders. Prerequisite: PAST 551, PAST 552.

PAST 554. Clinical Skills for Physician Assistants. 5 Units.
Introduces the basic skills and knowledge needed to evaluate and treat common illnesses and injuries. Safety, aseptic technique, BLS, ACLS, wound care, local anesthesia, suturing, casting, splinting, use of various tubes and drains, and emergency medicine; and surgery for physician assistants. Includes participation in clinical simulations for enhanced skill development.

PAST 556. Preventive Medicine and Health Promotion. 2 Units.
Selected topics dealing with disease prevention. Includes relevance of statistics, epidemiology, research designs, and clinical trials; and, disease trends and lifestyle modification. Examines the roles of physical activity, nutrition, immunization, and public health as approaches in communicable disease prevention. Addresses clinical preventive services leading to tailored health maintenance plans for individual patients.

PAST 558. Psychiatry for Physician Assistants. 3 Units.
Focuses on diagnosis and treatment of major psychiatric and mental disorders. Topics include depression, anxiety, phobias, substance and eating disorders, somatoform, psychoses, neuroses, and personality disorders.
PAST 571. Multicultural Competencies for Physician Assistants. 3 Units.

PAST 572. Cultural Immersion for Physician Assistants. 3 Units.
Emphasizes health and medicine as PA students obtain a cross-cultural experience while interacting with non-English-speaking patients and gaining a greater understanding of their patients’ culture. Requires completion of a community-based service project and immersion within the local community. Begins in Winter Quarter with culmination in the Summer Quarter.

PAST 575. Clinical Correlation for Physician Assistants I. 1 Unit.
Addresses critical thought process needed for diagnosis and management of clinical problems.

PAST 576. Clinical Correlation for Physician Assistants II. 1 Unit.
Teaches students to apply knowledge gained throughout the didactic curriculum via an interactive learning experience. Emphasizes the critical thought process needed for diagnosis and management of clinical problems. Prerequisite: PAST 575.

PAST 577. Clinical Correlation for Physician Assistants III. 1 Unit.
Emphasizes critical thought process needed for diagnosis and management of clinical problems. Prerequisite: PAST 575, PAST 576.

PAST 578. Clinical Correlation for Physician Assistants IV. 1 Unit.
Emphasizes the clinical presentation, etiology, pathophysiology, diagnostic work-up, and management of the conditions studied. Course objectives and specific learning objectives based upon NCCPA blueprint. Prerequisite: PAST 591, PAST 592.

PAST 594. Clinical Medicine for Physician Assistants IV. 2 Units.
Fourth of four courses that study common medical disorders encountered in primary care, as well as the management of these disorders. Includes the clinical presentation, etiology, pathophysiology, diagnostic work-up, and management of the conditions studied. Course objectives and specific learning objectives based upon NCCPA blueprint. Prerequisite: PAST 591, PAST 592, PAST 593.

PAST 593. Clinical Medicine for Physician Assistants III. 4 Units.
Third of four courses that study common medical disorders encountered in primary care, as well as the management of these disorders. Includes the clinical presentation, etiology, pathophysiology, diagnostic work-up, and management of the conditions studied. Course objectives and specific learning objectives based upon NCCPA blueprint. Prerequisite: PAST 591, PAST 592, PAST 593.
PAST 705. Rotation V. 6 Units.
A required six-week rotation in outpatient and/or inpatient settings in any of the following areas of concentration: family medicine, internal medicine, pediatrics, obstetrics and gynecology, general surgery, emergency medicine, psychiatry/behavioral medicine; and elective rotation through a medical or surgical service of choice.

PAST 706. Rotation VI. 6 Units.
A required six-week rotation in outpatient and/or inpatient settings in any of the following areas of concentration: family medicine, internal medicine, pediatrics, obstetrics and gynecology, general surgery, emergency medicine, psychiatry/behavioral medicine; and elective rotation through a medical or surgical service of choice.

PAST 707. Rotation VII. 6 Units.
A required six-week rotation in outpatient and/or inpatient settings in any of the following areas of concentration: family medicine, internal medicine, pediatrics, obstetrics and gynecology, general surgery, emergency medicine, psychiatry/behavioral medicine; and elective rotation through a medical or surgical service of choice.

PAST 708. Rotation VIII. 6 Units.
A required six-week rotation in outpatient and/or inpatient settings in any of the following areas of concentration: family medicine, internal medicine, pediatrics, obstetrics and gynecology, general surgery, emergency medicine, psychiatry/behavioral medicine; and elective rotation through a medical or surgical service of choice.

Physiology (PHSL)

Courses

PHSL 503. Biochemical Foundations of Physiology. 4 Units.
Engenders an appreciation of the molecular processes as a foundation for adequate understanding of physiology. Reviews biomolecules, enzymology, and metabolism. Introduces regulatory motifs, genetic principles, and expression of genetic information by employing examples relevant to dentistry.

PHSL 504. Physiological Systems of the Human Body. 5 Units.
Physiological bases of normal function. Lectures and laboratory demonstrations illustrating the physiological principles and systems in man.

PHSL 505. Homeostatic Mechanisms of the Human Body. 5 Units.
Physiological basis of homeostatic control mechanisms. Lectures and laboratory demonstrations illustrating how the various systems of the body are controlled.

PHSL 506. Advanced Physiology and Pathophysiology for Nurse Anesthetist I. 5 Units.
Overview of physiology and pathophysiology (cell, neuro, cardiovascular, pulmonary, GI, renal, endocrine, and reproductive systems).

PHSL 507. Advanced Physiology and Pathophysiology for Nurse Anesthetist II. 4 Units.
Part II of physiology and pathophysiology (cell, neuro, cardiovascular, pulmonary, GI, renal, endocrine, and reproductive systems). Prerequisites: PHSL 506.

PHSL 519. Medical Physiology. 7.5 Units.
Physiological basis of normal and selected pathological conditions, modern concepts of homeostasis, and negative feedback control systems.

PHSL 520. Medical Physiology. 7.5 Units.
Examines the physiological function and regulation of major organ systems, and the integration and interaction of these systems with one another. Includes cardiovascular, respiratory, gastrointestinal, renal, endocrine, reproductive systems, and exercise physiology. Presents essential levels of organization from cellular and molecular to tissue and organ systems. Emphasizes mechanical and integrative functions that enable adaption and survival in the face of changing needs and resources.

PHSL 537. Neuroscience. 4 Units.
Integrated approach to the fundamentals of neuroanatomy and neurophysiology, with applications to clinical neurology.

PHSL 541. Cell and Molecular Biology. 4 Units.
Prerequisite: Organic chemistry and one of the following: biochemistry, molecular biology, or cell biology. Physics desirable. Prerequisite: Organic chemistry and one of the following: biochemistry, molecular biology, or cell biology. Physics desirable.

PHSL 555. Biology of Cancer. 3 Units.
Interdisciplinary approach to study of the causation, characterization, and prevention of cancer. Offered alternate years.

PHSL 560. Bone Physiology. 3 Units.
Studies bone cells and bone as an organ. Lectures and discussions include functions of bone cells, effects of growth factors, hormones and physical forces on bone, growth and repair of bone, osteoporosis, and other clinical conditions involving bone. Reviews current literature.

PHSL 587. Physiology of Reproduction. 2 Units.
Studies the development of the male and female reproductive systems, neural and hormonal control of reproductive function, fetal development, and parturition. Offered alternate years. Prerequisite or concurrent: PHSL 511, PHSL 512 or PHSL 521, PHSL 522.

PHSL 588. Pathophysiology. 4 Units.
Provides graduate students with an integrated understanding of normal human physiology and the most common pathological changes that occur throughout the lifespan. Focuses on using pathophysiologival concepts to explain clinical observations and management.

PHSL 595. Readings in Physiology. 1-4 Units.
Assigned reading and conferences on special problems in physiology.

PHSL 694. Special Problems in Physiology. 2-4 Units.

PHSL 697. Research. 1-8 Units.

PHSL 699. Dissertation. 2-4 Units.

PHSL 891. Physiology Elective. 1.5-24 Units.
Offers fourth-year medical students the opportunity to explore various areas of physiology, including research.

Play Therapy (PLTH)

Courses

PLTH 513. Introduction to Play Therapy. 3 Units.
Explores the history and theoretical underpinnings of play therapy. Gives attention to the explanatory nature of theories as informing methods and techniques used in assessment and the healing processes. Emphasis on professional ethics and legal guidelines. Introduces child centered play, cognitive-behavioral play, and Gestalt play therapies. Prerequisite: Completion of theory courses required in respective degree area, permission of instructor.
PLTH 515. Play Therapy III: Assessment and Diagnosis. 2 Units.
Foundational play therapy course that provides content on structured and informal assessment processes and techniques. Social and symbolic play provides balance of content and process of differential diagnosis from a neurocognitive basis of development, including variations in the developmental sequence caused by developmental disorders.

PLTH 516. Child-Centered Play Therapy. 3 Units.
A foundation play therapy course that provides a systematic treatment approach to child-generated play. Combines didactic presentations and experiential activities that detail the four major elements of CCPT technique: structuring, reflective listening, fantasy play, and limit setting. Gives attention to history and theory of CCPT, the benefits of the model, assessment, and combining CCPT with other models of child therapy.

PLTH 517. Sandplay: A Therapeutic Process. 3 Units.
Foundational play therapy course providing didactics on the theoretical basis, content, and process of sandplay. Active learning experiences provide students with opportunities to observe and engage in sandplay with children.

PLTH 546. Child-Parent Relationship Therapy-CPRT (Filial Therapy). 3 Units.
Provides students with an understanding of evidence-based play therapy interventions that support filial (parent-child) communication and relationships as children experiencing social, emotional, and behavioral difficulties are treated. Builds upon a previous foundation of play therapy course work.

PLTH 547. Play Therapy Approaches for Treating Developmental and Behavioral Disorders. 2 Units.
Explores developmental play therapy theory, methods, and techniques that provide children with experiences essential to physical and social-emotional growth and secure attachment in child-parent relationships. Emphasizes sensory integration, self-regulation, and adaptations for children with developmental delays. Explores adjunctive resources. Prerequisite: Completion of foundational play therapy courses.

PLTH 548. Child Psychosocial Play Therapy. 2 Units.
Provides advanced strategies and methods used to help children and families address environmental and life/stress adjustment issues. Includes child and family support that enhances wellness through self-regulation toward improved. Prerequisite: Completion of foundational play therapy courses.

PLTH 549. Therapeutic Play for Children Affected by Illness and Injury. 3 Units.
Teaches the developmental aspects of play therapy in collaboration with the developmental stages of the child/teen and family in the context of a health-care setting. Provides student with an experiential understanding of play therapy, recreation therapy, education, and practice. Cross-listing: PLTH 549.

PLTH 550. Trauma Focused Play Therapy. 3 Units.
Covers play therapy techniques, therapies, and models which help children prevent or resolve psychosocial challenges following trauma, and achieve optimal growth and development. Introduces principles of intervention and ethical/legal guidelines for the assessment and treatment of traumatized children.

PLTH 650. Play Therapy with Adolescents and Adults. 3 Units.
Emphasizes advanced play therapy with adolescents and adults. Includes transitional objects using a non-directive stance; games of rapport, courtesy, and good habits; metaphorical thinking; grounded play therapy; poetry and drama; cognitive-behavioral interventions for anger, bullies, victims, and bystanders; and filial therapy with adolescents. Prerequisite: Completion of foundational play therapy courses.

PLTH 700. Practicum in Play Therapy. 2 Units.
Provides supervised practice in play therapy assessment, diagnosis, and intervention techniques with children and their parents. Applies toward 45 hours of practicum experience. May be completed in up to five quarters. Prerequisite: Completion of foundational play therapy courses.

**Polysomnography (RSPS)**

**Courses**

RSPS 210. Foundation of Polysomnography and Sleep Medicine. 2 Units.
Covers the history of sleep medicine (polysomnography) from its inception and development to current practice. Enhances understanding of the role and differences of the polysomnographer. Teaches the documentation process in sleep laboratory facilities and understanding of the data required for monitoring patient and charting results during the study. Lectures include physiological factors that identify normal sleep pattern in adult and pediatric populations.

RSPS 216. 3- and 12-Leads ECG Interpretation. 2 Units.
Reviews 3-leads interpretation with advancement to 12-leads ECG. Reviews cardiac anatomy and physiology, underlying pathophysiology, and basic rhythm recognition with an overview of related treatments. Emphasizes skills needed by the bedside practitioner to differentiate between benign and life-threatening cardiac dysrhythmias. Includes principles of application and interpretation of the 12-lead system. Emphasizes recognition of the acute myocardial infarction.

RSPS 227. Neuroanatomy and Physiology of Sleep. 3 Units.
Covers the basic neuroanatomy of the brain and nervous system that is involved in the various normal and abnormal sleep patterns. Additional topics include: sleep pharmacology and medications; pharmacokinetics, drug mechanism of action; review of basic cardiac physiology and waveforms; respiratory anatomy and physiology and its relation to the central nervous system.

RSPS 230. Polysomnography Science Methodology. 2 Units.
Addresses preparation of sleep study patients and use of electroneurodiagnostic equipment in the polysomnography laboratory. Includes electrode placement; principles of the conduction system, signal derivation, and amplification; signal processing, filter, and sensitivity; calibration; and AC/DC instrumentation.

RSPS 234. Polysomnography Patient Education and Safety. 1 Unit.
Covers the management of patient safety in the sleep laboratory. Topics include: patient education about sleep, common chief complaints related to sleep disorders, infection control, cultural differences and interactions, ethics, and professionalism in the sleep laboratory.

RSPS 256. Polysomnography Monitoring and Scoring. 2 Units.
Teaches student to manage and identify device monitoring, such as: vital signs; EEG, ECG, EOG, and EMG waveforms; visual, arousal, cardiac, movement, and respiratory scoring criteria and applicable protocols for observation and documentation. Assessing, monitoring, and recording patient-movement disorders, parasomnias, psychiatric sleep disturbances, and sleep. Data interpretation and recognition and their relation to sleep disorders. Prerequisite: EMMC 314, RSPS 210, RSPS 230.
RSPS 274. Polysomnography Diseases. 3 Units.
Recognition of sleep disorders and their pathophysiologies. Includes adult and pediatric obstructive sleep apnea, hypopneas, respiratory effort-related arousals, central apneas, complex sleep apnea, and Cheyne-Stokes. Introduces CPAP and titration methods, bilevel ventilation, oxygen therapy, and surgical interventions as treatments. Addresses nonrespiratory sleep disorders, such as narcolepsy, hypersomnia, insomnia, seizures, and epilepsy. Prerequisite: RSPS 210, RSPS 227.

RSPS 286. Polysomnography Case Study. 2 Units.
Student presents patient-case studies based on patient-information gathering that includes history and physical, review of systems, rationale for diagnostics and treatment, vital signs, PMH, questionnaire, scores, waveform, treatments, and study data.

RSPS 295. Polysomnography Practicum I. 4 Units.
Introduction to sleep center facilities, working hours, documentation, and personnel. Practice in patient assessment, obtaining patient history, complete set up, data acquisition, and reporting processes. Includes waveform interpretation, sleep study scoring, and patient monitoring. Application of interventional modalities to relieve relative sleep disorders. Prerequisite: RSPS 210, RSPS 227, RSPS 230, EMMC 314.

RSPS 296. Polysomnography Practicum II. 4 Units.
Gives students opportunities to perform advanced clinical procedures in the sleep center and perform complete polysomnogram independently under supervision of the sleep center staff. Prerequisites: RSPS 210, RSPS 227, RSPS 230, RSPS 295; EMMC 314.

RSPS 510. Sleep Neurophysiology and Pathologies. 4 Units.
First course in a three-course series that can be taken independent of the series. Case study-based analysis that covers advanced neurophysiology involved in various normal and abnormal sleep patterns and respiratory drive. Discusses common sleep pathologies and pharmacological interventions at the macro and molecular levels.

RSPS 511. Methodologies in Sleep Disorder Assessment and Intervention. 4 Units.
Second course in a three-part series, which can be taken independent of the series. Introduces foundations of patient preparation for polysomnogram evaluations. Discussion of physical principles employed in acquiring and interpreting cardiac, neuro, and respiratory diagnostics. Reiterates components of a PSG, cardiac diagnostics (including 3/12-lead ECG), and neurodiagnostics important for thorough evaluation of sleep disorders.

RSPS 512. Advanced Polysomnography Practicum. 4 Units.
Third course in a three-course series. Clinic-based practicum in which students perform a variety of sleep assessments—including patient set up, observation/monitoring, data acquisition, evaluation, and scoring. Students apply interventional modalities, such as CPAP or bi-level therapy with appropriate titration to relieve respiratory-related sleep disorders. Gives students opportunities to perform advanced clinical procedures in the sleep center and to perform complete polysomnographs independently under supervision of the sleep center staff. Students present case studies based on patient-information gathering that include history and physical, review of systems, rationale for diagnostics and treatment, vital signs, medical history, questionnaire, scores, waveform, treatments, and study data. Program director provides approval for distance education students’ mentorship and site assignment. At least half of the clinical activity mentored by a board-certified sleep specialist (MD/DO/PhD).

Population Medicine (PMED)

Courses

PMED 521. Population Medicine I. 4 Units.
Examination of population health for health practitioners. Includes: development and analysis of proposed preventive services; evidence-based guidelines for preventive services; epidemiology of common chronic diseases; and, community health status indicators. Applies advanced statistical and epidemiological principles. Prerequisite or concurrent: PCOR 501.

PMED 522. Population Medicine II. 4 Units.
Advanced examination of population health for health practitioners. Includes: community health characteristics; design and implementation of epidemiologic studies; application of epidemiological methods to public health issues; and, data analysis using advanced statistical methods. Applies advanced statistical and epidemiological principles. Prerequisite or concurrent*: PCOR 502*; PMED 521.

PMED 523. Population Medicine III. 4 Units.
Advanced examination of population health for health practitioners. Includes: investigation and response to disease clusters or outbreaks; surveillance system design and operation; epidemiology of common acute diseases; and, analysis using advanced statistical methods. Applies advanced statistical and epidemiological principles. Prerequisite or concurrent*: PCOR 503*; PMED 522.

PMED 541. Preventive Medicine in Public Health I. 2 Units.
Provides a selection of preventive medicine topics. Includes knowledge and application of community engagement as a health practitioner, as well as opportunities for the public health professional to develop additional skills.

PMED 542. Preventive Medicine in Public Health II. 2 Units.
Provides a selection of preventive medicine topics. Includes a framework for critical review of scientific literature, as well as opportunities to develop additional skills for the public health professional.

PMED 543. Preventive Medicine in Public Health III. 2 Units.
Provides a selection of preventive medicine topics. Includes a framework for critical review of scientific literature, as well as opportunities to develop additional skills for the public health professional.

PMED 544. Preventive Medicine in Public Health IV. 2 Units.
Provides a selection of preventive medicine topics. Includes a framework for critical review of scientific literature, as well as opportunities to develop additional skills for the public health professional.

PMED 545. Preventive Medicine in Public Health V. 2 Units.
Provides a selection of preventive medicine topics. Includes knowledge and application of community engagement as a health practitioner, as well as opportunities for the public health professional to develop additional skills.

PMED 546. Preventive Medicine in Public Health VI. 2 Units.
Provides a selection of preventive medicine topics. Includes a framework for critical review of scientific literature, as well as opportunities to develop additional skills for the public health professional.

PMED 547. Preventive Medicine in Public Health VII. 2 Units.
Provides a selection of preventive medicine topics. Includes a framework for critical review of scientific literature, as well as opportunities to develop additional skills for the public health professional.

PMED 548. Preventive Medicine in Public Health VIII. 2 Units.
Provides a selection of preventive medicine topics. Includes a framework for critical review of scientific literature, as well as opportunities to develop additional skills for the public health professional.
Preventive Medicine (PRVM)

Courses

PRVM 517. Lifestyle and Preventive Medicine. 4 Units.
Provides students with a broad foundation in epidemiology and biostatistics skills as it contributes to the organ system curriculum in the second year. Students formulate effective and evidence-based preventive medicine strategies in preparation for treating individual patients and communities. Utilizes a combination of lecture, case-based learning, online self-directed modules, and active learning modules to teach current preventive medicine approaches.

PRVM 791. Applied Preventive Medicine. 2 Units.
Longitudinally integrated course. Improves students' ability to identify and apply key concepts in preventive medicine and public health through practical application to patient cases, specifically focusing on literature analysis, preventive services selection, and motivational interviewing. Submitted work included in a portfolio that demonstrates growth in the discipline.

PRVM 891. Preventive Medicine Elective. 1.5-27 Units.
Offers fourth-year medical students the opportunity to explore various aspects of preventive medicine and public health, including nutrition, mission opportunities, functional medicine, lifestyle medicine, and research.

Prosthodontics (PROS)

Courses

PROS 500. Prosthodontic Literature Review. 2 Units.
 Discusses assigned topics from classic and current prosthodontic and course-related literature, led by students and moderated by faculty member in charge. Repeated registrations required to fulfill the total units.

PROS 501. Removable Partial Prosthodontics Literature Review. 2 Units.
 Discusses assigned topics from classic removable partial denture literature, led by students and moderated by faculty member in charge.

PROS 502. Complete Denture Prosthodontics Literature Review. 2 Units.
 Discusses assigned topics from classic complete-denture literature, led by students and moderated by faculty member in charge.

PROS 505. Patient Presentation Seminar (Prosthodontics, Implant, Perio). 1 Unit.
 Presents patient treatment. Discusses alternate methods of rehabilitation, as well as related literature. Repeated registrations required to fulfill the total units.

PROS 515. Practice Teaching in Prosthodontics. 1,2 Unit.
 Teaching experience in the areas of fixed and removable prosthodontics. Repeated registration required to fulfill the total units.

PROS 525. Dental Materials Science. 2 Units.
 Elements of materials science. Properties of structural solids, metals, ceramics, and polymers related to their structure—using basic laws and principles from physics, chemistry, and engineering science.

PROS 527. Clinical Application of Dental Materials. 2 Units.
 Discusses clinical application and manipulation of dental materials. Identifies and explains specific clinical problems and behavior based on the acquired knowledge of basic properties.
**Psychiatry (PSYT)**

**Courses**

**PSYT 526. Psychopathology. 4.5 Units.**
Covers mental status examinations. Includes: basic tools for gathering psychiatric information; advanced exposure to psychiatric disease and diagnosis; and, implementation of the DSM-V which involves mood, anxiety, psychotic, trauma, childhood, somatic, personality and sexual disorders. Addresses common comorbidities and psychopharmacologic and psychodynamic treatment options for each disorder.

**PSYT 599. Psychiatry Directed Study. 1.5-18 Units.**

**PSYT 701. Psychiatry Clerkship. 1.5-9 Units.**
Six-week clerkship paired with a four-week neurology clerkship. Includes a one-week addiction medicine rotation and two- and three-week rotations working with child, adolescent, and adult populations. Includes a clinical OSCE with a focus on diagnosis of mental illness, development of patient rapport, and identification of risk factors for suicide and homicide. Addresses the identification of ongoing issues of interpersonal transference toward patients and conflict management in patient care.

**PSYT 891. Psychiatry Elective. 1.5-27 Units.**
Offers fourth-year medical students the opportunity to take electives with psychiatry faculty in child and adult settings. An intensive reading/discussion course in religion and psychiatry.

**Psychology (PSYC)**

**Courses**

**PSYC 101. Introduction to Psychology. 4 Units.**
A general overview course focusing on the scientific study of both the behavioral and mental processes of human beings and animals. Covers history of psychology and scientific thought, biological basis of behavior, research methodology, sensation and perception, states of consciousness, memory, language and intelligence, developmental psychology, learning, personality, and abnormal psychology.

**PSYC 226. Lifespan Development. 4 Units.**
Life-span course emphasizing the physical, mental, emotional, social, and religious/moral development from conception through adulthood, aging, and death.

**PSYC 305. Psychological Foundations of Education. 4 Units.**
Explores educational psychology through application of development and learning theories to instruction, achievement motivation, self-esteem, classroom management, supportive and disruptive processes on school sites, campus standards, disciplinary practices, legal/ethical issues. Requires research on effective educational practices and related foundations. Additional research for graduate credit. Prerequisite: General psychology.

**PSYC 460. The Exceptional Individual. 3 Units.**
Studies the determinants, characteristics, problems, and adjustments of individuals who deviate markedly from the norm in their mental, physical, emotional, or social aptitudes, traits, and tendencies. Emphasizes education and career planning. Open to upper division graduate and postgraduate students only.

**PSYC 479. Human Neuropsychology. 4 Units.**
Introduces brain-behavior relationships, including cerebral asymmetry, disconnection syndromes, disorders of memory and language, biological substrates of affective behavior, motor and perceptual dysfunction, and drug actions.

**PSYC 501. Advanced Statistics I. 4 Units.**
General introduction to statistical analysis—detailing the descriptive/inferential distinction; and covering sampling distributions (e.g., normal, binomial), hypothesis testing, and basic parametric and nonparametric techniques. Corequisite: PSYC 511.

**PSYC 502. Advanced Statistics II. 4 Units.**
Thorough introduction to regression analysis and analysis of variance (ANOVA), with emphasis on hypothesis testing and the development of general models that partition overall variability. Topics covered include simple and multiple regression, one-and factorial, repeated-measures ANOVA, and analysis of covariance. Evaluation of assumptions and nonparametric alternatives. Prerequisite: PSYC 501, PSYC 511; must be a Psychology student; or consent of instructor.

**PSYC 503. Advanced Multivariate Statistics. 4 Units.**
Applies linear (matrix) algebra to maximum likelihood estimation using multivariate statistical techniques. Includes multivariate analysis of variance, multivariate regression, path analysis and structural equations causal modeling, log-linear models, and time series analysis. Evaluates alternatives to maximum likelihood estimation. Prerequisite: PSYC 501, PSYC 502, PSYC 511; must be a Psychology student; or consent of instructor.
PSYC 505. Research Methods in Psychological Science. 4 Units.
Comprehensive examination of research methods in psychology—from the formulation of research problems to the design, execution, and report of findings. Includes experimental and quasi-experimental designs, as well as field and case studies. The exploratory-confirmatory distinction in scientific epistemology, and its implications for research and theory. Reviews and critically analyzes research literature from various areas of contemporary psychological science.

PSYC 511. Psychometric Foundations. 3 Units.
Advanced orientation to psychological instruments; their theoretical derivation, construction, and use. Emphasizes reliability, validity, and factor structures.

PSYC 512. Cognitive/Intellectual Assessment. 2 Units.
Instruction in administering, scoring, interpreting, and report writing relevant to various adult and child intelligence and achievement instruments, such as WAISIII, WISC-III, WPPSI-R, KBIT, Stanford-Binet, WIAT, PIAT, KABC, WRAT-3, and the Woodcock-Johnson batteries. Considers the empirical reliability and validity data for each instrument. Prerequisite: PSYC 511. Corequisite: PSYC 571.

PSYC 512L. Cognitive/Intellectual Practice Laboratory. 1 Unit.
Supervised experiences in administering, scoring, interpreting, and report writing relevant to various adult and child intelligence and achievement instruments.

PSYC 513. Objective Personality Assessment. 2 Units.
Instruction in administering, scoring, interpreting, and report writing relevant to various adult and child objective personality instruments, such as MMPI-2, MMPI-A, MACI, PIC, 16PF, CDI, BDI, and BAI. Considers the empirical reliability and validity data for each instrument. Prerequisite: PSYC 512, PSYC 512L, PSYC 571.

PSYC 513L. Objective Personality Practice Laboratory. 1 Unit.
Supervised experiences in administering, scoring, interpreting, and reporting relevant to various adult and child objective personality instruments. Prerequisite: PSYC 571.

PSYC 516. Neuropsychological Assessment. 2 Units.
Presents administering, scoring, interpreting, and report writing relevant to adult and child neuropsychological instruments. Considers empirical reliability and validity data for each instrument. Focuses on the use of flexible test collections tailored to assess neuropsychological disorders and neurological disorders. Emphasizes neuropsychological test integration, case conceptualization, and diagnostic inference. Prerequisite: PSYC 512, PSYC 512L, PSYC 571.

PSYC 516L. Neuropsychological Assessment Practice Laboratory. 1 Unit.
Supervised experiences in administering, scoring, interpreting, and report writing relevant to various adult and child neuropsychological instruments. Prerequisite: PSYC 512, PSYC 512L.

PSYC 524. History, Systems, and Philosophy of Psychology. 2 Units.
Addresses the history and systems of psychology. Focuses on how approaches to psychology have defined the field, topics and information they have considered as a part of psychology, and acceptable mechanisms and criteria for advancing the field. Examines current trends and their contributions to the development of psychology as a science and as a profession.

PSYC 526. Ethics and Legal Issues in Clinical Psychology. 3 Units.
Overviews current ethical and legal standards for the conduct of psychology. Guidelines and standards drawn from APA Ethical Guidelines, Standards for Providers of Psychological Services, and Standards for Educational and Psychological Tests, as well as relevant California and civil licensing laws.

PSYC 537. Applied Behavioral Medicine. 2 Units.
Provides students with a set of applied tools for use in the practice of behavioral medicine/health psychology, including: assessment and treatment of risky health behaviors, such as use of tobacco; consultation skills; relaxation training; preparation of notes for medical settings; symptom management; motivational interviewing; brief diagnostic assessments; determination of capacity; and time-limited psychotherapy. Prerequisite: PSYC 721.

PSYC 545. Cognitive Foundations. 4 Units.
Reviews the major theories, methods, and findings in perception, cognition, and memory, including an introduction to contemporary cognitive science. Applications to the understanding of normal as well as abnormal behavior and psychological interventions.

PSYC 546. Clinical Psychology and Practice in Medical Settings. 2 Units.
Provides an understanding of how the behavioral and biological sciences interact to influence health care. Provides an overview of the application and practice of clinical psychology in hospital settings, with special attention to the primary care setting from an integrated sciences model for uniting the contributions of the biomedical and the behavioral sciences in teaching and practice.

PSYC 547. Health Psychology Assessment. 2 Units.
Covers the use of assessment instruments for research and clinical applications. Topics include behavioral medicine interviewing, the administration and interpretation of standardized instruments such as the Million Behavioral Health Inventory, quality-of-life assessment, and integrated report writing for medical settings.

PSYC 551. Psychobiological Foundations. 4 Units.
Basic course in psychobiology. Neuroanatomy, the physiology of the neuron, and neural communication. Includes consideration of structure and function of visual, auditory, and somesthetic sensation and perception. Concludes with coverage of the structure and function of motor systems. Considers visuospatial, visuoperceptual, and visuococonstructive disorders; and apraxia.

PSYC 553. Cognitive Neuroscience. 4 Units.
An advanced overview of the discipline that bridges cognitive psychology and neuroscience. Begins with neuroanatomy and the methodologies of electrophysiology and structural and functional imaging; and examines their application to perception, memory, language, cognitive control, attention, decision making, and motivational and emotional behavior.

PSYC 554. Health Psychology. 4 Units.
Overviews the field of clinical health psychology. The biopsychosocial model and the management of chronic illness used as a framework in which to address assessment and intervention principles, cultural influences, bioethics, and dying and death issues.

PSYC 555. Psychopharmacology. 2 Units.
Advanced coverage of neurotransmitter systems, with particular emphasis on the mechanism of action of various psychoactive substances.

PSYC 556. Foundations of Social and Cultural Psychology. 4 Units.
Surveys research, theory, and applications of social psychology within the context of other areas of psychology and related disciplines. Emphasizes scientific study of how people think about, influence, and relate to each other—both at the interpersonal and intergroup levels—within the context of cultural, social, and related phenomena. Applications to areas of psychology, such as clinical, health, and organizational psychology, as well as to economics, politics, and social issues.
PSYC 566. Cultural Psychology. 4 Units.
Examines cross-cultural variations in psychological processes and human behavior. Focuses on cross-cultural research, theory, and interventions which address cross-cultural variations and the universality of psychological knowledge in a multicultural society and interdependent world. Includes personality, developmental, and social psychology in clinical and other professional areas.

PSYC 567. Human Diversity. 3 Units.
Surveys theories, research, and interventions dealing with culture and ethnicity in mental health and clinical practice. Emphasizes effects of culture, ethnicity, and socioeconomic factors upon working with ethnic minorities, and mainstream individuals and groups. Examines the role of diverse cultural and socioeconomic factors in psychological processes, psychopathology, psychological assessment, and intervention.

PSYC 571. Adult Psychopathology. 4 Units.
Advanced overview of the major theoretical and empirical approaches to the understanding and classification of adult psychopathology in light of contemporary psychological research and the context of culture. The DSM-IV provides the basic structure for analysis of the various major types of adult psychopathology, including schizophrenia and other psychotic disorders, mood disorders, anxiety disorders, dissociative disorders, personality disorders, adjustment disorders, and cognitive disorders.

PSYC 572. Child Psychopathology. 2 Units.
Advanced overview of the major theoretical and empirical approaches to the understanding and classification of child psychopathology in light of contemporary psychological research and the context of culture. The DSM provides the basic structure for analysis of the major types of child psychopathology, including: mental retardation, learning disorders, pervasive developmental disorders, conduct disorders, and eating disorders.

PSYC 575. Foundations of Human Development. 4 Units.
Considers human development from conception through old age including personality as well as social, cognitive, and physiological aspects of development. Emphasizes contemporary developments in research, theory, and applications.

PSYC 581. Evidence-Based Psychological Practice I. 2 Units.
Theory, evidence-based practice, and empirically supported treatment protocols of the cognitive and behavioral aspects of the integrated biopsychosocial-spiritual therapy model. Prerequisite: PSYC 571, PSYC 721; and consent of instructor.

PSYC 581L. Evidence-Based Psychological Practice I. 1 Unit.
Supervised experience observing and/or engaging in laboratory assignments. Prerequisite: PSYC 571.

PSYC 582. Evidence-Based Psychological Practice II. 2 Units.
Theory, evidence-based practice, and empirically supported treatment protocols of the child and family aspects of the integrated biopsychosocial-spiritual therapy model. Prerequisite: PSYC 571, PSYC 721.

PSYC 582L. Evidence-Based Psychological Practice II. 1 Unit.
Supervised experience observing and/or engaging in laboratory assignments. Prerequisite: PSYC 571.

PSYC 583. Evidence-Based Psychological Practice III. 2 Units.
Theory, evidence-based practice, and empirically supported treatment protocols of the phenomenological and couple aspects of the integrated biopsychosocial-spiritual model. Prerequisite: PSYC 582, PSYC 571, PSYC 721; or consent of instructor.

PSYC 583L. Evidence-Based Psychological Practice III. 1 Unit.
Supervised experience observing and/or engaging in laboratory assignments. Prerequisite: PSYC 582.

PSYC 584. Evidence-Based Psychological Practice IV. 2 Units.
Theory, evidence-based practice, and empirically supported treatment protocols of the child and family aspects of the integrated biopsychosocial-spiritual therapy model. Prerequisite: PSYC 571, PSYC 721; or consent of instructor.

PSYC 584L. Evidence-Based Psychological Practice IV. 1 Unit.
Supervised experience observing and/or engaging in laboratory assignments. Prerequisite: PSYC 571. Corequisite: PSYC 584.

PSYC 591. Colloquia. 1 Unit.
Students participate in a series of lectures presented by distinguished speakers in the various areas of scientific and professional psychology. Students prepare a report critiquing each of the presentations attended. Enrollment is for 1 unit each year for three years.

PSYC 594. Readings in Psychology. 1-4 Units.
Supervised experience observing and/or engaging in laboratory assignments. Prerequisite: PSYC 571. Corequisite: PSYC 584.

PSYC 595. Directed Research. 1-13 Units.
Academic credit for research leading to the second-year project. Requires a total of 13 units.

PSYC 596. Directed Study. 1-4 Units.
Academic credit for specific research projects arranged between individual students and faculty members. May include readings, literature review, and/or laboratory research. Not to be used for the second-year project.

PSYC 597. Supervised Research. 1 Unit.
Academic credit for research for those students who have not yet advanced to doctoral candidacy. Not to be used for the second-year project.

PSYC 604. Advanced Topics in Multivariate Analyses. 2 Units.
Advanced topics in statistical analysis and research methods in psychology. Prerequisite: PSYC 503, PSYC 505.

PSYC 654. Behavioral Neurology. 2 Units.
Examines the intersection of the fields of neurology and neuropsychology. Focuses on the pathophysiology, assessment, diagnosis, and treatment of various adult and child brain disorders. Covers material useful for neuropsychological test integration, case conceptualization, and diagnostic decision-making; as well as information necessary for the neuropsychologist to function as a member of a clinical team.

PSYC 676. Geropsychology. 1 Unit.
Covers human development from late adulthood through old age and death, with particular emphasis on the physical and psychological factors inherent in the aging process. Social, cognitive, physical, and psychological changes examined in light of contemporary research and theory. Required for California psychology licensure.

PSYC 681. Clinical Supervision and Consultation. 2 Units.
Addresses competency-based clinical supervision approaches, and basic models and theories of supervision. Presents professional, ethical, and legal parameters related to supervision. Includes principles, methods, and techniques of individual, group, and live supervision. Emphasizes consultation and issues involved in interdisciplinary collaboration. Emphasizes issues of diversity in a multicultural context.
PSYC 681L. Clinical Supervision and Consultation Laboratory. 1 Unit.
Provides hands-on experience in clinical supervision and consultation as students under instructor supervision apply the knowledge, attitudes, and skills acquired didactically. Utilizes videotaping, class presentations, critiques, and simulations to increase student competency.

PSYC 683. Management and Professional Practice. 1 Unit.
Seminar course in management and professional practice. In a variety of settings, exposes students to different management processes; as well as to professional, ethical, and legal requirements. Emphasizes management of integrated health and mental health care-delivery systems. Focuses on varied aspects of professional practice, including the roles psychologists play in developing organizational skills needed to function effectively in the changing health care marketplace.

PSYC 684. Human Sexual Behavior and Treatment. 1 Unit.

PSYC 685. Drug Addiction and Therapy. 2 Units.
Overviews the definitions, incidence, detection, assessment, effects, and ethical/legal/therapeutic management of substance abuse. Fulfills California state licensing requirements for psychologists.

PSYC 686. Child, Partner, and Elder Abuse. 3 Units.
Overviews the definitions, incidence, detection, assessment, effects, and the ethical, legal, and therapeutic management of child, partner, and elder/dependent-adult abuse. Perpetrator and victim characteristics, including cultural and ethnic diversity factors. Controversies regarding assessment techniques, diagnoses, sequela syndromes, interventions, and forensic issues. Fulfills California state licensing requirements for psychologists.

PSYC 694. Seminar in Advanced Topics in Psychology. 1-4 Units.
Academic credit for dissertation research. A total of 43 units required.

PSYC 721. Practicum Preparation I. 3 Units.
Required for all Psy.D. and Ph.D. degree students. Helps students learn beginning assessment and counseling skills. Incorporates demonstrations to facilitate learning. Prepares graduate students for both internal and external practicum. Prerequisite: PSYC 571.

PSYC 781. Internal Practicum. 2 Units.
Required unit for Psy.D degree students; elective clinical training experience for Ph.D. degree students. Second-year practicum provides students with clinical training before they enter the formal practicum sequence. May be repeated three times for a total of 8 units. Prerequisite: PSYC 571, PSYC 721.

PSYC 782. External Practicum. 4 Units.
Provides a pre-internship level of clinical psychology training through intensive, extensive, and continuous clinical psychology experience. Includes, access to practicing psychologists and role models; experience in psychological assessment, diagnostic conceptualizations, and scientifically based treatment regimens; and exposure to ethical, legal, and professional standards in clinical psychology. Prerequisite: PSYC 781.

PSYC 795. Directed Clinical Experience. 1-3 Units.
Elective course for students who desire to obtain supplemental clinical experiences beyond those required for degree completion (internal practicum, external practicum, pre-internship, internship). These clinical experiences are individually designed according to the needs and desires of the student and under the direction of a member of the faculty. Directed clinical experiences may not be used to fulfill clinical experiences required by the degree. May be repeated to a maximum of 8 units.

PSYC 798. Pre-Internship. 4 Units.
Clinical experience for students who have successfully completed the practicum year. Prerequisite: PSYC 782.

PSYC 799A. Internship. 5 Units.
A one-year internship completed at either an APA- or APPIC-approved placement. Limited to students who begin their internship mid-Summer Quarter (usually the middle of July). Requires 250 contact hours of clinical experience. Student registers initially for 5 units and registers the following Summer Quarter for an additional 5 units. Prerequisite: PSYC 798.

PSYC 799B. Internship. 10 Units.
A one-year internship completed at either an APA- or APPIC-approved placement. Limited to students who begin their internship either at the beginning of Summer Quarter or the beginning of Fall Quarter. Requires 500 contact hours per quarter of clinical experience. Student registers for 10 units per quarter. Prerequisite: PSYC 798.

Public Health—Conjoint (PHCJ)

Courses

PHCJ 501. Introduction to On-line Learning. 1 Unit.
Orientation to on-line instruction programs. Includes introduction to Loma Linda University; the School of Public Health faculties, facilities, and resources; use of library on-line services; Web-based instruction; Blackboard; course formatting; and fellow students.

PHCJ 524. Special Topics in Public Health Practice. 1-4 Units.
Current topics in public health. Specific content varies from quarter to quarter. May be repeated for additional credit.

PHCJ 525A. Special Topics in Public Health. 1-4 Units.
Cross-disciplinary integration of current public health core content. Specific content varies from quarter to quarter. May be repeated for additional credit.

PHCJ 525B. Special Topics in Public Health. 1-4 Units.
Cross-disciplinary integration of current public health core content. Specific content varies from quarter to quarter. May be repeated for additional credit.

PHCJ 525C. Special Topics in Public Health. 1-4 Units.
Cross-disciplinary integration of current public health core content. Specific content varies from quarter to quarter. May be repeated for additional credit.

PHCJ 525D. Special Topics in Public Health. 1-4 Units.
Cross-disciplinary integration of current public health core content. Specific content varies from quarter to quarter. May be repeated for additional credit.
PHCJ 600. Overview of Research Methodologies. 3 Units.
The basis and limits of science. Enhances understanding of the basic elements of observational, quantitative, qualitative, mixed methods, and policy analysis methods in scientific and evaluation research. Critically evaluates published research. Considers the multiple levels of analysis (individual, group, organization, community and population). For doctoral students only. Prerequisite or concurrent: STAT 509.

PHCJ 604. Research Seminar. 2 Units.
Student develops and critiques research and dissertation proposals, with peer review of research protocols. Limited to doctoral degree students. Prerequisite: PHCJ 534, STAT 514; or consent of instructor.

PHCJ 605. Overview of Public Health. 1 Unit.
Selected topics addressing issues, concepts, and recent developments in public health.

PHCJ 606. Public Health Fundamentals. 3 Units.
Provides an overview of three areas of public health: health behavior, environmental health, and public health policy. Introduces key health behavior-change theories and psychosocial determinants of health behaviors. Introduces rural and urban environmental factors that affect human-health status, enjoyment of the quality of life, and human survival. Introduces concepts of the health policy process and factors that impact health and access to health care. Open to Non-MPH degree students only.

PHCJ 607. Professional Leadership. 3 Units.
An applied course that exposes students to leadership styles and applications within public health and health-care settings, and in which students explore and develop their personal leadership attributes.

PHCJ 608A. Doctoral Seminar for Public Health. 1 Unit.
Provides a venue for reviewing, appraising, and writing scientific literature; enhancing skills in critical thinking and professional presentations; and interacting with faculty, peers, and public health practitioners in the discussion of scientific papers and professional development.

PHCJ 608B. Doctoral Seminar for Public Health. 1 Unit.
Provides a venue for reviewing, appraising, and writing scientific literature; enhancing skills in critical thinking and professional presentations; and interacting with faculty, peers, and public health practitioners in the discussion of scientific papers and professional development. Students enroll the during the Fall, Winter, and Spring quarters of their first year in the doctoral program for a total of 3 units.

PHCJ 608C. Doctoral Seminar for Public Health. 1 Unit.
Provides a venue for reviewing, appraising, and writing scientific literature; enhancing skills in critical thinking and professional presentations; and interacting with faculty, peers, and public health practitioners in the discussion of scientific papers and professional development. Prerequisite: PHCJ 608A, PHCJ 608B.

PHCJ 609. Building Healthy Individuals. 3 Units.
Uses theoretical principles to develop culturally sensitive public health interventions for a variety of settings: community, occupational, educational, and health care. Prepares students to assess population's knowledge and learning needs, to practice communication skills by developing level-appropriate educational materials, and to collaborate with other professionals to develop interdisciplinary approaches to improve public health.

PHCJ 610. Building Healthy Communities. 3 Units.
Examines the public health system, how health policy is developed, and the diverse stakeholders involved in the process. Examines effective partnerships with government agencies, the private sector, nongovernmental organizations, communities, and social entrepreneurs to build healthy communities. Explores and analyzes in depth how these partnerships have worked together to make positive health improvements through effective policies and programs.

PHCJ 614. Pedagogy: The Art and Science of Teaching. 2 Units.
Provides an overview of pedagogical principles such as adult learning theories, curriculum development, instructional effectiveness, and evaluation. Develops skills to identify learning needs of a population and promote learning in academia and in organizational and community settings.

PHCJ 615. Intermediate Biostatistics. 3 Units.
Multivariable biostatistics. Introduces analysis of variance, analysis of covariance, repeated measures, linear and binary regression, and data reduction. Includes a discussion of nonparametric tests. Emphasizes selection of a statistical procedure, using statistical software, interpreting and reporting results. Prerequisite: STAT 509, STAT 548 or STAT 549; or consent of instructor.

PHCJ 616. Administrative Systems in Agency Management. 3 Units.
Reviews the administrative systems and knowledge necessary to manage public health, health-care, and other agencies. Topics include budgeting and financial management, inclusion and equity in agency management, human resources, interpreting financial statements and analyses, governance, strategic planning, elements in resource generation (funding and grant-writing), and leadership for health-care improvement and patient outcomes.

PHCJ 617. Building Healthy Systems. 3 Units.
Develops advanced public health leadership in building sustainable health systems. Evaluates linked health agendas, structures, and functions to promote performance goals. Creates skills to evaluate and address population health goals. Identifies opportunities for health systems analysis and strengthening that address health outcomes. Explains applied research methods, tools, and frameworks for carrying out the changes and interventions that bolster policies and promote health equity.

PHCJ 618. Transformative Communication. 2 Units.
Prepares doctoral students to communicate public health science effectively and with purpose to diverse stakeholders. Includes general theories of communication; development of a personal philosophy of communication; and use of thought visual aids, including images and media, to enhance communication.

PHCJ 624A. Scientist Forum. 1 Unit.
Provides students a venue for acquiring critical thinking skills to appraise scientific literature in the field. Expands understanding of the ethical principles undergirding the teaching, research, and practice of public health. Enhances students professional ability to analyze, think, act, and behave like a scientist. Increases competence in conducting human research and in actively participating in the dissertation proposal/ dissertation defense presentations of their peers.

PHCJ 624B. Scientist Forum. 1 Unit.
Prepares students to communicate public health science effectively and with purpose to diverse stakeholders. Includes student utilization of the framework and development of the concept paper and the dissertation proposal, which includes the first three chapters of the dissertation. Provides a venue for continued professional development of the student through interaction with peers and faculty within the discipline. Prerequisite or concurrent: PHCJ 624A.
PHCJ 624C. Scientist Forum. 1 Unit.
Provides opportunities for students to integrate the multiple skills they have learned with the practice of public health in a community setting. Requires 100 hours of practicum for each unit of credit to receive a grade. A maximum of 4 units applicable to a degree program.

PHCJ 695. Community Practicum. 1-4 Units.
Provides opportunities for students to integrate the multiple skills they have learned with the practice of public health in a community setting. Requires 100 hours of practicum for each unit of credit to receive a grade. A maximum of 4 units applicable to a degree program.

PHCJ 698. Doctoral Project. 1-4 Units.
Provides opportunities for students to integrate the multiple skills they have learned with the practice of public health in a community setting. Requires 100 hours of practicum for each unit of credit to receive a grade. A maximum of 4 units applicable to a degree program.

PHCJ 795. Applied Practice. 2 Units.
Provides opportunities for students to integrate the multiple skills they have learned with the practice of public health in a community setting. Requires 100 hours of practicum for each unit of credit to receive a grade. A maximum of 4 units applicable to a degree program.

Radiation Technology Advanced Medical Imaging (RTAM)

Courses

RTAM 401. Advanced Clinical. 5 Units.
Advanced clinical experience in selected areas of professional practice, such as orthopedic radiography, fluoroscopy, trauma, C-arm operation, and pediatrics.

RTAM 402. Advanced Clinical. 10 Units.
Advanced clinical experience in selected areas of professional practice, such as orthopedic radiography, fluoroscopy, trauma, C-arm operation, and pediatrics.

RTAM 403. Advanced Clinical. 2 Units.
Advanced clinical experience in selected areas of professional practice, such as orthopedic radiography, fluoroscopy, trauma, C-arm operation, and pediatrics.

RTAM 404. Advanced Clinical. 10 Units.
Advanced clinical experience in selected areas of professional practice, such as orthopedic radiography, fluoroscopy, trauma, C-arm operation, and pediatrics.

RTAM 405. Advanced Clinical. 2 Units.
Advanced clinical experience in selected areas of professional practice, such as orthopedic radiography, fluoroscopy, trauma, C-arm operation, and pediatrics.

RTAM 454. Advanced Patient Care. 3 Units.
Addresses patient care topics, such as trauma and medical emergencies, patient assessment, and pharmacology.

RTAM 458. Advanced Imaging Procedures. 3 Units.
Introduces students to various imaging procedures and modalities including: anatomy, patient positioning, geometric factors, and radiation protection beyond the level of a basic medical radiographer.

RTAM 464. Pathology. 3 Units.
Reviews pathologic processes most commonly found in imaging modalities.

RTAM 468. Advanced Imaging Principles. 3 Units.
Provides advanced instruction in the use of digital imaging technology in radiology modalities, including new and emerging technologies and other radiology-related applications.

RTAM 474. Patient Education and Evidence-Based Medicine. 3 Units.
Introduces clinical pathways, multidisciplinary clinical practice, and a focus on quality and coordination of care. Includes relationship-centered patient care, effective communication, and patient education.

RTAM 478. Introduction to Computed Tomography. 3 Units.
Introduces basic concepts related to computed tomography (CT), including: patient care, communication, principles, and procedures.

Radiation Technology Education (RTED)

Courses

RTED 415. Teaching Practicum in the Radiation Sciences. 3 Units.
A project-based course in which B.S. degree radiation science students have the opportunity to demonstrate curriculum-related knowledge and skills in applicable settings.
RTED 474. Instructional Techniques for the Radiation Sciences. 3 Units. Prepares B.S. degree students in the Radiation Science Program to create learning environments in medical imaging-related courses and clinical education. Students learn to create course content, develop presentations, design lessons, and evaluate learning.

RTED 475. Curriculum Development for the Radiation Sciences. 3 Units. Prepares B.S. degree students in the Radiation Sciences Program to develop curricula in medical imaging-related programs and clinical environments. Includes curriculum development approaches, implementation, and evaluation for effectiveness in the clinical environment.

RTED 476. Adult Learning Theory for the Radiation Science Student. 3 Units. Examines teaching and learning from theoretical perspectives as B.S. degree students in the Radiation Sciences Program relate to employment within the radiation science education and clinical education fields.

RTED 477. Learning Activities and Assessment for the Radiation Sciences. 3 Units. Investigates active learning techniques, integration, and assessment approaches in imaging-related programs and clinical environments.

RTED 478. Online Instructional Design. 3 Units. Explores the design of online or hybrid courses to incorporate active learning approaches and create community in the online environment.

RTED 484. Learning Environments for Radiation Science Students. 3 Units. Prepares B.S. degree students in the Radiation Science Program in topics related to models, learning environments, and measures of success in medical imaging educational contexts.

RTED 485. Digital Design for the Radiation Sciences. 3 Units. Utilizing a variety of platforms, introduces available digital technologies and explains key elements necessary to engage medical imaging students.

RTED 487. Issues in Radiation Sciences. 3 Units. Prepares B.S. degree students in the radiation sciences to focus primarily on scholarly journal publications as they explore prevailing issues related to classroom and clinical education in the radiation sciences.

Radiation Technology/Imaging Informatics (RTII)

Courses

RTII 354. Introduction to Informatics. 3 Units. Overview of computer fundamentals. Provides in-depth insight into a picture-archiving and communication system (PACS). Includes basic terminology, computed radiography, digital radiography, hospital information systems, radiology information systems, DICOM, and HL-7.

RTII 356. Information Technology in Radiology. 3 Units. Principles of developing and maintaining a radiology health care network. Addresses network design, critical problem-solving, and troubleshooting. Includes basic terminology, network components, network design and implementation, storage and archive assessment, hardware and software implementation databases, IT standards, and IT replacement schedules.

RTII 358. PACS Planning and Implementation. 3 Units. Presents steps needed to procure a picture-archiving and communications system (PACS) in a radiology department of any size. Focuses on organizational readiness, proposal requests, vendor selection, contracts, and cost strategies. Develops critical thinking for planning, team-building, and project management.

RTII 364. Administrative Issues in Informatics. 3 Units. Focuses on issues in informatics faced by a picture-archiving and communications system (PACS) administrator. Facilitates understanding of the architecture of a PACS and the details of running the business aspects of such a system. Topics include, but are not limited to: project management, operations management, relationships in health care, quality-improvement procedures, emergency protocols, and compliance with federal regulations.

RTII 368. Communication and Education in Imaging Informatics. 3 Units. Focuses on the basic communication skills a picture-archiving and communications systems (PACS) administrator should possess. Topics include, but are not limited to: relationships in health care, medical terminology, educational concerns, feedback mechanisms, evaluation processes, effective communication, and quality education and training programs. Online instruction utilizes Blackboard, text, video, PowerPoint, and other interactive online resources.

RTII 374. Image Management in Informatics. 3 Units. Focuses on basic image-management tasks that a picture-archiving and communications system (PACS) administrator must complete on a daily basis. Topics include but are not limited to: environmental design, human-computer interface evaluation, database retrieval, and problem solving. Online instruction using Blackboard incorporates text, video, PowerPoint, and other interactive resources.

RTII 376. Learning Environments for Radiation Science Students. 3 Units. Prepares B.S. degree students in the Radiation Science Program in topics related to models, learning environments, and measures of success in medical imaging educational contexts.

RTII 378. Systems Management in Informatics. 3 Units. Focuses on basic systems management tasks that a picture-archiving and communications system (PACS) administrator must complete on a daily basis. Topics include but are not limited to: capacity and throughput, disaster recovery and continuity, problem management, data migration, and data security. Online instruction using Blackboard incorporates text, video, PowerPoint, and other interactive resources.

RTII 384. Advanced Imaging Informatics. 3 Units. An in-depth study of the advanced imaging informatics skills required of a picture-archiving and communications system (PACS) administrator. Topics include but are not limited to: medical imaging standards, integrated health care, enterprise guidelines, image architecture and design, modality integration, quality control, and environmental hazards. Online instruction using Blackboard incorporates text, video, PowerPoint, and other interactive resources.

Radiation Technology/Medical Dosimetry (RTMD)

Courses

RTMD 301. Treatment Planning I. 2 Units. Studies in-depth the planning of isodose distributions and dose calculations within different target volumes. Topics covered include IMRT, conformal therapy, and stereotactic radiosurgery.
RTMD 302. Treatment Planning II. 2 Units.
Develops the student’s ability to construct treatment plans using 3D/IMRT planning techniques. Integrates theory with practice. Students required to complete a number of plans that utilize all the major treatment techniques, based on anatomical tumor sites. Lecture includes discussion and plans related to specific tumors, after which students are expected to produce similar plans, compile a notebook of plans, and present plans to the class as a midterm and final examination.

RTMD 305. Special Topics. 2 Units.
Studies cutting-edge techniques in depth as they apply to therapy—including radiation oncology and the diagnostic modalities that support them. Topics include IMRT, TBI, USGI, IORT, MLC, dynamic wedging, virtual simulation (CT simulation), stereotactic radiosurgery, HDR, proton therapy, MRI, US, and NRM. Students make a weekly presentation from a peer-reviewed journal or discuss a research paper on one of the studied topics. Class paper on a specific area of study due at the end of the quarter.

RTMD 307. Principles of Brachytherapy. 2 Units.
Includes a two-week rotation at Long Beach Memorial Hospital to observe brachytherapy. Principles of radiation protection as they relate to brachytherapy.

RTMD 309. Radiation Therapy Core—Concept Review. 1 Unit.
Conducted in the seminar/review format. Students research and present information on weekly schedule of core topics and concepts relating to radiation therapy techniques, oncology, radiobiology, and patient care. Students complete assigned readings and answer general review questions.

RTMD 310. Applied Mathematics for Medical Dosimetry. 1 Unit.
A review of the higher mathematics skills required for dosimetric calculations. Course conducted in a tutorial format in which students meet regularly with faculty to review problems from an assigned mathematics workbook.

RTMD 314. Quality Assurance, with Laboratory. 2 Units.
General overview of quality-assurance management within a radiation oncology department, with specific emphasis on continuous quality assurance (CQA). Examines the theoretical and practical application of quality-assurance techniques as they relate to treatment planning and other dosimetry functions.

RTMD 355. Physical Principles of Radiation Therapy I. 3 Units.

RTMD 356. Physical Principles of Radiation Therapy II. 3 Units.
Discusses the following areas: calibration techniques of photon, particulate, and electron beams; percentage depth dose, tissue-air ratios, treatment planning, scatter functions, field flatness, and symmetry; field shaping, arc therapy, and tissue inhomogeneities; clinical dosimetric considerations. Includes laboratory. Cross-listing: RTTH 356.

RTMD 961. Practicum. 8 Units.
Practical application of the theoretical knowledge of dosimetry. Includes external beam treatment planning, monitor unit calculations, brachytherapy, and quality assurance procedures as they pertain to dosimetry practice. Students integrated into the dosimetry and physics team, with opportunity to work with various kinds of treatments and treatment beams. Per week: twenty-eight hours.

RTMD 962. Practicum. 10 Units.
Practical application of the theoretical knowledge of dosimetry. Includes external beam treatment planning, monitor unit calculations, brachytherapy, and quality assurance procedures as they pertain to dosimetry practice. Students integrated into the dosimetry and physics team, with opportunity to work with various kinds of treatments and treatment beams. Per week: thirty-four hours.

RTMD 963. Practicum. 9 Units.
Practical application of the theoretical knowledge of dosimetry. Includes external beam treatment planning, monitor unit calculations, brachytherapy, and quality assurance procedures as they pertain to dosimetry practice. Students integrated into the dosimetry and physics team, with opportunity to work with various kinds of treatments and treatment beams. Per week: thirty-one hours.

RTMD 964. Practicum. 11 Units.
Practical application of the theoretical knowledge of dosimetry. Includes external beam treatment planning, monitor unit calculations, brachytherapy, and quality assurance procedures as they pertain to dosimetry practice. Students integrated into the dosimetry and physics team, with opportunity to work with various kinds of treatments and treatment beams. Per week: thirty-six hours.

RTMD 965. Practicum. 11 Units.
Practical application of the theoretical knowledge of dosimetry. Includes external beam treatment planning, monitor unit calculations, brachytherapy, and quality assurance procedures as they pertain to dosimetry practice. Students integrated into the dosimetry and physics team, with opportunity to work with various kinds of treatments and treatment beams. Per week: thirty-six hours.

RTMD 971. Practicum. 10 Units.
Practical application of the theoretical knowledge of dosimetry. Includes external beam treatment planning, monitor unit calculations, brachytherapy, and quality assurance procedures as they pertain to dosimetry practice. Students integrated into the dosimetry and physics team, with opportunity to work with various kinds of treatments and treatment beams. Per week: thirty-three hours.

RTMD 972. Practicum. 9 Units.
Practical application of the theoretical knowledge of dosimetry. Includes external beam treatment planning, monitor unit calculations, brachytherapy, and quality assurance procedures as they pertain to dosimetry practice. Students integrated into the dosimetry and physics team, with opportunity to work with various kinds of treatments and treatment beams. Per week: thirty-four hours.

RTMD 973. Practicum. 10 Units.
Practical application of the theoretical knowledge of dosimetry. Includes external beam treatment planning, monitor unit calculations, brachytherapy, and quality assurance procedures as they pertain to dosimetry practice. Students integrated into the dosimetry and physics team, with opportunity to work with various kinds of treatments and treatment beams. Per week: thirty-four hours.

RTMD 974. Practicum. 11 Units.
Practical application of the theoretical knowledge of dosimetry. Includes external beam treatment planning, monitor unit calculations, brachytherapy, and quality assurance procedures as they pertain to dosimetry practice. Students integrated into the dosimetry and physics team, with opportunity to work with various kinds of treatments and treatment beams. Per week: thirty-six hours.
RTMD 975. Practicum. 11 Units.
Practical application of the theoretical knowledge of dosimetry.
Includes external beam treatment planning, monitor unit calculations, brachytherapy, and quality assurance procedures as they pertain to dosimetry practice. Students integrated into the dosimetry and physics team, with opportunity to work with various kinds of treatments and treatment beams. Per week: thirty-six hours.

Radiation Technology/Medical Radiography (RTMR)

Courses

RTMR 095. Survey of Radiation Sciences. 1 Unit.
Develops students’ interest in and knowledge of the radiation sciences by exploring each of the specialties in the field, such as radiography, CT, MRI, nuclear medicine, diagnostic medical sonography, cardiac sonography, radiation therapy, dosimetry, cardiovascular imaging, imaging informatics, radiologist assistant, mammography, radiology education, and radiology administration. Students develop career and an education plan.

RTMR 202. Clinical Orientation. 3 Units.
Clinical orientation to the functions of radiologic technologists. Clinical environment orientation conducted at affiliated clinical sites.

RTMR 221. Radiologic Patient Care. 2 Units.
Addresses patient care during radiographic procedures. Emphasizes patient care in the ER and OR, and during contrast procedures. Topics include radiographic professional organizations, ARRT code of ethics, personal balance and health, critical thinking and problem solving, pharmacology, medical abbreviations, spirituality in health care, challenging patient situations, and immobilization techniques.

RTMR 224. Legal Issues in Medical Radiography. 1 Unit.
Presents an overview of legal issues in radiologic technology. Topics include: standards of care, patient rights, informed consent, civil liability, legal doctrines, documentation, confidentiality, scope of practice, and ethical theories.

RTMR 246. Professional Communication & Presentation. 2 Units.
Provides an understanding of the professional communication and presentation skills needed to succeed as an entry-level radiographer. Topics include personality assessments, interpersonal communication, conflict resolution, moral courage, patient communication, and professionalism. Addresses radiologic technology accreditation and University-required student learning outcomes in oral, written, and health-care team communication.

RTMR 247. Languages for Radiographers. 1 Unit.
Introduces radiography students to the words, phrases, and medical terminology most often used in radiographic patient care situations for the common languages of patients.

RTMR 253. Medical Radiography Procedures I. 2 Units.
Introduces students to various radiographic procedures, which include anatomy, patient positioning, geometric factors, exposure techniques, and patient shielding.

RTMR 253L. Medical Radiography Procedures Laboratory I. 1 Unit.
Applies principles of patient positioning in a laboratory setting. Students practice optimum positioning practices on classmates. Anatomy covered includes: chest, upper extremity, lower extremity, bony thorax, and shoulder girdle.

RTMR 254. Medical Radiography Procedures II. 2 Units.
Introduces students to various radiographic procedures, which include anatomy, patient positioning, geometric factors, exposure techniques, and patient shielding. Continues RTMR 253. Prerequisite: RTMR 253.

RTMR 254L. Medical Radiography Procedures Laboratory II. 1 Unit.
Applies principles of patient positioning in a laboratory setting. Students practice optimum positioning practices on classmates and volunteers. Anatomy covered includes: abdomen, spine, skull, and pelvis.

RTMR 255. Medical Radiography Procedures III. 2 Units.
Introduces students to various radiographic procedures, which include anatomy, patient positioning, geometric factors, exposure techniques, and patient shielding.

RTMR 255L. Medical Radiography Procedures Laboratory III. 1 Unit.
Applies principles of patient positioning and radiographic exposure to the laboratory setting. Uses clinical patient simulation and radiographic phantoms to determine optimal radiographic techniques.

RTMR 283. Radiologic Physics. 3 Units.
Provides a background for understanding the physics of man-made radiation production. Addresses the interaction of radiation with matter for both radiation protection and the creation of radiographic images. Covers the electrical circuitry of diagnostic x-ray equipment.

RTMR 284. Radiation Protection and Biology. 2 Units.
Addresses the fundamental concepts of radiation protection and biological effects of radiation on patients and occupationally exposed personnel. Topics include: radiation safety procedures, radiation quantities and units, legal exposure standards, and radiation monitoring.

RTMR 285. Principles of Radiography I. 3 Units.
Introduces the principles of radiographic theory and technique. Covers the physical factors involved in image exposure and processing, auxiliary equipment used in producing the radiographic exposure, and techniques for obtaining the optimum image under any situation. Weekly laboratory sessions required.

RTMR 286. Principles of Radiography II. 3 Units.
Provides advanced instruction in the principles of radiographic theory and technique. Examines the role of image-intensified fluoroscopy in radiology. Weekly laboratory sessions required.

RTMR 305. Introduction to Computed Tomography I. 2 Units.
Introduces an overview of cross-sectional anatomy. Identifies normal anatomy in two- and three-dimensional planes. Addresses the structural and physiological functions of body systems.

RTMR 306. Introduction to Computed Tomography II. 2 Units.
Introduces basic principles, physics, imaging parameters, radiological effects, management, and patient protocol of computed tomography (CT).

RTMR 324. Radiographic Image Evaluation and Pathology. 3 Units.
Expands upon the fundamental image evaluation knowledge acquired in RTMR 253, 254, and 255. Advances understanding of image evaluation with reference to pathology, radiographic anatomy, patient positioning, geometric factors, exposure techniques, and patient shielding.

RTMR 344. Professional Development and Service Learning. 3 Units.
Overview of radiologic specialties. Examines state and national radiography organizations and continuing education requirements. Reviews professional values and codes of ethics.
RTMR 363. Comprehensive Review I. 2 Units.
Reviews major content areas emphasized on certification examinations. Student evaluation and performance analysis. Time provided to make class presentations, organize study materials, and take simulated registry examinations.

RTMR 365. Comprehensive Review II. 2 Units.
Continues review of major content areas emphasized on certification examinations. Student evaluation and performance analysis. Time provided to make class presentations, organize study materials, and take simulated registry examinations.

RTMR 371. Medical Radiography Affiliation I. 5 Units.
The first of six affiliation courses that total eighteen months of clinical experience. Students gain hands-on experience in basic patient care, radiographic procedures and positioning, radiation protection, radiographic exposure and techniques, critical thinking and problem solving, and patient and health care team communication. The combined six-part affiliation sequence fulfills state requirements for clinical hours in medical radiography.

RTMR 372. Medical Radiography Affiliation II. 7 Units.
Continues RTMR 371.

RTMR 373. Medical Radiography Affiliation III. 12 Units.
Continues RTMR 371 and 372.

RTMR 374. Medical Radiography Affiliation IV. 10 Units.
Continues RTMR 371, 372, and 373.

RTMR 375. Medical Radiography Affiliation V. 10 Units.
Continues RTMR 371, 372, 373, and 374.

RTMR 384. Topics in Medical Radiography. 1-3 Units.
Lecture and discussion of a current topic in medical radiography bearing on the theory or practice of one aspect of the discipline. Specific content varies from quarter to quarter.

RTMR 386. Medical Radiography Affiliation VI. 10 Units.
Continues RTMR 371, 372, 373, 374, and 375.

Radiation Technology/Medical Sonography (RTMS)

Courses
RTMS 339. Echocardiography I. 4 Units.
Focuses on normal anatomy, scan techniques, cardiac measurement, and new dynamics. Case study presentations.

RTMS 344. Introduction to Medical Sonography. 5 Units.
Introduction to sonography—including ob-gyn, abdomen, vascular, neurosonography, cardiac, and pediatric. Covers terminology and scan techniques for all areas.

RTMS 345. Ob-Gyn Sonography. 5 Units.
Ob-Gyn scan techniques, fetal anatomy and pathologies, gynecological anatomy and pathologies. Student case presentations and case studies.

RTMS 346. Vascular Technology/Doppler/Scan Techniques. 5 Units.
Covers vascular technology, Doppler, abdomen, and small parts. Continues case studies and case presentations.

RTMS 347. Echocardiography II. 4 Units.
Echocardiography, adult and pediatric. Further focuses on anatomy, pathology, hemodynamics, and Doppler. Includes case studies and presentations.

RTMS 348. Abdomen/Neurosonography. 5 Units.
Sonography of the abdomen and neonatal neurosonography specialties and scan techniques. Visualizes sonography of the abdomen, cross-section scan techniques, and pathologies on ultrasound. Includes neonatal neurosonography, anatomy and pathologies also included.

RTMS 371. Medical Sonography Clinical Affiliation. 12 Units.
Clinical experience in medical sonography (416 clock hours) covering a wide variety of technical procedures.

RTMS 372. Medical Sonography Clinical Affiliation. 12 Units.
Clinical experience in medical sonography (416 clock hours) covering a wide variety of technical procedures.

RTMS 373. Medical Sonography Clinical Affiliation. 12 Units.
Clinical experience in medical sonography (416 clock hours) covering a wide variety of technical procedures.

RTMS 379. Ultrasound Physics and Instrumentation I. 2 Units.
Studies the basic physical principles and instrumentation of ultrasound production and imaging. Selected case study presentations, as assigned.

RTMS 384. Topics in Medical Sonography. 1 Unit.
Surveys selected topics in medical sonography. Procedure summaries, projects, literature reviews.

RTMS 385. Board Review Echocardiography. 2 Units.
Case presentations by faculty and students reviewing vast variety of pathologies, as well as normal anatomy. Prerequisite: RTMS 339, RTMS 347.

RTMS 387. Ultrasound Physics and Instrumentation II. 2 Units.
Study and review of the basic physical principles and instrumentation of ultrasound, with additional emphasis on Doppler and artifacts. Prerequisite: RTMS 379.

RTMS 421. Board Review OB-GYN Sonography. 1 Unit.
Board review presented in case study format; normal and pathologies involved in ultrasound evaluation of the OB-GYN specialty. Prerequisite: Completion of the first year of the medical sonography program.

RTMS 422. Board Review Abdomen. 1 Unit.
Board review presented in case study format; normal and pathologies involved in a wide variety of abdominal and small part ultrasound examinations. Prerequisite: RTMS 421.

RTMS 423. Board Review Vascular. 1 Unit.
Board review presented in case study format; normal and pathologies involved in a wide range of vascular ultrasound examinations. Prerequisite: RTMS 422.

RTMS 424. Professionalism in Medical Sonography. 1 Unit.
Presents a variety of topics to develop professionalism and prepare graduates for the work force. Topics include writing a resume/CV, interviewing, and communication. Prerequisite: RTMS 421, 422, 423.

RTMS 471. Medical Sonography Clinical Affiliation. 11 Units.
Clinical experience in medical sonography (352 clock hours) covering a wide variety of technical procedures. Prerequisite: RTMS 421.

RTMS 472. Medical Sonography Clinical Affiliation. 11 Units.
Clinical experience in medical sonography (352 clock hours) covering a wide variety of technical procedures. Prerequisite: RTMS 471.

RTMS 473. Medical Sonography Clinical Affiliation. 11 Units.
Clinical experience in medical sonography (352 clock hours) covering a wide variety of clinical technical experiences.

RTMS 474. Medical Sonography Clinical Affiliation. 11 Units.
Clinical experience in medical sonography (352 clock hours) covering a wide variety of clinical technical experiences.
Radiation Technology/Nuclear Medicine (RTNM)

Courses

RTNM 351. Principles of Nuclear Medicine I. 4 Units.
Covers the historical developments that led to the field of nuclear medicine. Describes the structure of the atom and the factors that make an atom radioactive. Reviews the laws of physics; periodic chart of the elements; and the trilinear chart of the nuclides, radioactive decay, radionuclide production, and quality control of radiopharmaceuticals.

RTNM 351L. Principles of Nuclear Medicine I Laboratory. 1 Unit.
A laboratory course that emphasizes the material presented in RTNM 351. Structure of the atom, radioactive decay, radionuclide production.

RTNM 352. Principles of Nuclear Medicine II. 4 Units.
Includes the model of the atom, as well as electromagnetic and particle radiation. Lists the types of radioactive decay, along with the radiation interactions with matter. Defines terms that are specific to radioactive decay and performs calculations used in nuclear medicine for pre- and postcalibration of radionuclides.

RTNM 352L. Principles of Nuclear Medicine II Laboratory. 1 Unit.
A laboratory course that emphasizes the material presented in RTNM 352. Electromagnetic and particle radiations, radioactive decay interactions, and calculations.

RTNM 353. Nuclear Medicine Procedures I. 2 Units.
Addresses nuclear medicine procedures used to image, diagnose, and treat disease with radiopharmaceuticals. Identifies use of radionuclides to image the endocrine, cardiovascular, respiratory, and skeletal systems. Includes patient preparation for scans, routes of administration of radiopharmaceuticals, methods of localization for organ imaging, radiopharmacy, and quality control.

RTNM 353L. Nuclear Medicine Procedures Laboratory. 1 Unit.
A laboratory course that emphasizes the material presented in RTNM 353.

RTNM 354. Nuclear Medicine Procedures II. 2 Units.
Addresses nuclear medicine procedures used to image, diagnose, and treat disease with radiopharmaceuticals. Identifies use of radionuclides to image the endocrine, cardiovascular, respiratory, and skeletal systems. Includes patient preparation for scans, routes of administration of radiopharmaceuticals, methods of localization for organ imaging, radiopharmacy, and quality control.

RTNM 354L. Nuclear Medicine Procedures II Laboratory. 1 Unit.
A laboratory course that emphasizes the material presented in RTNM 354.

RTNM 355. PET/CT. 2 Units.
Covers the radionuclides, radiopharmaceuticals, and contrast agents used for PET/CT imaging. Topics include: localization, indications, method of administration, standard dose range, quality control, contraindications, patient history, patient preparation, equipment, technical considerations.

RTNM 356. Positron Emission Tomography. 2 Units.
Student learns the fundamental physics, instrumentation, and radionuclide requirements of positron emission tomography (PET).

RTNM 357. Instrumentation I. 4 Units.
Covers the auger/gamma scintillation camera, collimators and crystals used in nuclear medicine. Topics include: photomultiplier tubes, pulse height analyzer, resolution, count rate, field uniformity, Geiger-Mueller counter, ionization chambers, sodium iodide well counter, dose calibrator, image acquisition, matrix size, and filters.

RTNM 357L. Instrumentation I Laboratory. 1 Unit.
A laboratory course that emphasizes material presented in RTNM 357. Gamma camera components, dose calibrator, ionization chambers, and sodium iodide well counter.

RTNM 358. Instrumentation II. 4 Units.
Covers quality control of gamma cameras and dose calibrators. Topics include: data acquisition of single-photon emission computed tomography, image filtering, field uniformity assessment and correlation, X and Y gain calibration, and positron emission tomography.

RTNM 358L. Instrumentation II Laboratory. 1 Unit.
A laboratory course that emphasizes material presented in RTNM 358. Gamma camera quality control protocols, SPECT and CT images, and data acquisition.

RTNM 361. Radiopharmacy I. 3 Units.
Covers nuclear stability and decay, radionuclide production, radioactive decay, radionuclide generator systems, radionuclides, quality control, and legal requirements.

RTNM 362. Radiopharmacy II. 3 Units.
Covers the standard dose ranges, radioactive isotopes, decay tables, distribution, preparing kits, adverse reactions, and new radiopharmaceuticals.

RTNM 363. Nuclear Cardiology. 3 Units.
Covers the principles and clinical application of cardiac imaging. Topics include: patient preparation, radiopharmaceutical, localization of radiopharmaceutical, standard dose range, pharmaceutical stress protocol, exercise stress protocol, clinical applications of myocardial perfusion imaging, and image interpretation.

RTNM 364. Nuclear Medicine Statistics. 3 Units.
Covers the percent error or percent difference, counting rate determination, effects of background on counts, counting rates, standard deviation, and propagation of error.
RTNM 366. Medical Informatics. 1 Unit.
Covers information technology systems used in the health care setting. Reviews the importance of accurate documentation. Discusses the relevance of checking patient history and laboratory results using electronic medical/health record systems.

RTNM 421. Comprehensive Review of Nuclear Medicine I. 3 Units.
Reviews physics, instrumentation, procedures, imaging, and radiopharmaceutical theories in preparation for national registries.

RTNM 422. Comprehensive Review of Nuclear Medicine II. 3 Units.
Surveys selected topics in nuclear medicine. Procedure summaries, projects, literature reviews.

RTNM 430. Clinical Affiliation Introduction. 1 Unit.
First in a series of seven consecutive courses completed during the program. Provides students with clinical experience working with staff technologists and physicians, performing the functions expected of a nuclear medicine technologist and the nuclear medicine procedures involved in patient care. Clinical assignments one day per week, eight hours per day.

RTNM 431. Clinical Affiliation I. 2 Units.
Second in a series of seven consecutive courses completed during the program. Provides students with clinical experience working with staff technologists and physicians, performing the functions expected of a nuclear medicine technologist and the nuclear medicine procedures involved in patient care. Clinical assignments two days per week, eight hours per day. Prerequisite: RTNM 430.

RTNM 432. Clinical Affiliation II. 3 Units.
Third in a series of seven consecutive courses completed during the program. Provides students with clinical experience working with staff technologists and physicians, performing the functions expected of a nuclear medicine technologist and the nuclear medicine procedures involved in patient care. Clinical assignments three days per week, eight hours per day. Prerequisite: RTNM 430, RTNM 431.

RTNM 433. Clinical Affiliation III. 4 Units.
Fourth in a series of seven consecutive courses completed during the program. Provides students with clinical experience working with staff technologists and physicians, performing the functions expected of a nuclear medicine technologist, as well as the nuclear medicine procedures involved in patient care. Clinical assignments four days per week, eight hours per day. Prerequisite: RTNM 430, RTNM 431, RTNM 432.

RTNM 434. Clinical Affiliation IV. 4 Units.
Fifth in a series of seven consecutive courses completed during the program. Provides students with clinical experience working with staff technologists and physicians, performing the functions expected of a nuclear medicine technologist and the nuclear medicine procedures involved in patient care. Clinical assignments four days per week, eight hours per day. Prerequisite: RTNM 430, RTNM 431, RTNM 432, RTNM 433.

RTNM 435. Clinical Affiliation V. 4 Units.
Sixth of seven courses providing clinical experience working with staff technologists and physicians, performing the functions expected of a nuclear medicine technologist and nuclear medicine procedures involved in patient care. Clinical assignments four days per week, eight hours per day. Prerequisite: RTNM 430, RTNM 431, RTNM 432, RTNM 433, RTNM 434.

RTNM 436. Clinical Affiliation VI. 4 Units.
Seventh of seven courses providing clinical experience working with staff technologists and physicians, performing the functions expected of a nuclear medicine technologist, and nuclear medicine procedures involved in patient care. Clinical assignments four days per week, eight hours per day. Prerequisite: RTNM 430, RTNM 431, RTNM 432, RTNM 433, RTNM 434, RTNM 435.

Radiation Technology/Radiation Sciences (RTRS)

Courses

RTRS 578. Health-care Financial Management. 3 Units.
Investigates methods of applying financial management strategies from a radiology perspective. Demonstrates the fundamentals of finance, generating revenue, controlling costs, planning for the future, and financial organizational issues.

RTRS 584. Management of Imaging Informatics. 3 Units.
Study of operational and managerial issues essential to radiology information, and picture archiving and communication systems as related to electronic health records. Includes basic architecture concepts, needs assessment and procurement strategies, vendor selection and contract negotiation, workflow assessment and design, implementation and education, and quality assurance strategies in a filmless environment.

RTRS 614. Professional Portfolio. 1 Unit.
An online course designed to assist students in developing a professional portfolio. Students incorporate evidence of personal growth and learning in a comprehensive electronic portfolio.

RTRS 621. Capstone Project I. 3 Units.
The first of a two-course, online sequence. Students explore a relevant topic of interest, develop a literature review of publishable quality, and examine professional publication avenues.

RTRS 622. Capstone Project II. 3 Units.
The second course in a two-course, online sequence. Students explore aspects of professional presentation delivery and incorporate their Capstone I project to develop a presentation of professional quality.

Radiation Technology/Radiation Therapy (RTTH)

Courses

RTTH 332. Radiation Biology. 2 Units.
The effects of radiation on living systems.

RTTH 342. Patient-Care Practices in Radiation Therapy. 2 Units.
Aspects of radiation therapy patient care. Emphasizes equipment, treatment, and psychological support of the patient. Transmission and prevention of AIDS and other communicable diseases, with specific application to radiation therapy.

RTTH 344. Radiation Therapy Procedures. 2 Units.
RTTH 348. Radiation Therapy Review. 1,2 Unit.
Comprehensively reviews radiation physics, protection, and dosimetry. Applies radioactive materials. Radiobiology. Technical aspects of radiation oncology. Students beginning in Autumn of 2016 are required to take this course for two units.

RTTH 354. Quality Assurance in Radiation Therapy. 2 Units.
Focuses on quality improvement in radiation oncology. Emphasizes development of a culture of safety through continuous quality improvement (CQI) for clinical and technical aspects of patient care, including treatment delivery and localization equipment, treatment planning equipment, and electronic medical records. Discusses the role of various radiation therapy team members in CQI, and legal and regulatory implications for provision of services.

RTTH 355. Physical Principles of Radiation Therapy I. 3 Units.

RTTH 356. Physical Principles of Radiation Therapy II. 3 Units.
Discusses the following areas: calibration techniques of photon, particulate, and electron beams; percentage depth dose, tissue-air ratios, treatment planning, scatter functions, field flatness, and symmetry; field shaping, arc therapy, and tissue inhomogeneities; and clinical dosimetric considerations. Includes laboratory. Prerequisite: RTTH 364, RTTH 365. Cross-listing: RTMD 356.

RTTH 357. Applied Dosimetry. 2 Units.
Brachytherapy sources, isotope calibration, protection, and implantation techniques. Teletherapy equipment and protection. Quality assurance for external and brachytherapy procedures. Laboratory.

RTTH 364. Radiation Oncology I. 2 Units.
A three-term course covering pathology, etiology, epidemiology, histopathology, metastasis, staging, and treatment of major types of malignant neoplasms. Includes technique/simulation laboratory.

RTTH 365. Radiation Oncology II. 2 Units.
A three-term course covering pathology, etiology, epidemiology, histopathology, metastasis staging, and treatment of major types of malignant neoplasms. Prerequisite: RTTH 364.

RTTH 366. Radiation Oncology III. 2 Units.
The third in a three-quarter course covering pathology, etiology, epidemiology, histopathology, metastasis, staging, and treatment of major types of malignant neoplasms.

RTTH 371. Radiation Therapy Affiliation I. 2 Units.
First of seven clinical affiliations.

RTTH 372. Radiation Therapy Affiliation II. 3 Units.
Continues RTTH 371.

RTTH 373. Radiation Therapy Affiliation III. 3 Units.
Continues RTTH 371, 372.

RTTH 474. Radiation Therapy Affiliation IV. 5 Units.
Continues RTTH 371-373.

RTTH 475. Radiation Therapy Affiliation V. 5 Units.
Continues RTTH 371-373, 474.

RTTH 476. Radiation Therapy Affiliation VI. 4 Units.
Continues RTTH 371-373, 474-475.

RTTH 477. Radiation Therapy Affiliation VII. 4 Units.
Continues RTTH 371-373, 474-476.

Radiation Technology/Radiologist Assistant (RTRA)

Courses

RTRA 510. Cross-Sectional Anatomy I. 1 Unit.
Identifies normal and abnormal anatomy in two-dimensional as well as three-dimensional planes. Relates cross-sectional view of anatomy and pathology to radiology procedures.

RTRA 511. Cross-sectional Anatomy II. 1 Unit.
Identifies normal and abnormal anatomy in two-dimensional as well as three-dimensional planes. Relates cross-sectional view of anatomy and pathology to radiology procedures.

RTRA 518. Radiobiology and Health Physics. 2 Units.
Reviews the effects of ionizing and nonionizing radiation and fundamental concepts of radiation protection. Promotes the conscientious operation of radiologic and fluoroscopic devices. Provides a complement to guided practice in operating the fluoroscopic device during clinical mentoring. Procedures and techniques to optimize image quality while reducing radiation exposure to patients, operator, and ancillary personnel.

RTRA 519. Medical-Legal Issues in Radiology. 1 Unit.
Introduction to the legal system as it pertains to radiation sciences. Concepts such as malpractice, litigation, informed consent, assault, and battery.

RTRA 521. Radiology Procedures and Image Evaluation I. 3 Units.
Provides a framework for various imaging procedures and the role of the radiologist assistant in the radiology department. Provides the framework for systematic observation of static, digital, X-sectional, and dynamic diagnostic images for the purpose of evaluating the presence of abnormalities, anomalies, and pathological conditions.

RTRA 522. Radiology Procedures and Image Evaluation II. 3 Units.
Provides a framework for various imaging procedures and the role of the radiologist assistant in the radiology department. Provides the framework for systematic observation of static, digital, X-sectional, and dynamic diagnostic images for the purpose of evaluating the presence of abnormalities, anomalies, and pathological conditions.

RTRA 523. Radiology Procedures and Image Evaluation III. 3 Units.
Provides a framework for various imaging procedures and the role of the radiologist assistant in the radiology department. Provides the framework for systematic observation of static, digital, X-sectional, and dynamic diagnostic images for the purpose of evaluating the presence of abnormalities, anomalies, and pathological conditions.

RTRA 524. Radiology Procedures and Image Evaluation IV. 3 Units.
Provides a framework for various imaging procedures and the role of the radiologist assistant in the radiology department. Provides the framework for systematic observation of static, digital, X-sectional, and dynamic diagnostic images for the purpose of evaluating the presence of abnormalities, anomalies, and pathological conditions.

RTRA 525. Fluoroscopy and Radiation Protection. 1 Unit.
Focuses on the quality assurance and management aspects of fluoroscopy. Includes the following topics: fluoroscopic radiation exposure and protection techniques, technical management, operation of fluoroscopic equipment, and quality control.
RTRA 526. Radiology Reporting. 1 Unit.
Student develops and organizes an imaging report for procedures performed under the supervision of a radiologist. Topics include learning to report, style guidelines, and the American College of Radiology guidelines for communication.

RTRA 531. Pharmacology for RAs I. 2 Units.
Surveys pharmacological agents currently used in medicine, including their kinetics, dynamics, and therapeutics. Places special emphasis on pharmaceuticals commonly used by and given to radiology patients, including contrast media, antineoplastic agents, and radioactive isotopes.

RTRA 532. Pharmacology for RAs II. 2 Units.
Surveys pharmacological agents currently used in medicine, including their kinetics, dynamics, and therapeutics. Places special emphasis on pharmaceuticals commonly used by and given to radiology patients, including contrast media, antineoplastic agents, and radioactive isotopes.

RTRA 534. Pathophysiology. 2 Units.
Covers the structures and function of human biology. Assists with developing skills of interpreting laboratory data and increasing understanding of the pathophysiology behind patient care.

RTRA 541. Patient Assessment I. 2 Units.
Assists with skills in interviewing, physical examination, and interpreting laboratory data. Increases understanding of the pathophysiology behind patient care. Emphasizes analysis and interpretation of physiological data to assist in patient assessment and management.

RTRA 542. Patient Assessment II. 2 Units.
Assists with developing skills in interviewing, physical examination, and interpreting laboratory data. Increases understanding of the pathophysiology behind patient care. Emphasizes analysis and interpretation of physiological data to assist in patient assessment and management.

RTRA 543. Clinical Management and Education. 2 Units.
Focuses on analyzing and interpreting physiological data to assist in patient assessment and management. Utilizes critical thinking, action plans, and protocols. Includes relationship-centered patient care, effective communication, and patient education. Introduces clinical pathways, multidisciplinary clinical practice, and a focus on quality and coordination of care.

RTRA 546. Topics for the Radiologist Assistant. 2 Units.
Surveys selected topics in the radiologist assistant scope of practice for credit toward the master’s degree in radiologist assistant. Topics may include procedures, projects, or literature reviews.

RTRA 588. Comprehensive Review I. 1 Unit.
Review of the major content areas covered in the radiologist assistant program. Student evaluation and performance analysis.

RTRA 589. Comprehensive Review II. 1 Unit.
Reviews major content areas covered in the radiologist assistant program. Includes student evaluation and performance analysis.

RTRA 591. Radiologist Assistant Research Project I. 1 Unit.
Student completes a faculty-facilitated research project related to radiation sciences. Radiation sciences faculty must approve all projects.

RTRA 592. Radiologist Assistant Research Project II. 2 Units.
Student completes a faculty-facilitated research project related to radiation sciences. Radiation sciences faculty must approve all projects.

RTRA 593. Radiologist Assistant Research Project III. 2 Units.
Student completes a faculty-facilitated research project related to radiation sciences. Radiation sciences faculty must approve all projects.

RTRA 614. Professional Portfolio. 1 Unit.
Student develops a portfolio that demonstrates progression toward the student learning outcomes established by Loma Linda University— including wholeness, Christ-centered values, commitment to discovery and lifelong learning, effective communication, embracing and serving a diverse world, and collaboration.

RTRA 771. Clinical Internship I. 2 Units.
A twelve-week, one day/week rotation for a total of ninety-six hours of mentored clinical experience. Focuses on a wide variety of competencies that enable students to generate a report stating initial observations of diagnostic images on neonatal, pediatric, adult, and geriatric populations. Students utilize clinical contracts and a clinical portfolio.

RTRA 772. Clinical Internship II. 5 Units.
An eleven-week, two-days/week rotation totaling 168 hours of mentored clinical experience. Focuses on a wide variety of competencies that enable students to generate a report stating initial observations of diagnostic images on neonatal, pediatric, adult, and geriatric populations. Students utilize clinical contracts and a clinical portfolio.

RTRA 773. Clinical Internship III. 6 Units.
An eleven-week, three-days/week rotation totaling 248 hours. A mentored clinical experience during which students complete a wide variety of competencies that prepare them to generate a report stating initial observations of diagnostic images on neonatal, pediatric, adult, and geriatric populations. Students utilize clinical contracts and a clinical portfolio.

RTRA 774. Clinical Internship IV. 6 Units.
An eleven-week, three-days/week rotation totaling 248 hours of mentored clinical experience. Focuses on a wide variety of competencies that enable students to generate a report stating initial observations of diagnostic images on neonatal, pediatric, adult, and geriatric populations. Students utilize clinical contracts and a clinical portfolio.

RTRA 775. Clinical Internship V. 6 Units.
A twelve-week, three days/week rotation totaling 272 hours of mentored clinical experience. Focuses on a wide variety of competencies that enable students to generate a report stating initial observations of diagnostic images on neonatal, pediatric, adult, and geriatric populations. Students utilize clinical contracts and a clinical portfolio.

RTRA 776. Clinical Internship VI. 6 Units.
An eleven-week, three days/week rotation totaling 248 hours of mentored clinical experience. Focuses on a wide variety of competencies that enable students to generate a report stating initial observations of diagnostic images on neonatal, pediatric, adult, and geriatric populations. Students utilize clinical contracts and a clinical portfolio.

RTRA 777. Clinical Internship VII. 6 Units.
An eleven-week, three days/week rotation totaling 248 hours of mentored clinical experience. Focuses on a wide variety of competencies that enable students to generate a report stating initial observations of diagnostic images on neonatal, pediatric, adult, and geriatric populations. Students utilize clinical contracts and a clinical portfolio.

Radiation Technology (RTCH)

Courses

RTCH 283. Basic Imaging. 2 Units.
 Covers basic imaging positioning used in radiology. Topics include: radiology positioning techniques and introduction to technical characteristics of common nuclear medicine studies.
Radiation Technology/Special Imaging (RTSI)

RTCH 283L. Radiation Clinical Basics Laboratory. 1 Unit.
Hands-on laboratory experience that includes basic positioning, physics, and principles in radiology.

RTCH 285. The Principles and Physics of Radiation. 4 Units.
Covers equipment used to generate X-rays for production of radiographic images. Includes the physics of X-ray production, and interactions of X-rays with patient tissues to produce radiographic images. Stress proper radiation safety for the patient and hospital personnel.

RTCH 305. CT Fundamentals. 2 Units.
Overview of computed tomography (CT) concepts, including cross-sectional anatomy, physics, and clinical procedures.

RTCH 318. Imaging Modalities. 2 Units.
Covers the correlation and relevance of nuclear medicine to the other imaging modalities. Topics include: cardiovascular, respiratory, gastrointestinal, genitourinary, and skeletal systems.

RTCH 325. Applications for Managers. 2 Units.
Introduces prospective radiology managers and administrators to the basic common applications found in health care.

RTCH 385. Radiologic Trends in Health Care. 2 Units.
A faculty-facilitated course that includes class discussion, group work, and presentation of projects utilizing the online learning environment. Focuses on current and future trends in the field of radiology.

RTCH 387. Writing for Health-Care Professionals. 3 Units.
Expands upon entry-level academic writing experience by advancing skills in the following areas: avoiding plagiarism, developing academic writing, organizing research materials, synthesizing sources, formatting papers in APA style, and writing a literature review.

RTCH 413. Management Practicum I. 3 Units.
Observation of and discussion with selected administrative personnel in a radiology service. Emphasizes practical application of management theory. Projects assigned.

RTCH 414. Management Practicum II. 3 Units.
Observation of and discussion with selected administrative personnel in a radiology service. Emphasizes practical application of management theory. Projects assigned.

RTCH 415. Radiation Emergency Procedures. 3 Units.
Covers radiation emergency procedures and guidelines. Topics include: minor spills, major spills, airborne contamination, ingestion and inhalation contamination, firefighting techniques, X-ray injuries, and lessons learned from radiation disasters.

RTCH 418. Health Information Management and Radiology Coding for Radiology Managers. 3 Units.
Integrates health information management systems and radiology coding for prospective radiology managers and administrators. Introduction to health information systems and radiology coding to promote smooth running of a radiology department. Introduces current health information technology guidelines, tools, and concepts behind accurate coding and policy.

RTCH 464. Moral Leadership. 3 Units.
Methods of applying servant leadership to management and educational settings. Within a moral framework, discusses concepts of managing learners and professionals, assessing leadership style, the essence of leadership, leadership skill building, and conflict management. Utilizes assigned readings, discussions, papers, and personal inventories to aid in assessing the learner’s leadership skills.

RTCH 467. Management of a Radiologic Service. 3 Units.
Techniques of organization, planning, and management, with specific applications to a hospital radiology service.

RTCH 471. Applied Research Methods I. 2 Units.
Applies research methods to radiation sciences. Directed experience with a research project. Laboratory.

RTCH 472. Applied Research Methods II. 2 Units.
Applies research methods to radiation sciences. Directed experience with a research project. Continues RTCH 471.

RTCH 485. Digital Management in Radiology. 3 Units.
A student-centered, faculty-facilitated course that is a continuation of RTCH 385. Class discussion, small-group work, and presentation of student projects/paper. New technology and its impact on the radiology department.

RTCH 489. Effective Communication for Supervisors. 3 Units.
Helps managers and supervisors build effective skills in the following areas: interpersonal skills, business writing, verbal and nonverbal communication, modes of communication, coaching, and conflict resolution.

RTCH 497. Advanced Clinical Experience. 2 Units.
Advanced clinical experience in selected areas of professional practice.

RTCH 499. Radiation Technology Independent Study. 0.5-2 Units.
Student submits a project or paper on a topic of current interest in an area related to radiation technology. Regular meetings provide the student with guidance and evaluation. Elected on the basis of need or interest. The .5 unit of credit designed to offer directed experience in the prevention of AIDS and other communicable diseases in the clinical setting.

RTCH 567. Leadership Theory and Practice. 3 Units.
A Web-based course that focuses on the leadership aspect of communication. Examines leadership from a theoretical standpoint while relating, assessing, and applying leadership in present-day professional interactions.

Radiation Technology/Special Imaging (RTSI)

Courses

RTSI 307. Introduction to Computed Tomography. 2 Units.
Provides an overview of patient care in CT imaging, general aspects of patient care, pharmacology and drug administration, and radiation safety as a final requirement of the CT certificate. Examines some areas of radiology management. Prepares students for the additional areas required in the National Registry for the specialty area of CT. Prerequisite: Completion of the LLU Medical Radiography Program. Prerequisite: RTMR 305, RTMR 306.

RTSI 344. Interventional Pharmacology. 4 Units.
Studies the various pharmacological agents currently used in diagnosis and treatment during interventional studies of the cardiovascular system. Emphasizes laboratory values relevant to interventional studies.

RTSI 345. Cardiac/Interventional Procedures. 3 Units.
Examines the principles of cardiac interventional imaging to students who wish to become registered CT technologists. Includes the concepts of cardiac interventional procedures and how to operate safely in an operating room environment.
RTSI 351. Angio/Interventional Procedures I. 3 Units.
Analyzes the principles of vascular radiology, including proper patient care, the fundamentals of properly setting up a sterile table, and evaluation of the equipment most commonly used in the interventional suite. Examines the functions of a pressure injector and explores the procedures performed in vascular intervention.

RTSI 352. Angio/Interventional Procedures II. 3 Units.
Continues RTSI 351. Focuses on the procedures performed in the interventional laboratory. Analyzes the different types of pathologies observed in patients in order to determine the appropriate diagnostic and interventional examinations to be performed.

RTSI 356. Vascular Anatomy and Physiology. 3 Units.
Explores normal and pathological vascular anatomy and physiology. Emphasizes intracranial, extracranial, spinal, aorta, pulmonary, abdominal, pelvic, and extremity vascular structures; as well as abnormalities of the vascular system.

RTSI 358. CVI Review Course. 2 Units.
A comprehensive review course for the ARRT examinations in cardiac interventional radiography (CI) and vascular interventional radiography (VI).

RTSI 361. MRI Physics I. 2 Units.
Two-part course dealing with basic principles, physics, imaging parameters, biological effects, management, and patient protocol of magnetic resonance imaging (MRI).

RTSI 362. MRI Physics II. 2 Units.
Basic principles, physics, imaging parameters, biological effects, management, and patient protocol of magnetic resonance imaging (MRI). Prerequisite: RTSI 361.

RTSI 364. CT Patient Care and Procedures. 2 Units.
Overview of patient care in CT imaging. General aspects of patient care, pharmacology and drug administration, radiation safety. Examines some areas of radiology management. Prepares students for the additional areas required in the national registry for the specialty areas of CT.

RTSI 365. MRI Patient Care and Procedures. 2 Units.
Includes patient care, safety, pharmacology, quality control, and procedures involved with magnetic resonance imaging (MRI) for MRI technologists.

RTSI 367. Cross-sectional Radiographic Anatomy. 2 Units.
Overview of gross anatomy. Identifies normal anatomy in two-dimensional as well as three-dimensional planes. Relation of the structural as well as the physiological functions of the different body systems.

RTSI 369. CT Physics. 2 Units.
Basic principles, physics, imaging parameters, radiological effects, management, and patient protocol of computed tomography (CT).

RTSI 384. Topics in Special Imaging. 1-3 Units.
Lecture and discussion of a current topic in special imaging bearing on the theory or practice of one aspect of the discipline. Specific content varies from quarter to quarter.

RTSI 971. Special Imaging (CT/MRI) Affiliation. 5,10 Units.
A two- or four-days/week clinical rotation totaling 160-320 hours of clinical experience in CT (computerized tomography) and/or MRI (magnetic resonance imaging) covering a wide variety of technical procedures.

RTSI 975. Cardiac/Interventional (CVI) Affiliation. 2.5,10 Units.
A four-day-per-week clinical rotation, with hours based on registered unit hours—from 80 to 320 hours of clinical experience in cardiac and/or interventional radiology. Covers a wide variety of technical procedures.

Radiologic Technology Advanced Placement (RTAP)

Courses

RTAP 221. Patient Care and Education. 1 Unit.
Presents an overview of legal issues in radiologic technology. Legal topics include: informed consent, confidentiality, patient rights, civil liability, legal doctrines, and standards of ethics. Provides an understanding of professional communication skills needed to succeed as an entry-level radiographer. Other topics covered include: infection control, contrast media, patient transfers, and medical emergencies.

RTAP 255. Radiographic Procedures. 2 Units.
Introduces students to various radiographic procedures and anatomy, patient positioning, geometric factors, exposure techniques, and patient shielding.

RTAP 283. Equipment Operation and Quality Control. 1 Unit.
Provides a background for understanding the physics of man-made radiation production. Addresses the interaction of radiation with matter for both radiation protection and the creation of radiographic images. Covers the electrical circuit of radiation equipment.

RTAP 284. Radiation Protection. 1 Unit.
Provides a background for understanding the physics of man-made radiation production. Addresses the interaction of radiation with matter for both radiation protection and the creation of radiographic images. Covers the electrical circuit of radiation equipment.

RTAP 287. Image Production and Evaluation. 2 Units.

RTAP 295. Advanced Placement Comprehensive Review. 1 Unit.
Reviews major content areas emphasized on certification examinations. Student evaluation and performance analysis. Time provided to review, organize study materials, and take simulated registry examinations. Final programmatic mock registry exit examination assessed.

RTAP 971. Clinical Affiliation. 2 Units.
Students gain hands-on experience in basic patient care, radiographic procedures and positioning, radiation protection, radiographic exposure and techniques, critical thinking, problem solving, and patient and health care team communication.

RTAP 972. Clinical Affiliation. 2 Units.
Students gain hands-on experience in basic patient care, radiographic procedures and positioning, radiation protection, radiographic exposure and techniques, critical thinking, problem solving, and patient and health care team communication.

RTAP 973. Clinical Affiliation. 2 Units.
Students gain hands-on experience in basic patient care, radiographic procedures and positioning, radiation protection, radiographic exposure and techniques, critical thinking, problem solving, and patient and health care team communication.
Radiology (RADS)

Courses

RADS 791. Integrated Clinical Radiology. 2 Units.
Case-based, online, virtual-patient curriculum that is integrated with the required third-year clerkships. Introduces students to the American College of Radiology Appropriateness Criteria, as well as to the principles and applications of medical imaging.

RADS 891. Radiology Elective. 1.5-27 Units.
Offers fourth-year medical students the opportunity to explore various areas of radiology, including but not limited to angio/interventional radiology, pediatric radiology, body CT, neuroradiology, and research.

Rehabilitation Science (RESC)

Courses

RESC 517. Profession Advocacy in Allied Health Professions. 4 Units.
Examines legislative and regulatory bodies that define and regulate health-care practice in California. Identifies techniques to advance the profession's advocacy. Field training experience includes district and state capitol meetings with legislators and policymakers.

RESC 519. Rehabilitation Theories and Applications in Health Care. 3 Units.
History of and current trends in health care theory and applications, emphasizing successful approaches to integration of the rehabilitation professions.

RESC 697. Research. 1-12 Units.
Must be repeated to complete the total required units.

Religion/Ethical Studies (RELE)

Courses

RELE 155. Introduction to Christian Bioethics. 3 Units.
Introduces students to ethical issues in health care from the perspective of Christian tradition.

RELE 257. Health Care Ethics. 2 Units.
Introduces practical ethics for health-care professionals. Draws on the Bible and other religious and philosophical writings.

RELE 455. Christian Understanding of Sexuality. 2 Units.
Interpretations of human sexuality in ancient, medieval, and modern Christian thought, with emphasis on contemporary issues such as marriage, divorce, homosexuality, and artificial human procreation.

RELE 456. Personal and Professional Ethics. 3 Units.
The foundations, norms, and patterns of personal integrity and professional responsibility.

RELE 457. Christian Ethics and Health Care. 2 Units.
Ethical issues in modern medicine and related fields from the perspective of Christian thought and practice.

RELE 499. Directed Study. 1-3 Units.
Individual arrangements for students to study under the guidance of a faculty member. May include readings, literature reviews, written papers, or other special projects. Minimum of thirty hours required for each unit of credit.

RELE 500. Current Issues in Religion and Society. 3,4 Units.
Lecture series addresses a particular topic in bioethics from a variety of theological and religious perspectives. Focuses on current controversial topics in society and health-care settings. May be repeated, depending on topic.

RELE 505. Clinical Ethics. 3 Units.
Case-based analysis of bioethics, with emphasis on clinical applications. Conceptual and historical readings in bioethics.

RELE 515. Faith and Flourishing. 3 Units.
Focuses on major Christian perspectives that have been offered and debated, ranging from models of cultural withdrawal to cultural engagement and transformation. Gives attention to contemporary articulations of various positions and their philosophical and theological assumptions, beginning with a critical examination of the typology made popular by H. Richard Niebuhr in his classic study, Christ and Culture. Cross-listing: RELT 515.

RELE 522. Bioethical Issues in Social Work. 3 Units.
Theoretical and practical dilemmas in bioethics. Contributions of social workers to these issues.

RELE 524. Bioethics and Society. 3 Units.
Explores—from Christian and philosophical perspectives—issues confronting both society and patients. Uses case studies to illustrate such themes as health disparities, AIDS policy, end-of-life care, and organ transplantation.

RELE 525. Ethics for Scientists. 3 Units.
Ethical aspects of scientific research, with emphasis on Christian contributions.

RELE 534. Ethical Issues in Public Health. 3 Units.
Explores the ethical issues relevant to the diverse professions involved in advancing the public's health. Topics of inquiry include: community-based research, professional practices and responsibilities, cultural and socioeconomic issues, distributive justice, vulnerable populations, local and international mission, development, and research projects.

RELE 535. Ethical Issues in Health-Care Management. 3 Units.
Considers business ethics within health-care institutions. Seeks to find ways that business professionals and health-care professionals can work well together for the benefit of the patients. Topics of inquiry include: corporate culture and self-interest, health-care culture and altruism, unique setting of American health care as industry, and how Christian virtues can encourage moral leadership.

RELE 542. Bioethics Integration I. 1 Unit.
Aids dual degree bioethics students to 1) conceptualize required paper that demonstrates their integrated perspective on a specific professional course and bioethics, and 2) articulate integrative ideas in a coherent manner.

RELE 543. Bioethics Integration II. 1 Unit.
Aids dual degree bioethics students to 1) conceptualize required paper that demonstrates their integrated perspective on a specific professional course and bioethics, and 2) articulate integrative ideas in a coherent manner.

RELE 544. Bioethics Integration III. 1 Unit.
Aids dual degree bioethics students to 1) conceptualize required paper that demonstrates integrated perspective on a specific professional course and bioethics, and 2) articulate integrative ideas in a coherent manner.

RELE 545. Bioethics Case Conference I. 1 Unit.
Engages students in discussion of real-life cases in bioethics.
RELE 546. Bioethics Case Conference II. 1 Unit.
Engages students in discussion of real-life cases in bioethics.

RELE 547. Bioethics Case Conference III. 1 Unit.
Engages students in discussion of real-life cases in bioethics.

RELE 548. Christian Social Ethics. 3 Units.
Relationships between Christian beliefs and social theory and practice.

RELE 554. Clinical Ethics Practicum I. 3 Units.
First in a series of three graduate-level seminars in the master's degree program in bioethics. Theories and applications of ethics in the clinical setting. Introduces students to key concerns in clinical ethics. Provides for practical reasoning skills needed to solve the dilemmas and communication problems in and develop leadership skills in high-quality ethical health care. Prerequisite: Acceptance into the master's program in bioethics.

RELE 555. Clinical Ethics Practicum II. 3 Units.
The second in a series of three clinical ethics graduate-level seminars in the master's degree program in bioethics. Theories and applications of ethics in the clinical setting. Introduces students to key concerns in clinical ethics, and provides for practical reasoning skills needed to solve the dilemmas and communication problems in clinical settings and develop leadership skills in high-quality ethical health care. Prerequisite: RELE 554.

RELE 556. Clinical Practicum III. 3 Units.
The third in a series of three clinical ethics graduate-level seminars in the master's degree program in bioethics. Advanced theories and applications of ethics in the clinical setting. Introduces students to key concerns in clinical ethics, and provides practical reasoning skills needed to solve the dilemmas and communication problems in clinical settings and develop leadership skills in high-quality ethical health care. Prerequisite: RELE 554.

RELE 556. Ethics and Health Disparities. 3 Units.
Focuses on causes of health disparities and responses to reduce these causes. Gives attention to key health disparities based on race, ethnicity, gender, sexual orientation, and disability. Provides a context for analyzing and understanding health disparities and for ethically evaluating inequalities in health status and responses to them.

RELE 556. The Good, the Bad, and the Ugly: Moral Aspects of Art and Illness. 3 Units.
Explores health, illness, and the human body through the mediums of art, photography, personal drawings, sculpture, and visual medical tests such as x-rays, MRIs, and other scans. Uses visual representations of the body, students explore various views of health and illness as they relate to concepts of the good, the bad, and the ugly.

RELE 557. Heroes of Health Care. 3 Units.
Focuses on the lives of noteworthy figures in the health-care professions. Biographies, diaries, literature, and film used by students to identify and analyze the moral virtues and vision of heroic physicians, nurses, and public health advocates from the ancients to the present.

RELE 557. World Religions and Bioethics. 3 Units.
Asks questions pertaining to the relationship between beliefs and ethical decisions, with the aim of clarifying ethical principles that guide decision making within the context of religious diversity. Explores ethical issues related to sickness, health, birth, and death among various religions of the world, such as Christianity, Judaism, Buddhism, Hinduism, Sikhism, Confucianism, and Islam.

RELE 558. Bioethics and the Law. 3 Units.
Introduces legal and regulatory issues relevant to the heavily regulated field of health care. Explores the relationship between health care and basic bioethical principles. Topics include negligence, malpractice, child/elder abuse, HIPAA, forced treatment, and professional license/discipline. Discusses classic cases and current biolaw events. Utilizes mock depositions, presentations by visiting lecturers, and visits to selected live hearings.

RELE 577. Theological Ethics. 3 Units.
Ethical implications of the primary theological legacies of Western culture.

RELE 588. Explorers of the Moral Life. 3 Units.
Critically assesses the various theoretical approaches to ethics in Western culture. Applies theoretical ideas to cases illustrating such dilemmas as poverty and health, health-care justice, and informed consent.

RELE 598. Biblical Ethics. 3 Units.
Explores ways—old and new—that the Bible and theology inform moral thought and action. Uses contemporary cases to illustrate the assigned reading and class discussion.

RELE 598. Master's Seminar I. 3 Units.
Integrates theological/philosophical presuppositions, ethical themes, and accepted ethical principles. Student demonstrates mastery of a comprehensive knowledge of the field through an examination to be assessed by ethics faculty. Restricted to bioethics graduate students who have completed 36 units of their program.

RELE 599. Master's Seminar II. 2 Units.
Requires refinement of a previously submitted class paper for submission to a peer-review journal. Student demonstrates the ability to identify an issue, analyze it, appropriately use literature, and creatively conceptualize or even advance the discussion. Involves effective oral presentation of research results. Restricted to bioethics graduate students who have completed 36 units of their program.

RELE 624. Seminar in Christian Ethics. 3 Units.
Advanced study of selected topics in Christian ethics.

RELE 699. Directed Study. 1-6 Units.
Individual arrangements for students to study under the guidance of a faculty member. May include readings, literature reviews, written papers, or other special projects. Minimum of forty hours required for each unit of credit.

RELE 704. Medicine and Ethics. 2 Units.
Introductory study of Christian medical ethics, emphasizing personal integrity of the physician, the process of moral decision making, and ethical problems facing contemporary medicine, such as abortion and euthanasia.

RELE 705. Ethics in Pharmacy Practice. 3 Units.
Ethical issues and principles in the contemporary practice of pharmacy. Christian resources and professional expectations for the ethical decisions of pharmacists.

RELE 706. Advanced Ethics in Pharmacy Practice. 2 Units.
Creates an atmosphere of in-depth analysis and discussion of ethics in pharmacy practice. Students bring their own cases to discuss, in addition to course readings, guest lectures, and moral decision-making models.

RELE 707. Ethics for Allied Health Professionals. 2 Units.
Ethical issues, cases, and principles in the contemporary practice of allied health professionals. Christian and philosophical resources for ethical decision making.
REL 714. Advanced Medical Ethics. 2 Units.
Advanced study of issues and cases in contemporary medical ethics.
REL 734. Christian Ethics for Dentists. 2 Units.
Ethical issues in contemporary dentistry. Christian resources for ethical decision making.

Religion/General Studies (RELG)

Courses

RELG 504. Research Methods in Religious Studies. 4 Units.
Studies presuppositions and procedures for scholarship in religion and ethics, with an introduction to research in the natural and behavioral sciences. Practical themes include writing, library and Internet resources, and forms of scholarly papers and articles.

RELG 505. Qualitative Research in Religious Studies. 3 Units.
Considers the various qualitative methods used in examining the relationships between religion and the health of individuals and populations. Provides an overview of methods while focusing primarily on grounded theory methods. Students required to conduct their own research and/or be involved in a research project as a component of this course.

RELG 510. Christian Service. 1,2 Unit.
Student participates in approved service learning, with written reflection on Christian reasons for service. Additional service project and reflection required for second unit.

RELG 596. Dissertation Proposal. 1 Unit.
Development of the dissertation proposal. Research advisor works with students in developing the proposal in accord with the School of Religion and Faculty of Graduate Studies guidelines. Students must successfully defend the proposal relating to religion and health.

RELG 674. Reading Tutorial. 3,4 Units.
Reading course for graduate students in religious studies. Topics vary depending on student and instructor interests.

RELG 696. Project. 4 Units.
Individual arrangements for advanced students to study under the guidance of a program faculty member. May include preparation of publishable papers or other special projects. Additional work required for second, third, and fourth units.

RELG 697. Independent Research. 1-8 Units.
Individual arrangements for students to do research under the guidance of faculty member(s). Written report required. Minimum of forty hours required for each unit of credit. Prerequisite: Consent of instructor and of student's advisor.

RELG 698. Thesis. 1-4 Units.
Student prepares report of individual guided research in religion-related topic under direct faculty supervision. Minimum of forty hours required for each unit of credit. Limited to graduate students whose thesis projects have been approved by their research committee.

RELG 699. Dissertation Research. 1-6 Units.
Independent research contributing to the field of religion and health. Repeat registrations as needed until unit requirement has been met and/or dissertation has been defended, whichever is later.

RELG 795. Clinical Internship. 12 Units.
Supervised clinical internship. Minimum of one hour of individual supervision per week, and a final evaluation from the supervisor at the completion of 400 hours of clinical internship.

REL 796. Religion and Health Practicum. 8 Units.
Theories and applications of religion and health in the clinical and/or research setting.

Religion/Relational Studies (RELR)

Courses

RELR 275. Whole Person Care. 2 Units.
Integrates psychosocial and spiritual care in the clinical setting.

RELR 404. Christian Service. 1,2 Unit.
Student participates in approved service learning, with written reflection on the Christian reasons for service. Additional project required for second unit.

RELR 408. Christian Perspectives on Marriage and the Family. 2 Units.
From a Christian perspective, overviews the family life cycle.

RELR 409. Christian Perspectives on Death and Dying. 3 Units.
From a Christian perspective, considers the meaning of death—including the process of dying, cultural issues regarding death and dying, grief and mourning, suicide, and other related issues.

RELR 410. Compassion. 3 Units.
Practical study of the art and science of compassionate living for health-care professionals.

RELR 427. Crisis Counseling. 2 Units.

RELR 429. Cultural Issues in Religion. 2 Units.
Studies similarities and differences between European-American culture and ‘minority’ cultures in America, and the differences pertaining to the way religion is perceived and practiced.

RELR 447. Cross-cultural Ministry. 2 Units.
Studies the challenges of serving in cross-cultural situations from a Christian mission perspective, using the insights of missiology and cultural anthropology as they relate to personal and professional growth, social change, and effective intercultural communication and service.

RELR 447A. Service Learning Practicum—International Project. 1 Unit.
Loma Linda University-sponsored international mission trip, facilitated by SIMS Program. Students engage in service activities, maintain a reflective journal while on the trip, and submit a final report summarizing the social-learning experience upon return. Prerequisite: RELR 447.

RELR 455. Body, Intimacy and Sexuality in Whole Person Care. 2 Units.
Focuses primarily on whole person patient care in the context of dealing with changes to body image, intimate relationships, and sexuality in the face of illness and injury. Explores a variety of issues relating to body and body image, intimate relations, gender, and sexuality for relevant patient populations; and the role of the health-care professional in bringing wholeness and healing in the face of sensitive and personal issues.

RELR 475. Whole Person Care. 2 Units.
Integrates psychosocial and spiritual care in the clinical setting.

RELR 499. Directed Study. 1-3 Units.
Individual arrangements for students to study under the guidance of a faculty member. May include readings, literature reviews, written papers, or other special projects. Minimum of 30 hours required for each unit of credit.
RELR 500. Religion and Global Health. 4 Units.
Focuses on an international perspective of the interconnections between religion and health, with special attention to how faith (theological ideas) of a community play a role in how people seek treatment and relate to health and disease.

RELR 508. Religion, Health-Care Policy, and Advocacy. 3,4 Units.
Explores how Christian ethical visions shape definitions of health, concepts of just health-care policies, and faithful motivation for taking action to improve the health of communities. Encourages students to be participant-observers in programs of effective health-care advocacy. Students taking the course for 4 units will meet for an additional hour each week to learn more about theory and practice of advocacy for health policy change.

RELR 520. Clinical Training in Spiritual Care I. 4 Units.
Combines theoretical and clinical aspects of spiritual care in the exploration of a theological understanding of health and illness. Students examine cases and learn the theoretical foundations and practical skills needed to provide spiritual care. Designed for students pursuing a career in chaplaincy, mental health, and/or any discipline that benefits from clinical experience related to health care as understood through a theological lens.

RELR 521. Clinical Training in Spiritual Care II. 4 Units.
Combines theoretical and clinical aspects of spiritual care in the exploration of a theological understanding of health and illness. Students examine cases and learn the theoretical foundations and practical skills needed to provide spiritual care. Designed for students pursuing a career in chaplaincy, mental health, and/or any discipline that benefits from clinical experience related to health care as understood through a theological lens.

RELR 525. Health Care and the Dynamics of Christian Leadership. 3 Units.
Christian principles of leadership in the community and in the practice of health care.

RELR 526. Pastoral and Professional Formation. 4 Units.
Introduces students to the professional requirements of working as a chaplain in a health-care setting. Involves learning to function pastorally within boundaries of authority, integrate theology with the practice of spiritual care, and make appropriate ethical decisions as part of an interdisciplinary spiritual care team.

RELR 527. Crisis Care and Counseling. 3 Units.

RELR 530. Spirituality and Clinical Psychology. 3 Units.
Examines the positive resources of both religion and spirituality in the lives of clients, as well as the ways in which they can be linked to psychopathology. Outlines the spiritual aspects of the therapeutic relationship, including the use of spiritual interventions as an aspect of psychotherapy.

RELR 535. Spirituality and Mental Health. 3 Units.
Explores the interrelationship between spirituality and mental health. Seeks to enhance understanding of the term ‘spirituality’ in the context of religious traditions; considers the therapeutic effects both of spirituality and of religious traditions. Prerequisite: PSYC 721.

RELR 536. Spirituality and Everyday Life. 3 Units.
Explores the place of spirituality in everyday life through assimilation of information drawn from religious theorists, theology, spiritual and religious practices, and occupation.

RELR 540. Wholeness and Health. 3 Units.
Aids student in formulation of a portfolio that incorporates a variety of activities related to biblical concepts of wholeness. Addresses 1) the integration of mind/body/soul, 2) strengthening relationships, 3) care of the environment, and 4) the healing of the nations from personal and professional perspectives.

RELR 541. History of Seventh-day Adventist Chaplaincy and Healthcare Policy Making. 4 Units.
Focuses on the history of chaplaincy, Adventist chaplaincy, and the Adventist approach to critical cases and positions in world church documents.

RELR 564. Religion, Marriage, and the Family. 3 Units.
The family in the theological, historical, and ethical perspectives—with a Christian assessment of contemporary theories regarding the family.

RELR 565. Practical Theology and Methodology. 3 Units.
Informs and enriches the practice of pastoral professionals through the study of practical and pastoral theologies. Designed especially to serve as a foundations course in which fundamental questions about the relationship between religious tradition, theology, and contemporary practice are explored.

RELR 567. Pastoral Counseling. 4 Units.
Provides overview of theology, history, theory, and practice of pastoral counseling.

RELR 568. Care of the Dying and Bereaved. 3 Units.
Studies the biblical, theological, cultural, religious, relational, and psychological aspects of dying and death.

RELR 574. Preaching. 3 Units.
Examines the biblical and theological foundations for liturgy and preaching, with special attention given to the healing context. Considers liturgical ministry in diverse settings and with diverse faith perspectives. Focuses on the process of study, construction, and delivery of sermons.

RELR 575. Whole Person Care. 3 Units.
Integrates psychosocial and spiritual care in the clinical setting.

RELR 584. Culture, Psychology, and Religion. 3 Units.
Introduces the major contours of Western culture as they relate to various schools of psychological thought and the influence of religious beliefs.

RELR 587. Religion and the Social Sciences. 3 Units.
Introduces classic and contemporary dialogues between religion and the social sciences.

RELR 588. Personal and Family Wholeness. 3 Units.
Studies personal spiritual development as the center for individual and family life and professional practice, with special attention to balancing healthy family relationships and professional obligations.

RELR 590. Quantitative Research in Religious Studies. 3 Units.
Introduces students to quantitative methods and data used to study the topic of religion and health, and discusses how quantitative methods are used to answer research questions related to the discipline. Students discuss published quantitative studies and explore how to use software programs (Excel, SPSS) to analyze quantitative data. Students analyze quantitative data as a component of the course.

RELR 591. Qualitative Research in Religious Studies. 3 Units.
Provides an overview of a variety of qualitative methods that can be utilized to examine relationships between religion and the health of individuals and populations. Focuses primarily on grounded theory methods. Students required to conduct their own research and/or to be involved in a research project.
RELR 592. Doctoral Portfolio in Religion and Health. 1 Unit. 
Lays the groundwork for the doctoral program by exploring the connections between faith and health and the genres specific to each. Acquaints students with the principal theoretical and practical skills necessary for discussing the two fields of religion and health. To be completed in the first quarter of doctoral work.

RELR 595. Independent Study in Chaplaincy. 1 Unit. 
Students study the processes of various chaplaincy specializations, formulate a personal chaplaincy mission statement, and submit paperwork for endorsement and certification with the Adventist Chaplaincy Ministry of the General Conference of Seventh-day Adventists.

RELR 692. Seminar in Religion and Health Care Leadership: Current Trends. 4 Units. 
Explores current trends in faith and health-care leadership, such as working with faith communities, developing a values-based health-care system, and understanding current research and hiring mission; as well as other topics. Course taught in seminar fashion, exposing students to various health-care leaders and allowing students to focus on their area(s) of interest.

RELR 699. Directed Study. 1-6 Units. 
Individual arrangements for students to study under the guidance of a faculty member. May include readings, literature reviews, written papers, or other special projects. Minimum of forty hours required for each unit of credit.

RELR 701. Orientation to Religion and Medicine. 2 Units. 
Examines the relationship between Scripture and the practice of medicine.

RELR 709. Christian Perspectives on Death and Dying. 2 Units. 
From a Christian perspective, considers the meaning of death, including: the process of dying, cultural issues regarding death and dying, grief and mourning, suicide, and other related issues.

RELR 715. Christian Dentist in Community. 2 Units. 
Studies Christian leadership in the local church, surrounding community, and the larger society—emphasizing the practical development of leadership skills.

RELR 717. Diversity and the Christian Health Professional. 2 Units. 
Facilitates the development of personal and professional understanding and appreciation for the diversity in a multicultural society from a Judeo-Christian perspective.

RELR 725. Wholeness for Physicians. 2 Units. 
Knowledge, values, attitudes, and skills contributing to the physician’s goal of personal wholeness.

RELR 749. Marriage and Family Wholeness. 2 Units. 
Studies personal spiritual development as the center for individual and family life and professional practice, with special attention to balancing healthy family relationships and professional obligations.

RELR 775. Whole Person Care. 2 Units. 
Integrates psychosocial and spiritual care in the clinical setting.

RELR 776. Spirituality and the Christian Health Professional. 2 Units. 
Explores the meaning of spirituality in the light of Scripture and Christian thought. Studies practices and disciplines that form and mature an individual’s spiritual life.

Courses

RELT 101. Jesus, Health, and Healing. 3 Units. 
Examines how Jesus interacted with and healed people, and how this has impacted the history and philosophy of Loma Linda University as a Christian health sciences institution. Acquaints students with the concepts of wholeness and integrative care.

RELT 404. New Testament Writings. 2 Units. 
Interprets selected letters and passages of the New Testament, with a view to their theological and practical significance for today.

RELT 406. Adventist Beliefs and Life. 3 Units. 
Fundamental tenets of Seventh-day Adventist faith and the lifestyle that such faith engenders.

RELT 415. Christian Theology and Popular Culture. 2 Units. 
Examines concepts and practices in popular culture from a Christian perspective.

RELT 416. God and Human Suffering. 2 Units. 
Suffering and evil in relation to the creative and redemptive purposes of God for this world.

RELT 423. Loma Linda Perspectives. 2 Units. 
History and philosophy of Loma Linda University as a Christian health-sciences institution that fosters human wholeness.

RELT 436. Adventist Heritage and Health. 2 Units. 
Origin and development of Seventh-day Adventist interest in health, from the background of nineteenth-century medicine and health reform to the present.

RELT 437. Current Issues in Adventism. 2 Units. 
Selected theological, ethical, and organizational questions of current interest in Adventism, with the goal of preparation for active involvement in the life of the Seventh-day Adventist Church. Recommended for students with a Seventh-day Adventist background.

RELT 440. World Religions. 2 Units. 
Surveys the origins, beliefs, and contemporary practices of the world’s major religious systems. Gives attention to the interaction between specific religions and their cultures; and to similarities, differences, and potential for understanding among the religions.

RELT 464. Paul’s Message in Romans. 2 Units. 
Chapter-by-chapter interpretation of Paul’s most influential letter, in which the good news of God’s salvation is applied to the issues of Christian life and community.

RELT 470. Visions of Healing in Biblical Prophecy. 2 Units. 
Exploration of the visionary accounts of biblical books such as Isaiah, Jeremiah, Daniel, and Revelation. Content may vary from quarter to quarter.

RELT 477. Biblical Thought and Today’s World. 2 Units. 
Integration of various aspects of biblical thought with the issues and world views faced by those in a health care environment. Content may vary from quarter to quarter. May be repeated for additional credit when content is different.

RELT 499. Directed Study. 1-3 Units. 
Individual arrangements for students to study under the guidance of a faculty member. May include readings, literature reviews, written papers, or other special projects. Minimum of thirty hours required for each unit of credit.

RELT 500. Biblical Hermeneutics. 3 Units. 
Explores the principles of interpreting the Bible in relationship to real-life situations.
RELT 501. Religion and Society. 3 Units.
The impact of religion on society. Definitions, theories, and typologies of "religion." The role of religion in biblical times. Christianity's relationship with other religions throughout the centuries. Controversial cases.

RELT 502. Religion and Society. 3 Units.

RELT 503. Religion and Society. 3 Units.
The interactions of religion and society. Theories and typologies of the interactions of religion and society. Personal devotion and social change. Influential leaders and transforming movements. Controversial cases.

RELT 504. Daniel and the Prophetic Tradition. 3 Units.
Examines the message from the Book of Daniel and the Old Testament prophetic tradition of which Daniel is a part.

RELT 505. Seventh-day Adventist History. 3 Units.
Explores the values and practices that shape the Seventh-day Adventist community, with special attention to the life and ministry of Ellen G. White.

RELT 506. Seventh-day Adventist Beliefs. 3 Units.
Studies the fundamental tenets of Seventh-day Adventist faith and the lifestyle that such faith engenders.

RELT 507. The Saga of Adventists and Healthcare: Cornflakes, Baby Fae, and the Healing of the Nations. 3 Units.
Examines how a biblically based, apocalyptic-believing, countercultural religion changed America's breakfasts, established Protestantism's largest international network of hospitals, and challenged the grip of multinational tobacco companies.

RELT 508. Contemporary Christian Theology. 3 Units.
Principles, figures, and movements in Christian thought during the past century. Includes: relationships between history and biblical interpretation, theology and philosophy, and religion and science. Considers the growing prominence of Evangelical, Eastern orthodox, postmodern, and "contextual" theologies. Illuminates the characteristic ways in which the central elements of Christian faith provide lasting continuity and continually stimulate reflection.

RELT 509. Biblical Perspectives in Religion and Health. 4 Units.
Explores issues related to health, illness, and suffering from theological and biblical perspectives.

RELT 510. Global Theology. 3 Units.
Offers critical reflections of dominant Western theological discourse and explores other theological voices from African American, womanist, Asian, African, and South American perspectives.

RELT 515. Faith and Flourishing. 3 Units.
Focuses on major Christian perspectives that have been offered and debated, ranging from models of cultural withdrawal to cultural engagement and transformation. Gives attention to contemporary articulations of various positions and their philosophical and theological assumptions, beginning with a critical examination of the typology made popular by H. Richard Niebuhr in his classic study, Christ and Culture. Cross-listing: RELE 515.

RELT 518. Adventist Heritage and Health. 1 Unit.
Studies the fundamental beliefs and values that led Seventh-day Adventists to become involved in health care, with particular emphasis on the spiritual story and principles leading to the founding of Loma Linda University.

RELT 520. Church History. 3 Units.
Traces Christianity's inception with the birth, ministry, death, and resurrection of Jesus Christ; through the first critical 300 years of Christianity; evolving into the pre-Reformation and Reformation; and culminating in the Christian Church of the twenty-first century.

RELT 524. Religion and Society. 3 Units.

RELT 526. Creation and Cosmology. 3 Units.
Explores the similarities and contrasts between biblical and scientific views of the world, with special attention to biblical Creation accounts in their historical context.

RELT 527. The Bible and Ecology. 3 Units.
Explores the ecology crisis, factory farming, and the extinction of countless species within the context of the Bible's message of promise and hope for nonhuman creation.

RELT 534. Anthropology of Mission. 3 Units.
Studies Christian mission, applying the findings of anthropology as they relate to cultural change. Processes of religious development, means of diffusion, factors affecting religious acculturation, and analysis of programs intended to effect changes in religion.

RELT 534A. Service Learning Practicum—International Project. 1 Unit.
Loma Linda University-sponsored international mission trip, facilitated by the SIMS Program. Students engage in service activities, maintain a reflective journal while on the trip, and submit a final report summarizing the social-learning experience upon return. Prerequisite: RELT 534.

RELT 534B. Service Learning Practicum—USA Project. 1 Unit.
Loma Linda University-sponsored national mission trip, facilitated by SIMS Program. Students engage in service activities, maintain a reflective journal while on the trip, and submit a final report summarizing the social-learning experience upon return. Prerequisite or concurrent: RELT 534.

RELT 539. Christian Understanding of God and Humanity. 3 Units.
Studies the nature and attributes of God, with special emphasis on God's relation to the world; and the essential dynamics of human existence in light of the central biblical motifs of creature, image of God, and sin.

RELT 540. World Religions and Human Health. 3 Units.
Studies the history, beliefs, and practices of major religions of the world, with an emphasis on theological and ethical issues in the practice of health care ministry.

RELT 555. The Adventist Experience. 3 Units.
Introduces the beliefs and values that shape the Seventh-day Adventist community.

RELT 557. Theology of Human Suffering. 3 Units.
Suffering and evil in relation to the creative and redemptive purposes of God for this world. Focus on formation of student's theology of human suffering.

RELT 558. Old Testament Thought. 3 Units.
Introduces the literature and key theological themes of the Old Testament. Content may vary from quarter to quarter.

RELT 559. New Testament Thought. 3 Units.
Introduces the literature and key theological themes of the New Testament. Content may vary from quarter to quarter.
A study of Jesus as revealer and healer, the basis for the Loma Linda mission, ‘To make man whole.’

RLET 563. Health Care, Humanity, and God. 3 Units.
Focuses on the centrality of the health professions to the mission of the church, and the ways in which these professions manifest God’s saving work and exemplify the ministry of Christ.

RLET 564. Apostle of Hope: The Life, Letters, and Legacy of Paul. 3 Units.
A study of the legacy of “the second most influential” person in human history.

A study of Revelation’s description of the end of suffering and God’s vision for healing a broken world.

RLET 570. Philosophy of Mind: Bodies, Minds, Souls. 3 Units.
Explores the following questions: What is a mind? How does the mind relate to the brain and to the world? Are minds free or casually determined? How do minds affect bodies? Could minds exist in different kinds of bodies? Do minds survive death? Discusses answers and arguments that have been offered by philosophers, theologians, and cognitive scientists; as well as the implications of these answers for ethics and theology.

RLET 574. Love and Sex in the Bible. 3 Units.
Studies Scripture on the reality, nature, and challenges of love—both divine and human; and key biblical passages on the goodness, meaning, and distortions of human sexuality.

RLET 615. Seminar in Philosophy of Religion. 3 Units.
Examines the concept of God, arguments for the existence of God, the relationship of faith and reason, and the nature of religious language.

RLET 617. Seminar in Religion and the Sciences. 3 Units.
Explores the interface between religion and the sciences—with attention to the religious origins of modern science, the similarities and contrasts between scientific and religious inquiry, and the particular challenges that the sciences pose for religious belief.

RLET 699. Directed Study. 1-6 Units.
Individual arrangements for students to study under the guidance of a faculty member. May include readings, literature reviews, written papers, or other special projects. Minimum of 40 hours required for each unit of credit.

RLET 706. Adventist Beliefs and Life. 2 Units.
Fundamental tenets of Seventh-day Adventist faith, and the lifestyle that such faith engenders.

RLET 707. Medicine, Humanity, and God. 2 Units.
Role of the practitioner of medicine as a co-worker with God in the healing of humankind.

RLET 716. God and Human Suffering. 2 Units.
Suffering and evil in relation to the creative and redemptive purposes of God for this world.

RLET 717. Christian Beliefs and Life. 2 Units.
Introduces basic Christian beliefs and life.

RLET 718. Adventist Heritage and Health. 2 Units.
Studies the fundamental beliefs and values that led Seventh-day Adventists to become involved in health care, with particular emphasis on the spiritual story and principles leading to the founding of Loma Linda University.

RLET 726. Jesus. 2 Units.
Studies Jesus as healer and teacher, prophet and reformer, Son of God and Savior.

RLET 734. Anthropology of Mission. 2 Units.
Studies Christian mission, applying the findings of anthropology as they relate to cultural change. Processes of religious development, factors affecting religious acculturation, and analysis of programs intended to effect changes in religion.

RLET 740. World Religions and Human Health. 2,3 Units.
Studies of the history, beliefs, and practices of eight major world religions, with an emphasis on theological and ethical issues that are relevant to the practice of culturally competent health care. Gives attention to the interaction between specific religions and their cultures and to similarities, differences, and potential for understanding among religions. Third unit covers two additional world religions.

RLET 764. Paul’s Message in Romans. 2 Units.
Chapter-by-chapter interpretation of Paul’s most influential letter, in which the good news of God’s salvation is applied to the issues of Christian life and community.

RLET 767. Apostle of Hope: The Life, Letters, and Legacy of Paul. 2 Units.
A study of the legacy of “the second most influential” person in human history.

Respiratory Therapy (RSTH)

Courses

RSTH 301. Advanced Respiratory Therapy Science I. 3 Units.
Comprehensive review of patient-care techniques. Presents and discusses clinical application of respiratory therapy devices in-depth, and their influences on patient care. Reports and discussions of current and advanced developments. Integrates experience with current concepts and develops logical courses for proper equipment and technique application for specific patient care. (Not taught every year.)

RSTH 304. Cardiopulmonary Anatomy and Physiology. 4 Units.
Investigates anatomic and physiologic components of the cardiovascular and respiratory systems. Emphasizes histology, embryology, diffusion, gases transported in the blood, acid-base balance, lung volumes and capacities, mechanics of ventilation, ventilation perfusion relationships, regulation or respiration, cardiac cell-membrane action potentials, and excitation-contraction coupling.

RSTH 315. Pediatric Perinatal Respiratory Care. 2 Units.
Pathophysiology of the newborn, prenatal risk factors, pediatric cardiopulmonary diseases, diagnostics, monitoring of clinical indices, and treatments used in perinatal/pediatric respiratory care. Advanced information on surfactant administration, high-frequency ventilation, and ECMO. May be used toward postprofessional B.S. degree in respiratory care in place of RSTH 422.

RSTH 323. Pulmonary Function Methodology. 3 Units.
Evaluates pulmonary function in health and disease through spirometry, plethysmography, helium dilution, nitrogen washout, single-breath nitrogen, volume of isoflow, and diffusing capacity studies—including blood-gas instrumentation, quality control, quality assurance, and current ATS standards. Lecture and laboratory.
RSTH 331. Pharmacology I. 2 Units.
Surveys pharmacologic agents currently used in medicine—including their kinetics, dynamics, and therapeutics. Emphasizes drugs and their effects on the respiratory, cardiovascular, and autonomic nervous systems. Topics include the bronchodilators, anti-inflammatory agents, mucokinetic agents, cardiovascular agents, diuretics, antimicrobials, neuromuscular agents, and agents used to treat nicotine dependence.

RSTH 332. Pharmacology II. 2 Units.
Surveys pharmacologic agents currently used in medicine—including their kinetics, dynamics, and therapeutics. Emphasizes drugs and their effects on the respiratory, cardiovascular, and autonomic nervous systems. Topics include the bronchodilators, anti-inflammatory agents, mucokinetic agents, cardiovascular agents, diuretics, antimicrobials, neuromuscular agents, and agents used to treat nicotine dependence.

RSTH 334. Patient Assessment. 2 Units.
General introduction to the clinical setting. Assesses and evaluates patients with respiratory disease. Develops clinical practice habits and patient-care techniques. Student must obtain current cardiopulmonary resuscitation (CPR) certification from the American Heart Association before the end of the term.

RSTH 341. Respiratory Therapy Science I. 5 Units.
Basic principles of respiratory therapy, as related to gas physics; medical gas storage and therapy; and administration of humidity, aerosol and airway-pressure therapies, artificial airways, and resuscitation devices. Emphasizes methods of administration of the therapy, with special attention placed on the equipment used, as well as applies this information to the clinical setting.

RSTH 342. Respiratory Therapy Science II. 5 Units.
Lecture and laboratory presentation of the principles of respiratory therapy related to lung-inflation therapy, use of artificial airways, and their care and complications. Introduces mechanical ventilatory support, including beginning ventilators, support systems, comparison of methods, and respiratory monitoring. Emphasizes application of this information to the clinical setting. Prerequisite: RSTH 341.

RSTH 343. Respiratory Therapy Science III. 4 Units.
Lecture and laboratory presentation of the principles of respiratory therapy related to mechanical ventilatory support, including patient management and ventilatory support systems. Emphasizes methods of ventilatory support, with special attention to the mechanical ventilators commonly used in the students’ clinical sites. Applies this information to the clinical setting. Prerequisite: RSTH 341, RSTH 342.

RSTH 354. Case Studies in Adult Respiratory Care. 2 Units.
Adult critical-care concepts presented through a case-study approach. Respiratory care plan used to present diseases, treatment, and procedures relevant to respiratory care. Patient rounds further develop critical-thinking skills in a patient-care setting. Prerequisite: RSTH 381.

RSTH 366. Diagnostic Techniques. 3 Units.
Continues the clinical use of diagnostic tests and procedures. Emphasizes evaluation of chest radiographs, electrocardiography, and monitoring hemodynamics. Lecture and laboratory. Prerequisite: RSTH 304, RSTH 331.

RSTH 381. Cardiopulmonary Diseases I. 2 Units.
Comprehensively studies cardiopulmonary diseases and their adverse effects. Course content includes disease etiology, pathology, pathophysiology, clinical features, prognosis, treatment, and prevention. Prerequisite: RSTH 304, RSTH 331, RSTH 341.

RSTH 382. Cardiopulmonary Diseases II. 2 Units.
Comprehensively studies cardiopulmonary diseases and their adverse effects. Course content includes disease etiology, pathology, pathophysiology, clinical features, prognosis, treatment, and prevention. Prerequisite or concurrent: RSTH 304, RSTH 381*, RSTH 342.

RSTH 391. Respiratory Care Practicum I. 2 Units.
General introduction to the clinical setting; assessment of patients with respiratory disease. Develops work habits and patient-care techniques. Students must obtain current cardiopulmonary resuscitation (CPR) certification from the American Heart Association before the end of the quarter. Prerequisite: RSTH 341; AHA CPR certification.

RSTH 392. Respiratory Care Practicum II. 2 Units.
Applies specific therapeutic techniques, including oxygen and humidity therapy, aerosol therapy, airway management, lung-inflation techniques, and chest physiotherapy. Prerequisite: RSTH 342, RSTH 391; AHA CPR certification.

RSTH 393. Respiratory Care Practicum III. 5 Units.
Applies therapeutic techniques in continuous mechanical ventilation; special procedures, operation and postanesthesia room, and arterial blood-gas laboratory. Prerequisite: RSTH 343, RSTH 382, RSTH 392.

RSTH 401. Cardiopulmonary Intensive Care. 2-4 Units.
Management of the patient with cardiopulmonary failure. Theory and capabilities of various life support and monitoring systems. Prerequisite: Postprofessional student, senior standing; or consent of instructor.

RSTH 404. Critical Care. 4 Units.
Continues the theory, practice, and knowledge of mechanical ventilation—providing an integrated approach to respiratory care in the critical-care arena. A systems-based approach used to incorporate respiratory care concepts, such as planning and implementing of protocols, best-practice guidelines, etc. Presentations, projects, and critical evaluation used to increase critical-thinking skills and patient-care skills.

RSTH 411. Advanced Cardiac Life Support. 2 Units.
Principles and techniques of advanced emergency cardiac care. Includes basic CPR, endotracheal intubation, use of airway adjuncts, monitoring and dysrhythmia recognition, drugs for cardiac life support, intravenous techniques, circulatory adjuncts, and devices for elective cardioversion or defibrillation, stabilization, and transportation. Follows American Heart Association criteria for acid-base balance, drug therapy, and therapeutic interventions.

RSTH 421. Perinatal and Pediatric Respiratory Care. 2 Units.
Fetal development and circulation. Prenatal risk factors. Newborn resuscitation; newborn and pediatric assessment. Etiology, pathophysiology, course, treatment, and outcome of respiratory diseases as they relate to problems in pediatrics and neonatology. Discusses ECMO, high-frequency ventilation, and nitric oxide. Prerequisite: RSTH 304, RSTH 331.

RSTH 422. Advanced Perinatal and Pediatric Respiratory Care. 2 Units.
Pathophysiology of newborn and pediatric diseases likely to be encountered by the respiratory care practitioner. Perinatal risk factors, resuscitation, and research on the transition to extrauterine life. Diagnostics, monitoring of clinical indices, and treatments used in perinatal/pediatric respiratory care. Advanced information on surfactant, high-frequency ventilation, and ECMO. Prerequisite: RSTH 421; or consent of instructor. Does not apply to postprofessional respiratory care students.
RSTH 424. Exercise Physiology and Pulmonary Rehabilitation. 3 Units. Metabolism of carbohydrates, lipids, and proteins in energy production, oxygen consumption, carbon dioxide production, and respiratory quotient applied to oxygen uptake, carbon dioxide output, and respiratory exchange ratio at rest and during exercise. Reviews metabolic, body-fat composition, and exercise studies; and, malnutrition in chronic obstructive pulmonary disease as foundations for evaluation and implementation of pulmonary rehabilitation programs.

RSTH 431. Senior Project I. 2 Units. Introduces the process of proposal development for a respiratory care project. Weekly assignments apply the steps in developing the selected topic. Cardiopulmonary project development incorporates the concepts of evidence-based medicine.

RSTH 432. Senior Project II. 2 Units. Introduces the process of proposal development for a respiratory care project. Weekly application of the steps in project development. Cardiopulmonary project design incorporates project design concepts and needs assessment. Prerequisite: RSTH 431.

RSTH 433. Senior Project III. 2 Units. The process of developing a proposal for a respiratory care project. Weekly application of the steps in topic development. Cardiopulmonary project design incorporates the concepts of design implementation and outcome assessment. Prerequisite: RSTH 431, RSTH 432.

RSTH 434. Advanced Patient Assessment. 2 Units. Advanced skills in interviewing, physical examination, and interpretation of laboratory data. Lecture, reading material, and physical examination procedures. Provides insight for better interview and examination of patients with cardiopulmonary disease. Increases understanding of the pathophysiology behind the symptoms. Prerequisite: RSTH 334; Does not apply to postprofessional respiratory care students.

RSTH 441. Respiratory Therapy Science IV. 3 Units. Presents and discusses the clinical application of respiratory therapy devices in-depth, and their influences on patient care. Reports and discussions of current and advanced developments. Emphasizes application of this information to the clinical setting. (Not taught every year.) Prerequisite: RSTH 341, RSTH 342, RSTH 343; or consent of instructor.

RSTH 444. Case Studies in Neonatal/Pediatric Respiratory Care. 2 Units. Develops respiratory care-management skills in caring for the neonatal and pediatric patient through the presentation of student case studies. Clinical staff and faculty review current management of the newborn, infant, and child. Student presents patients and explains implications of care. Develops presentation skills. Prerequisite: RSTH 421; Does not apply to postprofessional respiratory care students.

RSTH 451. Respiratory Care Affiliation I. 2 Units. General care, basic critical care, and advanced critical care in the adult, pediatric, and neonatal setting as practiced at LLUMC. Open to students who are now, or have been recently, employed by LLUMC. Prerequisite: CA RCP licensure.

RSTH 452. Respiratory Care Affiliation II. 4 Units. Speciality clinical assignments selected from adult critical care, cardiopulmonary specialties, trauma, neurology, surgery, postsurgery, research laboratory. Prerequisite: AHCJ 461; RSTH 315, RSTH 422.

RSTH 453. Respiratory Care Affiliation III. 4 Units. Speciality clinical assignments selected from the following areas: cardiopulmonary specialties, pediatrics and neonates, research, and special procedures. Prerequisite: RSTH 315, RSTH 452.

RSTH 454. Respiratory Care Affiliation IV. 5 Units. Speciality elective clinical assignments selected from the following areas: adult critical care, cardiopulmonary specialties, pediatrics and neonates, polysomnography, rehabilitation and patient education, research, and special procedures. Prerequisite: AHCJ 461; RSTH 315, RSTH 452; CA RCP licensure.

RSTH 462. Management Practicum II. 3 Units. Experience in the management of respiratory or emergency medical care management. Clinical application of the theoretical management skills developed during the didactic portions of the training.

RSTH 463. Management Practicum III. 3 Units. Experience in the management of respiratory or emergency medical care management. Clinical application of the theoretical management skills developed during the didactic portions of the training. Includes assisting clinical managers in supervision and management of RCP staff and students.

RSTH 464. Case Management in Respiratory Care. 2 Units. Utilizes a case management approach to patient care in the management and evaluation of treatment and disease. Special emphasis on case management of the respiratory care patient includes discharge planning, utilization review, patient assessment, cost containment, patient education, and integration issues. Prerequisite: RSTH 334, RSTH 424, RSTH 434; Does not apply to postprofessional respiratory care students.

RSTH 466. Advanced Diagnostic Techniques. 2 Units. Advanced diagnostic theory and practice in the following areas: Holter monitoring, echocardiography, bronchoscopy, sleep studies, and other relevant respiratory care diagnostics. Prerequisite: RSTH 366; Does not apply to postprofessional respiratory care students.

RSTH 471. Instructional Techniques I. 2 Units. Develops units of instruction, instructional objectives, and evaluation procedures. Students observe and participate in classroom management; and apply teaching principles through experience in various teaching activities, such as community preventive health care programs, in-service and continuing education, and college classroom and clinical teaching. Conferences and individual guidance.

RSTH 474. Cardiopulmonary Health Promotion and Disease Prevention. 2 Units. Selected topics dealing with aspects of disease prevention. Includes the relevance of statistics, epidemiology, research designs, and clinical trials; as well as selected disease trends, lifestyle modification, the role of physical activity, nutrition and immunization, and public health approaches to communicable diseases. Prerequisite: RSTH 424.

RSTH 480. Lung Ultrasound Assessment. 2 Units. Presents the technology and evidenced-based application of lung ultrasound in the assessment of the critically ill. Student learn to identify twelve signatures (images) of lung ultrasound with application of the BLUE-Protocol, FALLS-Protocol, and SESAME-Protocol. Includes online lectures, assignments, and interactive lung ultrasound case simulations. Prerequisite: RSTH 404 or licensed RCP.

RSTH 485. Evidenced-Based Medicine in Respiratory Care I. 2 Units. Provides basic knowledge and experience in the area of evidenced-based medicine as it relates to respiratory care practice and research.

RSTH 486. Evidenced-Based Medicine in Respiratory Care II. 2 Units. Provides advanced knowledge and experience in the area of evidenced-based medicine as it relates to respiratory care practice and research. Emphasizes the neonatal and pediatric areas of respiratory care.
RSTH 487. Evidenced-Based Medicine in Respiratory Care III. 2 Units.
Provides advanced knowledge and experience in the area of evidenced-based medicine as it relates to respiratory care practice and research. Emphasizes the adult areas of respiratory care.

RSTH 491. Education Practicum I. 3 Units.
Provides experience in clinical education, evaluation, and scheduling. Familiarizes student with hospital affiliation agreements and accreditation issues. Primary experience in the general and adult critical care areas. Prerequisite: CA RCP licensure.

RSTH 492. Education Practicum II. 3 Units.
Provides experience in clinical education, evaluation, and scheduling. Familiarizes student with hospital affiliation agreements and accreditation issues. Primary experience in the neonatal and pediatric intensive care units. Prerequisite: CA RCP licensure.

RSTH 493. Education Practicum III. 3 Units.
Provides experience in clinical education, evaluation, and scheduling. Familiarizes student with hospital affiliation agreements and accreditation issues. Primary experience in specialty procedures and rehabilitation. Prerequisite: CA RCP licensure.

RSTH 494. Respiratory Care Practicum IV. 3 Units.
Students develop professional competence and maturity in the clinical setting. Comprehensive training in all aspects of respiratory care, including the pulmonary function laboratory and home care. Prerequisite: RSTH 343, RSTH 382, RSTH 393, RSTH 404.

RSTH 495. Respiratory Care Practicum V. 2 Units.
Syllabus in respiratory care practice. Addresses neonatal/pediatric and adult critical care, cardiopulmonary diagnostics, hyperbaric medicine, sleep disorders, and cardiopulmonary rehabilitation in general, critical-care and extended care settings. Prerequisite: RSTH 494, RSTH 404.

RSTH 496. Respiratory Care Practicum VI. 3 Units.
Continues specialty training in respiratory care practice. Addresses neonatal/pediatric and adult critical care, cardiopulmonary diagnostics, hyperbaric medicine, sleep disorders, and cardiopulmonary rehabilitation in general, critical-care and extended care settings. Prerequisite: RSTH 495.

RSTH 499. Respiratory Therapy Independent Study. 0.5-4 Units.
Under the direction of the program director, student submits a project or paper on a topic of current interest in an area of respiratory care. Regular meetings provide student with guidance and evaluation in the development of the project or paper. Elected on the basis of need or interest.

RSTH 501. Advanced Cardiopulmonary Anatomy and Physiology I. 3 Units.
Clinical approach and application of cardiopulmonary anatomy and physiology to the respiratory care and medical patient. Includes study of respiratory physiology and cardiac and circulatory function, with relevant clinical application. Provides in-depth study of cardiac and pulmonary anatomy and physiology beyond undergraduate gross anatomy and physiology course work, particularly at the molecular mechanistic level.

RSTH 502. Advanced Cardiopulmonary Anatomy and Physiology II. 3 Units.
Continues RSTH 501. Clinical approach and application of cardiopulmonary anatomy and physiology to the respiratory care and medical patient. Studies respiratory physiology, cardiac, and circulatory function—with relevant clinical application. Provides an in-depth study of cardiac and pulmonary anatomy and physiology beyond undergraduate gross anatomy and physiology course work, particularly at the molecular mechanistic level. Prerequisite: RSTH 501.

RSTH 510. Seminar in Translational Cardiopulmonary Science I. 1 Unit.
First of a four-quarter series of seminars providing an overview of translational cardiopulmonary basic and clinical research. Includes discussion of current cardiopulmonary clinical best practices, scientific and administrative processes that achieve best practices, and current scientific research aimed at progression of cardiopulmonary science at the bedside. Required for MSRC students without a respiratory care background (research track).

RSTH 511. Seminar in Translational Cardiopulmonary Science II. 1 Unit.
Second of a four-quarter series of seminars providing an overview of translational cardiopulmonary basic and clinical research. Includes discussion of current cardiopulmonary clinical best practices, scientific and administrative processes that achieve best practices, and current scientific research aimed at progression of cardiopulmonary science at the bedside. Required for MSRC students without a respiratory care background (research track).

RSTH 512. Seminar in Translational Cardiopulmonary Science III. 1 Unit.
Third of a four-quarter series of seminars providing an overview of translational cardiopulmonary basic and clinical research. Includes discussion of current cardiopulmonary clinical best practices, scientific and administrative processes that achieve best practices, and current scientific research aimed at progression of cardiopulmonary science at the bedside. Required for MSRC students without a respiratory care background (research track).

RSTH 513. Seminar in Translational Cardiopulmonary Science IV. 1 Unit.
Fourth of a four-quarter series of seminars providing an overview of translational cardiopulmonary basic and clinical research. Includes discussion of current cardiopulmonary clinical best practices, scientific and administrative processes that achieve best practices, and current scientific research aimed at progression of cardiopulmonary science at the bedside. Required for MSRC students without a respiratory care background (research track).

RSTH 541. Advanced Concepts in Critical Care I. 2 Units.
Explores relevant studies impacting cardiopulmonary science. Discusses physical principles and molecular mechanisms associated with phenotypic changes in compliance and resistance upon implementation of positive pressure ventilation (PPV). Addresses benefits and limitations of techniques offered by advanced, novel ventilation modes in regard to reduced physiological insult upon PPV. Encourages research questions, data interpretation, and revision of current protocols and modalities.

RSTH 542. Advanced Concepts Critical Care II. 2 Units.
Continues RSTH 541. Includes the systemic effects of the critical care patient, their impact on the cardiopulmonary system, and the role of the cardiopulmonary system in maintaining homeostasis. Encourages research questions, data interpretation, and revision of current protocols and modalities. Prerequisite: RSTH 542.
RSTH 550. Advanced Procedures in Cardiopulmonary Science. 2 Units.
Study and practice of invasive and noninvasive procedures and associated equipment—such as the management of artificial airways, fiberoptic bronchoscopy, thoracentesis, chest tubes, hyperbaric therapy, arterial blood gas sampling, line placements, ACLS procedures, medications, IVs—related to the critical care patient. Emphasizes application to patient situations, assessment of care, and principles of equipment use above that of the entry-level respiratory care practitioner.

RSTH 560. Advanced Cardiopulmonary Assessment, Diagnostics, and Monitoring. 2 Units.
Applies integrated theory, management, practice, and application approaches to general medicine, cardiopulmonary assessment, diagnostics, and monitoring for the cardiopulmonary patient. Includes total system assessment, interpretation of diagnostics, and implementation of planning for improved intensive cardiopulmonary care. Encourages research questions, data interpretation, and revision of current protocols and modalities.

RSTH 571. Advanced Pathophysiology of Cardiopulmonary Diseases I. 3 Units.
A case study approach of the pathophysiology, clinical signs and symptoms, diagnosis, management, practice, and prognosis of acute and chronic pulmonary and cardiac diseases—with emphasis on respiratory care and comorbidities. Studies cardiopulmonary function as it relates to understanding of the pathophysiology of disease states.

RSTH 572. Advanced Pathophysiology of Cardiopulmonary Diseases II. 3 Units.
Continues RSTH 571. A case study approach to explore pathophysiology, clinical signs and symptoms, diagnosis, management, practice, and prognosis of acute and chronic cardiopulmonary diseases and comorbidities. Studies cardiopulmonary function as it relates to understanding the pathophysiology and molecular mechanisms of disease states. Encourages research questions/exploration and protocol/policy modification. Prerequisite: RSTH 571.

RSTH 574. Nutrigenomics and Cardiopulmonary Health and Disease. 4 Units.
Discusses nutrition and its effects on epigenetic regulation of genes that determine cardiopulmonary health and disease. Offers a brief overview of epigenetics, with a focus on food as source stimuli for altering the expression of pathway components known to both induce and minimize disease progression of the cardiovascular and pulmonary systems.

RSTH 580. Research Concept in Respiratory Care Sciences. 3 Units.
Applies research specific to respiratory care science through the evaluation and comparison of relevant literature to clinical practice.

RSTH 585. Current Issues in Respiratory and Health Care Policy. 3 Units.
Addresses emerging issues in medicine, cardiopulmonary science, and health-care policy. Reviews relevant research and new trends in respiratory care management, as well as practice that impacts patient care. Includes inpatient, outpatient, rehabilitation, prevention, and related topics.

RSTH 587. R Programming for Health Care and Translational Science II. 4 Units.
Second course in a four-part series. Introduction to programming in R. Acquiring and cleaning internet data, subsetting and graphing data, using statistics in R for data analysis, and generating interpretable reports that can be presented to professional and lay audiences. Introduces tools necessary to analyze large datasets to answer epidemiological questions.

RSTH 591. Capstone Project in Respiratory Care I. 2 Units.
Students address and present a substantial issue related to their professional area of interest, then design and implement scholarly results and presentation. Emphasizes design, literature review, and needs assessment. A thesis option available for students who require a directed research study.

RSTH 592. Capstone Project in Respiratory Care II. 2 Units.
Students present the findings of their completed project—emphasizing data collection, implementation, and evaluation. A thesis option available for students who require a directed research study. Prerequisite: RSTH 591.

RSTH 593. Capstone Project in Respiratory Care III. 2 Units.
A continuation of RSTH 592. Graduate student presents findings of the total project, emphasizing data collection, implementation, and evaluation of the project. MSRC faculty and students discuss need for revision or further validation studies. Prerequisite: RSTH 591, RSTH 592.

RSTH 594. Capstone Project in Respiratory Care IV. 3 Units.
Students present the findings of their completed project—emphasizing data collection, implementation, and evaluation. A thesis option available for students who require a directed research study.

RSTH 596. Advanced Clinical Practice in Respiratory Care I. 2 Units.
Clinical practicum in medicine, pulmonary, and critical care under the direct supervision of a practicing/supervising pulmonologist or other preapproved physician. Emphasizes both inpatient and outpatient assessment, management, practice, and procedures. Requires prior approval of the program director and an approved signed preceptor agreement on file.

RSTH 597. Advanced Clinical Practice in Respiratory Care II. 2 Units.
Continues RSTH 596. Clinical practicum in medicine, pulmonary, and critical care under the direct supervision of a practicing/supervising pulmonologist or other preapproved physician. Emphasizes inpatient and outpatient assessment, diagnosis, management, practice, and procedures. Requires prior approval of the program director, as well as an approved signed preceptor agreement on file.

Restorative Dentistry (RESD)

Courses

RESD 701. Restorative Dentistry I Lecture. 2 Units.
Terminology, morphologic characteristics, and interrelationship of permanent teeth.

RESD 701L. Restorative Dentistry I Laboratory. 2 Units.

RESD 702. Restorative Dentistry II. 2 Units.
Introduces mandibular movement. Relationship to the anatomy of teeth. Studies source, use, and manipulation of dental materials; and their physical properties relative to dentistry.

RESD 702L. Restorative Dentistry II Laboratory. 2 Units.
Laboratory experiences.

RESD 708. Restorative Dentistry III Lecture. 2 Units.
Basic principles and techniques of cavity preparation and restoration of teeth with silver alloy and tooth-colored restorative materials. Studies source, use, and manipulation of dental materials; and their physical properties relative to dentistry.

RESD 708L. Restorative Dentistry III Laboratory. 2 Units.
Laboratory experiences.
RESD 709. Restorative Dentistry IV Lecture. 2 Units.
Basic principles and techniques of cavity preparation and restoration of teeth with silver alloy and tooth-colored restorative materials. Introduces basic casting principles and techniques. Studies the source, use, and manipulation of dental materials; and their physical properties relative to dentistry.

RESD 709L. Restorative Dentistry IV Laboratory. 2 Units.

RESD 764. Removable Prosthodontics I. 2 Units.
Covers the basic concepts of treatment and management of the partially and completely edentulous patient utilizing a removable prosthesis. Covers concepts of anatomy, function, and occlusion. Removable partial denture design principles and treatment planning to understand the proper planning and sequencing of treatment for a patient requiring a combination of operative, fixed, and removable prosthodontics.

RESD 764L. Removable Prosthodontics I Laboratory. 1.5 Unit.

RESD 765. Removable Prosthodontics II. 1 Unit.
Focuses on the fundamentals of designing a removable partial denture for patients. Assists student in understanding treatment of patients with removable prosthesis through individual projects, group exercises, oral and power point presentations, and writing assignments.

RESD 765L. Removable Prosthodontics II Laboratory. 1 Unit.
Student applies concepts and fundamentals from RESD 765 to complete various projects/laboratory exercises to treat patients with removable partial dentures.

RESD 771. Single Casting Technique Lecture. 2 Units.
Basic tooth preparation for single cast restorations, including porcelain fused to metal, tissue management, impression techniques, and casting fabrication.

RESD 771L. Single Casting Technique Laboratory. 2 Units.
Laboratory experience in single casting techniques.

RESD 772. Fixed Prosthodontics Lecture. 2 Units.
Indications, treatment planning, design and fabrication of metal and porcelain-fused-to-metal restorations, including single units, fixed partial dentures, and single implant restorations.

RESD 772L. Fixed Prosthodontics Laboratory. 2 Units.
Laboratory experience in fixed prosthodontics.

RESD 773. Fixed Prosthodontics II Lecture. 2 Units.
Continues RESD 772.

RESD 773L. Fixed Prosthodontics II Laboratory. 2 Units.
Continued laboratory experience in fixed prosthodontics.

RESD 801. Fixed Prosthodontics and Occlusion. 1 Unit.
Introduces additional techniques for fixed prosthodontics, treatment planning, and repair techniques for prosthetic failures.

RESD 811. Dental Materials II. 1 Unit.
Selection and uses of current dental materials.

RESD 822. Operative Dentistry II Lecture. 1 Unit.
Indications, preparations, and placement of direct core build-up procedures (including endodontically treated teeth), atypical case gold, and complex amalgam restorations. Covers implant overdenture procedures. Provides expanded teaching and hands-on laboratory practice of CAD/CAM procedures.

RESD 822L. Operative Dentistry II Laboratory. 1 Unit.
Laboratory experiences introduce students to the MARC simulator, CAD/CAM experience in tooth preparation and image capture, post and core build-up, and implant overdenture procedures; as well as further complex tooth restoration procedures.

RESD 823. Aesthetic Dentistry. 1 Unit.
Principles of dental aesthetics, adhesion to tooth tissues, preparation and placement of tooth-colored restorations in anterior and posterior teeth. Resin, gold, ceramic, and CAD/CAM restorations. Emphasizes diagnosis and treatment planning for aesthetic procedures.

RESD 823L. Aesthetic Dentistry Laboratory. 1 Unit.
Laboratory experiences focusing on dental photography, diastema closures, bleaching trays, resin restorations, and preparation of teeth for veneer restorations and temporization.

RESD 844. Restorative Study Club Seminar. 0.5 Units.

RESD 854. Implant Dentistry. 2 Units.
Focuses on diagnostic and treatment-planning procedures associated with implant dentistry, the benefits of implant dentistry, the scientific and technical foundations for implant surgery and associated advanced procedures, the peri-implant tissues, postplacement care, and clinical complications associated with dental implants.

RESD 854L. Implant Dentistry Laboratory. 1 Unit.
Laboratory experience that applies knowledge of diagnosis and treatment planning to the fabrication of radiographic and surgical templates, and provides experience with the analysis of cone-beam radiographic scans and the use of dental implant-planning software. Laboratory additionally provides an implant-placement experience using a manikin—followed by impression making, the fabrication of a working cast, and the formation of a wax pattern for a definitive restoration.

RESD 861. Senior Topics in Removable Prosthodontics. 2 Units.
Treatment planning and problem solving in removable prosthodontics and combination cases to prepare fourth-year dental students for dental practice and National Dental Board Examination Part II.

RESD 875A. Restorative Dentistry Clinic. 1.5 Unit.
Clinical practice in the restoration of teeth and the replacement of missing teeth—including attendant diagnostic procedures, planning and sequencing of treatment, disease control procedures, and appropriate continuing-care procedures following treatment.

RESD 875B. Restorative Dentistry Clinic. 8 Units.
Clinical practice in the restoration of teeth and the replacement of missing teeth—including attendant diagnostic procedures, planning and sequencing of treatment, disease control procedures, and appropriate continuing-care procedures following treatment.

RESD 875C. Restorative Dentistry Clinic. 28 Units.
Clinical practice in the restoration of teeth and the replacement of missing teeth—including attendant diagnostic procedures, planning and sequencing of treatment, disease control procedures, and appropriate continuing-care procedures following treatment.

### School of Behavioral Health Global (SBHG)

#### Courses

SBHG 700. Global Behavioral Health Service Learning. 2 Units.
Short-term elective experience (approximately ten days) in international behavioral health offered during the summer quarter. LLU associated sites coordinated and assigned by the dean's office. Examines ethical and practice issues associated with global humanitarian service versus traditional Western behavioral health interventions. Requires pre- and concurrent seminars. Specific host site requirements may apply.
SBHG 705. Global Behavioral Health Elective Practicum. 4 Units.
Emphasizes recovery, resiliency, and empowerment as foundations of
global behavioral health interventions through an elective experience
in international behavioral health. Prerequisite: Good academic
and behavioral standing; approval from student’s program director,
department chair, and dean; valid passport.

School of Dentistry—Clinical (SDCL)

Courses

SDCL 696. Directed Study. 1-4 Units.
A directed study (DS) course that can be used in any graduate program
either to further study of a particular subject or subjects, or to remediate
academic deficiencies without having to repeat an entire course. Program
director or his/her designee develops the specific course content and
assignments.

SDCL 711. Clinic Orientation I. 2 Units.
Introduces direct patient care. Includes: clinic policies and requirements;
use of the clinic computing system; basic patient management
techniques and issues; a private practice model; diagnosis and treatment
planning; professional liability and regulatory compliance; clinical
examinations; and, standards of care.

SDCL 712. Clinic Orientation II. 2 Units.
Builds on SDCL 711 by continuing instruction related to the clinic
computing system. Discusses diagnosis and treatment planning
of patient cases, as well as sequencing of treatment procedures.
Includes intraoral photography, financial planning for patients,
disinfection techniques and universal precautions, quality assurance
and improvement, long-term assessment of care outcomes. Introduces
various departments and requirements within each department.

SDCL 744. Clinical Training in Advanced Restorative Dentistry. 8 Units.
Provides mission support and training for Seventh-day Adventist
ternational dentists and other foreign dentists residing outside the
United States who will return to their dental clinics/countries after
program completion. Includes six months of study. Allows qualified
dentists from other countries to study and treat patients at Loma Linda
University School of Dentistry. Course generates no academic credit
and cannot apply toward any other program in the School of Dentistry.

SDCJ 759A. Clinical Experience. 3 Units.
A directed study (DS) course that can be used in any graduate program
either for advanced clinical activity in selected areas, or to remediate
clinical deficiencies without having to repeat an entire course. Program
director or his/her designee determines the nature and scope of
the clinical activity.

SDCJ 759B. Clinical Experience. 6 Units.
A directed study (DS) course that can be used in any graduate program
either for advanced clinical activity in selected areas, or to remediate
clinical deficiencies without having to repeat an entire course. Program
director or his/her designee determines the nature and scope of
the clinical activity.

SDCJ 759C. Clinical Experience. 9 Units.
A directed study (DS) course that can be used in any graduate program
either for advanced clinical activity in selected areas, or to remediate
clinical deficiencies without having to repeat an entire course. Program
director or his/her designee determines the nature and scope of
the clinical activity.

Social Policy (SPOL)

Courses

SPOL 588. Special Topics in Social Policy and Social Research. 1-5 Units.
Reviews current knowledge and/or research methodologies in specified
areas of social policy and social research.

SPOL 599. Independent Study. 1-8 Units.
Limited to Ph.D. degree students who wish to pursue independent
investigations in social policy and/or social research under the direction
of a department faculty member.

SPOL 600. Colloquium. 1 Unit.
Provides students with an academic seminar to explore and discuss
relevant topics in the field of social policy and social research.
Prerequisite: Program prerequisite in interviewing and counseling.

SPOL 601. Integrative Seminar: Pro-seminar. 1 Unit.
Provides an overview to social work academe, research, policy and
teaching. Focuses on LLU’s program and creates an environment to
nurture student’s research interest. Prerequisite: Matriculated in PhD in
Social Welfare and Social Research.

SPOL 602. Integrative Seminar: Global Perspective. 2 Units.
Focuses on research and practice using a global perspective that locates
differences and similarities of behavioral and other health inequities
locally and internationally. Prerequisite: SPOL 601.
SPOL 603. Integrative Seminar: Implementation Science. 1 Unit.
Focuses on promoting, adopting, and integrating evidenced-based research and practices by identifying barriers that prevent successful integration in practice, policies, and programming. Explores transdisciplinary research, transprofessional practice, and effective leadership and advocacy. Prerequisite: SPOL 601, SPOL 602.

SPOL 604. Integrative Seminar: Academic Practice. 1 Unit.
Focuses on preparing students for careers in social work education. Topics might likely include developing a teaching philosophy, classroom teaching, student assessment, curriculum development, and accreditation. Prepares students for the job market through assisting with development of a CV, interviewing skills, and job searching. Prerequisite: SPOL 601, SPOL 602, SPOL 603.

SPOL 610. Diversity Theory and Global Perspectives. 3 Units.
Critical examination of contemporary theories of diversity as seen through the lens of a global perspective, including intersectionality. Opportunity to apply these theories using a cultural humility framework for engaging diverse populations in policy practice and research.

SPOL 613. Social Science Concepts I. 3 Units.
First of two courses reviewing key theories, writers, conceptual frameworks, and seminal ideas from classical social science theory that have laid the foundation for contemporary social welfare theory and social research.

SPOL 614. Social Science Concepts II. 3 Units.
Second of two courses reviewing key theories, writers, conceptual frameworks, and seminal ideas from the Post Modern era that have laid the foundation for contemporary social welfare theory and social research. Prerequisite: SPOL 613.

SPOL 615. Economic Theory and Social Policy. 4 Units.
Presents the basic ideas and concepts of macroeconomic theory and applies them to understanding current and recent developments in social policy. Students learn to evaluate macroeconomic conditions—such as unemployment, inflation, growth wages, and income distribution—and gain understanding of how such conditions impact the provision of health and human services.

SPOL 616. History and Philosophy of Social Welfare Policy. 3 Units.
Explores the history of social welfare from a multicultural perspective and relates these principles to current and evolving social needs.

SPOL 654. Research Methods I. 4 Units.
Advanced quantitative research methods. Emphasizes experimental and quasi-experimental designs, and examines specific methodologies used in conducting research in the area of social policy and social research. Topics include measurement issues, research design, sampling, and statistical interpretation. Addresses survey research, time-series designs, and more advanced techniques.

SPOL 655. Research Methods II. 4 Units.
Advanced course in qualitative and mixed research methods. Emphasizes selected qualitative and mixed research methodologies specific to social policy and clinical and health services research. Topics covered include theoretical bases for conducting qualitative research; research design; data gathering, including interviewing, observation, archival and historical research, and data analysis and writing. Introduces various methods for integrating qualitative and quantitative methodologies.

SPOL 656. Organizational Theory and Policy. 3 Units.
Explores the complexities of large organizations; how organizations are born, evolve, and survive. Examines bureaucratic systems, formal and informal structures, communication patterns, and philosophical approaches that influence effectiveness and efficiency of services delivery. Implications of these on the development and implementation of social policies explored.

SPOL 658. Advanced Policy Analysis and Research. 3 Units.
Presents conceptual and analytical requirements of policy analysis and research. Examines integration of behavioral, political, economic, and sociometric frameworks for understanding human conditions that support the development of formal policy arguments and policy research for sustained change.

SPOL 664. Applied Research for Social Policy. 2 Units.
Provides students with a series of formal exercises simulating primary applied social research strategies used in the development of social policy. Explores the contributions of social research to social policy through studies of public records and data bases; clinical contexts; social experimentation; program planning, development, and evaluation; and action research.

SPOL 665. Statistical Practicum Seminar. 2 Units.
Students collectively conceptualize and analyze a research question from a data set. Requires a scholarly product outcome.

SPOL 667. Research Methods Practicum Seminar. 2 Units.
Development of methodology section and submission of draft dissertation proposal. Prerequisite: SPOL 665.

SPOL 671. Applied/Structured Research I. 2-4 Units.
Provides students the opportunity to advance knowledge and skills in a specialized area of study. Part of a year-long sequence that culminates in an applied research product at the end of SPOL 673. Research mentor develops with the student a plan for the year, with objectives for each quarter. Research plan approved by the Program Committee. Evaluation based on accomplishment of quarterly objective(s).

SPOL 672. Applied/Structured Research II. 2-4 Units.
Provides students the opportunity to advance knowledge and skills in a specialized area of study. Part of a year-long sequence that culminates in an applied research product at the end of SPOL 673. Research mentor develops with the student a plan for the year, with objectives for each quarter. Research plan approved by the Program Committee. Evaluation based on accomplishment of quarterly objectives.

SPOL 673. Applied/Structured Research III. 2-4 Units.
Provides students the opportunity to advance knowledge and skills in a specialized area of study. Part of a year-long sequence that culminates in an applied research product at the end of SPOL 673. Research mentor develops with the student a plan for the year, with objectives for each quarter. Research plan approved by the Program Committee. Evaluation based on accomplishment of quarterly objectives.

SPOL 681. Dissertation Proposal I. 3 Units.
Development of the dissertation proposal. Research advisor develops with the student mutually agreed-upon objectives. Evaluation based on accomplishment of these objectives.

SPOL 682. Dissertation Proposal II. 3 Units.
Development of the dissertation proposal. Research advisor develops with the student mutually agreed-upon objectives. Evaluation based on accomplishment of these objectives. Prerequisite: SPOL 681.
SPOL 683. Dissertation Proposal III. 3 Units.
Development of the dissertation proposal. Research advisor develops with the student mutually agreed-upon objectives. Evaluation based on accomplishment of these objectives. In addition, student must successfully defend a dissertation proposal according to program and Faculty of Graduate Studies guidelines. Prerequisite: SPOL 681, SPOL 682.

SPOL 697. Research. 1-6 Units.
Credit for dissertation research. Total of 18 units required. May be repeated for credit.

SPOL 699. Dissertation. 4-12 Units.
Should be taken during the last quarter of registration prior to completion and defense.

Social Work (SOWK)

Courses
SOWK 510. Diversity Theory in Practice and Research. 3 Units.
Examines and applies contemporary theories of diversity from a critical perspective. Includes intersectionality and use of a cultural humility framework for engaging diverse populations at all levels of practice.

SOWK 513. Human Behavior in a Culturally Diverse Environment. 5 Units.
Provides the basis for understanding human development and life transitions throughout the life span within an ecological perspective. Orient the student to the generalist social work approach to understanding human behavior in a cross-cultural context, with a focus on normal behavior from birth through senescence. Provides a theoretical foundation on which to build social work-practice skills.

SOWK 514. Social Welfare History and Policy. 5 Units.
Provides students with an understanding of the historical foundations of the social work profession, including its influence in the development of the U.S. system of social welfare. Examines the societal perspectives and contradictions that have affected the development and evolution of contemporary social policies and services in the U.S. Emphasizes understanding of the role of race, gender, and perception of human needs in shaping social policy.

SOWK 517. Practice I: Individuals. 3 Units.
Students conduct a biopsychosocial-spiritual assessment, along with a full range of beginning intervention strategies for working with individuals. Emphasizes special problems experienced in microsystems and by populations at risk, such as women and minorities. Focuses on goal setting, assessment, and successful interventions with attention to cultural values that influence the development and resolution of psychosocial problems. Prerequisite or concurrent: Social work practicum.

SOWK 518. Practice II: Groups. 3 Units.
Provides students with an understanding of generalist social work practice with groups. Includes a survey of small-group constructs, research, and principles of ethical application. Emphasizes differentiation among the types of individuals, situations, and presenting problems best served through group processes and intervention methods.

SOWK 519. Practice III: Organizations and Communities. 3 Units.
Utilizes an ecological systems framework and an empowerment practice model within the macro context. Includes: population outcomes, community organization, interagency relationships, leadership skills, and cultural sensitivity.

SOWK 520. Practice IV: Families. 3 Units.
Introduces family interventions. Examines views and issues regarding contemporary family structure and function, and focuses on concepts and techniques used to promote change in family functioning. Course meets state requirement for content in family violence.

SOWK 548. Research Methods. 5 Units.
Reviews quantitative and qualitative research methodologies in order to provide students with an understanding of the scientific and ethical approaches to building knowledge. Employs computer-based statistical analysis and data interpretation to assist students in integrating research into social work practice.

SOWK 574. Practice V: Social Work Administration. 3 Units.
Provides macropractice knowledge, skills, and perspectives of administrative practices needed to develop, support, and maintain effective service delivery. Topics include role identification and development, professional and organizational ethics, situational leadership, strategic planning, levels and types of decision making, management of organizational behavior, use of information systems, budgeting, documentation and reporting, resource development and utilization, and community networking.

SOWK 578. Field Orientation. 0 Units.
Provides students with the policies and procedures for completing the program’s practicum requirements. Begins the process of examining social work values and ethics as students are introduced to the NASW code of ethics and fundamental principles of professional behavior prior to beginning their field practicum.

SOWK 584. Special Topics in Social Work. 1-4 Units.
Lecture and discussion, under the direction of a faculty member, on a current topic in social work. May be repeated for a maximum of 4 units applicable to degree program.

SOWK 585. Legal and Ethical Aspects in Health and Behavioral Health Services. 3 Units.
Focuses on legal mandates or concerns that interact with and affect the practice of social work. Includes: sources of legal authority, the judicial system, and legal standards applicable to particular proceedings; legal implications of the social worker/client relationship; consent to treatment; and, confidentiality.

SOWK 595. Professional Development. 2 Units.
Tutorial course work aimed at ameliorating difficulties associated with meeting the professional performance competencies of the M.S.W. degree program (see M.S.W. Student Handbook). Students enrolled in the course as a result of a corrective action plan developed with the Department of Social Work’s Academic Standards Committee.

SOWK 599. Directed Study. 1-4 Units.
Limited to matriculating master’s degree students in social work who wish to pursue independent investigations in social work practice or policy under the direction of a department faculty member.

SOWK 613. DSM: Diagnosis Within the Context of Diversity and Difference. 4 Units.
Applies the DSM-5 and Mental Status Examination from a person-in-the-environment perspective. Integrates recovery and a review of psychopharmacology into the diagnostic process while enhancing awareness of sociocultural needs and issues of populations at risk. Prerequisite: SOWK 757C.
SOWK 617. Global Practice. 3 Units.
Deepens students’ appreciation and understanding of professional social work in a global context. Emphasizes analysis and application of social work strategies and practice methods to address catastrophic events (natural or man made), as well as the related social, economic, environmental, and human rights injustices that compromise the ecological well-being of individuals, families, groups, organizations, and communities. Prerequisite: SOWK 757A, SOWK 757B, SOWK 757C.

SOWK 647. Integrated Behavioral Health. 2 Units.
Focuses on the wholistic (bio-psychosocial-spiritual) approach to integrating behavioral health within primary care settings. Emphasizes the fundamental interrelationship between health and behavioral health, including the physical and emotional impact of discrimination, economic and social oppression, and trauma and violence on health and disease across the lifespan.

SOWK 648. Co-occurring Processes and Interventions. 3 Units.
Addresses assessment, diagnosis, and treatment of individuals experiencing mental, emotional, and behavioral disturbances with co-occurring chemical dependency. Presents behavioral health treatment strategies and substance abuse counseling techniques from within a biopsychosocial-spiritual paradigm. Prerequisite: SOWK 757A, SOWK 757B, SOWK 757C.

SOWK 651. Medical Social Work. 2 Units.
Orients students to medical social work in hospitals and other health care environments. Gives attention to the ecological practice perspective, biopsychosocial-spiritual assessment, brief interventions, and the roles and responsibilities of membership in an interdisciplinary health-care team, including the requirements of follow-up care and engagement in the development of community health-care systems as an aspect of accountable health-care environments.

SOWK 653. Child Welfare Practice. 2 Units.
Connects children and families in relationship to environmental stability. Focuses on associations among the physical and mental health of children, families, and environmental permanency. Emphasizes development of parental and social support capacities, and requisite knowledge and skills to help children deal with identity issues and concerns of joining a new family. Addresses impacts of race, ethnicity, gender, economic deprivation, physical illness, and disability.

SOWK 658. Children’s Psychotherapy. 2 Units.
Considers treatment techniques appropriate for young children with a wide range of diagnoses and behavior problems. Emphasizes the integration of theory and practice of psychotherapy with the ecological perspective of social work practice. Discusses diagnosis, phases of treatment, and special communication issues. Research, ethical, and value issues addressed.

SOWK 659. Recovery in Behavioral Health. 2 Units.
Provides students with an understanding of philosophies, theories, models, and techniques used in psychosocial rehabilitation for individuals with severe mental illness. Emphasizes understanding the recovery paradigm and the process of reclaiming the individual’s social interactions and life. Focuses on concepts/techniques for establishing and maintaining therapeutic alliances with the family and strengthening family’s coping and participation in treatment.

SOWK 661. Psychodynamic Therapies. 3 Units.
Basis for understanding psychodynamic therapy (from object relations therapy to interpersonal therapy to short-term psychodynamic therapy), the concepts and techniques of various types of psychodynamic interventions, and the empirical data regarding the efficacy of this treatment orientation. Prerequisite: Qualifying Review or permission of Academic Standards Committee.

SOWK 661L. Psychodynamic Practice Lab. 1 Unit.
Supervised practice simulations observing and/or engaging in psychodynamic therapy. Prerequisite: Qualifying Review or permission of Academic Standards Committee.

SOWK 662. Behavioral and Cognitive Therapies. 4 Units.
Provides understanding and practice of cognitive-behavioral therapies (CBT). Reviews CBT theories and interventions, including a range of cognitive-behavioral strategies such as systematic desensitization, cognitive restructuring, and contingency management. Emphasizes more progressive models, such as Dialectical Behavior Therapy (DBT). Prerequisite: Qualifying Review or permission of the Academic Standards Committee.

SOWK 662L. Behavioral and Cognitive Therapies Practice. 1 Unit.
Supervised practice simulations observing and/or engaging in cognitive/behavioral therapies. Prerequisite: Qualifying Review or permission of the Academic Standards Committee.

SOWK 663. Crisis and Trauma Interventions. 3 Units.
Examines the nature and characteristics of crisis and trauma along with their long-term effects on psychosocial functioning. Presents crisis theories and interventions for children and adults exposed to man-made or natural traumas. Includes ethical, legal, and cultural factors of crisis intervention. Introduces strategies for responding to community, national, and international crises.

SOWK 667. Program Planning and Implementation. 5 Units.
Orients students to the range of issues, knowledge, and skills required in designing, planning, implementing, monitoring, and evaluating programs. Students build on knowledge obtained in other concentration courses. Integrates the course focus through the development of a comprehensive program proposal for the students’ practicum agency or other identified community group. Prerequisite: Qualifying Review or permission of the Academic Standards Committee.

SOWK 675. Supervision. 3 Units.
Examines administrative, educational (clinical), and supportive supervisory functions combined with an ethical decision-making model. Emphasizes supervisory skills necessary for the development of staff capable of functioning creatively and independently. Discusses principles and techniques of staff development and explores a variety of approaches. Prerequisite: SOWK 757A, SOWK 757B, SOWK 757C.

SOWK 678. Integrative Generalist Practice and Seminar. 2 Units.
Provides a bridge quarter to integrate the B.S.W. degree experience with the second year of the M.S.W. degree program. Reviews generalist social work practice and defines additional competencies required for advanced practice. Addresses individualized needs for further development, including application of professional ethics and judgment, use of self as a therapeutic tool, and self-awareness.
SOWK 679. Advanced Professional Projects. 2 Units.
Preparation for lifelong learning through continuing professional development and targeted collegial networking as essential aspects of transitioning into roles as professional social workers. Includes planning and commitment to recognizing, assessing, and formulating intentional plans for continuing professional knowledge and skill development, professional networking and mentoring, and licensure and certifications.

SOWK 680. Children and Families Policies and Services. 2 Units.
Provides students with an understanding of the major social-policy issues affecting the current organization and delivery of human services for children and families. Analyzes current debates about the tensions between social policy and the doctrine of family privacy, with attention to the legal basis of state interventions and judicial decisions affecting family relationships, including parent to parent and child to parent.

SOWK 681. Behavioral Health Policies and Systems. 2 Units.
Addresses federal, state, and county policies and systems that affect the delivery of public and contracted behavioral health services. Addresses how differences between political perspectives, treatment philosophies, and consumer preferences can result in conflicting views that influence service options and choices. Promotes the clinical benefits of advocating for, developing, and delivering culturally relevant, recovery-oriented therapeutic partnerships. Prerequisite: SOWK 757A, SOWK 757B, SOWK 757C.

SOWK 684. Advanced Policy Projects. 2 Units.
Enhances understanding of the interconnections between politics, policy making, and policy analysis through first-hand participation in a political action campaign. Choices for projects may focus on local initiatives or those coordinated annually through the California chapter of NASW.

SOWK 695. Advanced Research. 6 Units.
Supports students in advancing their research knowledge through examination and application of a broad spectrum of quantitative and qualitative research methods—including rapid assessment, single-subject design, quality assurance, and program evaluation. Didactic and laboratory experiences draw on students’ advanced practice and develops their capacity to differentiate and apply the most appropriate and widely used research designs and methods used in practice settings.

SOWK 695A. Advanced Research Methods. 2 Units.
First in a three-course sequence addressing quantitative and qualitative research methods used in professional practice settings. Addresses research designs and methods of practice evaluation and renewal with attention to federal and state requirements for assessing intervention effectiveness. Emphasizes self-evaluation and evaluation of practice effectiveness with individuals and families.

SOWK 695B. Advanced Research Methods. 2 Units.
Second in a three-course sequence addressing quantitative and qualitative research methods used in professional practice settings. Addresses research designs and methods of practice evaluation and renewal with attention to federal and state requirements for assessing intervention effectiveness. Emphasizes practice evaluation groups as well as design and implementation of quality assurance studies for monitoring work with specific populations.

SOWK 695C. Advanced Research Methods. 2 Units.
Third in a three-course sequence addressing quantitative and qualitative research methods used in professional practice settings. Addresses research designs and methods of practice evaluation and renewal with attention to federal and state requirements for assessing intervention effectiveness. Emphasizes evaluation at program, organizational, and community levels.

SOWK 697. Applied Research. 2 Units.
Supports students choosing to complete the thesis option. Provides research matriculation in the collection and analysis of data for the thesis. Students required to register for two quarters, or a total of 4 units. Prerequisite: SOWK 548.

SOWK 698. Thesis. 2 Units.
The culminating work of the student’s independent research, under the direction of the research advisor. Registration during the quarter in which student defends research and submits the final document to the department and School of Behavioral Health.

SOWK 704. Older Adult Interventions and Services. 1 Unit.
Provides subject content in the laws related to older adult interventions and services, as required by the state of California for licensure as a licensed clinical social worker (LCSW). Does not count toward the M.S.W. degree or the Case Management Program certificate.

SOWK 757A. Generalist Practicum and Seminar. 3 Units.
Provides student with experiential learning opportunities in generalist social work practice through practicums arranged by the program’s director of field education. Student completes 160 practicum hours concurrent with 20 hours of practicum seminar for each of three consecutive quarters. A block practicum option is available to qualified students. Prerequisite or concurrent: SOWK 578.

SOWK 757B. Generalist Practicum and Seminar. 3 Units.
Provides student with experiential learning opportunities in generalist social work practice through practicums arranged by the program’s director of field education. Student completes 160 practicum hours concurrent with 20 hours of practicum seminar for each of three consecutive quarters. A block practicum option available to qualified students. Prerequisite: SOWK 578.

SOWK 757C. Generalist Practicum and Seminar. 3 Units.
Provides student with experiential learning opportunities in generalist social work practice through practicums arranged by the program’s director of field education. Student completes 160 practicum hours concurrent with 20 hours of practicum seminar for each of three consecutive quarters. A block practicum option available to qualified students. Prerequisite: SOWK 578.

SOWK 787A. Advanced Clinical Case Consultation. 4 Units.
Provides student with experiential learning opportunities in clinical social work practice through practicums arranged by the program’s director of field education. Student required to complete 200 practicum hours concurrent with 20 hours of practicum seminar for each of three consecutive quarters. Prerequisite or concurrent: SOWK 678, SOWK 757C.

SOWK 787B. Advanced Clinical Case Consultation. 4 Units.
Provides student with experiential learning opportunities in clinical social work practice through practicums arranged by the program’s director of field education. Student required to complete 200 practicum hours concurrent with 20 hours of practicum seminar for each of three consecutive quarters. Prerequisite: SOWK 678 or SOWK 757C.

SOWK 787C. Advanced Clinical Case Consultation. 4 Units.
Provides student with experiential learning opportunities in clinical social work practice through practicums arranged by the program’s director of field education. Student required to complete 200 practicum hours concurrent with 20 hours of practicum seminar for each of three consecutive quarters. Prerequisite: SOWK 678 or SOWK 757C.

**Speech-Language Pathology Doctorate (SLPD)**
Courses

SLPD 550. Advanced Seminar in Neuroanatomy and Neuroscience. 3 Units.
Provides in-depth information on the role played by the brain in speech and language. Reviews functional neuroanatomy as an introduction to the following topics: functional commitment, neuroplasticity, long-term potentiation, etc. Informs clinical best practice by focusing on the complexity of the brain with regard to cognitive and motor function, and by providing background on functional brain imaging research.

SLPD 560. Advanced Seminar in Motor, Speech, and Voice. 3 Units.
Provides an in-depth survey of the anatomy of speech and parts of the CNS that control speech structures. Examines the anatomy of the larynx, respiration, structures of the vocal tract, and nerve signaling pathways that connect them to the brain. Explores the impact of disturbances to one area on the entire system. Relates research to practice.

SLPD 570. Special Topics in Speech-Language Pathology. 3 Units.
Provides an in-depth look at a variety of topics in the field. Topics selected by faculty with input from students may include dysphagia, autism, dysfluency, bilingualism, etc. Students critically examine current research in the topic area in order to determine best practice. May be repeated for additional credit.

SLPD 580. Clinical Issues in Speech-Language Pathology. 3 Units.
Topics covered include clinical supervision, administration, and starting/managing an independent clinic; as well as ethics and counseling. Focuses on interprofessional collaboration both within the allied health professions (e.g., occupational or physical therapy) and beyond (for either education or medical contexts). Students comment in online discussions on case studies.

SLPD 600. Components of Clinical Inquiry. 3 Units.
Focuses on skills fundamental to critical evaluation of the strength of scientific research. Covers elements of research design important to the validity of a study and identification of flaws in design and conclusions.

SLPD 610. Capstone IRB Proposal. 4 Units.
Provides instruction in developing an individual research proposal, completing Institutional Review Board (IRB) training, and successfully submitting a proposal to the IRB. Emphasizes reflective discussions of research interests and experiences, planning, conceptual framework, proposed methodology, and data analysis. Includes interprofessional peer reviews throughout the course.

SLPD 621. Capstone Planning. 3 Units.
Instructs students in how to design their capstone project with guidance from the primary course instructor. Emphasizes identification of a focus area, objectives, goals, outcomes, on-site mentor, faculty mentor, and time frame.

SLPD 622. Capstone Proposal. 2 Units.
Provides framework for developing and submitting a proposal to the student's research advisor(s) for final approval. Prerequisite: SLPD 621.

SLPD 623. Capstone II. 3 Units.
Continues the capstone project, requiring students to complete a needs assessment and program development. Provides information in data collection, data management techniques, and introduction to various data analysis strategies. Prerequisite: SLPD 622.

SLPD 624. Capstone III. 3 Units.
Continues with remaining data collection and beginning data analyses for capstone project. Prerequisite: SLPD 600, 610, 621 622, and 623.

SLPD 625. Capstone IV. 3 Units.
Requires final implementation of aspects of the capstone. Requires student to prepare a manuscript and participate in online critical discussions with classmates. Prerequisite: SLPD 623.

SLPD 626. Dissemination of Research. 3 Units.
A culmination course in which students complete their manuscript and perform an oral presentation for their completed research project. Prerequisites: SLPD 600, 610, 621, 622, 623, 624, and 625.

Statistics (STAT)

Courses

STAT 509. General Statistics. 4 Units.
Introduces statistical methods of summarizing, analyzing, presenting, and interpreting data, with emphasis on health-related data. Includes: normal and binomial distributions; probability; central limit theorem; confidence intervals; and, hypothesis testing using t-tests, ANOVA, correlation, linear regression, and chi square. Introduces multivariate analysis. Includes extensive laboratory exercises using SPSS.

STAT 514. Intermediate Statistics for Health-Science Data. 3 Units.
Selected topics in multiple regression, logistic regression, ANOVA, ANCOVA, and nonparametric tests. Emphasizes understanding, selection, and application of statistical procedures and interpretation of computer output. Prerequisite: STAT 549.

STAT 515. Grant- and Contract-Proposal Writing. 3 Units.
Overview of research and program-based grantsmanship. Provides a comprehensive review of relevant core structures, stakeholders, processes, factors, and essential skills. Demonstrates in a "real world"-type practice environment, key steps in identification of funding resources, proposal development, submission, and review process. Includes: developing specific aims or objectives, determining appropriate research or program design, evaluation, budgets, and sustainability plans.

STAT 521. Biostatistics I. 4 Units.
Fundamental concepts in data analysis and statistical inference. Descriptive statistics, probability rules, discrete/continuous probability distributions, sampling distributions, central limit theorem, point/interval estimation for means/proportions, hypothesis testing, one/two-sample tests, power analysis, ANOVA and multiple comparison procedures, simple regression/correlation, and chi-square tests. Prerequisite or concurrent: STAT 548 or STAT 549, or consent of instructor.

STAT 522. Biostatistics II. 4 Units.
Simple and multiple regression, analysis of the residual, and model building. Multiple and partial correlation. Analysis of variance (fixed-effects model S) with multiple comparisons, including orthogonal contrasts, factorial designs, and analysis of covariance. Power analysis and sample size determination for these models. Prerequisite: STAT 521.

STAT 523. Biostatistics III. 3 Units.
Acquaints public health graduate students with methods for analyzing correlated data using a regression point of view. Includes longitudinal data analysis and cluster/nested data. Covers the use of random effects models and generalized estimation equations (GEE) and more. Emphasis is on how the data should be analyzed rather than on theory. Prerequisite: STAT 522.

STAT 525. Applied Multivariate Analysis. 3 Units.
Multivariate normal distribution, discriminant analysis, principal components analysis, factor analysis, and canonical correlation. Emphasizes application of these analyses and interpretation of results. Prerequisite: STAT 522.
STAT 530. Special Topics in Biostatistics. 1-4 Units.
Lecture and discussion on a current topic in biostatistics. May be repeated for a maximum of 4 units applicable to degree program. Prerequisite or concurrent: STAT 509 or STAT 521.

STAT 531. Parametric and Nonparametric Bivariate Statistics. 4 Units.
Focuses on concepts behind the appropriate use of parametric and nonparametric statistical methods. Includes laboratory. Prerequisite: Intermediate graduate level statistics course or consent of instructor.

STAT 532. Applied Bivariate Statistical Analysis. 4 Units.
Brings together other biostatistics courses in a unified, applied, nontheoretical approach. Focuses on using the Statistical Package for the Social Sciences (SPSS) in the analysis of a dataset on the concepts presented in STAT 531. Prerequisite: STAT 531; or consent of instructor.

STAT 533. Applied Multivariable Statistical Analysis. 4 Units.
Explains the different methods of multivariable analyses and other advanced statistical methods, and indicates reasons for choosing one method over another. Final project requires student to perform an appropriate multivariable analysis on a dataset, run appropriate literature review for confounding variables, and present results in a 20-30 minute timeframe using presentation software. Prerequisite: STAT 532; or consent of instructor.

STAT 535. Modern Nonparametric Statistics. 3 Units.
Application and theory of nonparametric methods. One-/two-sample nonparametric tests, k-sample tests, tests for equality of scale parameters, Kolmogorov-Smirnov type tests, tests for ordered alternatives, tests for paired comparisons and block designs, rank/concordance correlations, chi-square and measures of association, Mantel-Haenszel & McNemar’s tests, permutation and bootstrap methods, smoothing techniques, and semiparametric regressions. Prerequisite: STAT 509 or STAT 521.

STAT 545. Survival Analysis. 3 Units.

STAT 548. Analytical Applications of SAS and R. 2 Units.
Introduces learning the SAS and R statistical programming languages. Includes basic data manipulation, graphics, and introductory statistical analysis. Also emphasizes decision making regarding choice of statistical procedures and interpretation of computer output. Prerequisite or concurrent: STAT 509 or STAT 521; or passing score on the computer-competency examination.

STAT 549. Analytical Applications of SPSS. 2 Units.
Features of SPSS computer package for analysis of statistical data. Includes decisions regarding choice of statistical procedures and interpretation of computer output to answer specific research questions. Prerequisite or concurrent: STAT 509 or STAT 521.

STAT 557. Research Data Management. 3 Units.
Addresses basic data and file manipulation using database-management systems for health research. Includes: importing, exporting, merging, and linking files for a variety of applications; creating, updating, and querying databases; and, basic programming, application development, and data entry. Prerequisite: STAT 509 or STAT 521; STAT 548 or STAT 549.

STAT 568. Data Analysis. 3 Units.
Concepts and applications of the most common data analysis methods: correlation and regression, t-tests, analysis-of-variance, nonparametric methods, and multivariate analyses. Student selects appropriate method of analysis and reporting results. Emphasizes individual analysis of real-data sets. All data analysis assignments to be completed in SPSS. Prerequisite: STAT 514.

STAT 569. Advanced Data Analysis. 3 Units.
Brings together other biostatistics courses in a unified, applied approach. Specifically provides practical experience with real-world biostatistical data, using a wide variety of statistical procedures—including general linear models, generalized linear models, and nonparametric alternatives. Includes guidelines for choosing statistical procedures, model building, validation, and written presentation of results. Prerequisite: STAT 522.

STAT 594. Statistical Consulting. 1-4 Units.
Advanced students participate in statistical consultation with senior staff members. Statement of the problem, design of the experiment, definition of response variables, appropriate analysis of data, statistical inferences, and interpretation of data. Prerequisite: EPDM 509, STAT 521; or consent of instructor.

STAT 625. Special Topics in Biostatistics. 1-3 Units.
Lecture and discussion on a current topic in biostatistics. May be repeated for a maximum of 6 units applicable to degree program. Recommended for doctoral students. Prerequisite: STAT 521.

STAT 64A. Research. 1 Unit.
Independent statistical research using epidemiologic data. Research program arranged with faculty member(s) involved. Written report and oral presentation required.

STAT 695. Thesis. 2-8 Units.
Student prepares report of individual guided experimental research study in biostatistics, under direct faculty supervision. Limited to graduate students whose thesis projects have been approved by their research committee.

**Surgery (SURG)**

**Courses**

SURG 599. Surgery Directed Study. 1.5-18 Units.

SURG 701. Surgery Clerkship. 1.5-15 Units.
Management of acute, subacute, and nonacute surgical pathologies in general surgery, anesthesia, and surgical specialty services. Distinguishes among emergent and nonemergent presentations in the following patient categories: trauma, oncology, surgical infections, acute presentation of abdominal pain and its differential; and, chronic conditions commonly seen in a general surgery or surgical specialty clinic.

SURG 821. Surgery Subinternship. 1.5-6 Units.
Introduction to the surgical internship. Provides in-depth, hands-on experience in the management of acute, subacute, and nonacute surgical pathologies during service in the emergency department, inpatient settings, outpatient clinics, and the operating room. Addresses emergent and nonemergent presentations. Includes experience in acute care surgery, surgical oncology, or general surgery.
SURG 822. Surgery Intensive Care. 1.5-6 Units.
A four-week, surgical ICU course. Focuses on care of the critically ill patient who is under the care of the surgical intensivist. Exposes students primarily to patients in the surgical ICU; while also providing experience in evaluating/assessing patients on the emergency ward and in the operating room, as well as those encountered when responding to acute calls for intensive care on the ward (CODE BLUE and rapid response). Involves patients from all surgical services.

SURG 891. Surgery Elective. 1.5-27 Units.
May include pediatric surgery, vascular surgery, trauma surgery, general surgery, cardiothoracic surgery, plastic surgery, neurosurgery, otorhinolaryngology, surgical intensive care, and urology.

Urology (UROL)

Courses
UROL 891. Urology Elective. 1.5-27 Units.
Offers fourth-year medical students the opportunity to explore various areas of urology, including research.

Faculty

Key to Codes
In the alphabetical listing below, the two- or three-letter code following the department name indicates the school or faculty in which the faculty member holds academic appointment. The codes are:

The Faculty

AAEN, GREGORY S. Assistant Professor, Department of Pediatrics SM and Department of Neurology SM
M.D. Loma Linda University SM 2003

ABBASI, CAROLIN. Assistant Professor, Department of Anesthesiology SM
M.D. Rosalind Franklin University of Medicine and Science 2011

ABBOY, RAMADAS. Assistant Clinical Professor, Department of Medicine SM
M.B.B.S. Stanley Medical College, India 1967

ABDALLA, MAISA I. Assistant Professor, Department of Medicine SM
M.B.B.S. University of Jordan 2006
M.P.H. University of Illinois at Chicago 2014

ABDEL-ALLAH, SHAMEL A. Professor, Department of Pediatrics SM and Department of Emergency Medicine SM
M.D. Loyola Stritch Medical School, Chicago, Illinois 1989

ABDELHALIM, FOUAD M. Adjunct Assistant Professor, Department of Pathology and Human Anatomy SM
M.D. Ain Shams University, Egypt 1980

ABDELSAMIE, NISRIN. Instructor, Department of Neurosurgery SM
M.S.N. University of Phoenix 2016

ABDELSAYED, SHELLEY F. Assistant Professor, Department of Anesthesiology SM
M.D. Loma Linda University SM 2004

ABDIPOUR, AMIR. Assistant Professor, Department of Medicine SM
M.D. Shahid Beheshti University of Medical Science, Tehran, Iran 1996

ABDRABOU, RASHA. Assistant Professor, Department of Physician Assistant Sciences AH
Dr.P.H. Loma Linda University PH 2009

ABONGWA, CHENUE. Assistant Professor, Department of Pediatrics SM
M.D. Université de Yaoundé, Cameroon 2001
M.S. University of Iowa 2014

ABOURBIH, SAMUEL R. Assistant Professor, Department of Urology SM
M.D.C.M. McGill University, Canada 2010

ABOU-ZAMZAM, AHMED MOHAMMED, JR. Professor, Department of Surgery SM
M.D. Yale University School of Medicine 1992

ABREM, DMITRY. Assistant Professor, Department of Medicine SM
M.D. Albany Medical College, New York 2007

ABRAMOVITCH, KENNETH. Professor, Department of Radiology and Imaging Sciences SD and Department of Radiology SM; and Member FGS
D.D.S. McGill University, Canada 1980
M.S. University of Texas Health Sciences Center, San Antonio 1986

ABRAMS, KRISTEN K. Instructor, Department of Psychiatry SM
M.D. Loma Linda University 2004

ABREVQUIMBAYA, CAROLINA. Assistant Professor, Department of Family Medicine and Department of Preventive Medicine SM
M.D. University Libre de Colombia, Bogata, Colombia 2008

ABROLAT, MARIA. Assistant Clinical Professor, Department of Pediatrics SM
M.D. University of California, Los Angeles 1996

ABUDAYYEH, ISLAM. Associate Professor, Department of Medicine SM
M.D. Medical College of Wisconsin 2000
M.P.H. Loma Linda University PH 2000

ACHARYA, PATRICIA T. Assistant Professor, Department of Radiology SM
M.D. Rosalind Franklin University of Medicine and Science 2008

ACHILEFU, SAMUEL. Adjunct Professor, Department of Radiology SM and Department of Pharmaceutical and Administrative Sciences SP
Ph.D. University of Nancy, France 1991

ACHIRILIOAE, ADINA F. Assistant Professor, Department of Radiology SM
M.D. Loma Linda University SM 2005

ACOSTA, OSCAR. Assistant Professor, Department of Dental Education Services SD
D.D.S. University DeLaSalle, Bajio, Mexico 2010

ADEOYE, OLAYEMI O. Assistant Professor, Department of Pharmaceutical and Administrative Sciences SP and Department of Basic Sciences SM
M.B.B.S. University of Lagos, Nigeria 2004
M.P.H. Loma Linda University PH 2008
Ph.D. Loma Linda University, SM 2013
ADEOYE, OLUKEMI GRACE. Instructor, School of Public Health PH
M.P.H. Loma Linda University PH 2009
ADEY, RONDA R. Instructor, Department of Radiation Technology AH
B.S. Loma Linda University AH 2000
AFFELDT, JOHN C. Associate Professor, Department of Ophthalmology SM
M.D. University of Southern California 1977
AFIFI, GHADA YOUSSEF. Assistant Clinical Professor, Department of Plastic and Reconstructive Surgery SM
M.D. Albany Medical College, New York 1990
AFKAMI, KAIVAN K. Adjunct Assistant Professor, Department of Dental Education Services SD
D.D.S. Baylor University 2001
AGAPIAN, JOHN V. Assistant Professor, Department of Surgery SM
M.D. The Chicago Medical School 2000
AGHAHANI, ARASH. Assistant Professor, Department of Dental Anesthesiology SD
D.D.S. University of the Pacific 1994
M.S. University of Maryland 1996
AGOSTON, ENDRE. Assistant Professor, Department of Medicine SM
M.D. University of California 1981
AHAMBRA, DAVID C. Assistant Professor, Department of Family Medicine SM
M.B.B.S. Abia State University, Nigeria 2006
M.P.H. University of North Texas 2012
AHMAD, BORHAAN S. Assistant Professor, Department of Pediatrics SM
M.D. Kabul University, Afghanistan 1981
AHMED, ZULFIQAR. Assistant Professor, Department of Anesthesiology SM
M.B.B.S. King Edward Medical University, Pakistan 1988
AIYAR, SHOBHA S. Assistant Professor, Department of Medicine SM
M.B.B.S. Mahatma Gandhi Memorial Medical College, India 1989
AJA, GODWIN N. Assistant Professor, School of Public Health PH
Dr.P.H. Loma Linda University PH 2008
AKA, PAUL KOJI. Assistant Clinical Professor, Department of Cardiothoracic Surgery SM
M.D. Loma Linda University SM 1986
AKAMINE-DAVIDSON, SANDRA M. Assistant Clinical Professor, Department of Ophthalmology SM
O.D. Southern California College of Optometry 1989
AKELE, ZEBAYEL. Assistant Professor, Department of Medicine SM
M.D. Jimma University, Ethiopia 1991
AL FAGIH, MOHAMMED RASHID. Professor, Department of Cardiopulmonary Sciences AH
M.B.Ch.B. Baghdad Medical College, Iraq 1971
AL-ARDAH, ALADDIN JAMAL. Associate Professor, Department of Restorative Dentistry SD
B.D.S. Jordan University of Science and Technology, Jordan 1999
AL-BADER, BADER. Assistant Professor, Division of General Dentistry SD
B.D.S. King Faisal University, Saudi Arabia 2008
ALBERT, JULIE C. Associate Professor, Department of Psychiatry SM
D.S.W. University of Southern California 1978
ALBRECHT, EDWARD G. Assistant Professor, Division of General Dentistry SD
D.D.S. Loma Linda University SD 1980
ALEMI, QAIS. Associate Professor, Department of Social Work and Social Ecology BH; and Member FGS
M.P.H., M.B.A. Loma Linda University PH 2013
AL-HELAL, ABDULAZIZ A. Adjunct Assistant Professor, Department of Restorative Dentistry SD; and Member FGS
B.D.S. King Saud University, Saudi Arabia 2010
M.S. Loma Linda University SD 2016
ALIPPOON, ALAN. Instructor, Department of Cardiopulmonary Sciences AH
B.S. California State University, San Bernardino 2000
ALIPPOON, LAURA LYNN. Professor, Department of Radiation Technology AH
Ed.D. La Sierra University 2001
ALISMAIL, ABDULLAH K. Assistant Professor, Department of Cardiopulmonary Sciences AH; and Member FGS
M.S. Loma Linda University AH 2012
ALLARD, MARTIN W. Emeritus Professor, Department of Anesthesiology SM
M.B.Ch.B. University of Capetown, South Africa 1971
ALLEN, JONATHAN. Assistant Clinical Professor, Department of Orthopedic Surgery SM
M.D. Loma Linda University SM 2007
ALQADOUNI, THAER. Assistant Professor, School of Dentistry SD
D.D.S. Loma Linda University SD 2016
ALVAREZ, LOUIS R. Assistant Clinical Professor, Department of Psychiatry SM
M.D. Autonomous University of Guadalajara, Mexico 1986
AMAA, YOUSEF G. Associate Research Professor, Department of Surgery SM
Ph.D. Simon Fraser University, British Columbia, Canada 1997
AMIN, NIRAV. Associate Professor, Department of Orthopedic Surgery SM
M.D. Drexel University 2008
AMIN, FARHAD. Assistant Professor, Department of Periodontics SD
D.D.S. University of Detroit Mercy 2011
AMIN, M. REZA. Assistant Professor, Department Medicine SM
M.D. Tehran University, Iran 1999
AMIN, SANAZ. Assistant Professor, Department of Gynecology and Obstetrics SM
M.D. Tehran University of Medical Science, Iran 2002
AMINI KARRAZI, TAHER. Assistant Clinical Professor, Department of Restorative Dentistry SD
D.M.D. Boston University 2001
AMR, MAHA M. Assistant Professor, Department of Pediatrics SM
M.B.Ch.B. Cairo University, Egypt 1983
AN, JASON K. Assistant Professor, Department of Emergency Medicine SM
M.D. Indiana University 2009
ANDERSEN, SHARILYN M. Assistant Professor, School of Public Health PH
M.P.H. Loma Linda University PH 2008
ANDERSON, DENNIS K. Assistant Clinical Professor, Department of Plastic and Reconstructive Surgery SM
M.D. Loma Linda University SM 1966
ANDERSON, DONALD LEE. Adjunct Associate Professor, Department of Psychiatry SM
M.D. Loma Linda University SM 1971
ANDERSON, DONALD LYNN. Associate Professor, Department of Anesthesiology SM
M.D. Loma Linda University SM 1973
ANDERSON, DUANE R. Assistant Professor, Department of Orthopedic Surgery SM
M.D. University of Minnesota 1979
ANDERSON, MARQUELLE. Associate Professor, Department of Pediatrics SM
M.D. Loma Linda University SM 1977
ANDERSON, NANCY J. Professor, Department of Dermatology SM and Department of Basic Sciences SM
M.D. Loma Linda University SM 1976
ANDERSON, SHAWN R. Assistant Clinical Professor, Department of Endodontics SD
D.D.S. Loma Linda University SD 2005
M.S.D. Loma Linda University SD 2009
ANDREASEN, TROY J. Assistant Clinical Professor, Department of Plastic and Reconstructive Surgery SM
M.D. University of Utah Medical School 1995
ANEY, JORDAN. Assistant Professor, Department of Pediatrics SM
M.D. Loma Linda University SM 2014
ANG, YEN. Assistant Clinical Professor, School of Public Health PH
Dr.P.H. Loma Linda University PH 2009
ANGELES, DANILYN MAG-AKAT. Professor, Department of Basic Sciences SM, Department of Pediatrics SM, School of Nursing SN; and Member FGS
Ph.D. Loma Linda University GS 2000
ANGHESMON-NEGUSSE, DEBORAH. Assistant Professor, Department of Medicine SM
M.D. University of Southern California 2004
M.P.H. Harvard University 2003
ANHOLM, JAMES D. Associate Professor, Department of Medicine SM
M.D. Loma Linda University SM 1976
ANSPIKIAN, ARA M. Assistant Professor, Department of Psychiatry SM
M.D. Loma Linda University SM 2005
ANUGERAH, BUKARIS. Assistant Professor, Department of Dental Education Services SD
D.D.S. Loma Linda University SD 1990
APPEL, JAMES ERIC. Assistant Professor, Department of Family Medicine SM
M.D. Loma Linda University SM 2000
APPLEGATE, PATRICIA JEAN. Associate Professor, Department of Medicine SM
M.D. University of Southern California 1980
APPLETON, CAROL J. MUTH. Assistant Professor, Department of Physical Therapy AH
M.P.H. Loma Linda University PH 1974
APPLING, HEATHER N. Assistant Professor, Department of Orthotics and Prosthetics AH
M.S. Loma Linda University 2010
ARA, SHETA. Assistant Clinical Professor, Department of Experiential and Continuing Education SP
Pharm.D. University of Southern California 2001
ARAKAWA, TIMOTHY. Assistant Professor, Department of Medicine SM
Ph.D., M.D. Loma Linda University SM 2008, 2009
ARBABI, ZARSHID. Assistant Professor, Department of Medicine SM
M.D. Iran University 1990
ARCERITO, KIM N. Assistant Clinical Professor, Department of Experiential and Continuing Education SP
Pharm.D. University of California, San Francisco 1993
ARCILLA, JOHN-VINCENT L. Assistant Professor, Department of Medicine SM
M.D. Saint Louis University, Missouri 2015
ARDESHIRPOUR, FARHAD. Assistant Professor, Department of Otolaryngology and Head and Neck Surgery SM and Department of Dermatology SM
M.D. University of North Carolina, Chapel Hill 2008
ARDILES, YONA R. Assistant Professor, Department of Medicine D.O. Lake Erie College of Osteopathic Medicine 2010
ARECHIGA, ADAM L. Associate Professor, Department of Psychology BH and School of Public Health PH
Psy.D., Dr.P.H. Loma Linda University ST, PH 2006
ARENUE, TAGBO E. Assistant Clinical Professor, Department of Psychiatry SM
M.B.B.S. University of Port Harcourt, Nigeria 2003
M.P.H. California State University, Northridge 2009
ARIUE, BARBARA K. Assistant Professor, Department of Pediatrics SM
M.D. University of Vermont 1993
ARMIIJO, JAVIER ALONSO. Assistant Clinical Professor, Department of Family Medicine SM
M.D. University of California, Irvine 1991
ARMSTRONG, DANIEL REID. Assistant Professor, Division of General Dentistry SD
D.D.S. Loma Linda University SD 1972

ARMSTRONG, DARLENE A. Associate Professor, Department of Dental Hygiene SD
M.A. Azusa Pacific University 2005

ARNETT, G. WILLIAM. Adjunct Assistant Professor, Department of Orthodontics SD
D.D.S. University of Southern California 1972

ARNETT, R. LESLIE, JR. Emeritus Professor, Department of Periodontics SD
D.D.S. University of Southern California 1959
M.S. Loma Linda University SD 1968

ARTEAGA-HERNANDEZ, EDNA S. Assistant Clinical Professor, Department of Family Medicine SM
M.D. University of Montemorelos, Mexico 1984

ASAVASOPON, SKULPAN. Associate Professor, Department of Physical Therapy AH; and Member FGS
Ph.D. Loma Linda University AH 2014

ASHBURN, ANGELIKA. Instructor, School of Nursing SN
B.S. Loma Linda University AH 2002

ASHWAL, STEPHEN. Distinguished Professor, Department of Pediatrics SM and Department of Neurology SM
M.D. New York University 1970

ASI, ADLEIT F. Clinical Instructor, Department of Nutrition and Dietetics AH
M.B.A. University of Phoenix 2008

ASK, MIHRAN N. Assistant Professor, Department of Medicine SM, Department of Preventive Medicine SM, and School of Public Health PH
M.D. Loma Linda University SM 1978

ASSADI AZARBAIJANI, RAMIN. Assistant Clinical Professor, Department of Medicine SM
M.D. Tehran University of Medical Sciences 2000

ASSAI, MARIAN. Assistant Clinical Professor, Department of Medicine SM
M.B.Ch.B. University of Alexandria, Egypt 2005

ATHAR, SYED. Assistant Professor, Department of Medicine SM
M.D. Indiana University 2005

ATIGA, ROLANDO A., JR. Assistant Clinical Professor, Department of Physician Assistant Sciences AH
M.D. Ross University, Dominica, West Indies 1999

AU, HUY D. Assistant Professor, Department of Pediatrics SM
M.D. Finch University of Medical Sciences/The Chicago Medical School 2005

AUNE-NELSON, BETH. Clinical Instructor, Department of Occupational Therapy AH
B.S. Loma Linda University AH 1998

AUNG, GREGORY L. Assistant Clinical Professor, Department of Experiential and Continuing Education SP
Pharm.D. University of the Pacific 2010

AUSTIN, CRAIG EUGENE. Instructor, Department of Clinical Laboratory Science AH
M.S.P. The University of Florida 2017

AVANTS, TERESA PFIEFLE. Assistant Clinical Professor, Department of Gynecology and Obstetrics SM
M.D. Loma Linda University SM 1984

AVELING, D. LEIGH. Associate Professor, School of Religion SR
D.Min. Claremont School of Theology 1996

AWRAMIK, STANLEY M. Adjunct Professor, Department of Earth and Biological Sciences SM
Ph.D. Harvard University 1973

AYE, LYDIA L. Assistant Professor, Department of Medicine
D.O. Western University of Health Science 2006

AZAB, AMANY S. Assistant Professor, Department of Medicine SM
M.D. Ain Shams University, Egypt 1976

AZER, SHERIF A. Associate Professor, Department of Anesthesiology SM
M.D. Assiut University Faculty of Medicine, Egypt 1972

AZIM, MANSOOR. Assistant Professor, Department of Medicine SM
M.D. University of California, Los Angeles 2012

BABA, NADIM. Professor, Department of Restorative Dentistry SD and member FGS
D.M.D. University of Montreal, Quebec, Canada 1996
M.S. Boston University 1999

BABA DJARA, MONITA. Assistant Professor, School of Public Health PH
Dr.PH. Boston University 2014

BABCOCK, JESSICA M. Instructor, Department of Surgery SM
M.D. Louisiana State University, Shreveport 2010

BACHELLER, CATHERINE A. Assistant Professor, Department of Medicine SM
M.D. Loma Linda University SM 1979

BACKSTROM-GONZALES, MELISSA K. Instructor, Department of Communication Sciences and Disorders AH
M.S. University of Redlands, California 1987

BADALAMENTI, CONO P. Assistant Clinical Professor, Department of Preventive Medicine SM
M.D. University of Massachusetts Medical School, Worcester 2010

BADAR, RIZWAN. Assistant Clinical Professor, Department of Medicine SM
M.B.B.S. Baqai Medical University, Pakistan 2004

BADIANAT, SAM. Assistant Clinical Professor, Department of Experiential and Continuing Education SP
Pharm.D. Western University of Health Sciences, California 2003

BAE, WON-CHUL. Assistant Professor, Department of Radiology SM
M.D. Medical College, Busan National University, Republic of Korea 1963

BAEK, CAROLINE. Assistant Professor, School of Nursing SN
M.S.N. University of California, Los Angeles 2011

BAEK, HESUK H. Assistant Professor, Department of Medicine SM
M.D. Medical College of Georgia 2000

BAEK, KELLY E. Assistant Professor, Department of Social Work and Social Ecology BH
Ph.D. Loma Linda University BH 2018

BAERG, JOANNE E. Associate Professor, Department of Surgery SM and Department of Pediatrics SM
M.D. University of British Columbia, Canada 1990

BAEZ, LAMITRA M. Assistant Professor, Department of Communication Sciences and Disorders AH
M.S. San Francisco State University 2003

BAHJRI, KHALED A. Associate Professor, Department of Pharmaceutical and Administrative Sciences SP; Assistant Clinical Professor, School of Public Health PH
M.D. Fatima College of Medicine, Manila, Philippines 1999
Dr.P.H. Loma Linda University PH 2014

BAHK, THOMAS. Assistant Professor, Department of Pediatrics SM
M.D. University of California, Los Angeles 1997

BAINS, GURINDER. Associate Professor, Department of Allied Health Studies AH; and Member FGS
Ph.D. Loma Linda University AH 2014

BAINS, PALLAVI. Assistant Professor, Department of Family Medicine SM
D.O. Western University of Health Sciences 2013

BAKER, GRACE T. Instructor, Department of Clinical Laboratory Science AH
B.S. University of California, Riverside 1991

BAKER, RYAN B. Assistant Professor, Department of Pediatric Dentistry SD
D.M.D., M.P.H. A.T. Still University of Health Sciences 2014
M.S. Loma Linda University SD 2016

BAKLAND, LEIF KRISTIAN. Emeritus Professor, Department of Endodontics SD
D.D.S. Loma Linda University SD 1963

BAKLAND, THOR. Emeritus Professor, Department of Restorative Dentistry SD
D.D.S. Loma Linda University SD 1962

BALAGOPALAN, MOHAN. Clinical Instructor, School of Public Health PH
M.B.A. Azusa Pacific University 1984

BALAN, GABRIELLE. Assistant Professor, Department of Pediatrics SM
D.O. Touro University Nevada 2014

BALAREZO, CARLOS A. Associate Clinical Professor of Surgery SM
M.D. Universidad Nacional de Tucumán 1964

BALDWIN, DALTON D. Professor, Department of Urology SM
M.D. Loma Linda University SM 1991

BALDWIN, STANLEY M. Adjunct Assistant Professor, Department of Cardiopulmonary Sciences AH
M.B.A. Pepperdine University 1985

BALL, LAUREN R. Assistant Clinical Professor, Department of Social Work and Social Ecology BH
M.S.W. Loma Linda University ST 1995

BALLY, KEVIN C. Assistant Professor, Department of Gynecology and Obstetrics SM
M.D. Loma Linda University SM 1998

BALLI, MEAGHAN A. Assistant Professor, Department of Ophthalmology SM
M.D. Loma Linda University SM 1998

BALLINGER, REBECCA E. Assistant Clinical Professor, Department of Psychology BH
Psy.D. Loma Linda University BH 2013

BALLOU, MICHELLE M. Assistant Professor, School of Nursing SN
M.S. Loma Linda University SN 1992

BANDY, ALEXANDRA J. Instructor, Department of Anesthesiology SM
M.S.N. University of Virginia 2014

BANDY, KRISTEN R. Assistant Professor, Department of Anesthesiology SM
M.D. Loma Linda University SM 2005

BANE, MARGUERITE. Assistant Clinical Professor, Department of Experiential and Continuing Education SP
B.S. Midwestern University, 1995

BANERJEE, SANJOY. Assistant Clinical Professor, Department of Medicine SM
M.B.B.S. Imperial College London 1999

BANERJI, ANAMIKA. Assistant Professor, Department of Pediatrics SM
M.D. Vanderbilt University 2008

BANKS, AIESHEA L. Assistant Professor, Department of Communication Sciences and Disorders AH
M.A. California State University, Fullerton 2003

BANKS, JOHN C., JR. Associate Professor, Department of Pathology and Human Anatomy SM
Ph.D. Loma Linda University GS 1984

BANNOUT, FIRAS. Assistant Professor, Department of Neurology SM
M.D. University of Damascus 2001

BANSAL, DALJEET BHATA. Assistant Professor, Department of Medicine SM
M.D. Delhi University, India 1968

BANSAL, RAMESH C. Professor, Department of Medicine SM
M.B.B.S. All India Institute of Medical Sciences, India 1972

BANTA, JIMMIE E., JR. Associate Professor, School of Public Health PH and member FGS
Ph.D. University of California, Los Angeles 2004

BARCEGA, BESH R. Assistant Professor, Department of Emergency Medicine SM, Department of Pediatrics SM, and Department of Basic Sciences SM
M.D. Loma Linda University SM 1990

BARCLAY, JAMES C. Assistant Clinical Professor, Department of Psychiatry SM
M.D. Wright State University 1997

BARDEN, MATTHIAS. Assistant Professor, Department of Emergency Medicine SM
M.D. University of Kansas 2015

BARDIN, RICHARD L. Associate Professor, Department of Medicine SM
M.D. Texas Tech University 1980

BAREH, GIHAN M. Assistant Professor, Department of Gynecology and Obstetrics SM
M.B.B.S., Ph.D. Suez Canal University, Egypt 1999, 2011

BARILLA, DORA J. Assistant Clinical Professor, School of Public Health PH
Dr.P.H. Loma Linda University PH 2008

BARKER, BRENT J. Assistant Professor, Department of Anesthesiology SM
M.D. Loma Linda University SM 2010

BARKER, GARY R. Assistant Professor, Department of Urology SM
M.D. Loma Linda University SM 1980

BARKER, SHANNON E. Instructor, Department of Pediatrics SM
D.O. Western University of Health Sciences, California 2014

BARNES, DONALD T. Assistant Professor, Department of Radiology SM
M.D. Howard University, Washington D.C. 1971

BARNES, SAMUEL R. Assistant Professor, Department of Radiology SM
Ph.D. Wayne State University, Michigan 2010

BARON, PEDRO W. Professor, Department of Surgery SM
M.D. University of Antioquia, Columbia 1977

BARR, STEVEN J. Assistant Clinical Professor, Department of Anesthesiology SM
M.D. Creighton University, Nebraska 2007

BARRERA, ADOLFO J. Assistant Professor, Department of Pediatric Dentistry SD
D.D.S. Universidad Cayetano Heredia, Peru 1984
M.S. Loma Linda University 1996

BARRERA, KYRSTLE D. Assistant Professor, Department of Physical Medicine and Rehabilitation SM
Ph.D. Loma Linda University SM 2013

BARTLETT, DWIGHT. Assistant Professor, School of Public Health PH
Ed.D. La Sierra University 2010

BARTLETT, EMILY C. Assistant Professor, Department of Emergency Medicine SM
M.D. University of Illinois at Chicago 2014

BARRIO, JUAN. Assistant Professor, Department of Medicine SM
M.D. University of Southern California, Santa Barbara 1997

BARTH, LAUREN E. Instructor, Department of Pediatrics SM
M.D. University at Buffalo, State University of New York 2014

BARTLETT, CHELSEA K. Assistant Professor, School of Nursing SN
B.S. Loma Linda University 2013
B.A. Pacific Union College 2010

BARTLEY, JAMES A. Associate Professor, Department of Pediatrics SM
Ph.D. University of Iowa 1972
M.D. University of Kansas 1974

BARTLEY, YESSENIA T. Adjunct Assistant Professor, School of Public Health PH
M.D. Major National University of San Marcos School of Medicine 2003
D.P.H. Loma Linda University PH 2010

BARTNIK-OLSON, BRENTA L. Associate Professor, Department of Radiology SM; Assistant Professor, Department of Basic Sciences SM
Ph.D. University of Saskatchewan, Canada 2002

BARTOS SPECHT, REBEKAH. Assistant Professor, Department of Medical Education SM and Department of Medicine SM
M.S.N. Azusa Pacific University 2001

BASHIKIROV, VLADIMIR. Associate Research Professor, Department of Basic Sciences SM
Ph.D. Moscow Institute of Physics and Technology, Russia 1997

BASICAL, SOFRONIO A. Assistant Clinical Professor, Department of Pediatrics SM
M.D. Loma Linda University SM 1992

BASICAL-OLIVER, NOVE A. Instructor, Department of Clinical Laboratory Science AH
B.S. Loma Linda University AH 1986

BASRAI, IMTIAZ. Assistant Clinical Professor, Department of Psychiatry SM
M.D. University of Bombay 1975

BASSLER, ROBERT. Assistant Professor, Department of Emergency Medicine SM
M.D. Loma Linda University SM 1999

BASTA, SAEDA H. Assistant Professor, Division of General Dentistry SD
D.D.S. Damascus University Dental School, Syria 1994
M.S. Loma Linda University SD 2008

BATES, BRIAN E. Assistant Professor, Department of Surgery SM
M.D. Loma Linda University SM 1986

BATES, NERIDA T. Assistant Professor, Department of Pediatrics SM
M.D. Loma Linda University SM 1997

BATESOLE, MARK KENNETH. Assistant Professor, Department of Orthodontics SD
D.D.S. University of Southern California 1998
M.S. Loma Linda University GS 2000

BATIN, FRANCES P. Assistant Professor, Department of Medicine SM
M.D. Loma Linda University SM 1988

BATT, JOSHUA. Clinical Instructor, Department of Emergency Medicine SM
D.O. Touro University Nevada 2012

BAUGH, WILSON B., JR. Assistant Clinical Professor, Department of Oral and Maxillofacial Surgery SD
D.D.S. University of Southern California 1981

BAUM, MARTI F. Assistant Professor, Department of Pediatrics SM and School of Public Health PH
M.D. Loma Linda University SM 1979

BAYDALA, LARYSA O. Assistant Professor, Department of Dental Hygiene SD
B.S. Loma Linda University SD 2007

BAYLINK, DAVID J. Distinguished Professor, Department of Medicine SM, Department of Basic Sciences SM; and Professor Dental Education Services SD
M.D. Loma Linda University SM 1957

BAZ, SAMUEL. Assistant Professor, Department of Medicine SM
M.D. University of Southern California School of Medicine 1997

BEARDSLEY-HARDY, LISA M. Adjunct Professor, School of Public Health PH; Adjunct Assistant Professor, School of Religion SR
Ph.D. University of Hawaii, Manoa 1989

BECERRA, BENJAMIN J. Assistant Professor, Department of Allied Health Studies AH; and Member FGS
Dr.P.H. Loma Linda University PH 2015

BECKER, DONNA J. Assistant Professor, School of Nursing SN
M.S. Loma Linda University SN 2016

BECKER, RYAN J. Assistant Professor, Division of General Dentistry SD; Assistant Professor, Department of Dental Education Services SD
D.D.S. Loma Linda University SD 2015

BECKWITH, J. BRUCE. Emeritus Professor, Department of Pathology and Human Anatomy SM
M.D. University of Washington School of Medicine 1958

BEDDOE, RANDY A. Adjunct Assistant Professor, Department of Family Medicine SM
M.D. Loma Linda University SM 1984

BEDFORD, ANNETTE. Assistant Clinical Professor, Department of Experiential and Continuing Education SP
Pharm.D. University of Southern California 1990

BEELED, LAUREN M. Clinical Instructor, Department of Physical Therapy AH
B.S. Indiana University 1979

BEEM, ASHLEY B. Instructor, Department of Gynecology and Obstetrics SM
M.D. Loma Linda University SM 2014

BEESEN, W. LAWRENCE. Clinical Professor, School of Public Health Dr.P.H. Loma Linda University PH 2002

BEHRENS, B. LYN. Emerita Professor, Department of Pediatrics SM
M.B.B.S. Sydney University, Australia 1963

BEHRINGER, ERIK J. Assistant Professor, Department of Basic Sciences SM
Ph.D. Loma Linda University SM 2009

BEKENDAM, PAMELA Y. Assistant Clinical Professor, Department of Ophthalmology SM
M.D. Loma Linda University SM 1994

BEKENDAM, PETER D. Assistant Clinical Professor, Department of Ophthalmology SM
M.D. Loma Linda University SM 2004

BELIN, LYNNA SUE. Adjunct Assistant Professor, School of Public Health PH
Ph.D. Claremont Graduate School 1994

BELL, ALISON. Assistant Professor, School of Nursing SN
D.N.P. Duke University 2014

BELLARD, JUAN C. Professor, School of Public Health PH
Ph.D. Claremont Graduate University 2002

BELLINGER, DENISE L. Associate Research Professor, Department of Pathology and Human Anatomy SM
Ph.D. Indiana State University 1985

BENCITO ACAAC, NORIE. Assistant Professor, School of Nursing SN
M.S.N., M.B.A. University of Phoenix 2008, 2009

BENGGON, MICHAEL A. Assistant Professor, Department of Anesthesiology SM
M.D. Loma Linda University SM 2009

BENGIAMIN, DEENA I. Assistant Professor, Department of Emergency Medicine SM
M.D. University of California, Irvine 2010

BENGIAMIN, RIMON N. Associate Professor, Department of Emergency Medicine SM
University of North Dakota, Grand Forks 2004

BENITEZ, ABIGAIL. Assistant Research Professor, Department of Surgery SM and Department of Medicine SM, and Department of Basic Sciences SM
Ph.D. Loma Linda University SM 2014

BENNER, JANINE G. Assistant Professor, Department of Communication Sciences and Disorders AH
M.A. California State University, Long Beach 1991

BENNETT, DELLA C. Assistant Clinical Professor, Department of Plastic and Reconstructive Surgery SM
M.D. Pennsylvania State College of Medicine 2000

BERGER, CHRISTOPHER E. Assistant Clinical Professor, Department of Psychiatry SM
M.D. Loma Linda University SM 2008

BERK, LEE S. Professor, Department of Allied Health Studies AH;
Associate Professor, Department of Physical Therapy AH; Associate Research Professor, Department of Pathology and Human Anatomy SM; and Member FGS
Dr.P.H. Loma Linda University PH 1981

BERNAL, D. GUILLERMO. Adjunct Professor, Division of General Dentistry SD
D.D.S. Colegio Odontológico Colombiano 1986
M.S.D. Indiana University 1991

BERNSTEIN, BASIL G. Clinical Professor, Department of Psychiatry SM
M.D. New York Medical College 1967

BERRIMAN, DIANE J. Assistant Professor, Department of Medicine SM
M.D. Oral Roberts University School of Medicine, Oklahoma 1988

BERRY, FREDERICK A. Professor, Division of General Dentistry SD
D.D.S. University of Pennsylvania 1962

BETANCOURT, HECTOR M. Professor, Department of Psychology BH; and Member FGS
Ph.D. University of California, Los Angeles 1983

BEVERLY, DAVID T. Adjunct Assistant Professor, Department of Ophthalmology SM
M.D. Uniformed Services, University of Health Sciences, Bethesda, Maryland 1998

BHARADWAJ, ADITYA. Assistant Professor, Department of Medicine SM
M.B.B.S. Rajiv Gandhi University of Health Sciences 2007

BHARDWAJ, RAHUL. Assistant Professor, Department of Medicine SM
M.D. University of California, Los Angeles 2008

BHAT , PRASHANTH. Assistant Professor, Department of Family Medicine SM
M.B.B.S. Manipal University 2000
M.P.H. University of North Texas Health Science Center 2006

BHAT, VENKATESH G. Associate Professor, Department of Psychiatry SM
M.B.B.S. University of Mysore, India 1979

BOHRAJ, SANJAY D. Assistant Clinical Professor, Department of Medicine SM
M.D. University of California 2002

BIAGGI, ROBERTO E. Adjunct Associate Professor, Department of Earth and Biological Sciences SM
Ph.D. Loma Linda University FGS 2002

BIANCHI, CHRISTIAN. Associate Professor, Department of Surgery SM
M.D. University of Buenos Aires School of Medicine, Argentina 1993

BIGELOW-PRICE, SHAYNE MICHELINE. Assistant Professor, School of Nursing SN
M.S.N. University of Phoenix 1998

BILL, JOSEF. Adjunct Professor, Department of Ophthalmology SM
Ph.D. Universität Fredericiana Karlsruhe, Germany 1970

BILLIMORIA, PHIROZE E. Emeritus Professor, Department of Radiology SM
M.B.B.S. Grant Medical College, Bombay University, India 1951

BILLETT, JEFFREY N. Assistant Clinical Professor, Department of Psychiatry SM
M.D. University of California, Davis 1988

BINUS, DANIEL L. Adjunct Assistant Professor, Department of Psychiatry SM
M.D. Loma Linda University 2006

BISHOP, FRANK M. Assistant Clinical Professor, Department of Ophthalmology SM
M.D. Uniformed Services of the Health Sciences, Maryland 1995

BITOK, EDWARD K. Assistant Professor, Department of Nutrition and Dietetics AH
Dr.P.H. Loma Linda University 20016

BLACKBURN, ALLIE K. Assistant Professor, Department of Radiology and Department of Orthopedic Surgery SM
M.D. University of Chicago, Pritzker 2001

BLAINE, ANDREW C. Assistant Clinical Professor, Department of Psychiatry SM
M.D. New York University School of Medicine 1989

BLAKEY, ELEANOR A. Adjunct Research Professor, Department of Radiation Medicine SM
Ph.D. University of Illinois, Urbana-Champaign 1975

BLANCHETTE, LANCE. Assistant Clinical Professor, Department of Experiential and Continuing Education SP
B.S. University of Wisconsin, Madison 1980

BLANCO TOPPING, RICHARD. Adjunct Instructor, School of Public Health PH
M.B.A. University of Montemorelos, Mexico 2004

BLAND, DAVID. Emeritus Associate Professor, Department of Medicine SM
M.B.B.S. University of New South Wales, Australia 1976

BLAZEN, IVAN T. Emeritus Professor, School of Religion SR
Ph.D. Princeton Theological Seminary 1979

BLETHEN, ELISA J. Adjunct Assistant Professor, School of Public Health PH
M.B.A. University of Central Florida 2006
D.I.S. Fuller Theological Seminary 2018

BLEWS, EDWARD O III. Assistant Clinical Professor, Department of Medicine SM
M.D. Loma Linda University 2007

BLOCK, BARRY S. Associate Professor, Department of Gynecology and Obstetrics SM
M.D. Temple University, Philadelphia, Pennsylvania 1975

BLOCK, DAVID R. Assistant Clinical Professor, Department of Psychiatry SM
M.D. University at Buffalo, State University of New York 2004
M.M.M. University of Southern California 2016

BLOMQVIST, INGRID K. Associate Professor, Department of Medicine SM
M.D. Loma Linda University SM 1981

BLOOD, ARLIN B. Associate Professor, Department of Pediatrics SM
M.D. University of Southern California 2016

BOBKO, JOSHUA. Adjunct Assistant Professor, Department of Emergency Medicine SM
M.D. University of Miami School of Medicine 2006

BOCK, MATTHEW J. Assistant Professor, Department of Pediatrics SM
M.D. Drexel University 2008

BOCTOR, BAHER N. Assistant Professor, Department of Anesthesiology SM
M.D. University of California, San Diego 2008

BOGGS, SHARON A. Instructor, Department of Dental Hygiene SD
B.S. Loma Linda University SD 1993

BOHR, THOMAS W. Associate Professor, Department of Neurology SM
M.D. University of California, San Francisco 1984

BOLDA, LAUREN M. Instructor, Department of Physician Assistant Sciences AH
M.PA. Loma Linda University AH 2017

BOLING, WARREN. Professor, Department of Neurosurgery SM and
Department of Physician Assistant Sciences AH
M.D. Texas Tech University Health Science Center 1991

BOLTON, STEPHANIE L. Assistant Professor, Department of Psychiatry SM
M.D. Loma Linda University SM 2003

BONDON, EDWINA F. Assistant Clinical Professor, Department of Social Work and Social Ecology BH
M.S.W. University of Michigan, Ann Arbor 1997

BONG, PAUL. Clinical Instructor, Department of Psychiatry SM
M.D. University of California, Irvine 1993

BONNET, REINER B. Adjunct Professor, Department of Medicine SM
M.D. Loma Linda University SM 1981

BONYANPOOR, SHAHNAZ. Assistant Professor, Department of Pediatric Dentistry SD
D.M.D. Shiraz University 1977

BOPPANA, SWAPNA. Assistant Professor, Department of Medicine SM
M.B.B.S. Manipal University 2002

BORK, JANE N. Associate Professor, Department of Pediatrics SM
M.D. Loma Linda University SM 1979

BORUT, DANIELLE L. Assistant Clinical Professor, Department of Pediatrics SM
M.D. University of Southern California 1969

BOSKOVIC, DANILO. Assistant Professor, Department of Basic Sciences SM; Department of Earth and Biological Sciences SM; and Member FGS
Ph.D. Queen's University at Canada, Ontario, Canada 1997

BOSSERT, ELIZABETH ANNE. Professor, School of Nursing SN
Ph.D. University of California, San Francisco 1990

BOULTON, STEPHANIE L. Assistant Professor, Department of Psychiatry SM
M.D. Loma Linda University SM 2003

BOYD, BRENDA L. Assistant Professor, Department of Radiation Technology AH
Ph.D. Andrews University 2013

BOYD, KENDAL C. Associate Professor, Department of Psychology BH;
and Member of FGS
Ph.D. Fuller Theological Seminary 1999

BOYKO, MICHAEL PETER. Assistant Professor, Department of Oral and Maxillofacial Surgery SD
D.D.S., M.P.H. Loma Linda University SD, PH 1975

BOYLE, BRENDA J. Assistant Professor, School of Nursing SN
D.N.P. University of San Diego 2017

BOYLE, KRISTOPHER E. Assistant Professor, Department of Pharmaceutical and Administrative Sciences SP; and Associate Member FGS
Ph.D. University of California, Irvine 2008

BRADFORD, BENJAMIN D. Assistant Professor, Department of Medicine SM
M.D. Loma Linda University SM 2012

BRADLEY, BRUCE D. Assistant Professor, Department of Physical Therapy AH
D.Sc. Loma Linda University AH 2001

BRADLEY, JOY F. Clinical Instructor, Department of Physical Therapy AH
M.P.T. Loma Linda University AH 2011

BRAND, LEONARD R. Professor, Department of Earth and Biological Sciences SM; and Member FGS
Ph.D. University of Minnesota 1972

BRANDSTATER, BERNARD JOHN. Clinical Professor, Department of Anesthesiology SM
M.B.B.S. Adelaide University, Australia 1951

BRANDSTATER, MURRAY E. Professor, Department of Physical Medicine and Rehabilitation SM, Department of Neurology SM, and Department of Basic Sciences SM
M.B.B.S. Melbourne University, Australia 1957
Ph.D. University of Minnesota 1972

BRANTLEY, EILEEN J. Assistant Professor, Department of Basic Sciences SM and Department of Pharmaceutical and Administrative Sciences SP
Ph.D. Meharry Medical College, Nashville, Tennessee 1999

BRAR, HARDINER S. Clinical Professor, Department of Gynecology and Obstetrics SM
M.D. Jadavpur University, India 1978

BRASHEAR, NANCY. Instructor, School of Nursing SN
B.S. Loma Linda University SN 2000

BRATHWAITE, RON K. Assistant Professor, Department of Family Medicine SM
M.D. University of Maryland 2002

BRAUER, STANLEY D. Professor, Department of Anesthesiology SM
M.D. Loma Linda University SM 1980

BRAUN, WHITNEY M. Assistant Professor, School of Religion SR
Ph.D. Claremont Graduate University 2015

BRAVO, THOMAS P. Assistant Professor, Department of Neurology SM
M.D. Loma Linda University SM 2010

BRAZEALE, THOMAS. Assistant Clinical Professor, Department of Experimental and Continuing Education SP
Pharm.D. Pacific University, Oregon 2015

BREIG, NICHOLAS A. Adjunct Assistant Professor, Department of Oral and Maxillofacial Surgery SD
D.D.S. University of California, San Francisco 2008
M.D. Loma Linda University SM 2011

BRENGLEY, RYAN. Assistant Professor, Department of Emergency Medicine SM
M.D. Medical College of Wisconsin 1998

BRENNER, COLLEEN A. Associate Professor, Department of Psychology BH
Ph.D. Indiana University, Bloomington 2016

BRENNER, MEGAN L. Professor, Department of Surgery SM
M.D. Virginia Commonwealth University 2003

BRIGGS, BURTON A. Emeritus Professor, Department of Anesthesiology SM
M.D. Loma Linda University SM 1966

BRINEGAR, CHARLES H. Emeritus Associate Professor, Department of Medicine SM
M.D. Loma Linda University SM 1963

BRISTOL, ALYcia A. Assistant Professor, School of Nursing SN; and Member FGS
Ph.D. The University of Arizona 2016

BRISTOL, SHIRLEY T. Associate Professor, School of Nursing SN; and Member FGS
J.D. University of La Verne, Los Angeles, California 1990
D.N.P. Western University of Health Sciences 2012

BRITT, WILLIAM, G. III. Associate Professor, Department of Psychiatry SM
Ph.D. Rosemead Graduate School of Professional Psychology 1981

BRITTON, DOUGLAS R. Adjunct Assistant Professor, Department of Earth and Biological Sciences SM
Ph.D. University of Wyoming 1998

BROAD, JENNIFER L. Assistant Professor, Department of Gynecology and Obstetrics SM
M.D. Loma Linda University SM 2009

BROCKMANN, DOUGLAS C. Assistant Clinical Professor, Department of Anesthesiology SM
M.D. Loma Linda University SM 1978

BROGDON, JOANNA. Instructor, School of Nursing SN
B.S., Loma Linda University SN 2015

BROWN, DANIEL L. Professor, Department of Pharmacy Practice SP
Pharm.D. University of the Pacific, California 1981

BROWN, JAMES A. Assistant Professor, Department of Surgery SM

M.D. Medical University of South Carolina 1978

BROWN, JENNIFER. Assistant Professor, School of Nursing SN
M.S.N. Florida International University 2008

BROWN, LANCE A. Professor, Department of Emergency Medicine SM and Department of Pediatrics SM
M.D., M.P.H. Harvard University 1994

BRUCCOLERI, ALDO. Adjunct Research Professor, Department of Basic Sciences SM
Ph.D. University of Calgary 2000

BRUCE-LYLE, LESLIE A. Assistant Clinical Professor, Department of Ophthalmology SM
M.B.Ch.B. University of Ghana Medical School, Ghana 1976

BRUCKNER, EVERT A. Associate Clinical Professor, Department of Medicine SM
M.D. Stanford University 1958

BRUMAND, KAVEH. Assistant Professor, Department of Medicine SM
M.D. Shah Beheshti University of Medical Sciences 2003

M.D. Loma Linda University SM 2002

EICHENBERG, BRIAN J. Assistant Clinical Professor, Department of Plastic and Reconstructive Surgery SM
M.D. Georgetown School of Medicine 1994

EISENHUT, DEBORAH A. Assistant Professor, Department of Surgery SM
M.D. Oregon Health and Science University 1981

EJIKE, JANETH C. Associate Professor, Departments of Pediatrics SM
M.B.B.S. University of Lagos, Nigeria 1994

EKE, CLIFFORD C. Assistant Clinical Professor, Department of Surgery SM
M.D. Loma Linda University SM 1992

EKINS, BRENT R. Associate Clinical Professor, Department of Pharmacy Practice SP
Pharm.B. University of Utah 1974

EKLUND, DIANE K. Assistant Clinical Professor, Department of Pathology and Human Anatomy SM
M.D. University of Arizona 1988

EKROTH YUKL, ANN J. Assistant Professor, School of Nursing SN
M.S. Loma Linda University GS 1976

EKWEN, GERALD T. Assistant Professor, Department of Surgery SM
M.D. University of Yaounde, Cameroon 2002

ELAZEGUI, LISA M. Assistant Clinical Professor, Department of Pharmacy Practice SP
Pharm.D. Loma Linda University SP 2008

ELDER, HARVEY A. Clinical Professor, Department of Medicine SM; Professor and School of Public Health PH
M.D. Loma Linda University SM 1957

ELG, CRAIG A. Assistant Clinical Professor, Department of Pharmacy Practice SP
Pharm.D. University of Southern California 2003

ELGOHARY, BASSEM. Assistant Professor, Department of Medicine SM
M.D. University of Wisconsin, Madison 2002

ELIAS, INTITHAR S. M. Assistant Professor, Department of Allied Health Studies AH
M.S. Loma Linda University GS 1979

ELIAS, MARVIN L. Assistant Professor, Department of Medicine SM
M.D. Loma Linda University SM 2008

ELIHU, ARVAND. Adjunct Assistant Professor, Department of Surgery SM
M.D. Johns Hopkins University 2003

ELLINGTON, DANIELLE L. Assistant Professor, Department of Dental Hygiene SD
B.S. Loma Linda University SD 2013
ELLOWAY-SONG, TAMARAH R. Assistant Professor, Division of General Dentistry SD
D.D.S. Loma Linda University SD 1990
ELLSTROM, MERVIN L. Assistant Clinical Professor, Department of Pediatric Dentistry SD
D.D.S. Loma Linda University SD 1975
M.P.H. Loma Linda University PH 1975
ELO, JEFFREY A. Assistant Clinical Professor, Department of Oral and Maxillofacial Surgery SD
D.D.S. Indiana University 2002
M.S. Loma Linda University SD 2006
ELSHHERF, ISMAIL I. Assistant Professor, Department of Endodontics SD
B.D.S. Cairo University, Egypt 1979
Ph.D. Al-Azhar University, Egypt 1993
ELSSIY, PETER. Assistant Clinical Professor, Department of Orthopedic Surgery SM
M.D. University of California, Los Angeles 1983
EMANUELLI, SILVIO F. Adjunct Assistant Professor, Department of Restorative Dentistry SD
D.D.S. University of Pavia, Lombardy, Italy 1986
M.S. Loma Linda University GS 1992
EMMERSON, WILLIAM JOHN. Assistant Clinical Professor, Department of Orthodontics SD
D.D.S. Loma Linda University SD 1980
M.S. Loma Linda University GS 1982
ENGLANDER, DAVID M. Assistant Professor, Department of Emergency Medicine SM
M.D. Temple University School of Medicine, Philadelphia, Pennsylvania 1973
ERICKSON, DAVID G. Clinical Instructor, Department of Pediatrics SM
B.S. Loma Linda University GS 1986
ESCOBAR-PONI, BERTHA C. Professor, Department of Pathology and Human Anatomy SM, and Member FGS
M.D. Universidad Centro-Occidental Lisandro Alvarado, Venezuela 1989
ESKANDARIAN, ROMIC. Assistant Clinical Professor, Department of Experiential and Continuing Education SP
Pharm.D. Western University of Health Sciences, Pomona, California 2003
ESMAIL, FATEMA Q. Assistant Professor, Department of Ophthalmology SM
M.D. Mount Sinai School of Medicine, New York 2005
ESPERANTE, RAUL. Adjunct Assistant Professor, Department of Earth and Biological Sciences SM, and Member FGS
Ph.D. Loma Linda University GS 2002
ESTEY, MARK EDWARD. Associate Professor, Division of General Dentistry SD
D.D.S. Loma Linda University SD 1998
ESTRADA, SANDRA E. Instructor, Department of Neurology SM
M.S.N. University of California, Los Angeles 1991
EVANS, DWIGHT C. Associate Professor, Department of Medicine SM and School of Public Health PH
M.D. Loma Linda University SM 1973
EVANS, LAURA E. Assistant Clinical Professor, Department of Radiation Technology AH
J.D. University of California, Berkeley 2007
EVERETT, GEORGE. Professor, Department of Medicine SM
M.D. University of Iowa College of Medicine 1975
EZINWA, N. MARGARETE. Assistant Professor, Department of Family Medicine and Department of Preventive Medicine, SM
M.B.Ch.B. University of Auckland, New Zealand 2003
M.P.H. Johns Hopkins University, Maryland 2010
FAIRHURST, JANELLE C. Instructor, Department of Dental Hygiene SD
B.S. Loma Linda University SD 1988
FAN, JOSEPH T. Associate Professor, Department of Ophthalmology SM and Department of Basic Sciences SM
M.D. University of California, San Diego 1990
FANG, DENNY Y. K. Assistant Professor, Department of Endodontics SD
D.D.S. University of California, Los Angeles 1998
FANICA, ANDREA. Instructor, Department of Nutrition and Dietetics AH
M.S. Loma Linda University AH 2016
FANOUS, YVONNE F. Associate Professor, Department of Pediatrics SM
M.D. Cairo University, Egypt 1973
FARAJZADEH, FARZIN. Assistant Professor, Department of Medicine SM
M.D. Shahid Beheshti University of Medical Science, Iran 2002
FARGO, RAMIZ A. Assistant Professor, Department of Medicine SM
M.D. Loma Linda University SM 1996
FARIDI, OMAR M. Adjunct Assistant Professor, Department of Oral and Maxillofacial Surgery SD
FARRAGE, JAMES ROBERT. Associate Professor, Department of Orthodontics SD
D.D.S. Loyola University School of Dentistry 1965
M.S. Loyola University 1967
FARSHIDPANAH, SIAVASH. Assistant Professor, Department of Medicine SM
M.D. St. George’s University, Grenada 2007

M.D. Lund University School of Medicine, Sweden 2002
FAYARD, CARLOS R. Associate Professor, Department of Psychiatry SM
Ph.D. California School of Professional Psychology 1988
FAYAZI, KHAIROLLAH. Assistant Clinical Professor, Department of Psychiatry SM
M.D. Spartan Health Sciences University
FEBRE, APRILLE DAWN F. Assistant Professor, Department of Pediatrics SM
M.D. Loma Linda University SM 2007
FEENSTRA, LAURENCE A. Instructor, Department of Cardiopulmonary Sciences AH
B.S. California State University, San Bernardino 1974

FELDShER, MENDEL J. Assistant Clinical Professor, Department of Psychiatry SM
M.D. University of Southern California 1996

FELEMA, BIFTU G. Assistant Professor, Department of Anesthesiology SM
M.D. Loma Linda University SM 2007

FELIX, ALLEN C. Assistant Clinical Professor, Department of Family Medicine SM
M.D. University of Southern California 1991

FELLER, JOHN FRANCIS. Assistant Clinical Professor, Department of Radiology SM
M.D. Ohio State University 1991

Ferguson, Cory G. Instructor, Otolaryngology and Head and Neck Surgery SM
M.S.P.A. Western University of Health Sciences 2012

Ferguson, Earl W. Clinical Professor, School of Public Health PH; Associate Clinical Professor, Department of Medicine SM
M.D., Dr.P.H. University of Texas, Galveston 1970

Fernando, Nancy R. Assistant Professor, Department of Pediatrics SM
D.O. College of Osteopathic Medicine of the Pacific 1991

Fernando, Ronald S. Assistant Professor, Department of Medicine SM and Department of Basic Sciences SM
M.D. Loma Linda University SM 1993

Ferry, David R. Associate Professor, Department of Medicine SM
M.D. Loma Linda University SM 1976

Ferry, Linda H. Associate Professor, Department of Preventive Medicine SM, Department of Family Medicine SM, and School of Public Health PH
M.D. Loma Linda University SM 1979
Dr.P.H. Loma Linda University PH 1989

Field, Sue A. Assistant Professor, Department of Anesthesiology SM
M.D. Loma Linda University SM 1983

Figuereido, Fabio C. Assistant Professor, Department of Orthopedic Surgery SM
M.D. Universidade de Sao Paulo, Brazil 1994

Figueroa, Heather R. Assistant Professor, Department of Gynecology and Obstetrics SM
M.D. Loma Linda University SM 2008

Filippov, Valeri. Assistant Research Professor, Department of Basic Sciences SM
Ph.D. Institute of Cytology and Genetics, Nivosibirsk, Russia 1993

Filippova, Maria. Associate Research Professor, Department of Basic Sciences SM
Ph.D. Institute of Cytology and Genetics, Russia 1997

Fillman, Michael J. Associate Professor, Department of Orthodontics SD
D.D.S. Loma Linda University SD 1974

M.P.H. Loma Linda University PH 1974
M.S. Loma Linda University GS 1984

Finnie, Sonja F. Assistant Professor, Department of Orthodontics SD
D.D.S. Loma Linda University SD 1998
M.S. Loma Linda University SD 2000

Firke, Anthony F. Assistant Professor, Department of Medicine SM
M.D. University of Hawaii 1984

Fischer, Dan E. Adjunct Assistant Professor, Division of General Dentistry SD
D.D.S. Loma Linda University SD 1974

Fischer, Scott P. Assistant Clinical Professor, Orthopedic Surgery SM
M.D. University of Wisconsin, Madison 1981

Fisher, Franz P. Assistant Professor, Department of Medicine MS
M.D. Loma Linda University SM 1984

Fisher, Kendra L. Assistant Professor, Department of Radiology SM and Department of Basic Sciences SM
M.D. University of Calgary 1989

Fisher, Ross. Assistant Professor, Department of Pediatrics SM
M.D. McGill University, Montreal, Canada 1988

Fisher, Lorraine Wheaton. Instructor, Department of Nutrition and Dietetics AH
M.P.H. Loma Linda University SH 1981
M.S. Loma Linda University GS 1983

Fisher, Andrew S. Assistant Professor, Department of Emergency Medicine SM
M.D. University of Kansas 2012

Fitzgerald, Garry J. Assistant Professor, School of Public Health PH
M.D. Autonomous University of Guadalajara, Mexico 1973

Fitzpatrick, Michael J. Professor, Division of General Dentistry SD
D.D.S. Loma Linda University SD 1987

Fitzpatrick, Sofia I. Assistant Professor, Division of General Dentistry SD
D.D.S. Loma Linda University SD 1998

M.D. University of Medicine and Pharmacy Carol Davila, Romania 1996

MOLINA, ENRIQUE F. Assistant Professor, School of Nursing SN  
D.N.A.P. Middle Tennessee School of Anesthesia 2015

MOLINA, GRACIELA O. Assistant Professor, Department of Family Medicine SM  
M.A. University of Montemorelos, Mexico 2000

MOLINA, RAFAEL. Assistant Professor, School of Public Health PH  
M.Ed. University of Montemorelos, Mexico 1994

MOLINE, MARY YOGEL. Professor, Department of Counseling and Family Science BH; and Member FGS  
Dr.PH. Loma Linda University PH 1975  
Ph.D. Brigham Young University, Utah 1979

MOLKARA, AFSHIN M. Assistant Professor, Department of Cardiothoracic Surgery SM  
M.D. Howard University, Washington D.C. 1996

MONDZELEWSKI, TODD J. Assistant Clinical Professor, Department of Ophthalmology  
M.D. Uniformed Services University of the Health Sciences 2004

MONTALBAN, ENOCH S. Clinical Instructor, Department of Radiation Technology AH  
B.S.N. Mountain View College, Philippines 2004

MONTGOMERY, SUSANNE B. Professor, Department of Social Work and Social Ecology BH, Department of Preventive Medicine SM, School of Public Health PH; and Member FGS  
Ph.D. University of Michigan 1987

MONTGOMERY, TATE A. Adjunct Assistant Professor, Department of Dental Education Services SD  
D.D.S. Loma Linda University SD 2008

MOOR, MICHAEL GLENN. Instructor, Department of Orthotics and Prosthetics AH  
B.S. University of Washington, Seattle 1984

MOORADIAN, RYAN D. Assistant Professor, Department of Pediatrics SM  
M.D. Loma Linda University SM 2001
M.D. Chicago Medical School 2009

MOORE, KATHLEEN LOU. Assistant Professor, Department of Dental Education Services SD
M.H.I.S. Loma Linda University AH 1999

MOORES, DONALD C. Associate Professor, Department of Surgery SM and Department of Pediatrics SM
M.D. Loma Linda University SM 1987

MOORHEAD, J. DAVID. Adjunct Associate Professor, Department of Urology SM
M.D. Loma Linda University SM 1973

MORETTA, CARLOS MANUEL. Assistant Professor, Department of Oral and Maxillofacial Surgery SD
D.D.S. Loma Linda University SD 2001

MORGAN, DOREE L. Assistant Clinical Professor, School of Public Health PH
M.P.H. Loma Linda University PH 1978

MORGAN, JOHN W. Professor, School of Public Health PH; and Member FGS
Dr.P.H. Loma Linda University PH 1987

MORGAN, WALTER C. Assistant Clinical Professor, Department of Family Medicine
M.D. University of Washington 1981

MORIKAWA, WESLEY MIKJO. Assistant Clinical Professor, Department of Pediatric Dentistry SD
D.D.S. University of Southern California 1981

MORRELL, HOLLY E. Associate Professor, Department of Psychology BH
Ph.D. Texas Technological University 2007

MORRISON, MARTIN J. Assistant Professor, Department of Orthopedic Surgery SM
M.D. Drexel University College of Medicine, Philadelphia 2007

MORROW, STEVEN GALE. Professor, Department of Endodontics SD
D.D.S. Loma Linda University SD 1960
M.S. Loma Linda University GS 1987

MORTON, KELLY R. Professor, Department of Family Medicine SM, Department of Psychology BH; and Member FGS
Ph.D. Bowling Green State University, Ohio 1992

MOSES, OLIVIA. Assistant Professor, School of Public Health PH and Department of Preventive Medicine SM
Dr.P.H. Loma Linda University PH 2005

MOTABAR, ALI. Assistant Professor, Department of Medicine SM
M.D. Tehran Azad University 1997

MOY, MERVIN. Assistant Professor, Division of General Dentistry SD
PharmD. University of California, San Diego 2011

MOYNIHAN, JAMES A. Associate Professor, Department of Emergency Medicine SM
D.O. Western University of Health Sciences 1996

MUDGE, M. KENNETH. Clinical Professor, Department of Orthopedic Surgery SM
M.B.Ch.B. University of Birmingham, England 1970

MUKHERJEE, ASHIS. Assistant Clinical Professor, Department of Medicine SM
M.D. Cornell University Medical College, New York 1985

MULDER, SHANNON M. Assistant Professor, Department of Anesthesiology SM
M.D. Loma Linda University SM 1983

MULLA, NEDA F. Associate Professor, Department of Pediatrics SM
M.B.B.S. Kuwait University Health Sciences Center College of Medicine, Kuwait 1986

MULLIGAN, BETH A. Adjunct Assistant Professor, School of Behavioral Health BH
B.S. Tufts University, Massachusetts 1979

MUNCE, JOHN. Assistant Professor, Department of Endodontics SD
D.D.S. Loma Linda University SD 1978

MUNDALL, JENNIFER L. Assistant Professor, School of Nursing SN
D.N.P. University of South Alabama 2011

MUNDALL, JOEL R. Assistant Professor, Department of Preventive Medicine SM
M.D. Loma Linda University SM 2006

MUNGUIA, FERNANDO MOISES. Assistant Clinical Professor, Division of General Dentistry SD
D.D.S. Cayetano Heredia Peruvian University, Peru 1985

MUNIZ TAYLOR, BRENDA. Assistant Clinical Professor, Department of Health Informatics and Information Management AH
B.S. Loma Linda University AH 1990

MUNOZ, NUMA F. Assistant Professor, Department of Pediatric Dentistry SD
D.D.S. Loma Linda University SD 1997

MUNSON, LAUREL JONES. Assistant Professor, Department of Radiation Technology AH
Ph.D. Loma Linda University AH 1990

MURAD, WADSWORTH H. Assistant Clinical Professor, Department of Psychiatry SM
D.O. Western University of Health Sciences, Pomona, California 1984

MURDOCH, J. LAMONT. Professor, Department of Medicine SM
M.D. Loma Linda University SM 1963

MURDOCH, WILLIAM GORDON C., JR. Associate Professor, Department of Psychiatry SM
M.D. Loma Linda University SM 1973

MURPHY, JERONE G. Instructor, Department of Radiation Technology AH
B.S. Loma Linda University AH 2016

MURRAY, RICK D. Associate Clinical Professor, Department of Gynecology and Obstetrics SM
M.D. Loma Linda University SM 1975

MURRY, THOMAS. Professor, Otolaryngology and Head and Neck Surgery SM
Ph.D. University of Florida 1969

NAFTEL, JOHN C. Assistant Professor, Department of Emergency Medicine SM
M.D. University of California, Los Angeles 1972

NAGARAJ, GAYATHRI. Assistant Professor, Department of Medicine SM
M.D. Bangalore University, India 2001

NAGELHOUT, JOHN J. Adjunct Professor, School of Nursing SN
Ph.D. Wayne State University, Detroit, Michigan 1985

NAKAMURA, JENNIFER G. Assistant Clinical Professor, Department of Social Work and Social Ecology BH
M.S.W. California State University, Long Beach 2004

NAKAMURA, LANELLE V. Assistant Professor, Department of Pediatrics SM
M.D. University of Hawaii, John A. Burns School of Medicine 2005

NALIN, RONALD. Adjunct Assistant Professor, Department of Earth and Biological Sciences SM; and Member FGS
Ph.D. Universita degli Studi de Paduva, Italy 2006

NAM, ENOCH H. Adjunct Assistant Professor, Department of Ophthalmology SM
M.D. Albert Einstein School of Medicine 2007

NAM, GRACE H. Assistant Professor, Department of Pediatrics SM
M.D. University of Wisconsin, Madison 2009

NAMIHAS, IVAN C., JR. Assistant Professor, Department of Radiation Medicine SM
M.D. Loma Linda University SM 1984

NARULA, MINAKSHI. Assistant Professor, Department of Orthodontics SD
B.D.S. RA Dental College, Calcutta, India 1985

NARVAEZ, JULIO. Adjunct Professor, Department of Ophthalmology SM
M.D. Loma Linda University SM 1992

NASH, DANIEL A. Assistant Professor, Department of Medicine SM
M.D. University of Nevada, Reno 1988

NASIBI, POOYAN. Instructor, Department of Pediatric Dentistry SD
D.D.S. University of Southern California 2013

NASS, SCOTT E. Assistant Clinical Professor, Department of Family Medicine SM
M.D. Charles R. Drew University of Medicine, California 2009

NASSERI-NOORI, KEVIN A. Assistant Professor, Department of Anesthesiology SM
M.D. University of California, Los Angeles 2007

NATHANIEL, BRANDON L. Assistant Professor, Department of Medicine SM
M.D. University of California, Davis 2008

NATION, N. JARED. Assistant Professor, Department of Pediatric Dentistry SD
D.D.S. Loma Linda University SD 2002

NATT, TARANJIT. Assistant Professor, Department of Medicine SM
M.D. Ross University 2006

NAUERTZ, CINDA L. Assistant Professor, Department of Pediatrics SM
M.D. Loma Linda University SM 1999

NAVA, R. BEN, JR. Professor, Department of Pathology and Human Anatomy SM
Ph.D. Loma Linda University GS 1973

NEECE, CAMERON L. Associate Professor, Department of Psychology BH
Ph.D. University of California, Los Angeles 2011

PERRY, EDWARD T. Assistant Professor, Department of Family Medicine SM
M.D. Loma Linda University SM 2012

PERSICHINO, JON G. Associate Professor, Department of Medicine SM
D.O. Western University of Health Sciences, Pomona, California 2003

PESAVEITO, RICHARD D. Assistant Clinical Professor, Department of Ophthalmology SM
M.D. University of California, Irvine 1980

PETERS, DONALD L. Emeritus Professor, Department of Endodontics SD
D.D.S. Loma Linda University SD 1961

PETERS, JUDITH MILLER. Associate Professor, School of Nursing SN
Ed.D. Loma Linda University SE 1968

PETERS, WARREN R. Associate Professor, Department of Preventive Medicine SM; Assistant Professor, School of Public Health PH
M.D. Loma Linda University SM 1969

PETESEN, ANNE BERIT. Assistant Professor, School of Nursing SN; and Member FGS
M.P.H. Loma Linda University PH 2006
Ph.D. University of California, San Francisco 2015

PETESEN, DARRELL K. Instructor, Department of Pathology and Human Anatomy SM
Dr.PH. Loma Linda University PH 2016

PETESEN, DENISE K. Assistant Clinical Professor, School of Nursing SN
M.S.N. Grand Valley State University, Michigan 1999

PETESEN, ERIK J. Assistant Clinical Professor, Department of Psychiatry SM
M.D. Medical College of Virginia 2003

PETESEN, DONALD I. Emeritus Professor, Department of Neurology SM
M.D. College of Medical Evangelists 1947

PETESEN, GORDON WILLARD. Professor, Department of Neurology SM and Department of Physical Medicine and Rehabilitation SM
M.D. Loma Linda University SM 1974

PETESEN, JOHN ERIC, JR. Emeritus Professor, Department of Pediatric Dentistry SD
D.D.S. Loma Linda University SD 1970

PETTI, GEORGE HYACINTH, JR. Professor, Department of Otolaryngology and Head and Neck Surgery SM
M.D. Loma Linda University SM 1962

PETRINI, RICARDO L. Associate Professor, Department of Pediatrics SM
M.D. Loma Linda University SM 1984

PFEIFFER MOSLEY, TERESE R. Instructor, Department of Radiation Technology AH
M.A. Fresno Pacific University 2011

PHAM, PETER H. Assistant Professor, Department of Radiology SM and Department of Basic Sciences SM
M.D. University of California, Los Angeles 2006

PHAN, SON. Assistant Professor, Department of Radiology SM
M.D. University of Vermont 2003

PHATAK, ANITA V. Assistant Professor, Department of Medicine SM
M.D. University of California, Los Angeles 2011

PHATAK, PRASHANT V. Assistant Professor, Department of Medicine SM
M.D. University of California, Los Angeles 1999

PHILLIPS, LISA. Assistant Professor, Department of Psychiatry SM
M.D. Loma Linda University SM 1993

PHILLIPS, RAYLENE M. Associate Professor, Department of Pediatrics SM
M.D. University of California, Davis School of Medicine 2005

PHILLIPS, SUZANNE E. Assistant Professor, Department of Earth and Biological Sciences SM; and Associate Member FGS
PHD. Loma Linda University GS 2003

PHIPATANAKUL, WESLEY P. Professor, Department of Orthopedic Surgery SM
M.D. Loma Linda University SM 1998

PIEDRA, ISABELLA. Assistant Professor, Department of Pediatric Dentistry SD
D.D.S. Universidad del Valle, Columbia 1990

PIERSON, CRYSTAL A. Assistant Professor, Division of General Dentistry SD
D.D.S. Loma Linda University SD 2005

PIERSON, KENNETH D. Assistant Professor, Division of General Dentistry SD
D.D.S. Loma Linda University, SD 2000

PINDER, JAMES. Associate Professor, Department of Pharmaceutical and Administrative Sciences SP
J.D. William Howard Taft University, California 2008

PLANTAK, ZDRAVKO. Professor, School of Religion SR
Ph.D. King’s College, University of London, United Kingdom 1994

POHOST, GERALD M. Professor, Department of Medicine SM
M.D. University of Maryland 1967

POLLARD, PRUDENCE E. Associate Clinical Professor, School of Public Health PH
Ph.D. Western Michigan University 1993

POLYCARPE, MARTINE Y. Adjunct Assistant Professor, School of Public Health PH
M.P.H. Loma Linda University PH 2001

POOMPRAKOSRI, KIDDEE. Assistant Professor, Division of General Dentistry SD
D.D.S. Loma Linda University SD 2012

PORTER, CORWIN. Assistant Clinical Professor, School of Public Health PH
M.P.H. Loma Linda University PH 2000

PORTNOFF, LUIZA. Clinical Instructor, Department of Oral and Maxillofacial Surgery SD
D.D.S. Loma Linda University SD 2014

POOTHEER, PATRICIA KATHLEEN. Amerita Associate Professor, School of Nursing SN
Ph.D. University of San Diego 2001

POTTS, MICHAEL L. Adjunct Assistant Professor, Department of Restorative Dentistry SD
D.D.S. Loma Linda University SD 1975

POWELL, STEVEN R. Assistant Professor, Division of General Dentistry SD
D.D.S. Loma Linda University SD 1987

POWER, GORDON G. Professor, Department of Basic Sciences SM and Department of Gynecology and Obstetrics SM
M.D. University of Pennsylvania School of Medicine 1961

PRATTE, JOHN E. Assistant Clinical Professor, Department of Endodontics SD
D.D.S. University of Southern California 1987

PRENDERGAST, THOMAS J. Associate Clinical Professor, School of Public Health PH
M.S. University of North Carolina 1972
M.D. Washington University School of Medicine 1966

PRESTON, WILLIAM. Associate Professor, Department of Radiation Medicine SM
Ed.D. University of Rochester, New York 1974

PRIESTER, TIFFANY C. Assistant Professor, Department of Medicine SM
M.D. Loma Linda University SM 2004

PRIETTO, CARLOS A. Clinical Professor, Department of Orthopedic Surgery
M.D. University of California, Los Angeles 1973

PRIETTO, MIGUEL P. Assistant Clinical Professor, Department of Orthopedic Surgery
M.D. University of California, Irvine 1978

PROCHAZKA, ERNEST J. Associate Clinical Professor, Department of Preventive Medicine SM
M.D. University of Vienna, Austria 1983

PROCTOR, GEORGE JASON. Assistant Clinical Professor, Department of Psychiatry SM
M.D. University of Virginia 1993

PROUSSAEFS, PERIKLIS THEODORE. Associate Clinical Professor, Department of Restorative Dentistry SD
D.D.S. University of Athens School of Dentistry, Greece 1993

PRZEKOP, ALLISON A. Assistant Professor, Department of Pediatrics SM
D.O. Western University of Health Sciences, California 1999

PUERBAL, DAVID J. Assistant Professor, Department of Psychiatry SM and Department of Medicine SM
M.D. Loma Linda University SM 2010

PUERTO, SOFIA. Assistant Clinical Professor, School of Nursing SN
Ph.D. Columbia Pacific University 1993

PUESCHL, ROBIN. Assistant Professor, School of Nursing SN
D.N.P. Brandman University, California 2014

PULIDO, EMMELINE R. Assistant Professor, Department of Pediatrics SM
M.D. Loma Linda University SM 1988

PUVULA, LAKSHMI K. Assistant Professor, Department of Medicine SM
M.D. Loma Linda University SM 2003

PUVULA, LAKSHMI K. Assistant Professor, Department of Medicine SM

YAMZON, JOCELYN M. Assistant Professor, Department of Pharmacy Practice SP
Pharm.D. University of Southern California 2004

YANG, GARY Y. Professor, Department of Radiation Medicine SM and Department of Basic Sciences SM
M.D. The Chicago Medical School 1995

YANG, JOANNA JIEHONG. Assistant Professor, School of Nursing SN
D.N.P. The University of Alabama at Birmingham and Huntsville 2013

YANG, LINDA L. Assistant Professor, Department of Pediatrics SM
M.D. University of California, Irvine 1985

YANG, SEULKI S. Assistant Professor, Division of General Dentistry SD
D.D.S. Loma Linda University SD 2012

YANNI, GEORGE S. Associate Professor, Department of Pediatrics SM
M.D. Ain Shams University at Cairo, Egypt 1981

YAP, ADWEN P. Assistant Professor, Division of General Dentistry SD
D.D.S. Loma Linda University SD 1989

YELLON, STEVEN M. Professor, Department of Basic Sciences SM and Department of Gynecology and Obstetrics SM
Ph.D. University of Connecticut 1981

YEO, ELIOT M. Assistant Professor, Division of General Dentistry SD
D.D.S. University of Missouri 1987

YEO, INHWAN. Associate Professor, Department of Radiation Medicine SM; Assistant Clinical Professor, Department of Radiation Technology AH
Ph.D. Georgia Institute of Technology 1996

YI, ALEX C. Assistant Professor, Department of Radiology SM
M.D. Loma Linda University SM 2002

YI, ZANE G. Assistant Professor, School of Religion SR
Ph.D. Fordham University 2013

YOCHEIM, JI M. Assistant Professor, Department of Pediatric Dentistry SD
Ph.D. University of Southern California 2003

YOMTOUBIAN, CARMELA. Assistant Professor, Department of Emergency Medicine SM
M.D. New York Medical College 2009

YONG, PAMELA A. Instructor, Department of Nutrition and Dietetics AH
M.P.H. Loma Linda University AH 1989

YOO, JIN SUK I. Adjunct Assistant Professor, Department of Dental Educational Services SD
D.D.S. Loma Linda University SD 2013

YOO, PAUL H. S. Adjunct Assistant Professor, Department of Dental Education Services SD
D.D.S. Loma Linda University SD 2008

YOUNGBERG, WESLEY S. Assistant Clinical Professor, School of Public Health PH and Department of Preventive Medicine SM
Dr.P.H. Loma Linda University PH 1988

YOUNG, RICHARD A. Assistant Professor, Division of General Dentistry SD
D.D.S. Loma Linda University SD 1985

YOUNG, TIMOTHY P. Associate Professor, Department of Emergency Medicine SM
M.D. Loma Linda University SM 2004

YEUNG, SNODGRASS AMY D. Assistant Professor, Department of Pediatrics SM
M.D. Loma Linda University SM 2001

YOUNGBERG, WESLEY S. Assistant Clinical Professor, School of Public Health PH and Department of Preventive Medicine SM
Dr.P.H. Loma Linda University PH 1988

YOUNG, LILY L. Clinical Instructor, Department of Physical Therapy AH
M.A. Hong Kong Union College, People’s Republic of China 1976

YOUNG, LIONEL W. Professor, Department of Radiology SM and Department of Pediatrics SM
M.D. Howard University, Washington, D.C. 1957

YOUNG, PETER SIU-YEE. Assistant Professor, Division of General Dentistry SD
D.D.S. Loma Linda University SD 1988

YOUNG, RICHARD A. Assistant Professor, Division of General Dentistry SD
D.D.S. Loma Linda University SD 1985

YOUNG, TIMOTHY P. Associate Professor, Department of Emergency Medicine SM
M.D. Loma Linda University SM 2004

YOUNG-SNODGRASS AMY D. Assistant Professor, Department of Pediatrics SM
M.D. Loma Linda University SM 2001

YOUNGBERG, WESLEY S. Assistant Clinical Professor, School of Public Health PH and Department of Preventive Medicine SM
Dr.P.H. Loma Linda University PH 1988

YOW, WARREN SHIUWING. Associate Professor, Division of General Dentistry SD
D.M.D. Washington University 1983

YU, HONGRUN. Assistant Research Professor, Department of Medicine SM
Ph.D. University of New Hampshire 1992

YU, JACK N. Associate Professor, Department of Family Medicine SM
M.D. Boston University 1984

YU, MINHO. Assistant Professor, Department of Medicine SM
D.O. Western University of Health Sciences, Pomona, California 2004

YUAN, XIANGPENG. Assistant Professor, Department of Otolaryngology and Head and Neck Surgery SM and Department of Basic Sciences SM
Ph.D. The Fourth Military Medical University, China 1996

YUN, JUNCHAN J. Assistant Professor, Department of Radiology SM
M.D. Northwestern University Medical Center, Chicago 1990

YUNE, JUNCHAN J. Assistant Professor, Department of Urology SM
M.D. Seoul National University 2000

YUSUFALY, YASMIN A. Assistant Professor, Department of Medicine SM
M.B.B.S. Dow Medical College, Pakistan 1984

YVANOVICH, ANTHONY R. Assistant Clinical Professor, Department of Cardiopulmonary Sciences AH
M.P.A. Loma Linda University AH 2006

ZAHEER, SALMAN. Assistant Professor, Department of Cardiothoracic Surgery SM
M.B.B.S. Aga Khan University, Pakistan 1984

ZAMAN, MANILA. Assistant Clinical Professor, Department of Medicine SM
ZAMORA, ZELNE LU. Assistant Professor, School of Nursing SN
D.N.P. University of San Diego 2010

ZANE, ERNEST SUI SUNG. Associate Professor, Department of Ophthalmology SM
M.D. College of Medical Evangelists 1956

ZANE, STEVEN E. Assistant Clinical Professor, Department of Ophthalmology SM
M.D. Loma Linda University SM 1990

ZAPPIA, JANE NEWMAN. Instructor, Department of Clinical Laboratory Science AH
B.S. University of Central Florida 1977

ZAWISTOWSKI, DEBRA A. Assistant Professor, Department of Dental Hygiene SD
B.S. Loma Linda University SD 2005

ZDROJEWSKI, JOHN F. Assistant Clinical Professor, Department of Dermatology SM
M.D. SUNY Upstate College of Medicine, Syracuse, New York 1973

ZEGAR, ZEGAR Y. Assistant Clinical Professor, Division of General Dentistry SD
B.D.S. University of Baghdad College of Dentistry 2004
D.D.S. Loma Linda University SM 2013

ZHANG, JOHN H. Professor, Department of Basic Sciences SM, Department of Anesthesiology SM, Department of Neurosurgery SM, and School of Nursing SN
Ph.D. University of Alberta, Canada 1992
M.D. Chongqing University of Medical Science, China 1983

ZHANG, LUBO. Professor, Department of Basic Sciences SM; and Member FGS
Ph.D. Iowa State University 1986

ZHANG, WU. Professor, Department of Dental Education Services SD; and Member FGS
M.D. Norman Bethune University of Medical Sciences, China 1977

ZHANG, XIAO-BING. Assistant Research Professor, Department of Medicine SM, Department of Basic Sciences SM; and Member FGS
Ph.D. East China University of Science and Technology 1999

ZHANG, ZHIWEI. Associate Professor, Department of Medicine SM and Department of Basic Sciences SM
M.D. Sun Yat-Sen University of Medical Sciences, China 1984

ZHAO, XUEREN. Assistant Professor, Department of Radiology SM
M.D. Capital University of Medical Sciences, China 1986

ZHAO, YAN S. Associate Professor, Department of Medicine SM
M.D. Beijing Medical University, China 1993
Ph.D. University of Southern California 2000

ZHONG, ZHE. Assistant Professor, Department of Dental Education Services SD
B.D.S. Capital Medical University 2005
Ph.D. Peking University 2010

ZIMMERMANN, GRENITH J. Emeritus Professor, Department of Allied Health Studies AH, School of Public Health PH; and Member FGS
Ph.D. University of Minnesota 1970

ZIMMERMANN, KIMBERLY R. Assistant Professor, Department of Emergency Medicine SM and Department of Pediatrics SM
M.D. Bush Medical College, Chicago 1983

ZMAJ, KRISTINE B. Assistant Professor, Department of Surgery SM
M.D. Loma Linda University SM 1998

ZOUGH, FARNOOSH. Assistant Professor, Department of Pharmacy Practice SP
Pharm.D. University of Southern California 2011

ZUPPAN, CRAIG W. Professor, Department of Pathology and Human Anatomy SM
M.D. Loma Linda University SM 1980

ZUPPAN, KRISTEL J. Assistant Clinical Professor, Department of Physical Therapy AH
D.P.T. Loma Linda University 2008

General Administration
CRAIG R. JACKSON, J.D., M.S.W., Dean
JOYCE W. HOPP, Ph.D., Dean Emerita
LEE BERK, Dr.P.H., Associate Dean, Research
ERNEST SCHWAB, M.S., Ph.D., Associate Dean, Academic Affairs
G. CHARLES DART, JR., M.B.A., Associate Dean, Student Affairs
EVERETT B. LOHMAN, D.Sc., Assistant Dean, Graduate Academic Affairs
ARTHUR W. KROETZ, Ph.D., Assistant Dean, Educational Support Services
KENT CHOW, M.B.A., Assistant Dean, Finance
HELEN R. MARTINEZ WENDTLAND, M.A., Assistant Dean, Admissions
DONNA THORPE, Dr.P.H., Director, School Institutional Research and Accreditation
KATHERINE DAVIS, M.S., Director, Assessment and Program Review
YOLANDA MARTINEZ, M.A.M., Director, Portfolio
MELISA AREE, M.A., Director, Alumni and Communication
KAREN WESTPHAL, M.A., Director, Student Affairs and Recruitment
GAIL T. RICE, Ed.D., Coordinator, Continuing Education
TIMOTHY SEAVEY, M.A.M., Coordinator, General Education
TIFFANIE HAYNAL, B.B.A., Development Officer
YVONNE WREN, Manager of Alumni and Recruitment

Computer Services
INTITHAR S. ELIAS, M.S., Director

Allied Health Studies
CRAIG R. JACKSON, J.D., M.S.W., Chair, Department of Allied Health Studies
ARTHUR MARSHAK, M.S., Ed.D., Program Director for Master of Science and Certificate, Health Professions Education
KARLA LAVIN WILLIAMS, Dr.P.H., Program Director for Bachelor of Science, Health-Care Administration
GREATH ZIMMERMAN, Ph.D., Program Director for Doctor of Philosophy, Rehabilitation Science

Cardiopulmonary Sciences
DAVID LOPEZ, Ed.D., Chair, Department of Cardiopulmonary Sciences; ABDULLAH ALISMAIL, M.S., Program Director for Master of Science in Respiratory Care and Polysomnography Certificate; Director of Clinical Education for Bachelor of Science, Respiratory Care Program
N. LENNARD SPECHT, M.D., Medical Director for the Bachelor of Science in Respiratory Care Program
LAREN D. TAN, M.D, FCCP, Medical Director for Master of Science in Respiratory Care Program
RICHARD NELSON, M.D., Program Director for entry-level Bachelor of Science, Respiratory Care
ALAN ALIPOON, M.S., Program Director for postprofessional Bachelor of Science, Respiratory Care

Clinical Laboratory Science
RODNEY M. ROATH, Ph.D., M.B.A., Chair, Department of Clinical Laboratory Science
ALICIA TRIPPLETT, M.A., MLS (ASCP)CM, Program Director for Bachelor of Science, Clinical Laboratory Science
TERI J. ROSS, M.S., Program Director for Certificate, Phlebotomy
PAUL C. HERRMANN, M.D., Medical Director for Clinical Laboratory Science Program and Phlebotomy
MATT RIDING, SCT (ASCP)CM, Program Director, Cytotechnology
ALICIA M. TRIPPLETT, M.A., MLS (ASCP)CM, Clinical Coordinator for Bachelor of Science, Clinical Laboratory Science

Communication Sciences and Disorders
TERRY D. DOUGLAS, Ph.D., Chair, Department of Communication Sciences and Disorders
KAREN MAINNESS, Ph.D., Program Director for Master of Science and Transitional; Credential Advisor
JENNIFER ST. CLAIR, M.S., Director for Clinical Education
KEITH WOLGEMUTH, Ph.D., CCC-A, Program Director for Doctor of Speech-Language Pathology

Health Informatics and Information Management
DEBRA HAMADA, Ed.D., M.A., Chair, Department of Health Informatics and Information Management
BRADEN TABISULA, M.B.A., Program Director for Master of Science, Health Informatics
PAULINE CALLA, M.B.A., Recruitment Coordinator for Health Information Administration Program; Program Director for Bachelor of Science, Health Information Administration
RYAN STEPHAN, B.S., Program Director for Certificate, Coding Specialist

Nutrition and Dietetics
CINDY L. KOSCH, M.S., RD, Chair, Department of Nutrition and Dietetics
GEORGIA W. HODGKIN, Ed.D., RD, Associate Chair, Department of Nutrition and Dietetics
EDWARD BITOK, Dr.P.H., M.S., RDN, Program Director for Bachelor of Science, Nutrition and Dietetics; and Master of Science, Nutrition and Dietetics
ANDREA FANICA, M.S., RD, Clinical Coordinator, Nutrition and Dietetics Program

Occupational Therapy
LIANE H. HEWITT, Dr.P.H., CHES, OTR/L, Chair, Department of Occupational Therapy
HEATHER JAVAHERIAN-DYSINGER, O.T.D., OTR/L, Program Director for Master of Occupational Therapy
JULIE D. KUGEL, O.T.D., OTR/L, Program Director for Doctor of Occupational Therapy
AARON MOESSER, M.O.T., OTR/L, Academic Coordinator for Fieldwork Education, Occupational Therapy Program

Orthotics and Prosthetics
JOHANNES SCHAEPPER, Ph.D., M.S., CPO, Chair, Department of Orthotics and Prosthetics
HEATHER APPLING, M.S., CPO, Program Director for Master of Science in Orthotics and Prosthetics; Clinical Coordinator

Physical Therapy
LAWRENCE E. CHINNOCK, PT, Ed.D., M.B.A., Chair, Department of Physical Therapy; Program Director for entry-level Doctor of Physical Therapy
EVERETT B. LOHMAN III, PT, D.Sc., OCS, Program Director for Postprofessional Doctor of Physical Therapy, Doctor of Science, and Ph.D.

JEANNINE STUART MENDES, PT, M.P.T., Ed.S., Program Director for Associate in Science, Physical Therapist Assistant

RICHARD J. HUBBARD, PT, M.P.T., D.Sc., OCS, Assistant Program Director and Director of Clinical Education for Physical Therapist Assistant Program

THERESA M. JOSEPH, PT, D.P.T., M.B.A., NCS, Director of Clinical Education for entry-level Doctor of Physical Therapy Program

NICCETA DAVIS, PT, Ph.D., M.P.H., M.S.P.T., Director of Clinical Education for entry-level Doctor of Physical Therapy Program

**Physician Assistant Sciences**

GERALD A. GLAVAZ, D.H.Sc., M.P.A.S., PA-C, Chair, Department of Physician Assistant Sciences; Program Director for Master of Physician Assistant Sciences

COURTNEY McCONNELL, M.P.A., PA-C, Clinical Director for Master of Physician Assistant Sciences

MARK MILLIRON, M.Sc., M.P.A., PA-C, Didactic Director for Master of Physician Assistant Sciences

CATHERINE OMS, M.P.A., PA-C, Associate Program Director for Master of Physician Assistant Sciences

WESSAM LABIB, M.D., M.P.H., Medical Director for Master of Physician Assistant Sciences

JENNIFER HAYHURST, M.P.A., PA-C, Clinical Coordinator for Master of Physician Assistant Sciences

LAUREN BOLDA, M.P.A., PA-C, Clinical Coordinator for Master of Physician Assistant Sciences

ERIN GYSBERS, M.P.A.S., PA-C, Didactic Coordinator for Master of Physician Assistant Sciences

RASHA ABDRABOU, Dr.P.H., M.P.H., Director of Assessment for Master of Physician Assistant Sciences

**Radiation Technology**

LAURA L. ALIPOON, Ed.D., Chair, Department of Radiation Technology

MICHAEL F. IORIO, M.P.A., Ph.D., Associate Chair, Department of Radiation Technology; Program Director for Master of Science in Radiation Sciences

J. ROBERT CRUISE, M.S.R.S., Program Director for Certificate, Cardiovascular Imaging

BRIGIT C. MENDOZA, M.A.M., Program Director for Master of Science in Radiation Sciences, Radiologist Assistant

KATHRYN COCKRILL, M.S., Program Director for Certificate in CT and MRI; Assistant Program Director for Bachelor of Science, Radiation Sciences

RAYNOLD HO, M.S., Program Director for Bachelor of Science, Nuclear Medicine Technology

BRENDA BOYD, Ph.D., Assistant Program Director for Associate in Science, Medical Radiography

MARIE M. DELANGE, B.S., Program Director for Bachelor of Science, Diagnostic Medical Sonography, and Cardiac Certificate Program

CAROL A. DAVIS, Dr.P.H., Psy.D., Program Director for Certificate, Medical Dosimetry; Bachelor of Science, Radiation Therapy Technology

BALDEV PATIAL, Ph.D., Program Advisor for Medical Dosimetry

ALVIN HENSEL, M.D., Medical Advisor for Medical Radiography Program

GLENN A. ROUSE, M.D., Medical Director for Bachelor of Science, Diagnostic Medical Sonography Program

DAVID GENTRY, M.D., Medical Director for Bachelor of Science, Nuclear Medicine Technology

TIMOTHY SEAVER, M.A.M., Second Associate Chair, Department of Radiation Sciences; Program Director for Bachelor of Science, Radiation Sciences and Associate of Science, Cardiac Electrophysiology Technology

WILL EDMUNDS, M.Ed., Program Director for Associate in Science, Medical Radiography

Accreditation Status

The University

Founded as College of Evangelists 1905-06. Chartered as College of Medical Evangelists by the state of California December 13, 1909. Accredited by Northwest Association of Secondary and Higher Schools April 7, 1937. Accredited by WSCUC (WASC Senior College and University Commission) (prior to January 1962, Western College Association) February 24, 1960. Became Loma Linda University July 1, 1961. Professional curricula attained accreditation as follow below.

The professions

Faculty of Graduate Studies

The Graduate School began in 1954 with accreditation through University accreditation. It continued through 2004 and restructured as the Faculty of Graduate Studies in 2005. The Faculty of Graduate Studies convenes graduate faculty from research-intensive programs and functions as a peer review body to ensure the quality of academic programs.

School of Allied Health Professions

CARDIAC ELECTROPHYSIOLOGY TECHNOLOGY: Started in 2011. Initial accreditation March 21, 2015, by the Commission on Accreditation of Allied Health Education Programs (CAAHEP).

CLINICAL LABORATORY SCIENCE (formerly Medical Technology):

- Started in 1937. Approved by the Council on Medical Education of the American Medical Association since August 28, 1937. Currently accredited by the National Accrediting Agency for Clinical Laboratory Sciences. Currently approved by the California Department of Public Health, Laboratory Field Services as of 2015.

DIAGNOSTIC MEDICAL SONOGRAPHY: Started in 1976 as diagnostic medical sonography. Approved by the Joint Review Committee on Education in Diagnostic Medical Sonography October 24, 1985.

EMERGENCY MEDICAL CARE: Started in 1993 as a baccalaureate degree program for paramedics, respiratory therapists, and other allied health professionals desiring education, science, or management credentials in emergency medical services.

HEALTH INFORMATION ADMINISTRATION: Started as medical record administration in 1963. Currently approved by the Commission on Accreditation for Health Informatics and Information Management Education.

MEDICAL RADIOGRAPHY: Started in 1941 as radiological technology. Approved by the Council on Medical Education of the American Medical Association November 19, 1944. Currently approved by the Joint Review Committee on Education in Radiologic Technology and the California State Department of Public Health as of 2015.

School of Behavioral Health

School of Behavioral Health programs are accredited through University accreditation and/or through their professional accrediting bodies. Programs offered through the School of Behavioral Health in conjunction with the Faculty of Graduate Studies are accredited through University accreditation.

Department of Counseling and Family Sciences

MARITAL AND FAMILY THERAPY (M.S.): Accredited by the Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE).

MARITAL AND FAMILY THERAPY (D.M.F.T.): Accredited by the Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE).
MARITAL AND FAMILY THERAPY (Ph.D.): Accredited by the Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE).

PUPIL PERSONNEL SERVICES CREDENTIAL: Assigned the status of Accreditation through Linda University on June 18, 2008, by the Committee on Accreditation on behalf of the Commission on Teacher Credentialing (State of California).

Department of Psychology
CLINICAL PSYCHOLOGY (Ph.D.): Accredited by the Commission on Accreditation of the American Psychological Association.
CLINICAL PSYCHOLOGY (Psy.D): Accredited by the Commission on Accreditation of the American Psychological Association.

Department of Social Work and Social Ecology
MASTER OF SOCIAL WORK (M.S.W.): Accredited by the Council on Social Work Education to provide master’s degree-level education, with the next affirmation to be completed in 2018.

School of Dentistry
ADVANCED GENERAL DENTISTRY EDUCATION PROGRAM IN DENTAL ANESTHESIOLOGY: Started in 1985. Approved by the Commission on Dental Accreditation of the American Dental Association since February 2012.

DENTAL HYGIENE: Bachelor of Science degree started in 1959. Approved by the Commission on Dental Accreditation of the American Dental Association since September 7, 1961. Associate in Science degree started in 2011. Approved by the Commission on Dental Accreditation of the American Dental Association since May 2011.

B.S. Degree Completion Program started January 7, 2008;WSCUC approved in 2009.

DOCTOR OF DENTAL SURGERY: Started in 1953. Approved by the Commission on Dental Accreditation of the American Dental Association since May 23, 1957.

ENDODONTICS: Started in 1967. Approved by the Commission on Dental Accreditation of the American Dental Association since December 1969.

ORAL AND MAXILLOFACIAL SURGERY: Started in 1964. Approved by the Commission on Dental Accreditation of the American Dental Association since 1967.

ORTHODONTICS AND DENTOFACIAL ORTHOPEDICS: Started in 1960. Approved by the Commission on Dental Accreditation of the American Dental Association since May 1965.

PEDIATRIC DENTISTRY: Started in 1993. Approved by the Commission on Dental Accreditation of the American Dental Association since December 1993.

PERIODONTICS: Started in 1961. Approved by the Commission on Dental Accreditation of the American Dental Association since December 1967.

Programs offered through the School of Dentistry in conjunction with the Faculty of Graduate Studies are accredited through University accreditation.

School of Nursing
The hospital School of Nursing program began in Loma Linda in 1905 and added the White Memorial Hospital in Los Angeles as an affiliate in 1924. Its college program was accredited by the National Nursing Accrediting Service December 10, 1951, with approval continuing under the National League for Nursing until 2001. The school has been accredited by the Commission on Collegiate Nursing Education (CCNE) since 1999. Initial approval by the California State Board of Health in 1917 was extended until the college program was approved July 1, 1952 by the California Board of Registered Nursing. The master’s degree program started in 1957, the Ph.D. degree program in 2002, and the Doctor of Nursing Practice (D.N.P.) degree program in 2010.

School of Pharmacy

Accredited by the Accreditation Council for Pharmacy Education (ACPE) to offer the Doctor of Pharmacy degree program. ACPE is the sole accreditation agency recognized by the U.S. Department of Education to accredit professional degree programs in pharmacy and is located at 135 South LaSalle Street, Suite 4100, Chicago, IL 60603-4810; telephone: 312/664-3575; FAX: 312/664-4652; website: <https://www.acpe-accredit.org>.

School of Public Health

School of Religion
Started in 1961 as the Division of Religion; organized as School of Religion (1987-1990), Faculty of Religion (1990-2006), School of Religion 2007. Programs accredited through University accreditation.
Accrediting and Approving Agencies

The University
Loma Linda University is accredited by WASC: Accrediting Commission for Senior Colleges and Universities of the Western Association of Schools and Colleges.

985 Atlantic Avenue, Suite 100
Alameda, CA 94501
Phone: 510/748-9001
Fax: 510/748-9797
Web site: <https://www.wascsenior.org>
E-mail: <wascsr@wascsenior.org>

WASC is an institutional accrediting agency recognized by the U.S. Secretary of Education and the Commission on Recognition of Post-secondary Accreditation.

All entry-level degrees are accredited by their respective professional accrediting associations.

In addition to WASC, the following agencies accredit specific University schools or programs:

School of Allied Health Professions

Alumni Associations

School of Dentistry

Graduates of the School of Dentistry organized the Alumni Association in 1957. Membership is extended to those who have earned degrees at this school. Student membership is extended to students of the school.

Primary purposes of the association are to promote the interests of the school, to secure unity among alumni, to foster alumni attachment to the alma mater, to enlist members as continuing participants in the association and as active participants in Christian activities and interests, to aid members in attaining to the highest ethical and scientific standards in the practice of their profession, and to aid in general charitable and educational purposes. Major interests of the association include:

1. Hosting the Alumni-Student Convention, including continuing education programs, class reunions, and spiritual events.
2. Advancing the Century Club. Members include alumni and others of the dental profession who contribute a qualifying amount annually to promote and support interests of the alumni and the school.
3. Preparing and distributing alumni and school news to faculty and staff members, students, donors, and alumni via the biannual LLUSD Articulator and continuous electronic media—such as, digital signage, social media, the Internet, and e-mail communications.
4. Maintaining the online employment opportunities site where dentists and brokers can list practices for sale, associate/ship, and per diem positions. Students are regularly reminded to browse employment opportunities.

The School of Dentistry Alumni Association has made an ongoing commitment to students at the school by supporting a student loan fund and a scholarship endowment fund, both of which are administered by the University.

School of Medicine

Graduates of the School of Medicine organized their Alumni Association in 1915 when only two classes totaling 18 members had graduated. The organization has functioned continuously since that time. Membership is extended to alumni who have graduated with the Doctor of Medicine degree from this University and to graduates of the American Medical Missionary College, operated by Seventh-day Adventists in Battle Creek, Michigan, from 1895 to 1910. Associate membership is extended to students of the School of Medicine, and affiliate membership is extended to faculty members who have earned degrees from other institutions.

During the 1986-1987 school year, membership was extended to the basic science faculty.

Statement of mission and purpose

The Alumni Association of the School of Medicine of Loma Linda University is a nonprofit organization comprising both alumni and affiliate members. The association is organized to support the school, to promote excellence in worldwide health care, and to serve its members in the following ways:

1. EDUCATION—To encourage continuing education among its members by organizing and offering graduate education and related programs at the Annual Postgraduate Convention and at other health-care seminars.
2. COMMUNICATION—To publish newsworthy, factual information about alumni and developments at the School of Medicine in the alumni journal, in the annual directory, and in journals of organizations under the umbrella of the association.
3. HEALTH CARE—To foster improved health care and preventive medicine throughout the world by conducting postgraduate seminars, demonstrations, and people-to-people, health-care interactions with Christian concern and compassion.
4. PHILANTHROPY—To encourage the contribution of funds for the support of undergraduate and graduate education at the school—including funds for student loans, research, and professorial chair endowments; and funds to provide for improvement in the school’s physical plant. To encourage donations of money, equipment, and supplies for educational centers and health-care facilities in areas of need worldwide.
5. MEDICAL RESEARCH—To support medical research among faculty members and students of the school, thereby enhancing the association’s ability to respond to the needs of its alumni and to advance medical knowledge.
6. FRATERNITY—To promote and provide gatherings, in an atmosphere of Christian and professional friendship, that foster unity and advance the foregoing objectives.

School of Nursing

The Loma Linda University School of Nursing Alumni Association (LLUSNAA) has an office in West Hall. A board of officers and directors carries out the goals and ongoing activities of the association. New members are welcomed into the association at graduation. Associate membership may be extended to graduates of other accredited schools who are members of the profession in good standing and who share the interests, ideals, and purposes of the alumni association.

Purpose

The purpose of the LLUSNAA is to foster alumni unity, mobilize their support, and assist in an organized fashion to encourage continued interest in and commitment to the programs of the School of Nursing. The association promotes the missions of the Seventh-day Adventist church, the School of Nursing, and the University. The goals of the association are to:

1. Promote communication among alumni of the School of Nursing.
2. Foster the advancement of education and science within the programs of the School of Nursing.
3. Support alumni nurses in mission programs at home and abroad.
